In documents of 1344-45 mention is made of the synagogue of Aschaffenburg. A scholar of Aschaffenburg, R. Meïr, is quoted in the fifteenth century by Joseph Kolon ("Responsa," No. 1). In the sixteenth century mention is made of a Rabbi Simon ben Isaac ha-Levi, author of "Debeḳ Ṭob" and "Massoret ha-Miḳra"; and in the seventeenth century of R. Meïr Grotwohl. During the seventeenth century, Aschaffenburg had a Jewish congregation of considerable size, as is evident from various documents. In 1698, with the consent of the prince-elector, a new synagogue was built; but in the beginning of the eighteenth century the congregation had dwindled down to twenty members. From this time onward the religious leaders of the community can be enumerated.

Rabbis and Teachers.

In 1719 the various congregations that had the right to use the cemetery of Aschaffenburg founded a charitable and burial society. These congregations were: Goldbach-Hösbach, Grossostheim, Kleinwallstadt, Mömmlingen, Hofstetten, Grosswallstadt, Niedernberg, and Hausen. In the records of the burial society there are some regulations by Isaac Seckel Ethausen, author of אור נעלם ("Or Ne'elam"), who signs as rabbi of the district of Aschaffenburg. In 1723 he left Aschaffenburg, in order to accept the position of chief rabbi of Mayence. In 1769 a convention, presided over by the chief rabbi, D. M. Scheuer, was held, which devoted its attention almost exclusively to the methods of improving religious instruction. Seligmann Sulzbach is mentioned as teacher in the Talmud Torah, in 1779: he was a son-in-law of Meïr Barby, rabbi at Pressburg, in whose work, "Hiddushe Meharam Barby," he is quoted. His successor, in 1784, was Israel Isserl, who calls himself "Rabbi of Eibenschütz." In 1786 Hillel Wolf Sondheimer, who had been assistant rabbi at Fürth, was elected rabbi of Aschaffenburg; but officially he was called "teacher" (*Schullehrer*). In 1803, when Aschaffenburg was separated from Mayence, Sondheimer was made chief rabbi of Aschaffenburg. He officiated in that capacity up to 1832, and died on March 3 of that year, aged eighty-three years. His successor, Gabriel Neuburger, was elected April 13, but was only considered as a deputy, in which capacity he officiated up to 1845. Later he resided as a private member of the congregation in Aschaffenburg, where he died in 1888. He was succeeded by district rabbi Abraham Adler, who officiated until his death in 1880. Adler was succeeded by Simon Bamberger, who had formerly been rabbi in Fischach. Bamberger was at first appointed deputy, but in 1888 was made district rabbi. He died Dec. 9, 1897.

The synagogue, erected in 1698, had to be demolished in 1887, when a new one was built. The congregation maintains a school for religious instruction, and has a separate cemetery besides the one used by the smaller congregations of the district. In the last century the community possessed a Jewish hospital. There are several Jewish charitable associations, which have an income derived from legacies; there is also a social club. The congregation, the members of which are mainly merchants, numbers 130 families.

D. S. Ba.

ASCHE, TOBIAH BEN EZEKIEL (known also as **Tobiah Schlochow**; that is, of Schlochow, near Stolpe, Germany): German Talmudist; rabbi of Zempelburg at the beginning of the nineteenth century. His "'Eṭ Barzel" (Iron Pen) is an explanation of halakic legal themes, and was published posthumously (Berlin, 1832) by his son Gershon, rabbi of Prenzlau. To his father's work Gershon appended his own "Niḳrat ha-Ẓur" (Cleft in the Rock), also of halakic character, and the funeral oration delivered by him at Tobiah's grave.

ASCHENBURG, SIMON B. ISAAC HA-LEVI: Talmudic scholar; lived at Frankfort-on-the-Main, later at Jerusalem, at which latter place he died about 1598. He was the author of a useful supercommentary upon Rashi's Pentateuch commentary entitled "Debeḳ Ṭob" (A Good Bond). This work, often reprinted later, was published for the first time by the author himself at Venice in 1588.

L. G. I. Br.

ASCHER, ANTON: German actor; born at Dresden July 15, 1820; died in Meran April 24, 1885. Trained for the stage by Ludwig Tieck, he made his début in 1838 at Hainichen, Saxony, playing the same year also at Merssen, Bautzen, and Zittau. In 1839 he appeared at Wiesbaden, going to the Hoftheater, Dresden, a few months later. He remained there until 1844; went to Hamburg in 1845; Königsberg and Cassel in 1846; and Potsdam in 1847. From 1848 to 1860 he played bon-vivant rôles at the Friedrich-Wilhelm Theater, Berlin; and toward the end of the engagement he had charge of the stage. From 1866 to 1872 he was director of the Carl Theater, Vienna. His best rôles were *Thorane* in "Der Königslieutenant," *Bolz* in "Die Journalisten," *Zimburg*, and *Richard Weiss*.

Bibliography: Flüggen, *Bühnen-Lexikon*, p. 8.

S. E. Ms.

ASCHER, BENJAMIN HENRY: Hebrew scholar and author; born in 1812 at Peisern (grand duchy of Posen); died Feb. 24, 1893, in London. His father, a corn-merchant, gave his son a careful religious and secular education. In 1840 Ascher went to England, where he soon mastered the English language, and, in 1843, was elected "ḳabranim rabbi" (funeral preacher) of the Great Synagogue. In 1847 he published a new edition of the well-known "Sefer Ḥayyim" (The Book of Life), with an English translation. In 1859 he published Solomon ben Gabirol's "Mibḥar ha-Peninim" (A Choice of Pearls), embracing a collection of ethical aphorisms, maxims, and reflections, accompanied by an English text and explanatory notes. He wrote two other works of minor importance, "Initiation of Youth" (1850), a small catechism, and the ritual for the "Dedication of the House." In 1884 he resigned his office, which he had held for over forty years. Ascher obtained from Sir George Grey several concessions for Jewish prisoners, to enable them to observe their religion.

J. B. B.

ASCHER, JOSEPH: Composer and pianist; born at Groningen, Holland, June 4, 1829; died in London, June 20, 1869. He was a son of Simon Ascher, reader of the Great Synagogue, London, and studied music under Moscheles, whom he followed to the Conservatory at Leipsic, where he became a pupil of Mendelssohn. In 1849 he went to Paris and subsequently received an appointment as pianist to the empress Eugenie. The emperor of Austria also made him court pianist; and he was decorated by ex-Queen Isabella of Spain. During the last two and a half years of his life he suffered from nervous debility incurred by his irregular life and by overexertion in his musical studies. Many of his shorter pieces evince a decidedly original turn. Among his best-known compositions are two mazurkas, "La Perle du Nord" and "Dosia," and an étude, "Les Gouttes d'Eau." Besides these, he wrote more than a hundred galops, nocturnes, mazurkas, transcriptions, and études, and a considerable number of drawing-room pieces. His song, "Alice, Where Art Thou?" is still a favorite at concerts.

J. G. L.

ASCHER, SAUL: German author and translator; born at Berlin Feb. 8, 1767; died there Dec. 8, 1822. He began his literary career as an advocate of Jewish emancipation; gradually extending his activities to general topics, chiefly historical, political, and religious. His works are: "Bemerkungen über die Bürgerliche Verbesserung der Juden, Veranlasst bei der Frage: Soll der Jude Soldat Werden?" Frankfort-on-the-Oder, 1788; "Scholien, oder Fragmente der Philosophie und Kunst," Berlin, 1790; the same under the title "Philosophische Betrachtungen über Empfindungs- und Erkenntnisskraft," Berlin, 1793; "Leviathan, oder über Religion in Rücksicht des Judenthums," Berlin, 1792; "Eisenmenger der Zweite; nebst einem Vorangesetzten Sendschreiben an Herrn Professor Fichte in Jena," Berlin, 1794; "Graf von Thein ein Wundarzt," in the Berlin "Monatsschrift," Berlin, 1794; "Napoleon, oder über die Fortschritte der Regierung," 1808; "H. Grégoire: die Neger, ein Beitrag zur Menschen- und Staatskunde," translated from the French, 1809; "Biographisch-Historische Skizzen" (2 vols.); "Theodiskus, Unterhaltungen in den Abendstunden" (2 vols., 1813); "Die Germanomanie," 1815; a translation from Mandeville's "Fables of the Bees," with a commentary, 1817; "Die Wartburgfeier," 1818; "Idee einer Pressfreiheit und Censurordnung," 1818; "Ansicht von der Zukunft des Christentums," second edition, 1819; "Der Geistesaristokratismus," 1819; "Europa's Politischer und Ethischer Zustand seit dem Congress von Aachen," 1820.

S. W. S.—M. B.

ASCHER, SIMON: Ḥazan; born in Holland, 1789; died at London December, 1872. He was reader and cantor of the Great Synagogue, London, for a period of thirty-seven years. With the aid of Mombach, the well-known composer, he may be said to have systematized English synagogue-music; and memories of his fine voice are still a tradition among English Jews, who recall his clear tenor and florid style of recitative with frequent roulades.

ASCHIAN. See Ashya.

ASCOLI, DAVID D': Italian writer; lived about the middle of the sixteenth century. He was the author of "Apologia Hebræorum," published at Strasburg in 1559, in which he protested against the decree of Pius IV. commanding all Jews in Catholic countries to dress in orange or yellow to distinguish them from Christians. Both Ascoli and Cinelli, who praised the book in the "Bibliotheca Volante," suffered a long term of imprisonment for their free criticism of the ecclesiastical authorities.

G. W. S.

ASCOLI, GIULIO: Italian mathematician; born in Triest Nov. 20, 1843; died in Pisa. Reared in a city with a large Italian-speaking population, a natural inclination drew young Ascoli to Milan, where, from 1874 until 1879, he taught mathematics at the Reale Istituto Tecnico Superiore. In the latter year he was appointed associate professor at the polytechnic school of Milan, and was elected corresponding member of the Reale Istituto Lombardo di Scienze e Lettere.

Ascoli's contributions to mathematics, which belong principally to the domain of the theory of functions, and deal particularly with Fourier's series, have been published in Brioschi's "Annali di Matematica," the reports of the Reale Istituto Lombardo, Battaglini's "Giornale di Matematica," the "Mathematische Annalen," the transactions of the Reale Accademia dei Lincei, etc. Brief notices of Ascoli's mathematical papers may be found in the pages of the "Jahrbuch über die Fortschritte der Mathematik" (Berlin).

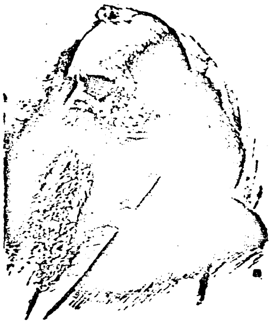
ASCOLI, GRAZIADIO ISAIAH: Italian philologist; born July 16, 1829, at Gorice, Austria. His father, who had made a fortune in the manufacture of paper, died while Graziadio was an infant. Graziadio devoted himself at an early age to the study of languages, especially to comparative philology, to which latter he became passionately attached. At the age of sixteen he made a sensation in philological circles by a comparative study of the Friulian dialect and the Wallachian tongue ("Sull' Idioma Friulano e sulla sua Affinità con la Lingua Vallacca; Schizzo Storico-Filologico," Udine, 1846)—a masterly work, considering that the subject had never before been treated, and that the boy philologist had not even a suggestion from a teacher.

First Work.

Appointed Professor in Milan.

Ascoli thenceforth devoted himself with enthusiasm to the promotion of the study of philology in Italy; and in 1854 he founded the first linguistic journal in his country under the title of "Studii Orientali e Linguistici." The vast erudition exhibited by the brilliant editor of the two volumes that appeared between 1854 and 1855 won for him the chair of comparative philology at the Accademia Scientifico-Litteraria of Milan. There he began his "Corsi di Glottologia," afterward published and translated into English and German, and awarded the Bopp prize by the Berlin Academy. At Milan Ascoli realized his life-dream of reviving the study of languages in Italy and of reawakening the taste for the Oriental tongues, which, since the death of the two Assemani, had almost sunk into oblivion.



G. I. Ascoli.

All the philologists of any importance in Italy have been the disciples of Ascoli. He is one of the few really great pioneers that have given the study of language its present strictly scientific character; and he has left the impress of his genius on almost every branch of linguistics. In comparative philology, in the study of Oriental languages and of the tongues and dialects of Europe, in the science of phonology—in all these his richly creative and original mind, combined with an unparalleled erudition and a rare sense of penetration, has achieved brilliant and lasting results. His "Fonologia Comparata del Sanscrito, del Greco e del Latino" (Turin and Florence, 1870; translated into German by Bazzigher and Schweizer-Sidler, Halle, 1872), followed in 1877 by the "Studii Critici" (Turin and Florence; translated into German by Merzdorf and Mangold, Weimar, 1878) at a time when the discussion of phonetic principles was most active—wrought a revolution in comparative Indo-Germanic philology. In particular, his distinction between the velar and the palatal gutturals—as for instance between the sounds of "kite" and "quite"—solved many of the difficulties found in the application of Grimm's law in its cruder form.

Contributions to Philology.

Ascoli is the author of many important discoveries in the science of phonology, he having been the first to formulate many of the laws of phonetic change: both in Italy and abroad he is deemed one of the greatest authorities on all questions in this important branch of linguistics. Hardly less great is Ascoli's reputation as an authority on Romance philology; and his "Saggi Ladini" (Vienna, 1872; reprinted in vol. i. of the "Archivio Glottologico Italiano") was epoch-making in the study of Italian and the more closely allied Romance tongues, and brought forth a mass of important and valuable researches, published in the "Archivio Glottologico Italiano" founded at that time by him.

Ascoli is also the author of: "Lettere Glottologiche" (Turin and Milan, 1881–86), to which the Institute of France awarded the Volney prize, and which, like most of Ascoli's larger contributions, have been translated into German (by Güterbock, Leipsic, 1887); "Il Codice Irlandese dell' Ambrosiana," edited and illustrated by himself, containing deep and fruitful researches on the Celtic tongues (published as vols. v. and vi. of the "Archivio Glottologico Italiano"); the "Saggi Indiani," an important contribution to comparative Indo-Germanic phi logy (first published in the "Archivio Glottologico Italiano"); the brilliant researches on the Gipsy language, which appeared under the title, "Zigeunerisches," and especially an appendix to Pott's work, "Die Zigeuner in Europa und Asien" (Halle, 1865), and other works.

Scientific Papers.

The greater part of Ascoli's scientific papers may be found in his journal, the "Archivio Glottologico Italiano," of which 15 volumes had appeared up to 1900. But he has also contributed largely to the following journals among others: "Archivio Storico Italiano," the "Crepuscolo," the "Atti dell' Istituto Lombardo," the "Rivista di Filologia," the "Zeitschrift der Deutschen Morgenländischen Gesellschaft," the "Beiträge zur Vergleichenden Sprachforschung" (ed. Kuhn). His paper in the "Atti del Quarto Congresso degli Orientalisti" shed unexpected light on the origin of the Sassanian coins in the Naples Museum, and supplied a long-felt want by a brilliant interpretation of important medieval inscriptions in Hebrew discovered in southern Italy.

Probably the only work of Ascoli's that did not receive universal favor was his investigations on proto-Aryan tongues and the affinities between the Aryan and the Semitic languages. In Italy his work "Nesso Ario-Semitico," 1863–64, created a new school, which has many adepts among eminent scholars; but European and American philologists are divided as to the merits of Ascoli's theory.

Honors and Distinctions.

Ascoli has received many honors and distinctions in his professional and literary career. He has been repeatedly elected president of the Reale Accademia Scientifico-Litteraria of Milan, and is a member of the Higher Council of Public Instruction; cavalier of the Order of Merit of Italy; knight of several foreign orders; member of the Institute of Lombardy and of the Accademia dei Lincei; honorary member of the Asiatic Society of Italy; corresponding member of the Académie des Inscriptions et Belles-Lettres of Paris; member of the academies of Berlin, Vienna, Budapest, St. Petersburg, etc.; and of every philological society of importance in his native country and abroad.

The long-expected appointment of Ascoli to a senatorship in the kingdom took place Jan. 25, 1889.

s. A. S. C.

ASCOLI, JACOB BEN ABRAHAM ROFE: Physician and payyeṭan; lived at Camerino, Italy, perhaps at Ascoli, in the second half of the fifteenth century. Two Reshuts for Nishmat of his are printed in the Maḥzor Romania—(1) For the Day of Atonement: יודו לשמך עלין, מורה דרך לשוב לך כל חי, etc. ("They will praise Thy name, O Most High, who showest the road by which every living being will return to Thee"); (2) For the Feast of Tabernacles: יכו״ש גואל סכת שלום על עם בחר מכל עמים ("May the Redeemer spread a tabernacle of peace over the people that He hath chosen among all peoples"). In signing these "reshuts," Ascoli added to his name the word וחי, which seems to correspond to the verse of Psalms ויבאני חסדך י״י ("Let thy mercies also come unto me, O Lord," Ps. cxix. 41).

ASEFAH: Technical term for the meetings of the members of the Jewish communities of Poland and Lithuania. In cases of importance, the director of the "kahal" ("parnes ḥodesh") gave the order to the "shammash" of the "kahal-stübel" (the servant of the office) to call the prominent members of the "kahal" to a conference. All the important affairs of the community, the internal as well as the external, including in the latter communications from the government authorities, were brought before the Asefah.

H. R.

ASENATH.—Biblical Data: Daughter of Poti-pherah, priest of On, and wife of Joseph (Gen. xli. 45). The name is apparently Egyptian; but no satisfactory explanation has yet been proposed.

J. Jr. G. B. L.

——**In Rabbinical Literature:** That Joseph, called "the righteous" (Book of Wisdom x. 13; Ab. R. N. xvi., and elsewhere), should have married a heathen wife seemed objectionable to the Rabbis; and they consequently state that she was the child of Dinah, the daughter of Jacob, born after violence had been done her by Shechem, the son of Hamor (Pirḳe R. El. xxxviii.; Midr. Abkir, quoted in Yalḳ., Gen. 146; Targ. Yer. Gen. xli. 45, xlvi. 20; Midr. Aggadah, ed. Buber, i. 97). When her brothers had learned of the birth of an illegitimate child in their family, they wanted to kill the child in order to prevent public disgrace. But Jacob placed upon the child's neck a talismanic plate engraved with the name of God, and—according to one version—left her exposed under a thorn-bush (סנה, "seneh," whence the name of the girl, "Asenath"), and the angel Gabriel carried her to the house of Potiphar in Egypt, where the latter's wife, being childless, reared her as her own daughter. According to another version (Midr. Aggadah, *l.c.*), Jacob had the child exposed under the walls of Egypt. Her crying attracted the attention of Potiphar, who was passing at the time. Stories about Asenath, somewhat similar to the Midrashic traditions, are found in Syriac and Arabic literatures.

Bibliography: Perles, in *Rev. Et. Juives*, xxii. 87–92; Payne Smith, *Thesaurus Syriacus*, s.v. *Dinah*; Sachau, in *Kurzes Verzeichniss der Sachau'schen Sammlung*, p. 7, for the Syriac; and Goldziher, in *Jeschurun*, viii. 84, for the Arabic.

J. Sr. K.

ASENATH (in Greek 'Ασενέθ), **LIFE AND CONFESSION OR PRAYER OF:** A Greek Apocrypha of pronounced Jewish character, with only one small Christian interpolation. It contains a Midrashic story of the conversion of Asenath, the wife of Joseph, and of her magnanimity toward her enemies. For a long time known only through an abridged Latin translation embodied in Vincent of Beauvais' "Speculum Historiale," ch. cxviii.–cxxiv., it was first published in full by P. Batiffol, after four manuscripts, in his "Studia Patristica," Paris, 1889-90, with a valuable introduction. A fragment had previously appeared in Fabricius, "Codex Pseudepigraphicus Veteris Testamenti," ii. 85–102. A Syriac translation of the sixth century, discovered by Assemani (see Wright, "Syriac Literature," in "Encyc. Brit." xxii. 855 *et seq.*), is published in Land's "Anecdota Syriaca," iii. 18–46, and rendered into Latin by Oppenheim, "Fabula Josephi et Asenathæ Apocrypha," Berlin, 1886. An Armenian translation appeared in "Revue Polyhistoire," 1885, 200-206, and 1886, pp. 25–34, and in the "Armenian Collection of Apocrypha of the Old Testament," Venice, 1896. On the Slavonic version, see Bonwetsch, in Harnack, "Gesch. d. Altchristl. Literatur," i. 915; on the Ethiopic version, Dillman, in Herzog-Plitt, "Real-Encyklopädie," 2d ed., xii. 366. Neither the rabbinical nor the patristic literature has preserved any trace of the story.

Model of a Proselyte.

The book consists of two parts. The first, which is the larger, and which has given it the name of "Prayer or Confession of Asenath," presents Asenath as a model of a Jewish proselyte in the light of Hellenistic propaganda. Asenath, the daughter of Potiphar (Pentephres), priest of Heliopolis (On), a rich man and chief counselor of Pharaoh, far surpassed the Egyptian maidens in beauty; for she was "tall like Sarah, handsome like Rebekah, and fair like Rachel," and the fame of her beauty filled the land. Reared in great luxury but in entire seclusion, a worshiper of idols, she thinks only of marrying Pharaoh's son; and when her father proposes to her that she become the wife of Joseph, "the mighty man of God," who honored him with a visit, she proudly refuses because he has been a slave and owes his release from prison only to his skill in interpreting dreams. But on seeing Joseph's beauty when sitting alone at table (compare Gen. xliii. 32, reversed in the spirit of Dan. i. 5), she falls in love with him, as do all the Egyptian women (compare Yalḳ. and Targ. Yer. on Gen. xlix. 22; Koran, sura xii. 30).

Joseph, on learning from Asenath's father that she is a pure-minded woman who has never seen a man before, gladly receives her like a sister, but refuses to kiss her, saying:

> "It is not befitting a pious man who blesses the living God with his lips, who eats the blessed bread of life, drinks of the blessed cup of immortality, and anoints himself with the oil of incorruption, to kiss a foreign woman who blesses dead and dumb idols with her lips, eating the bread of death from their table, drinking of their libations from the cup of treachery, and anointing herself with the ointment of perdition. In fact, a pious man kisses besides his mother and his sister only his own wife: nor does a pious woman kiss a strange man; for this is an abomination before the Lord God."

Asenath's Penitence.

When Asenath bursts into tears, Joseph compassionately lays his hand upon her head, praying that the God of his father Israel, the Creator of the Universe, who calleth men from darkness to light, from error to truth, and from death to life (compare Philo, "De Pœnitentia," i. and ii.; "De Nobilitate," vi.), may renew her with His holy spirit that she may eat of the bread of His life, drink of the cup of His blessing, and join her to the number of His people He had chosen before the Creation of the universe, so that she may partake of the bliss prepared for His chosen ones in the life everlasting. Asenath returns to her rooms, and with bitter tears, repenting of her idolatrous practises, spends eight days in fasting and penance; putting on sackcloth, strewing ashes upon her head, lying on the floor strewn with ashes, and foregoing sleep at night. She takes her costly robes and jewelry and throws them down on the street, in order that the poor may sell them for their needs; destroys all her idols of silver, gold, and precious stones in accordance with rabbinical law (see 'Abodah Zarah 43b–44), and casts them to the needy for their use; while all the edible things prepared for her gods she throws to the dogs. Being well-nigh exhausted from fasting and weeping, she at first feels utterly forsaken, having brought the hatred of her parents and kinsmen upon herself by despising their gods; yet she lacks the courage to pray with polluted lips to "the jealous God of Joseph, the God who hates idolaters." Finally, the thought that He is also a merciful and compassionate God, the Father of the orphaned, the comfort of the broken-hearted, and the helper of the persecuted, fortifies her to offer a supplication, echoing the deepest longing of a God-seeking soul, full of saintly humility and contrition.

The Prayer.

The prayer, which is a long one, shows indisputable elements of Essene lore. Asenath begins with an address to God as "Creator of the Universe, who fastened the foundation-stones of the earth upon the abyss so that they do not sink; who spoke and all things were made; and whose word is the life of all creatures." She then makes a confession of her sins in words familiar to the Jew acquainted with the ancient liturgy:

> "Have pity on me, O Lord; for I have greatly sinned, transgressed, and done evil. Knowingly and unknowingly, I have sinned by worshiping idols and by polluting my lips by their sacrificial meal. I am not worthy to open my mouth to speak to Thee, O Lord—I, the wretched daughter of Potiphar, once so proud and haughty."

Still more characteristic is her petition:

> "I take refuge with Thee, O Lord. As the little child flees in fear to the father, and the father takes it to his bosom, so do Thou stretch forth Thy hands as a loving father and save me from the enemy who pursues me as a lion, from Satan, the father of the Egyptian gods, who desires to devour me because I have despised his children, the Egyptian gods. Deliver me from his hands, lest he cast me into the fire; lest the monster of the deep [leviathan] eat me up, and I perish forever. Save me; for my father and mother deny me, and I have no hope nor refuge but Thy mercy, O Lover of men, Helper of the broken-hearted! There is no father so good and sweet as Thou, O Lord. All the houses my father gives me as possessions are for a time and perishable; but the houses of Thy possession, O Lord, are indestructible and last forever."

On the morning of the eighth day an angel appears to her resembling Joseph, but with a face like lightning, and with eyes like beams of fire, the captain of the host of the Lord (Michael). He tells her to wash, and to exchange her garments of mourning for garments of beauty—for as a pure virgin she needs no veil—and then announces to her that "from that day on she should be reborn, while eating the blessed bread of life, and drinking the cup filled with mmortality, and anointing herself with the blessed il of incorruption, and that her name should be written in the book of life never to be effaced." She should no longer be called "Asenath" (אסנת), but City of Refuge ("Manos" מנוס), for through her many Gentiles (ἔθνη) should take refuge under the wings of the divine Shekinah (compare Rev. xiii. 6), and under her walls those that turn to God, the Most High, should find protection in repentance. (This is clearly the meaning of the original text; and what follows defies explanation.) The angel then prepares her for the arrival of Joseph as her bridegroom, and tells her to put on her bridal gown, "prepared from the beginning of the world," which glad tidings she receives with a prayer of thanksgiving to the Lord "who rescued her from darkness and led her from the deep abyss unto light."

Christian Interpolation.

She then orders bread and wine to be set before the angel; but nothing is said of the eating of the bread and the drinking of the wine to which Joseph and the angel had both alluded in connection with her looked-for conversion. Instead of this, a miraculous incident is told. A honeycomb of wondrous odor is provided by the angel—prepared, as he says, by the bees of paradise from the dew of the roses, as food for the angels and all the elect ones of God. The angel puts some into the mouth of Asenath, saying: "Behold, thou eatest the bread of life and drinkest the cup of immortality, and art anointed with the ointment of incorruption. Behold, thy flesh shall bloom with the fountain of the Most High, and thy bones fatten like the cedars of the garden of God; thy youth shall not see old age and thy beauty shall never vanish; but thou shalt be like the walled mother-city for all (Syriac Version, "who take refuge with the name of the Lord God, the King of all the worlds"). Here again allusion is made to the Hebrew noun "manos" (refuge) for Asenath. Then, in several manuscripts and the Syriac translation, the story is told that the angel makes a cross over the honeycomb with his finger and the same is turned into blood. Another miracle follows. Some bees are slain by the angel, but rise again, thus symbolizing the resurrection. Obviously, this episode is an interpolation by a Christian writer, who removed the passage relating to the eating of the covenant bread and the drinking of the covenant wine alluded to afterward. Asenath, however—the main story continues—tells the angel to bless also her seven virgins; and he does so, calling them seven columns of the "City of Refuge," and wishing them also to attain eternal life. He then disappears in a fiery chariot drawn by lightning-like horses.

Asenath then washes her face with pure water from the well, and behold! her whole being is transformed. She is amazed at her own beauty; and when she goes to meet Joseph he does not recognize her. She tells him: "I have cast all my idols from me; and, behold! a man from heaven came to me today and gave me of the bread of life, and I ate, and I drank of the blessed cup, and he gave me the name 'City of Refuge,' saying, 'In thee many heathen will seek refuge in God.'" Joseph, in return, blesses her, saying: "God has laid the foundation of thy walls; and the children of the living God shall dwell in the city of thy refuge, and the Lord God will be their King forever." They then kiss each other. (The rather strange symbolism contained in the narrative, which says that Joseph kissed her three times, thereby giving her the breath of life, the breath of wisdom, and the breath of truth, is hardly part of the original story.) Joseph accepts Asenath's invitation to partake of the meal she has prepared, Asenath insisting upon being permitted to wash his feet. Asenath's parents and relatives also come to partake of the meal, and, greatly amazed at her uncommon beauty, they praise "the Lord who reviveth the dead."

Wedding-Feast Given by Pharaoh.

The wedding-feast is not given by Potiphar, who wanted Joseph to stay with Asenath at once, but by Pharaoh himself, who places golden crowns upon their heads, "such as were in his house from of old" (that is long prepared by God), and makes them kiss each other while he blesses them as father. He has all the princes of the land invited, and proclaims the seven days of the nuptial festivities to be national holidays, decreeing that whosoever should do any work thereon should be put to death.

Typical Story of Convert to Judaism.

It is obvious that this is, to all intents, a typical story of the conversion of a heathen to Judaism. There is no other savior or sin-forgiving power mentioned throughout the book than the God of Israel. In fact, the conception of the Shekinah under whose wings the heathen came to take refuge, of the power of repentance by which all impurity of the soul is removed and eternal bliss is secured by the heathen, is so thoroughly Jewish that the Christian copyists seem to have been puzzled by it and thus led into confusion and error, as the manuscripts in ch. xv. show. But the leading idea of the story becomes clear and intelligible only by recurrence to the Hebrew name, "Asenath," which, by a transposition of the letters, is made to read "nasat" (she has fled)—from her idolatry, and which also suggests the idea of "manos" (refuge) and "nas" (to flee), also taken as "refuge" (Ps. lix. 17; II Sam. xxii. 3; Deut. xix. 3; and Ex. xvii. 15). Compare also Tan., Wayera, ed. Buber, ii. 110, where "nisah" occurs in Gen. xxii. 1, and "nes" in Ps. lx. 6; and Yalḳut, Judges, iii. 1, where the word "lenassot" is taken in the sense of "refuge": "God is refuge to His worshipers; while from the wicked the refuge departs" (Job xi. 20). Every proselyte is, according to Philo ("De Monarchia," i. § 7; "De Victimas Offerentibus," § 10; "De Septenario," § 2; "De Creatione Principum," § 6; "De Caritate," § 12; "De Pœnitentia," §§ 1, 2; "De Execratione," § 6; "Fragmenta ad Ex. xxii." § 20; compare Num. R. viii.), without a natural protector, because he has left his parents and his parental faith, and therefore seeks refuge under the wings of God as his Protector (Ruth ii. 12). This view of the proselyte claiming protection in some city of refuge, emphasized by Philo, has found expression also in the Halakah (see Sifre, Deut. 259; Targ. Yer. on Deut. xxiii. 16, 17). Asenath is presented as the type of a true proselyte who, finding herself forsaken when renouncing her idolatry, seeks and finds refuge in God. It seems that when the view of Asenath's having been a proselyte was superseded by the theory that she was the daughter of Dinah (see Asenath), Pharaoh's daughter, the foster-mother of Moses, replaced her in rabbinical tradition. She was represented as a proselyte who went to wash herself clean from the idolatry of her father's house, and became Bithyah, "the daughter of the Lord" (Soṭah 12*b*; Meg. 13*a*; Ex. R. i.; Lev. R. i.).

The second part of Asenath's Life and Prayer is of a different character. It resembles the heroic legends told of the sons of Jacob in the Testaments of the Twelve Patriarchs and in the Book of the Jubilees; and its lesson is simply ethical: the pious ought to show magnanimity toward his enemy. On the twenty-first day of the second month in the second year of the famine, Jacob went with his family to live in Goshen, and Asenath went to see him because he was to her as a father and as a god. But she was amazed at his beautiful appearance, as he, with his thick snow-white hair and long white beard, resembled a robust youth with arms and shoulders like an angel (Gen. R. lxv.), and with the thighs, legs, and feet of a giant.

Jacob's Heroic Sons.

Jacob blessed her and, according to the Syriac translation, said to her, "Thou art like one who returneth from the battle-field after a long absence." Batiffol thinks that this refers to the rabbinic view that she was the daughter of Dinah; but the allusion is rather vague. More striking is it that Simeon and Levi, the two avengers of Dinah, accompany Asenath and Joseph, and play a prominent part as the protectors of Asenath in the event that follows. Levi, "whom Asenath loved more than all the other brothers of Joseph—because as a prophet and a saint he read the heavenly writings and disclosed them (in true Essene fashion) to Asenath in secret, having seen her place of bliss in a diamond-walled city in the highest heaven"—went to the right of Asenath, and Simeon to the left as they journeyed home. But the son of Pharaoh, on seeing Asenath, fell in love with her, and sent for Simeon and Levi, offering them great treasures if they would aid him in obtaining Asenath, who was, as he says, betrothed to him before Joseph took her to wife; but they refused to do so. When Pharaoh's son unsheathed his sword to kill them, Simeon intended to slay him; but Levi restrained his impetuosity, whispering to him, "We are God-fearing men; and it is not befitting that we should requite evil for evil." The son of Pharaoh fell into a swoon when he saw drawn from their scabbards the swords with which the two brothers had avenged the violence perpetrated by Shechem against their sister.

But he succeeded in winning, by some tale of falsehood, the sons of Bilhah and Zilpah to aid him in his plans. Dan and Gad at once agreed, and started that same night, each with five hundred warriors at his side, and with fifty spearmen on horses to form the vanguard. Naphtali and Asher followed, though they had at first tried to dissuade their brothers from acting so wickedly against their father and brother.

The son of Pharaoh, angry at his father's love for Joseph, made an unsuccessful attempt to slay his parent. He then went with six hundred spearmen to capture Asenath. Joseph had gone to the capital to sell corn, and Asenath was left with six hundred men as her body-guard, Benjamin being at her side in the chariot, when suddenly, from behind the thicket at the roadside where they had lain in ambush, the spearmen of Pharaoh's son came forth and began an attack upon Asenath's body-guard. Asenath, when she saw Pharaoh's son, called upon the name of the Lord, and fled from her chariot; but Benjamin, a lad of nineteen with the power of a young lion, leaped from the chariot, and filling his hand with stones gathered from a ravine, cast one (like David) against the right temple of the son of Pharaoh, inflicting a deep wound which threw him from his horse to the ground half dead. Then he wounded in like manner fifty of the spearmen who were with Pharaoh's son; and they fell down dead before him.

Attack on Asenath's Body-Guard.

In the meantime Levi, who by his prophetic power realized Asenath's danger, called his brothers, the sons of Leah, to arms; and they pursued the men who lay in wait for Asenath, killing them all. The sons of Bilhah and Zilpah, however, fled before them, and with drawn swords hurried toward Asenath and Benjamin, intending to slay them; but at the prayer of Asenath, behold! their swords fell out of their hands to the ground and were turned into ashes. The sons of Bilhah and Zilpah implored her forgiveness, entreating her to save them from the hands of their brothers; and she pardoned them and told them to hide behind the thicket until she had succeeded in pacifying their brothers. This she did, telling them to spare their brothers and not to requite evil for evil; and when Simeon in his violent rage wanted to be the avenger of wrong, she entreated him again, saying, "Do not requite evil for evil, let the Lord avenge the wrong, but do you show forgiveness." Meantime the son of Pharaoh had risen from the ground, blood issuing from his mouth and forehead, and as Benjamin was about to strike him down, Levi seized his hand, saying, "Do not do this, brother, for we are pious men and it does not befit us to requite evil for evil, or to smite a fallen enemy. Assist me in healing his wounds; and if he recover, he will be our friend, and his father, Pharaoh, will be our father." Levi then lifted the son of Pharaoh from the ground, washed and bandaged his wound, placed him upon his horse, and brought him to Pharaoh, who received him with his paternal blessing. On the third day after his arrival the son of Pharaoh died, and his father, who was 109 years old, overcome with grief, soon followed. Pharaoh bequeathed the crown to Joseph, who ruled over Egypt forty-eight years, and then left the throne to Pharaoh's youngest son, who, being an infant at the time of his father's death, was left in charge of Joseph, who became a father to him.

Levi's Magnanimity.

This second part of the book has, as far as can be seen, left no trace either in rabbinical or patristic literature. The rôle played by the sons of Bilhah and Zilpah is, however, the same as is ascribed to them in the Testaments of the Twelve Patriarchs (Test. Patr., Dan. 1 and Gad 1; but in Gen. R. lxxxiv.;

Jer. Peah i. 1, p. 16*a*; Targ. Yer. to Gen. xxxvii. 2, somewhat different). At any rate the ethical maxim, not to requite evil for evil, but to be magnanimous toward the enemy, is decidedly Jewish. A Christian writer would most certainly have emphasized the teaching: "Love your enemies" (Matt. v. 44).

The book as a whole belongs to the Hellenistic propaganda literature by which Jewish writers endeavored to win the non-Jewish world for the Jewish faith, while at the same time eagerly representing their Hebrew ancestors as physical as well as moral heroes. See Proselytes. K.

ASH: The A. V. rendering of the Hebrew "oren" (Isa. xliv. 14); R. V. has "fir-tree." According to Tanḥum (quoted in Gesenius, "Thesaurus," under ארן), the word was used in later Hebrew in the sense of "mast." The plural, "oranim"—for which Hai Gaon uses the Aramaic form "ornan"—is mentioned in the Mishnah (Parah iii. 8) between cedars and cypresses. The tree belongs to the family of the conifers, has hard wood, and a tall, smooth, straight stem. This agrees with tradition and etymology. The Targum renders the word "urna," a Hexaplar addition to the Septuagint πίτυς; Jerome translates it *pinus*; while Maimonides and Tanḥum explain it to be a kind of cedar. This, together with the evidence that comes from the Assyrian and Syriac equivalents, makes it evident that the term denotes some kind of fir. The most acceptable suggestion is that of Tristram, who sees in it the Aleppo pine (*Pinus Halepensis*). The word is not to be confounded with "aron," which occurs in the Talmud as the name of the laurel-tree.

ASH (also **Asch** [א"ש]): A family name which is an abbreviation of "Alt Schul" or "Eisenstadt" (אייזן שטאט). Such abbreviations are especially frequent in names of which the second part begins with the sound "s," for which the Hebrew puts ש. So "Lasch" (ל"ש) is put for "Lichtenstadt," and "Nasch" (נ"ש) for "Nikolsburg." The name "Ash" for "Eisenstadt" is found in the case of Meïr Ash, rabbi of that place, died June 7, 1744. His descendant, Abraham Ẓebi Hirsch, rabbi of Ottynia, who died Aug. 21, 1868, signs his name "Eisenstadt." "Ash" is also found as an abbreviation in the name of another Meïr Ash, whose official family-name was Eisenstaedter, author of "Imre Esh" (Words of Fire), Unghvar, 1864. He was rabbi of Unghvar, and died Dec. 27, 1861. The pun on א"ש as "fire" may also underlie the titles of the works of the first Meïr Ash, as, for instance, his "Panim Meïrot" (The Shining Face). See Names. D.

ASH, ABRAHAM JOSEPH: Talmudist; born in Semyatitch, Russia, about 1813; died in New York city May 6, 1888. Coming to the United States in 1852, he helped to organize, in New York city, the first Russian-American congregation, Bet ha-Midrash ha-Gadol, and eight years later he was elected its rabbi. In this capacity he served till his death, with the exception of brief intervals in which he made futile attempts to engage in business, seeking to free himself from dependence on the rabbinate for a livelihood. He strenuously opposed the endeavor by some of the Reform rabbis in 1886 to deliver lectures in Orthodox congregations, and he wrote an open protest headed with the Talmudic legal phrase, מה לשור המזיק ברשות הניזק ("What right has the ox of the damager in the premises of the one damaged!").

ASHAMNU (אשמנו, "we have trespassed"): The old shorter form of the confession of sin ("Widdui"), mentioned in the Talmud and in the "Didache" (first century C. E.), in which each letter of the Hebrew alphabet is successively utilized as the initial of an acknowledgment of wrong-doing, the round number of twenty-four expressions being reached, after the usual fashion, by the threefold employment of the last letter, ת. Originally chanted by cantor and congregation together in a monotone or a simple intonation of breadth and majesty, its rendering among many Polish congregations in the repetition of the "'Amidot" on the Day of Atonement typically illustrates degeneration of the traditional congregational setting of a solemn passage into florid elaboration by a soloist. Originally leading the people by dictating to them word by word, the precentor came to be satisfied to start them in each of the sections into which the occasional use of an accusative noun marked off the succession of otherwise intransitive verbs, and, when the congregation had subsided into silence, to complete the section himself in a melismatic solo after the manner shown on page 176.

A. F. L. C.

ASHAN: Town in the domain of Judah (Josh. xv. 42), but which was in the actual possession of Simeon (Josh. xix. 7; I Chron. iv. 32). Priests also had residence in Ashan (I Chron. vi. 44); though in the corresponding passage of Josh. xxi. 16, "Ain" (which may simply be a corruption of "Ashan") is given instead. Chor-ashan (or, rather, Bor-ashan) of I. Sam. xxx. 30 is perhaps the same as Ashan.

J. JR. G. B. L.

ASH'ARIYA: Mohammedan theological sect, founded at the beginning of the tenth century by Abu el-Hasan al-Ash'ari ("the Hairy"). Its aim was to combat doctrines taught by the Rationalists (Motazilites), and at the same time to moderate the uncompromising rigidity of the views of the Orthodox party. The principal points of controversy between the Orthodox and the Motazilites were: (1) the preexistence of the Koran, (2) predestination of human acts, and (3) the divine attributes. While the Motazilites asserted that the Koran was created, the Orthodox held that the Koran existed before the creation of the world (compare the same view held by the Rabbis regarding the Torah Sifre, 'Ekeb. 37; Pes. 54*a*; Ned. 39*b*; Gen. R. i.; Tan., Naso, 19; Tanna debe Eliyahu i. 31; and Pirḳe R. El. iii.).

The Ash'ariya, as an intermediate party, maintained that if the book, in the form in which it is transmitted, had been created, still its principles must have existed before the world. Again, while the Orthodox, taking the Koran literally, believed that human actions were determined by the will of God, as laid down in an eternal law, the Motazilites, refuting this doctrine as being contrary to the spirit of divine justice, insisted on man's perfect freedom to do either good or evil, which accordingly meets with reward or punishment hereafter. The Ash'ariya, ascribing divine authority to the word of the Koran, could not but give their adhesion to the belief of the Orthodox; but, in order to preserve a semblance of freedom for man, and of justice for God, they conceded to man the benefit of making the first efforts toward the realization of the predestined plans of God for good and evil—a theory declared by Aaron ben Elijah the Karaite ("'Eẓ Ḥayyim") to be unintelligible. In opposition to the Motazilites, the Ash'ariya asserted the existence of attributes distinct from God's essence; still they differed from the Orthodox in admitting that the anthropomorphisms found in the Koran are not to be taken literally.

In discussing the questions of the divine attributes, many Jewish philosophers were influenced by the Ash'ariya (compare Ḥasdai Crescas, "Or Adonai," pp. 22 *et seq.*), but not so in regard to the freedom of man's will, as they all strove as far as possible to reconcile the omniscience of God with man's absolute freedom of action.

At first the Ash'ariya found few adherents; for while the Orthodox objected to the concessions made to the Motazilites, the more enlightened element felt dissatisfied with the meager results of the compromise. In the course of a century, however, the Ash'ariya triumphed over the Motazilites. Abu Bekr al-Bakillani, as the head of the school, systematized the doctrines of the Ash'ariya, laying the foundation of the new Kalam, or scholastic theology.

Bakillani taught the existence of atoms and of the vacuum—theories which were severely attacked by Maimonides ("Moreh," i. 72, iii. 17). The Ash'ariya likewise proclaimed the real existence of the negative attributes. For instance, according to this sect, weakness is not mere absence of strength, but a positive quality (compare "Torot ha-Nefesh," iii., where Baḥya concurs in this idea, basing it on the Biblical verse, "I form the light, and create darkness: I make peace, and create evil" [Isa. xlv. 7]).

ASHBEL: A son of Benjamin (Gen. xlvi. 21, and in the genealogical list of I Chron. viii. 1). The gentilic name "Ashbelite" is found in Num. xxvi. 38.

J. JR. G. B. L.

ASHDOD (Assyrian **Asdûdu**, Greek **Azotos**): The northernmost of the five royal cities of the Philistines, two to three miles from the seacoast, about half-way between Gaza and Joppa. In I Sam. vi. 17 it is mentioned first among the principal Philistine cities; and the Ark of the Lord is brought first to that place as a trophy (I Sam. v. *et seq.*). Amos (iii. 9) gives Ashdod as the representative of all Philistine cities, but Ashdod is placed second in the list in Amos, i. 8, and fourth in Zech. ix. 6. Judah's claim upon Ashdod (Josh. xv. 46) is to be considered as merely theoretical, as Josh. xiii. 3 proves. The capture by King Uzziah (II Chron. xxvi. 6) is usually treated by modern critics as probably unhistorical. It is not certain that the petty king Dagantakala of the El-Amarna tablets resided in Ashdod. Asdûdu led the revolt of Philistines, Judeans, Edomites, and Moabites against Assyria after expelling the king Akhimeti, whom Sargon had installed instead of his brother Azuri. Gath (Gimtu) belonged to the kingdom of Ashdod at that time. But the Assyrian general subjected Ashdod in 711 B.C. (compare Isa. xx. 6, and "C. I. O. T." pp. 87 *et seq.*), and the usurper, Yawani, fled. Mitinti was king in the time of Sennacherib; Akhimilki in the reign of Esarhaddon. Psammetichus of Egypt is reported to have besieged the great city Azotus for twenty-nine years (Herodotus, ii. 157). The reference to "the remnant of Ashdod" (Jer. xxv. 20; compare Zeph. ii. 4) is interpreted as an allusion to this event. In Neh. iv. 1, the Ashdodites seem still to represent the whole nation of the Philistines, as well as in Neh. xiii. 23, so that xiii. 24, the "speech of Ashdod" (which the younger generation of the Jews began to adopt), would be the Philistine dialect. Winckler ("Gesch. Israels," p. 224) explains the use of that name by the fact that Ashdod was nearest to Jerusalem of the Philistine cities. Yet the simplest explanation seems to remain, that Ashdod was still the leader among those cities even in Greek times. Judas Maccabæus does not seem to have conquered Azotus itself (I Macc. iv. 15, v. 68), but Jonathan (*ib.* x. 84, xi. 4) destroyed it and burned the old temple of Dagon (compare I Sam. v. 2, 3; see also *ib.* xvi. 10). According to Josephus, "Ant." xiii. 15, § 4, Alexander Jannæus possessed it (contrast "B. J." i. 7, § 7). Pompey restored its independence ("B. J." i. 6, § 4), which apparently means only that he reconstructed its walls. It belonged to the dominion of Herod and Salome ("Ant." xvii. 18, § 9). Vespasian had to take it by force ("B. J." iv. 130); so that the Jewish inhabitants must have been in the majority. The New Testament mentions Azotus in one passage only (Acts viii. 40). The modern Esdūd is an insignificant village nearly four miles from the sea. To the west of the wooded height on which the village stands, traces of the ancient harbor—now known as Minet el-Ḳal'a—can still be seen. The statement of Ptolemy and Josephus that it was a maritime city, is explained by the possession of a harbor on the shore, which is called "Azotus by the Sea" ("Ant." xiii. 15, § 4). This place has been compared with the Asdudimmu mentioned by Sargon, but the comparison is hardly justified. See PHILISTINES.

GENERAL VIEW OF MODERN ASHDOD.
(From a photograph by Bonfils.)

ASHDOTH-PISGAH: The declivities of the Pisgah range on the east of the Jordan, which were handed over to the Reubenites (Deut. iii. 17, iv. 49; Jos. xiii. 20) (see PISGAH).

J. JR. G. B. L.

ASHENHEIM, LOUIS: Scotch physician and surgeon; born at Edinburgh 1817; died at Jamaica Nov. 26, 1858. Educated in his native city, he obtained honors at the university, and became a licentiate of the Royal College of Surgeons, Edinburgh. He subsequently visited Paris, Berlin, and other European cities, acquiring professional experience. Ashenheim practised for some time in London, lecturing frequently and being an active contributor to the Anglo-Jewish press. He emigrated to Jamaica in 1843 and settled at Kingston, where he practised till 1850, when he removed to Falmouth, a port on the north coast of Jamaica. In addition to his practise, and lectures more or less connected with his profession, he addressed the public, through the press, on sanitary reform and on compulsory vaccination, of which he was an able advocate. At Falmouth he rendered valuable services during an outbreak of cholera.

ASHER.—Biblical Data: The eighth son of the patriarch Jacob, and the traditional progenitor of the tribe Asher. He is represented as the younger brother of Gad; these two being the sons of Zilpah, the handmaid of Leah (Gen. xxx. 10 *et seq.*, xxxv. 26). Four sons and one daughter were born to Asher in Canaan, who went down with him to Egypt (Gen. xlvi. 17). See ASHER, TRIBE AND TERRITORY; and on the general view to be taken of the tribes of Israel, TRIBES, TWELVE.

J. JR. J. F. McC.

——**In Rabbinical Literature:** For a time Asher was not on good terms with his brothers, because he had informed them of Reuben's sin against his stepmother Bilhah, and they would not believe him;

indeed they reproached him instead. Not until Reuben repented and confessed his crime did they realize their injustice toward Asher. From the first he had had no evil intentions against Reuben; in fact he was the very one whose endeavor it had always been to reconcile the brothers, especially when they disputed as to who among them was destined to be the ancestor of the priests (Sifre, Deut. 355). In the Test. Patr., Asher, 5, Asher is regarded as the example of a virtuous man who with single-mindedness strives only for the general good.

Asher married twice. His first wife was ʿAdon, a great-granddaughter of Ishmael; his second, Hadurah, a granddaughter of Eber and a widow. By her first marriage Hadurah had a daughter Serah, whom Asher treated as affectionately as if she had been of his own flesh and blood, so that the Bible itself speaks of Serah as Asher's daughter ("Sefer ha-Yashar, Wayesheb"). According to the Book of Jubilees (xxxiv. 20), Asher's wife was named "Iyon" (probably יונה, "dove").

Asher's descendants in more than one regard deserved their name ("Asher" meaning "happiness"). The tribe of Asher was the one most blessed with male children (Sifre, *l.c.*); and its women were so beautiful that priests and princes sought them in marriage (Gen. R. lxxi., end). The abundance of oil in the land possessed by Asher so enriched the tribe that none of them needed to hire a habitation (Gen. R. *l.c.*); and the soil was so fertile that in times of scarcity, and especially in the Sabbatical year, Asher provided all Israel with olive-oil (Sifre, *l.c.*; Men. 85*b*; Targ. Yer. on Deut. xxxiii. 24). The Asherites were also renowned for wisdom (Men. *l.c.*).

J. SR. L. G.

ASHER, Tribe and Territory.—Biblical Data: The fortune of Asher is foreshadowed in the Blessing of Jacob, where it is said: "Asher, his food shall be rich, and he shall yield the dainties of a king" (Gen. xlix. 20, Hebr.). Until the settlement in Canaan, the tribe stood in honor. Of its lot in Egypt there is no record; but after the Exodus its men numbered 41,500 strong (Num. i. 41); and at the close of the desert march the census showed that it had reached 53,400 (Num. xxvi. 47). During the journeyings the tribe had its station between Dan and Naphtali, north of the Tabernacle (Num. ii. 25 *et seq.*). It also had its representative among the tribal chiefs sent to spy out the land of Canaan (Num. xiii. 13).

Situation.

The blessing of Moses, delivered, according to tradition, at the close of the march, is put forward as partly predictive: "Blessed be Asher with descendants, and let him be pleasing to his brethren, and let his foot be dipped in oil" (Deut. xxxiii. 24, Hebr.). The material portion of this aspiration, like that of Jacob's blessing, was in large measure fulfilled. The territory allotted to Asher (Josh. xix. 24–31) was the coast-land extending from Dor (Tanturah) on the south to Sidon on the north. It thus included, north of Mount Carmel, the territories of Accho, Achzib, Tyre, and Sidon. The coast-land west of the shoulder of Carmel, though assigned to Asher, was occupied by Manasseh (Josh. xvii. 11). The tribe was thus settled on the western slopes and valleys of Upper and Lower Galilee and on the Phenician plain. Here was some of the most productive land in Palestine—pasture, wooded hills, and orchards—noted especially for the abundance and richness of its olive-oil. On account of its remoteness from the centers of national life, and its facility of communication with the Phenician markets, as well as the ease with which it could support itself, the tribe speedily became dissociated from the rest of Israel, so that it took no part against the Canaanites with Barak and Deborah (Judges v. 17). Yet it joined in the pursuit of the Midianites after the victory of Gideon (Judges vii. 23). It is also said (I Chron. xii. 36) that a great host of Asherites offered their support to David when he succeeded to the kingdom of Saul, and that some men of the tribe "humbled themselves" in the reformation of Hezekiah (II Chron. xxx. 11).

Relations to Other Tribes.

J. JR. J. F. McC.

——**Critical View:** Asher is one of the most indistinct and elusive of the tribes of Israel. It is difficult to fix the boundaries of the tribe's possessions; and it is not even certain that it inhabited any extensive continuous territory. There is, as mentioned above, no trace of its clansmen south of Carmel; and it is not clear in what sense this district was assigned to them. Possibly the tradition is based on some migration of Asherites northward through that region. Many of the towns allotted to them north of Carmel can not be identified. But those whose sites are known (among them Cabul, Achshaph, Helkath, Neiel) suggest by their location a distribution of settlements rather than a compact and well-defined tribal possession. Besides the Phenician coast cities (Accho, Tyre, Sidon), Beth-dagon further inland was probably never Asherite.

Boundaries.

Asher appears to have had at no time a close connection with the body of Israel. It had more at stake than any other tribe in the common struggle with the northern Canaanites, and yet it held aloof. In the light of this outstanding fact, it is not easy to understand how it could have become so loyal at any later date as to send 40,000 men to join the standard of David (I Chron. xii. 36). The probability of such a statement is lessened by the fact that in the tabulation of the several contingents (verses 23–38) the largest quotas are said to have come from the tribes that were most remote from the centers of the life and activity of Israel. On the whole the conclusion is irresistible that Asher consisted of certain clans that were affiliated with portions of Israel, but were never incorporated into the body politic.

Name and Origin.

Critical opinion is divided as to whether Asher was a name originally Israelitish, or whether it was adopted by certain of the outlying tribesmen from a Canaanitic source. What light does the story of the birth of Asher throw on the question? He was the full brother of Gad, and the names have the same meaning. Gad is a Canaanitish god of fortune, and Asher is from a root meaning "prosperous," "happy," whence the great Assyrian god Asshur. But how was this name Asher suggested? A clue is perhaps afforded in the fact pointed out by W. Max Müller ("Asien und Europa," p. 236), that "Aseru" appears on Egyptian monuments as the name of a land and people in western Galilee in the fourteenth century B.C. It is conceivable that Israelitish settlers in that region adopted in this modified form the name of their new residence. Such a thing was not in itself impossible, since there is evidence that several of the tribes had territorial designations given to them after the Hebrew occupation of Canaan.

There is, however, still the possibility that this "Aseru" was itself the name of a Hebrew settlement existing from olden time in Palestine and kept up independently of the sojourn in Egypt which ended with the Exodus. In considering these possibilities a good deal must depend upon the analogy of the history of the other tribes and their current designations—a matter which is itself still very obscure.

The Asherite Clan Heber.

Still another hypothesis has been offered. Jastrow suggests ("J. B. L." xi. 120) that the clan Heber of the tribe Asher (I Chron. vii. 31) represents the Chabiri of the El-Amarna tablets, and the brother-clan Malchiel, the Milkili, who figure in the same inscriptions. If this should be correct, the conclusion would be drawn that a formidable body of people was pressing upward from southern Palestine two hundred years before the Exodus, and that they finally settled in western Galilee; leaving perhaps a trace of their temporary settlement in the towns south of Carmel referred to above as being finally occupied by Manasseh. This hypothesis has to contend against the opinion, now somewhat widely held, that the Chabiri were the Hebrews themselves.

ASHER, ABRAHAM (ADOLF): Publisher, bibliographer, and editor; born at Kammin, Prussia, Aug. 23, 1800; died at Venice, Sept. 1, 1853. He was destined for a commercial career, and was sent for this purpose to England. He settled afterward as a jewelry merchant at St. Petersburg, Russia; but on one occasion he happened to buy an old library. This decided his later career. He gave up his former business and devoted himself entirely to bibliography and publishing. In 1830 he removed to Berlin and established himself as a bookseller and publisher; in the former capacity obtaining the valuable agency for the purchase of foreign books for the British Museum. A branch of the firm was accordingly established in London. It was through the influence of Asher that Joseph Zedner was appointed curator of the Hebrew books of the British Museum.

Asher was the author of: "Bibliographical Essay on the Collection of Voyages and Travels Published 1598-1600 by L. Hulsius," Berlin, 1839; and "Bibliographical Essay on the Scriptores Rerum Germanicarum," Berlin, 1843. Among the works issued by him as publisher are two in particular, for which he earned the gratitude of Hebrew scholars: (1) Benjamin of Tudela's "Masa'ot" (Travels); (2) Conforte's "Ḳore ha-Dorot" (Literary History). The first he edited, vocalized, and provided with an exhaustive index of the geographical names (London, 1840); the same in an English translation, with critical notes and commentaries by him, by Rapoport and Zunz (2 vols., Berlin, 1840-41). He thus made accessible to the modern Anglo-Jewish reading public a work that is quite a phenomenon in Hebrew literature. At Asher's initiative and expense, David Cassel revised, edited, and indexed Conforte's "Ḳore ha-Dorot"—one of the very few literary sources for the life and activities of Oriental and African scholars in the two centuries after the Spanish expulsion.

ASHER, ANSHEL BEN ISAAC: Preacher at Prenzlau, Prussia, and teacher in the school founded there by his father. In 1701 he published at Dessau a collection of discourses under the title of "Shemenah Laḥmo"—with reference to his name "Asher" (מאשר שמנה לחמו; see Gen. xlix. 20)—consisting of two parts: the first containing some homilies on the Sabbath and the holy days, including Ḥanukkah and Purim; and the second on the seven solemn occasions of man's life; viz., circumcision, redemption of the first-born, "bar miẓwah" (religious majority), marriage, ordination, burial, and resurrection.

ASHER, ANSHEL BEN JOSEPH. See ANSCHEL.

ASHER, ANSHEL BEN MOSES BAER: Talmudist; lived in the second half of the eighteenth century. He wrote two works: "Ben Emunim" (Son of Faith), Fürth, 1785; and "Ḥiddat Shimshon" (Samson's Riddle), Fürth, 1785. The former is a homiletic commentary on the Bible; the latter an ethical work, divided into three parts.

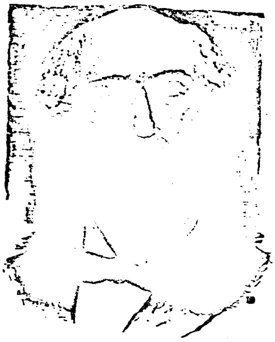
ASHER, ANSHEL BEN WOLF. See WOLF, ASHER BEN ANSHEL.

ASHER, ASHER: Physician; born Feb. 16, 1837, at Glasgow, Scotland; died Jan. 7, 1889, at London, England. He was educated at the high school and university of his native city, and was the first Jew in Scotland to enter the medical profession. In 1862 he went to London and became medical officer of the Jewish Board of Guardians, and in 1866 was appointed secretary of the Great Synagogue. About this time the idea of a union of the various London synagogues had been put forward, chiefly by Lionel L. Cohen; and Asher devoted himself to the project with intense energy. In March, 1871, he became first secretary of the UNITED SYNAGOGUE, contributing largely to the success of that institution; he wrote the introduction to the by-laws of the constituent synagogues, and practically founded its visitation committee. This office he retained till his death.

Owing to Asher's intimate relations with the Rothschilds, in his capacity of medical attendant, unofficial almoner, and personal friend, his advice was generally followed by them in communal matters. He was connected with a large number of institutions in the London community, and may be regarded as one of its organizers. In company with Samuel Montagu he undertook, in Jewish interests, journeys to Palestine, America, and Russia. After the visit to Palestine he wrote a report on the condition of affairs in Jerusalem, which effected much good. His sympathetic nature attracted to him most of the young men of ability of the rising generation, and upon them he exerted great influence. Asher wrote much for the Jewish press, chiefly under the pen-name "Aliquis." The only book he published was "The Jewish Rite of Circumcision," London, 1873.



Dr. Asher Asher.

J.

ASHER, DAVID: German educationist and philosophical writer; born at Dresden Dec. 8, 1818; died in Leipsic Dec. 2, 1890. He received his early education at the Jewish school of his native city, and subsequently entered the gymnasium there, being one of the first Jews admitted to the institution. As his mother was unable to support him, his stay there was short. Asher then learned the trade of carving and gilding, thereby supporting himself as a journeyman artisan during his travels to various cities of Germany and Austria. On the invitation of a wealthy relative he went to London, where he learned English at a private school—subsequently becoming assistant teacher there—and at the same time assiduously studied philosophy, philology, Hebrew, and modern languages. Later, Asher held various offices in the Jewish congregation and was tutor to the children of the chief rabbi of England. Upon his return to Germany he obtained the degree of doctor of philosophy at the Berlin University. Settling in Leipsic, he soon acquired reputation as an English instructor, having among his pupils many persons of high rank. For seven years he held the post of English master at the Commercial School; and for eight years that of examiner of candidates for higher schools at the university. He was also a member of the Academy for Modern Languages, in Berlin, and official interpreter to the Royal Law Courts of Leipsic. A linguist of the first order, he was engaged in literary work of varied character, and diligently contributed to most of the leading German journals, as well as to the English periodicals the "Times," "Athenæum," "Academy," and "Jewish Chronicle." For the last he translated Dr. Döllinger's "Address on the History of the Jews of Europe."

Asher distinguished himself as an interpreter of the philosophy of Schopenhauer; and as an ardent champion of his own coreligionists, energetically combating anti-Semitic attacks.

The more important of his numerous works and articles, original and translated, are: "Outlines of the Jewish Religion"; "England's Dichter und Prosaiker der Neuzeit"; "A Manual on the Study of Modern Languages in General, and of the English Language in Particular," with a preface by Dean French; "Offenes Sendschreiben an Arthur Schopenhauer"; "Arthur Schopenhauer als Interpret des Göthe'schen Faust"; "Der Religiöse Glaube; eine Psychologische Studie"; "Arthur Schopenhauer; Neues von Ihm und über Ihn"; "Das Endergebniss der Schopenhauer'schen Philosophie"; "Exercises on the Habitual Mistakes of Germans in English Conversation," etc., 3 vols.; "Die Wichtigsten Regeln der Englischen Syntax"; "Entertaining Library for the Young, with Explanatory Notes and Complete Vocabularies," etc., 2 vols.; "Ueber den Unterricht in den Neueren Sprachen"; "Die Grundzüge der Verfassung Englands"; "Die Kunst zu Lesen"; "Seliḥot, with a new English Translation"; "Büdinger's 'Way of Faith,' or the Abridged Bible," translated from the German; Buckle's "Essays," translated into German; "Contributions to the History of the Development of the Human Race," by Lazarus Geiger, translated from the German; "Das Naturgesetz in der Geisterwelt," by Henry Drummond, translated into German.

J. B. B.

ASHER BEN DAVID: A son of Abraham ben David of Posquières; flourished about the middle of the thirteenth century. He was a pupil of his uncle, Isaac the Blind, and one of the earliest cabalistic writers. He was the author of פירוש י"ג מדות or חקן (Explanations on the Thirteen Attributes of God; Ex. xxxiv. 6, 7), and ס' היחוד (Explanation of the Tetragrammaton and the Sefirot). The relation of these two works to each other, however, can not be definitely stated, since only a small part has been printed, in "Oẓar Neḥmad," iv. 37, and "Hebräische Bibliographie," xii. 80, 113. Probably he tried to justify the number (ten) of the Sefirot as seemingly not in harmony with the thirteen attributes of God assumed in the Talmud. He identifies, on the one hand, the ten Sefirot with the ten spheres of the philosophers, and, on the other, explains the thirteen attributes of God as derivations of the three middle Sefirot: חסד, דין, רחמים or גדולה. גבורה, תפארת (love, justice, mercy), which he designates as אבות (fundamental principles).

Asher was taught by his father, whom he calls a learned man; and he had verbal intercourse with Jacob ben Samuel of Anduze, with Meïr ben Simon, and with Abraham ben Isaac of Carcassonne.

Bibliography: *Heb. Bibl.* xii. 80 *et seq.*; Gross, *Gallia Judaica*, p. 450; Bloch, *Entwickelung der Kabbala*, etc., p. 42. [Michael (*Or ha-Ḥayyim*, No. 536) doubts whether he was the son of Abraham b. David of Posquières.]

K. P. B.

ASHER, ENSEL B. JUDAH LOEB: Chief of the bet din at Slonim, Lithuania, in the beginning of the eighteenth century. He wrote two works: "Otot le-Mo'adim" (Signs for the Feasts) and "Baruk mi-Banim Asher" (Blessed Be Asher Above Sons; Deut. xxxiii. 24). The former contains a novella to Pesaḥim ix., and also the laws of the festivals and half-festivals. The latter comprises a homiletic commentary on the Pentateuch. Both were published at Zolkiev, in 1749 and 1752 respectively.

L. G. I. Br.

ASHER BEN ḤAYYIM OF MONZON: Spanish liturgist of the fourteenth century. He was the author of a book entitled "Ha-Pardes" (Paradise), the ten sections of which are devoted to an exhaustive discussion of the benedictions, the results being epitomized in a single extract entitled "Terumot ha-Pardes" (The Heave-Offerings of Paradise). Azulai saw the manuscript in Italy, and made extracts from it, which he afterward published in his commentary "Shiyure Berakah" to the Shulḥan 'Aruk, Oraḥ Ḥayyim. The manuscript in question was probably identical with that now preserved in the Bodleian Library. The latest authority cited in it is Yom-Ṭob b. Abraham of Seville.

ASHER BEN IMMANUEL SALEM. See Salem.

ASHER, JACOB ABRAHAM BEN ARYEH LOEB ḲALMANḲES: Cabalistic and rabbinical author; born probably in Lemberg about the beginning of the seventeenth century; died there April 3, 1681. He wrote (1) "Sefer ha-Eshel" (The Book of the Grove), a volume of homilies, of which the first part, on Genesis, containing also some homiletical remarks by his grandfather, Joseph Ḳalmanḳes, was printed in Lublin, n.d.; and (2) "Ma'yan ha-Ḥokmah" (Fountain of Wisdom), an introduction to the Cabala, drawn chiefly from the works of Isaac Luria. This latter work was first printed in Amsterdam, 1652, then in Koretz, 1684, and lastly under the title "Ṭob we-Yashar" (Good and Right) in Berlin, 1706. Moses ibn Zur put it in rimed prose under the title "Mebo Sha'ar ha-Shamayim" (The Way to the Gate of Heaven), but this was never published.

L. G. D.

ASHER BEN JACOB HA-LEVI: Talmudic lexicographer; lived in Osnabrück, Prussia, toward the end of the thirteenth century. His father was probably the "Jacob ha-Levi" mentioned by Eliezer ha-Darshan as his teacher, and his nephew was Isaac ben Judah ha-Levi, author of פענח רזא (Steinschneider, "Cat. Bodl." col. 1127). Asher was the pupil of Samuel ben Baruch of Bamberg. He wrote explanations of various parts of the Maḥzor, to be found in MSS. Munich, No. 423, Bodleian, No. 1102, as well as in a private MS. in the library of David Kaufmann (in "Monatsschrift," xli. 146). He is especially severe upon the "men of France and the Islands of the Sea," complaining that they had tampered with the liturgy, in some places omitting words and in others adding to the received text. Asher is best known as the author of the small edition of the 'Aruk contained in MS. Berne, No. 200, which he compiled in the year 1290 within the space of five weeks for his nephew Isaac ben Eleazer ha-Levi. This recension contains 142 folios, and follows in the main the Regensburger MS. of the same work. Asher has, however, inserted into his edition a number of words dealing with the liturgy that are not to be found in the large 'Aruk. This manuscript served as the basis for Buxtorf's "Lexicon Hebræo-Chaldaicum."

Asher must not be confounded with a man of the same name who lived during the twelfth century, and perhaps belonged to the same family and who corresponded with Eliezer ben Nathan (ראב״ן), and lived in Worms or that neighborhood. According to Gross ("Magazin," x. 76), this latter Asher was the son of Jacob ben Isaac ben Eliezer of Worms (Zunz, "L. G." p. 156). Perles thinks that Eleazer ben Asher ha-Levi, who collected the valuable "Sefer Zikronot," was his son (Neubauer, "Medieval Jewish Chronicles," i. xx.; Gaster, "Chronicles of Jeraḥmeel," p. 1). From the similarity in names, Perles argues that the family of Asher ben Jacob ha-Levi must be connected with the older Ha-Levi family of which Zunz has given ("Literaturgesch." p. 156) the pedigree (compare also Salfeld, "Nürnberger Memorbuch," pp. 104, 361).

Grätz*, pp. 1 *et seq.*; Kaufmann, in *Monatsschrift*, xxxiv. 185 *et seq.*; Weiss, in *Monatsschrift*, xli. 146; Neubauer, *Catalogue of Hebrew Manuscripts of Bodl. Libr.* col. 311.

L. G. G.

ASHER BEN JEHIEL: Eminent Talmudist; born in western Germany about 1250; died in Toledo, Spain, 1328. His family was prominent for learning and piety; his father having been a learned Talmudist, and one of his ancestors (not his grandfather) having been Eliezer ben Nathan (ראב״ן).

Asher ben Jehiel was the most prominent disciple of Meïr b. Baruch of Rothenburg, and, like his teacher, was in all probability the victim of blackmail by the government, which desired to deprive him of his fortune. His emigration from Germany was probably involuntary; for, according to his own statement, he possessed considerable means while in Germany, but in later years could not assist his son Jacob, whose poverty prevented him from honoring the Sabbath with special garments and meals ("Ṭur Oraḥ Ḥayyim," § 242). Moreover, Asher's son Judah testifies to the fact that he died in poverty ("Bet Talmud," pp. 372-375). After leaving Germany he settled first in southern France, then in Toledo, of which latter city he became rabbi on the recommendation of Solomon Adret.

Settles in Toledo.

In his religious attitude he resembled his teacher, Meïr of Rothenburg, representing the rigorous school which was averse to lenient decisions in legal matters, even when theoretically justified ("Responsa," xlvi., c. 2). He was also opposed to secular knowl-

His Religious Attitude.

edge, especially philosophy; thanking God for having saved him from its influence, and boasting of possessing no knowledge outside the Torah. His position was clearly defined by him when he stated that philosophy is based on critical research, and religion on tradition: the two being incapable of harmonization. Of philosophy, he said, it may be truly stated, "None that go unto her may return" ("Responsa," lv. 9). Asher, however, had the courage of an independent opinion and laid down the principle: "We must not be guided in our decisions by admiration of great men; and in the event of a law not being clearly stated in the Talmud, we are not bound to accept it, even if it be based on the works of the Geonim" (Weiss, "Dor Dor we-Dorshaw," v. 63). His liberalism, however, is sometimes orthodoxy in disguise. He declares, for instance, that the liturgy of the Geonim does not fall under the Talmudic rule forbidding change in the wording of the traditional prayers (Maimonides, "Yad," Berakot, i. 16). Similarly, his decision against praying more than three times a day ("Responsa," iv. 13) is really on the side of rigorous orthodoxy. His assertion that the words הלכה למשה מסיני ("an oral law revealed to Moses on Sinai") do not always bear a literal meaning, but signify, in general, a universally adopted custom, must not be taken as a liberal interpretation bearing out the theory of oral tradition (so Z. Frankel, in "Darke ha-Mishnah," 20), but as an apologetic attempt to uphold rabbinical authority. The latter view is borne out by the context (Hilkot Miḳwaot 1, in the twelfth volume of the usual Talmud editions).

Asher possessed vast Talmudic knowledge, methodical and systematic, and was distinguished for terseness in summing up long Talmudic discussions, the final results of which he indicated clearly. His attitude, however, toward secular knowledge made his influence on the Spanish Jews a narrowing one. He espoused the cause of the anti-Maimonists—even becoming their leader—and desired the synod to issue a decree against the study of non-Jewish learning. Together with his sons he thus transplanted the strict and narrow Talmudic spirit from Germany to Spain, where it took root and turned the Spanish Jews from scientific research to the study of the Talmud.

His Works.

Asher's extant works are: a commentary on Zera'im, the first order of the Mishnah, with the exception of Berakot; a commentary on the sixth order (Ṭoharot); on the treatises Nedarim (third order), and Tamid; glosses like the Tosafot on several Talmudic treatises; a volume of responsa; and an abstract of the Talmudic laws (Halakot). His fame rests on the last-mentioned, constructed on the plan of Alfasi's work. Omitting the haggadic portions of the Talmud, and all the laws not practised outside of Palestine, such as the sacrificial, criminal, and political ones, Asher made an abstract of the practical Halakah, leaving out the discussions, and concisely stating the final decisions. Though in this respect he follows the example of Alfasi, he differs from him in quoting later authorities, notably Alfasi, Maimonides, and the Tosafists. Asher's work superseded Alfasi's within a short time. It became so popular that it has been printed with almost every edition of the Talmud under the title "Rabbenu Asher," abbreviated רא"ש (Rosh). His son Jacob compiled, under the title "Pisḳe ha-Rosh," a list of the decisions found in the work. Commentaries on Asher's Halakot were written by a number of later Talmudists, among whom were: Yom-Ṭob Lipman Heller, who wrote "Ma'adane Melek," "Ma'adane Yom-Ṭob," "Leḥem Ḥamudot," and "Pilpela Ḥarifta"; Nathaniel Weil, who wrote "Ḳorban Nethanael"; and Phineas Selig of Lask, who wrote "'Aṭeret Paz." Compare Berlin, Saul b. Ẓebi Hirsch.

Asher had eight sons, of whom the most prominent were Judah and Jacob.

ASHER, LEON: German physician; born April 13, 1865, in Leipsic. He is the son of Dr. David Asher, for many years secretary to Chief Rabbi Nathan M. Adler in London. Leon Asher, after graduating from the public school in Leipsic, studied medicine at the university of that city from 1885 to 1890, and received the degree of M.D. Having worked in the line of medical and psychical research, he went in 1891 to Heidelberg, where he was engaged as laboratory assistant with W. Kühne and G. Quincke. In 1894 he became assistant at the Bern Physiological Institute in Switzerland, and in 1895 privat-docent at the university. He spent the summer vacations of 1896-98 in the laboratory of the physiologist Hering in Leipsic, and in 1901 was appointed professor of medicine in Bern University.

Asher's researches cover a wide field in nervous and muscular physiology, including the physiology of the sense functions and of the transformation of tissue. Aided by the Berlin Royal Academy of Sciences, he experimented considerably in the direction of ascertaining the qualities of lymph and the precise mode of its formation; the majority of his conclusions are now accepted in the medical world. He edits, together with K. Spiro, an annual entitled "Ergebnisse der Physiologie."

s. F. de S. M.

ASHER BEN LEVI (known also as **'Abd al-Masiḥ**): Legendary boy convert and, subsequently, Christian martyr; lived toward the end of the fourth century in Sinjar, between Nisibis and Mosul in Mesopotamia. He was born of Jewish parents. As a boy he lived all alone and was shunned by his Christian and Zoroastrian companions. One day he begged to be allowed to eat with the Christian boys; but they refused to allow him to do so until he became a Christian. As the church of the village was at some distance, the boys themselves baptized him; performing all the necessary ceremonies and giving him the name "'Abda da-Meshiḥa" (Servant of the Messiah). They even pierced his ears, and hung in the right ear an earring, a custom not observed by the Jews. Asher's mother hid him from his father, who was a rich man and head of the Jewish community, fearing his wrath if the story should become known.

The boy then had visions of Jesus, of hell, and of his own death. A bishop, happening to be in the village, blessed him. On a Sabbath-day, when his father held a feast, the boy's conversion became known because he refused to eat with Jews. Asher ran off to the well where he had been baptized, but was killed there by his father. The boys who had baptized him found the body and buried it. A few days afterward a company of merchants camping near by saw a light burning over the grave and smelt fragrant odors coming from beneath the stone. They were Christians and took the body away, a rich man promising to build a church in the boy's honor. Over the place where the grave had been a little church was built, with the inscription, "This is the place of martyrdom of the Messiah's martyr, 'Abd al-Masiḥ." After a time the father grew old and was troubled by evil spirits. He had to be taken to the place where his son had died, and together with all his household embraced Christianity. The day of Asher's martyrdom is given as the twenty-seventh of Tammuz (July), 390.

There is probably no historical background to the story, as the Arabic form of the name, "'Abd al-Masiḥ," shows that it is of much later origin than the text would have us believe. In the Syriac, "'Abda da-Meshiḥa" does not occur as a proper name.

BIBLIOGRAPHY: The text of this Syriac legend was first published with a Latin translation by Corluy in *Analecta Bollandiana*, 1886, v. 5-52: and the text alone was republished in Bedjan's *Acta Martyrum et Sanctorum*, i. 173 *et seq.*, Paris, 1890. Compare also *Zeitschrift für Katholische Theologie*, 1887, ii. 196; Wright, *Catalogue of Syriac Manuscripts*, p. 1146; Steinschneider, *Polem. und Apolog. Lit.* p. 115; Assemani (*Bibliotheca Orientalis*, III. i. 285) mentions an Arabic account of Asher's conversion; according to J. Bollig, however, the manuscript does not contain it. But in MS. Arab. No. 145 of the Vatican Library there is a *Tractatus de Animo Rationali, Auctore Abdelmessia Israelita*, and also by the same author, *Articuli Breves de Trinitate et Unitate Dei*, composed in 1241 at Cairo. Steinschneider has confounded the two 'Abd al-Masiḥs.

T. G.

ASHER B. MESHULLAM: Talmudist; flourished at Lunel in the second half of the twelfth century. He was a son of the well-known scholar MESHULLAM BEN JACOB, and a pupil of Joseph ibn Plat and Abraham b. David of Posquières, whose ascetic tendencies he shared. Benjamin of Tudela, in the first part of his "Travels," says that Asher lived in complete seclusion, wholly devoted to the study of the Torah, and that he never tasted meat. At the same time Asher was not hostile to philosophy. Judah ibn Tibbon, in a letter to Asher, praised his fondness for science, and in his testament exhorted his son to cultivate Asher's friendship. Asher's alleged leaning toward the Cabala, mentioned by Graetz, is not proved; the fact that he was responsible for the translation of Gabirol's "Tiḳḳun Midot ha-Nefesh" is no proof for or against his cabalistic leanings. The cabalists had a strong leaning toward Gabirol's mysticism; and, after all, the above-mentioned work of Gabirol is moral, rather than strictly philosophical, in its tendencies.

Asher was the author of several Talmudic works, of which the following are cited by title: "Hilkot Yom-Ṭob," rules for the holidays; "Sefer ha-Matanot," a work referring perhaps to the tithes payable to the priests. Neither of these writings seems to have been preserved. According to an entry in the manuscript of the small "Midrash 'Aseret ha-Dibberot," Asher was its author, but the statement is not verifiable. Compare MIDRASHIM, MINOR.

K. L. G.

ASHER BEN SAUL (Ha-Kohen) OF LUNEL: French writer on ritual; lived in the fourteenth century. He wrote a work upon the various rites current among the Jews, entitled, "Sefer ha-Minhagot," which exists in manuscript in the Cambridge (England) University Library (MS. Add. Do. 5, 38). Asher is mentioned in the responsa of Solomon ben Simon Duran (Responsum, No. 195, ed. Livorno, 1742, p. 34*a*); in the "Kol Bo," which cites certain extracts on the blessings (§ 24); and in the manuscript, "Sefer Asufot" (No. 48).

BIBLIOGRAPHY: Renan and Neubauer, *Les Rabbins Français*, p. 511; Gross, *Gallia Judaica*, p. 281; Michael (*Or ha-Ḥayyim*, p. 552) confounds Asher ben Saul with Asher ben Meshullam.

G.

ASHER SELIG BEN JUDAH MARGOLIOT. See MARGOLIOT, ASHER SELIG BEN JUDAH.

ASHER BEN SIMEON: Religious poet of Germany, who lived at a period not later than 1546. He wrote a selihah (penitential poem) entitled אשחרה פניך אל עלין, which is not to be confounded with a similar selihah by Kalonymus ben Judah (Zunz, "S. P." p. 255). In this poem, which consists of fifteen five-lined strophes, the author prays for the welfare of the king of the land in which he lives. Zunz claims some connection between Asher ben Simeon and Asher of Frankfort, who was author of a short "widdui" (confession) mentioned by Joseph ben Phinehas Hahn in his "Yosif Omeẓ," § 483, p. 58*b*.

BIBLIOGRAPHY: Zunz, *Literaturgesch.* p. 390.

G.

ASHER ẒEBI BEN DAVID: Ḥasidic rabbi of Korets, Volhynia, and later "maggid" (preacher) of Ostrowo, government of Lomza in Russian Poland; flourished at the beginning of the nineteenth century. He was a pupil of Israel Baal-Shem's successor, Baer of Meseritz. Asher is the author of "Ma'ayn ha-Ḥokmah" (Spring of Wisdom), Korets, 1817—containing cabalistic homilies on the Pentateuch and other books of the Bible. Zweifel in his work in defense of Ḥasidism ("Shalom al-Yisrael," pp. 81, 82) quotes aphorisms from this work; but is fair enough to conclude with one that shows Asher's contempt for those who study the laws of nature or secular science.

ASHERAH (אשרה): A Hebrew word occurring frequently in the Bible (R. V.) and signifying, except in a few late passages noted below, a wooden post or pole planted near the altars of various gods. In the Authorized Version the word is rendered "grove."

It has often been inferred from Deut. xvi. 21 that the Asherah was originally a tree, but the passage should be translated "an asherah of any kind of wood" (compare Moore, "Ency. Bibl." and Budde, "New World," viii. 734), since the sacred tree had a name of its own, *el, elah, elon*, and the Asherah was sometimes set up under the living tree (II Kings xvii. 10). This pole was often of considerable size (Judges vi. 25), since it could furnish fuel for the sacrifice of a bullock. It was found near the altars of Baal, and, down to the days of Josiah, near those of Yhwh also, not only at Samaria (II Kings xiii. 6) and Beth-el (II Kings xxiii. 15), but even at Jerusalem (II Kings xxiii. 6). Sometimes it was carved in revolting shapes (I Kings xv. 13), and at times, perhaps, draped (II Kings xxiii. 7). It is most often associated in the Bible with the pillars ("mazzebot") that in primitive days served at once as a representation of the god and as an altar (W. R. Smith, "Religion of the Semites," 2d ed., p. 204). It was proscribed in the Deuteronomic law and abolished in Josiah's reform (II Kings xxii. 23).

In a few passages (Judges iii. 7; I Kings xviii. 19; II Kings xxiii. 4) Asherah appears to be the name of a goddess, but the text has in every case been corrupted or glossed (compare Moore and Budde, as cited above). In the first of the three passages the name Ashtaroth should stand, as it does elsewhere, in the case of similar charges of defection from Yhwh (compare Judges ii. 13, x. 6; I Sam. vii. 4, xii. 10). In the other two passages, the term Asherah is superfluous. These passages may indicate, as Moore suggests, that the Asherah became in some localities a fetish or cultus god.

Asherah the Name of a Syrian Goddess.

Asherah was also the name of a Syrian goddess. In the El-Amarna tablets of the fifteenth century B.C. her name appears with the determinative for deity as a part of the name Arad-Ashirta (or 'Ebed-Asherah). It also appears in a Sumerian hymn published by Reisner ("Sumerisch-Babylonische Hymnen," p. 92), on a hematite cylinder ("Zeit. f. Assyr." vi. 161), and in an astronomical text of the Arsacide period (*ib.* vi. 241). She appears to have been the consort of the god Amurru, a Baal of the Lebanon region (compare Jensen, "Zeit. f. Assyr." xi. 302–305). Arad-Ashirta in the El-Amarna tablets represents not only a sheik, but a clan, and is possibly the one which afterward became the tribe of Asher. Possibly a trace of this goddess is to be found in an inscription from Citium in Cyprus, which dedicates an object to "My lady mother Ashera" (compare Schröder, "Z. D. M. G." xxxv. 424). Many scholars, however, interpret the passage otherwise (compare Moore, *l.c.*). Hommel has recently announced ("Expository Times," xi. 190) that he has discovered in a Minæan inscription a goddess Athirat. phonetically equivalent to Asherah. This would indicate that Asherah was a name for an old Semitic goddess long before the fifteenth century B.C.; but for the present this must be regarded merely in the light of a possibility. The relation of this goddess to the pole called Asherah in the Bible is a difficult problem. The name in the Bible is masculine; the plural "Asherim" occurring sixteen times, and the plural "Asherot" but three times. The latter is clearly an error. Asherah must be a *nomen unitatis*. G. Hoffmann has shown ("Ueber Einige Phönizische Inschriften," pp. 26 *et seq.*) that these posts originally marked the limits of the sacred precincts, and that in the Ma'sub inscription it is the equivalent of "sacred enclosure." Moore finds in this fact the explanation of the use of the word in Assyrian (*ashirtu, ashrâti; eshirtu, eshrâti*), in the sense of sanctuary. Hommel fancies that he sees in the original form of the ideogram for Ishtar (compare Thureau-Dangin, "L'Ecriture Cunéiforme," No. 294), a post on which hangs the skin of an animal.

Quite apart, however, from Hommel's somewhat imaginary conjecture, the Assyrian and Phenician use of the word in the sense of "sanctuary," taken in connection with the Arabian and Syrian use of it as the name of a goddess, indicates that the posts were used at the sanctuaries of the primitive Semitic mother-goddess, and that in course of time their name attached itself in certain quarters to the goddess herself, and has survived in South Arabia and Syria. When, therefore, the late editors of the Old Testament books made of the Asherah a fetish or cultus god, history was but repeating itself (see Ashtoreth, Idolatry, Mazzebah, Phenicia).

ASHERI (אשרי, "the Asherite"): A name by which Asher ben Jehiel is frequently cited in rabbinical literature, especially in halakic discussions. Modern historians use the expression "Asherides" when speaking of the sons and descendants of Asher b. Jehiel.

J. Sr. L. G.

ASHES.—Biblical Data: The usual translation of the Hebrew "efer" which occurs often in expressions of mourning and in other connections.

It is a symbol of insignificance or nothingness in persons or words (Gen. xviii. 27; Isa. xliv. 20; Mal. iii. 21 [iv. 3]; Job xiii. 12, xxx. 19).

Use.

In the Red Heifer ritual, for purification from defilement by contact with a corpse (Num. xix.), the Ashes of the offering are to be put into water, some of which is then to be sprinkled on the unclean person; their virtue is, of course, derived from the sacred material of the offering.

A mourner cast Ashes (or dust) on his head (II Sam. xiii. 9), or sat (Job ii. 8; Jonah iii. 6) or lay (Esth. iv. 3) or rolled himself (Jer. vi. 26; Ezek. xxvii. 30) in Ashes (or dust). The rendering "ashes" for the Hebrew word in question is, however, in some cases doubtful. In a number of passages in which it occurs (in all, indeed, except those relating to the Red Heifer), it might as well or better be translated "dust"; so where a person is said to eat, feed on, sit in, lie, or wallow in the "efer"; or put it on his head; or where it is used to represent finely attenuated matter (Ps. cxlvii. 16). Its use appears to be substantially identical with that of the word "'afar," commonly rendered "dust." The sense of humiliation is expressed by sitting or rolling in the "'afar" or dust (Isa. xlvii. 1; Micah i. 7, vii. 17; Ps. lxxii. 9); grief and suffering by putting dust on the head (Josh. vii. 6; Job ii. 12). The word symbolizes attenuation and annihilation or extinction (Job xxx. 19; Ps. xviii. 43 [42]); it is even employed to designate the burnt remains of the Red Heifer (Num. xix. 17). The two words are synonyms, and in the expression "dust and ashes" are combined for the sake of emphasis (with paronomasia: "'afar we-efer."). There is, however, a difference in the usage: in expressions of mourning it is only the latter ("efer") that occurs in combination with "sackcloth" (Jer. vi. 26; Isa. lviii. 5; Dan. ix. 3; Esth. iv. 1, 3), while the former is used for the physical material of the soil (Gen. ii. 7; Job xx. 11, and elsewhere). The word ("deshen") in the sacrificial ritual rendered in A. V. "ashes," means "fat"; so in I Kings xiii. 3, 5; Lev. i. 6, iv. 12, vi. 3, 4 [10, 11]; and also in Jer. xxxi. 40, whence it appears that sacrificial Ashes were carried to the valley south of Jerusalem. Still another word translated by "ashes" in A. V. (Ex. ix. 8, 10) is "piah," which appears to mean "soot" (of a furnace).

Symbolical Significance in Mourning.

It is not clear what was the precise idea or feeling which it was intended to express by the use of dust (or Ashes) in acts of mourning. The custom in the Old Testament may be ancient, and the result of the convergence of several sorts of procedure. It is a well-known usage in some savage tribes, in mourning for the dead, to smear the body with clay, the purpose being, perhaps, merely to have a visible sign of grief as a mark of respect for the deceased. Possibly, at a later time, the dust of mourning was taken from the grave in token that the living felt himself to be one with the dead (compare W. R. Smith, "Religion of the Semites," 2d ed., pp. 322-336, and Schwally, "Leben nach dem Tode," p. 15). When religious ideas became more clearly defined, the old customs were naturally interpreted in the light of the newer conceptions. The dust, occupying the lowest place and trodden under foot, might well symbolize the downcast state of the afflicted; and, as misfortune was regarded as the result of the displeasure of the Deity (Ruth i. 20; Job vi. 4, ix. 17), the sufferer would humiliate himself by prostration; thus also repentance would be expressed (Job xlii. 6). To this, no doubt, there was added the idea that man was made of dust (Gen. ii. 7), and was to return to the dust of the grave and of Sheol (Gen. iii. 19; Job vii. 21; Ps. xxii. 16 [15]). Compare the Babylonian representation of dust as the food of the inhabitants of the underworld ("Descent of Ishtar").

The ordinary Semitic term for "dust" is "'afar," a form which is found in Assyrian, Aramaic, Hebrew, and Arabic (it does not occur in this sense in the current Ethiopic texts); its primary meaning is, perhaps, "a minute thing, a bit." Probably the primary signification of "efer" is the same; outside of Hebrew it is found only in African Semitic dialects (Ethiopic or Amharic), where (in the form "afrat") it signifies "dust" (Dillmann, "Lexicon Æthiopicum"). Each of the terms might thus be used for any finely divided thing, as "dust," or "ash," or "refuse." The Septuagint employs a number of words in rendering "efer" and "'afar," varying the word according to the connection. In "'afar" there is a trace of the sense "fat": Ethiopic "'efrat," "unguent" (Dillmann); Arabic "ta'affara," "become fat" (Lane); compare also Assyrian "ipru," "food" (Friedrich Delitzsch, "Assyrisches Wörterbuch"). Whether there is any connection between this sense and the Hebrew use of "deshen" for "ashes" is not clear.

J. JR. T.

——**In Rabbinical Literature:** The Midrash remarks (Gen. R. xlix. 11; Ḥul. 88*b*), in reference to the only use of Ashes in the Biblical ritual—namely, the Ashes of the Red Heifer (Num. xix. 9 *et seq.*)—God said to Abraham: "Thou spakest in thy lifetime, 'I am but dust and ashes' [Gen. xviii. 27]; but just these things shall serve as means of atonement for thy children; for it is written, 'And a man that is clean shall gather up the ashes [Num. *l.c.*].'" Ashes were also used to cover the blood of slaughtered fowl, for the Rabbis maintained that in the Biblical passage referring to the ordinance (Lev. xvii. 13) the word עפר signified earth and Ashes (Ḥul. *l.c.*, an interpretation ascribed to Hillel's school; compare also Beẓah i. 2).

Authentic records testify to the use of Ashes as a sign of grief in Talmudic times. In the Mishnah (Ta'an. ii. 1) it is recorded that during the fast-days proclaimed in consequence of drought the Ark of the Covenant, as well as the people participating in the procession, were sprinkled with Ashes—a custom still prevalent in the fourth century in Palestine, where earth could be used as a substitute for Ashes (Ta'an. 16*a*; Yer. Ta'an. ii., beginning; Gen. R. *l.c.*). On such occasions as public fasts, Ashes were strewn upon the holy Ark set up in the public place and upon the heads of the nasi and the ab bet din, while the rest strewed them upon their heads themselves. That part of the forehead where the phylacteries were placed was selected (Ta'an. 16*a*). The reason given for covering oneself with Ashes is either that it should serve as an expression of self-humiliation, as if to say, "We are before thee as ashes" (Gen. xviii. 27; Job xlii. 6), or it is to bring before God the memory of Abraham, who said, "I am but dust and ashes" (Gen. xviii. 27), or the memory of the offering of Isaac, whose Ashes, according to the rabbinical opinion, lay piled up before God upon the altar as if he had actually been sacrificed as a holocaust (Ta'an. 16*a*; Yer. Ta'an. ii., beginning; Gen. R. *l.c.*). It is difficult to say whether the remark of Tos. Ta'an. 15*b*, 16*a*, that the Ashes to be used in such cases should be of incinerated human beings, rests on tradition or on imagination.

Ashes, as a symbol of mourning, were also sprinkled upon the bridegroom during the wedding ceremony, in order to remind him, at the height of his felicity, of the destruction of Jerusalem (B. B. 60*b*). This custom is even to-day observed among some of the orthodox. In memory of the same national disaster the Jews also ate bread sprinkled with Ashes at the last meal before the fast-day of the Ninth of Ab (Yer. Ta'an. iv. 69*c*; Lam. R. to iii. 16; Shulḥan 'Aruk, Oraḥ Ḥayyim, 552, 6 gloss).

Raba says that if sifted Ashes are strewn round the bed, the footprints of night-demons can be observed in them in the morning (Ber. 6*a*). Unworthy disciples are called "white pitchers full of ashes" (*ib.* 28*a*).

J. SR. L. G.—K.

ASHI: A celebrated Babylonian amora; born 352; died 427; reestablished the academy at Sura, and was the first editor of the Babylonian Talmud. According to a tradition preserved in the academies (Kid. 72*b*), Ashi was born in the same year that Raba, the great teacher of Maḥuza, died, and he was the first teacher of any importance in the Babylonian colleges after Raba's death. Simai, Ashi's father, was a rich and learned man, a student of the college at Naresh, near Sura, which was directed by Papa, Raba's disciple. Ashi's teacher was Kahana, a member of the same college, who afterward became president of the academy at Pumbedita.

While still young Ashi became the head of the Sura Academy, his great learning being acknowledged by the older teachers. It had been closed since Ḥisda's death (309), but under Ashi it regained all its old importance. His commanding personality, his scholarly standing and wealth are sufficiently indicated by the saying then current, that since the days of Judah I., the Patriarch, "learning and social distinction were never so united in one person as in Ashi" (Sanh. 36*a*). Indeed, Ashi was the man destined to undertake a task similar to that which fell to the lot of Judah I. The latter compiled and edited the Mishnah; Ashi made it the labor of his life to collect after critical scrutiny, under the name of "Gemara," those explanations of the Mishnah that had been handed down in the Babylonian academies since the days of Rab, together with all the discussions connected with them, and all the halakic and haggadic material treated in the schools.

Compiles the Gemara.

Conjointly with his disciples and the scholars who gathered in Sura for the "Kallah" or semi-annual college-conference, he completed this task. The kindly attitude of King Yezdegerd I., as well as the devoted and respectful recognition of his authority by the academies of Nehardea and Pumbedita, greatly favored the undertaking. A particularly important element in Ashi's success was the length of his tenure of office as head of the Sura Academy, which must have lasted fifty-two years, but which tradition, probably for the sake of round numbers, has exaggerated into sixty. According to the same tradition, these sixty years are said to have been so symmetrically apportioned that each treatise required six months for the study of its Mishnah and the redaction of the traditional expositions of the same (Gemara), thus aggregating thirty years for the sixty treatises. The same process was then repeated for thirty years more, at the end of which period the work was considered complete.

Varying Accounts of His Work.

The artificiality and unreality of this legendary account are made clear by the facts that the treatises are of different degrees of length and difficulty, and that a large number of them possess no Gemara whatever. Probably all that is historical in this statement is that Ashi actually revised the work twice—a fact that is mentioned in the Talmud (B. B. 157*b*). Beyond this, the Talmud itself contains not the slightest intimation of the activity which Ashi and his school exercised in this field for more than half a century. Even the question as to whether this editorial work was written down, and thus, whether the putting of the Babylonian Talmud into writing took place under Ashi or not, can not be answered from any statement in the Talmud. It is nevertheless probable that the fixation of the text of so comprehensive a literary work could not have been accomplished without the aid of writing. The work begun by Ashi was continued by the two succeeding generations, and completed by Rabina, another president of the college in Sura, who died in 499. To the work as the last-named left it, only slight additions were made by the Saboraim. To one of these additions—that to an ancient utterance concerning the "Book of Adam, the first man"—the statement is appended (B. M. 86*a*), "Ashi and Rabina are the last representatives of independent decision [horaah]," an evident reference to the work of these two in editing the Babylonian Talmud, which as an object of study and a fountainhead of practical "decision" was to have the same importance for the coming generations as the Mishnah had had for the Amoraim.

Restored Sura's Importance.

Ashi not only elevated Sura till it became the intellectual center of the Babylonian Jews, but contributed to its material grandeur also. He rebuilt Rab's academy and the synagogue connected with it; sparing no expense, and personally superintending their reconstruction (Shab. 11*a*). As a direct result of Ashi's renown, the exilarch came annually to Sura in the month after the New-Year to receive the respects of the assembled representatives of the Babylonian academies and congregations. To such a degree of splendor did these festivities and other conventions in Sura attain, that Ashi expressed his surprise that some of the Gentile residents of Sura were not tempted to accept Judaism (Ber. 17*b*).

Sura retained the prominence conferred on it by Ashi for several centuries; and only during the last two centuries of the Gaonic period did Pumbedita again become its rival. Ashi's son Tabyomi—always spoken of as "Mar (Master), the son of Rab Ashi," was a recognized scholar; but it was not until 455, twenty-eight years after his father's death, that he was invested with the position which his father had so successfully filled for more than half a century.

ASHIMA.—Biblical Data: One of the gods of the Hamathites, an image of which was set up in Samaria by the men of Hamath, whom Sargon settled there after 722 B.C. (II Kings xvii. 30). Jewish tradition explains the name as signifying a short-haired goat. Hence, some suppose that he was a sort of Oriental Pan, a god of woods and shepherds. This explanation is highly improbable. Others have considered the name to be a form of ASHMUN (or Eshmun), the Phenician god; while still others have connected it with the name of the Babylonian goddess, Tashmitu, consort of Nabu, the god of learning. Kittel ("Die Bücher der Könige," 1900), following Baudissin, holds that Ashima was an Aramaic deity, probably connected in name with the river Ashmaya, near Tyre. This conjecture seems much more probable, although nothing further is positively known than what is stated in the Biblical passage above cited.

ASHIRAH (B)

J. JR. G. A. B.

——**In Rabbinical Literature:** According to the Rabbis (Yer. 'Ab. Zarah iii. 42*d*; Sanh. 63*b*), this idol of the Hamathites had the form of a buck. A curious confusion has been made by some of the later commentators—even by Abraham ibn Ezra—who mistake the idol Ashima for the Samaritan appellation for God, Ashima meaning "the Name"; just as the Jews are accustomed to speak of the Deity as "ha-Shem" (Reifmann, in Gurland's "Ginze Yisrael," 74).

J. SR. L. G.

ASHIRAH (אשירה = "I will sing"): The first word of the Song of Moses (Ex. xv.), known as "Shirat ha-Yam" (The Song at the Sea), read in the synagogues in the lesson of the seventh day of the Passover (the anniversary of the crossing of the Red Sea), in the lesson of Sabbath "Beshallaḥ" (Ex. xiii. 17–xvii. 16) in the yearly cycle of Pentateuchal readings, and at the conclusion of the Psalms in the daily morning service. Traditionally associated with the song is a very ancient intonation, which has indeed been popularly claimed to be the actual chant sung by Miriam and her sisters, and which probably enkernels a true relic of Temple music. It would almost suggest itself to the earliest reciters of the song to chant it in an echo of the martial notes of a trumpet-call. Trumpet-calls remain the same throughout the centuries, inasmuch as such musical phrases consist only of notes dependent on certain natural properties of every column of air enclosed in a tube. Thus the ancient reciter would, on commencing the Song of Moses, have modulated his bardic speech-song into some imitation of a trumpet-note, even as is still traditionally done when from the scroll of the Law it is read out that "Pharaoh drew nigh" (Exod. xiv. 10) with "his chariots and his horsemen" (*ib.* 18), or that "the standard of the camp of the children of Judah set forward . . . and over his host was Nahshon" (Num. x. 14), or that "they removed from Elim and encamped by the Red Sea" (Num. xxxiii. 10), or similar details of a military movement. Such modulations are known as "nedarim." So, when the cantillation of the lessons from the notation of the accents (see MUSIC, SYNAGOGAL) had become crystallized in its various forms, the trumpet was still imitated whenever the Song of Moses was read.

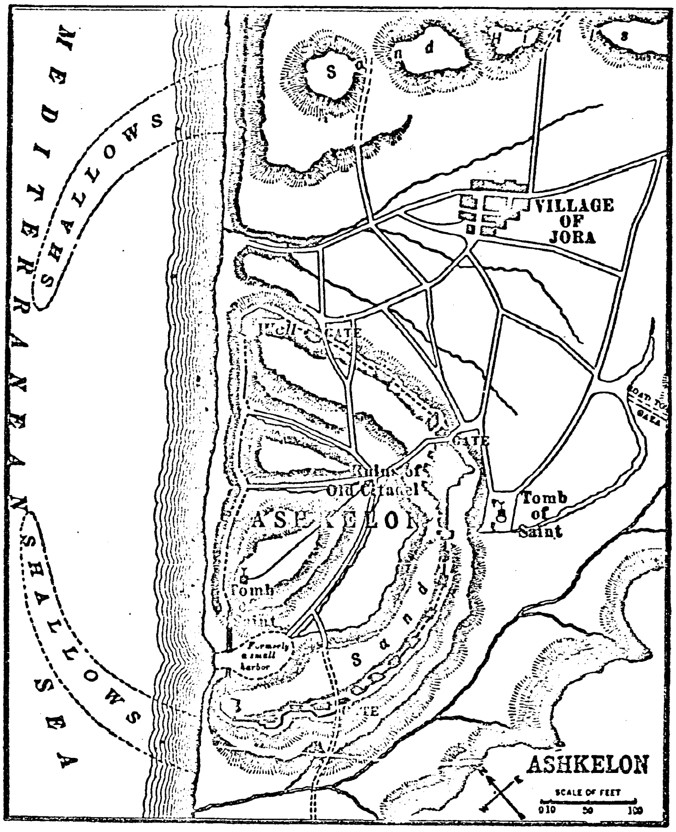
har--sha-li-shaw... tub-bĕ-'u....... bĕ-Yam Suf.

But the song was also recited in morning prayer; and, however much the length of the set service might cause it to be still more hurried through on week-days, yet on Sabbath and festivals attention would be paid to rabbinical exhortation that it should be chanted "standing, and with melody, and with gladness." Among the Ashkenazim "melody" came more and more to mean the solo intonation of the "ḥazan," who gradually elaborated the old martial call into triumphant flourishes rather beyond the vocal capacity of an ordinary congregant. These he would alternate with the normal cantillation, and would employ them for the special emphasizing of the more striking verses of the song. Such flourishes are still, to a certain extent, fluid, not having strictly crystallized into any definite set of notes. *Ashirah* (verse 1) would be given as opposite (A).

With the Sephardim musical tradition has, on the whole, inclined to congregational singing rather than to the vocalization, however edifying, of any individual. The whole assemblage shared in the chanting of the Song of Moses, in its place in the morning service at least. Hence the development of the original supposed trumpet-call proceeded in a different direction. It became a formal melody rather than a dramatic improvisation, rhythmic rather than free, and settled down into a fixed tune as distinct from a recitative. In Italy a simpler chant is utilized for week-days; but on Sabbath and festivals Ashirah is rendered as in (B).

This, as transcribed by Professor F. Consolo in his "Libro dei Canti d'Israele," is perhaps the freest among the versions of the Sephardim; and the variant preserved among Turkish Jews is very similar to it. But more effectively developed is the version marked C, handed down by the Portuguese tradition, and transmitted to the daughter congregations by Amsterdam especially. The French rendering (compare Naumbourg, "Agudat Shirim," No. 60) is a variant which establishes the original identity of the Italian and of the Dutch, the latter being the source of the English and the American forms. The essential notes of all of them, despite several characteristic phrases of the Sephardic "ḥazzanut," recall those of the trumpet-call here suggested as their original. The rhythmic clearness and tuneful definiteness of the Portuguese variant result from its developed structure (similarly to many other chants of the Sephardim, as in their versions of Ps. xix. and xcii.) in the binary or two-part form. The two symmetrical yet contrasting musical sentence, marked A and B in the preceding transcription of the first four verses, permit of the fitting of the chant to sentences of varying length and outline in the text itself.

This melody was first transcribed about 1856 by Emanuel Aguilar for the Rev. D. A. De Sola's "Ancient Melodies of the Liturgy of the Spanish and Portuguese Jews."



Plan of the Ancient City of Ashkelon.
(From "Zeitschrift des Deutschen Palästinens, Vereins.")

Quite recently its martial conception has been interestingly emphasized in its adoption for the "Parade March" of the Jewish Lads' Brigade. The melody has been applied by the Sephardim, according to their custom, to many other texts, particularly the psalms of the Hallel; and it has also been associated by the writer with Thomas Moore's "Song of Miriam," to form a hymn. It has been further utilized by Asger Hamerik, a Norwegian composer, formerly director of the Peabody Conservatory at Baltimore, Md., as one of the three Hebrew themes of his admirable "Sinfonia Trionfale," entitled a "Jewish Trilogy."

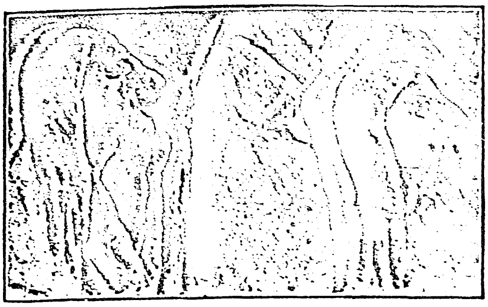
ASHKABAH. See Hashkabah.

ASHKELON: City on the southern coast of Palestine. It occurs in Egyptian texts twice as "Asḳaruni," among the cities revolting against Rameses II. (see illustration, p. 192) and Meneptah; in the El-Amarna tablets, the prince Yitia of Asḳaluna is mentioned as being obedient to Egypt. Ashkelon never seems to have been in the hands of the Israelites, though hard pressed by Samson (see Judges xiv. 19; I Sam. vi. 17; Josh. xiii. 3; II Sam. i. 20, etc.). In Judges i. 18, it is stated that "Judah took Ashkelon with the border thereof"; but this statement is in contradiction to the Septuagint, in which the verse states what Judah "did not take."

The Assyrians frequently mention Iskaluna (or Asḳaluna). Tiglath-pileser II. subjected it, and about 732 B.C., made Rukibti king instead of Mitinti. Sennacherib, in 701 B.C., captured Sidḳa, whom he calls a usurper and rebel, and put Sharru-ludari, the son of Rukibti, again in his place. The kingdom of Ashkelon comprised at that time Joppa, Bet-Dagon, Benê-Barak, etc. Mitinti was king in the time of Esarhaddon and Assurbanipal. Herodotus (i. 105) narrates that the Scythians [that is, Cimmerians; or Ashguzi (Ashkenazim) of the Bible] plundered the temple of the "heavenly Aphrodite" in Ashkelon about 620 B.C. The principal deity of Ashkelon was the fish goddess Derketô (=Atargatis?), to whom fishes were sacred; some were kept in a tank near the city (Diodorus, ii. 4; Pausanias, i. 14, 6). Her daughter, "the heavenly Aphrodite," whose sacred animal was the turtle-dove, was sometimes called Semiramis. "Ẓarifa," the general name for a building with a cone-shaped roof, occurs as the name of a temple at Ashkelon ('Ab. Zarah 11*b*).

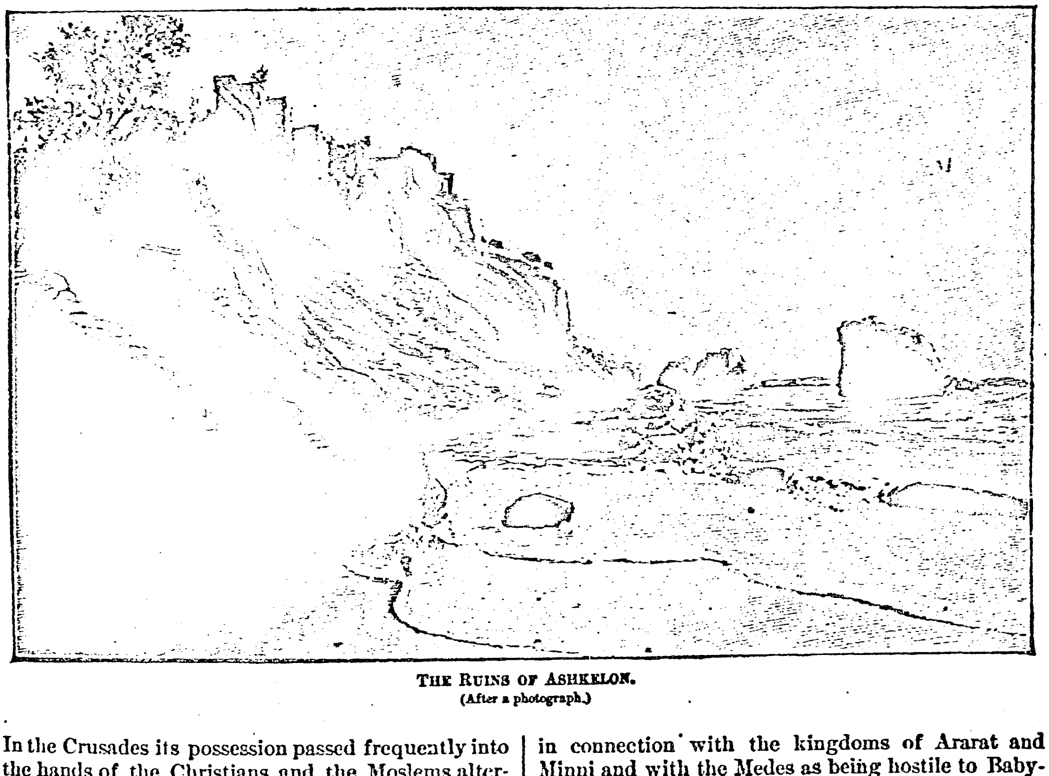
According to Scylax ("Periplus"), the Tyrians held Ashkelon in the Persian time. Although thoroughly Hellenized, it surrendered twice easily to Jonathan the Maccabee (I Macc. x. 86, xi. 60), and later to Alexander Jannæus. Strabo (vii. 59) still calls it "a small city." Herod the Great, who, according to some traditions (Justin, "Dialogus cum

Tryphone"), was born in Ashkelon, embellished it considerably, and his sister Salome resided there (Josephus, "B. J." ii. 6, § 3). In the great revolution, the Jews seem to have attacked it without suc-



Inhabitants of Ashkelon.
(From Sayce, "Races of the Old Testament.")

cess (contrast "B. J." ii. 18, § 1, with iii. 2, § 12). The most flourishing period of Ashkelon was during the later division of the Roman control, when it was a free republic (Pliny, "Hist. Nat." v. 68), famous for the literary taste ruling there. Ammianus Marcellinus, xiv. 8, 11, speaks of it as a considerable place.



The Ruins of Ashkelon.
(After a photograph.)

In the Crusades its possession passed frequently into the hands of the Christians and the Moslems alternately (1154, 1187, 1192). Since its demolition in 1270 it has remained a ruin. Whether the extensive ruins of the medieval "Ascalon," west of the village El-Jôra, cover exactly the site of the ancient city or only the portion referred to as "Ascalon" Maiumas—that is, the suburb with the so-called port—is an open question. Ptolemy's statement (v. 16, 2; viii. 20, 13) that it was a maritime city may be understood as broadly as in the case of several neighboring cities. The site of Ashkelon proper is placed by some scholars near the village El-Mejdel, northwest of Asḳalân. It may be mentioned that the onions of Ashkelon, famous in antiquity (Strabo, Stephen Byzantinus), still grow wild on the fertile spot (see PHILISTINES).

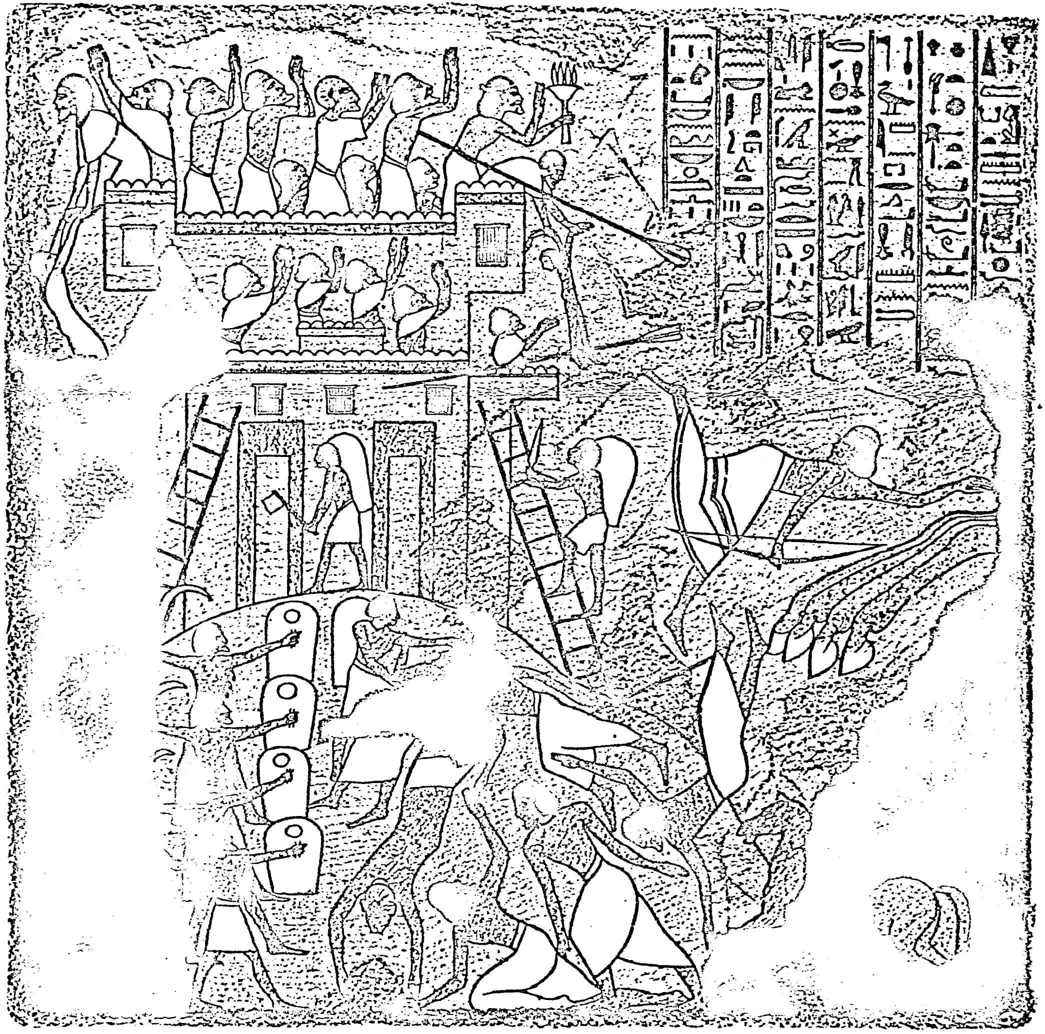
J. JR. W. M. M.

ASHKENASY, EUGENE: Botanist; born at Odessa May 5, 1845. He occupies (1902) the position of honorary professor of botany at the University of Heidelberg, Germany. In 1871 he wrote "Beiträge zur Kritik der Darwinischen Theorie." A considerable number of his articles have been published in the "Botanische Zeitung," the "Botanischer Jahresbericht," and in the "Bibliothèque de l'Université de Génève," lvi., lviii., lxii. S.

ASHKENAZ (אשכנז): A people traced back (Gen. x. 3; I Chron. i. 6) through Gomer to Noah's third son, Japheth. In Jer. li. 27, 28, it is mentioned in connection with the kingdoms of Ararat and Minni and with the Medes as being hostile to Babylon. The Targum to the passages in Gen. and Chron., the Talmud (Yer. Meg. i. 71*b*) and Midrash (Gen. R. xxxvii.) identify it with Asia; that is, the Roman province (*Asia propria* or *proconsularis*), consisting mainly of the districts of Lydia, Phrygia, and Caria. Targum Yer. has, instead of it, "Adiabene" (that is, the district of ancient Assyria), with which the Talmud and Midrash connect Riphath (apparently according to marginal reading Diphath in Chron. i. 6). While in the Targum, Talmud, and Midrash, Togarmah is identified with Germania (the identification, three instances in all, being clearly based on similarity of sound), the medieval Jews (as, for example, Yosippon) understood by Ashkenaz the Teutons. Eusebius had also made this identification, while, according to Saadia, the Slavs are meant. Josephus identifies Ashkenaz with the Rhegines, a people otherwise unknown. Modern scholars since Bochart have connected Ashkenaz with Ascanius, which occurs as the name of a Mysian and of a Phrygian prince, and in Homer as the name of a river also; there was likewise a district Ascania inhabited by Phrygians and Mysians; and an Ascanian lake was located in Phrygia and in Bithynia. Accordingly, Ashkenaz is said to be the old name of a people who spread through Mysia and Phrygia, and subsequently settled in western Armenia (Ashkhen is an Armenian proper name). Assyriologists identify Ashkenaz with a people named Ashguza whose aid was sought by the Mannai when they revolted from Esarhaddon; both were settled near Lake Urumiyeh. This view agrees better with the passage in Jeremiah.



Ashkelon Besieged by Rameses II. (See p. 190.)

J. SR. M. L. M.

ASHKENAZ: Germany: name applied generally in medieval rabbinical literature to that country. Its origin in this particular is obscure. Among the sources quoted by Zunz ("Ritus," p. 66) the ritual of Amram Gaon (about 850) is perhaps the oldest. Its mention there proves nothing, as the work has been interpolated by later authors. References to Ashkenaz in Yosippon and Ḥasdai's letter to the king of the Chazars would bring the inquiry down to the tenth century, as would also Saadia Gaon's Commentary on Dan. vii. 8. The epistle of Ḥasdai is, however, of disputed authenticity, while the commentary of Saadia is certainly a work of much later date (see Rapoport, in "Bikkure ha-'Ittim," ix. 34, Vienna, 1828; Steinschneider, "Cat. Bodl." col. 2195). In a genuine work of Saadia the word, however, is also used, as it seems, in the same sense (Harkavy, "Measef Nidaḥim," pp. 1, 90).

In the first half of the eleventh century Hai Gaon refers to religious questions that had been addressed to him from Ashkenaz, by which latter term he undoubtedly means Germany ("Sha'are Ẓedeḳ," No. 99, Leipsic, 1858). Rashi in the latter half of the eleventh century refers to both the language of Ashkenaz (Commentary on Deut. iii. 9; *idem* on Suk. 17*a*) and the country of Ashkenaz (Ḥul. 93*a*). During the twelfth century the word appears quite frequently. In the "Maḥzor Vitry" (ed. S. Hurwitz, pp. 112, 392, Berlin, 1892), a liturgical work, the kingdom of Ashkenaz is referred to chiefly in regard to the ritual of the synagogue there, but occasionally also with regard to certain other observances (*ib.* p. 129).

Eliezer ben Nathan, in his history of the persecution during the Crusades ("Quellen zur Gesch. der Juden in Deutschland," ii. 36, Berlin, 1892), mentions a mob of Zarfatim (French) and Ashkenazim (Germans). The same words are used by Solomon ben Simson (*ib.* p. 1). German as the language of Ashkenaz is frequently referred to in the anonymous work on ritual, called "Asufot" (Güdemann, "Geschichte des Erziehungswesens und der Cultur in Frankreich und Deutschland," 1880, pp. 113, 131; see also pp. 50, 276).

In the literature of the thirteenth century references to the land and the language of Ashkenaz often occur. See especially Solomon ben Adret's Responsa (vol. i., No. 395); the Responsa of Asher ben Jehiel (pp. 4, 6); his "Halakot" (Berakot i. 12, ed. Wilna, p. 10); the work of his son Jacob ben Asher, "Ṭur Oraḥ Ḥayyim" (lix.); the Responsa of Isaac ben Sheshet (Nos. 193, 268, 270). It is strange, however, that Meïr of Rothenburg, a prominent German rabbi of the thirteenth century, does not seem to employ the word at all, while he quotes the German word *Putz* as the language of Canaan (Responsum, No. 30, p. 8, ed. Bloch, 1891; see also p. 10, where the word קרובי is evidently a misprint), and speaks of "our kingdom" ["be-malkutenu"], as distinguished from England and Normandy. His contemporary Samuel ben Samuel, however, employs this word in a letter addressed to R. Meïr in a context which renders it difficult to decide what he meant by it ("Monatsschrift," xviii. 209). It is also curious that Meïr ben Solomon of Perpignan, who was a younger contemporary of Meïr of Rothenburg, speaks of the latter as the greatest of all the rabbis in Ẓarphat ("Bet ha-Beḥirah," 1854, p. 170)—a usage which may have originated in the age of Charlemagne, when Germany was part of the Frankish kingdom.

The reason for this rather peculiar identification of Ashkenaz, who is one of the descendants of Japheth (Gen. x. 3), is found in the Midrash, where R. Berechiah says: "Ashkenaz, Riphath, and Togarmah are גרמניקייא" (Gen. R. xxxvii. 1), which evidently means German tribes or German lands. It would correspond to a Greek word Γερμανικια that may have existed in the Greek dialect of the Palestinian Jews, or the text is corrupted from "Germanica." This view of R. Berechiah, again, is based on the Talmud (Yoma 10*a*; Yer. Meg. 71*b*), where Gomer, the father of Ashkenaz, is translated by "Germamia," which evidently stands for Germany, and which was suggested by the similarity of the sound. The explanation of גרממיא as a Mesopotamian district (Neubauer, "La Géographie du Talmud," p. 421, Paris, 1868; Fürst, "Glossarium Græco-Hebræum," p. 92, Strasburg, 1891; Krauss, "Lateinische und Griechische Lehnwörter") is forced. Not better is the derivation by Elijah Levita from the Talmudic גרמן = "fair" (see Tishbi, *s.v.*, and "Monatsschrift," xxxviii. 260). A peculiar usage of the word is found in the dictionary of Samuel ben Solomon of Urgenj, who interprets Ashkenaz as Khwarizm (see Bacher, "Ein Hebräisch-Persisches Wörterbuch," pp. 19, 31, Budapest, 1900).

In later times the word Ashkenaz is used to designate southern and western Germany, the ritual of which sections differs somewhat from that of eastern Germany and Poland. Thus the prayer-book of Isaiah Horowitz, and many others, give the piyyuṭim according to the Minhag of Ashkenaz and Poland. The neo-Hebraic writers, mostly of Russian and Polish origin, have coined a verb, התאשכנז, "to ape modern social manners."

D.

ASHKENAZI, ABRAHAM: Chief rabbi of Palestine (ראשן לציון), born at Janishar, near Salonica, in 1813; died at Jerusalem Jan. 22, 1880. At the age of fifteen he was taken by his father to Jerusalem, where he studied rabbinical literature in the various colleges. The Turkish rabbis, in consulting him at the age of thirty-five on matters of religious law, addressed him as "Gaon." In 1850 he was appointed dayyan of the Jewish community of Jerusalem; and in 1869 the rabbis of Jerusalem elected him as their chief in succession to David Ḥazan, who died in that year. The sultan, in confirming Ashkenazi's election, conferred upon him the title of "Ḥakam Bashi," whereby he became chief rabbi of Palestine, which post he held for about twelve years. The sultan also bestowed upon him the medal of the Medjidie; and Emperor Franz Josef of Austria, when at Jerusalem, decorated him with the Franz Josef medal. Ashkenazi was very popular among Christians and Mohammedans as well as among Jews; and at his funeral most of the foreign consuls were present.

ASHKENAZI, AZRIEL B. JOSEPH (called also Gunzenhäuser): Printer at Naples, 1491–92. From his printing-house the first editions of Avicenna's "Canon" and Baḥya's "Ḥobot ha-Lebabot" were issued.

Bibliography: De Rossi, *Annales Hebræo-Typographici*, etc., p. 177; Mortara, *Indice Alfabetico*, s.v.; Steinschneider, *Cat. Bodl.* col. 2843.

G. I. Br.

ASHKENAZI, AZRIEL B. MOSES LEVI: Preacher at Tarnogrod, government of Lublin, Poland, in the seventeenth century. He was the author of "Naḥalat 'Azriel" (The Inheritance of Azriel), Frankfort-on-the-Oder, 1691, a work comprising homilies and comments upon parts of the Bible.

Bibliography: Steinschneider, *Cat. Bodl.* col. 754.

H. R. I. Br.

ASHKENAZI, BAERMANN or **BAER** (Hebrew name, **Issachar ben Naphtali ha-Kohen**): Polish commentator on Bible and Midrash; lived in the sixteenth and seventeenth centuries. Though the foremost of all Midrash commentators, the only fact known about him is that he lived in Szczebrzescin. It is also certain that he died in this place (after 1608), and not, as is maintained by all scholars from Conforte to Zunz, in Hebron.

Ashkenazi is the author of the following works: (1) "Mar'eh Kohen" (Appearance of the Priest), Cracow, 1589; Amsterdam, 1673. This work is divided into two parts: the first on seventeen topics of Jewish theology, chiefly of a moral and exegetic character; and the second is an index to all Scripture passages outside the Pentateuch that are mentioned in the Zohar. (2) "Mattanot Kehunnah" (Priests' Gifts), Cracow, 1586; revised edition, Cracow, 1608; and in most editions of the Midrash Rabbah. This is a commentary on the Midrash Rabbah. Ashkenazi's epitaph refers to a lengthy commentary of his on the Bible, not elsewhere mentioned, and very probably lost.

Ashkenazi's great merit lies in the fact that he was the first and almost the sole commentator of the Midrash Rabbah (on the Pentateuch and the five Megillot) who combined extensive knowledge of the subject with sound critical judgment. He considered it of primary importance to render the Midrash text as correct as possible. The material upon which he applied his critical acumen consisted not alone of the texts that had been printed up to that time, but also of a number of manuscripts. Thus, he had three different manuscripts of the Jerusalem Talmud, one of which was provided with vowels. Ashkenazi also cites Midrashim on Isaiah, Job, and the minor prophets, of which nothing further is known, but which probably came from the Yalḳuṭ Makiri. Moreover, he availed himself of a text of the 'Aruk essentially differing from the usual one.

Next to the correctness of the text, Ashkenazi devoted his attention to the "peshaṭ," or simple explanations of the subject and the meaning of the words, without indulging in the prolix discussions then customary. As regards subject-matter, Ashkenazi's explanations were usually correct; but they were less happy in linguistic questions. He often went astray, especially when he tried to elucidate obscure passages in the Midrash by means of Arabic. In this he was frequently misled by some one who was believed to know Arabic.

Ashkenazi seems also to have occupied himself with medicine and physics; and possibly he possessed the book "Asaf," so that many of his statements from the ספרי רפואות (Medical Books) may have come from this source.

Ashkenazi was a brother of Isaac Cohen of Ostrog, author of "Ḳiẓẓur Mizraḥi" and great-grandfather of Abraham b. Eliezer ha-Kohen.

K. L. G.

ASHKENAZI, BAERUSH (DOB): Rabbi at Slonim, Lithuania, later at Lublin, Poland; born about 1801; died in Lublin March 6, 1852. He was the author of: (1) "Noda' ba-She'arim" (Known in the Gates), containing responsa on the "Eben ha-'Ezer"; novellæ on the Talmudical treatise Giṭṭin; rules concerning the laws of Majority and Possession; and, at the end, homilies arranged in the order of the Sabbatical sections. This work was published by the brother of the author, Abraham Aryeh, Warsaw, 1849. (2) "Sha'are Yerushalaim" (The Gates of Jerusalem), containing a commentary on the Seder Zer'aim of the Jerusalem Talmud; notes and novellæ on various treatises of the Jerusalem Talmud; notes and novellæ on different treatises of the Babylonian Talmud and on the work of Isaac Alfasi. This also was published by Abraham Aryeh, Warsaw, 1866.

Bibliography: Fuenn, *Keneset Yisrael*, p. 178; Benjacob, *Ozar ha-Sefarim*, p. 393; Nissenbaum, *Le-Ḳorot ha-Yehudim be-Lublin*, pp. 126, 127.

L. G. I. Br.

ASHKENAZI, or D'ALMEYDA, BEHOR (better known under his popular name of **Behor Effendi**): Government official in the employ of the Ottoman empire; born 1840. He received his early education at the Institution Camondo, and, after filling several subordinate positions, was appointed by Sultan Aziz, in 1869, a member of the council of state (*Chouraï-Devlet*), which contained two Jews in a membership of forty. On the accession of the present sultan, Abdul Ḥamid II., Ashkenazi became a member of the Ottoman parliament, as a delegate of the Jews. He then became "vice-prefect" of Constantinople, a position which he held for several years, making, however, many enemies by reason of his steadfast integrity. In 1896, in recognition of his services, the sultan again made him state councilor; and only lately (1899) he has been placed upon the retired list after thirty years of loyal and efficient service.

Ashkenazi has repeatedly been president of the central consistory of the Jews of Constantinople; also, by reason of his public position as vice-prefect, he has frequently been able to render considerable assistance in the collection of the communal revenues derived from the sales of meat, wine, brandy, etc.

Bibliography: M. Franco, *Histoire des Israélites*.

S. M. Fr.

ASHKENAZI, BENJAMIN: Russian communal worker and philanthropist; born in 1824; died at Grodno in 1894. He was the son of Joshua Heschel Ashkenazi, rabbi of Lublin, who was a descendant of Ḥakam Ẓebi. Ashkenazi settled at Grodno, where he became the leading spirit in communal affairs. On his initiative a hospital was built and, later, a home for the aged. The government, in recognition of his services, bestowed upon him and his children hereditary honorary citizenship. In 1882 Ashkenazi was sent as delegate to the rabbinical convention at St. Petersburg; and in 1883 he was one of the few Jewish representatives who attended officially the coronation of Alexander III. at Moscow. In 1884 he was appointed chairman of the committee on prisons of the government of Grodno.

H. R. M. B.

ASHKENAZI, BENJAMIN B. AARON ABRAHAM. See SOLNIK, BENJAMIN BEN AARON ABRAHAM.

ASHKENAZI, BEZALEL: One of the leading Oriental Talmudists and rabbis of his day; born toward the end of the sixteenth century. Descended from a family of German scholars, he was probably born in Palestine. The greater part of his life was spent in Egypt, where he received his Talmudic education from David b. Solomon Ibn Abi Zimra and Israel de Curial. During the lifetime of his teachers, Ashkenazi was regarded as one of the highest authorities in the Orient, and he counted among his pupils such men as Isaac Luria and Solomon Adeni. The reputation of Ashkenazi in Egypt was so great that he could take it upon himself to abrogate the dignity of the nagid, which had existed for centuries and had gradually deteriorated into an arbitrary aristocratic privilege. When, in 1587, a dispute occurred in Jerusalem over the point whether scholars not engaged in business should contribute to the taxes paid by the Jewish community to the pasha, and to what extent, Ashkenazi, together with several other rabbis, took the stand that Jewish scholars, being usually impelled by love alone to emigrate to Palestine, and being scarcely able to support themselves, should be relieved from all taxes.

In the same year, Ashkenazi himself traveled to Palestine and settled in Jerusalem, where he was recognized as their chief by both the Sephardim and the Ashkenazim. The conditions in Jerusalem were at this time very critical; and it was mainly due to Ashkenazi's influence that the congregations of the city were not dissolved. The German Jews, who ordinarily did not recognize the jurisdiction of the Sephardim, and who, being largely scholars, refused to pay the Jews' tax, nevertheless bowed to Ashkenazi's authority. The Ashkenazim had to contribute to the Jews' tax one-sixth of the sum that was sent from Europe for their support (compare HALUKAH): otherwise the Sephardim, who were on the verge of penury, could not have remained in Jerusalem under the merciless exploitation of the Turkish pashas. This peaceable arrangement between the Ashkenazim and the Sephardim was due solely to the personal influence of Ashkenazi; for immediately upon his death the Ashkenazim refused to keep their pledge (Responsa of Yom-Ṭob Ẓahalon, No. 160).

To posterity Ashkenazi is known principally as the author of the "Shiṭṭah Mekubbeẓet" (Gathered Interpretation). This work, as its title indicates, is a collection of glosses on the greater part of the Talmud, after the fashion of the Tosafot; and in it Ashkenazi combined much original and foreign material. The great value of the "Shiṭṭah" lies principally in the fact that Ashkenazi gives therein numerous excerpts from Talmudic commentaries which have not otherwise been preserved.

The "Shiṭṭah" contains expositions of the Talmud taken from the works of the Spaniards Naḥmanides, ben Adret, and Yom-Ṭob of Seville, and from those of the Frenchmen Abraham b. David, Baruch b. Samuel, Isaac of Chinon, etc. The study of the "Shiṭṭah," is particularly valuable for understanding the Tosafists, because the work contains some of the older and inedited Tosafot; besides, glosses of R. Asher b. Jehiel and of the disciples of R. Perez are partly contained in it. Ashkenazi designed the "Shiṭṭah" to cover the whole Talmud; but only the following tracts were interpreted: Beẓah, the three Babot, Ketubot, Nedarim, Nazir, Soṭah, and the order of Ḳodashim (excepting Ḥullin)—the last-mentioned in the Romm edition of the Talmud. Ashkenazi is also the author of a collection of responsa, which appeared after his death (Venice, 1595). His "Methodology of the Talmud," and his marginal notes to the Yerushalmi, which were still extant at the time of Azulai, are preserved in manuscript at Jerusalem.

D. L. G.

ASHKENAZI, DAVID TEVLE B. JACOB: Moravian rabbi and author; born at the beginning of the eighteenth century; died July 16, 1734. Ashkenazi was rabbi of the communities at Aussee and Gewitsch, and lived at Aussee, the home of his father-in-law, Israel Aussee, one of the wealthiest and most influential Jews in Moravia. But this very wealth of his father-in-law gave rise to active hostility toward Ashkenazi in his congregation. The following episode is characteristic of the state of affairs at that time in many small Jewish communities in Moravia. Ashkenazi was so little respected by his people that he had to apply to the authorities to enforce his rights. He secured an order threatening the congregation with a large fine if they did not show their rabbi the honors due to his station. Next day, when Ashkenazi went to the early morning service, he found his seat framed with the handles (called "ears" in German) of broken pottery. In Judæo-German "Ehre" (honor) sounds the same as "Oehre" (ears), and these were the "honors" shown him. It is not known whether Ashkenazi gave up his position after this. He died at Boskowitz, where his son-in-law was ecclesiastical assessor.

Ashkenazi wrote a curious little book entitled "Bet David" (House of David), Wilhelmsdorf, 1734. The first part contains casuistic expositions of the Talmud, and illustrates better than almost any other work the degeneration of casuistry. The second half is a collection of popular cures and incantations, which is of great value for the study of Jewish folk-lore.

ASHKENAZI, ELIEZER (LAZER) B. ELIJAH: Talmudist, rabbi, physician, and many-sided scholar; born in 1512; died at Cracow Dec. 13, 1585. Though of a German family (according to some, the relative of Joseph Colon; see Mortara, "Indice Alfabetico," *s.v.*), he was probably born in the Levant, and received his Talmudic education under Joseph Taitazak in Salonica. Ashkenazi first became rabbi in Egypt 1538-60, probably at Fostat, where, by his learning and wealth, he became widely known. Compelled by circumstances—doubtless of a political nature—to leave Egypt, he went to Cyprus, remaining there for two years as rabbi at Famagusta.

A desire to visit foreign lands and to observe foreign peoples impelled him to give up this position and to travel. He went first to Venice; but a disagreement with the rabbis, Meïr Padua and his son Judah Katzenellenbogen, caused him to leave the city and in the same year to take up his residence at Prague (1561). Here—either because he was a rabbi, or, at all events, because he was a leading authority—his was the first signature appended to the constitution of the burial society of the congregation. After leaving Bohemia and proceeding eastward as far as the Crimea, Ashkenazi returned to Italy, not before 1570. While rabbi of Cremona he published there (1576) his work, "Yosef Lekaḥ" (Increases Learning; compare Prov. i. 5), dedicated to Joseph Nasi, duke of Naxos, which was several times reprinted. Four years later he was again in eastern Europe, as rabbi of Posen. In 1584 he left that city to take up his abode in Cracow.

His Works.

Ashkenazi's printed works, besides the "Yosef Lekaḥ," are the following: (1) A commentary on the Book of Esther; (2) "Ma'ase ha-Shem" (The Works of God; Venice, 1583; several other editions), a commentary on the historical portions of the Pentateuch, written for the instruction of his son Elijah, and containing also a complete commentary on the Passover Haggadah, which has frequently been published separately; (3) eight "seliḥot" (penitential prayers), included in the Bohemian liturgy; (4) a "tokaḥah" (homily), published by his son. His supercommentary to Naḥmanides, and his critical marginal notes—said to number one thousand—on Joseph Caro's "Bet Yosef," have not been preserved.

His Individuality.

Though Ashkenazi can scarcely be said to have exercised an influence either on his own or on later times, his personality was an extraordinary one for that age. He may be called the last survivor of a most brilliant epoch in the history of the Sephardim. During a period when, in Germany and Poland, the hair-splitting dialectics of Jacob Polak could achieve a triumph, and, in Egypt and Palestine, the mysticism of Isaac Luria could confuse the clearest intellects, Ashkenazi preserved an impressive independence of thought. Although educated by a fanciful cabalist, and a fellow-pupil of Moses Alshech, yet he was a student—if not a deep one—of philosophy and physics. As a Talmudist, such men as Joseph Caro, Moses Isserles, and Solomon Luria considered him of equal authority with themselves; but when the rabbinical decisions of the old rabbis ran counter to sound judgment, he never sought a sophistical justification for them, as was then the custom, especially in Poland.

Valuable material for a correct estimate of Ashkenazi may be found in several of his decisions preserved in the responsa literature of the time. In Venice he decided that a man could be forced to a divorce, if, by immoral conduct, he had incurred his wife's aversion (Isserles, Responsa, No. 96). It was probably this decision which brought upon him the opposition of the above-mentioned Venetian rabbis, though he was connected with them; for Ashkenazi's son was Katzenellenbogen's son-in-law. From the standpoint of strict Talmudic interpretation, Ashkenazi's opponents were in the right; since his sentence contravened that of the Tosafists, who for the German-Italian Jews constituted, as it were, a court of last resort.

Misunderstood by Polish Rabbis.

The Jews of Poland were still less capable of comprehending such a personality than were those of Italy. The following occurrence affords a striking instance of this fact: The "roshe yeshibot" (heads of academies) had forbidden their pupils to establish a rival academy in close proximity to their own. Ashkenazi declined to assent to this resolution, when requested. At the same time, he complained in a letter to Joseph b. Gershon ha-Kohen, the "rosh yeshibah" at Cracow, that, although the decision of the Polish rabbis was based upon the authority of Maimonides, yet he considered it irreconcilable with freedom of instruction among Jewish rabbis. How little he was understood by his Polish colleagues is fully displayed in the reply of the rabbi of Cracow, who at great length vindicates Maimonides' standpoint by erudite and astute references to the Talmud (Joseph b. Mordecai Gershon, "She'erit Yosef," No. 19). Consequently, J. S. del Medigo is justified in his remark that Ashkenazi remained unknown to the Poles, and he applies to him wittily, if somewhat audaciously, the verses: "Thou hast brought a vine out of Egypt: thou hast cast out the heathen, and planted it," etc. (Ps. lxxx. 9 [A. V. 8] to 13 [14]). Ashkenazi had come from Egypt and had to live among the uncultivated Poles.

Ashkenazi's wife, Rachel, died at Cracow April 3, 1593. Her epitaph, still extant, bears witness to her piety and benevolence ("Monatsschrift," xliv. 360). His son Elijah published the liturgic collection, "Zibḥe Shelamim," and wrote a short elegy on his father, which was used as the latter's epitaph.

L. G.

ASHKENAZI, ELIEZER B. SOLOMON: Rabbinical scholar; born in Poland about the beginning of the nineteenth century, and resided afterward in Tunis. He published at Metz in 1845, under the title "Dibre Ḥakamim" (The Words of the Wise), a selection of eleven ancient manuscripts: (1) "Midrash Wayosha'," on the Pentateuch; (2) Joseph Caro's Commentary on Lamentations; (3)

Maimonides' "Ḥokmat ha-'Ibbur," a treatise on the computation of the intercalary month; (4) Abraham bar Ḥiyyah's seventh "gate" of the third treatise on the computation of the intercalary month, with a responsum by Hai Gaon on the calculation of the years since the Creation; (5) Moses Narboni's "Maamar ba-Beḥirah," a treatise on free-will; (6) "Nussaḥ Ketab," a letter from Joshua Lorki on religion; (7) Isaac Ardotiel's "Meliẓah 'al ha-'Et," a prose poem on the pen; (8) David b. Yom-Ṭob's "Yesodot ha-Maskil," thirteen articles of belief of an enlightened man; (9) "RaMBaM," a letter from Maimonides addressed to Rabbi Japhet the Dayyan; (10) a letter by Elijah of Italy, written from Palestine to his family at Ferrara, in 1438; (11) Jacob Provençal's "Be-Debar Limmud ha-Ḥokmah," on the study of science.

S. Munk has written an introduction to this collection, which contains also, as an appendix, a French translation of "Yesodot ha-Maskil" by "H. B."

Ashkenazi published also "Ta'am Zeḳenim" (The Taste of Old Men), edited by R. Kirchheim, a collection of old manuscripts and prints dealing with Jewish literature and history in the Middle Ages (Frankfort-on-the-Main, 1854).

ASHKENAZI, ELIJAH. See Levita, Elijah.

ASHKENAZI, GERSHON: Polish Talmudist; born in the second decade of the seventeenth century; died at Metz March 20, 1693. His family name was really אוליף, "Ulif," "Olive"(?), the surname "Ashkenazi" being usually bestowed in Poland upon families of German extraction. Gershon Ashkenazi was also named "Poss"—not "Fass"—after his rich father-in-law, Loeb Poss, of Cracow. He was dayyan in Cracow, possibly his birthplace, at all events the place where he obtained his Talmudic education from Joel Sirkes and Joshua Ḥarif. From 1649 to 1659 he was rabbi at Prossnitz, from 1659 to 1660 at Hanau, and from 1661 to 1664 at Nikolsburg, where he succeeded his father-in-law, Menahem Mendel Krochmal. For the next five years he was rabbi at Vienna, but was forced to leave owing to the banishment of the Jews. Thence he went to Metz in 1670, where he remained until his death.

Although rabbi of large communities and head of a yeshibah, Ashkenazi found time for literary activity. Of his numerous works, the following have been printed: (1) "'Abodat ha-Gershuni" (Gershon's Service), containing his responsa to the principal Talmudists of his day. The number of these responsa is 124; and they contain much information upon the condition of the Jews in Poland, after the persecutions by the Cossacks; (2) "Tiferet ha-Gershuni" (Gershon's Ornament), midrashic and cabalistic expositions of the Pentateuch. Both books were published at Frankfort-on-the-Main in 1699. (3) "Ḥiddushe ha-Gershuni" (Gershon's Novellæ), Frankfort-on-the-Main, 1716, containing remarks and explanations concerning the third and fourth books of the Shulḥan 'Aruk, in which the author severely criticizes the Aḥaronim.

Even in his lifetime Ashkenazi was recognized as an authority in Talmudic lore, and especially as a most eminent dialectician. His works scarcely justify this opinion; for they are not much above the general average of the rabbinical literature of his time. His influence was, nevertheless, considerable, and was due to his personality. The many ritual inquiries directed to him while rabbi of Metz from western Germany and Alsace-Lorraine show that after his advent in that city he was really the spiritual and intellectual authority for the Jews of those countries. It was mainly in Metz that he exercised a many-sided influence as teacher. Ashkenazi was deeply revered and loved by a large number of pupils whom he had the power to attract to himself. Chief among these was David Oppenheim(er).

Ashkenazi was the father of four learned sons, **Moses, Nathan, Nahum,** and **Joel,** of whom the first-named gained prominence as a Talmudist and cabalist. He died March 22, 1691, at Nikolsburg.

L. G.

ASHKENAZI, ISAAC BEN JACOB: Rabbi at Byeltzy, Bessarabia; lived in the middle of the eighteenth century. He is the reputed author of a cabalistic work, "Berit 'Olam" (Everlasting Covenant), containing cabalistic explanations of the letters, with some concluding chapters on ethics. This work, found among Ashkenazi's papers, was published under his name by Isaac Ḥayyim of Bialostok, Wilna, 1820.

ASHKENAZI, ISRAEL BEN SAMUEL. See Israel of Sklow.

ASHKENAZI, JACOB ISRAEL BEN ẒEBI HIRSCH. See Emden, Jacob Israel.

ASHKENAZI, JOSEPH: Critic of the Mishnah; resided at Safed, Palestine, and died there between 1575 and 1582. Though Ashkenazi came to Palestine from Verona—for which reason he was also called Joseph of Verona—it is by no means impossible that he was born and bred in Germany. This is attested, not by his surname, "Ashkenazi" (this being a family name adopted by many families of German origin), but by the fact that he was the son-in-law of Rabbi Aaron of Posen. Kaufmann surmises that he is referred to in the following couplet of the Judæo-German song, in which as the most learned Jew he is mentioned with Mordecai Meisl, a Jew of Prague of princely wealth:

> "Ich mucht so wol lernen als Rabbi Josef Ashkenas,
> Oder mucht also reich sein als Meislein was."

The epithet "Divine Tanna," conferred upon Ashkenazi by his contemporaries and by men of later times, clearly indicates the main point in which his strength lay. Next to Elijah b. Solomon of Wilna, Ashkenazi is probably the most careful student of the Mishnah, itself the spiritual product of the "Divine Tannaim." Even Isaac Luria, the creator of the new Cabala, did not disdain to receive instruction from him upon the Mishnah. When Teblin of Jerusalem, a pupil of Ashkenazi, went to Europe he imparted to the well-known Mishnah commentator Yom-Ṭob Lipman Heller many of his teacher's explanations of the Mishnah.

Some insight into Ashkenazi's mental activity is gained from his brief and fragmentary glosses to the Mishnah, as published in Solomon Adeni's work, "Meleket Shelomoh," in which Ashkenazi's emendations are considered. In these glosses Ashkenazi displays great critical ability. He treats the text in a wholly unprejudiced and purely scientific manner, and, disregarding tradition, deletes unsparingly whenever, in his opinion, such elision is justified by the import of the text, and in similar manner separates compound words into their component parts. In his opinion the vocalization and the accentuation of words are not side issues, but worthy of the special attention that he bestowed upon them. Ashkenazi's observations are of especial value, being based upon a manuscript Mishnah in his possession, dating from about 700. He is said to have written critical comments also on the Babylonian and Jerusalem Talmuds.

ASHKENAZI, JOSEPH BEN, OF PADUA. See Schalit, Joseph.

ASHKENAZI, JOSEPH EDELS: Palestinian commentator and cabalist; lived at the beginning of the nineteenth century at Jerusalem and Padua; died at Safed. He was sent as European agent ("meshullah") from Palestine to collect money for the Palestinian poor. On his travels he remained at Padua, Italy, for a certain time, where he became the teacher of Mordecai Samuel Ghirondi. According to this source, Ashkenazi was a prolific commentator of Biblical and Talmudical subjects, but published nothing beyond a small commentary on the "Sefer Yeẓirah," to which he appended many of his observations on Bible and Talmud.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 212.

L. G. M. B.

ASHKENAZI, JOSEPH B. ISAAC HA-LEVI: Talmudist and rabbi; born in Germany about 1550; died at Frankfort-on-the-Main 1628. His first teacher was the Frankfort rabbi Eliezer Treves, after whose death (about 1567) he completed his Talmudic studies under Ḥayyim b. Bezalel, Jacob b. Ḥayyim of Worms, Joshua Moses b. Solomon Luria, and David Blum of Sulzberg.

From Bonn, where Ashkenazi held his first position as rabbi, he went to Metz (about 1595). Here the prohibition against the residence of Jews, which had been in force for two hundred years, had been removed, and a community of 120 persons had recently been formed. The subsequent growth of this community was in no slight degree due to the activity and devotion of Ashkenazi, its first rabbi. By 1618 it had increased threefold; and in that year, through the efforts of Ashkenazi, a synagogue was erected. He also bent his energies toward obtaining a Jewish cemetery, in connection with which he founded a "ḥebra ḳaddisha" which was also a study-circle.

His Dispute with Meïr b. Gedaliah.

Ashkenazi is specially known through his dispute with one of the first rabbinical authorities of the time, Meïr b. Gedaliah of Lublin. Ashkenazi was a type of the rigorism characteristic of the German rabbis. On a certain occasion Ashkenazi gave the decision that geese whose entrails had not been examined after slaughter must be accounted "trefah" (forbidden), because such an examination, though unknown to the Talmud, was customary in Germany and Poland. This decision was disputed by the rabbi of Worms, Moses b. Gad Reuben, and was finally submitted to Meïr of Lublin. The Polish rabbis, holding themselves the superiors of their German colleagues, considered Ashkenazi's opinion extreme; and Meïr of Lublin insisted that he should avow his error openly. Though Ashkenazi was by nature mild and yielding, he could not prevail upon himself to act contrary to the custom of his teachers. The dispute now became general; and the scholars of Posen, Cracow, Brest-Litovsk—in short, all the Talmudists of Poland, Lithuania, and Russia—were drawn into the conflict.

Ashkenazi's Rare Magnanimity.

Since Ashkenazi abided by his opinion, in spite of the decision of so many prominent rabbis, and thus unintentionally created the wide-spread impression that the latter had yielded, Meïr sent a very abusive letter concerning Ashkenazi to the community at Worms. He denounced Ashkenazi as impertinent, presumptuous, and ignorant, and requested the Jews of Worms to remove him from his position, adding that he himself could have had him removed through the Council of Four Lands were it not beneath him to have dealings with such a man. Ashkenazi's answer (only recently published) shows his true magnanimity. He does not indulge in one word of personal reproach against the man who had so grievously insulted him, but contents himself with merely defending his own standpoint.

The dispute lasted from about 1610 to 1618, and ended with Meïr's death. A source of satisfaction to Ashkenazi was the decision of Isaiah Horowitz, author of the "Shelah" and a pupil of Meïr, who declared himself against his own teacher, and ordered the omission from the collection of Meïr's responsa of the passages insulting Ashkenazi. The Venice edition (1618), in which these passages are obliterated, affords a rare instance of Jewish censorship.

Is Banished.

Ashkenazi also had a dispute with his congregation, which ended seriously for him. He was as severe and uncompromising in his decisions of civil affairs as he was rigorous in the decision of ritual questions; and, since the community of Metz consisted of a few large families, he demanded that, to avoid partiality, outside judges should be called in in civil suits. The community resisted; and the breach finally brought about his dismissal (1627), Moses ha-Kohen of Prague becoming his successor. Ashkenazi considered the procedure against him illegal; and in a letter dated Dec. 14, 1627, and addressed to the governor of Metz, Prince de la Vallette, he asked the latter to sanction his plan regarding the judges. The prince did not act with impartiality, but referred the matter to the dayyanim Alexander Levi and Mordecai (Maharam) Zey, whose hostile attitude toward Ashkenazi was known. They decided that if Ashkenazi and his followers continued in their opposition, they should be banished from the city. On Jan. 24, 1628, the governor carried this decision into effect, and Ashkenazi went to Frankfort-on-the-Main, where he died the same year.

D. L. G.

ASHKENAZI, JOSHUA HESHEL B. MESHULLAM: Russian Talmudist and rabbi of the nineteenth century; died Feb. 10, 1867, at Lublin. From 1852 till his death he was rabbi of Lublin, his predecessors being first his father, and afterward his cousin Baerush Ashkenazi. The community owed much to Joshua Ashkenazi, who was indefatigable in promoting its spiritual as well as its material well-being. His house was open to every needy person. Because of his philanthropy he was also highly esteemed by his Christian fellow-citizens and distinguished by the government with the title of an honorary citizen, a rank which carried with it certain privileges.

Ashkenazi left ten posthumous works on both haggadic and halakic subjects, which, however, were destroyed in a conflagration some years ago at Grodno. Several of his responsa are contained in Baerush Ashkenazi's "Noda' ba-She'arim."

Bibliography: Nissenbaum, *Le-Korot ha-Yehudim be-Lublin*, 1899, pp. 127, 128.

L. G. M. B.

ASHKENAZI, JUDAH SAMUEL B. JACOB: A commentator, ritualist, and liturgical editor; born in the second half of the eighteenth century; lived at Tabareeyeh (Tiberias), Palestine, whence he was sent as communal traveling agent to Europe. He afterward settled at Leghorn, where the following of his works were published: "Yissa Berakah" (He Shall Receive a Blessing), a commentary on Jeruham b. Meshullam's "Sefer Mesharim" (1822); "Geza' Yishay" (The Stem of Jesse), a collection of rites and laws, alphabetically arranged, of which the first volume alone, containing the letters א to י, was published (1842). He further edited and annotated a prayer-book according to the Spanish rite, "Tefillot lekol ha-Shanah" (Prayers for the Whole Year), divided into five parts: (1) "Bet 'Obed" (The House of the Serving), containing the prayers for the week-days; (2) "Bet Menuḥah" (The House of Rest), for Sabbaths; (3) "Bet Mo'ed" (The House for the Feasts), for the three festivals Passover, Pentecost, and Tabernacles; (4) "Bet Din" (The House of Judgment), for New-Year; and (5) "Bet ha-Kapporet" (The House of Forgiveness), for the Day of Atonement (Leghorn, 1843–1855). I. Costa edited and arranged Ashkenazi's work. He is the author, also, of "Gebul Yehudah" (Judah's Territory), containing novellæ on the Talmud.

Bibliography: Zedner, *Cat. Hebr. Books Brit. Mus.*, p. 58; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 214.

L. G. M. B.

ASHKENAZI (TIKTIN), JUDAH B. SIMON SOFER FRANKFURT: Polish commentator on the Shulḥan 'Aruk; officiated as "dayyan" (assistant rabbi) at Tikotzin, Poland, in the first half of the eighteenth century. He wrote באר היטב ("Explaining Well"), which comments briefly on the first three parts of the Shulḥan 'Aruk. A similar commentary on the fourth part of the Shulḥan 'Aruk—that is, on the "Ḥoshen Mishpaṭ"—was written by Moses Frankfurter, dayyan of Amsterdam. Ashkenazi's work was appended to the Shulḥan 'Aruk in the editions of Amsterdam, 1753 and 1760, and went through many editions.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 586; Fürst, *Bibl. Jud.* i. 62, 63; Steinschneider, *Cat. Bodl.* col. 1292.

L. G. M. B.

ASHKENAZI, MEÏR, OF KAFFA (CRIMEA): Envoy of the Tatar khan in the sixteenth century; killed by pirates on a voyage from Gava (near Genoa) to Dakhel (probably Dakhel or Dakleh in the western oasis of Upper Egypt), between the 15th and the 25th day of Tammuz (July), 1567. From the testimony of the witness Elias ben Nehemiah, given before the board of rabbis in Safed in the case of the widow and heirs of the slain Meïr Ashkenazi, it was made evident that he was an inhabitant of Kaffa; that his parents were still living there; that he had a brother who was a student in the rabbinical college ("yeshibah") of Brest-Litovsk; that he had brought to Gava prisoners of war from Egypt; that he was appointed envoy of the khan of the Tatars to the king of Poland; and that on the way from Gava to Dakhel he was slain by pirates with all the passengers on the ship.

Bibliography: Moses of Trani, *Responsa*, part 2, § 78.

s. H. R.

ASHKENAZI, MEÏR BEN MOSES (COHEN), also called **KaẒ**, the initials of "Kohen Ẓedek" (priest of righteousness): Polish Talmudist; born about 1590 at Frankfort-on-the-Main; died about 1645 at Mohilev on the Dnieper. His father was dayyan at Frankfort and, later, rabbi at Danhausen, Bavaria. When a youth Meïr went to Lublin, Poland, where he was the pupil of Meïr Lublin. He became rabbi at Amstebowy, and afterward at Mohilev, thus reaching White Russia, at that time forming the eastern limits of the Polish kingdom.

In Poland, Meïr was considered a Talmudic authority; but to posterity he is known chiefly as the father of Shabbethai Cohen, author of the ש"ך, the initials of the words "Sifte Kohen" (The Lips of the Priest). Nine of Meïr's responsa were published by Isaac, a great-grandson of Meïr, as a supplement to a work of Shabbethai Cohen, "Geburat Anashim." Most of them deal with marital questions. In his teachings Meïr based his opinions on the most recent authorities (Aḥaronim); only in the case of an 'Agunah he was very liberal ("Geburat Anashim," 32*a*, 33*a*).

Meïr also wrote some verses (preface to "Sifte Kohen") in honor of his well-known son Shabbethai. In his poetry as well as in his responsa he displays a good style, and employs the pure Biblical language of a thorough master. This talent was shared by his son Shabbethai.

Meïr is the earliest Jewish author in the province of White Russia.

L. G. I. Ber.

ASHKENAZI, MESHULLAM ZALMAN: Polish rabbi and man of letters; born in the second half of the eighteenth century; died at Lublin, Poland, May 1, 1843. He was the son of Rabbi Meshullam Zalman of Pomarin, whose family name was Orenstein, under which appellation his brother, Rabbi Mordecai Ẓebi of Lemberg, is also known. Meshullam Zalman the elder, who died before the birth of his son, was a grandson of Ḥakam Ẓebi.

Meshullam the younger held the office of rabbi at Cazimir and Naselsk, and from 1826 until his death, at Lublin. He wrote glosses to the Mishnah, published in the Wilna edition, 1869.

H. R.

ASHKENAZI, MOSES. See Spaethe, Peter.

ASHKENAZI, MOSES DAVID: Talmudist and author; born in Galicia about 1778; died at Safed, Palestine, in 1857. After holding the office of rabbi at Tolcsva, Hungary, from 1803 to 1843, he emigrated to Palestine, settling permanently at Safed. In 1844 he published at Jerusalem his chief work, "Toledot Adam" (Generations of Adam; "Adam" [אדם] being the initial letters of his name), containing novellæ on several treatises of the Babylonian Talmud and two decisions on complicated legal questions. "Toledot Adam" is prefaced with an approbation by Jacob of Lissa, and with another by Jacob Orenstein. Both of these eminent Talmudists regarded Ashkenazi as their peer; Orenstein speaks of him as "schoolmate."

Ashkenazi's second work, "Beer Sheba'" (Well of the Oath), is a collection of homiletic disquisitions on the Pentateuch (Jerusalem, 1852). In the preface he says that he had been in the Holy Land for nine years, consequently the date given by Benjacob ("Oẓar ha-Sefarim," p. 618) is incorrect. An approbation to it was written by Abulafia, ḥakam bashi of Jerusalem.

Ashkenazi's father, Asher, was a prominent Talmudist; and the two sons of Ashkenazi, Joel and Solomon, were rabbis in Galicia. The former son, who left no work, is quoted in "Toledot Adam," 2*a* and 98*a*; while Solomon wrote a book entitled "Kotnot Or" (Garments of Light). Solomon died in Jerusalem, February, 1862.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 618.

ASHKENAZI, MOSES ISAAC. See Tedeschi, Moses Isaac.

ASHKENAZI, NAPHTALI B. JOSEPH: Preacher at Safed in the sixteenth century; died at Venice in 1602. He wrote a work, entitled "Imre Shefer" (Words of Beauty), containing homiletic and exegetical dissertations on the Bible. The edition of this work published at Venice, 1601, includes several funeral sermons by him.

K. I. Br.

ASHKENAZI, NISSIM ABRAHAM: Talmudic author; lived in the first half of the nineteenth century in Smyrna, where he officiated. He was the author of "Neḥmad le-Mareh" (Graceful of Appearance), which contains methodological rules on the treatises Berakot and Seder Zera'im in the Jerusalem Talmud, as well as decisions of the older and later authorities concerning the Halakot treated therein (Salonica, 1832–46).

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 397.

L. G. M. B.

ASHKENAZI, RAPHAEL BEN JUDAH (known also as **Raphael Naphtali Ashkenazi**): A rabbi of Smyrna, where he died in 1830. He wrote: (1) "Mareh 'Enayim" (Sight to the Eyes), Salonica, 1816—an index to the Talmud and to Rashi and Tosafot, after the model of Benvenisti's "Sefer Keneset ha-Gedolah"; (2) "Mareh ha-Gadol" (The Great Vision), Salonica, 1829—containing homilies on the Pentateuch; (3) "Doresh Ṭob" (Seeking the Good), a continuation of the preceding work, Salonica, 1831; appended to it is Judah Ashkenazi's work, "Seride Yehudah" (Judah's Remnant); (4) "Mareh ha-Nogah" (The Vision of Glory), containing observations on the works of Maimonides, Salonica, 1840.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 370; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 314; Franco, *Histoire des Israélites de l'Orient*; Mortara, *Indice Alfabetico*, s.v.; Fürst, *Bibliotheca Judaica*, iii. 127.

ASHKENAZI, SABBATHAI BEN MEÏR. See SABBATHAI COHEN.

ASHKENAZI, SAMUEL B. ELIESER: Author of novellæ to the Talmud; lived at Opatow, Poland, in the second half of the sixteenth century. He was a pupil of Meïr b. Gedaliah of Lublin and wrote "Ḥiddushim," novellæ on the Talmudic treatises Ketubot and Ḳiddushin, especially on Rashi and the Tosafot. Ashkenazi's novellæ were culled from the responsa literature (Prossnitz, 1602).

ASHKENAZI, SAUL COHEN: Religious philosopher of German descent, as his name indicates; born in Candia 1470; died at Constantinople May 28, 1523. He was a disciple of Elijah del Medigo, who induced him to devote his attention to philosophy. His principal works are: (1) "Sheëlot," a philosophic treatise, in the form of questions addressed to Isaac Abravanel, published together with the latter's replies and with philosophic essays by various other authors, Venice, 1574, and (2) an epilogue to his master's chief work, "Beḥinat ha-Dat," Basel, 1629.

D.

ASHKENAZI, SIMON, OF GALICIA: Rabbi of Dobromil and Jaroslav (Galicia) at the end of the eighteenth and the beginning of the nineteenth century. He was a disciple of R. Jacob Isaac of Lublin (died 1815), and carried on a learned correspondence with Jacob Meshullam Orenstein, chief rabbi of Lemberg (died 1839). Ashkenazi wrote "Naḥalat Shim'on" (Simon's Inheritance), a series of cabalistic dissertations on the Pentateuch (1815; 2d ed., Lemberg, 1848).

K. M. B.

ASHKENAZI, SOLOMON BEN NATHAN: Court physician of King Sigismund II., Augustus of Poland (1548–72), and Turkish diplomat; born probably about 1520; died 1602. A descendant of a German family settled in Udine (Italy), he came in his early youth to Cracow, probably in the train of the Italian wife of Sigismund, Bona, and owing to his ability obtained the position of first physician to the king. Later he removed to Constantinople, where he displayed great skill in diplomatic affairs as member of the staff of Grand Vizier Mahomet Sakolli, who entrusted him with many delicate commissions. During the Turkish war with Venice for the possession of Cyprus (1570), Ashkenazi was engaged in the preliminaries for a treaty of peace. At the election of the Polish king in 1572, Turkey had powerful influence. Ashkenazi, who then practically managed the foreign affairs of Turkey, decided in favor of Henry of Anjou, and won over the grand vizier to his side. When Henry, afterward King Henry III. of France, became king of Poland, Ashkenazi wrote to him: "I have rendered to your Majesty most important service in securing your election. It was I who effected all that was done here" (Charrière, p. 932, note). It was partly due to Ashkenazi's influence that the decree of banishment of Jews from Venice was revoked, July 19, 1573. In 1576 he was appointed envoy extraordinary of the Porte to Venice, with full power to conclude peace. But the republic was unwilling to receive the Jew, Ashkenazi; and not until the grand vizier insisted was he finally acknowledged. Thereafter the Venetian authorities paid him great honor and attention. He was received in state audience and signed the act of peace in behalf of Turkey. He left three sons: Nathan, Samuel, and Obadiah. His wife seems to have had some knowledge of medicine. After Ashkenazi's death she was called to the sick-bed of Sultan Mehemed III., and cured him of smallpox. Ashkenazi's son Nathan came from Constantinople to Venice in 1605, and was treated by the doge Grimani with great consideration.

BIBLIOGRAPHY: The data for the biography of Ashkenazi are to be found chiefly in the reports of the French ambassador to the Porte, and of M. de Ferriers, French ambassador to Venice (published by Charrière, *Négotiations de la France dans le Levant*, vol. iii., *passim*), as well as in the reports of the Venetian ambassador Marcantonio Barbaro (Alberi, *Relazioni degli Ambasciatori Veneti*, vol. xvi., Florence, 1853). See also Joseph ha-Kohen, *'Emeḳ ha-Baka*, ed. Letteris, Cracow, 1895, p. 167. Zunz, *'Ir ha-Ẓedeḳ*, confounds the subject of this notice with Solomon of Kalahorra (pp. 68 *et seq.*). D. H. R.

ASHKENAZI, ZEBI HIRSCH (ḤAKAM ẒEBI) B. JACOB: Rabbi; born 1658 in Moravia; died May 2, 1718, at Lemberg. He was descended from a well-known family of scholars. When a boy he received instruction from his father and from his grandfather, Ephraim ha-Kohen, then rabbi at Alt-Ofen, and later went to Salonica, where for some time he attended the school of Elihu Cobo. There, also, he witnessed the deplorable aberrations which had grown out of the schisms engendered by the Shabbethai Ẓebi movement; and this experience became a determining factor in his whole career. During his stay at Salonica, Ashkenazi devoted himself mainly to an investigation of the Sephardic methods of study. Upon his return journey to Alt-Ofen he seems to have stayed some time (probably till 1679) at Constantinople, where his learning and astuteness made such an impression that, though a Polish scholar, he was termed "ḥakam," which Sephardic title he thenceforth retained and by which he is known in history. Shortly after his return he married the daughter of a prominent citizen of Alt-Ofen.

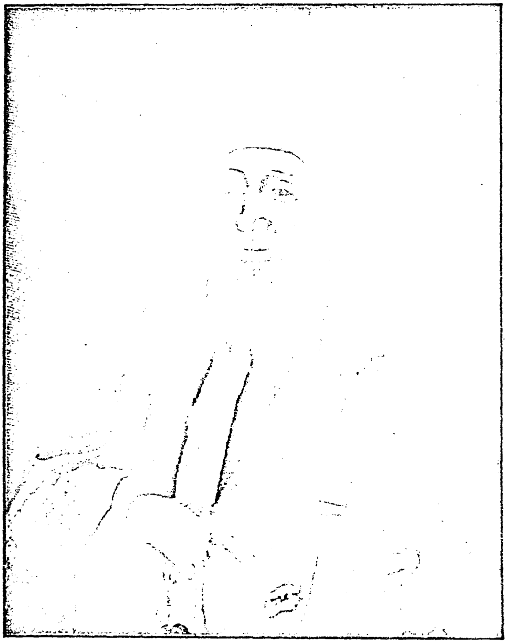
Early Life and Education.

When, in 1686, Alt-Ofen was invested, Ashkenazi, after seeing his young wife and daughter killed by a cannon-shot, was compelled to flee; thus becoming separated from his parents, who were taken captive by the Prussians. Proceeding to Sarajevo,

Arrival in Germany.

he received an appointment as rabbi, in which post he remained until 1689. He probably resigned on account of some contention with certain members of his congregation, and left Sarajevo for Germany. In Berlin he married Sarah (died at Lemberg Jan. 23, 1719), the daughter of Meshullam Zalman Mirels Neumark, chief rabbi of Altona, Hamburg, and Wandsbeck.

On the advice of his father-in-law he went in 1690 to Altona, where the leading members of the congregation founded a study-house (*Klaus*) and installed Ashkenazi as rabbi. His school became celebrated, and pupils assembled from all parts to hear him; but his income as rabbi of the *Klaus* was only 60 thalers annually, so that he was compelled to defray his living expenses by engaging in various business pursuits (dealing in jewelry, etc.). After the death of his father-in-law, whom Ashkenazi had latterly aided in his official duties, one party in the Jewish community wished to have Ashkenazi installed as rabbi of the three congregations; while another party favored the election of Moses b. Alexander Rothenburg. Finally it was decided that both candidates should serve, but alternately, each for a period of six months. Naturally, friction and strife over religious questions ensued, and finally became so intense that in 1709 Ashkenazi deemed it advisable to resign and resume his duties as rabbi of the *Klaus*.



Ẓebi Hirsch Ashkenazi.
(From the "Transactions of the Jewish Historical Society," London.)

Becomes Chief Rabbi of Amsterdam.

Ashkenazi was not, however, destined to remain in Altona long; for on Jan. 10, 1710, he received a letter of appointment to the chief rabbinate of the Ashkenazim congregation of Amsterdam. In addition to free residence, the office carried with it a yearly salary of 2,500 Dutch guilders—a sum the magnitude of which becomes evident in view of the fact that fifty years later 375 guilders was the usual salary of the chief rabbi of Berlin. Unselfish and independent by nature, Ashkenazi renounced the perquisites of his office, such as fees in civil suits, etc., in order to maintain his independence, and accepted the high position only upon the condition that under no circumstances was he to be required to subordinate himself to the congregation, or to be obliged to receive gifts, and that he should be permitted to preserve absolute freedom of action on all occasions. From the very beginning he encountered in Amsterdam a hostile party, whose principal leader was a certain Aaron Polak Gokkes. Indeed, the difficulties with the directors became so serious that, on May 26, 1712, it was decided to dismiss the chief rabbi at the end of the term (three years) mentioned in his letter of appointment. Ashkenazi announced that he would not under any circumstances accept this dismissal, which he regarded as unjust. Serious difficulties arose. The rabbi's salary does not seem to have been paid, for in the register of the records of the congregation the present writer has found an entry to the effect that on Saturday, Nisan 4, 5472 (April 12, 1712), the parnasim sent a secretary and two attendants of the congregation to Ashkenazi to inform the latter that upon the return of the letter of appointment he would be paid the money to which he was still entitled. Ashkenazi, however, naturally declined to return this piece of evidence, a copy of which has been preserved among the official documents of the congregation.

Congregational Differences.

But worse was still to come. On June 30, 1713, Nehemiah Ḥiyya Ḥayyun arrived at Amsterdam and requested permission of the Portuguese congregation to circulate his writings, which had been published at Berlin. Ashkenazi thought Ḥayyun was an old enemy of his from Sarajevo and Salonica, and at once requested Solomon Ayllon, ḥakam of the Portuguese congregation, not to accord patronage to the stranger, who was unfavorably known to him. Ashkenazi believed himself justified in making this demand, as the Portuguese congregation and its rabbi had, from the beginning, treated him most courteously, and had already, during his term at Altona, repeatedly sent to him from the Sephardim of Hamburg, Amsterdam, and London religio-legal questions for his decision. Ḥayyun thereupon called on Ashkenazi personally and made an explanation; whereupon the rabbi retracted his accusation, stating that it was a case of mistaken identity. Meanwhile several members of the Portuguese congregation had submitted Ḥayyun's writings to the judgment of Moses Ḥagis, a messenger from Jerusalem then sojourning at Amsterdam, who immediately discovered their Shabbethaian principles and tendencies and gave the alarm. He also called the attention of Ashkenazi to the dangerous doctrines published in Ḥayyun's book, whereupon the rabbi again warned the directorate of the Sephardim congregation not to support the author. Ashkenazi rejected a proposition to designate the objectionable passages, and declined to act as member of a com-

Opposition to Ḥayyun.

Placed Under the Ban.

mittee of investigation, because he did not regard Ayllon, the rabbi of the Sephardim, as a competent authority on such questions. Thereupon a fierce contention ensued, during the progress of which Ḥagis fought valiantly beside Ashkenazi. A great number of pamphlets, some of them now quite rare, were issued by both sides, in which the contestants indulged in the most vehement abuse of each other. On July 23, 1713, Ashkenazi placed Ḥayyun under the ban, because the investigating committee appointed by the Sephardic directorate had not yet made its report. In consequence of this measure, both Ashkenazi and Ḥagis were subjected to street attacks, more particularly at the hands of the Portuguese, who threatened to kill them. In the midst of the constantly increasing bitterness and animosity, the report of the committee, which had been prepared by Ayllon alone, was publicly announced. It was to the effect that the writings of Ḥayyun contained nothing which could be construed as offensive to Judaism. It was publicly announced in the synagogue that Ḥayyun was to be exonerated from every suspicion of heresy, and on the following day a public reception was tendered him at the synagogue, on which occasion unparalleled honor was shown him. Naturally, the Sephardic opponents of Ashkenazi had found excellent support among the rabbi's adversaries in his own German congregation. The controversy was now waged so fiercely that even the family-life of the community became affected, and all peace vanished from the otherwise model congregation of Amsterdam. Ashkenazi was deserted, except for a few friends that remained faithful to him. When, finally, he was summoned by the directors of the Portuguese congregation to appear before their tribunal—which, of course, had no jurisdiction—he refused to do so, as he anticipated that he would be asked to retract and to praise and recommend Ḥayyun. Through a Christian advocate the directorate again summoned Ashkenazi to appear, Nov. 9, 1713; and when he again refused, he and Moses Ḥagis were formally placed under the ban by the Portuguese community. Ashkenazi was temporarily placed under arrest in his own home—probably to protect his life—by the municipal authorities, who had been influenced against him by Ayllon and the Portuguese leaders; and the whole matter was brought before the magistracy in order to secure Ashkenazi's deposition and banishment from Amsterdam. The magistrates thereupon sought the opinions of certain professors at Leyden, Utrecht, and Harderwyk, including Willem Surenhuis and Adrian Reland, on the dispute; but their decision, if given, has not been made known.

His Sojourn in London.

Ashkenazi forestalled the magisterial action by resigning his office and fleeing, in the beginning of 1714, from Amsterdam, perhaps secretly, with the aid of his friend Solomon Levi Norden de Lima. After leaving his wife and children at Emden, he proceeded to London at the invitation of the Sephardic congregation of that city. In 1705 he was invited to pronounce a judicial decision concerning the orthodoxy of the rabbi David Nieto, who, in a certain sermon, had given utterance to Spinozistic views. In London Ashkenazi found many friends, and received many tributes of regard. Even before this he had been invited to take the rabbinate of the Sephardic congregation, but refused. It seems that his portrait in oil was painted here, after he had refused, on account of religious scruples, to have his bust stamped on a coin. In the following spring he returned to Emden, and proceeded thence to Poland by way of Hanover, Halberstadt, Berlin, and Breslau, stopping at each place for some time. After roaming about in the vicinity of Opatow, Poland, he was called to Hamburg to serve as member of a judicial body convened to settle a complicated legal question.

Upon the death of Simḥah Cohen Rapoport, in 1717, Ashkenazi was called as rabbi to Lemberg, where he stood in high repute, both in his congregation and in the community at large. Four months after entering upon this office, he died.

Praised by Contemporaries.

Of a firm and unselfish but abrupt and passionate disposition, Ashkenazi everywhere aroused the discontent and hatred of the rich and the scholarly. Extensive learning, keen intelligence, and exceptional linguistic attainments, all combined to make him one of the most distinguished men of his day. All his contemporaries, even those who knew him only as the head of the *Klaus* at Altona, unite in praising his profound learning, his astuteness, his clearness of exposition, which never degenerated into the subtleties of the pilpul, and his absolute disregard for the influence of money. He would suffer serious deprivation rather than accept pecuniary assistance; and this characteristic, interpreted by the wealthy of that day as obstinacy and arrogance, became to him a source of much suffering and enmity.

Of his works, only a part of his responsa have been printed, under the title "Responsa Ḥakam Ẓebi" (Amsterdam, 1712, and since frequently republished). They are distinguished by lucidity of treatment and an undeviating adherence to the subject.

ASHKINASI, MIKHAIL OSIPOVICH: Writer in French and Russian; born at Odessa April 16, 1851. Having graduated from the Odessa High School, he studied medicine at the Academy of St. Petersburg and at the University of Kiev. Ill health forced him to discontinue his studies. While recuperating he visited, in turn, Italy, Switzerland, and Nice. In the early eighties he published in "Nedyelya" and in "Novorossiski Telegraf" a series of articles on the Jewish question, in which he advocated a change in the economic mode of Jewish life, and suggested agriculture as a means of livelihood. At that time Ashkinasi conducted the Jewish trade-school "Trud" of Odessa. Later he established a model farm-school for Jewish children at Fiodorovka, near the same place.

In 1887 he settled permanently in Paris, where he contributed—either in his own name or under the pseudonym "Michel Delines"—articles on Russian literature to various publications, principal among which were the "Athenæum," "Siècle," "Indépendance Belge," and many others. At the same time he published at Paris: "La Terre dans le Roman Russe"; "La France Jugée par la Russie"; "L'Allemagne Jugée par la Russie"; "Nos Amis les Russes."

The western European public became acquainted with Russian literature through Ashkinasi's translations into French of several of Tolstoi's works—"Enfance et Adolescence" and "Napoléon et la Campagne de Russie," besides Shchedrin's "Za Rubezhom," under the title, "Berlin et Paris"; Goncharov's "Obryv," under the title "La Faute de la Grand'mère," 1885; and Dostoyevski's "Podrostok," under the title "Mon Père Naturel," 1886; some novels by Garschin; "Samson the Powerful," by Orzhesko; and Lazhechnikov's "Le Palais de Glace," 1889.

Among original novels in French by Ashkinasi are: "En Russie," in the "Bibliothèque Universelle," 1885; "La Chasse aux Juifs"; and "Les Victimes." He is a frequent contributor to the Russian periodicals "Nedyelya," "Novosti," and others, and since 1889 has been a regular contributor to "Paris," under the pen-name "Michel Reader."

H. R.

ASHMODAI. See Asmodeus.

ASHMUN or **ESHMUN** (אשמן): The name of a Phenician god worshiped at Sidon and Carthage, in Cyprus and in Sardinia. A trilingual inscription from the latter island ("C. I. S." 143) identifies him with Æsculapius, the Greek god of healing. Near Sidon, Eshmunazer built for him a temple on a mountain, and consecrated to him a spring and a grove ("C. I. S." 3). This is the Æsculapius grove of Strabo (xvi. 2, 22). The large number of proper names in the inscriptions from Citium and Idalium in Cyprus into which Ashmun enters prove the popularity of his worship there. At Carthage, Tanith (Ashtarte) and Baal were worshiped in his temple ("C. I. S." p. 252); and the inscriptions from North Africa contain many names compounded of his, which also prove how extensively he was worshiped. His close connection at Sidon and Carthage with Baal and Ashtarte, his importance where worshiped, and the fact that in many proper names, especially in Cyprus, he is designated "Adonis" (compare "C. I. S." 10, 42, and 44), indicate that Ashmun may have been a local name for Tammuz, who, from the epithet "Adon," "Lord," was called by the Greeks "Adonis." See Tammuz and Æshma.

ASHMURAH: A special term (compare "a watch in the night," Ps. xc. 4) in the synagogal rite of Avignon, denoting the early morning service on Hoshana Rabbah, the seventh day of the Feast of Tabernacles.

Bibliography: Zunz, *Ritus der Synagoge von Avignon*, in *Allg. Zeit. des Jud.* 1839, p. 118.

A. D.

ASHPENAZ: Chief of the eunuchs of Nebuchadnezzar (Dan. i. 3).

J. JR. G. B. L.

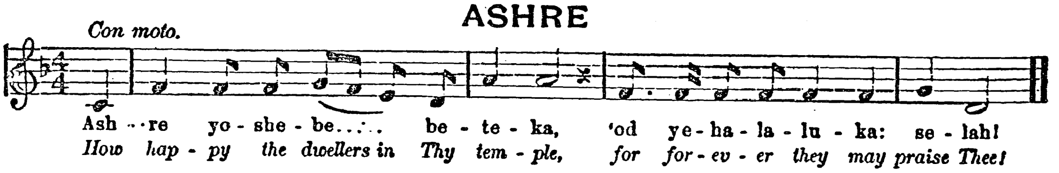
ASHRE (YOSHEBE BETEKA): The opening words of Ps. lxxxiv. 5 [4]: "Blessed are they who dwell in thy house: they will be still praising thee. [In A.V.] Selah." This verse, interpreted by Joshua ben Levy to signify that those who sit pondering on the greatness of God before offering their prayer in the house of God are the really "blessed ones" (Ber. 32b), is, together with (the closing words of Ps. cxliv. 15) "Ashre ha-'Am," "Happy the people to whom this is allotted [A. V., "that is in such a case"], happy the people whose God is the Lord," recited three times a day, twice in the morning and once in the afternoon prayer before Ps. cxlv., concerning which it is said: "Whosoever recites Psalm cxlv. three times a day may feel certain of having a portion in the life to come" (Ber. 4b). The three Ashre or beatitudes in the two introductory verses—some added also the Ashre of Ps. cxix. 1, and more verses beginning with Ashre (see Tosafot Ber. 32b, and Beer, prayer-book "Abodath Yisrael," p. 68, note; Zunz, "Ritus," 59)—were selected to express the idea of being thrice blessed by the recitation of a Psalm containing so fervent a praise of God before offering prayer as does the one hundred and forty-fifth Psalm. See Tanya ii. in the name of Rashi.

K.

ASHRE (אשרי): The initial word of the verses Ps. lxxxiv. 5 [A. V. 4] and cxliv. 15, which verses are always prefixed to Ps. cxlv. in its recital in the synagogal service. In the northern liturgies these opening verses are associated with a chant transferred direct from the Sabbath cantillation (where it forms the coda, or concluding strain, of each reading in the lesson) as illustrated below:

A. F. L. C.

ASHRE



Con moto.
Ash - re yo - she - be... be - te - ka, 'od ye - ha - la - lu - ka: se - lah!
How hap - py the dwellers in Thy tem - ple, for for - ev - er they may praise Thee!

ASHRE HA-'AM (אשרי העם): Ps. lxxxix. 16, prefixed to "Ashre" on the Day of Memorial, or New-Year, immediately after the sounding of the Shofar. It is then associated in Ashkenazic congregations with a beautiful and typical melody, of medieval origin, in the fourth (Hypophrygian) mode of the Gregorian plain-song, ranging from the fourth degree below the mediant to the fifth above. This melody is now one of the "representative themes" (see MUSIC, SYNAGOGAL) of the penitential season; being heard as an anticipatory announcement in the chanting of the Selihot which precede it, and again in the Confession of Faith (SHEMA'), which closes it at the end of the Day of Atonement. It affords one of the best examples of that characteristically Oriental cadence, descending the interval of a fourth on to the final note, which so frequently closes with their own peculiar flavor many of the older medieval chants in the German and Polish tradition.

A. F. L. C.

ASHRE HA-'AM.

they shall aye...... be prais - - ing Thee..... Se - - lah.

ASHTAROTH: A city east of the Jordan on the table-land of Gilead. It was the capital of the kingdom of Og, king of Bashan (Josh. ix. 10), though it would seem from other passages (Deut. i. 4; Josh. xii. 4, xiii. 12 and 31) that Edrei shared that honor. The two cities seem to have constituted his kingdom. Afterward Ashtaroth was one of the Levitical cities (I Chron. vi. 56 [A. V. 71]). Its name appears in the Old Testament as a plural, but it was no doubt originally simply "Ashtart," derived from the old Semitic goddess, whose temple it no doubt contained. The relation of Ashtaroth to ASHTEROTH KARNAIM is obscure. Eusebius ("Onomastica," ed. Lagarde, ccix. 61, ccxiii. 39) gives two trans-Jordanic places called Ashtart. Buhl ("Geographie," pp. 248 *et seq.*) holds that there were two places, and identifies Tell-Ashtereh with Ashtaroth, and El-Muzêrib with Ashtoreth Karnaim. Similarly, G. A. Smith in 1895 ("Historical Geography," map) identified Ashtaroth with Tell-Ashtereh, and Ashteroth Karnaim with Tell-Ashary, but has since found reason to discard this view.

It seems probable that there was in the Old Testament period only one city, known variously as "Ashtaroth," "Ashteroth Karnaim," and "Karnaim," and that the statement of Eusebius is due to the interchange which some of the names of the region underwent in the later time. This conclusion seems justified from the fact that the sources which are really old (the inscription of Thothmes III. [W. Max Müller, "Asien und Europa," p. 162], and El-Amarna letters; compare Schrader, "K. B." v. (see p. 206) Nos. 142, 237; and Sayce, "Patriarchal Palestine," pp. 133, 153) mention but one place, and that the Biblical material is all of such a nature as to make the supposition of two places unnecessary. The question can not be actually determined till the sites are explored.

J. JR. G. A. B.

ASHTEROTH KARNAIM (עשתרת קרנים): A town east of the Jordan (Gen. xiv. 5; "Onomastica," ed. Lagarde, 209, 61, 213, 39); called simply "Karnaim" in Amos vi. 13 (so Wellhausen, Nowack, and G. A. Smith, *ad loc.*), in I Macc. v. 43, and II Macc. xii. 21, 26. The first element in the name was derived from the goddess Ashtart, whose temple was situated in the town (II Macc. xii. 26). The last part of the name has been variously explained. Stade ("Zeitschrift," vi. 323) understands "the horned Astarte" to be a moon goddess, the horns referring to the crescent of the moon; Barton in 1894 ("Hebraica," x. 40) explained it as an Ashtart represented by some horned animal, a cow, bull, or ram; Moore ("Jour. Bibl. Lit." xvi. 155), on the basis of Baal-Karnaim, whose temple near Carthage was on a mountain formed by two peaks separated by a gorge, interprets the name as "the goddess of the two-peaked mountain." This last is the probable solution.

The town was very old. It is mentioned by Thothmes III. (thirteenth century B.C.; compare W. Max Müller, "Asien und Europa," p. 162) and in the El-Amarna tablets (fourteenth century B.C.; compare Schrader, "K. B." v., Nos. 142, 237; Sayce, "Patriarchal Palestine," pp. 133, 153). It has been identified by Dillmann (on Gen. xiv. 5) with the mound of Tell Ashtereh; by G. A. Smith ("Hist. Geog." map) with Tell Ashary; and by Buhl ("Geog." pp. 248 *et seq.*), whom Gunkel (on Gen. xiv. 5) follows, with El-Muzêrib (see also Buhl, "Zur Topographie des Ostjordanlandes," pp. 13 *et seq.*; "Zeit. Deutsch. Paläst. Ver." vols. xiii., xv.). The real site can not be determined until some of these mounds are excavated. See Ashtaroth.

ASHTORETH: The name given in the Old Testament to the old Semitic mother-goddess, called in Phenicia, Ashtarte; in Babylonia, Ishtar; and in Arabia, Athtar. (For her worship among the Hebrews, see Astarte.) Ashtoreth is derived from Ashtart by a distortion after the analogy of "Bosheth" (compare Jastrow, "Jour. Biblical Literature" xiii. 28, note).

The Goddess in Phenicia.

Ashtarte was the chief goddess of the Sidonians, among whom she was worshiped as an independent divinity, and also under the name "Ashtarte of the name of Baal," as a counterpart of Baal (compare "C. I. S." i. 3 and "Hebraica," x. 33). A fragment quoted in Philo Biblos connects the worship of Ashtarte with Tyre (compare also Josephus, "Ant." viii. 5, § 3; "Contra Ap." i. 18, who quotes Menander), while Lucian ("De Syria Dea," §§ 6–9) describes in some detail her worship at Gebal (Byblos), in which the wailing for Tammuz was a prominent feature. As a part of this ritual, women were obliged to sacrifice either their hair or their chastity. A shrine of this goddess was found also in the city of Askelon in Philistia (Herodotus, i. 105), in which the armor was hung after the battle of Gilboa (I Sam. xxxi. 10).

In Phenician Colonies.

The Phenician colonies carried the worship of Ashtoreth into the Mediterranean. In Cyprus she had important temples at Citium and Paphos, and left a deep impression on its civilization (compare "Heb." x. 42–46 and "Jour. of Hellenic Studies," 1888, pp. 175–206). It also left its impress in Malta and Sicily ("Heb." x. 46–49). From Cyprus her cult found its way to Corinth and other parts of Greece, where it corrupted the simple purity of the old Greek family life (compare Farnell's "Cults of the Greek States," xxi.–xxiii.). From Sicily it made its way to some extent into Italy.

In North Africa, Ashtoreth was known as Tanith (see Barton, "Semitic Origins," p. 253, note 6), to which is frequently attached the epithet "Face of Baal," showing that she was often regarded as subordinate to that god. She was also called Dido (Love), and was, as Augustine says ("De Civitate Dei," ii. 4), worshiped with obscene rites (compare "Heb." x. 48–53).

In Babylonia.

In Babylonia and Assyria she was worshiped as Ishtar at several different shrines, in each of which the goddess possessed slightly varying characteristics. Erech was one of the oldest and most important of these shrines, where she was called also Nanâ, and generally appears as the goddess of sexual love and of fertility.

At Agade she was worshiped as the spouse of Shamash ("Heb." x. 24–26), and at Babylon as that of Marduk. At the latter shrine, where she was called Zarpanit, she was the goddess of fertility for both plants and animals. According to Herodotus (i. 199), every Babylonian woman once in her life was compelled to offer her person at Zarpanit's shrine (compare "Heb." x. 15–23).

From Babylonia, emigrants carried her worship to Assyria, as represented in the Assyrian inscriptions. In Assyria, at Nineveh, and Assur she was regarded as the spouse of Assur and the mother of gods and men. With the god Assur she was supreme, although other gods were worshiped. Another shrine of hers of high antiquity was at Arbela. From the reign of Sennacherib onward the Ishtar of Arbela is regarded as distinct from the other Ishtars. She had no spouse, was mother, and a goddess of war. Probably her worship there had never been united with that of a male deity (compare "Heb." ix. 131–155).

In Arabia.

In Arabia she was known as Athtar, and in southern Arabia at least was changed into a masculine deity. An interesting inscription ("Jour. Asiat." 8 ser., ii. 256 *et seq.*) exhibits this transition in process (compare "Heb." x. 204). As a goddess Athtar was a mother, and was bifurcated (rather than transformed) into a masculine and feminine deity, the father and the mother of mankind (compare Mordtmann, "Himyaritische Inschriften und Alterthümer," No. 869). The father was known as Athtar, or by such epithets as "Ilmaqqahu," "Talab Riyam," etc.; the mother, as Shams (compare Barton, "Semitic Origins," pp. 129 *et seq.*).

In Abyssinia.

As a god, Athtar was the god of fertility. From southern Arabia his worship was transferred to Abyssinia, where he was known as Astar, and where many features of his worship still survive in the rites of the Abyssinian church (compare "Epigraphische Denkmäler aus Abessinien"; Bent, "Sacred City of the Ethiopians"; and Glaser, "Die Abessinier in Arabien und Africa").

In northern Arabia the name Athtar does not appear; but there are two goddesses, Al-Uzza and Al-Lat, who are shown elsewhere as goddesses of fertility scarcely disguised under these epithets (compare "Heb." x. 58–66). Al-Uzza was worshiped especially at Nakhla and Mecca, and Al-Lat at Taif and by the Nabatæans (compare "C. I. S." ii. Nos. 170, 182, 183). She is mentioned by Herodotus, iii. 8.

This cult thus presents an underlying unity throughout the Semitic world, with many local differences. Various animals were sacred to this deity in different places, while she was frequently pictured in their form. Thus, at Eryx she was thought to assume the form of a dove, and of a dove and a gazelle at Mecca. At Arbela she was conceived by

Assurbanipal as a warrioress, behung with bow and quiver ("Hebraica," ix. 162); while Zidonian coins picture her standing on the prow of a galley and pointing forward as though guiding the vessel on its way. Other local circumstances gave her many other forms. Thus, in Sabæa she was identified with the sun and the morning star; at Mecca and in Assyria, with Venus; and at Zidon, with the moon.

Schrader ("C. I. O. T." 2d ed.), Sayce ("Hibbert Lect." 252), and Driver (Hastings' "Dict. of the Bible") hold to the non-Semitic origin of this cult. Paul Haupt ("Z. D. M. G." 34, 758 *et seq.*), Zimmern ("Bab. Buss." 38), Friedrich Delitzsch ("Assyrian Grammar," p. 181), Moore ("Encyc. Bib."), G. Hoffmann ("Ueber Einige Phönizische Inschriften," 22*n*), and Barton ("Heb." x. 69 *et seq.*) have argued on the other side. It is hardly possible that the most universally worshiped of Semitic divinities should have been of non-Semitic origin. It appears plausible to assume that the goddess originated in Arabia in primitive Semitic times in connection with the culture of the date-palm, and that, as the Semites migrated, she was transplanted to the different countries (compare Barton, "Semitic Origins," ch. iii.-v.). See ASTARTE.

ASHTUMKAR, REUBEN DHONDJI: Beni-Israel, soldier; born near Bombay, India, about 1820; He entered military service in the Eighth Regiment native infantry on March 5, 1839. He participated in the pursuit of the rebel army under Tantia Topee in Gujarat, 1857-58. He was present at the engagement of Hykullze, and served with a field force against the Niakara Bheels in the Rewa Kanta district in 1857-58. He served in the Sind campaign in 1842, including the march to Kandahar. He was also in Abyssinia. Ashtumkar was appointed jemidar Jan. 1, 1856; subedar on June 7, 1858; and was raised to the rank of subedar-major Jan. 1, 1870. He was decorated with the Order of British India of the second class, with the title of bahadur on Oct. 27, 1872, and the same Order of the first class with the title of sirdar bahadur from Jan. 1, 1877.

J. J. HY.

ASHURA (the "tenth" day): A fast-day among the Mohammedans, observed on the tenth day of the month Muḥarram, and derived from the Jewish Day of Atonement, celebrated on the tenth of Tishri (Lev. xvi. 29, xxiii. 27). The name is an Aramaic form of the Hebrew word "'Asor" (the tenth), still to be found in a liturgical poem for the Day of Atonement (אמצת עשור לכפור תמה, M. Sachs, "Festgebete der Israeliten," 4th ed., pt. iv. 88).

Mohammedan tradition is a unit on the assertion that the Prophet knew nothing of the Atonement Day until he came to Medina in 622. "When Mohammed came to Medina, he saw that the Jews fasted upon the day Ashura. Said he, 'What is this?' They answered, 'It is an "excellent day," the day on which God saved Israel from their enemy, whereupon Moses fasted.' Said he, 'I have a nearer claim to Moses than you have'; then he fasted and commanded others to fast also" (Bukhari, ed. Krehl, i. 497).

Conflicting Traditions.

Mohammed fixed upon the tenth of Muḥarram as the Ashura day. This leaning toward the Jews was evidently displeasing to some of the followers of the Prophet. "They said, 'O Prophet, it is a day celebrated by Jews and Christians' (the last two words are a senseless addition of later times). He answered, 'Then, let us celebrate it on the ninth, in order to distinguish ourselves from the Jews'; but the next year at this time the Prophet was already dead." Some say that, in order to distinguish it from the Jewish fast, Mohammed said, "Fast on the ninth and the tenth"; according to others, "Fast on Ashura, but fast also on the day before and the day after." Another tradition is that he did not want it celebrated in as joyous a manner as did the Jews, who were accustomed to deck out their wives with their finest jewelry and dresses.

But there were those who, according to the commentators to the Koran (sura ii. 46), connected the original celebration of Ashura with Noah, who was said to have landed on Mt. Judi on the tenth of Muḥarram and, out of thankfulness, to have fasted on that day (Baidawi, Comm. on Koran, i. 435; Zamaḥshari, "Al-Kashshaf," i. 614). Still others, according to traditions gathered by Al-Biruni, said that on this day God took compassion on Adam; Jesus was born; Moses was saved from Pharaoh, and Abraham from the fire of Nebuchadnezzar; Jacob regained his eyesight; Joseph was drawn out of the ditch; Solomon was invested with the royal power; the punishment was taken away from the people of Jonah; Job was freed from his plagues; the prayer of Zacharias was granted, and John was born to him (Al-Biruni, "Al-Athar al-Baḳiyyah," ed. Sachau, p. 326).

Becomes non-Obligatory.

When Mohammed, at a later period, turned away from the Jews and instituted the Ramadan fast as a counterpart of the Christian Lent, the Ashura became a non-obligatory fast-day. As such it is still celebrated in Mohammedan countries, and is called "The Little Fast." In Egypt the "blessed storax" is sold on the streets, and the venders cry, "A New Year and a blessed Ashura!" It is the season for giving alms; and the belief is that "Upon him who gives plenty to his household on the day of Ashura, God will bestow plenty throughout the remainder of the year." The day is held in especial honor by the Shiites as the anniversary of the battle of Ḳerbelah (680), on which day the protomartyr Al-Ḥusain was killed, and the moon shone for seventy-two hours (Browne, "New History of the Bab," 1893, p. 195).

K. G.

ASHYAN: The name of several Palestinian amoraim and of one, probably Babylonian, amora. **1.** Ashyan, "the Carpenter (Naggara)," of the third century, who handed down certain utterances of Johanan (Yer. 'Ab. Zarah iii. 42*b*; Gen. R. lxxxii. 5, in which latter passage the name has been corrupted) **2.** Amora in the fourth century, belonged to Aḥa's circle, and handed down utterances of Jonah (Yer. Ter. i. 41*a*; Yer. Yoma viii. 45*b*). **3.** Ashyan bar Jakim, of the end of the third century, who belonged to Assi's circle (Yer. Yeb. xi. 12*a*) and is perhaps identical with the Ashyan named in Ber. 14*a*, as the father of R. Isaac. **4.** Ashyan b. Nidbak, probably of Babylonian origin, whose father-in-law, Yeba, transmitted an utterance of Rab (B. B. 22*b*), and who himself repeated another of Rab's teachings (Men. 29*a*, according to the better reading, Rabbinowicz, "Diḳduḳe Soferim," *ad loc.*, note 60, while Zeira taught in his name (Yer. Meg. i. 71*c*, where Nidbah stands for Nidbak).

ASIA: The largest continent, and the most ancient seat of civilization, constituting the greater part of the Eastern hemisphere.

The Jews in Palestine.

The earliest record that makes mention of the Hebrew people—the triumphal stele of Pharaoh Meneptah, of about the middle of the thirteenth century B.C.—shows Israel installed in some district of southern Syria, which can not now be precisely located, among peoples and cities of varying importance—Hittites, Canaan, Gezer, Askelon, Yenu'amu. Three centuries later, in the list of cities of Judea taken by Shishak, Israel reappears among the conquered. Momentous events had occurred in the meantime, of which only the Biblical books give an account. Palestine had been conquered by the various tribes; a relatively powerful kingdom having Jerusalem for its capital had been established; and, during the very lifetime of Shishak, the rupture of the union that had existed but a short time under David and Solomon, and the separation of the kingdoms of Judah and Israel, had occurred. Menaced in turn by the Canaanites and the Arameans of Syria, by Egypt, and, above all, by the powerful Semites of the valleys of the Tigris and the Euphrates, the two states successively disappeared—the northern one in 722 B.C., under the attacks of the Assyrians; the southern, 135 years later, under those of the Babylonians.

Sargon transported 27,000 inhabitants of Samaria to the Balikh and the Khabur, and to the frontiers of Media. Nebuchadnezzar carried off from Jerusalem some 20,000 Jews who in the land of exile awaited the fall of the second Chaldean empire. During the reign of the first king of the dynasty of

Cities of Asia Showing Distribution of the Jews.

(Drawn especially for "The Jewish Encyclopedia.")

Exile and Restoration.

the Achæmenidæ, a small select number of poor, fervent Jews were allowed to reenter Palestine, where they organized a community with the restored Temple as a center. Under the guidance of a hierarchy of high priests the people enjoyed wide internal liberty; but, disturbed at the outset by religious reform, they did not always bear Persian domination with patience, and, about 350, Artaxerxes Ochus deported a group of Jews that had revolted to Hyrcania.

Greek and Roman Domination.

The Macedonian conquest (332 B.C.) put an end to the empire founded by Cyrus. In the partition that followed the death of Alexander, Palestine fell to the share of the Ptolemies, who retained it during the third century. Clever politicians, they knew how to deal with national sentiment and to render Greek civilization accessible to a sensitive people. The Seleucidæ, succeeding the Ptolemies in 198 B.C., desired to hasten the work of Hellenization. Antiochus Epiphanes, by his fanaticism, provoked the revolt of the Maccabees, whose success was the triumph of the cause of independence after more than four centuries of subjection.

This independence, however, lasted but a short while. From 63 B.C. the intestine quarrels of the Hasmoneans, who had become kings, placed the little state at the mercy of the Romans. Pompey entered Jerusalem, and Gabinius placed Judea under tribute. However, a century had to pass before definite annexation could take place. Rather than administer the ungovernable and stricken country directly, the Romans handed it over to the Idumean Herod and his descendants.

Western Asia.

In the course of this last period Judaism had overstepped the limits of its ancient centers and had spread over the whole of western Asia. During the first century of the common era it not only kept the positions in the region of the Euphrates, which, apparently, it had not ceased to possess since the exile, but also scattered thence in all directions. To the south it reached Mesene; and around Nehardea, during the reign of Tiberius or thereabouts, Jewish influence had been strong enough to permit the maintenance for some thirty years of the open revolt of Anilai and Asinai against the Parthian king. To the north, with Nisibis as its capital, Judaism conquered Adiabene through the conversion of the royal house. In the extreme north it penetrated Armenia; to the east, Media. It is singular that from Mesopotamia, under Antiochus the Great (200 B.C.), went forth the first Jewish colony having Asia Minor as its destination. The colony must have been followed by a number of emigrants, who formed flourishing communities in nearly every important city of the country.

Northern Syria, too, was invaded by numerous Jewish colonies, especially at Damascus and Antioch; and the petty dynasties of Emesa and Cilicia were influenced by Judaism. In the epoch of the Mishnah, Jews existed among the nomad Arabs; a little later, through immigration and especially through conversion, the Jewish religion penetrated into the center and to the south of the Arabian peninsula. When in the course of the early centuries of the common era these movements were completed, Asiatic Judaism embraced a domain that has not since been exceeded to any extent.

In contrast with this expansion was the simultaneous disappearance of the centers of Jewish national and religious life—Jerusalem and the Temple. When the Romans decided to place Judea under the direct jurisdiction of the empire, incompatibility between suzerain and subject induced the formidable revolt (67-70) that was terminated by the systematic destruction of the capital, followed by the edict forbidding Jews to return thither, and by the establishment in the country of Greek and Roman colonies, which were destined to destroy all possibility of reconstruction. Despite these precautions, there occurred under Hadrian (131-135) the sanguinary revolt of Bar Kokba. Depopulated and politically enslaved, Judea played a smaller and smaller rôle in the destiny of Judaism.

Epoch of the Talmud.

The religious center—rather than the national—gradually shifted its location. The schools first placed at Jabneh (Jamnia), south of Joppa (Jaffa), were afterward removed to Galilee; that is, to Usha, Sepphoris, Shefar'am, and especially to Tiberias; and in these schools the Talmud known as the Jerusalem Talmud was elaborated during the third and fourth centuries. The triumph of Christianity must have been fatal to Galilean Judaism, that, with the suppression of the patriarchate (about 425), lost the autonomy which it had preserved till then.

The communities beyond the Euphrates gained in importance what Palestine lost. The foundation of the Academy of Sura (219) nearly coincides with the advent in Mesopotamia and Iran of a new dynasty, that of the Sassanids. At first hostile, this dynasty became quite tolerant toward Judaism, which gained adherents even in the royal house. Then rivals of the Academy of Sura sprang up and flourished—the schools of Nehardea, Pumbedita, and Maḥuza; and from them proceeded the Babylonian Talmud. In the sixth century the Jews on both sides of the Euphrates were persecuted; but a new religion, arising in central Arabia, was destined to deprive Byzantines and Sassanids of domination in western Asia (see Academies in Babylonia, Academies in Palestine).

Arabia.

A Jewish population of real importance had been established in the Arabian peninsula. Proselytism, rather than immigration, had introduced Judaism into the tribes of northern Hijaz, about Taima, Khaibar, Fadak, and Yathrib (now Medina), and those speaking the Sabean language and inhabiting the present Yemen. Among the last-mentioned, according to a somewhat doubtful tradition, Judaism, under the Himyaritic king Ḏu Nuwas, obtained political supremacy.

In his early discourses Mohammed made advances to the Jews of Hijaz, whose religion had furnished him with the essential elements of the one he himself founded. But he experienced a repulse, which explains the hostility displayed by him toward the Jews after the battle of Badr, and which was

Under Mohammedan Rule.

destined to have far-reaching consequences. As soon as he became victor, Mohammed expelled from Hijaz the greater number of his adversaries (who went to Syria); issued severe decrees against Jews and Christians; declared war without quarter upon those refusing to submit to Islam; and ordered a special tax, the "jizyaḥ," to be imposed on the vanquished. The inferior position of the Jews resulting from these acts was not regulated till later. To one of the immediate successors of Mohammed, the calif Omar, is generally ascribed the decree ("ḳanun")—unfavorable to the Jews—that precisely defined their status (see Mohammed Omar, Rescript of). The decree is probably of later date. It must be remembered that Islam assured the Jews a "guarantee" ("dhimma"), conferring the right of free worship.

In general, the Moslem conquest of Syria, Mesopotamia, and Iran was at first advantageous to Judaism. The prohibition against residence in Jerusalem was maintained but a short time. At Bagdad, under the Abbassid califs, who, with rare exception, were not fanatical, the Jewish communities, full of vitality, enjoyed real prosperity. Though troubled by internal religious dissensions that originated and developed out of Karaism in the seventh and eighth centuries; by personal and local dissensions, such as those which in 940 led to the suppression of the exilarchate; by Messianic preachings in Syria in 727, and, four centuries later, by David Alroy in northern Persia: yet Asiatic Judaism threw out one last gleam in the epoch of the final efflorescence of the schools at Sura and Pumbedita under the geonim Saadia, Sherira, and Hai. Unlike Islam, the Christianity of this period instigated violent persecutions. In the eighth and ninth centuries the Byzantine emperors forced conversion upon the Jews of Asia Minor; and in 1099 the Crusaders, on entering Jerusalem, massacred the Jewish population.

India.

From the domains under Abbassid rule various migrations carried Judaism to the confines of Asia. A community in India, the Beni-Israel at Bombay, was founded by David Rabban, who left Bagdad in 900. Another group, distinct from this one, exists at Bombay and at Cochin. It is divided into blacks and whites, the blacks being the offspring of intermarriage. Despite their assertions to the contrary, these communities do not seem to have been of much earlier date than the Beni-Israel.

China.

According to a tradition, the Jews in China emigrated from Palestine, after the fall of the Temple, during the reign of Ming-tse (70–75); but this is highly improbable. Other sources of information more reliable but not altogether trustworthy state that in 879 there were Jews at Hankow, a village no longer to be located with certainty, but probably on the Yang-tse-Kiang. But it is only in the time of the Song dynasty (960–1126) that Jews, coming from India, brought to the Chinese court as a tribute tissues from the western seas. It is to be noted that the Jews (the first whose arrival in China is historically established) came by sea and not by land.

The Caucasus.

From Benjamin of Tudela and Pethahiah of Regensburg it is evident that a part of the Caucasus had been conquered by Judaism toward the end of the twelfth century. The Persian origin of the colonies is attested not only by local tradition, but by the Persian dialect preserved to the present day among Jewish mountaineers in the Caucasus.

End of the Middle Ages.

The closing of the academies at Sura and Pumbedita (1040), nearly coincident with the end of the temporal power of the Abbassids, marks the point at which Asia ceased to be an intellectual and national center of Judaism. Among the Arabs began oppressive and restrictive legislation, summed up in the so-called "ḳanun" of Omar. In all countries in which Arabic or Persian was spoken, Jews led an obscure, dependent, and humiliating existence. It is of little significance that, at the end of the thirteenth century, a Jewish physician became prime minister to the khan Argun, sovereign of Persia and Irak, inasmuch as the khan was a Mongol, a stranger to the ideas controlling Islam. The establishment of Ottoman supremacy, however, in regions where the central authority was effective, induced notable improvement in the situation of the Jews: its first result, after the conquest of Asia Minor by the Byzantines, was the permission of the free reconstitution of the ancient communities.

Modern Times.

This humane and tolerant policy displayed itself most brightly at the time when the expulsion of the Jews from Spain brought to the Orient large numbers of refugees, of whom Asiatic Turkey received her share. In the course of the sixteenth century many communities, with the help of this fresh element, regained some of their old importance, as at Smyrna, Manissa, and other cities in Asia Minor; at Damascus, Safed, Tiberias, and Jerusalem, in Syria and in Palestine.

Later arrivals from Europe modified further the physiognomy of Judaism in some of these cities. In the eighteenth century began a constant immigration of Jews—especially from Poland—speaking Judæo-German, who superimposed Ashkenazic on Sephardic communities, and in time became numerically preponderant in Jerusalem, Hebron, and Safed. A last wave from the same source, in the latter half of the nineteenth century, brought to the coast plains of Palestine and to parts of Galilee, Russian, Rumanian, Galician, even Bulgarian, immigrants, who created the villages of Rishon le-Zion, Zikron Ya'akob, and Rosh Pinah.

Formed of diverse elements—some native; others, the minority, of European origin, and subject to the historic influences of their respective countries—Asiatic Judaism presents a wide variety of aspects.

The communities of Yemen, of northern Syria, and of the valleys of the Tigris and the Euphrates employ Arabic as the vulgar tongue. In Kurdistan and around the lakes of Van and Urmiah a Neo-Aramaic dialect is preserved, spoken especially at Zakho, Urmiah, Salamas, and Bash-Kala. It is a valuable relic of the dialects peculiar to the populations prior to the Arabian conquest. In Asia Minor the chief language is Ladino, or Judæo-Spanish, which in Palestine is employed along with Judæo-

German and Arabic. Persian is the language of the Jews not only in Persia proper, but in a part of Turkestan and in the Caucasus, with the exception of a small Georgian group which uses Kartvelian. In these countries the knowledge of Hebrew has persisted up to the present time—chiefly in Yemen and Palestine, where in certain places it bids fair to become a living language. The case is quite different in farther Asia. In India, Mahratti is the language of the ritual; in China, about the middle of the century, no one knew how to read the Bible, and the name "Israel" was corrupted to "Yeseloni."

Languages.

Distribution of Jews in Asia.

Owing to the absence or the scarcity of precise statistics on the subject, it is impossible to give definite information concerning the different groups of Jews in Asia. The figures in the following table are approximately correct:

Jews in Asia.

Asia Minor	65,000	
Syria and Palestine	90,000	
Mesopotamia, Irak	70,000	
Arabia	60,000	
Total in Asiatic Turkey		285,000
Caucasus (1897)	58,471	
Siberia (1897)	34,477	
Ferghana	8,300	
Bokhara	9,000	
Khiva	2,000	
Total in Asiatic Russia		112,248
Aden	2,800	
British India	14,400	
Total in British possessions in Asia		17,200
Afghanistan	2,000	
Persia	25,000	
China	1,000	
Other countries	500	
		28,500
Total Jewish population in Asia		442,948

The descendants of European immigrants are divided into Ashkenazim and Sephardim. Alongside of these in Palestine are the remnants of the sect of the Samaritans (in Nablus), and some Karaites (in Jerusalem). In eastern Asia the form of worship and the beliefs have been influenced by neighboring religions. In India this influence is notable among black Jews; and among the Jews of China religious sentiment has become obliterated to the extent that a member of the Jewish community has been known to exercise the functions of a Buddhist priest.

Political Status.

As the greater part of Asia is under the rule of European powers, the political status of the majority of Jews is regulated by the general laws of Russia, Turkey, and Great Britain. In Siberia, Transcaucasia, and Turkestan the government of Jews of European origin must be distinguished from that of native Jews. The former are controlled by the restrictive measures in force in the country of their origin; the latter, under Russian rule, have obtained the benefits of a regular government and of protection from Mussulman fanaticism, and have even, to a large extent—especially in the Caucasus—been associated with the local administration. Since 1892, however, their situation has trended toward that of their European coreligionists. In Asiatic Turkey the reforms called "tanzimat" have gradually effaced the differences that law and ancient usage had established between Jew and Mussulman; and the constitution of 1876, by proclaiming that all subjects of the empire are without distinction called Osmanlis, abrogated the stipulations of the decree of Omar. Moreover, in the course of recent centuries, the Porte has frequently taken Jews into its service; and some of them had attained to high offices. It should be added that in regions where the sultan's authority has not been uncontested, as, for example, Yemen and Kurdistan, the condition of the Jews has remained precarious and wretched. In Persia till within the last few years, Jews were subject to many disqualifications, and were compelled to follow sordid, disreputable trades: a series of edicts of the present shah, Muzaffar-ed-din, granted them civil rights (see AFGHANISTAN, ARABIA, CHINA, etc.).

G. I. Ly.

ASIA MINOR: The western extremity of Asia, which seems to have been known to the Jews at a relatively early date; for to this region belong the greater number of the sons of Japhet mentioned in the ethnographic lists in Gen. x. Von Gutschmid believes that there was a dispersion of Jews in Asia Minor in the middle of the fourth century B.C.; but it is probable that Jewish colonization did not antedate the Seleucids, though Josephus mentions the existence of relations between Jews and the inhabitants of Pergamus, extending back to the time of Abraham.

Toward the end of the third century, at the time that Greek communities began to be formed in the villages along the coast, Antiochus the Great (223–187 B.C.) installed in the more thinly populated districts of Phrygia 2,000 Jewish families from Mesopotamia (Josephus, "Ant." xii. 3, § 4). The Jews formed military colonies at these places, the principal of which seem to have been Apamea, Laodicea, and Hierapolis. The name κατοιχία (colony), which Hierapolis retained for four centuries, attests the nature of the settlement.

The Roman Occupation.

Before the death of Antiochus, Asia Minor passed forever out of the grasp of the Seleucids. Their successors, the Romans, followed the same favorable policy toward the Jews; at first protecting them in the various states in which the country remained divided ("Letter of the Roman Senate to the Kings of Pergamus, Cappadocia," etc., 139–138 B.C.); and, later, defending them from the ill will of the Hellenic population among whom they lived, when, after the year 133, these states were successively annexed by Rome. The Greek towns regarded with disfavor the settlement among them of this strange element, which, while claiming to participate in communal life, still adhered to its peculiar customs and organization. Hence, there developed a sentiment of hostility which in the second half of the first century before the common era provoked at Tralles, Laodicea, Miletus, and Ephesus irritating measures, such as the seizure of moneys collected for the Temple, the prohibition of the exercise of the Jewish religion, and even threats of expulsion. Cæsar and Augustus, however, assured to the Jews the rights of sojourn and of free worship; yet it is improbable that in the Greek towns they possessed the right of citizenship and a corresponding share of public honors. On the other hand, they enjoyed freedom from conscription, the exemption from which was conferred on them by Dolabella, proconsul in Asia (43 B.C.). Roman officials seem to have departed from their benevolent policy in only one instance—when, in 62 B.C., L. Valerius Flaccus confiscated at Laodicea, Apamea, Adramyttium, and Pergamus money intended for Jerusalem. He had to answer for the illegal act before the courts.

If the sums seized by Valerius Flaccus really represented the didrachma tax for one year, it might be concluded, according to the calculation of Theodore Reinach, that there were at that time 180,000 Jews in Asia Minor. But this number is possibly ten times too large; for, among nearly 20,000 Greek inscriptions found in Asia Minor, scarcely twenty can be attributed doubtless to Jews.

The Birth of Hellenism.

From the beginning of the common era, popular hatred toward the Jews seemed to diminish, doubtless through their gradual assimilation with Hellenism. At the end of the first century Ptolemæus of Tlos offered to the Jewish community, as a thank-offering for having raised him to the dignity of archon, a burial-ground, which bore the pagan name of "heroon." This was in conformity with the practise known as the "honorarium decurionati" (present of one who has become a decurion), modeled after the political organization of the city. Only the ordinary formulas of Greek epigraphy are seen in the epitaph of Rufina of Smyrna and in the inscription of Tation of Phocæa, who erected a synagogue, in return for which he received a crown of gold from the community. Record exists of the marriage of a Jewess to a Greek at Lystra.

ANCIENT JEWISH COMMUNITIES IN ASIA MINOR.
Modern city-names in Roman type.
(Drawn especially for "The Jewish Encyclopedia.")

As Judaism became affected by outside influences, and in turn influenced the surrounding society, various hybrid groups grew up side by side with the relatively orthodox elements. Such were the Judaizing pagans: Julia Severa of Akmonia, benefactress of the synagogue and high priestess of the imperial religion; the Porphyrabaphoi of Hierapolis, who mixed practises of entirely Hellenic origin with the observance of the feasts of Passover and Pentecost: and the Hypsistarians, or Adorers of the Supreme God. The Sabbatists of Cilicia and the followers of Sambathe at Thyatira were also more or less under the influence of Judaism.

Powerful though the effect of the surrounding Hellenism was, the Jewish communities displayed a remarkable vitality. Even in the third century, the Jewish colonies of Smyrna and Hierapolis preserved a racial feeling sufficiently strong to cause them to call themselves "laos" or "ethnos" (people) of the Jews. About the same time, the colony of Apamea invoked a particular statute, administered under a law ("nomos").

Strong Racial Feeling of Jews.

These groups of Jews, however, seem to have lost all connection with the Jewish centers of Palestine and of Babylonia. The Talmud ignores them completely. According to a doubtful tradition, R. Akiba and R. Meïr went to Mazaca in Cappadocia; and, according to the Pesiḳta, an obscure haggadist, Nahum, preached at Tarsus. M. Jastrow disagrees with Kohut and Neubauer, in identifying the Biblical Ludim with the Lydians. Joseph Halévy has raised strong objections to the identification of Phrygia with Prugita, the wine of which, says the Babylonian Talmud, separates the Ten Tribes from their brethren. Cappadocia seems to have been an exception to the rule, and not to have lost all contact with Talmudic Judaism. Two scholars, Samuel and Judah, are styled "of Cappadocia"; and in an inscription at Jaffa occurs the name of a Cappadocian Jew called Jacob, at a time when members of the Asiatic communities generally bore Greek names.

Advent of Christianity.

Christianity at first affected these little Jewish colonies less than one would have expected. The preaching of Paul, himself a Jew of Tarsus, does not seem to have been very successful, save, possibly, at Iconium. Where defections occurred, they were merely individual cases. The texts of the third century, cited above, show that the Jewish elements continued, without serious impairment, up to the triumph of the new religion and the establishment of the Christian empire.

Information concerning events later than this epoch is very scarce. The Jews of Asia Minor probably shared the vicissitudes of their coreligionists in Oriental Christendom; undergoing, like them, the changes of an increasingly harsh legislation, and the persecutions of Justinian, Justin, Phocas, and Heraclius. A false tradition makes certain Jews of Syria who had fled to Isauria the instigators of the struggle of Leo II. with the Iconoclasts. It is, however, certain that Leo in 722 forced the entire body of Jews to embrace Christianity. The measure must have been merely nominal in its effects; for in the following century various emperors passed many similar ordinances.

In the Middle Ages.

Turkish rule initiated an era of comparative tolerance for the Jewish communities, though they had doubtless become greatly reduced in numbers. In the reign of Sultan Orkhan (1326-1360) a group of immigrants from Syria reinforced the population of Brusa; and at the end of the fifteenth century and later, the communities of Amasia, Tokat, Magnesia, Syria, and Smyrna were augmented by a fresh contingent of immigrants, refugees from Spain, whose language soon superseded Greek, which had probably remained from ancient times the language of the old indigenous communities.

The colonies thus formed have passed through the last few centuries without either disturbance or distinction; having lived in accord with the Turks, but at times less harmoniously with the Greek Christians. The only noteworthy incident in modern times was the excitement aroused by Shabbethai Ẓebi.

Official statistics give the following figures for the Jewish population of Asia Minor, including the Armenian provinces:

Jewish Population of Asia Minor.

Vilayets of Trebizond, Erzerum, Angora, Seevas, Konia, Diarbekr, and Kastamuni	3,170
Vilayet of Van	5,000
Vilayet of Brusa	3,225
Vilayet of Constantinople (Asiatic dependencies)	6,670
Vilayet of Smyrna	22,516
Sanjik of Imidt	2,500
Sanjik of Biga	2,988
Total	46,069

Trades and Schools.

The Jews form an active, industrious class, following minor trades and handicrafts. The foundation of the agricultural school, "Or Israel," near Smyrna, by the Alliance Israélite Universelle and the Jewish Colonization Society will doubtless cause the migration into the agricultural regions of a number of Jews concentrated in cities. The Alliance has contributed also to the moral and material improvement of the Jews in the provinces bordering on the Ægean Sea, by the erection of schools and workshops for apprentices in Smyrna (1878), Dardanelles (1878), Cuscunjuk (1879), Brusa (1886), Magnesia (1892), Aidin (1894), Pergamus (1896), Casaba, and Syria (1897).

ASIEL: 1. Found only in the genealogy of Simeon (I Chron. iv. 35). 2. One of the five skilled writers who wrote the law for Ezra (II Esd. xiv. 24). 3. Ancestor of Tobit (Tobit i. 1, R. V.; A. V. reads "Asael").

J. Jr. G. B. L.

'ASIYAH ("world of making"): The last of the four spiritual worlds of the Cabala—Aẓilut, Beriah, Yeẓirah, 'Asiyah—based on the passage in Isa. xliii. 7. According to the "Maseket Aẓilut," it is the region where the Ofanim rule and where they promote the hearing of prayers, support human endeavor, and combat evil. Their ruler is Sandalphon. According to the system of the later Palestinian Cabala, 'Asiyah is the lowest of the spiritual worlds containing the Ten Heavens and the whole system of mundane Creation. The light of the Sefirot emanates from these Ten Heavens, which are called the "Ten Sefirot of 'Asiyah"; and through them spirituality and piety are imparted to the realm of matter —the seat of the dark and impure powers (Cordovero, "Pardes Rimmonim," chapter אבי״ע [initials of Aẓilut, Beriah, Yeẓirah, 'Asiyah]). (Vital, "'Eẓ Ḥayyim," chapter אבי"ע.) Compare Aẓilut.

K. P. B.

ASKANAZY, MAX: German physician; born at Stallupönen, East Prussia, Feb. 24, 1865. He received his education at the gymnasium in Königsberg, Prussia, and at the university in that city, studying medicine at the latter, and graduating in 1890. In the same year he became assistant at the pathological institute of his alma mater, and in 1893 was admitted to the medical faculty of the university as lecturer. Askanazy is the author of several essays on clinical and pathological-anatomical subjects, among which are: "Kasuistisches zur Frage der Alopecia Neurotica," in "Archiv für Dermatologie und Syphilis," 1890, xxii. 523; "Ueber Bothriocephalus-Anaemie und die Prognostische Bedeutung der Megaloblasten im Anämischen Blute," in "Zeitschrift für Klinische Medizin," 1895, xxvii., parts 5 and 6; "Ueber den Wassergehalt des Blutes und Blutserums bei Kreislaufstörungen, Nephritiden, Anaemien und Fieber Nebst Vorbemerkungen über die Untersuchungsmethoden und über den Befund unter Physiologischen Verthältnissen," in "Deutsches Archiv für Klinische Medizin," 1897, lix.; "Ueber die Diagnostische Bedeutung der Ausscheidung des Bence-Jones'schen Körpers durch den Urin," *ib.* 1900, lxviii.

S. F. T. H.

ASKANAZY, SELLY: German physician; born Sept. 8, 1866, at Stallupönen, East Prussia. He attended the Kneiphof Gymnasium at Königsberg, Prussia, and later the university in that city, graduating as doctor of medicine in 1892. Joining the staff of the university medical hospital as junior assistant in the same year, he became in 1894 first assistant. He held this position until 1899, when he resigned owing to his increasing private practise. In 1897 he was appointed lecturer in the university. Askanazy has contributed several essays to the medical journals on the examination of patients for accident insurance, clinical diagnostics, etc.

S. F. T. H.

ASKENAZY, SIMON: Polish historian; born in 1867 at Zawichwost, government of Sandomir, Russian Poland; studied at the universities of Warsaw and Göttingen, graduating from the latter with the degree of doctor of philosophy. In 1897 he was appointed lecturer, and in 1902 professor extraordinary on universal history to the University of Lemberg. His principal works are: "Die Letzte Polnische Königswahl," Göttingen; "Studja Historyczno-Krytyczne," Cracow, 2d ed., 1897; "Dzialalnosc Ministra Lubeckiego," 1897; and "Ministerjum Wielhorskiego," 1898.

Many of Askenazy's historical treatises were published in the "Biblioteka Warzawska" and in "Kwartalnik Historyczny." They deal mainly with Polish history of the eighteenth and nineteenth centuries.

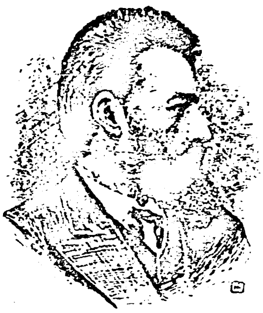
H. R.

ASKNAZI, ISAAC LVOVICH: Russian painter; born at Drissa, government of Vitebsk, Jan. 28, 1856. He entered the St. Petersburg Academy of Fine Arts in 1870 as a day-scholar, and was registered as a student in 1874. In the latter year he was awarded the second silver medal for a sketch, and in 1875 the silver medal for a drawing. In 1877 he received the first silver medal for a sketch, and the second gold medal for a study, "Abraham Expelling Hagar with Her Son Ishmael." Asknazi was awarded in 1879 a silver medal for a sketch, "The Publican and the Pharisee," and the first gold medal for a study, "The Woman Taken in Adultery." "The Publican" represents the Pharisees surrounding Jesus, as pious, God-fearing Jews, each wrapped in a "tallit" and with head-ornaments ("tefillin"). For this work the artist was granted a traveling scholarship for four years to enable him to complete his studies.



Isaac Lvovich Asknazi.

Early Works.

Before his departure from St. Petersburg in May, 1880, Asknazi completed his painting "The Wife of the Marano." This work he left with the academy for exhibition at the Art Exposition in Moscow; but it was first exhibited at the St. Petersburg Academy in 1881, under the changed title "In Prison." The alteration of title was probably due to the anti-Jewish riots of 1881, at which period the authorities did not consider it politic to bring the martyrdom of a Jewess before the eyes of the public.

Influence of Hans Makart.

In November, 1880, Asknazi, on his way to Italy, visited the galleries and studios of the capitals of Austria and Germany. While in Vienna he began his painting "Maria of Egypt Reflecting upon the Sins of Her Life," and his sketches "John the Baptist in Prison," "John the Baptist's Head on the Charger," and "The Poet Jehuda Halevi," after Heine's well-known poem. Here he profited greatly by the advice of Hans Makart, who admired his talent and took a great interest in his art. In December Asknazi arrived in Rome, where he began his painting "Moses, the Shepherd of Jethro, in the Desert," which, together with "John the Baptist's Head," he sent in June, 1885, to the St. Petersburg Academy, and for which he was granted the degree of Academician of Arts. Both pictures were exhibited at the exposition of the academy in 1886; the latter picture being purchased by the academy, and "Moses" by the well-known collector and art-patron S. M. Tretiakov, of Moscow. At the same exposition four other paintings by Asknazi were exhibited: "Playing Dice," a picture of two Italian boys; "Snow and Frost," representing a thinly clad and shivering Italian boy; "Head of an Italian Woman," and "A Woman Knitting." All four paintings show the influence of the old Italian masters on Asknazi's work.

In 1886 Asknazi exhibited in St. Petersburg "The Old Shoemaker"; in 1887, "Bad News," a picture of

Jewish life, and the "Portrait of L. P."; and in 1888, "Sabbath Eve," representing a Jewess praying over the Sabbath tapers. This latter painting merits description here. The light of the candles, mingled with the twilight, illuminates the table with its snow-white cloth. The emblematic buds and flowers embossed on the Sabbath lamps are reflected on the shining surface of the stove. The attitude of the woman, clad in her holiday dress; the expression of her face, full of devotion and piety; and every detail of the painting—all suggest the glory of the approaching day of rest. In this work the influence of Oppenheimer is distinctly noticeable. The picture was exhibited at the Columbian Exposition at Chicago in 1893, and is now (1902) in the St. Louis (Mo.) Museum of Art.

Influence of Oppenheimer.

In 1890 Asknazi produced "The Bridegroom Examined by the Rabbi." A young Talmudist is being examined by the rabbi in the presence of the future father-in-law and mother-in-law. He is clad in a long coat, after the old Polish fashion; and two long curls, hanging down from under his cap, encircle his pale face. He seems to be quite certain of success in this examination; yet it is evident that his heart is palpitating, and bashfulness is expressed on his face, he being aware that all his utterances and movements are closely watched by his future relatives, although the joy in their faces is proof of their great satisfaction as the examination nears its end. Asknazi exhibited with this painting "Old Age" and "The Female Friends." In 1891 he painted "Amram and Jochebed, Parents of Moses." In 1892 he exhibited "Asking a Favor," "The Morning Call," and "In Hesitation," and in the following year "A Jewish Wedding." The wedding occurs in a small Polish Russian town. The bridegroom, in a high hat, with a long overcoat, and the bride in a white dress, her head covered with a thin veil, are just coming out from under the canopy, accompanied by groomsmen, bridesmaids, and wedding-guests. The rabbi and the servant of the synagogue turn to the right, all the rest walking in the middle of the street. Preceding them are four Jewish musicians: an old cellist, another old man, evidently the leader of the band, playing the cymbal—a large kind of zither—and two young men, one playing the fiddle, the other, a retired soldier, playing the flute. The "badchan," or merrymaker, in front is directing the music; while the little sexton drives away the street-boys from the route of the procession. Especially effective are the merry faces of the three women that are dancing in the throng. Other paintings of this same period are: "Youth and Old Age" and "The Last in Church."

His "Jewish Wedding."

In 1897 Asknazi produced "The Cellist," representing a handsome old man with a violoncello between his feet, sitting in the middle of a luxuriously furnished room, and playing from notes lying open on a magnificently carved stand. The strong light thrown on the figure, the richness of the furniture, the graceful face of the attentive old musician, all produce a striking effect. In 1898 Asknazi exhibited: "Boy Preparing His Lesson," "Housewife Grinding Coffee," and "Over the Last Crumbs"; and in 1899, the portraits of the architect A. Hammerschmidt, of Miss P., and of I. Rabbinovicz, the translator of the Talmud into French.

Asknazi's latest and best work is "Ecclesiastes" or "Kohelet," which was exhibited at the Paris Exposition of 1900. It represents Kohelet ben David, king of Jerusalem, sitting on his throne, lost in the dismal thought, "Vanity of vanities, all is vanity." Kohelet's face expresses complete resignation: he has evidently no solution for the difficult question, "What profit hath he that worketh in that wherein he laboreth?" Lonely sits the king, long deserted by his children, to whom he had said, "Rejoice, O young man, in thy youth, and let thy heart cheer thee," etc. But two loyal servants from his body-guard and his secretary remain with him, bound to him by genuine affection. They are paying the closest attention to every whisper coming from his mouth. The secretary is writing down on a tablet the utterances of the wise king; and the servants, lying on the floor near the throne and leaning on their elbows, are looking at the king, who relates to them episodes of his life.

"Kohelet."

Asknazi is considered to be the most devout Jew among the Russo-Jewish painters. While at the Academy of St. Petersburg, he was the only student who was excused by the authorities from working on the Jewish Sabbath and on holidays. Most of his paintings deal with Jewish life and history; and on several occasions the authorities of the academy made him feel their dissatisfaction with his pronounced emphasis of national Judaism.

H. R.

ASMA: Arab poetess, contemporary with Mohammed; daughter of Marwan; was married to an Arab of the tribe of the Banu Ḥatmah. After the murder of the Jewish poet Abu 'Afak, who, in spite of his great age, had instigated the members of his tribe against Mohammed, Asma composed some verses condemning the deed. Mohammed despatched 'Umair, the only member of her tribe who had embraced Islam, to punish her; and he assassinated her while asleep, surrounded by her children.

Some Moslem traditionists, in order to excuse the murder, make Asma a Jewess. It is, however, very doubtful that she was one, although Grätz ("Gesch. der Juden," v. 144) accepts this assertion as a fact.

G. H. Hir.

ASMAKTA (אסמכתא): A word meaning "support," "reliance" (Ket. 67*a*); hence it is used to designate a Bible text quoted in support of a rabbinical enactment (Ḥul. 64*b*; see Jastrow, "Dict." *s.v.*).

In civil law Asmakta (surety) is a contract wherein one of the parties promises without consideration to suffer a certain loss, or obligates himself to pay an unconscionable penalty, upon the fulfilment or

Legal Meaning.

non-fulfilment of a certain condition: which promise or obligation is not enforceable at law. "An asmakta does not give title," is the principle adopted for the Halakah (B. B. 168*a*). The reason is that the one who binds himself is presumed to have done so because he certainly expected that the condition, upon the happening of which the obligation was to be complete, would not happen; and, from the nature of the obligation, the law presumes that the serious deliberate intention to be bound by it is lacking. An Asmakta may be made a perfectly valid contract if it is made clear that it was intended to be one; and the manner in which this may be done will be set forth hereafter.

Maimonides is of the opinion that every contract in which the condition is expressed by the use of the word "if" (אם), even though reduced to writing and attested, is an Asmakta (Yad ha-Ḥazakah, Mekirah, xi. 2, 3, 6). The contract takes effect only from the time when the condition is fulfilled; and this shows that the obligation was not assumed with serious intent, but that the promise was given only because the promisor certainly hoped that the contract would be nullified by the non-performance of the condition (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 207, 2). For instance, if A says to B, "I will give you my house if [אם] on a certain day you accompany me to Jerusalem," or "if you bring me a certain thing," even though B fulfils his condition, the contract is void, because it is an Asmakta (Mekirah, *l.c.*).

Asmakta Not Binding.

A sells goods to B and receives money on account, and they agree that *if* B does not complete the purchase, the earnest-money shall be forfeited to A, and that *if* A does not deliver the goods, he shall pay double the amount of the earnest-money to B. If B is in default, the earnest-money is forfeited to A, because he already has it in his possession; and if A is in default, he must return the earnest-money to the purchaser, but need not give him double the amount, because it is an Asmakta (B. M. 48*b*; Mekirah, xi. 4; Ḥoshen Mishpaṭ, 207, 11).

According to Rashi the earnest-money gives the buyer the right to claim an equivalent portion of the goods sold (B. M. 48*b*).

If a debtor has paid a portion of the debt, and he and the creditor deposit the instrument of indebtedness ("sheṭar") in the hands of a third person with this condition: *If* the debtor does not pay the balance of the debt within a certain specified time, the creditor shall be entitled to possession of the sheṭar and to the entire amount of the debt, without allowing any credit to the debtor for the amount already paid on account—in such case, even though the debtor does not pay within the time specified, the creditor is not entitled to possession of the instrument of indebtedness. Nor is the debtor obliged to pay that portion of the debt which he has already paid; because this is an Asmakta, since the debtor is presumed to have consented to the condition only because he was certain that he would be able to pay the money within the time specified (Mish. B. B. x. 5, opinion of R. Judah: Mekirah, xi. 5; Ḥoshen Mishpaṭ, *l.c.* 12). The early Talmudists still considered this a debatable question, but Rab, following the opinion of R. Judah, decided as above (Ned. 27*b*).

As stated above, Maimonides considers that every condition introduced by the word "if" constitutes the contract an Asmakta; but later authorities distinguish three classes of conditions (Gloss to Shulḥan 'Aruk, Ḥoshen Mishpaṭ, *l.c.* 13):

Three Conditions of Invalidity.

(1) If the fulfilment of the condition depends in part, but not entirely, upon him who assumes it, it is an Asmakta; as, for instance, if A agrees to purchase goods for B and binds himself that if he does not buy them he will pay B a certain sum. The fulfilment of this condition not depending entirely upon A, he must be presumed to have known that it might be impossible for him to buy the goods, because the owner might refuse to sell them to him (B. M. 73*b*; Tosafot to B. M. 74*a*, *s.v.* "Haka." and to 66*b*, *s.v.* "Wei"; see also Tos. to Sanh. 24*b*, *s.v.* "Kol.")

(2) If the fulfilment of the condition depends entirely upon the person who assumes it, and it is not unconscionable, it is not an Asmakta; as, for instance, if A leases a piece of ground to B, to be farmed on shares so that a definite share of the product shall be turned over to A, and B promises that, if he allows the field to lie fallow, he will pay to A the complete value of his lease, this is no Asmakta; because the working of the field lies entirely in his own power, and he has only bound himself to pay the actual damage to A resulting from the neglect to till the field (Mish. B. M. ix. 3). If, however, he has bound himself to pay a penalty far exceeding the value of the lease, it is inequitable and will not be enforced (Ḥoshen Mishpaṭ, 328, 2).

(3) If the fulfilment of the condition depends on chance, the contract is no Asmakta: this is the case in games of chance. But the contract is valid only so far as the amount at stake is concerned: any loss exceeding the amount actually staked can not be claimed by the winner (based on Sanh. 24*b*).

Asmakta Validated.

Asmakta may be validated (1) by the use of the form "from now on" ("me'akshaw"); (2) by the use of the form "on condition that" ("'al menat"); (3) by actual possession; (4) by judicial act; (5) by the disgrace suffered by one if the other refuses to perform the contract; (6) by a vow, etc.

(1) If the words "from now on" (me'akshaw) are used, there is no Asmakta. For instance, if A mortgages his field to B upon condition that if the loan be not repaid within three years, the field shall belong to B "from now on"—*i.e.*, from the date of the mortgage—then if the money is not repaid, the condition is fulfilled, and, as it is retroactive, B is considered the owner of the field, not from the date of the fulfilling of the condition, but from the date of the mortgage (B. M. 65*b*, 66*b*; Mekirah, xi. 7; Ḥoshen Mishpaṭ, 207, 9, 14). If A had not intended to enter upon the contract seriously, he would not have expressed his intention by the use of the retroactive words "from now on."

(2) The form "on condition that" is the legal equivalent of the form "from now on." According to the opinion of Rabbi Solomon ben Adret, the mere use of the form "on condition that" does not

determine the question; and he distinguishes the case in which it is used for the purpose of consummating the contract from the case in which it is for the imposition of a *penalty* for the breach of the contract (Gloss to Ḥoshen Mishpaṭ, *l.c.*). If A gives his house to B "on condition that" he marry a sister of A, the intention of A is that B shall receive the house only after he has married his sister; and therefore the phrase "on condition that" is equivalent to "from now on," and there is no Asmakta. If A and B are adjoining landowners and A wishes to buy B's land for the purpose of preventing it from falling into the hands of a third person, but B refuses to sell, and, for the purpose of pacifying A, declares that he will not sell his land without first offering it to A, "on condition that" if he breaks this promise he will pay A a certain sum of money, this condition is merely a penalty for breach of promise, and is not like the form "from now on," but is like the form "if," and it is an Asmakta ("Bet Yosef" to Ḥoshen Mishpaṭ, 207, 14; responsa of Solomon ben Adret, Nos. 917 and 1149).

(3) If the subject of the contract is real estate, and possession of it is taken at the time of the contract, in such case, even if the condition is in the form "if," there is no Asmakta (Mekirah, xi. 3, according to Kesef Mishneh, *ad loc.*).

(4) If the contract is concluded with Ḳinyan (ceremony of symbolic seizure) in the presence of a tribunal of three judges learned in the law, and the document is deposited in court on condition that it is to be delivered to the debtor in case the creditor is not able, within a certain specified time, to establish his claim, then there is no Asmakta, no matter how the condition is expressed. Unless the creditor is prevented from appearing within the time fixed, by sickness or some other unavoidable occurrence, the debtor is entitled to delivery of the document (Ned. 27b; Mekirah, xi. 13, 14; Ḥoshen Mishpaṭ, *l.c.* 15).

A case is cited in the Talmud in which two parties had a lawsuit, and A moved the court to grant a continuance of thirty days in order to enable him to bring his proofs. The court suspected that the demand for continuance was merely for delay, and granted it only on condition that A should deposit in court all the documentary evidence which he had, with the understanding that if he did not appear within thirty days, the continuance was to be considered null and void. The thirty days passed, and A did not appear. The question arose as to the legality of the condition made by the court, it being argued that this was an Asmakta, inasmuch as the condition was only accepted by A because he certainly hoped to be able to appear in time. The Talmud answers this problem by saying that in this case, inasmuch as the proofs were deposited in court, the non-fulfilment of the condition was tantamount to a relinquishment of the claim, and there was no Asmakta; and it was established as a general proposition of law that if the contract is concluded with Ḳinyan in the presence of a learned court of three judges, and the creditor is not prevented from fulfilling the condition by an unavoidable occurrence, there is no Asmakta (Ned. 27*a*, *b*).

(5) It is customary to fix certain penalties for breach of contract of marriage. In such cases, even though the penalty is an exceptionally large one, it is not to be considered an Asmakta; and it may be collected by law as damages for the shame suffered by the innocent party, for which no amount may be considered too high. And furthermore, in this case, as in the case of gambling contracts, the conditions are mutual and reciprocal, and hence there is no Asmakta (Ḥoshen Mishpaṭ, *l.c.* 16).

(6) A conditional promise strengthened by a vow, an oath, or a hand-clasp is not an Asmakta (*ib.* 19); hence the rule of Asmakta does not apply where objects are conditionally dedicated to religious or charitable uses, these being considered as vows (*ib.* 19, gloss; Shulḥan 'Aruk, Yore De'ah, 258, 10).

If a contract is an Asmakta, a notice in the deed that "this shall not be considered an Asmakta" is of no effect (Ḥoshen Mishpaṭ, *l.c.* 18): the substance of the contract determines its legal character, irrespective of what the parties choose to call it.

ASMODEUS, or **ASHMEDAI [ASHMADAI]** ('Ασμοδαῖος, אשמדאי): Name of the prince of demons. The meaning of the name and the identity of the two forms here given are still in dispute.

In the Book of Tobit.

Asmodeus first appears in the Book of Tobit. According to Tobit iii. 8, vi. 14, the evil spirit Asmodeus—"king of the demons," in the Hebrew and Chaldaic versions, is a later addition—fell in love with Sarah, the daughter of Raguel, and for that reason prevented her from having a husband. After killing seven men successively on the nights of their marriage to her, he was rendered harmless when Tobias married her, following the instructions given him by the angel Raphael. Asmodeus "fled into the utmost parts of Egypt and the angel [Raphael] bound him" (*ib.* iii. 8, vi. 14 *et seq.* viii. 2-4).

In Testament of Solomon.

Akin to this representation in Tobit is the description of Asmodeus in the Testament of Solomon, a pseudepigraphic work, the original portions of which date from the first century. Asmodeus answered King Solomon's question concerning his name and functions as follows:

> "I am called Asmodeus among mortals, and my business is to plot against the newly wedded, so that they may not know one another. And I sever them utterly by many calamities; and I waste away the beauty of virgins and estrange their hearts. . . . I transport men into fits of madness and desire when they have wives of their own, so that they leave them and go off by night and day to others that belong to other men; with the result that they commit sin and fall into murderous deeds."—Test. of Solomon, transl. in "Jewish Quarterly Review," xi. 20.

Solomon obtained the further information that it was the archangel Raphael who could render Asmodeus innocuous, and that the latter could be put to flight by smoke from a certain fish's gall (compare Tobit viii. 2). The king availed himself of this knowledge, and by means of the smoke from the liver and gall he frustrated the "unbearable malice" of this demon. Asmodeus then was compelled to help in the building of the Temple; and, fettered in chains, he worked clay with his feet, and drew water. Solomon would not give him his liberty "because that fierce demon Asmodeus knew even the future" (*ib.* p. 21).

Haggadic Legend.

Thus, in the Testament of Solomon, Asmodeus is connected on the one hand with the Asmodeus of Tobit, and possesses on the other many points of contact with the Ashmedai of rabbinical literature, especially in his relation to Solomon and the building of the Temple. The Haggadah relates that Solomon, when erecting the Temple, did not know how to get the blocks of marble into shape, since, according to the law (Ex. xx. 26), they might not be worked by an iron tool. The wise men advised him to obtain the "shamir" (שמיר), a worm whose mere touch could cleave rocks. But to obtain it was no slight task; for not even the demons, who knew so many secrets, knew where the shamir was to be found. They surmised, however, that Ashmedai, king of the demons, was in possession of the secret, and they told Solomon the name of the mountain on which Ashmedai dwelt and described his manner of life. On this mountain there was a well-head from which the arch-demon obtained his drinking-water. He closed it up daily with a large rock, and secured it in other ways before going to heaven, whither he went every day in order to take part in the discussions in the celestial house of study ("Metibta"). Thence he would presently descend again to the earth in order to be present—invisibly—at the debates in the earthly houses of learning. Then, after investigating the fastenings of the well, to ascertain if they had been tampered with, he drank of the water.

Benaiah Captures Ashmedai.

Solomon sent his chief man Benaiah ben Jehoiadah to capture Ashmedai. For this purpose he provided him with a chain, a ring on which the Tetragrammaton was engraved, a bundle of wool, and a skin of wine. Benaiah drew off the water from the well through a hole that he bored, and, stopping up the source with the wool, filled the well with wine. When Ashmedai descended from heaven, to his astonishment he found wine instead of water in the well, although everything seemed untouched. At first he would not drink of it, and cited the Bible verses against wine (Prov. xx. 1, and Hosea iv. 11), in order to inspire himself with moral courage. At length Ashmedai succumbed to his consuming thirst, and drank until his senses were overpowered and he fell into a deep sleep. Benaiah then threw the chain about the demon's neck. Ashmedai on awaking tried to free himself, but Benaiah called to him: "The Name of thy Lord is upon thee."

Ashmedai's Journey to Solomon.

Though Ashmedai now permitted himself to be led off unresistingly, he acted most peculiarly on the way to Solomon. He brushed against a palm-tree and uprooted it; he knocked against a house and overturned it; and when, at the request of a poor woman, he was turning aside from her hut, he broke a bone, and asked with grim humor: "Is it not written, 'A soft tongue [the woman's entreaty] breaketh the bone'?" (Prov. xxv. 15). A blind man going astray he set in the right path, and a similar kindness he did for a drunkard. He wept when a wedding company passed them, and laughed at one who asked his shoemaker to make him shoes to last for seven years, and at a magician who was publicly showing his skill. Having finally arrived at the end of the journey, Ashmedai, after several days of waiting, was led before Solomon, who told him that he wanted nothing of him but the shamir. Ashmedai thereupon informed the king where it could be obtained.

Solomon then questioned him about his strange conduct on the journey. Ashmedai answered that he judged persons and things according to their real character and not according to their appearance in the eyes of human beings. He cried when he saw the wedding company, because he knew the bridegroom had not a month to live; and he laughed at him who wanted shoes to last seven years, because the man would not own them for seven days; also at the magician who pretended to disclose secrets, because he did not know that under his very feet lay a buried treasure.

Ashmedai remained with Solomon until the Temple was completed. One day the king told him that he did not understand wherein the greatness of the demons lay, if their king could be kept in bonds by a mortal. Ashmedai replied that if Solomon would remove his chains and lend him the magic ring, he (Ashmedai) would prove his own greatness. Solomon agreed. The demon then stood before him with one wing touching heaven, and the other reaching to the earth. Snatching up Solomon, who had parted with his protecting ring, he flung him four hundred parasangs away from Jerusalem, and then palmed himself off as the king.

After long wanderings Solomon returned to reclaim his throne. At first the people thought him mad; but then the wise men decided it would be well to regard Ashmedai more closely. It appeared on inquiry that not even Benaiah, the first in the service of the king, had ever been admitted to his presence, and that Ashmedai in his marital relations had not observed the Jewish precepts. Moreover, the declaration of the king's women that he always wore slippers, strengthened suspicion; for demons proverbially had cocks' feet. Solomon, provided with another magic ring, at length suddenly appeared before Ashmedai, who thereupon took flight (Giṭ. 68; parallel passages, Midr. Teh. on Ps. lxxviii. 45; Yalḳ. ii. 182; compare Num. R. xi. 3; Targ. on Eccl. i. 12, and the extract from a manuscript Midrash in "Z. D. M. G." xxi. 220, 221).

Elements of the Ashmedai-Solomon Legend.

Although the number of incidents concerning Ashmedai related by this Haggadah is fairly large, the fact must not be disregarded that many details grouped about him are of later origin and do not pertain to Ashmedai at all. Ashmedai, as the false Solomon, is a Babylonian elaboration of the Palestinian Haggadah concerning Solomon's punishment for his sins, which punishment consisted in the assumption of the throne by an angel; Solomon meanwhile having to wander about as a beggar (Yer. Sanh. ii. 6; Pesiḳ., ed. Buber, 169*a*; Tan., ed. Buber, iii. 55; Eccl. R. ii. 2; Simon b. Yoḥai of the middle of the second century is quoted as the authority). Similarly, Ashmedai's service in the construction of the Temple is probably an echo of the elaborate legend in the Testament of Solomon, according to which the demons were the chief laborers at the building of the Temple. This cycle of legends in the Testament of Solomon is the source also of the myth concerning the wonderful ring whose inscription tames the demons, as well as of the incident that by virtue of the ring the demons were forced to assist in erecting the Temple. (Test. Solomon v.; compare vi.: "Throw this ring at the chest of the demon and say to him, 'In the name of God, King Solomon calls thee hither.'")

Furthermore, it is improbable that the shamir legend was originally an element of the Ashmedai legend. The Testament of Solomon (ix.) narrates how a demon, forced by Solomon to hew stones for the Temple, was afraid of the iron instruments; and, as Conybeare rightly observes ("Jew. Quart. Rev." xi. 18), the fear of iron on the part of evil spirits is a feature common to both old and recent folk-lore. In the Talmud this fear is given a Jewish setting by connecting it with the legal precept against the use of iron tools, and by causing the demons to render the blocks of stone fit for use in the Temple structure without the use of iron.

A comparison of the Ashmedai legend with the Testament of Solomon reveals also that many other points in the representation of demons by the former are general characteristics of demons. Thus Ashmedai's wings correspond to the wings of Ornias in the Testament (x.). Ornias likewise daily visited heaven; and just as Ashmedai learned the fate of human beings in heaven, so, according to the Testament (xxiii.), did all the demons. Consequently, Ornias could laugh at the king who was on the point of condemning a youth to death who was destined to die at the end of three days (cxi.), just as Ashmedai laughed at the man who ordered shoes to last seven years, when he had not seven days to live.

Hence it follows that the passage in the Talmud provides little information concerning the more particular characteristics of Ashmedai. That he overturned a house and uprooted a tree indicates nothing; for with any demon, however insignificant, such things are trifles. Ashmedai is not represented as doing these things from a mere desire to destroy, but apparently through carelessness. The common opinion that in the Talmud, Ashmedai is depicted as particularly lustful and sensual, has no sufficient basis. The Talmud simply states that Ashmedai, while playing the part of Solomon, did not observe the Jewish precepts pertaining to the separation of women (נדה), and that he attacked Bath-sheba, Solomon's mother. These facts, in reality, were to prove only that Ashmedai was not Solomon.

The question now arises whether Asmodeus and Ashmedai may be considered as closely allied with each other, and identical with the Persian arch-demon, Æshma or Æshma-dæva, as was first suggested by Benfey, and developed by Windischmann and Kohut.

In regard to Æshma, very frequently mentioned in the Zend-Avesta and the Pahlavi texts, Darmesteter says:

Asmodeus, Ashmedai, and Æshma.

"originally a mere epithet of the storm fiend, Æshma was afterward converted into an abstraction, the demon of rage and anger, and became an expression for all wickedness, a mere name of Ahriman ["Introduction to Vendidad," iv. 22]. This description of Æshma, as he appears in the Zend-Avesta, tallies with the dominant conception in Pahlavi writings. Thus in Dabistan, i., Dink, xxxvii. 164: 'The impetuous assailant, Wrath (Æshm), when he does not succeed in causing strife among the righteous, flings discord and strife amid the wicked; and when he does not succeed as to the strife even of the wicked, he makes the demons and the fiends fight together.'"

In "Shayast la-Shayast" (xviii.) Æshm is described, quite unlike Ahriman, as the "chief agent of the evil spirit [Ahriman] in his machinations against mankind, rushing into his master's presence in hell to complain of the difficulties he encounters."

A consideration of the linguistic arguments does not support the hypothesis of an identification of Ashmedai with Æshma-dæva, as "dai" in Ashmedai hardly corresponds with the Persian "dæva," in view of the Syriac form "dawya" (demon) with the consonant "w"; nor is there any instance of the linking of "Æshma" and "dæva" in Persian texts. The Asmodeus of the Apocrypha, and Æshma, however, seem to be related. In the Testament of Solomon Asmodeus appears as seducing man to unchaste deeds, murder, and enmity, and thus reveals many points in common with Æshma. The "Bundehish" (xxviii. 15–18) furnishes the most striking resemblance: "There, wherever Æshm lays a foundation, many creatures perish."

Ashmedai and Shamdon.

Ashmedai of the Solomonic legend, on the other hand, is not at all a harmful and destructive spirit. Like the devil in medieval Christian folk-lore, he is a "king of demons" (Pes. 110*a*), degraded and no longer the dreaded arch-fiend, but the object of popular humor and irony. The name "Ashmedai" was probably taken as signifying "the cursed," שמד (compare Nöldeke, in Euting's "Nabatäische Inschriften," pp. 31, 32), just as "la'in" (the cursed), is the Arabic name of Satan. Thus the name Shamdon (שמדון), is found in Palestinian Midrashim.

It is related of Shamdon that at the planting of the first vine by Noah he helped with the work, but said to Noah: "I want to join you in your labor and share with you; but have heed that you take not of my portion lest I do you harm" (Gen. R. xxxvi. 3); in the legend in Midrash Abkir, and cited in Yalḳ. i. 61, Satan figures as the chief personality. The second thing told of this Shamdon is that in the Golden Age he had an encounter with a new-born child wherein he was worsted (Lev. R. v. 1, according to the reading of the 'Aruk, *s.v.* שד).

Ashmedai in Later Sources.

In later sources, Shamdon is held to be the father of Ashmedai, whose mother they say was Naamah, sister of Tubal Cain (Naḥmanides on Gen. iv. 22; from this comes the same statement in Baḥya b. Asher, Zioni, and Recanati in their commentaries, *ad loc.*). This legend of Ashmedai's birth tallies with the assertion of Asmodeus in the Testament of Solomon: "I was born of angel's seed by a daughter of man" (xxi.). In the Zohar, Ashmedai is represented as the teacher of Solomon, to whom he gave a book of magic and medicine (Zohar Lev. pp. 19*a*, 43*a*; *ib.* Num. 199*b*, ed. Wilna). In a more recent Midrash Ashmedai is identified with Shamdon (Midr. Shir ha-Shirim, ed. Grünhut, 29*b*; a story similar to the one here given of Solomon's ring and the fish is found in "Emeḳ ha-Melek," 14*a*–15*a*, and in the Judaeo-German "Maasebuch"; the story is reprinted in Jellinek, "B. H." ii. 86). A recent source gives the following legend cited by the Tosafists in Men. 37*a* from an anonymous Midrash, which has probably been lost:

> "Ashmedai brought forth from the earth a two-headed man, who married and produced both normal and two-headed children. When the man died a quarrel arose among the children concerning their inheritance, the two-headed ones demanding a double portion." (This legend is given at length in Jellinek, "B. H." iv. 151, 152.)

Later cabalists held the theory that Ashmedai was king of the demons for only a limited time, and that on his death—demons are mortal (Ḥag. 16*a*)—he was succeeded by Bildad, who in turn left his dominion to Hind (see Jos. Sossnitz, "Ha-Maor," p. 84). Benjamin of Tudela (ed. Margolin, 63, 65) mentions a certain local legend about Baalbek, whose temple was erected by Ashmedai, on Solomon's bidding, for the king's favorite, the daughter of Pharaoh.

Concerning the many points of resemblance of the Ashmedai-Solomon legend with Persian and classic legends, see SHAMIR, SOLOMON IN LEGEND AND FOLK-LORE, and ÆSHMA.

ASMONEAN. See PERIODICALS.

ASNAPPER: A person who transplanted the mixed multitude of tribes from Babylon to Samaria after the fall of the latter city (Ezra iv. 10). It has been conjectured that this word is a misreading for Assurbanipal, though the reference in Ezra iv. 2 is to Esarhaddon. The reading Asbacaphath in I Esdras v. 69 suggests that a ב ("bet") has fallen out. If this conjecture is correct the word "Asnapper" contains the only reference to the Assyrian king Assurbanipal in the Bible. In the Revised Version the form "Osnappar" is preferred.

J. JR. J.

——**In Rabbinical Literature:** The Talmud identifies Asnapper with Sennacherib, who is said to have had eight names, like his opponent Hezekiah (Sanh. 94*a*).

J. SR. L. G.

ASOLO: Town in the province of Treviso, Italy. A Jewish congregation existed there in the middle of the sixteenth century, perhaps even at the end of the fifteenth. In 1547 there were in Asolo 37 Jews, who lived in six houses close together in the center of the town. In the house of one Marco Koen a room, furnished with some scrolls of the Law, was devoted to religious meetings. Of the 37 Jews in question, 14 had attained their religious majority (see BAR-MIẒWAH); and as there were also several Cohanim (see COHEN), the divine services of this small congregation were as well arranged as they could be. The Asolo Jews possessed a cemetery, of which only two tombstones remain now preserved in the public gallery. There were at least four Jewish pawnbrokers: Anselmo, Marco, Jacob, and Moise.

On Nov. 22, 1547, while Francesco Nani was mayor of Asolo, and Renier of Treviso was governor of the surrounding district, 30 men, armed with cudgels, axes, clubs, and knives, and led by one Antonio Parisotto, attacked the Jews in broad daylight, killed 10 of them, wounded 8 others, and, having taken rich booty, fled in great haste. Five Jewish families were left entirely destitute. Some of the robbers were brought to justice, and were either put to death or exiled. Of the Jews who survived this attack some remained in Asolo, while others emigrated to safer places.

The CANTARINI family, which gave to Italian Judaism many prominent rabbis and physicians, had its origin in Asolo.

BIBLIOGRAPHY: Marco Osimo, *Narrazione della strage compila nel 1547 contro gli Ebrei d'Asolo e Cenni Biografici della Famiglia Koen-Cantarini originata da un ucciso Asolano*, Casale-Monferrato, 1875.

D. F. S.

ASPALATHUS: A word found only in the Apocrypha (Ecclus. [Sirach] xxiv. 15). From the context it appears to be the name of a fragrant wood. It is impossible, however, to identify the plant.

J. JR. G. B. L.

ASPHAR: A pool in the wilderness of Tekoah, where Jonathan and Simon Maccabeus pitched their tents when they fled before the army of Bacchides (I Macc. ix. 33; compare Josephus, "Ant." xiii. 1, § 2). The identification of the place is uncertain, though the evidence points in favor of associating the pool with the modern Bir-Selhut (Smith, "Historical Geography of Palestine," *s.v.*; see, however, Buhl, "Geographie des Alten Palästina," p. 158).

J. JR. G. B. L.

ASRIEL: Eponym of the family of Asrielites, found in the genealogy of Manasseh (Num. xxvi. 31; Joshua, xvii. 2). In I Chron. vii. 14 the A. V. reads "Ashriel."

J. JR. G. B. L.

ASS.—Biblical Data: The Bible knows both the wild and the domestic Ass. (1) The wild Ass ("pere" or "'arod") generally roamed about in herds, and is associated with the wilderness (Job xxiv. 5). The character of the wild Ass gave occasion for applying the term figuratively ("wild ass") to one who in unbridled opposition had his hands ever turned against his fellows (Gen. xvi. 12, R. V.).

(2) The domesticated Ass ("ḥamor," "aton" [fem.], "'ayir" [young Ass]) was put to various uses: (a) for riding (Num. xxii. 21; II Kings iv. 24; Judges x. 4, xii. 14), in which the young Ass and

she-ass were mainly employed; (b) for carrying burdens (Gen. xxii. 3, xlii. 26); and (c) for plowing (Isa. xxx. 24; Deut. xxii. 10), in which the young Ass and the he-ass were utilized. The Deuteronomic code forbids the harnessing of the Ass with the ox (Deut. xxii. 10); the explanation usually offered being that as their strength and weight are so unequal, the harnessing of the two would entail annoyance and suffering on both. It may be, however, that back of the curious prohibition lies some obsolete superstition, the injunction resting on an omen that was no longer intelligible to the compiler of the code.

Syrian Ass, Showing Manner of Riding.

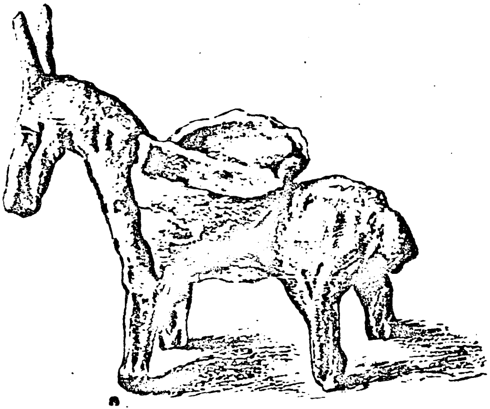
J. JR. G. B. L.

—**In Rabbinical Literature:** "The ox for plowing, the ass for carrying burdens," is the reason given in the Talmud for the creation of these animals ('Ab. Zarah 5*b*; Tanna debe Eliyahu R. ii.). As regards species, a distinction is drawn between the wild and the domesticated Ass, the former, "'arud," being reckoned among the wild beasts of the field (Kil. viii. 6); hence the Biblical precept is applied to it (Kil. i. 6) forbidding it to be crossed with the domestic variety. The most valuable species is declared to be the Libyan, distinguished for its size and strength (Bek. 5*b*); but which, on account of its fiery character, must be driven with a powerful bit (Shab. 51*b*). However, Immanuel Löw asserts that this description applies not to the Libyan Ass, but to the Lycaonian variety, which is mentioned in old sources (Mishnah Shab. v. 1), and which, according to the testimony of Greek and Latin writers, was frequently partially tamed for crossing with the mare (Krauss, "Lehnwörter," ii. 301). The meat of the Ass is said to have the same specific gravity as human flesh ('Ar. 19*b*); and the blood of a foal is held to be a remedy for jaundice (Shab. 110*b*). The bite of an Ass was accounted more dangerous than that of a dog, for it might break a bone (Pes. 49*b*), a case being cited where an Ass completely crushed with its bite the arm of a child (B. K. 84*a*). The Ass is not particular in its food, eating such things as brush and thistles, and when hungry it has been known to eat fish (B. K. 19*b*); nevertheless, baled provender for a young Ass should be opened out, a labor permissible on the Sabbath (Shab. 155*a*). The she-ass produces no young before her third year (Bek. 19*b*). A strap made either from ass-hide or calf-hide was employed in judicial scourgings, a fact which was thus wittily applied by an itinerant preacher in expounding the well-known words of Isaiah (i. 3): "The ass knoweth his master's crib, but Israel doth not know; therefore, let him that doth not know be chastised by the hide of him that doth know" (Mak. 23*a*).

In Proverbial Use.

No other animal is perhaps so frequently mentioned in popular proverbs as the Ass. "Where our forefathers were angels, we are but men; where they were men, we are only asses" (Shab. 112*b* and often elsewhere), a saying which shows that even in those days the Ass was considered an example of stupidity (B. B. 74*a*). Its stupidity and insensibility are expressed in the proverb, "The ass freezes even in July" (Shab. 53*a*). To be called "an ass" was therefore an insult: "If one hath called thee ass, go and get a halter for thyself" (B. K. 92*b*). A variation of this is found in the Palestinian saying, "If a man say unto thee, thou hast asses' ears, pay no heed to him: but if two say it to thee, go and get thee a saddle right away" (Gen. R. xlv. 7). Other proverbs are, "The pace of the ass depends upon its barley [its food]" (Shab. 51*b*; and "Many young asses die and their skins serve as trappings for their mother" (Lev. R. xx. 10; Gen. R. lxvii. 8). Concerning the color of asses, the following is found: "Thou sayest thou hast seen a black ass? Then thou hast seen neither a black one nor a white one, for there are no black asses" ("Alphabet" of Ben Sira, letter 8).

The Ass employed by Abraham when he traveled to the sacrifice of Isaac was declared to be the same animal which later bore Moses' wife and her sons into Egypt (Ex. iv. 20); and it is declared that the same animal is also to serve the Messiah, who is to come "riding upon an ass" (Zech. ix. 9). The mother of this Ass is said to have been the one upon which Balaam



Ass with Panniers.
(From a Phœnician terra-cotta in the Metropolitan Museum of Art, New York.)

rode, and which was created at the close of the sixth day of Creation at dusk (Pirḳe R. El. xxxi.). The old sources, as Abot v. 6, speak only of the creation of the "mouth of the ass" (Ginzberg, "Die Haggada bei den Kirchenvätern," pp. 49, 50; see BALAAM).

When the Ass of Phinehas b. Jair, or, some say, of Hanina b. Dosa, was once stolen, she refused to eat the fodder laid before her because the tithe upon it had not been paid to the priest, whereupon the thieves set her free and she returned to her master (Yer. Dem. i. 21*d*, below; compare also Ḥul. 7*b*; Ab. R. N. viii. for variations of the legend). The Ass of Rabbi Jose would not enter his stall until a pair of shoes which were lying upon his back, and which did not belong to his master, had been removed (Ta'an. 24*a*).

Ass-drivers were held in small repute; the current opinion being that the majority of them were rascals (Ḳid. iv. 14, 82*a*; but see Niddah 14*a*). An "ass-driver's question" is equivalent to a "stupid question" (Yer. Sanh. vi. 23*b*).

L. G.

ASS-WORSHIP: The accusation that Jews worshiped the ass was for four centuries persistently made by certain Greek and Latin writers.

Various Authors of the Calumny.

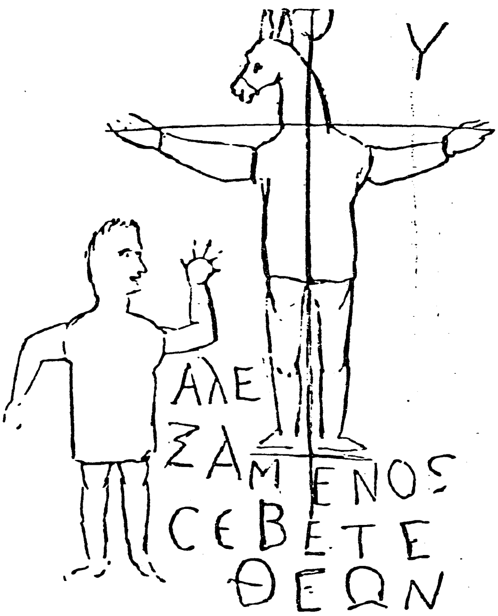
(1) Mnaseas of Patras (second century B.C.) is quoted by Josephus ("Contra Ap." ii. 9) as claiming that the Jews worshiped the head of a golden ass (*χρυσῆν . . . τοῦ κάνθωνος κεφαλήν*). The word *κάνθων*, instead of the usual *ὄνος*, suggested by its similarity to the *κάνθαρος* (the scarabs), worshiped in Egypt, betrays the Egyptian standpoint of the author, it being also used to denote the sign upon the tongue of the Egyptian god Apis.

(2) A similar charge is made by Damocritus (Suidas, *s.v.* *Δαμόκριτος*), whose period is undetermined, but who certainly preceded Josephus. In his book "About the Jews" Damocritus asserts that the Jews reverenced the head of a golden ass (*χρυσῆν ὄνου κεφαλὴν προσεκύνουν*), to which every seven years they sacrificed a foreigner, whom they seized for that purpose, and cut his flesh into small pieces. Suidas (*s.v.* *Ἰούδας καὶ Ἰουδαῖος*) places the interval between these ritual-murders at three years instead of seven.

(3) The next writer is Plutarch (46-120), who, in his "Quæstiones Conviviales," iv. 5, states that the Jews abstained from eating the flesh of the hare because it resembled the ass, which is an animal worshiped by them.

(4) Julius Florus, who lived under Antoninus Pius, speaks of the conquest of Jerusalem by Pompey, and mentions a secret place discovered in the Temple on that occasion, which contained, he says, an ass under a golden vine ("sub aurea vite cillum"). But the word "cillum," the most important word in the passage, is only a guess at a very much disfigured text, which, in its received form, gives no sense at all. This author's testimony, therefore, hardly deserves consideration.

(5) Quite different from these accounts is that in Diodorus, "Eclogæ," § 34, by Posidonius of Apamæa (died about 51 B.C.), that when Antiochus Epiphanes conquered Jerusalem in the year 168 B.C. and entered the Temple, he found in the Holy of Holies the image of a man sitting upon an ass (*καθήμενον ἐπ' ὄνου*) and holding a book in his hand; the king understood the statue to represent Moses. In addition to the association of this story with an historical personage, Antiochus Epiphanes, and to the mention of a statue, this account is further distinguished by the element that not the head alone but the whole animal is referred to, just as in Plutarch. Apion combined these accounts in stating that the Jews had in their Temple an ass's head set up, which was discovered when Antiochus Epiphanes penetrated into the sacred precincts (Josephus, "Contra Ap." ii. 7; all the passages referred to are given by Th. Reinach, "Fontes Rerum Judaicarum," i., Paris, 1895). Reinach (p. 131) remarks that it is clear from Josephus that Apollonius Molon, too, was acquainted with the calumny.



"The Mocking Crucifix."
(From Garrucci, "Arte Christiana.")

Same Accusation Against Early Christians.

As was the case with many another calumny against the Jews, Christianity, the daughter-religion of Judaism, was likewise charged with Ass-Worship (see Minucius Felix, "Octavius," ix., xxviii.). As Tertullian ("Apologia," xvi.) remarks tersely and truthfully, the same accusation was made against Christians because theirs was the nearest to the Jewish religion ("ut Judaicæ religionis propinquos"). Writing against the heathens, Tertullian further says, "Certain people out of your midst have dreamed that an ass's head is our God" (see also "Ad Nationes," i. 11). He quotes Tacitus, who, as is well known, contributed most to spread false reports concerning Judaism. Tacitus' story runs ("Historiæ," v. 3) that the Jews suffered from thirst in the wilderness, and that they followed a herd of wild asses which led them to a spring of water; in recognition of this benefit they made the domestic ass—its nearest congener—the object of their worship. A similar account is found in Plutarch (*l.c.* iv. § 5). These accounts are essentially different from the preceding ones, for they endeavor to supply some cause for such a remarkable form of worship.

Josephus' Disproof for the Jews.

Mockery of Christianity.

Josephus knows nothing of any such alleged reason. He takes ("Contra Ap." ii. 7) the whole story as a stupid calumny, all the more despicable as it seeks to detract from the sanctity of the celebrated Temple. With clever irony he remarks that it ill befits Apion the Egyptian to bring forward such an accusation, for nothing can be more absurd than the Egyptian animal-worship. The falsity of this shameful charge is established by facts: for Antiochus Epiphanes (Theus), Pompey the Great, Licinius Crassus, and lastly Titus, who all entered the Temple, found nothing there of that kind, but found, instead, the purest forms of divine adoration. Tacitus, as quoted by Tertullian, expressly states that Pompey found no image or idol in the Temple. Although this disproof seems quite sufficient as defense, it gives no clue concerning the origin of such a report. Tertullian indicates that he considers the calumny as simply the offspring of malevolence, for it was in like manner, he relates in his "Apologia," xvi., that a rascal in his town (in "Ad Nationes," i. 14, he is described as a Jew), who had to take care of the wild animals intended for the arena, would carry around an image with the inscription "Onokoites, the God of the Christians." The image had ass's ears, a hoof on one foot, and it carried a book and a toga. The meaning of the word "Onokoites" is not clear. But it is very evident that the image must have been intended for the amusement of the crowds, and that the intended mockery of Christianity must have been understood as referring to one of the best-known dogmas of Christianity. The word ὀνοκοίτης, formed after the analogy of *παρακοίτης* —though not strictly according to philological rules —caused Tertullian to observe "risimus et nomen" (the very name of it made us laugh). It probably hints at something like *ex concubitu asini (et feminæ) procreatus*, and is thus a malicious insult upon the Christian God, claimed to be a compound being, both God and man (H. Kellner, "Ausgewählte Schriften des Septimius Tertullianus," i. 62, 1871). This anecdote, however, can not be taken as indicating that the Jews transferred the reproach under which they had suffered from themselves to the Christians; for it is simply the silly wit of a coarse hireling that had deserted the Jewish faith to become champion fighter with wild beasts, as Tertullian himself states.

The Rabbis explain "tartak" (II Kings xvii. 31) as the image of an ass (Winer, "B. R." ii. 605); but Tartak is not described as a god of the Samaritans, and the Samatitans therefore are not accused by the Jews of worshiping the ass, as is wrongly stated by Roesch ("Theol. Studien und Kritiken," 1882, p. 523). That the Christians were accused by the Jews of this cult is also without foundation, for neither Justin ("Dialogus cum Tryphone," pp. 10, 17, 108, and 117) nor Origenes ("Contra Celsum," vi. 27) mentions anything of the kind. On the other hand, it is quite true that the Christians accused some Gnostic sect of their own of Ass-Worship, and, it appears, with full justification. The supreme spirit is called Onoel (*ὄνος*, ass + אל, God) by the Gnostics. According to the Gnostic work *Γέννα Μαρίας* (Epiphanius, "Hæres." xxvi. 12), Zachariah saw in a vision a man in the Temple at Jerusalem who had the form of an ass. Some Gnostics ascribed to the demon Sabaot an ass' shape, others that of a pig (*ib.* xxvi. 10). Here may also be mentioned that according to a baraita in Yoma 19*b*, a Sadducean high priest is said to have died in the Temple, and the imprint of a calf's foot to have been found between his shoulders.

Real Foundation in a Gnostic Sect.

Origin in the Egyptian Typhon-Worship.

Now all these varying accounts are remarkably illustrated by a graffito found in Rome in 1856, representing a man bearing the head of an ass, and nailed to a cross, before whom another man kneels in the attitude of adoration (F. S. Kraus, "Das Spottcruzifix," Freiburg, i. Br. 1872). Another graffito, found likewise on the Palatine in Rome, depicts the same man, and designates him as "fidelis" (faithful); so that this is not intended for a caricature, as usually claimed, but for an earnestly intended symbol of faith (Wünsch, "Sethianische Verfluchungstafeln aus Rom," p. 112, Leipsic, 1898). From the circumstance that at the right of the ass's head (see p. 222) there stands a Y, Wünsen deduces that it is a symbol of the Typhon-Seth worship, for on the numerous curse-tablets in Rome the same symbol always stands at the right of the ass's head of Typhon-Seth. It is the religious symbol of the Gnostic sect of the Sethinai (from Seth, son of Adam; but also from Seth, the surname of the Egyptian god Typhon); and they in their turn derived the ass's head—as shown in the above-cited quotation from Epiphanius—from the representation of the "Jewish god Sabaoth." Wünsch is therefore inclined to consider the cult of the ass as having foundation in fact and not merely in calumny.

Jews Can Not Be Connected with Typhon-Worship.

It is of course quite correct to say that the ass-cult is connected with the Egyptian god Typhon (Ælian, "V. H." x. 28). Plutarch relates ("De Iside et Osiride," ch. xxx.) that in Egypt the ass was considered of "demoniac" nature (*δαιμονικόν*, on account of its resemblance to Typhon (compare *ib.* xxxi.; M. Wellmann, "Ægyptisches," in "Hermes," 1896, xxxi. 242). But this would not explain the story of its adoption by Jews. Plutarch brings the Jews into direct connection with Typhon by making him beget "Hierosolymus" (Jerusalem) and "Judæus," after having fled upon an ass subsequently to the war with Jupiter ("De Iside et Osiride," ch. xxxi.; Reinach, *l.c.* p. 137). Roesch, referring to the Talmudic account, that in the Second Temple the so-called foundation-stone (אבן שתיה) took the place of the Ark of the wilderness, thinks that this stone is meant by Posidonius and others by their "ass' statue." The upper millstone being also metaphorically called "the ass," the enemies of the Jews took advantage of this circumstance to accuse them of worshiping a veritable ass. He claims also that a four-cornered stone is the determinative for Typhon in the hieroglyphs. But this explanation is too far-fetched to be acceptable; besides, it must not be forgotten that Mnaseas, the oldest authority for the legend, does not call the ass *ὄνος*, but *κάνθων*. Another suggestion, that of Michaelis, that the enemies of the Jews may have seen a cherub in the Temple with an ass's head, is negatived at once by the fact that the cherubim were certainly never so represented. None of these attempted explanations is based on facts. Nor are Philo's statement (i. 371) that the Jews' golden calf represented Typhon (see Winer, "B. R.," *s.v.* "Kalb"), and the connection of the ass-cult with that of Seth-Typhon asserted by Movers ("Die Phönizier," i. 297, 365), and by W. Pleyte ("La Religion des Pre-Israélites," Leyden, 1865, p. 143).

For explanation of the supposed Ass-Worship, the Dionysos-cult must be taken into consideration.

Origin of Accusation in Alleged Bacchus-Worship.

Dionysos, or Bacchus, was, under the name of Sabazios, worshiped by the Phrygians; according to some, Dionysos himself was Sabazios, according to others Sabazios was his son. Dionysos was identified with the Semitic divinity Adonis, which easily suggests the name of the God of the Hebrews. It is said that Dionysos encountered Aphrodite and Adonis in Lebanon; he loved their daughter Beroe (Nonnus, "Dionysiaca," xlvi.). Dionysos is identified with pretty nearly all Oriental deities, as, for example, with Moloch, Baal, Melkart, and Hadad. F. Lenormant says, therefore, in the "Dictionnaire des Antiquités," *s.v.* "Bacchus": "The disposition was so marked to identify the son of Semele (Bacchus) with the various deities of the Orientals that it was even pushed to the extreme of asserting that the Jews likewise worshiped Dionysos (Plutarch, 'Symposiaca,' iv. 6), an assertion based upon nothing further than the similarity of sound between the name Jehovah, Sabaoth, and that of Sabazios (Valerius Maximus, i. 3, § 2; other passages at Lenormant), likewise upon the existence of the golden vine in the Jerusalem Temple (Josephus, 'Ant.' xv. 11, § 3)." The similarity of the names Sabaoth and Sabazios, and the existence of the golden vine in the Temple, were then sufficient to suggest to the heathens, who knew very little about Jewish worship, that the Jews, like many other nations, cherished some kind of a Dionysos-worship. It is known that the excessive hilarities at the so-called "Feast of the Water-Drawing" at the Festival of Tabernacles gave cause to the accusation that the Jews celebrated Bacchanalia (see Z. Frankel, "Juden und Judenthum nach Römischer Anschauung," in "Monatsschrift," 1860, ix. 125 *et seq.*, and Büchler, in "Rev. Et. Juives," xxxvii. 181). Now, the ass was sacred to Bacchus and an unfailing member of his train; the god is often represented as riding upon one. Note the alleged statue in Jerusalem of Moses riding upon an ass, mentioned above. Silenus, Bacchus' constant companion, also rides upon an ass. Creuzer ("Symbolik," i. 480) remarks that Silenus *is* the ass. The ass was considered a phallic animal, and when once the Jews were accused of the cult of Dionysos, it was not going very much further to accuse them of sexual excesses, as Tacitus does, holding them capable of every shamefulness. One charge involves the other, and calumniators of the Jews would not be likely to hesitate at an additional falsehood or two.

The fables additionally connected with the ass-cult, such as the fattening of a Greek every seven years for an offering to the ass-god; the attempt of Zabid of Dora to rob the Jews of this god; Tacitus' story of the finding of the water-springs by the wild asses: all of them follow from the idea that the Jews worshiped Dionysos. Everything additional is the offspring simply of the hatred that the world of antiquity bore to the Jews. For this hatred there is no explanation.

[Tacitus' story of the finding of the water-springs rests on a genuine Idumean narrative found in Gen. xxxvi. 24, according to which "'Anah (= the ass), son of Zibeon the Horite, found the hot springs (ימים) in the wilderness while feeding the asses of his father." The whole story, accordingly, points to Idumaea, where the first ass cult legend as told by Josephus ("Contra Ap." ii. 10) originated according to Mnaseas. Apollo, the god of the Idumean city of Dora, represented by Zabidus the Idumean, carrying the golden head of an ass at the battle of Dora, is Baal Anah, who probably became afterward the Gnostic god Anael. It was the identification of the Jews with the Hyksos by Manetho that occasioned the Jews to be accused of Ass-Worship—that is, Seth-Typhon worship. See J. G. Müller, "Des Flavius Josephus Schrift Gegen Apion," p. 258; Schürer, and "Gesch." i. 3, iii. 104.—K.]

ASSABAN (אצבאן), MORDECAI: Rabbi and author; born at Morocco in 1700 and died at Aleppo about 1760. He was chief rabbi of Leghorn, and emigrated to Jerusalem about 1729, where he dwelt for thirty years. He was the author of a "Widdui" (confession of sins), entitled "Zobeaḥ Todah." Assaban was renowned as a cabalist.

G. M. FR.

ASSAULT AND BATTERY: An English law term for injury to the person—a crime recognized from the earliest stages of human law. Disputes about property, about contracts, or about the rights of man in the family or in society, arose later in the course of social evolution; but from the earliest times personal injuries gave rise to disputes which had to be settled by some tribunal or arbiter.

In ancient law, redress for injuries to the body takes the form of compensation to the person wronged, not of punishment in the name of the state; and this principle is found throughout the Talmudic jurisprudence. Many nations of antiquity and the Germanic tribes as late as the earlier Middle Ages allowed even the guilt of the slayer to be atoned by the payment of "wergild"—that is, man-money—to the heirs of the slain; but here the Mosaic law calls a halt with its stern command, "Ye shall take no ransom for the life of a manslayer" (Num. xxxv. 31, R. V.).

The Law of Retaliation.

The passages of Scripture from which the law of Assault and Battery is derived are Ex. xxi. 18, 19 and 22-25; Lev. xxiv. 19, 20; Deut. xix. 21 (indirectly), and xxv. 11, 12. According to the literal interpretation these passages teach the law of retaliation: eye for eye, tooth for tooth, as the redress for mutilation or, technically speaking, mayhem; bruise for bruise, stripe for stripe, etc., as the redress for the infliction of pain; and cutting off the offender's hand as the punishment for disgracing another by violent means. It seems that the Sadducees, when in power, conformably to their love for the letter of the law in all matters, followed these passages literally. At least the Megillat Ta'anit (ch. iv.) ascribes this practise to the "Boethus men," with whom the Sadducees are often identified; and the varied efforts of many sages to give good Scriptural grounds for their own theory (B. Ḳ. 83*b*) indicate that there were some who dissented from the Pharisaic interpretation. The liability for bodily violence is stated in the Mishnah (B. Ḳ. viii. 1) as follows:

> He that injures his neighbor is liable to him on five grounds: (1) damage; (2) pain; (3) stoppage of work; (4) cost of cure; and (5) shame.

Five Grounds of Liability.

In dealing with this proposition the Gemara (B. Ḳ. 83*b et seq.*) first discusses why the literal rule of eye for eye must yield to the more humane law of compensation in money. Referring to the passage in Lev. xxiv. 17 *et seq.*, where the smiting of a man is treated along with the smiting of an animal, it is argued that, as payment is made for the latter, so payment should be made for the former, except in the special case in which the man is killed, inasmuch as the Lawgiver says (Num. xxxv. 31), "Ye shall take no ransom for the life of a manslayer"; which shows that for the murderer there is no ransom or satisfaction, but that there is a ransom for him that takes anything less than life, as, for instance, the principal limbs, which, when removed, never grow again. Again, if a blind man put out the eyes of a man possessing sight, what can be done to the offender in the way of retaliation? Nevertheless the Law says, "Ye shall have one manner of law" (Lev. xxiv. 22); hence redress must be adjudged in money against all alike. Further, stress is laid on the term "taḥat" (for, in place of) which is applied to animals, as, "he shall surely pay ox for ox" (Ex. xxi. 36), and again in the phrase "eye for [in place of] eye" (*ib.* 24); still greater stress is laid on the verb "natan" (to give), which is used in Ex. xxi. 22, where nothing but a money reward can be meant, and is again used in the rule in Lev. xxiv. 20, which literally translated reads, "as he giveth a blemish upon man, so shall it be given upon him." The interpretation of "eye for eye" being thus established to the satisfaction of the rabbis, there is no reason for them to doubt that "bruise for bruise" means money for the pain suffered, and does not mean the infliction of like pain. However, the position is strengthened by the passage in Deut. xxii. 28, 29, where he who forcibly seizes a damsel not betrothed and lies with her, is mulcted in the sum of fifty shekels, because (taḥat asher) "he hath humbled her."

The separate elements of liability are:

Damage, How Appraised.

Damage Proper (Nezeḳ): The Mishnah says the damage is appraised by ascertaining how much the person injured would have been worth as a slave in the market before the infliction of the injury and how much he is worth after it; the difference represents the damage. But if the result of the injury has been to render its victim deaf, he is considered worth nothing whatever, and the damage is accordingly equal to the whole of his former value.

Pain, "as when he has singed him with a spit or spike, even on his finger-nail, where no mark is left." Here the question arises, should the judges ask themselves (*a*) how much money would "such a man"—that is, one as strong or as delicate as the injured man—be willing to take to submit to the pain, or rather (*b*) how much would he be willing to pay to forego the pain? The former measure, though named in the Mishnah, is in the Gemara deemed inadmissible; for many people would not take all the money in the world and willingly submit to the pain: the latter measure is held to be more reasonable. Where the pain is incident to a mutilation, the judges should say: "Suppose the wounded man to have been sentenced to have his hand cut off, how much would he be willing to pay to have it taken off under the influence of a drug [an anesthetic], rather than have it rudely hacked off; and this amount would serve to represent the damage" (B. Ḳ. 85*a*).

Stoppage of Work: The Mishnah allows to the injured man his wages only as a "watcher of cucumbers"—that is, such wages as he can earn in his disabled condition—"because he has already been paid the value of his eye or the value of his hand"; for the action might be brought at once when the injury was done, and the judges would estimate the loss of time beforehand. This estimate should be paid in full, though the injured man should recover sooner than was expected (B. Ḳ. 85*b*).

An example is put, where violence may bring about stoppage of work alone, without mutilation or pain or need for cure: it is in the case of unlawful imprisonment (*ib.*).

Cost of Cure: As the Scripture says, he "shall cause him to be thoroughly healed" (Ex. xxi. 19), the inference is that the guilty party shall pay for the services of a physician. He may not offer his own services, no matter what his skill may be; nor can he avoid the outlay of money by finding a physician that will do the healing work free of charge. Should ulcers arise in consequence of a wound, the cost of healing such ulcers also falls on the assailant; but if ulcers arise from other causes—for instance, because the wounded man disregards the orders of his physician—the cost of healing these is not to be assessed. The wound may disappear and break out again and again: the cost of cure will still rest on the assailant; but if it be once fully healed (literally, "to its full need"), the liability comes to an end (B. K. viii. 1). The occasion for cost of cure may exist without any of the other elements of damage; for instance, where one has forcibly thrown chemicals upon another, giving to his skin the whiteness of leprosy, it is his duty to pay the cost of having the skin restored to a healthy color (B. K. 85*b*).

Scale of Compensation.

Shame or Humiliation: Here it is impossible to lay down hard and fast rules; for, as the Mishnah says, "it all depends on who is put to shame and who it is that puts him to shame." But for certain acts of violence that involve very little pain and no permanent disablement, but mainly disgrace, the sages fixed a scale of compensation, namely: for a stroke with the fist, one sela or shekel (nominally 60 cents); for a slap with the open hand, two hundred zuzin (1 zuz = 15 cents); for a back-handed slap, or for pulling a man's ear or hair, or tearing off his cloak or a woman's headgear, or spitting at a person if the spittle reaches his flesh, four hundred zuzin ($60 nominal) (B. K. viii. 6). A kick with the knee costs three selas; with the foot five selas; a stroke with an ass' saddle thirteen (B. K. 27*b*, Rashi *l.c.*). According to Maimonides (Yad ha-Ḥazakah, Ḥobel u-Mazzik, iii. 8-10), each slap, kick, or stroke counts separately. But he also says (following B. K. 36*b*) that these sums are not meant for the full-weight or Tyrian coins, but for the "country currency," worth only one-eighth of the Tyrian.

These liquidated damages cover only pain and shame: if sickness ensue, stoppage and cure have to be paid for separately.

Israelites to Be Treated as Freemen and Free-women.

Although R. Meïr's opinion (B. K. 86*a*), that all Israelites are to be treated as freemen and as free-women, as "the descendants of Abraham, Isaac, and Jacob," and are therefore entitled to the same compensation for disgrace, has not been accepted generally, yet where the sum has been fixed by the sages, as shown above, no reduction is made on account of the poverty or low degree or even of the lack of self-respect of the party insulted.

There is a sixth element (which arises, however, but rarely); namely, the "price of children" (Ex. xxi. 22): "If men strive together and hurt a woman with child, so that her fruit depart, and yet no mischief follow, . . . he shall pay as the judges determine." Something is to be paid over and above damage, pain, etc., which is hard to determine; for a woman delivered of her child is, generally speaking, not made the worse thereby; though in the special case she may be much debilitated. Her loss of health and strength would fall under the head of damage proper ("nezeḳ").

Another view is, however, expressed in the Mishnah to the effect that the "deme weladot," the price of the child or children that were destroyed by the miscarriage, should be paid to the husband of the woman by the man causing the damage. The standard authorities are almost silent on the subject (B. K. v. 4; Gemara, 49*a*).

Human Beings Are "Fore-warned."

A human being is always "forewarned"; that is, he is, like a "forewarned ox," liable for full damage, whether awake or asleep, whether willing or unwilling. But if a man in his sleep or unwillingly (as by falling from a roof) hurt another person, he is not liable for the "disgrace" that might result, say, if such person's clothes should be torn from him; and if A hurt B by pure accident—for instance, if he be thrown upon him from a roof by a sudden gust of wind—he is liable only for damage, but not for pain, healing, or stoppage (B. K. viii. 1; Gemara 86*b*).

Deaf-mutes, insane persons, and infants are "pegi'atan ra'ah" (bad to meet); he who hurts them is liable for full compensation; but if they commit an assault, they are not liable at all (*ib.* viii. 4). However, no compensation for shame is made to the insane (*ib.* 86*b*). When an injury is done to an infant girl, the compensation for "damage" and loss of time is payable to her father (*ib.* 87*a et seq.*).

Persons "Bad to Meet."

A married woman or a slave is also "bad to meet," as full compensation must be paid for any injury done to either of them. According to the better opinion, the assailant of a slave must pay even for the disgrace put upon him. The compensation for injury to a married woman, for pain and shame, is paid to her; for loss of work and healing, to her husband; for damage proper, according to one opinion, to her, according to another, to her husband. For an injury to a slave the whole compensation goes to the master. When an injury is done to an infant boy still at the father's board, the compensation should be invested in land, of which the father will receive the rents and profits till the boy attains full age (thirteen). When a father injures his infant daughter, he pays pain, cure, and shame to her at once, but neither damage nor loss of time. A married woman is excused from payment only because she has no property under her own control; a slave, because he can not own property: hence, when the woman, by the death of her husband or by divorce, comes to her own, or when the slave is manumitted, she or he may be sued for the injury done while under disability (*ib.* viii. 4).

When a man does an injury to his own wife, he is bound to pay her for her damage, pain, and shame at once, in such a manner as to give her the free disposition of the money. He needs not pay for loss of work; and for her healing he is bound as her husband. The wife, if she injure her husband, is liable for full compensation (Maimonides, "Yad," Ḥobel u-Mazzik, iv. 16-18). For the manner of its collection see KETUBAH.

A master is not responsible for assaults committed by his bondman or bondwoman, nor for injuries done by them to the property of another. A master injuring a Hebrew servant is liable for all the elements of damage except that of stoppage of work, that being a loss to him only (B. Ḳ. viii. 3).

Self-Defense a Justification.

Self-defense is a full justification for an assault that is not continued after the necessity has ceased. But if two men strike each other at the same time, each is liable to the other, and the excess in damages must be paid (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 421, 13).

Where one enters upon the grounds of another without his permission, the owner of the ground may order him off, and may even remove him by force; but if he strike him or harm him otherwise than in forcing him away, he is liable like any other assailant (B. Ḳ. 48*a*).

Should the injured party die before he recovers judgment for the assault, the right of action is cast upon his heirs; and in like manner if the assailant die before satisfaction is made or before it is adjudged, the action for the wrong done may be brought against the heirs, and it may be satisfied out of the estate descended to such heirs.

To this rule there is one very rare exception; namely, where one puts a disgrace upon a sleeping person (say, by exposing his nakedness), and the sleeper dies without finding it out, the action for the disgrace does not pass to his heirs (B. Ḳ. 86*b*).

The maxim of the common law, that a felony merges the civil remedy, was also known to the Rabbis. When a man strikes his father or mother so as to leave a mark ("ḥabburah"), or when he wounds any one on the Sabbath, he can not be sued for compensation; for he is deserving of death. While it was very unlikely that the offender would be put to death—for long before the days of the Mishnah capital punishment under the Mosaic law had ceased—still this excuse of the lesser offense by the greater was held good. But where the act is punishable by stripes only, such as wounding a person on the Day of Atonement, the civil remedy is available (B. Ḳ. viii. 3, 5).

The payments for damage and for pain are in the nature of penalties, and can be adjudged only upon proof by witnesses. But in the absence of witnesses the assailant can, upon his own confession, be ordered to pay for loss of work and cost of cure—which elements are in the nature of a debt—and for the disgrace suffered, on the ground that by his own confession he publishes the humiliation of his victim (Maimonides, "Yad," Ḥobel u-Mazziḳ, v. 6, 7).

Procedure in Assault Cases.

Only a court of "ordained" judges could try an action for injury to the person, according to the rules laid down above, and give judgment for a definite sum; and as judges could not be lawfully ordained, except in the Holy Land, judgments for damage and pain could not be collected, even in Babylonia (B. Ḳ. 84*a*). But, as a matter of necessity, a system was worked out which soon spread over all countries in which the Jews enjoyed any sort of autonomy. When parties complained of injuries, the judges, after hearing their allegations and the testimony of witnesses, indicated the sum that in their opinion the assailant should pay, and, upon his refusal, would threaten him with excommunication ("nidduy"); and this course would generally have the desired effect. But loss of time and cost of cure, being elements sounding in money, and not in the nature of penalties, can only be determined by judges having ordination (Maimonides, "Yad," Sanh. v. 10, 17).

Although the remedy for assaults was altogether pecuniary, yet to strike a fellow Israelite was always deemed a sinful and forbidden action. As the Law strictly forbids the giving to a convicted criminal a single blow beyond the lawful number (Deut. xxv. 3), the sages concluded that a blow given to any one, except by authority of law, was forbidden by Scripture; and they held that, though the assailant had paid all damages, he should ask forgiveness from the injured party, and that it was the duty of the injured, when earnestly entreated, not vindictively to withhold his forgiveness (B. Ḳ. viii. 7).

When damages which usually follow a striking arise without actual contact with the body of the injured person—for instance, if one frighten his neighbor, or yell into his ears in such a way as to deafen him or otherwise make him ill—the wrong-doer is "free from human judgment," but liable to the punishment of heaven (B. Ḳ. 91*a*).

These Laws Not for Gentiles.

The passages in Scripture on which the law of Assault and Battery is grounded speak of a man and his brother, or a man and his neighbor; hence they can not be and were not applied to affairs in which either party was a Gentile. Whatever redress was given in such cases by Jewish courts was only a matter of equity, or, as the Rabbis say, by reference to Prov. iii. 17, "for the sake of the ways of peace."

Bibliography: Nearly all of the Talmudic law collected in this article is to be found in the eighth chapter of Baba Ḳamma, the Gemara on which runs from p. 83*b* to 93*a*. The subject is treated by Maimonides in *Yad ha-Ḥazaḳah, Ḥobel u-Mazziḳ*, in the *Ṭur*, and in the *Shulḥan 'Aruk, Ḥoshen Mishpaṭ*, under the title *Ḥobel ba-Ḥabero*, ch. 420-424.

J. SR. L. N. D.

ASSEMBLY, THE GREAT. See Synod, the Great.

ASSER, CAREL: Dutch jurist; son of Moses Salomon Asser; born at Amsterdam, Holland, Feb. 15, 1780; died Aug. 3, 1836. He studied law and philology at the Athenæum at Amsterdam. After obtaining a doctor's degree, July 3, 1799, Asser devoted himself to the practise of law in Amsterdam; he and his friend Jonas Daniel Meyer being the first Jews to become lawyers after the establishment of the Batavian republic.

Early Success.

The defense of a certain Mascel of Dordrecht, accused of blasphemy for having manifested doubts concerning the divinity of Jesus and the Trinity, brilliantly conducted by Asser and Meyer, drew upon the young men the attention of M. C. F. van Maanen, chief attorney and, later, minister of justice.

In spite of his absorbing professional duties, religious matters did not fail to receive Asser's consideration. When he was only sixteen, he and his father shared in the founding of the Felix Libertate, a society which had for its aim the emancipation of the Dutch Jews; and he was among the signers of a petition to the States General (March 26, 1796), praying for their emancipation. This step was vigorously opposed by Daniel Cohen d'Azevedo, rabbi of the Portuguese, as well as by Jacob Moses b. Saul Löwenstamm, rabbi of the Ashkenazim, who were afraid that political emancipation would result in the disintegration of Judaism. As a result, the National Assembly passed a law conferring on them citizens' rights. In the struggle that now began between the Orthodox party, led by the rabbis, and the more progressive generation of the community, Asser took a prominent part; and when the differences led finally to the formation of a new congregation, Adat Jesurun, he became a leading member.

Active in Jewish Community.

In Public Office.

In 1807 Asser was one of three delegates sent by the new congregation to the Sanhedrin in Paris. On his return home he was commissioned by Napoleon to write a report of the condition and wishes of the Jews in Amsterdam, having regard to the possibility of the reunion of the two congregations. On the recommendations contained in this report, a central consistory for the Jews in Holland was authorized by royal decree Dec. 17, 1808. In the same year Asser was appointed director of the second division of the Ministry of Public Worship, and in the following year, after the abrogation of that office, he became chief of the bureau in the Board of Accounts. In 1811 Asser was made justice of the peace in the first district of Amsterdam, and soon became an authority in matters relating to the office. He translated from the French J. J. Barbedette Chermelais' work, "Traité des Attributions des Juges de Paix" (2 vols., 1812), which exerted great influence in Holland.

In the mean time he had become a member of the consistory of Amsterdam; and after Holland had regained her independence (1813), he was appointed a member of the commission to draft regulations for the Jewish community.

For twenty-one years Asser held the post of referendary of the first class in the Department of Justice at The Hague, to which he was appointed in 1815; and for five years before his death he performed the duties of secretary to the Department of Justice. The decoration of the Order of the Netherlands Lion was conferred upon him.

His Works.

His wife was Rose Levin, sister of the well-known Rahel Varnhagen von Ense. For the latter he wrote "Précis Historique sur l'Etat des Israélites du Royaume des Pays-Bas," 1827, a historical review of the condition of the Jews in Holland, not yet published. Asser was also the author of the following works: "Verhandeling over de Verantwoordelijkheid der Ministers, volgens het Nederlandsche Strafregt," The Hague, 1828, an anonymous treatise on the responsibilities of ministers according to Dutch constitutional law; "Apologie de la Peine de Mort," Brussels, 1828; "Verhandeling over de vraag, of bij het Wetboek van Strafregt tegen het snoeijen van geldmunten straf is bepaald?" The Hague, 1836, a treatise on the penalty attached to the clipping of coin; and "Vergelijkend overzigt tusschen het Fransche en Nederlandsche Burgerlijk Wetboek." The last, his largest work, was published after his death by his son Louis Asser and his nephew C. D. Asser.

s. J. Vr.

ASSER, CAREL: Dutch jurist and scholar; born at The Hague, June 1, 1843; died at Leyden, Dec. 10, 1898. He was a son of Louis Asser, judge of the district court at The Hague, and grandson of Carel Asser, referendary in the Department of Justice at The Hague. He received his education at the gymnasium in his native city, and at the University of Leyden, obtaining a doctor's degree at the age of twenty-three. Appointed judge of the district court of The Hague in 1878, he retained the position until 1892, when he was made professor of civil law at the University of Leyden. The estimation in which he was held by the Dutch government is shown by the fact that he was appointed on a commission to investigate the need for the revision of the national statutes and to prepare a plan for this purpose. Asser married a Christian, but he remained in touch with the Jewish community and continued to display an interest in his coreligionists.

Among Asser's works are: His doctor's dissertation, "De Telegraphie en hare regtsgevolgen," 1866 (awarded a gold medal by the Gröningen University); "Wetenschap en Wetgeving," 1892; and "Handleiding tot de beoefening van het Nederlandsch Burgerlijk Recht," an unfinished work on civil law. He also contributed to periodicals many technical articles of legal interest. Asser was not only known as a scholar and writer, but also as a musician.

Bibliography: *Students' Almanak*, Leyden, 1900.

s. J. Vr.

ASSER, MOSES SALOMON: Dutch jurist; born in Amsterdam Aug., 1754; died there Nov. 4, 1826. Although originally intended for trade, he took up the study of commercial law; and so successful was he in his new career, that on becoming procurator in Amsterdam he gained the reputation of being one of the best lawyers in Holland. In 1798 he was appointed member of the legislative commission which met in Amsterdam for the purpose of readjusting the laws of Holland to the new conditions arising from the change of the United Provinces into the Batavian Republic, under the protectorate of France. In 1808, when Napoleon insisted upon the adoption of his code throughout his dependencies, Asser, together with Johannes van der Linden and Arnoldus van Gennep, was commissioned by King Louis Bonaparte to draft a commercial code as a part of the uniform system of laws projected for the kingdom.

Soon after the Restoration Asser took an active part in the commission of 1814; and his work ultimately formed the basis of the commercial code of 1838, the greater part of which is still in force. In recognition of his services he was decorated by William I. in 1819 with the Order of the Netherlands Lion, being the first Jewish recipient of such a distinction.

Asser was the founder of the Felix Libertate—a society having for its object the emancipation of the Jews—and the author of the memorial addressed to the States General, March 26, 1796, urging the removal of Jewish disabilities. A leader of the opposition which resulted in the splitting up of the Jewish community of Amsterdam, Asser's name was the first mentioned at the election of wardens by the members of the new community, Adat Jesurun. He took an active part in the progressive movement, at the head of which stood his son Carel (see ASSER, CAREL).

S. A. S. C.

ASSER, TOBIAS MICHAEL CAREL: Dutch jurist; born at Amsterdam April 28, 1838. His father was Carel Daniel Asser (1813–85). His mother was a sister of Godefroi, Dutch minister of Justice.

Asser studied jurisprudence at the Athenæum at Amsterdam, and as early as 1857 was awarded the gold medal offered as a prize by the university at Leyden for a competitive thesis on "Over het Staathuishoud kundig begrip van Waarde" (On the Economic Conception of Value). In 1860 he received a doctor's degree, after defending his dissertation on "Het Bestur der Buitenlandsch betrek kingen volgens het Nederlandsche Staatsrecht." In the same year the government appointed him a member of the international commission to negotiate concerning the abolition of tolls on the Rhine. He wrote on the subject the following two pamphlets: "Iets over den Ryntol" and "De Kluisters van den Rijn," in "De Gids," 1861.

Appointed Professor of Jurisprudence.

In May, 1862, he was called to the chair of jurisprudence at the Athenæum, and delivered an inaugural address on "Handelsrecht en Handelsbedrijf." When the Athenæum became a university (1876), Asser continued his teaching there; though, in order to retain his practise as attorney to a number of trade companies, he remained only in the capacity of extraordinary professor of the department of international and commercial law. From 1862 Asser took an active part in conferences on international law, and, together with Rolin Jacquemyns, afterward Belgian minister of the interior, and the English jurist, John Westlake, he founded, in 1869, the "Revue de Droit International," which he edited. In 1875 he became assistant secretary of state, and performed the duties of the office, along with those of his professorship, until May 5, 1893, when he was appointed member of the Council of State, the highest body in the Dutch administration. The high estimate of Asser's authority in the domain of international law is attested by the fact that he is permanent chairman of the diplomatic congress on international civil law, established chiefly through his instrumentality. Asser was delegate to the Peace Conference held at The Hague in 1899, in consequence of the appeal made by Czar Nicholas II., and presided over the second division of the second section. He has been the recipient of the following decorations, viz.: Cross of a Commander of the Order of the Netherlands Lion; of the Order of Orange-Nassau; and of the Baden Order of the Lion of Zähringen; Order of the Crown of Italy; and the Luxemburg Order of the Oak Crown. He is also officer of the Belgian Order of Leopold, and Knight of the Legion of Honor.

Member of Council of State.

Delegate to Peace Conference.

His wife is the daughter of Louis Asser, only son of the elder Carel Asser, and sister of Prof. Carel Asser of Leyden.

Besides the works already mentioned, Asser has written "Législation Uniforme sur la Lettre de Change," 1864; and "Handelsrechtelyke Aanteekeningen," "Remarks on Commercial Law," 1868–69; and has contributed many articles to legal journals. But his two principal works are "Schets van het Internationaal Privaatrecht," 1879; and "Schets van het Nederlandsch Handelsrecht," 1873. The first of these has been translated into nearly every European language, and the last reached its seventh edition in 1897.

ASSESSMENT OF TAXES. See FINTA, REVENUE OF.

ASSHUR.—Biblical Data: Name of a city once the capital of Assyria. Asshur was apparently the first important town built by the early colonists of the country, who probably came from Babylonia. One of the earliest known rulers of Assyria, Shamshi-Adad I. (about 1820 B.C.), erected in the city of Asshur a temple dedicated to Anu and Adad; and Asshur may be regarded as having been, even at that early date, the capital of the newly founded principality of Assyria. About 1300 B.C. the capital was removed by Shalmaneser I. to Calah, and two centuries later the supremacy of Asshur had vanished so completely that the city had to be rebuilt when Tiglath-pileser I. again made it the capital. When the capital was finally removed to Nineveh, the city fell into an honorable decay, revered as the ancient metropolis, and dignified as the site where the national god Asshur had his famous temple E-Kharsag-Kurkurra. The city is now buried beneath a mound known as Kalah Shergat on the Tigris, which here divides into three arms. The ruins of its ancient temple rise high above the remaining mound, and have been slightly pierced by excavations undertaken especially by Rassam and Ainsworth; but the site has never been systematically explored. See ASSYRIA and the bibliography there given.

J. JR. R. W. R.

——**In Rabbinical Literature:** Asshur was one of the few pious men of the generation of the Tower of Babel. In order to avoid participation in that sinful project, he left the land of his fathers and settled in the neighborhood of Nineveh, in reward for which action he received the cities mentioned in

Gen. x. 11, 12 (Gen. R. xxxvii. 4). The Targum Yerushalmi on the passage considers the name "Asshur" not as that of a person, but as meaning "Assyria," and takes "Nimrod" to be the subject of the sentence. See Ginzberg, "Die Haggada bei den Kirchenvätern," pp. 88, 89.

J. JR. L. G.

ASSHURITES.—Biblical Data: A nation descended from Abraham and Keturah (Gen. xxv. 3). In prophetic literature the nation is mentioned as being engaged in making benches of ivory for Tyre (Ezek. xxvii. 6). The Asshurites in II Sam. ii. 9 can not refer to the same people as Gen. xxv. 3, or to the Assyrians. Either we have here a text corruption for Geshurites (Ewald, Wellhausen), or the name is to be explained according to Targum Jonathan as the Asherites.

J. JR. G. B. L.

——In Rabbinical Literature: The Palestinian exegetes consider Asshurim, and also Letushim and Leummim in the passage Gen. xxv. 3, to be appellatives of the nations recorded as the children of Dedan; and explain Asshurim as "merchants," or more exactly as "those who travel with their wares from place to place" ("ashur" = footstep). Similarly, Letushim are those who sharpen weapons, from "laṭash," to whet; Leummim are the chiefs of peoples ("leüm" = people), or island-inhabitants (Targumim on the passage Gen. R. lxi. 5). In the Onkelos passage, according to Jerome, *ad loc.*, שכנין (for שכונין) should be read (see Ginzberg, "Haggada bei den Kirchenvätern," p. 117).

J. SR. L. G.

ASSI (Assa, Issi, Jesa, Josah, Jose, sometimes רבס׳, a contraction of Rab or Rabbi Assi): A prænomen of several amoraim, which, with its variants, is a modification or diminutive of "Joseph" (compare Bacher, "Ag. Tan." ii. 371; "Ag. Pal. Amor." ii. 151, 8).

Name.

"Assi" is of Babylonian origin, while other forms are Palestinian. Hence in the Babylonian Talmud, except in cases of clerical error, "Assi" is the only form used; whereas in the Palestinian Talmud and Midrashim all forms are used indifferently, two or even more appearing in a single passage (for instance, Yer. Kil. ix. 32*b*) or in parallel passages (compare Yer. 'Er. vi. 23*d*; Yer. Sheḳ. ii. 46*d*, vii. 50*c*; Yer. Naz. iv. 53*b*). As to the bearers of the name, most of those having additional patronymics or cognomens are better known by the appellation of Jose. The two that are best known by their simple prænomen, without further designation, are considered here. Great care is requisite in determining the authorship of doctrines and sayings bearing the above name. Both the Assis are halakic authorities, are native Babylonians, and are cited in both Talmudim, and they flourished within about half a century of each other. They can therefore be distinguished only by observing the persons with whom they are associated or who transmit their opinions. Thus, where Assi appears in company with Rab, with Samuel, or with their contemporaries, Assi I. is meant; but where the associates are members of a later generation, it is Assi II. Again, where Huna I., Judah b. Ezekiel, or their contemporaries or predecessors cite the name, it is Assi I.; but where their disciples, or their younger contemporaries or successors (particularly in the Palestinian Talmud and Midrashim) report, it is most frequently Assi II. Where, finally, none of these landmarks is present, a positive determination is well-nigh impossible, nor can the presence or absence of the titles Rab and Rabbi, on which (according to Tos. Ḥul. 19*a*, *s.v.* Amar) many rely, be accepted as a clue.

Assi (Assa, Issi) I., Rab: A Babylonian amora of the first generation, third century; contemporary of Rab (Abba Arika) and his equal in dialectics, though inferior to him in general knowledge of the Halakah (Sanh. 36*b*).

Status.

But even in the latter branch Rab manifested great deference for Assi's opinions, often adopting these in preference to his own (Meg. 5*a*; Ḳid. 45*b*; Sanh. 29*b*; B. B. 62*a*). Socially, also, Rab treated Assi as an equal (Shab. 146*b*). Mar Samuel, also, treated Assi with great respect (B. Ḳ. 80*a et seq.*). Rab Assi is better known in the field of the Halakah than in that of the Haggadah, where he is found in association with Kahana and putting questions to Rab (Giṭ. 88*a*; compare Lam. R., Introd. 33; Yoma 10*a*).

According to a Talmudic narrative combining fact and fiction, Assi's end was precipitated by grief.

Death.

Commissioned by his dying teacher and friend, Rab, to bring about Shela b. Abuna's retraction of a certain decision on the ritual, Assi visited the latter, when the following conversation took place: Assi: "Retract thy decision because Rab has retracted his opinion on which thy decision was based." Shela: "Had Rab renounced his opinion he would have told me so himself." Assi, misunderstanding the instructions of Rab, thereupon excommunicated his colleague. Shela: "Does the master not fear the fire for abusing a scholar?" (compare Ab. ii. 10.) Assi: "I am a mortar ["Asita," a play on his name] of brass, over which decay has no power." Shela: "And I am an iron pestle that may break the brass mortar." Assi soon after sickened and died; whereupon Shela, to prevent his adversary from carrying evil reports of him to Rab, prepared his own shroud and died also. At the double funeral it was observed that the myrtle branches which lay on the two biers leaped from one to the other, whence it was inferred that the departed spirits had become reconciled (Niddah 36*b et seq.*; the names Isi b. Judah, etc., used in Assi's reply to Shela are a glossator's interpolation borrowed from Pes. 113*b*). Of Assi's last hours the Midrash relates the following: As Rab Assi was about to depart from this world, his nephew entered the sick-room and found him weeping. Said the nephew: "My master, why weepest thou? Is there any part of the Torah which thou hast not learned or taught? Look at the disciples before thee. Is there any one good deed that thou hast not practised? And does not above all thy noble traits stand the fact that thou hast never acted as judge and hast never permitted thyself to be appointed to public office?" Then answered Rab Assi: "My son, this is just the reason why I am weeping. Perhaps I shall be required to answer for being able to administer justice and not doing so, thus exemplifying in myself what the

Scripture means by saying (Prov. xxix. 4), 'The king by judgment establisheth the earth; but the man that holdeth himself aloof ["terumah" = separation] overthroweth it'" (Tan., Mishpaṭim, 2). Some writers regard this scene as occurring at the death of Assi II.; but the concluding words of the visitor's address, as well as the dying teacher's reason for his anxiety, are entirely inconsistent with the career of Assi II., whose activity as judge is a prominent feature of his life. (Yer. Shab. i. 3*a*; Yer. Sheḳ. vi. 50*b*; Yer. Suk. i. 52*a*; Yeb. 16*b*; Ned. 21*b*; Yer. Ned. iii. 37*d*; Yer. Giṭ. ix. 50*d*; B. B. 126*a*; Shebu. 26*a*, 41*a*; Ḥul. 19*a*, 20*a*).

Bibliography: Heilprin, *Seder ha-Dorot*, ii. s.v.; Weiss, *Dor*, iii. 97, *ib.* 154; Halevy, *Dorot ha-Rishonim*, ii. 228.

Assi (Assa, Issi, Jesa, Josah, Jose) II., R.: A Palestinian amora of the third generation, third and fourth centuries; one of the two Palestinian scholars known among their Babylonian contemporaries as "the Palestinian judges" and as "the distinguished priests of Palestine," his companion being R. Ammi (Giṭ. 59*b*; Sanh. 17*b*). Assi was born in Babylonia, where he attended the college of Mar Samuel (Yer. Ter. i. 40*a*; Yer. 'Er. vi. 23*d*), but later emigrated in consequence of domestic trouble. On his arrival in Tiberias, Assi had an adventure with a ruffian, which ended disastrously for the latter. Assi was making his way toward the baths, when he was assaulted by a "scorner." He did not resent the assault, except by remarking, "That man's neck-band is too loose," and continued on his way. It so happened that an archon was at that very hour trying a thief, and the scoffer, still laughing at the adventure with Assi, came to witness the trial just when the judge interrogated the culprit as to accomplices. The culprit, seeing the man laughing, thought that it was at his discomfiture, and to avenge himself pointed to the ruffian as his accomplice. The man was apprehended and examined. He confessed to a murder he had committed, and was sentenced to be hanged with the convicted thief. Assi, on returning from the baths, encountered the procession on its way to the execution. His assailant on seeing him exclaimed, "The neck-band which was loose will soon be tightened"; to which Assi replied, "Thy fate has long since been foretold, for the Bible says (Isa. xxviii. 22), 'Be ye not scorners lest your bands be made strong'" (Yer. Ber. ii. 5*c*).

Legend, etc.

Assi became a disciple of R. Johanan, and so distinguished himself that R. Eleazar called him "the prodigy of the age" ("mofet ha-dor"; Ḥul. 103*b*), and as such legend pictures him. Concerning the futile longings of many to communicate with the departed spirit of R. Ḥiya the Great, legend relates that R. Jose fasted eighty days in order that a glimpse of R. Ḥiya might be granted him. Finally the spirit of the departed appeared; but the sight so affected R. Jose that his hands became palsied and his eyes dim. "Nor must you infer from this," the narrator continues, "that R. Josah was an unimportant individual. Once a weaver came to R. Johanan and said, 'In a dream I have seen the skies fall, but one of thy disciples held them up.' When asked whether he knew that disciple, the weaver replied that he would be able to recognize him. R. Johanan thereupon had all his disciples pass before the weaver, who pointed to R. Josah as the miraculous agent" (Yer. Kil. ix. 32*b*; Eccl. R. ix. 10). Another adventure, which, however, bears the impress of fact, is related of him, wherein he was once abducted in a riot and given up as lost, but R. Simon ben Lakish, the former gladiator, rescued him at the risk of his own life (Yer. Ter. viii. 46*b*).

Assi's professional career in Palestine is so closely intertwined with that of R. Ammi that the reader may be referred to the sketch of the latter for information on that subject. R. Assi was very methodical in his lectures, making no digressions to answer questions not germane to the subject under discussion; and whenever such were propounded to him, he put off reply until he reached the subject to which they related (Yer. Shab. xix. 16*d*; Yer. 'Er. vi. 24*a*).

Wisdom of Assi; His Death.

R. Assi is frequently quoted in both Talmudim and in the Midrashim. Profound is his observation: "At first the evil inclination is like a shuttle-thread (or spider-web), but eventually it grows to be like a cart rope, as is said in the Scriptures (Isa. v. 18), 'Wo unto them that draw iniquity with cords of vanity, and sin as if it were with a cart rope'" (Suk. 52*a*). An anecdote characteristic of rabbinical sympathy for inferiors and domestics is thus related: The wife of R. Jose had a quarrel with her maid, and her husband declared her in the wrong; whereupon she said to him, "Wherefore didst thou declare me wrong in the presence of my maid?" To which the rabbi replied, "Did not Job (xxxi. 13) say, 'If I did despise the cause of my manservant or of my maidservant, when they contended with me, what then shall I do when God riseth up? And when He visiteth, what shall I answer Him?'" (Gen. R. xlviii. 3). When Assi died, R. Ḥiya b. Abba, who had been his associate as judge and as teacher, went into mourning as for a relative (Yer. Ber. iii. 6*a*). The day of his death is recorded as coincident with a destructive hurricane (M. Ḳ. 25*b*).

The suggestion may here be offered that R. Assi, before his emigration to Palestine, was known as Assi (Issi, Jose) b. Nathan, the one that is met with in an halakic controversy with Ulla (b. Ishmael, Ber. 62*a*), propounding a ritual question to Ḥiya b. Ashi (Shab. 53*a*), and seeking an interpretation of a Baraita from the mouth of Rab Sheshet (Ned. 78*a*; B. B. 121*a*).

Amor.* ii. 143-173 (here some sayings of Assi I. are attributed to Assi II.); Halevy, *Dorot ha-Rishonim*, ii. 232.

J. SR. S. M.

ASSIGNMENT: According to common law, "the transferring and setting over to another of some right, title, or interest in things in which a third party, not a party to the assignment, has a concern and interest" (J. Bacon's "Abridgment," p. 329). Strictly speaking, according to Jewish law there can be no Assignment of claims or rights in a thing, but only an Assignment of the thing itself (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 66, 1). In this respect the early Jewish law and the common law agree, although they differ in their reason for the rule.

The common law assigns as a reason that to allow the granting or Assignment of a "chose in action" (a right to receive, or recover a debt, or money, which can not be enforced without action) to a third person would be the occasion of multiplying contentions and suits. According to the Jewish law, the relation of debtor and creditor gives the latter rights against the person of the former (*jus in personam*) secured by rights against his property (*jus in rem*). The right of the creditor to seize the person of the debtor can not be assigned; and the debtor is justified in resisting the claim of the creditor's assignee, upon the ground that he, the debtor, was willing to give his creditor certain rights against his person which he would have refused to give to the creditor's assignee (Me'irat 'Enayim to Ḥoshen Mishpat, *l.c.* 23).

Originally a "sheṭar" (an instrument in writing) of indebtedness was not assignable, according to Biblical law, because it is not a thing, but merely evidence of a right (Maimonides, "Yad," Mekirah, vi. 12). With the beginning, however, of commercial life, the strictness of this ancient rule of law had to be modified. Therefore, if the Assignment of the claim was made by the creditor in the presence of the debtor and assented to by him, it was valid (Giṭ. 13*b*). This rule, however, was felt to be a concession, and could not be used as a basis for the further extension of this principle (Mekirah, vi. 8). If the debt which had thus been assigned in the presence of all three parties interested was secured by a sheṭar, it was held, even by the later authorities, that, although the Assignment was valid, the assignee could not compel the creditor to deliver the sheṭar to him (Ḥoshen Mishpat, *l.c.* 19); although if the debtor paid the assignee, he (the debtor) could compel the creditor to surrender the sheṭar (*ib.*).

Method of Assignment.

The sheṭar of indebtedness can be assigned only by "writing and delivery"; that is to say, it must be delivered by the creditor to his assignee together with another instrument in writing, setting forth the fact of the Assignment (*ib.* 1; and see the cases mentioned in §§ 2, 3, 4, 5, 13).

This question was debated in the Talmud; and the opinions of the authorities differed to such an extent that the question as to what constituted a valid Assignment was long left in doubt. Rabbi Judah ha-Nasi was of the opinion that the mere delivery constituted a valid Assignment of the sheṭar (Sanh. 31*a*); and the amora Amemar was of the same opinion (B. B. 77*a*). The majority of the sages, however, were of the opinion that a sheṭar could not be legally assigned without writing (*ib.* 76*a*), the reason for which is given by Rab Ashi, who called attention to the fact that there was a great difference between the sheṭar of indebtedness and other things, because a sheṭar is, after all, only a promise to pay—mere words—and "words can not be acquired by words"; they must be written down (*ib.* 77*a*). According to Rab Papa, the instrument of Assignment must contain these words, "acquire it [the sheṭar of indebtedness] and all rights under it" (Ḳid. 47*b*).

Maimonides sums up the matter thus: A sheṭar of indebtedness can not be assigned merely by delivery to the assignee, because the sheṭar is simply evidence of a debt; it is not the thing itself; and "evidence" can not be lawfully acquired by the process of manual seizure (Mekirah, vi. 10). The mere intention, therefore, to transfer or assign a claim or contract, and the actual delivery of the instrument, which was the best evidence of the claim or contract, do not suffice to give the assignee title; and the law required a formal Assignment in writing. Thus, early in the Talmudic era are encountered the underlying principles of the law relating to negotiable instruments which occupies so large a part of modern legal systems, and has such an important bearing on modern commercial activity.

Classification of Assignments.

In the case of a sheṭar of pledge, where the debtor has given the creditor possession of a piece of land as a pledge or security for a debt (the creditor to repay himself out of the fruits of the land), and has accompanied the delivery of the land by an instrument setting forth the debt and the fact that the land is pledged for it, this instrument or sheṭar may be assigned in the same manner as a simple sheṭar of indebtedness. This rule, however, was modified by the Geonim to this extent, that if the creditor gives the assignee a written instrument setting forth the Assignment, and also gives him possession of the pledged, or, as we should say in modern legal phraseology, mortgaged land, the Assignment is valid even though he retain possession of the original sheṭar of pledge (Ḥoshen Mishpat, *l.c.* 8).

In the case where movable property is pledged for the debt, the rule is still further modified, so that the debt may be assigned simply by transferring to the assignee possession of the movables pledged; and this constitutes a valid Assignment of the debt, even though the sheṭar of pledge be not delivered or any instrument in writing given to the assignee (*ib.*).

A woman who owns a sheṭar and who afterward marries and delivers the sheṭar to her husband as part of her marriage portion, need not execute an instrument of Assignment to him (*ib.* 12).

Where a sheṭar of indebtedness is assigned by the creditor on his death-bed, the usual formalities are dispensed with (*ib.* 42). This modification of the rule was made in order that the sick man might not be distressed by doubts as to the legality of the Assignment thus made by him, and that he might be comforted by the assurance that his purpose, although not expressed with the usual legal formalities, would be carried out (B. B. 147*b*).

A further modification of the rule exists in the case where the creditor, in addition to assigning the sheṭar of indebtedness, also transfers real estate to his assignee, the transfer of the real estate and the Assignment of the instrument being simultaneous. Rab Huna was of the opinion that the title to the instrument passed to the assignee without a deed of Assignment, provided that the title to the land passed lawfully to him at the same time (B. B. 77*a et seq.*; Mekirah, vi. 14); and although there were some opinions to the contrary among the later authorities, the Shulḥan 'Aruk states this rule of Rab Huna to be the law; provided, according to Rabbenu Asher, the assignor uses the words, "acquire this sheṭar and all rights under it," at the time when he hands it to the assignee, and when, at the same time, the assignee is acquiring possession of the land (Ḥoshen Mishpat, 66, 10; see Sifte Kohen, *ad loc.* 26).

As stated above, the essential words of Assignment are "acquire it and all rights under it." The following form: "I, ———, sell to you, ———, this sheṭar of indebtedness against ———, and all rights under it," is suggested in Me'irat 'Enayim to Ḥoshen Mishpaṭ, *l.c.* 1).

Where the original sheṭar of indebtedness contained the words, "I am indebted to you and to any one producing this," it was equivalent to a modern instrument of indebtedness made payable to bearer, and could be assigned by delivery without writing (gloss on Ḥoshen Mishpaṭ, *l.c.*).

Defective Assignment.

In case the Assignment is defective—as, for instance, where the instrument is delivered to the assignee without any accompanying writing—and the assignee has paid its value to the assignor, he is entitled to have the Assignment set aside, and have his money refunded to him; and he may retain possession of the sheṭar until the money is refunded. In case the assignor is unable to refund to the assignee, the money is taken from the debtor and paid over to the assignee, even though the latter has not lawfully acquired the instrument (gloss, *ib.*). If the assignor has undertaken to guarantee the payment of the sheṭar in case the assignee is not able to collect it from the debtor, he is bound by his guarantee, even though the Assignment has not been legally perfected (gloss, *ib.*).

Lost Deed of Assignment.

If the assignee has lost the deed of Assignment, but still has possession of the original document of indebtedness, he must prove the Assignment: if the debtor claims that he has paid the debt, he may call upon the creditor to take an oath. If the creditor swears that the debt has not been paid, the debtor is obliged to pay the assignee. If the creditor refuses to take the oath, the debtor is released and the creditor must pay the assignee. If the creditor be dead at the time when the assignee claims payment from the debtor, the heirs take the "oath of heirs" (that their father has not told them that the debt was settled), and the debtor must pay the assignee (Ḥoshen Mishpaṭ, *l.c.* 11).

In case the assignee claims that the deed of Assignment was lost, but that a valid Assignment had been made to him by the creditor, and the creditor meets this by taking an oath that there was no Assignment, both the debtor and the creditor are released (*ib.*).

If the sheṭar has been properly assigned, the assignor can not raise the claim of "overreaching" (see ACCEPTANCE) on the ground that the price paid for it was inadequate. Some authorities, however, are of the opinion that if the inadequacy of consideration amounts to a sum greater than half the value of the sheṭar, the Assignment may be set aside on that ground (*ib.* 38).

Assignments in Gentile Courts.

A sheṭar executed in a non-Jewish court of law, but drawn so as to be valid according to Jewish law, may be acquired by writing and delivery in the same manner as a sheṭar executed under rabbinical supervision; and likewise, a deed of Assignment drawn in a non-Jewish court, if it contains language equivalent to that required by the Jewish law, is valid (*ib.* 6).

Release of Debtor by Assignor.

The privity of contract existing between the original debtor and creditor is not transferable, and although the creditor is allowed, under certain regulations, to transfer the right in the claim which he has against the debtor, the original relation of debtor and creditor is not entirely dissolved; and according to the opinion of Samuel, the creditor or his heirs may, in spite of the fact that he has sold and assigned his claim, release the original debtor. If he does exercise this right, he is responsible to his assignee not merely for the amount which the assignee paid to him in consideration of the Assignment, but for the entire amount of the debt set forth in the sheṭar which has been assigned (Ket. 85*b et seq.*; Ḥoshen Mishpaṭ, *l.c.* 23, 32).

Maimonides is of the opinion that this right of the creditor to release the debtor continues, because the right to assign the sheṭar is merely the result of rabbinical legislation, which modified but did not repeal the older Biblical law, according to which a sheṭar is not assignable (Mekirah, vi. 12).

Rabbi Abraham ben David (RABaD II.) is of the opinion that the reason for this right of the creditor to release the debtor consists in the fact that the privity of contract which exists between them is non-assignable. The debtor may say that he contracted the debt only with the creditor, and not with any third person to whom the creditor may choose to assign the claim; and therefore, if the Assignment is made without the consent of the debtor, it has not perfect legal effect. For instance, the assignee can not levy upon the property of the debtor which is no longer in the debtor's possession, but which has been transferred to a third person, whereas the original creditor would have had this right (Rabad on Mekirah, *l.c.*).

Rabbi Jacob Tam assumes the following legal fiction for the purpose of explaining the right of the creditor to release the debtor after he has assigned his claim:

The creditor has a double right against the debtor—a right to seize his person and a right to levy on his property. The right to levy on his property is subsidiary, the property being simply surety for the person; but the right of property is assignable, and the right against the person is not assignable: hence the creditor may release the debtor because he still retains the right to the debtor's person. Since by such release he practically releases the debt, it cuts the ground from under the feet of the assignee, who by the Assignment became owner merely of the subsidiary right against the creditor's property (Asheri to Ket. 85, 86).

According to some later authorities, the creditor can not release the debtor if the creditor is without means and unable to reimburse his assignee; and they hold that the debtor is responsible to the assignee in the first place, because the assignee is the creditor of his creditor. They invoke the rule of Rabbi Nathan: "If A has a claim against B, and B has a claim against C, take the money from C and give it to A" (Ket. 19*a*); but other authorities deny this application of the rule of Rabbi Nathan (Frankel, "Der Gerichtliche Beweis," p. 375).

In order to provide against the danger of a release of the original debtor by the creditor in disregard of

Declaration of No Set-Off.

the rights of the assignee, it was ordained that at the time of the Assignment the assignee must ask the debtor to give him a sheṭar directly acknowledging him to be the creditor, or to acknowledge him as creditor by the ceremony of Ḳinyan, or in the presence of two witnesses. This procedure was equivalent to a declaration on the part of the debtor that he had no set-off to the creditor's claim; and it prevented him from afterward setting up a release of the claim by the creditor, as against the claim of the assignee. No agreement between the creditor and assignee could bind the debtor, unless the latter joined in any one of the methods which are mentioned above (Ḥoshen Mishpaṭ, *l.c.* 23).

Although the law provides that the creditor must reimburse his assignee in case he has released the debtor, yet, if the debtor refuses to pay the assignee, in reliance on political protection, or on the plea that he is too poor, or on the claim that the sheṭar is a forgery, the creditor is not obliged to reimburse the assignee, because, even though the creditor had not released the debtor, the assignee would not have been able to collect the claim because of the other defenses set up by the debtor (*ib.* 33).

In the following cases the creditor loses the right to release the debtor:

(1) If the Assignment is made in the presence of the debtor (*ib.* 29).

Loss of Right to Release.

(2) If the debtor acknowledges the assignee to be his creditor (*ib.* 23).

(3) If the debtor himself executes a sheṭar in favor of the assignee (*ib.*, based on Ket. 86*a*).

(4) If the original sheṭar of indebtedness reads that the debtor is bound to his creditor *or his assigns* (Rabad to Mekirah, vi. 12, based on Giṭ. 13*b*).

(5) If the creditor is in possession of a pledge which at the time of the Assignment he gives to the assignee (Ḥoshen Mishpaṭ, *l.c.* 30).

(6) If the creditor is a married woman who has brought the sheṭar of indebtedness to her husband as a part of her marriage portion (*ib.* 28).

(7) If the creditor is a non-Jew and he assigns the sheṭar to a Jew. The reason assigned is that, according to the law of the Gentiles, the creditor has no right to release the debtor (*ib.* 25).

(8) If the creditor assigns the sheṭar on his deathbed, his heir loses the right to release the debtor. The reason given in this case is that the sick man may die in peace, knowing that his will will be carried out (*ib.* 27).

(9) If the assignee assigns the sheṭar to another, or reassigns it to the assignor, he can not release the original debtor, because the privity of contract existing between the original debtor and creditor does not exist between the original debtor and the creditor's assignee; and therefore, when the latter has assigned the claim to a second assignee, he has no such interest as will enable him to release the debtor (*ib.* 31).

The following is the form commonly used for a deed of Assignment of an instrument of indebtedness ("sheṭar mekirat sheṭar ḥob"):

Form of Deed of Assignment.

A memorial of the testimony deposed before us, the witnesses hereunto subscribed this ——— day of ———, in the year ———. There appeared before us A, the son of B, and he said unto us, "Be ye witnesses that I have sold unto C, the son of D, this instrument of indebtedness against E, the son of F, absolutely and freely; and that henceforth neither I nor my heirs or representatives have any rights in this instrument of indebtedness against E, the son of F; but that it henceforth belongs absolutely to C, the son of D, and his heirs, together with all rights under it, and that no man shall hinder him therein." And, furthermore, the said A, the son of B, said unto us, the subscribing witnesses, "I bind myself under penalty of the ban of excommunication, and by the oath of the law, as to a completed contract which can not be disturbed or set aside, made publicly, and especially for the benefit of C, the son of D, who buys this instrument of indebtedness, that neither I nor my heirs will give any acquittance or release to the debtor or his heirs for any portion of the debt, under this instrument of indebtedness; and this shall not be considered an Asmakta or a mere form"; and thereupon we (the witnesses) took Ḳinyan of A, the son of B, for all that is above set forth, by the use of a garment by means of which Ḳinyan may lawfully be taken. And all is established and fixed and determined.

(Signed by two witnesses.)

ASSING, DAVID ASSUR (generally known as **David Assing**): German physician and poet; born at Königsberg in 1787; died April 25, 1842. He studied at the universities of Tübingen, Halle, Vienna, and Göttingen. He received his doctorate from the University of Göttingen Aug. 26, 1807 (according to some authorities, from Königsberg University); his thesis being "Materiæ Alimentariæ Lineamenta ad Leges Chemico Dynamicas Adumbrata" (Foods and Their Relation to Chemico-Dynamical Laws). This was published at Göttingen in 1809. Three years later he went to Hamburg with the intention of settling there as a practising physician; but hardly a year passed before the war occurred for the liberation of Germany from Napoleonic rule, and he entered the army, joining a regiment of cavalry in the capacity of physician. He served first in the Russian, then in the Prussian, army. In 1815 he returned to Hamburg on account of his love for Rosa Maria Varnhagen, the daughter of a physician of that city, and sister of the famous author. He married her the following year. About this time, Assing embraced Christianity and discarded his middle name Assur. He was known as a student of Greek medicine, making a special study of Hippocrates. He also contributed lyric poems to the "Musenalmanach," published by his friends Kerner and Chamisso; to the "Tübinger Morgenblatt"; in "Isidorus Hesperiden." After the death of his wife, June 22, 1840, he published, "Rosa Maria's Poetischer Nachlass," Altona, 1841. The last years of his life were passed in solitude.

ASSING, LUDMILLA: German authoress; born in Hamburg Feb. 22, 1821; died March 25, 1880, in Florence, Italy. She was the daughter of Dr. David Assing and Rosa Maria Assing, sister of Varnhagen von Ense. After the death of her parents she removed to Berlin to reside with her uncle Varnhagen. While in his house she formed the acquaintance of several noted men and women of that time, among whom were Alexander von Humboldt, Prince Pückler-Muskau, Bettina von Arnim, and many others. In 1861 she took up her residence in Florence, where she passed the rest of her life. She married a lieutenant of the Italian army, Cavaliere Grimelli, from whom she was divorced two years later (1875). Ludmilla founded in Florence a public school, in which instruction in German was compulsory. Toward the close of her life she became afflicted with brain trouble, from which she never recovered, her death occurring in the insane asylum of San Bonifazio, Florence.

As a writer, Ludmilla Assing belonged to the school of Varnhagen. Her literary activity was chiefly directed toward biography. She translated from the Italian Mazzini's works (Hamburg, 1868, 2 vols.), and the works of Piero Cironi. She wrote also in Italian. The posthumous works of her uncle were edited by her, and for this she was sentenced, in 1863, to eight months', and again, in 1864, to two years', imprisonment by the Prussian government for disrespect to the king and queen, because the works of Varnhagen that were published under her direction disclosed some scandals of the court. As she was residing in Florence at that time, the intended punishment did not affect her. She was pardoned, however, in 1866, but she preferred, nevertheless, to remain in Italy. Her biographical works include the lives of: "Gräfin Elise von Ahlefeldt," Berlin, 1857; "Sophie von La Roche, die Freundin Wieland's," Berlin, 1859; "Fürst Hermann Pückler-Muskau," Hamburg, 1868, 2 vols.; "Piero Cironi, ein Beitrag zur Geschichte der Revolution in Italien," Leipsic, 1867; "Biographische Porträts," Leipsic, 1871. She published in Italian: "Vita di Piero Cironi," Prato, 1865; "La Posizione Sociale della Donna," Milan, 1866; "In Memoria di Giovanni Grilenzoni," Genoa, 1868.

S. W. S.

ASSIR: **1.** A son of Korah, a Levite (Ex. vi. 24, and in the list of I Chron. vi. 7). **2.** Son of Ebiasaph and great-grandson of Assir, son of Korah (I Chron. vi. 8, 22). **3.** Son of Jeconiah, found in the genealogical lists of the kings of Judah (I Chron. iii. 17). "Assir" is interpreted by the R. V. as "captive"; but the rendering "Jeconiah the captive" is most improbable.

J. JR. G. B. L.

ASSIZE OF JEWRY: An expression used in the thirteenth century in England for the laws and customs regulating the relations between Jews and Christians in that country, and especially binding upon the decisions of the EXCHEQUER OF THE JEWS. Like most early English law, it was never officially compiled, being derived partly from written and partly from unwritten sources. The former consisted of church ordinances, and of agreements between the king and the Jews, formulated in specific charters. An attempt at reconstructing the Assize of Jewry for the twelfth century will be found in Jacobs, "Jews of Angevin England," pp. 329-336). The assize for the thirteenth century has not yet been collected.

J.

ASSON, MICHELANGELO: Italian physician and medical author; born at Verona June 21, 1802; died at Venice Dec. 2, 1877. Asson's father dying while his son was still an infant, the family was left in such straitened circumstances that an uncle undertook Asson's education. The latter attended the academy of his native town and the universities of Padua and Pavia, taking a postgraduate course at Milan. After graduating as doctor of medicine in 1825, Asson returned to Verona and practised there as a physician until 1831, when he removed to Venice. There he built up a large practise, becoming one of the leading surgeons of northern Italy. During the cholera epidemic in 1835 he opened an auxiliary hospital at St. Tomá, and was one of the organizers of the municipal hospital there, the chief surgeon of which he became in 1840 in succession to Rimas.

During the rebellion against Austria in 1849 Asson was exceedingly active in medical work, being appointed chief surgeon of the military hospital of Chieri, and doing medical duty at the battle of Novara, and in the war between Italy and Austria, 1859-60. From 1857 he had been professor of anatomy at the Academy of Art, Venice, and in 1863 was appointed professor of surgery in the newly founded medical and surgical school of the municipal hospital in that city. His long and very successful medical career was ended in 1872 by a paralytic stroke, after which he lingered for five years.

Asson was a member of several medical societies, both native and foreign, including those of Genoa, Bologna, Constantinople, and Berlin.

Asson was a prolific medical author, having written about 120 essays and books. He was not, however, very original, and his works, though very interesting—as they give an insight into the medical, especially the anatomical and surgical, knowledge of the Italy of his times—are not of lasting importance. He translated into Italian Bichat's "Anatomie" and contributed articles to Falconetti's "Enciclopedia e Dizionario di Conversazione." Among his many essays and works the following may be mentioned:

(1) "Storia Singulare di un Calcolo Vescico Uretrale," in "Annales Univ. di Mediche," June, 1827, No. 126; (2) "Considerazioni Teoretico-Pratiche sull' Arteriotomia," Venice, 1831; (3) "Sopra un Caso di Spostamento della Lente Cristallina," in "Antologia Medica," April, 1834, Venice; (4) "Dizionario Enciclopedico delle Scienze Mediche," Venice, 1834; (5) "Intorno alla Prima Invasione del Cholera Morbus in Venezia," a report on the cholera epidemic, jointly with Cortese, Fario, and Pancrazio, in "Ann. Univ. di Mediche," Milan, 1836; (6) "Osservazioni Anatomo-Patologiche e Cliniche Intorno all' Arteriasi Cronica o Arterolitiasi," in "Memoriale della Medica Contempor.," Nos. 3-6, Genoa, 1839; (7) "Bibliografia Chirurgica," in "Memoriale della Medica Contempor.," Genoa, 1841; (8) "Osservazioni sopra un Angina di Petto: Ossificazione dell' Arteria Coronaria sinistra con Alcune Riflessioni Intorno l'Arterolitiasi ed Altri Casi Practici," in "Giornale

per Servire al Progressi della Patologia e della Terapia," 1842; (9) "Annotiazioni Anatomo, Patologiche e Pratiche Intorno le Chirurgiche Malattie," Venice, 1842–44; (10) "Considerazioni Anatomiche, Fisiologiche, Patologiche e Chirurgiche Intorno la Milza," in "Giornale Veneto di Scienze Mediche," Venice, 1848; (11) "Sulla Frattura del Collo del Femure," *ib.* 1855; (12) "Sull' Ernia dell' Intestino Cieco," *ib.* 1860; "Casi Pratici ed Osservazioni di Clinica Chirurgica," in "Atti del Reale Istituto Veneto," vii., viii., Venice, 1862–65; "Sulla Piemia," in "Giornale Veneto di Scienze Mediche," Venice, 1867–68.

In addition to his medical studies and practise he devoted himself to classic literature, and at times published essays, especially on Horace and Dante.

ASSUMPTIO MOSIS. See Apocalyptic Literature, § 4.

Name and Origin.

ASSYRIA: The name "Assyria" is the Greek form of the native "Asshur," the city on the west of the Tigris, near its confluence with the Lower Zab, from which the kingdom, and finally the empire, of Assyria was named. Assyria's relations to the people of Israel are of chief concern in this article; yet a brief statement is necessary regarding its position among the nations of the ancient East, in whose history it is such an important factor.

After the city of Asshur had been founded at an unknown early date, perhaps by colonists from Babylonia, the settlement gradually spread till it extended to the mountains of Kurdistan forming the historical eastern boundary of the kingdom, which stretched along both sides of the Tigris. During the long period when Babylonia controlled the whole of the region from the Persian gulf to the Mediterranean sea, Assyria was its dependent. But about the sixteenth century B.C. it rose into independence as a rival of Babylonia; and thenceforth Syria and Palestine were left free from the aggressions of either power. Thus Egypt was given opportunity to secure a footing in Asia, which she maintained for the greater part of three centuries, though toward the end of the fourteenth century she had to relinquish Syria to the Hittites. At length the dominion of both Egyptians and Hittites in western Asia was ended, partly through invasion from the northern coastlands of the Mediterranean; but, on account of mutual hostility, neither Assyria nor Babylonia was in a position to occupy the country. In consequence, the Arameans "from over the river" made a permanent settlement in Syria; and the Hebrews, having escaped from Egypt, reclaimed their old tribal seats in Palestine, and at last became masters of most of the Canaanite territory. After the settlement, Israel was not disturbed by any power greater than the small countries of the neighborhood, whose attacks mark the period of the Judges. Thus arose the possibility of the Hebrew monarchy, as well as of the powerful Aramean kingdom of Damascus. But the subjection of Syria and Palestine to an Eastern power was only a question of time. From about 1100 B.C. Assyria's superiority became evident, and for nearly five centuries Babylonia ceased to be a power in Asia. Assyria, however, was not in a position to subdue Syria completely till the middle of the ninth century; and then the conquest was not permanent. Palestine proper was not invaded till 738 B.C. The history of Assyria may accordingly be treated for the present purpose under the following periods: A. To 1500 B.C., period of quiescence. B. To 745, period of extension. C. To 607, period of supremacy. The first period was of no significance for Israel; the second was of much direct importance; the third was of supreme importance, direct and indirect. This division should be supplemented by one having special regard to the history of Israel, as that history was affected by the policy of Assyria, and dealing only with the latter part of B and with C. These divisions are: (1) Epoch of the Syrian wars; (2) decline and fall of the northern kingdom; (3) vassalage of the kingdom of Judah.

Rise of Assyria.

Epoch of Syrian Wars.

(1) *a.* Ahab, son of Omri, while usually subject to Damascus, gains some relief through an Assyrian invasion under Shalmaneser II. about 854 B.C., which causes a temporary league among the western states, Ahab and Ben-hadad II. of Damascus fighting side by side against the invader. *b.* Jehu, the usurper, submits to Assyrian suzerainty about 842, but gains only a brief advantage; for Assyria, which has been pressing Damascus, after 839 retires for a time, and gives Hazael of that kingdom opportunity to ravage most of Palestine. *c.* Joash of Samaria (799) is successful against Damascus because the Assyrians have reappeared. They take Damascus in 797, and receive the homage of Phenicians, Philistines, and northern Israel. *d.* The prostration of Damascus is followed by the quiescence of Assyria for forty years, during which time both Israel and Judah expand under Jeroboam II. and Uzziah.

Fall of Kingdom of Israel.

(2) *a.* Tiglath-pileser III. (Pul) reorganizes the Assyrian empire, and carries out the policy of progressive reduction of western Asia. Subject states are spared complete extinction only on condition of submitting to severe terms of probation to test their fidelity to Assyria's rule. Northern and middle Syria are annexed (743–738 B.C.). Uzziah of Judah, their ally, is humbled; while Menahem of Israel buys off Tiglath-pileser with a heavy price. In 734 Ahaz seeks help from Tiglath-pileser against Samaria and Damascus, and becomes an Assyrian vassal. Galilee is annexed; and some of its people are deported. Pekah of Sanaria is dethroned and slain in 733, and Hosea is made vassal king. Damascus is taken in 732. *b.* Hosea, instigated by Egypt, now under the Ethiopic dynasty, rebels in 724 against Shalmaneser IV. of Assyria. Sargon II., who comes to the throne at the end of 722, takes Samaria and deports 27,290 of the people to Mesopotamia and Media.

(3) *a.* Sargon II. (722–705 B.C.) consolidates the Assyrian power. In 711, when Ashdod revolts (Isa. xx.), Judah is threatened for intriguing with Egypt

Vassalage of Judah.

Destruction of Assyria.

and the Philistines. *b.* The policy of Hezekiah (719-690) is to treat with Egypt and assist in a general combination against Assyria after the accession of Sennacherib (705-681). In 701 Sennacherib invades Palestine, devastates Judah, and deports many people, but is diverted from the siege of Jerusalem by a plague in his army, so that he leaves Palestine and does not return. *c.* Esarhaddon, the best of the Assyrian kings (681-668), conquers Egypt. It rebels and is reconquered by Assurbanipal (668-626), but regains its freedom about 645. Judah and the West generally remain quiescent. In 650 a great revolt against Assyria rages from Elam to the Mediterranean, in which Manasseh of Judah joins (according to II Chron. xxxiii. 10-13), and is made captive for a time. *d.* Assyria declines rapidly. Cimmerians and Scythians invade the empire. The Medians, assisted by the Chaldeans, finally destroy Nineveh and divide the empire between them. Before the catastrophe, Pharaoh Necho II. of Egypt invades Syria. Josiah of Judah (639-608), who proceeds against him, is slain at Megiddo.

The official and to some extent the popular religion of Judah was greatly affected by Assyrian influence, especially under Ahaz and Manasseh.

Assyria and the O. T. Literature.

Assyria occupies a prominent place both in the historical and in the prophetical literature of the Old Testament. The narrators were well informed as to the Assyrian events to which they refer; and are most discerning and explicit in regard to occasions on which the religion of Israel was influenced by Assyria, as in the innovations introduced by Ahaz and Manasseh (II Kings xvi. 18; xxiii. 11, 12), or when a great deliverance was wrought, as under Hezekiah (II Kings xviii., xix.), or when Israel's independence or actual existence was imperiled (II Kings xv. 29, xvii.). Since the historians wrote under the influence of the view of Hebrew history taken by the Prophets, Assyria is regarded by them from the prophetic point of view. But the Hebrew narrative is usually so objective that any higher purpose involved in the part played by the Assyrians is not specially indicated, except in the general statement with regard to the guilt of Samaria (II Kings xvii. 7 *et seq.*).

Assyria and the Prophets.

The Prophets, on the other hand, are international, or rather world-wide, seers, and connect all events as they occur with the controlling divine purpose. In their theory of affairs, while Israel as the chosen people was always the special object of the Lord's care and interest, the other nations are not beyond His regard; and their political and military movements which concern the weal of Israel are made to subserve His purpose and the establishment of His kingdom. This general conception explains the watchfulness with which the Prophets viewed the gradual advance of the Assyrian empire to the secure possession of Syria and Palestine. Indeed, it may be said that in a certain sense the Assyrian policy occasioned Hebrew written prophecy.

Amos, the first of the literary prophets who proclaimed the active sovereignty of the Lord over the nations of the earth (Amos ix. 7), based his warnings to his people on the ground that God was to raise up against them a nation that would carry them captive beyond Damascus and lay waste their whole country (v. 27, vi. 14); indicating that the Assyrians were to take the place in the discipline of Israel formerly held by the Arameans of Damascus, and to outdo them in the work of punishment. This attitude toward Israel with its threat of a national catastrophe was consistently maintained by succeeding prophets until the end of the Assyrian empire.

Amos, Hosea, and Micah.

Isaiah and Nahum.

As political complications increased, the Prophets were led to play not merely a theoretical but a practical part. In their capacity as political mentors they rebuked their people for intriguing with Assyria (Hosea v. 13, viii. 9), and foretold the consequence (viii. 10; ix. 3, 17; x. 5 *et seq.*). They thus assumed a twofold attitude toward the great Assyrian problem. On the one hand, it was necessary to warn their people against entanglement with Assyria, because (1) it would only result more surely in their absorption by the stronger power, and (2) it would bring Israel under religious as well as political subjection to the suzerain power. On the other hand, it was equally necessary to point out the inevitable loss of home and country at the hands of the Assyrian invaders. When the prophetic lessons had been thrown away upon northern Israel, and Samaria had become an Assyrian province, the admonition was impressed more strongly than ever upon the kingdom of Judah (Micah i.; Isa. xxviii.). When, under Tiglath-pileser I., Sargon, and Sennacherib, Judah, after the first false step of Ahaz (II Kings xvi. 7), became bound hand and foot to Assyria, and her end seemed near, it was the task of Isaiah to show how these antithetic points of view were reconciled in the great doctrine of God's justice supreme over all. That is to say, divine justice was bringing Israel under the Assyrian rod, and would finally call the oppressor himself to account when his allotted work should be done (Isa. x. 5 *et seq.*). The scourging of Judah and Jerusalem by Sennacherib, and the retreat of his plague-stricken army (II Kings xviii., xix.), were partial demonstration of the truth of the prophetic word, which was fully vindicated at last by the destruction of Nineveh and the fall of Assyria (Nahum). See the articles ASSYRIOLOGY AND THE OLD TESTAMENT; ARCHEOLOGY, BIBLICAL.

ASSYRIOLOGY AND THE OLD TESTAMENT: The science of Assyriology (the interpretation of the cuneiform inscriptions), which has originated and developed with such marked rapidity within the past fifty years, stands in intimate relations with the Old Testament. The history, philology, and archeology of Assyria are valuable aids to the student of the ancient Hebrews. The most salient allusions in Assyriology to events and customs mentioned in the Old Testament may most conveniently be divided into the following periods: viz., the antediluvian, the patriarchal, the Egyptian, the early regal, the last century of Assyria, and the new Babylonian.

The Antediluvian Period: The Genesis records of the antediluvian period are paralleled by a number of traditions and customs found in the cuneiform records of Mesopotamia. These are: (1) Thoroughly Semitic traditions of the creation of the world and of life; (2) traces of the observance of a seventh day, not unlike the Hebrew Sabbath; (3) references to a sacred garden; (4) possible similarities between the cherubic guardians of Eden and the colossi of Babylonia; and (5) remarkable resemblances between Genesis and the Babylonian traditions of the Deluge.

The Patriarchal Period: The remarkable list of nations enumerated in Gen. x. is helpfully elucidated by the ethnological revelations of the cuneiform records. Ur of the Chaldees has been definitely located at the modern mound Mugheir, on the right bank of the Euphrates, about one hundred and fifty miles above the Persian gulf, though in ancient times it is supposed to have been a seaport city. The patron deity of Ur, as of Harran, to which Abram migrated, was the moon-god Sin. Abram's journey to the West-land was made along one of the regular caravan routes of that day. The fourteenth chapter of Genesis has also received interesting confirmation of its historical basis in the facts: (1) That such raids as are there mentioned were made many centuries before Abram's day, and (2) that names discovered on the monuments, if not identical with those of this chapter, contain some of their elements.

The Egyptian Period: The discovery at Tell el-Amarna in 1887 of more than three hundred cuneiform documents—correspondence between the kings of Asia and Egypt—belonging to the fifteenth century B.C. has disclosed some startling facts. It is learned from these that the civilization of Babylonia had swept westward as far as Egypt, and had so impressed itself upon its western subjects that its language was adopted as the medium of diplomacy. These letters also reveal with considerable detail the political and social conditions and relations in western Asia in this hitherto obscure period. A glimpse is obtained of the peoples who were settled in Canaan, and who constituted the background of the earliest settlements of Israel in this land. Joshua's conquests were made in the face of strong cities and great fortifications.

The Early Regal Period: Though the early influence of Babylonia-Assyria is evident in the life and customs of the Hebrews in Canaan in the time of David and Solomon, its first direct and potent bearing is seen in the treaty made by Ahab with Ben-hadad (I Kings xx. 26-34). This was a wise stroke of statesmanship on the part of Ahab, in that it put the Syrian army in the foreground to withstand the invasion of the oncoming hosts of Shalmaneser II. of Assyria. Damascus and the Syrian army now became Ahab's advance guard. The full import of this mysterious league is seen within a few years at the battle between Shalmaneser II. and the combined allies of the West. At the famous battle of Karkar (854 B.C.) Shalmaneser II. had to face among other forces "1,200 chariots, 1,200 horsemen, 20,000 men of Ben-hadad of Damascus. . . . 2,000 chariots, 10,000 men of Ahab of Israel." The Old Testament does not mention this battle, nor is any intimation given of its disastrous results. This same Assyrian king, in his records of a campaign twelve years later (842 B.C.), says: "At that time I received the tribute of the Syrians, the Sidonians, and of Jehu, the son of Omri." According to this statement, the kingdom of Israel was probably still paying the tribute originally levied on the defeated Ahab. "Jehu, the son of Omri," was doubtless used in the sense of "successor" on the throne of Israel.

Shalmaneser II.

Within a few years Shalmaneser II. turned his attention to other quarters; and the new king of Damascus, Hazael, entered upon ambitious designs in the West. It was not until 797 B.C. that another Assyrian king, Adad-nirari III., grandson of Shalmaneser II., set out on a western campaign. He conquered Damascus, and brought to his feet Samaria, Edom, and Philistia, and made them tributary provinces of Assyria. The power of Syria was so broken by this campaign that she never recovered her former strength, nor thereafter proved so formidable an enemy of Israel. Assyria's political power gradually receded toward the Tigris; and the two kingdoms of Israel and Judah were left free to expand until they reached the limits of the Solomonic kingdom.

The Last Century of Assyria: After forty years of comparative peace and prosperity (783-743), the two kingdoms heard a rumor of the approach of Assyrian hosts. Tiglath-pileser III. (Pul) crossed the Euphrates; and he recounts "nineteen districts of the city of Hamath, together with the towns in their circuit, situated on the sea of the setting sun [the Mediterranean], which in their faithlessness had joined faith with Azariah. I restored to the territory of the land of Asshur." In another fragment it is stated that this was "Azariah the Judean." In his list of kings paying tribute are found Hiram of Tyre, Rezon of Damascus, and Menahem of Samaria (II Kings xv. 19). In one of these campaigns, at the end of a two years' siege, Damascus fell (732 B.C.), and Samaria likewise experienced the vengeance of the Assyrian king. One of the king's records says: "Pekah, their king, they overthrew; Hoshea, I appointed over them" (compare II Kings xv. 30). In a list of petty tributary kings of the east coast of the Mediterranean sea, Tiglath-pileser mentions Ahaz of Judah. In all, this monarch of Assyria mentions in his fragmentary annals three kings of Israel and two kings of Judah.

Records of Sargon II.

The next definite statement relating to the Old Testament is found in the records of Sargon II. In the first year of his reign (722 B.C.) he says: "The city Samaria I besieged, 27,290 of its inhabitants I carried away captive; fifty chariots in it I took for myself; but the remainder [of the people] I allowed to retain their possessions." The depopulated territory was repopulated, according to his own records as well as those of the Old Testament (II Kings xvii.), by the importation of peoples from several foreign countries. This combination of strange races formed the basis of the later Samaritans. This Sargon II., mentioned but once in the Old Testament (Isa. xx. 1), was a shrewd and powerful monarch. He carried out a successful campaign against Ashdod of Philistia, as one of the chief cities involved in a wide-spread coalition to throw off the yoke of Assyria (compare Isa. xxxix.). The foe was completely routed; and Sargon proceeded to Babylon and completed his victory.

Sennacherib.

Upon the death of Sargon II. (705 B.C.), his son Sennacherib ascended the throne. His first movement affecting Palestine occurred in 701 B.C.; and he gives an admirable record of the whole campaign. He pressed forward from Nineveh to the Mediterranean sea, and thence down the coast-line to Philistia, where he encountered determined resistance. He overran the land of Judah, captured forty-six of its strong fortresses, and carried off 200,150 captives. Hezekiah, king of Judah, was shut up in Jerusalem. Lachish and Libnah were taken after siege, and the Egyptian ally of Judah appeared on the scene. Sennacherib met, and claims to have defeated, their great army, but apparently took no advantage of his victory. Strangely enough, Sennacherib's next statement is to the effect that Hezekiah sent tribute, etc., after him to Nineveh. No mention is made of any disaster or of his return. It is interesting in this connection to note that, although Sennacherib reigned twenty years after this (to 681), he records no further movements toward the west. In a Babylonian chronicle it is recorded that "Sennacherib, king of Assyria, was murdered by his own son in an insurrection" (compare Isa. xxxvii. 38). As a result of this uprising, Esarhaddon seized and held the throne, and ruled from 681 to 668 B.C.

In a list of twenty-two vassal kings on the Mediterranean coast, Esarhaddon mentions Manasseh of Judah. His son and successor, Assurbanipal (668–626 B.C.), likewise mentions the same king in his list of vassals. In 647 a general revolt against the king of Nineveh probably included Manasseh, who was carried to Babylon (II Chron. xxxiii. 11-13). Upon his submission he, like Necho of Egypt, was restored to his throne. This closes the contact between Assyria and Judah, and leaves upon the known documents of Assyria the names of ten kings of Israel and Judah.

The New Babylonian Period: The great founder of the new Babylonian empire was Nebuchadnezzar. The inscriptions amply confirm the Old Testament pictures of his greatness and devotion to the gods of his land. He was a shrewd general, a wise administrator, and a world-wide conqueror and ruler. Babylon was his throne, and the civilized world his realm. The captive Jews were his subjects, and served as his menials and vassals. The close of his forty-three years' reign was followed by a period of anarchy, until Nabonidus (555–538 B.C.), the last king of the declining Babylonian monarchy, secured the throne.

The rise of Cyrus in the East presented a new problem. Tribes, peoples, and kingdoms fell before him until he reached the walls of Babylon. Its population, weary of neglect during the reign of Nabonidus as well as of his faithlessness to the great gods of the city, threw wide open the city gates to welcome the advent of so benevolent and liberal a ruler. Cyrus paid his devotions to the gods of the land, and implored them to aid and promote his plans. Cyrus' decree, authorizing the Jews to return to Jerusalem, was in full accordance with the general policy inaugurated throughout his realm—a policy designed in every way to conciliate his subjects.

Other Points of Contact: In addition to this vast mass of historical data illustrative of the Old Testament, there is found much valuable material. The archeological facts of the Old Testament are invested with a new interest; the geography of those old lands is now a new theme; the chronology of Israel's history, always difficult, has lost some of its uncertainties; and the ethnography of the early settlements has already become a fascinating study. The linguistic and exegetical value of the cuneiform documents is far beyond the most sanguine expectations of scholars. Altogether the science of Assyriology has opened up to the student of the Old Testament a new world which he must explore before he can appreciate many of its most interesting parts.

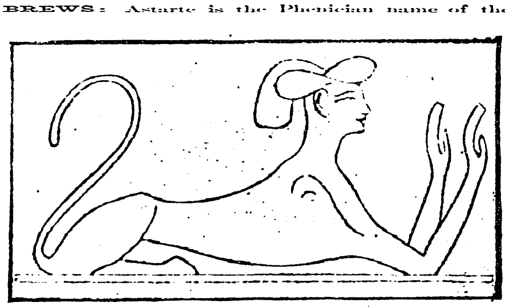
ASTARTE WORSHIP AMONG THE HEBREWS:

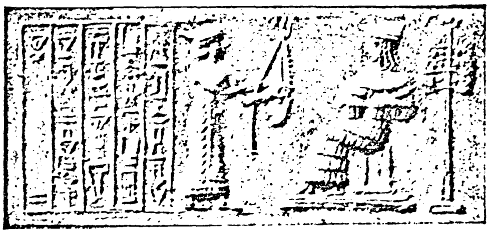
Astarte is the Phenician name of the primitive Semitic mother-goddess, out of which the most important of the Semitic deities were developed. She was known in Arabia as "Athtar," and in



Astarte as a Sphynx.

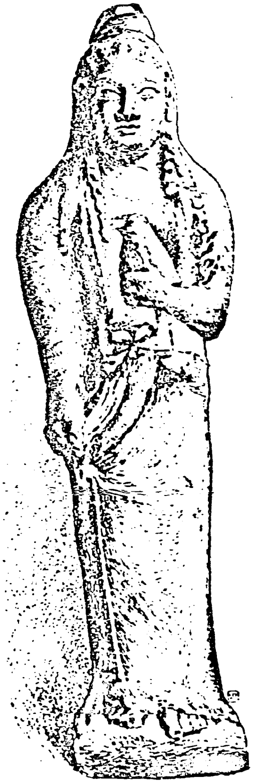
(From Prisse d'Avennes, "Histoire de l'Art Egyptien.")

Babylonia as "Ishtar." Her name appears in the Old Testament (I Kings xi. 5; II Kings xxiii. 13) as "Ashtoreth," a distortion of "Ashtart," made after the analogy of "Bosheth" (compare Jastrow, in "Jour. Bibl. Lit." xiii. 28, note). Solomon is said to have built a high place to her near Jerusalem, which was removed during Josiah's reform (I Kings xi. 5, 33; II Kings xxiii. 13). Astarte is called in these passages "the abomination of the Zidonians," because, as the inscriptions of Tabnith and Eshmunazer show, she was the chief divinity of that city (see Hoffmann, "Phönizische Inschriften," 57, and "C. I. S." No. 3). In Phenician countries she was the female counterpart of Baal, and was no doubt worshiped with him by those Hebrews who at times became his devotees. This is proved by the fact that Baalim and Ashtaroth are used several times (Judges x. 6; I Sam. vii. 4, xii. 10) like the Assyrian "ilani u ishtarati" for "gods and goddesses."



Astarte as the Goddess of Love.
(From Ball, "Light from the East.")

Astarte, wherever worshiped, was a goddess of fertility and sexual love. A trace of this among the Hebrews appears in Deut. vii. 13, xxviii. 4, 18, where the lambs are called the "ashtarot" of the flock. It is usually assumed that Astarte Worship was always a foreign cult among the Hebrews; but analogy with the development of other Semitic deities, like the Phenician Baal, would lead to the supposition that Astarte Worship before the days of the Prophets may have somewhat prejudiced that of Yhwh. The problem is a difficult one, the references to the cult in the Old Testament being so few and so vague. The reaction against Baal and Astarte, inaugurated by the Prophets, had a profound effect upon the moral life of Israel (see "Jour. Bibl. Lit." x. 72-91; Budde, "Religion of Israel," ch. ii.-v.). Jeremiah (vii. 18; xliv. 17, 18) and Ezekiel (viii. 14) attest various forms of this worship in their time, which may refer to a direct importation from Babylonia. The sacrificial use of swine's blood (Isa. lxv. 4, lxvi. 3) may be a reference to a form of the cult similar to that known in Cyprus, where swine were sacred to Astarte ("Jour. Bibl. Lit." x. 74, and "Hebraica," x. 45, 47).



Astarte with Dove.

ASTI: Town in the province of Alessandria, Italy, on the left bank of the Tanaro; population 32,000. Although now of no great importance, in the Middle Ages Asti was a center of commerce and the capital of one of the most powerful republics of northern Italy. Owing to the relative freedom that prevailed in Asti, the major part of the French Jews expelled in 1322 by Charles IV. (compare Isidore Löb, in "Grätz-Jubelschrift," pp. 39 *et seq.*) took refuge there, and adopted the French ritual called (from the initials of Asti, Fassano, and Monclavo, where it is employed) "Rite Afm," which has been retained to the present day. The eighteenth of Iyyar is especially celebrated in Asti, on which day hymns composed by Joseph Conzio are recited. A special Seder for Passover evening service for Asti was written by Elia Levi.

Asti was the birthplace of many Jewish scholars, among whom were: Isaac Santon d'Hugeli (1576), Judah b. Jacob Poggetto (sixteenth century), Elijah b. David Finzi (1643), Joseph b. R. Gehereseia Conzio and Joab b. Isaac Gallico (seventeenth century), David Mordecai Terracina (nineteenth century).

ASTRAKHAN: Capital of the government of the same name in Russia, situated on the left bank of the Volga, about sixty miles from the Caspian sea. It is generally supposed to have been built near the site of Atel (or Itil), the ancient capital of the Chazars.

The only fact known concerning the Jews of Astrakhan, from the destruction of the kingdom of the Chazars by Prince Svyatoslav of Russia (969) to 1804, is that Jewish merchants carried on a considerable trade there.

In 1804 Emperor Alexander I., by the "Regulations" of Dec. 9, permitted Jewish agriculturists, artisans, etc., to settle in the province of Astrakhan; but the law was repealed under Nicholas I. in 1825.

In 1883, probably as a result of the May Laws, the authorities of Astrakhan issued an order henceforth limiting to three days the sojourn in the city of all Jewish merchants not of the first gild. The Christian merchants applied to the governor, urging him, in the interests of the commerce of Astrakhan, to repeal the order. They showed that the sales of fish to Jews amounted to more than five million rubles a year; that the Russian importers numbered not more than 5 per cent; that the Jews bought large quantities of special kosher fish called "Jewish fish," which could not be sold to any one else; and that without the Jews the business of Astrakhan would be ruined. The governor extended the time limit for the Jewish merchants to a month, but many of them had already left the city. The price of fish fell 50 per cent, and many of the Astrakhan fish merchants were ruined ("Ha-Ẓefirah," 1883, No. 23).

In the city of Astrakhan the births among Jews were 49 males and 62 females in 1897; deaths, 28 males, 13 females; the excess of births over deaths being 70, while that in the general population was but 6 per cent. The general death-rate was 45 per thousand, while that of the Jews was but 27 per thousand. The marriages among Jews numbered 13.

In 1899 the Jewish population of Astrakhan was 1,575 in a total population of 117,772. The Jewish population in the whole government, including the city, was 1,667. In addition, there were 15 Karaites in the city, and 10 in the government ("Pamyatnaya Knizhka Astrakhanskoi Gubernii," 1900).

There are two synagogues: one for the Ashkenazim, the other for the Sephardim. The rabbi of both synagogues is Boris Moisejevich Schucher.

BIBLIOGRAPHY: *Pamyatnaya Knizhka Astrakhanskoi Gubernii*, 1899, 1900.

ASTROLOGY.—Biblical. See ASTRONOMY, BIBLICAL.

In the Apocrypha and in the Talmud:

Terminology.

Neither הברי שמים (Isa. xlvii. 13), which the Greek translation renders "astrologers," nor גזרין (Dan. ii. 27 et seq.), the technical designation for the Chaldean casters of horoscopes, nor הדברי מלכא (Dan. iii. 27), explained "astrologers" (Cant. R. to vii. 9), is found in ancient Jewish traditions. Even the Hebraic name חזה בכככים, "star-gazer" (Isa. xlvii. 13), occurs only in the commentaries on the Talmud. The customary names are אסטרולוגוס ("astrologer") in Palestinian and כלדאי ("Chaldeans") in Babylonian sources—expressions originating in the Greco-Roman world, where *Χαλδαῖοι* and "Chaldaei" are found as early as the beginning of the common era, exclusively applied to astrologers. Whether any etymological relation exists between אסטרולוגוס and the appellation אצטגנין, or אסטגנין, a word used in connection with the Egyptian rulers (אצטגניני פרעה, Sotah 12*b*) and identical in meaning, can not be definitely ascertained. The art itself goes by the name of אסטרולוגיא (Astrologia).

Distribution.

These foreign terms suffice to show that the "Chaldean science" was not introduced into Judea directly, but through the medium of syncretic Hellenism, wherein, in the course of centuries, it met with an ever-widening acceptance. The Sibylline Books praise the Jewish nation because it "does not meditate on the prophecies of the fortune-tellers, magicians, and conjurers, nor practise Astrology, nor seek the oracles of the Chaldeans in the stars" (iii. 227); and Josephus censures the people for ignoring the visible signs and indications foreshadowing the destruction of the Temple ("B. J." vi. 5, § 3). There were actually no Jewish astrologers either in the Holy Land or in Babylonia; and the art, together with those who practised it, was condemned, although its reality was as little questioned then as it was by the rest of the world up to the seventeenth century. It was indeed considered of celestial origin, and as having been revealed to mankind by the rebellious angels. Barakel (Rakiel: Greek text) taught star-gazing; Kokabel (the Star of God), Astrology; Sheḥakeel, the science of the clouds; Arkiel (the Earth of God), the signs of the earth; Samsiel (the Sun of God), the signs of the sun; and Seuriel, Sahriel (the Moon of God), the signs of the moon (Enoch viii. 3).

Chronology and Astrology.

The admiration for Astrology was due not so much to its importance for reckoning times and seasons—although as such held in high esteem—as to its supposed power of forecasting the future. Enoch ordained the jubilees, year-weeks ("Jahrwochen"), months, Sabbaths (weeks), and days, and "all that was, that is, and that will be he saw as in a vision, even the destiny of the children of man from generation to generation to the Judgment Day: everything he foresaw and apprehended, inscribing his testimony upon the earth for the benefit of mankind and all their posterity" (Jubilees iv. 19). According to the same book (viii. 3), such prediction is inscribed upon the rocks. The same view, with a Jewish monotheistic coloring, is expressed in the rabbinical legend, according to which God showed to Adam all the future generations, including their scribes, scholars, and leaders ('Ab. Zarah 5*a*). Abraham, the Chaldean, bore upon his breast a large astrological tablet on which the fate of every man might be read; for which reason—according to the haggadist—all the kings of the East and of the West congregated every morning before his door in order to seek advice. It is to this tablet that the words (Gen. xxiv. 1), "the Lord had blessed Abraham in all things," are said to allude (Tosef., Ḳid. v. 17; B. B. 16*b*). Abraham himself saw in it that he would have no second son, but God said unto him, "Away with your astrology: for Israel there is no planet!" (Shab. 156*a*). Elsewhere it is declared that Abraham was not an astrologer at all, but a prophet, inasmuch as only those beneath the stars could be subject to their influence; but that Abraham was above them (Gen. R. xliv. 12). It is also stated that Joab refused to join the conspiracy of Absalom, because he had seen David's favorable nativity (Sanh. 49*a* and elsewhere).

Astrology in the Roman Empire.

Like the Assyrio-Babylonian monarchs, who received from their astrologers a monthly forecast of coming events (Isa. xlvii. 13 and cuneiform inscriptions; *e.g.*, Rawlinson, "Cuneiform Inscriptions of Western Asia," iii. 51), the Roman emperors believed in the all-powerful influence of the stars upon the destinies of man and nature. Tiberius was a master in the art of casting a horoscope, and regulated all his actions in accordance with his astrological deductions (Josephus, "Ant." xviii. 6, § 9). The Roman empire boasted a complete system of Chaldeo-Greek literature, which was zealously cultivated by the members of the astrological schools: all public and private life being under the influence of these pseudo-prophets, who received substantial rewards in gold.

These conditions are reflected in the parables of the Talmud, which vividly illuminate the astrological belief from every point of view. Jethro advises Moses (Mek., Yitro, 'Amalek, 2) to select the men whom he wishes to cooperate with him by means of the mirror into which the kings are accustomed to gaze.

"A king who had no son said to his attendants, 'Buy pen and ink for my son'; and the people took the king to be a great astrologer; for how could he have ordered pen and ink for his son, had he not beheld beforehand that he was to have one? The same applies to God, who foresaw that He would, at some future time, give Israel the Torah" (Gen. R. i. 4).

"The question is asked, 'Why did God proclaim His law amid fire and darkness (Deut. v. 20), and not by the light of day'? And the answer is given in the form of a parable: 'A king, who was a great astrologer, gave his son in marriage, and hung black curtains before the bridal chamber, saying, "I know that my son will not abide by his nuptial promises longer than forty days; let not the people, in days to come, say that an astrologer such as I did not know what was to happen to his son."' The astrologer is God, his son is Israel; and the bride is the Torah, by which Israel abode no longer than forty days (from the revelation to the making of the golden calf)" (Pirḳe R. El. xli.).

"A ruler sentenced a man to death by fire; but when he perceived by means of astrology that the condemned would beget a daughter destined to become the king's wife, he said, 'This man must be saved for his daughter's sake.' Thus did God save Abraham from the fiery furnace, because of Jacob" (Lev. R. xxxvi. 4).

"A man to whom a son was born was met by an astrologer who, on seeing the child, declared that he was destined to become a bandit-chief (ἀρχιληστης) and must be put out in the desert. The father of the child refused until the astrologer's father told him to do just as his son had ordered. The father of the astrologer is God; the astrologer is Sarah; the child is Ishmael; and the father of the child is Abraham" (Deut. R. iv 5, referring to Gen. xxi. 10-12).

Court Astrologers.

When Pharaoh made Joseph vice-regent, his astrologers asked, "Would you elevate this slave, purchased for twenty pieces of silver, to be ruler over us?" and Pharaoh answered, "I see the colors of rulership in him" (Soṭah 36*b*). Here, as elsewhere, colors play an important part in Astrology.

In reference to a request of King Solomon for laborers on the Temple, Pharaoh directed his astrologers to select workmen who were to die within the year, and send them to the Jewish monarch, who, however, seeing the ruse through the medium of the Holy Spirit, sent them back again clad in shrouds (Pesiḳ. iv. 34*a*).

Mesha, king of Moab, asked his astrologers, "Why am I unable to vanquish the Jews?" and they answered, "Because of the merit of Abraham, who was ready to sacrifice his own son"; whereupon the king did likewise (*ib.* ii. 13*a*).

Astrological Errors.

When a pagan wanted to buy a slave, he first consulted an astrologer. It was through this art that the wife of Potiphar learned that she was to have a son by Joseph: and it was for this reason that she regarded him with favor. It was an error, however; for the prognostication referred to her daughter, who subsequently became Joseph's wife (Gen. R. lxxxv. 2, lxxxvii. 4).

Pharaoh's astrologers perceived that the mother of the future redeemer of Israel was with child, and that this redeemer was destined to suffer punishment through water. Not knowing whether the redeemer was to be an Israelite or an Egyptian, and being desirous to prevent the redemption of Israel, Pharaoh ordered that all children born henceforth should be drowned; but when the Egyptians remonstrated against this edict, he restricted it to Israelitish infants. But the astrologers erred in their deductions; for the reference was to the waters of Meribah (Num. xx. 13), and not to the Nile (Ex. R. i. 18; Sanh. 101*b*; compare also Ber. 4*a*).

The conviction that the astrologers could control the planets prevailed everywhere among the nations of antiquity. Thus Haman regulated the time for the extinction of the Jews by means of astrological calculations (Pirḳe R. El. l.). A barber, who was also an astrologer, perceived that the Jews would shed his blood; consequently he murdered 80 or, according to some, 300 of those who visited him professionally. But he erred; for the reference was to the blood which he was to lose at circumcision on his conversion to Judaism (Yer. 'Ab. Zarah ii. 41*a*).

Special Features.

The astrologers were wont to sit at the entrance to the harbors and predict how every parcel of merchandise would be disposed of (Eccl. R. i. 14; Midr. Panim Aḥerim to Esth. iii. 7, ed. Buber, p. 46). They could determine by lot under what planet and in what month and on what day a people was to be attacked (Sanh. 95*a*). On one occasion they prophesied to a non-Hebrew that his fortune would fall into the hand of a pious Jewish Sabbath observer. The fortune was thereupon invested in a diamond and worn by the possessor; but it fell into the water and was later found by a Jew in the stomach of a fish that he had bought for the Sabbath meal (Shab. 119*a*). An astrologer predicted of a new-born male infant that he was destined to become a thief; for which reason the mother always kept the head of the child covered in order that "the fear of the heaven be upon him," and admonished him constantly to pray for divine grace. In spite of all, the covering fell from his head upon one occasion, after he had grown to manhood and had attained to the dignity of a teacher of the Law, and he fulfilled the sinister prediction by plucking and devouring the fruit of a tree which did not belong to him (Shab. 156*b*). Another teacher of the Law declined the proffered position of head of the school because a Chaldean had predicted that he should occupy the chair for only two years; and this proved true, when he finally accepted the position twenty-two years later (Ber. 64*a*). Two students of the Talmud went out to fell timber, and an astrologer declared that they would never return; but they were saved because of a benevolent action which they performed (Yer. Shab. vi. 8*d*). An astrologer became a proselyte and consequently abandoned his art; but he relied on God, and in a critical moment he was saved (*ib.*).

Talmudists and Astrology.

To resist the influence of the "Wisdom of the Orient" was not an easy task. Nevertheless there was but one teacher of the Talmud, Samuel of Babylonia (about 250), who became an adept in Astrology, and even he, quoting the words (Deut. xxx. 12), "It [the Law] is not in the heavens," says, "Torah can not go together with the art that studies the heavens" (Deut. R. viii. 6). A similar remark is made by the Babylonian Jose of Huẓal: "We are not permitted to appeal to the Chaldeans, for it is written (Deut. xviii. 13), 'Thou shalt be perfect with the Lord thy God'" (Pes. 113*b*). In accordance with Jer. x. 2 is another declaration by R. Johanan, the Palestinian amora, to the effect that "there are no planets for Israel, but only for the nations which recognize the validity of astrology." This opinion is shared by Rab (Abba Arika, Shab. 156*a*). These utterances, however, do not go undisputed; and it may be added that, more particularly during the fourth century, the belief in the influence of the constellations at conception and birth was general (*ib.*). Every person had a particular star as a guardian spirit, with which his fate was closely interwoven. The stars of the proselytes were already witnesses of the revelation on Sinai (Shab. 146*a*). Animals have no stars, and are therefore more liable to injury (Shab. 53*b*). On the other hand, every blade of grass has its own particular star which bids it grow (Gen. R. x. 6). Causeless fear in man is a sign that his star sees danger (Meg. 3*a*). The first day of illness is concealed from mankind in order that the influence of one's star may not be weakened; and the setting of one's star betokens that one's death is near (Ber. 55*b*). Raba (lived 350) says, "Duration of life, progeny, and subsistence are dependent upon the constellations" (M. Ḳ. 28*a*). God tells Eleazar ben Pedat, an indigent teacher of the Talmud, that He would have to overturn the world, were He to release him from poverty, he having been born in an unlucky hour (Ta'an. 25*a*).

Selection of Days.

The most popular form of astrological superstition—and one which still survives among uncultured people—is the selection of propitious days. According to it, certain periods, years, months, days, and hours are regarded as lucky or unlucky. Akiba contends against the superstition that the year before the jubilee is exceptionally blessed. The belief is also condemned that no business should be begun on the new moon, on Friday, or on Sabbath evening (Sifre, Deut. 171; Sifra, Ḳedoshim, vi.; Sanh. 65*a*). Despite these authoritative doctrines, however, an announcement is found to the effect that it is dangerous to drink water on Wednesday and Friday evenings (Pes. 112*a*). Samuel, teacher of the Law, physician, and astrologer, taught that it was dangerous to bleed a patient on Monday, Tuesday, or Thursday, because on the last-mentioned day Mars reigns at the even-numbered hours of the day, when demons have their play. It was considered equally dangerous to undergo this operation on a Wednesday falling on the fourth, the fourteenth, or the twenty-fourth of the month, or on a Wednesday occurring within less than four days of the new moon. The new moon was likewise regarded as an unfavorable season for bleeding, as were also the third of the month and the day preceding a festival (Shab. 129*b*).

Two Horoscopes.

In consequence of religious anti-Biblical influences, some of these pagan views gradually acquired a Hebraic tinge. Of two horoscopes which have been preserved, however, only the earlier bears a Jewish stamp. On Joshua b. Levi's "tablets" (third century) it is stated that men born on Sunday will be distinguished, on Monday wrathful, on Tuesday wealthy and sensual, on Wednesday intelligent and enlightened, on Thursday benevolent, and on Friday pious; while those born on Saturday are destined to die on that day. Only four of these predictions are based upon the days of Creation; from which it would appear that the conclusions here are not those of Joshua b. Levi, but originated rather with Amoraim, who add other remarks. Rabbi Ḥanina said to his pupils: "Go to the son of Levi, and tell him that the fate of a person is not decided by the constellations of the day, but by those of the hour"—in other words, it is not the birthday, but the natal hour, that decides. Those born while the sun rules in the heavens have a brilliant career before them, and they will eat and drink of their own substance; but their secrets will be divulged, and they will never prosper by theft. Those born under the dominion of Venus are destined to wealth and sensual enjoyment, because fire is suspended on this star; while birth under the planet Mercury foretokens intelligence and enlightenment, Mercury being the scribe of the sun. The hapless born under the reign of the moon, however, will suffer much sorrow; they will build and demolish, demolish and build, and they will eat and drink not of their own substance; but their secrets will be safe, and should they steal, they will escape detection. The plans of those born under the reign of Saturn will be destroyed; while the righteous or the charitable ("ẓaddiḳim") are born under the reign of Jupiter ("Ẓedeḳ"), and the shedder of blood under Mars; but this prognosticon, says Ashi, may also refer to surgeons and butchers (Shab. 156*a*).

When the vernal equinox occurs during the hour of Jupiter, the power of the fruit-trees is broken; and when the winter solstice falls within this hour, the seeds of the field dry up. In this case, however, it is necessary also that the new moon should appear during the moon or Jupiter hour ('Er. 56*a*). An eclipse of the sun is an evil omen for the nations, while an eclipse of the moon is a particular fatality for Israel, Jewish reckoning of time being based upon the phases of this planet (Mek., Bo, i.; Suk. 29*a*; G. Brecher, "Das Transcendentale, Magie und Magische Heilarten im Talmud," p. 157, Vienna, 1850).

J. SR. L. B.

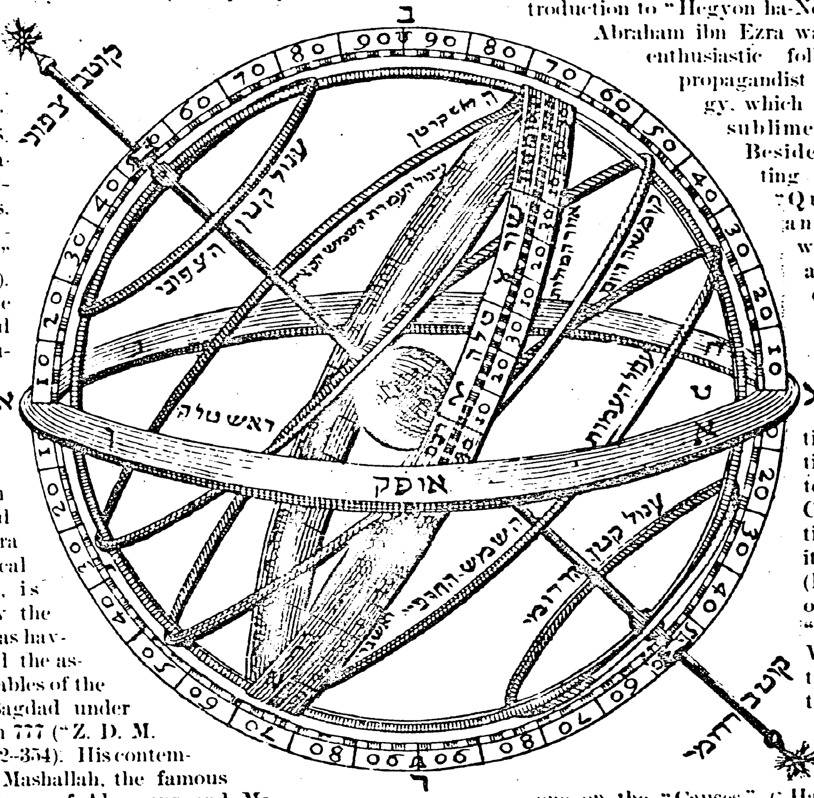
——**In Medieval Times:** Astrology, called "ḥokmat ha-nissayon" (wisdom of prognostication), in distinction from "ḥokmat ha-ḥizzayon" (wisdom of star-seeing, or astronomy), was practised by Jews throughout the Middle Ages, both as a professional art and as a science. Coming from the East, they were looked upon as heirs and successors of the Chaldeans, and, probably for this reason, were regarded by the Occidental world as skilful masters of the art of Astrology; their supposed power over destiny filling the multitudes with awe and fear (Bédarride, "Les Juifs en France," pp. 49, 454, note 21; Basnage, "Histoire des Juifs," iv. 1212; P. Cassel, "Juden," in Ersch and Gruber's "Encyc."

pp. 16, 17; 52, note 78; 67, notes 50 and 51; 115, 171; 224).

Masters in Astrology.

Jewish cosmology in the Middle Ages, therefore, accords to Astrology a distinct place, as may be learned from the "Sefer Yeẓirah," v. 4, vi. 2–4, where the zodiac and the dragon as "the king" are represented as cosmic factors; and from the astrological Baraita of Samuel, belonging to the beginning of the ninth century (Zunz, in Steinschneider, "Hebr. Bibl." 1862, pp. 15 *et seq.*). Afterward, the Cabala, in the Zohar and in the Book of Raziel, exhibits a thorough knowledge of Astrology; and liturgical poetry, through Kalir and Ibn Gabirol ("Keter Malkut"), gives it recognition (S. Sachs, "Ha-Yonah," i. 59–93; M. Sachs, "Die Religiöse Poesie," 1845, p. 250). Indeed, in the eighth and ninth centuries, Jews were the foremost masters in Astrology. Jacob ibn Tarik, called by Ibn Ezra an astrological authority, is recorded by the same writer as having imported the astronomical tables of the Hindus to Bagdad under Almanṣur in 777 ("Z. D. M. G." xxiv. 332–354). His contemporary was Mashallah, the famous court astrologer of Almanṣur and Mamun (about 800), some of whose works Ibn Ezra translated from the Arabic into Hebrew (Steinschneider, "Hebr. Uebers." pp. 599–603). Another Jewish astrologer of note was Sahl b. Bishr al-Israeli in 820, called also Rabban al-Ṭabari, "rabbi of Tabaristan," whose astrological works still exist partly in the original, and were translated into Hebrew and Latin (*ib.* pp. 603–607; *idem*, in "Jew. Quart. Rev." xiii. 108–109). Ibn Ezra mentions also as the greatest Jewish astrologer Andruzagar ben Zadi Faruk, probably a Persian (Steinschneider, in "Monatsschrift," 1884, p. 479; *idem*, "Hebr. Uebers." p. 854, note 54*b*). As a matter of fact, most of the works on Astrology, composed by Mohammedan scholars—those ascribed to Ptolemy, and those of Abu Maashar, Al-Kabiṣi, and Abu al-Rijal—were translated by Jews into Hebrew and partly into Spanish (Steinschneider, "Hebr. Uebers." pp. 525–578), or they composed compendiums of such, writing under their own names as "Astrologers."

Thus, Shabbethai Donolo, 913–970, acquired fame both as physician and astrologer; and his commentary on the "Sefer Yeẓirah" is declared by him to be the result of extensive astrological studies (Grätz, "Gesch. der Juden," iii. 292 *et seq.*). Abraham b. Ḥiyya, the great mathematician and astronomer of Barcelona, of the twelfth century, was also a believer in Astrology, and intended to write a work on it; though, on account of its hypothetical character, he would not accord it the rank of a science (see his "Ẓurat ha-Areẓ," Introduction, and Freimann's Introduction to "Hegyon ha-Nefesh").



An Astrolabe.
(From "Ma'ase Tobia," 1707.)

Abraham ibn Ezra was the most enthusiastic follower and propagandist of Astrology, which he calls "a sublime science." Besides translating Mashallah's "Questions" and another work of this author on the eclipse of the moon from the Arabic into Hebrew, he wrote "Nativity," "Elections," "Sentences of the Constellations," "Reshit Ḥokmah" (Beginning of Wisdom), "Book of the World," a treatise on the "Planets," a treatise on the "Luminaries," one on the "Causes" ("Ha-Ṭe'amim"), and finally a horoscope, see Steinschneider, "Berlin Cat. Hebr. MSS." pp. 136–150; "Hebr. Uebers." pp. 600 *et seq.*; Rosin, in "Monatsschrift," 1898, p. 250). He often refers to Astrology in his Bible commentaries. To him heaven with its constellations is "the book of life," in which man's destiny is written, and against which there is recourse to God as "the Almighty," who overrules all these influences (commentary to Ps. lxix. 29; Gen. xvii. 9; Ex. vi. 3, xxxiii. 21; Rosin, *l.c.* p. 251; Zunz, "G. S." iii. 93). Abraham ben David of Posquières, in his critical notes to Maimonides' "Yad," Teshubah, v. 5, also asserts the influence of the stars upon destiny, while contending that by faith in God man may overcome this influence. Judah ha-Levi ("Cuzari," iv. 9), Abraham ibn Daud ("Emunah Ramah," p. 86; see Kaufmann, "Geschichte der Attributenlehre in der Jüdischen Religionsphilosophie des Mittelalters," p. 247), and Albo ("Ikkarim,"

iv. 4) could not free themselves altogether from the belief in the "decrees of the stars"; nor could Naḥmanides (commentary to Gen. i. 16; Lev. xxiii. 24, and elsewhere), Isaac Arama ("Aḳedat Yiẓḥaḳ," xxxiv., Introduction to Ex.), Solomon b. Adret (Responsa, No. 652), and others. Astrology was made the basis of Messianic calculations in almost every century (see Ibn Ezra to Dan xi. 29; Abravanel, "Mashmia' Yeshu'ah"; Azariah dei Rossi, "Meor Enayim," ch. xliii.; Zunz, *l.c.*; Steinschneider, "Jüdische Literatur," in Ersch and Gruber's "Encyc." p. 441, notes 80, 81).

The Basis of Messianic Calculations.

Opposed by Maimonides.

Maimonides was the only authority that opposed Astrology energetically. He found it forbidden by the Law in the verse, "Ye shall not observe times" ("lo te'onenu") Lev. xix. 26, in accordance with R. Akiba, Sanh. 68*b* ("Yad," 'Akkum, xi. 8), and declared it, Talmudical utterances notwithstanding, to be bordering on idolatry, "a disease, not a science, a tree under the shadow of which all sorts of superstitions thrive, and which must be uprooted in order to give way to the tree of knowledge and the tree of life" ("Letter to the Men of Marseilles"; Steinschneider, "Cat. Bodl." col. 1903; *idem*, "Hebr. Uebers." p. 931). However, the belief was too deeply rooted to be abandoned by the great majority of thinkers (see Löw, in "Ben Chananja," 1863, pp. 430-434). As the last important prominent follower of Astrology may be mentioned David Gans, the astronomer and historian, and friend of Tycho de Brahe, the contemporary of Wallenstein, whose historical work, "Zemaḥ David" (see introduction to vol. ii.), lays great stress upon the influence of the constellations upon history.

Modern science has abolished Astrology. Only the formula of congratulations, "Mazzal ṭob" (Good luck), is a survival of the old belief, as is the rejection of certain days in the week or the month for weddings or new ventures (see Shulḥan 'Aruk, Yoreh De'ah, 179, 2).

J. K.

ASTRONOMY.—Biblical Data: Biblical Astronomy, in the broad sense, includes the views taken in the books of the Bible of the position of the earth in the universe, the designation of the stars, planets, fixed stars, and the views held regarding them. The material for the subject, except so far as the earth is concerned, is very meager, dependence for the most part having to be placed on ambiguous references chiefly in the poetical sections. In the present article the stars, planets, and fixed stars in general are dealt with. (For the earth, sun, and moon, see (COSMOGONY, SUN, MOON.) The sky, the abode of the stars, is described as a "raḳia'" (רקיע, a plate); that is, a rigid, broad, solid plate possessing a certain thickness. According to Gen. i. 6, this raḳia' was set in the midst of the waters, and it divided the waters above from those beneath. God "made" it of matter already existing at the time of Creation; that is, He did not "create" it at that time. The raḳia' representing the sky in Ezek. i. 22 resembled ice; therefore it is quite possible that the author of Genesis, like Ezekiel, regarded the sky as being composed of solidified water or ice. Such a sky, being transparent, would permit the stars, which are located above its vault, to be seen through it.

The Four Elements in Genesis.

The heavenly bodies, according to Gen. i. 16, were also made (not created) from existing material, after light had come into existence. They were certainly made of the material of light, just as the vault of the sky was made out of water-material, and the human soul from air (Gen. ii. 7), and all things living upon earth from earth (Gen. i. 24). All these were made of the four elements, light (or fire), water, air, and earth; only those creatures which subsist in air and water—that is, in other elements than those of which they are composed—were created; while man, the image of God, although living on earth and being of the earth, was "created and made" (Gen. i. 26, 27; but see ii. 7).

Stars the Hosts of Heaven.

The stars were supposed to be living creatures. If the difficult passage (Judges v. 20) may be regarded as other than a poetical figure, the stars "walk on the way"; they "come out" in the morning, and "go in" at night. By a miracle, sun and moon are made to stand suddenly still (Josh. x. 12). They fight from their courses like warriors on the march (Judges *ib.*); the poet perhaps thinks of falling stars. In later times the stars are spoken of as "the hosts of heaven." This conception is accurately paralleled among the Assyrians, kinsmen of the Hebrews, who likewise conceive of the stars as soldiers serving the god of heaven, Anu, and probably also the somewhat similar god Ninib, whose abode was the planet Saturn. Eabani (?) is compared in the Gilgamesh epic (tab. i. col. 5, 28, 40; see Schrader, "K. B." vi. i. 130 *et seq.*) with an army of Anu and falling stars or (tab. i. cols. 11, 33, 35; see *ib.* p. 120) with the army of Anu and Ninib. The stars stand in God's presence, to the right and the left of His throne (I. K. xxii. 19; II Chron. xviii. 18); they serve Him (Neh. ix. 6; Ps. ciii. 21), and praise Him (Ps. ciii. 21), cxlviii. 2). Like the kings of earth, they may be consigned by God's judgment to the nether world (Isa. xxiv. 21 *et seq.*); and God will in future execute judgment among them as among the nations of earth (Isa. xxxiv. 4 *et seq.*). Reverence is offered to them as living creatures, even in later times (Jer. viii. 2), and quite naturally upon the housetops (Jer. xix. 13, xxxii. 29; Zeph. i. 5), in the same manner as the Assyrians worshiped the sun (Gilgamesh epic, iii. 2, 7 (15); Schrader, "K. B." vi. 1, 146).

At the head of this starry host stands a "captain of the army" (שר הצבא, Josh. v. 14; Dan. viii. 11); according to the passage in Daniel, he was the star highest in altitude as well. By this designation probably Saturn was intended, the farthest removed from earth and therefore the highest in the heavens,

“Captain of Army.”

and which is held by the Assyrians to be the “bell-wether” of the flock. This starry army belongs to Yhwh; hence the frequent expression “Yhwh of hosts” or “God of hosts” (י׳ [ה]צבאות. אלהי [ה]צבאות) indicates that He is the actual leader of the heavenly array. According to a later view, however (Zech. iv. 2, 10), the seven planets are evidently termed the “seven eyes of God” (Smend, “Alttestamentliche Religionsgesch.” p. 343, note), just as the planet Saturn was the eye of Anu, lord of heaven among the Babylonians. It would appear, therefore, that they were no longer considered independent beings, and of course the other stars likewise. This passage has probably no reference whatever to the seven-armed candlestick of the Temple; and it has no connection with what the Hebrews may or may not have conceived concerning the planets.

Individual Stars.

As regards the individual stars, current opinion holds to-day that four to six, perhaps seven, are named in the Old Testament. Such are: “Kesil” (כסיל, Isa. xiii. 10; Amos v. 8; Job ix. 9; xxxviii., 31), understood generally to be Orion; “Kimah” (כימה, Amos *l.c.*; Job *l.c.*), identical with Sirius or the Pleiades; “ʻAsh” or “ʻAyish” (עש, עיש, Job ix. 9, xxxviii. 32), possibly the Great Bear, possibly the Hyades or Pleiades; “Mazzarot” (מזרות, Job xxxviii. 32), either the Pleiades or Hyades, or possibly the Northern and Southern Crown. Another is mentioned, “Ḥadre Teman” (חדרי תימן, Job ix. 9) but it is doubtful whether or not a constellation is meant by this at all; see G. Hoffmann, in “Zeitschr. Alttestamentliche Wissenschaft,” ii. 107, who holds that Kesil is Orion; Kimah, Sirius; ʻAyish, the Hyades; Mazzarot, the Pleiades; and that חדרי תימן is to be amended to read חדרי תאמין (“chambers of the Twins,” Gemini).

According to this view, all the fixed stars and constellations mentioned in the Old Testament would lie in one region of the stellar hemisphere; and according to Stern (Geiger's “Jüd. Zeit.” iii. 258), these, and these only, are mentioned because they serve to indicate the seasons of the calendar. These identifications, however, admit of no positive proof: for a disconnected tradition can hardly be considered a demonstration. The only case in which anything approaching proof can be adduced is that of ʻAsh or ʻAyish by means of the Talmudic word יותא, “yuta” (mentioned with this star and perhaps etymologically related to it)—in Syriac, עותא; in Arabic, עית (“rain”)—which would agree with the idea of the constellation of the Hyades, the “rain-stars.” It should then be punctuated to read “ʻayush” (Hoffmann).

“Mazzarot,” in Job xxxviii. 32, may perhaps, by comparison with Job xxxvii. 9, where “mezarim” (מזרים) is paralleled by “ḥeder” (חדר, “chamber”), be explained as identical with “Ḥadre Teman” (chambers of the south) (Job ix. 9) or etymologically referred to the Assyrian “massartu” (Babylonian “mazzartu”), a place where something is watched. But it is just as likely to be, as tradition already has it, a variation of “mazzalot” (מזלות, II Kings xxiii. 5) —a word also of uncertain meaning, varying as its explanations do between “planets,” “constellations of the zodiac,” and “stations of the moon.” If the word were indisputably of Assyro-Babylonian origin and related to “manzaltu” or “mazaltu,” either of the two latter significations would probably be the correct one, seeing that “manzaltu” means “stand” or “station,” is also applied to stars, and, like its synonym, “manzazu,” denotes probably some one or other of the zodiacal constellations.

“Kesil,” remarkably enough, is found in the plural in Isa. xiii. 10, where “the stars of heaven and its [or their] kesilim” are spoken of. This is commonly translated “their Orions,” and is explained as meaning “their larger constellations”; but the plural of such a proper name is very hard to understand. One would hardly speak of “the Siriuses” or “the Greater Bears” of the heavens. It is probably to be understood as a generic term, not a proper name at all, and to be translated “stars” instead of “Orions.” A corollary herefrom would be that “ʻAyish” and “Kimah” would then also be generic names and not proper ones, a supposition which their exclusive occurrence in the singular would not disprove (compare the generic singulars in Isa. xxx. 6). And when God, in Job xxxviii. 31 *et seq.*, is said to bind Kimah, open Kesil, and lead ʻAyish, these proper names may well in reality mean nothing more than planets, meteors, or comets, and thus the word “Kesil” (fool) be a not inappropriate name for the vagrant comet, the roving planet, or the headlong meteor. It is true, however that difficulties would arise when considering the “children of ʻAyish” and various other points in connection with these names; and altogether this remarkable plural of Kesil in Isaiah, with its usual translation, must remain a bone of contention.

That “naḥash bariaḥ” (נחש ברח, “flying serpent”; Isa. xxvii. 1 and Job xxvi. 13, denotes a constellation, as has been claimed, rests upon no evidence.

Planets.

Of planets, as far as ascertainable with any degree of certainty, only two are mentioned in the Old Testament: Saturn, called by his Assyrian name “Kévan” (כיון) in Amos v. 26; and “Meleket ha-Shamayim” (מלכת השמים), “the queen of heaven,” Jer. vii. 18, xliv. 17, 25, etc. That the latter means Venus is shown by the cakes which are said to have been baked for her. Among the Assyro-Babylonians the cake-offerings were called “the bread of Ishtar” (Venus).

Helel, Morning. Son of the

It is usually claimed that by the word “Helel” (הילל), “son of the morning,” in Isa. xiv. 12, the morning star, or, more correctly, one of the two morning stars, is meant: and the analogy with הלל (“to glitter”) seems to favor the view. Closely considered, however, there is little foundation for the supposition, since Isaiah gives no intimation whatever that Helel is a star (Gunkel, “Schöpfung und Chaos,” pp. 132 *et seq.*).

The supposition that “Gad” (גד) in Isa. lxv. 11 means “Jupiter,” the god of Fortune, and that “Meni” (מני), in the same verse, means “Venus” (if these readings be correct), rests upon mere hypothesis.

If it were not that the late-Hebrew name “Ẓedeḳ” (צדק = “justice”) for “Jupiter” betrays, not an Assyro-Babylonian origin, but rather a late Jewish one—for among the Assyro-Babylonians Saturn is the star of justice—it might be accepted as an early

Jewish name for that planet; but to endeavor to connect this with the Old Testament proper names "Melchizedek" and "Adonizedek" is, to say the least, hazardous.

The Old Testament contains no more than the preceding concerning Hebrew Astronomy. Of Hebrew astrology before the Babylonian exile, it contains not a word; for the passage Isa. xlvii. 13, wherein astrologers are evidently meant by "the astrologers, the star-gazers, the monthly prognosticators," is regarded by most scholars as post-exilic. This may perhaps indicate that the ancient Hebrews possessed no astrology; at all events, what is known of the astrology of the later Hebrews shows Assyro-Babylonian influence, as is illustrated by the fact that Mercury, for instance, is called "the star," just as the Assyro-Babylonians designate him simply as "the planet."

BIBLIOGRAPHY: Gunkel's recent Commentary on Gen. (Nowack Series) may be consulted for incidental references to Biblical Astronomy; for the Babylonian views, see Jensen, *Kosmologie der Babylonier*, Strasburg, 1890, *passim*; Jastrow, *Religion of Babylonia and Assyria*, xx.-xxii.; Epping-Strassmaier, *Astronomisches aus Babylon*, Freiburg, 1889.

Ancient Conception of Astronomy.

In the Talmud: The study of the universe as a whole was, like all other sciences in olden times, held in closest connection with religion, and was cultivated in the interest of the latter. The star-world was to the heathen an object of worship, but not to the Jews, whether national or Hellenized. With this reverence there was connected a superstition that the stars determined the destiny of man. The computation of time also depends upon a knowledge of the heavenly bodies; and this again was closely connected with religion. It is obvious, therefore, that the Astronomy of the Talmudists could not be an independent science any more than that of the Babylonians, the Egyptians, the Greeks, or of all other nations of antiquity or of the mediæval ages: it was a department of knowledge belonging to theology. Only those data which are purely astronomical are dealt with here; for the rest see ASTROLOGY, CALENDAR, and IDOLATRY. Nor can those cosmological speculations which were prevalent among all nations of antiquity be discussed in this article.

The facts handed down form, however, only a fraction of the astronomical knowledge of the Talmudists; for in their academies they touched upon scientific problems only so far as they related to religious questions, and exercised great reserve regarding their stellar investigations, so as not to betray the secrets of the festival calendar, an important privilege of the house of the Palestinian patriarch and of his tribunal. For these two reasons the following account will naturally give only an inadequate idea of the knowledge of Astronomy among the Jews during the first centuries of the common era. Furthermore, these fragments do not emanate from one homogeneous system, as they are the accumulations of at least four centuries, and are traceable to various authors, Palestinian and Babylonian, among whom some were inclined to mysticism.

Astronomy a Religious Study.

The high value of astronomical knowledge is already demonstrated by the astronomical section of the Book of Enoch (about 72–80), as well as by such sayings as those of Eleazar Ḥisma (about 100), a profound mathematician, who could "count the drops in the ocean" (Hor. 10a), and who declared that "ability to compute the solstice and the calendar is the 'dessert [auxiliaries] of wisdom'" (Ab. iii. 18). Among the sciences that Johanan ben Zakkai mastered was a knowledge of the solstices and the calendar; *i.e.*, the ability to compute the courses of the sun and the moon (Suk. 28a). Later writers declare that "to him who can compute the course of the sun and the revolution of the planets and neglects to do so, may be applied the words of the prophet (Isa. v. 12), 'They regard not the work of the Lord, neither consider the operation of his hands.'" To pay attention to the course of the sun and to the revolution of the planets is a religious injunction; for such is the import of the words (Deut. iv. 6), "This is your wisdom and your understanding in the sight of the nations" (Shab. 75a).

No Scientific Discoveries in Palestine.

Despite the general importance and religious significance attached to Astronomy in the Holy Land, no scientific discoveries were made there. Astronomical observatories and instruments are nowhere mentioned, unless among the latter are included a chart illustrating the various phases of the moon (R. H. ii. 8), and a sort of telescope for the calculation of air-line distances ("mezofot," Yer. 'Er. v. 22d; "shefoferet," Bab. 'Er. 43b). The starry heavens of Palestine interested the Jews, indeed, as creations of God, as means to determine the holidays; but for a better knowledge of them the Jews were undoubtedly indebted to the Babylonians and their Hellenic pupils, as evidenced by the foreign term "gematria," used to designate the computation of the calendar. Possibly this word represents a transposition of *γραμματεία* = "arithmetic, mathematics" (Sachs, "Beiträge," ii. 74)—"a sister science of astronomy from the earliest times, but destined as the mathematical element to obtain adequate importance only in later periods" (Pauly-Wissowa, "Realencyklopädie der Classischen Alterthumswissenschaft," 1831, ii.). Most of the observations of a scientific nature were transmitted by Samuel (250), who attended the schools of the Babylonians, and who claimed to possess as exact a knowledge of the heavenly regions as of the streets of his own city Nehardea. Certain rules must nevertheless have existed; for the patriarch Rabban Gamaliel (about 100), who applied the above-mentioned lunar tablets and telescope, relied for authority upon such as had been transmitted by his paternal ancestors (Yer. R. H. ii. 58b; Bab. R. H. 25a).

As in the Bible, so also in the Talmud, heaven and earth designate the two borders of the universe. The former is a hollow sphere covering the earth. It consists, according to one authority, of a strong and firm plate two or three fingers in thickness, always lustrous and never tarnishing. Another tannaitic authority estimates the diameter of this plate as one-sixth of the sun's diurnal journey; while

Conceptions of Heaven and Earth.

another, a Babylonian, estimates it at 1,000 parasangs. According to others, the diameter of the firmament is equal to the distance covered in 50 or 500 years; and this is true also of the earth and the large sea ("Tehom") upon which it rests (Yer. Ber. i. 2*c*; Targ. Yer. Gen. i. 6). The distance of the firmament from the earth is a journey of 500 years—a distance equivalent to the diameter of the firmament, through which the sun must saw its way in order to become visible (Yer. Ber. i. 2*c*, bot.; Pes. 94*a*). The firmament, according to some, consists of fire and water, and, according to others, of water only; while the stars consist of fire (Yer. R. H. ii. 58*a*). East and west are at least as far removed from each other as is the firmament from the earth (Tamid. 32*a*). Heaven and earth "kiss each other" at the horizon; and between the water above and that below there are but two or three fingerbreadths (Gen. R. ii. 4; Tosef., Ḥag. ii. 5). The earth rests upon water and is encompassed by it. According to other conceptions the earth is supported by one, seven, or twelve pillars. These rest upon water, the water upon mountains, the mountains upon the wind, and the wind upon the storm (Ḥag. 12*b*; Yer. Ḥag. ii. 77*a*). The nations of antiquity generally believed that the earth was a disk floating on water. There is also mentioned the terrestrial globe, "kaddur," though it may also be translated as "disk." When Alexander the Great attempted to ascend to heaven he rose even higher and higher, until the earth appeared as a globe and the sea as a tray (Yer. 'Ab. Zarah iii. 42*c*, bot.). The earth is divided into three parts, viz., habitable land, desert, and sea.

It was assumed that our present earth was preceded by many others which were not good in the eyes of the Creator, who traverses in all 18,000 worlds, and for this reason is frequently styled "Lord of the Worlds" (Gen. R. iii. 7, ix. 2; Midr. Teh. xxxiv.). The ocean also is mentioned in the Talmud, and the whole world is said to drink of its waters (Ta'an. 9*b*). According to mystic speculation there are seven heavens, the first of which is called "velum" (curtain); the second, "firmament," etc. (Ḥag. 12*b*). Whether these worlds are similar to ours is not stated. The correct impression concerning the infinitude of the starry host is expressed in the following sentence of R. Simeon b. Laḳish (about 250): "There are twelve mazzalot [signs of the zodiac], each having thirty armies; each army, thirty camps [נסטרא = *castra*]; each camp, thirty legions [compare Matt. xxvi. 53]; each legion, thirty cohorts; each cohort, thirty corps [compare Krauss, "Lehnwörter," *s.v.* רהטון]; and each corps has 365,000 myriads of stars entrusted to it" (Ber. 32*b*).

The Talmud subscribes, as do all astronomers before the time of Copernicus, to the geocentric world-conception, according to which the stars move about the earth. The conceptions of this motion were various. Aristotle believes that the stars have no motion of their own, being firmly attached to circles of rotation; and he further ascribes to every circle containing a star a sphere of motion whose center is the earth (Pauly-Wissowa, "Realencyklopädie der Classischen Alterthumswissenschaft," 1841, ii.).

Motions of the Heavenly Bodies.

Perhaps the wonderful Baraita Pesaḥim 94*b* gives expression to this idea in the following: "The learned of Israel say, 'The sphere stands firm, and the planets revolve'; the learned of the nations say, 'The sphere moves, and the planets stand firm.' The learned of Israel say, 'The sun moves by day beneath the firmament, and by night above the firmament'; the learned of the nations say, 'The sun moves by day beneath the firmament, and by night beneath the earth.'" The patriarch Judah I. (about 200) believed that in the first instance the Jewish, and in the second the non-Jewish, conception was correct. The sun travels in four directions. During Nisan, Iyyar, and Siwan (spring) it travels in the south, in order to melt the snow; during Tammuz, Ab, and Elul (summer), directly above the earth, in order to ripen the fruit; during Tishri, Ḥeshwan, and Kislew, above the sea, in order to absorb the waters; and in Ṭebet, Shebaṭ, and Adar, over the desert, in order that the grain may not dry up and wither (*ib.*).

The sun has 365 windows through which it emerges; 182 in the east, 182 in the west, and 1 in the middle, the place of its first entrance. The course described by it in a year is traversed by the moon in 30 days. The solar year is longer by 11 days than the lunar year (Yer. R. H. ii. 58*a*). The sun completes its course in 12 months; Jupiter, in 12 years; Saturn, in 30 years; Venus and Mars, in 480 years (Gen. R. x. 4); however, an objection is raised here (in a gloss) against the last-mentioned number. King Antoninus asked the patriarch why the sun rises in the east and sets in the west. At the time of the Deluge it traveled in the opposite direction (Sanh. 91*b*, 108*b*). Every 28 years it returns to its original point of departure, and on Tuesday evening of the spring solstice it is in opposition with Saturn, although Plato maintained that the sun and planets never return to the place whence they started. This is the cycle of 28 years (Ber. 59*b*); the moon-cycle of 19 years may have been meant in the Targ. Yer. Gen. i. 14.

Six Seasons.

The four solstices (the Teḳufot of Nisan, Tammuz, Tishri, and Ṭebet) are often mentioned as determining the seasons of the year; and there are occasional references to the rising-place of the sun ('Er. 56*a*). Sometimes six seasons of the year are mentioned (Gen. R. xxxiv. 11), and reference is often made to the receptacle of the sun (*ναρθήκιον*), by means of which the heat of the orb is mitigated (Gen. R. vi. 6, and elsewhere). The revolutions of the moon were undoubtedly known; for "Israel computes by the moon, the other nations by the sun" (Suk. 29*a*, and elsewhere). God expressly prohibits the revealing of the secrets of chronology (Ket. 112*a*). Samuel sent to R. Johanan a list of the leap-years for sixty years, which the latter did not regard as exhibiting any remarkable mathematical skill (Ḥul 95*b*). "The moon begins to shine on the 1st of the month; its light increases until the 15th, when the disk [דסקוס (*δίσκος*)] is full; from the 15th to the 30th it wanes; and on the 30th it is invisible" (Ex. R. xv. 26).

From the names of the seven planets were derived the names of the days of the week; and each day

Seven Planets.

was consecrated to the particular planet that ruled during the early hours of the morning. The Talmudists were familiar with the planets and their characteristics (see Astrology); but only the week-days were counted, while the Sabbath had a name of its own. The names of the seven planets are: (1) "Shabbetai," Saturn; (2) "Ẓedeḳ," Jupiter; (3) "Maadim," Mars; (4) "Ḥammah," the sun; (5) "Kokebet" or "Nogah," "Kokab-Nogah," Venus; (6) "Kokab," Mercury; (7) "Lebanah," the moon. According to the first letter of each of their names, they are called "SheẒaM ḤeNKaL" (Shab. 129b, 156a; Pesiḳ. R. xx.; Pirḳe R. El. vi.). The worship of Venus is mentioned (Pesiḳ. R. xxxi., ed. Friedmann, p. 143a), and warning is given not to confuse it with the dawn (איילתא דשחרא: Yer. Ber. i. 2c).

The Zodiac.

The twelve constellations of the zodiac are: Aries ("Taleh"), Taurus ("Shor"), Gemini ("Teomim"), Cancer ("Sarṭon"), Leo ("Ari"), Virgo ("Betulah"), Libra ("Moznayim"), Scorpio ("'Aḳrab), Sagittarius, Archer ("Ḳasshat"), Capricornus ("Gedi"), Aquarius ("Deli"), and Pisces ("Dagim"). According to the first letter of each, they are collectively called "ṬeSHeT," "SaAB," "Ma'AḲ," "GeDaD" (Pesiḳ. R. l.c., and Pirḳe R. El. l.c.; Rashi on B. M. 106b, and elsewhere). The first three are in the east, the second three in the south, the third three in the west, and the last three in the north; and all are attendant on the sun. According to one conception, Aries, Leo, and Sagittarius face northward; Taurus, Virgo, and Capricornus westward; Gemini, Libra, and Aquarius southward; and Cancer, Scorpio, and Pisces eastward (Yalḳ., Ex. 418; Kings 185). According to the tannaitic view, Taurus ("'Eglah") is in the north and the Scorpion in the south ('Er. 56a; Pes. 94a). [Some read "'Agalah" (Wagon = Charles's Wain), see Tos. to Pes. l.c.] Each constellation rules for one month; viz., Aries in Nisan (March), Taurus in Iyyar (April), etc. (Pesiḳ. R. xxvii., ed. Friedmann, p. 133b; Pesiḳ. R. K. xiii. 116a). That the zodiacal circles were generally known is evident from the frequency of their interpretation in sermons and from their liturgical application in post-Talmudic times. An allusion to Aquarius is found also in a Babylonian incantation (Giṭ. 69a).

Other Stars and Comets.

The Milky Way is called "Fire-Stream," a name borrowed from Daniel vii. 10 ("Nehar di-nur"), where it may possibly have had the same signification. The statement is also made that the sting of Scorpio may be seen lying in the Milky Way (Ḥag. 13b; Ex. R. xv. 6, נהר אש; Ber. 58b). Samuel said: "We have it as a tradition that no comet ever passed across the face of Orion ["Kesil"]; for if this should happen the earth would be destroyed." When his hearers objected to this statement, saying, "Yet we see that this occurs," Samuel replied: "It only appears so; for the comet passes either above or below the star. Possibly also its radiance passes, but not its body." Again, Samuel says: 'But for the warmth of Orion, the earth could not exist, because of the frigidity of Scorpio; furthermore, Orion lies near Taurus, with which the warm season begins (Yer. Ber. ix. 13c; Bab. Ber. 58b). The comet, because of its tail, is called "kokba de-shabbiṭ" (rod-star). Joshua b. Hananiah, the famous teacher of the Law (about 100), declared that a star appears once every seventy years and leads mariners astray; hence they should at such time lay in a larger store of provisions (Hor. 10a). Rapoport endeavors to prove that the path of Halley's comet had been computed by a wise rabbi (Epistle to Slonimski in "Toledot ha-Shamayim," Warsaw, 1838). Samuel said: "I know all the paths of heaven, but nothing of the nature of the comet."

The following Biblical names of constellations are mentioned and explained: כימה = כמאה, Pleiades [a cluster of] about a hundred stars, and for the much-disputed עש, its equally obscure Aramaic equivalent יותא (MS. M. אתא), Syriac עיותא, is given (Ber. 58b). The following two sagas also have reference to natural phenomena. When R. Jacob died, stars were seen by day; when R. Ḥiyya died, stones of fire fell from heaven (M. Ḳ. 25b). The latter may possibly be a reference to meteors.

J. SR. L. B.

——**In Post-Talmudic Times:** With the revival of Greek science which took place in Islam, Jews were intimately connected, and the "Almagest" is said to have been translated by Sahal ibn Tabari as early as 800, while one of the earliest independent students of Astronomy among the Arabs was Mashallah (754-873?). Jews seem to have been particularly concerned with the formation of astronomical tables of practical utility to astronomers. Sind ben Ali (about 830) was one of the principal contributors to the tables drawn up under the patronage of the Sultan Maimun. No less than twelve Jews were concerned in the Toledo tables, drawn up about 1080 under the influence of Aḥmad ibn Zaid, and the celebrated "Alfonsine Tables" were executed under the superintendence of Isaac ibn Sid, while Jews were equally concerned in the less-known tables of Pedro IV.

Isaac Alḥadib compiled astronomical tables from those of Al-Rakkam, Al-Battam, and Ibn al-Kammad. Joseph ibn Wakkar (1357) drew up tables of the period 720 (Heg.); while Mordecai Comtino and Mattathia Delacrut commented upon the Persian and Paris tables respectively; the latter were commented upon also by Farissol Botarel. Abraham ibn Ezra translated Al-Mattani's Canons of the Khowarezmi Tables, and in his introduction tells a remarkable story of a Jew in India who helped Jacob ben Tarik to translate the Indian astronomical tables according to the Indian cycle of 432,000 years. Other tables were compiled by Jacob ben Makir, Emanuel ben Jacob, Jacob ben David ben Yom-Ṭob Poel (1361), Solomon ben Elijah (from the Persian tables), and Abraham Zacuto of Salamanca (about 1515).

The earliest to treat of Astronomy in Hebrew on a systematic plan was Abraham bar Ḥiyya, who wrote at Marseilles, about 1134. Discussions on astronomical points, especially with regard to the spheres, and disputed points in calculating the calendar occur frequently in the works of Judah ha-Levi, Abraham ibn Ezra, and Maimonides, while a new system of Astronomy is contained in the "Wars of the Lord" ("Milḳamot Adonai") of Levi ben Gerson.

Jews were especially helpful in the progress of the science by their work as translators: Moses ibn Tibbon translated from the Arabic Jabir ben Atlah's acute criticisms of the Ptolemaic system, an anticipation of Copernicus, and, thus brought them to the notice of Maimonides. Ibn al-Haitham's Arabic compendium of Astronomy was a particular favorite of Jewish astronomers; besides being translated into Spanish by Don Abraham Faquin, it was turned into Hebrew by Jacob ben Makir and Solomon ibn Pater Cohen and into Latin by Abraham de Balmes. Other translations from the Arabic were by Jacob Anatoli, Moses Galeno, and Kalonymus ben Kalonymus, who thus were the means of bringing the Greco-Arabic astronomers to the notice of western Europe. Jacob Anatoli, for example, translated into Hebrew both the "Almagest" and Averroes' compendium of it, and this Hebrew version was itself translated into Latin by J. Christmann. Other translators from the Hebrew into Latin were Abraham de Balmes and Kalonymus ben David of Naples, while David Kalonymus ben Jacob, Ephraim Mizrahi, and Solomon Abigdor translated from the Latin into Hebrew. The well-known family of translators, the Ibn Tibbons, may be especially mentioned. In practical Astronomy Jewish work was even more effective. Jacob ben Makir (who is known also as Prophiat Tibbon) appears to have been professor of Astronomy at Montpellier, about 1300, and to have invented a quadrant to serve as a substitute for the astrolabe. Levi ben Gerson was also the inventor of an astronomical instrument, and is often quoted with respect under the name of Leon de Bañolas. Bonet de Lattes also invented an astronomical ring. Abraham Zacuto ben Samuel was professor of Astronomy at Salamanca, and afterward astronomer-royal to Emanuel of Portugal, who had previously been advised by a Jewish astronomer, Rabbi Joseph Vecinho, a pupil of Abraham Zacuto, as to the project put before him by Columbus, who, in carrying it out, made use of Zacuto's "Almanac" and "Tables."

With the Renaissance, Jewish work in Astronomy lost in importance, as Europe could revert to the Greek astronomers without it. The chief name connected with the revival of astronomical studies on the Baltic is that of David GANS of Prague (d. 1613), who corresponded with Kepler, Tycho Brahe, and Regiomontanus: he was acquainted with the Copernican system, but preferred that of Ptolemy, while as late as 1714 David Nieto of London still stood out against the Copernican system. Altogether, in reviewing Jewish Astronomy in the Middle Ages, one can not claim that Jews themselves made many contributions to the science; but by making the Greco-Arabic Astronomy accessible to Europe, they aided in keeping the interest in the subject alive, and prepared the way for the revival of the science in the sixteenth century. On the practical side of the science, their chief contributions were of more value: almost all the tables used by astronomers and navigators were their work, while they introduced several improvements in astronomical instruments. See also CALENDAR.

The modern epoch of the science begins with a great Jewish name, that of Sir William HERSCHEL (1738-1822), whose Jewish origin is acknowledged by his biographer. His systematic survey of the heavens, continued and completed by his son John, his catalogues of nebulæ and clusters, and his discovery of the planet Uranus, may be classed among the greatest exploits in the history of Astronomy. He also started the investigation into the constitution of the universe, determined the path of the sun toward the constellation Vega, and in innumerable ways started this science along the lines on which it developed up to the time of the discovery of spectrum analysis. He was assisted throughout his work by his sister Caroline Herschel (1750-1848). Since his time no very great Jewish name has been connected with the development of astronomical science, but no less than fourteen of the asteroids were located by H. Goldschmidt (1802-66)—at a time when the discovery of an asteroid was by no means so easy a task or so frequent an occurrence as it is nowadays—and W. Beer (1797-1850), the brother of Meyerbeer, was the first to draw an accurate map of the moon. Of contemporaries, the most distinguished is Moritz Loewy (b. 1833), director of the Paris Observatory, and the inventor of the coudé or elbow telescope, by which the stars may be observed without bending the neck back and without leaving the comfortable observatory.

The following list of Jewish astronomers of the Middle Ages, with the approximate periods of their activity, arranged in alphabetical order of first names, some of whom are mentioned elsewhere in this work, may be of service in drawing attention to the minuter details:

Abraham de Balmes.
Abraham ibn Ezra (1093-1168).
Abraham bar Ḥiyya (1130).
Abraham of Toledo (1278).
Abraham Zacuto ben Samuel (16th cent.).
Andruzagar ben Zadi Faruch.
Augustinius Ricius (1521).
Baruch Sklow (circa 1777).
Baruch ben Solomon ben Joab (1457).
Bianchino (15th cent.).
Bonet de Lattes (1506).
Caleb Afendopolo (15th cent.).
David Gans (died 1613).
David Kalonymus ben Jacob (1464).
David ibn Nahmias.
David Nieto (died 1728).
Dayan Ḥassan (972).
Elia Misraḥi (died 1526).
Emanuel ben Jacob (1346-65).
Ephraim Mizraḥi.
Farissol Moses Botarel (1465).
Hananeel ben Ḥushiel (died 1050?).
Ḥayyim Lisker (1612-36).
Ḥayyim Vital Calabrese (died 1620).
Isaac ben Aaron (1368).
Isaac Abu al-Khair ben Samuel (1340).
Isaac Albalia ben Baruch (1035-94).
Isaac ibn Alḥadib (1370).
Isaac Israeli ben Joseph (1310-30).
Isaac ben Meir Spira.
Isaac ben Moses Ephodaeus, Prophiat Duran (1382-1403).
Isaac ibn Sid (1252).
Israel Lyons (died 1775).
Israel Samose (died 1772.)
Jacob Anatoli (1232).
Jacob Carsi (Jacob al-Corsono ben Abi Abraham Isaac, 1376).
Jacob ben David ben Yom-Ṭob Poel (1361).
Jacob ben Elia.
Jacob ben Judah Kabrut (1382).
Jacob ben Makir, Prophiat Tibbon (1289-1303).
Jacob ben Samson (1123-42).
Jacob ben Tarik (9th cent.?).
Jeremiah Cohen of Palermo (1486).
Joseph ben Eleazar (14th cent.).
Joseph ben Isaac ben Moses ibn Wakkar (about 1357).

G. J.

ASTRUC: A prænomen used frequently by Jews in southern France and eastern Spain; used to this day as a family name in France. It is derived from the Provençal *astruc*, "happy" (compare *benastruc* and *malastruc*, and the Spanish *astrugo*, from the Latin *aster*, a star). In the dialect of Languedoc, Astruc signified "born under a favorable star" (Genin, "Récréations Philologiques," ii. 79, Paris, 1856). This confirms the supposition of Dukes that the name represents the Hebrew מזל טוב ("good luck"); and a MS. which formerly belonged to the Almanzi collection was written by a "Rabbi נר, who is called Astruc bar Jacob" (Steinschneider, "Hebr. Bibl." v. 47). Even in its Roman form, Asterius ('Αστέρις, 'Αστερία), it occurs not only on Christian inscriptions of Spain (Hübner, "Inscript. Hispan. Christian. Supplem." Berlin, MCM., p. 70) and of Gaul (Le Blant, "Inscript. Cret. de la Gaule," ii. 445), but also on the Jewish catacombs of Rome (Garucchi, "Cimitero degli Antichi Ebrei," 1862, p. 24; Schürer, "Gemeindeverfassung der Juden in Rom," 1879, p. 14; Berliner, "Gesch. der Juden in Rom," i. 74). In a Latin-Jewish inscription the name of "Claudia Aster" of Jerusalem occurs (Mommsen, "Inscr. Neapol. Lat." No. 6467). A certain Bonastruc Abigedor translates his name into "Fortunio Avigdor" in MS. 2232 of the Bodleian Library, Oxford (Neubauer, "Catalogue," col. 770; compare Steinschneider, "Hebr. Uebers." pp. 965, 977). In Hebrew MSS. the name is written אסטרוק, אישתרוק (Steinschneider, "Hebr. Bibl." *l.c.*), אישתרוג, שתרוק, נבתרוד, נשתרוק, and נשתרוקי ("Ecrivains Juifs," p. 549); in non-Hebrew documents, Astruch ("Revue Etudes Juives," iv. 68), Astrug (*ib.*), Astruz (Zunz, "Zur Gesch." p. 473), Astrugo (Jacobs, "Sources," Index, *s.v.*), Astrugon (Gross, "Gallia Judaica," p. 342), Asdrach ("Revue," iv. 6), Nastruch (Kayserling, "Juden in Navarra," p. 161), Strug ("Jew. Quart. Rev." viii. 493), Struch (Kayserling, *l.c.* p. 161), and Struchus ("Revue Etudes Juives," xl. 170). In a document of the year 1661 relating to certain Jews in Mannheim, "Abraham and Moïse Astroucg" occur (Löwenstein, "Gesch. der Juden in der Kurpfalz," p. 80; compare Kalman Astruc in the Worms Memorbuch, ed. Berliner, p. 48). The name occurs in Italian in the form Astruccio (Vogelstein and Rieger, "Gesch. der Juden in Rom," ii. 438). The feminine form of the name is Astruga ("Revue Etudes Juives," xxxix. 265). In composite names we have the forms Bon Astruc (compare Bonenfant, Bonfil, Bonisac, etc.) and Sen Astruc.

Among the martyrs of Cologne in 1096, the name of a certain Astorio (אשטוריו) occurs, which may possibly be a form of the Latin Asterius (Salfeld, "Nürnberger Memorbuch," p. 110). It is doubtful whether the name Estori ha-Parḥi (lived in Provence and Palestine, fourteenth century) ought to be cited in this connection (Steinschneider, "Hebr. Bibl." xv. 108; "Hebr. Uebers." 977, note 45).

The earliest mention of the name Astruc seems to be that of Mal-Astrug (*i.e.*, Miles Astrug) of Marseilles in the year 1040. A document of the year 1231 mentions a Solomon "filius Astruc" of Megueil. Abba Mari ben Abraham (d. about 1240) was called Don Astruc des Gabbai (Gross, "Gallia Judaica," p. 103). Judah ben Astruc is mentioned in a Barcelona document of the year 1287 as interpreter of King Alfonso of Murcia. In 1435 a Rabbi Astruch, "Maitre de la Synagogue," was burned at Palma in the Balearic Islands.

During the Middle Ages the Astruc family seems to have lived chiefly in the comtat of Avignon. When in 1550 permission was given the Portuguese Jews to settle in Guienne, the Astrucs were among the first to avail themselves of the privilege. The earliest ancestor of the modern Astruc family in Bordeaux was Israel bar Josuan Astruc, about the year 1660. The sketch-pedigree given on page 253, in which, however, some of the branches have not been indicated, will show the descent of the family.

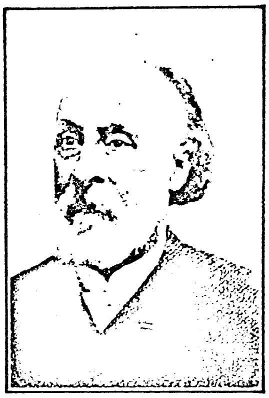
ASTRUC CRESCAS. See CRESCAS.

ASTRUC EN-DURAN. See ABBA MARI BEN MOSES OF LUNEL.

ASTRUC, ELIE-ARISTIDE: French rabbi and author; born at Bordeaux, Nov. 12, 1831. He received his early education in his native city and took a course of study at the rabbinical college of Metz, to which he was sent with a scholarship by the community of Bayonne in 1852. On the completion of his studies in 1857, he was appointed assistant to the chief rabbi of Paris, and became chaplain of the Paris lyceums of Louis le Grand, Vanves, and Chaptal. He was one of the six founders of the Alliance Israélite Universelle (1860), and in 1865 was delegate from Bayonne to the convention for the nomination of chief rabbi of France. In 1866 he was elected chief rabbi of Belgium, and was authorized by a special decree of the emperor to accept the office though remaining a French citizen. While holding this position, he took part in the synod of Leipsic (June 29—July 4, 1869).

During the Franco-Prussian war (1870-71), Astruc distinguished himself both as a French patriot and as a Jewish minister. He was a member of the comité du pain, whose chairman, the Comte de Mérode, leader of the Belgian Catholic party, cared for the wounded. In his capacity of secretary to the "Belgian committee for the liberation of the territory (Alsace and Lorraine)," Astruc revisited Metz after an absence of twenty years.



Elie-Aristide Astruc.

In 1879 Astruc resigned the chief rabbinate of Belgium to return to his native country. Before his departure the King of the Belgians created him a knight of the Order of Leopold. After officiating as chief rabbi of Bayonne from 1887 to 1891, he retired to private life.

Astruc is a successful writer. The first of his works was a French metrical translation of the principal liturgical poems of the Sephardic ritual, entitled "'Olelot Eliahu" (Elia's Gleanings), published in 1865. In 1869 he published "Histoire Abrégée des Juifs et de Leurs Croyances," a small book which caused a sensation at the time, on account of the author's boldness. As Astruc said, he wished "to separate the kernel from its shell"; that is, to disengage the great ideas of Judaism from venerable but partially legendary traditions. A second edition of the work was issued in 1880.

In the pulpit Astruc displayed the same independent yet moderate views, and always boldly proclaimed his moral convictions and his attachment to the Jewish faith. His more important sermons were collected and published under the title "Entretiens sur le Judaisme," 1879. In 1884 he wrote "Origines et Causes Historiques de l'Anti-Sémitisme," which was translated into German and Hungarian. He contributed to various reviews—among others, the "Revue de Belgique," "Revue de Pédagogie," and the "Nouvelle Revue"—a number of articles in which he endeavored to impress non-Jews with correct views of the history and doctrines of Israel; also essays on the political societies of Belgium, on Pope Leo XIII., etc.

s. J. W.

ASTRUC DÈS GABBAI, or **ABBA MARI BEN ABRAHAM:** Provençal scholar; lived at Béziers toward the end of the thirteenth century and the beginning of the fourteenth. Nothing is known of his life and his scientific activity. His name was transmitted by his relative, or perhaps by his grandson, Abraham Bedersi, who in an elegy composed on the occasion of the death of Don Bonafos Roguet bewails also Astruc dès Gabbai, who died several years before.

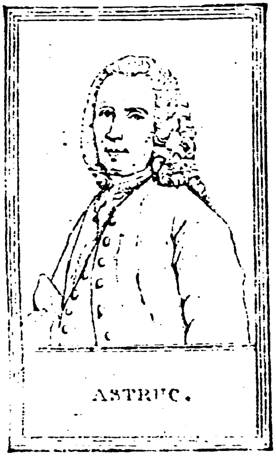
G. I. Br.

ASTRUC, JEAN: Physician and founder of modern Pentateuch criticism; born at Sauve, France, March 19, 1684; died in Paris May 5, 1766. His father was a Huguenot, but became a Catholic. He studied medicine and became professor of anatomy in Toulouse, in Montpellier, and finally in Paris. Astruc owes his prominent place in Biblical literature to his work entitled "Conjectures sur les Mémoires Originaux dont Il Paroit que Moyse s'est Servi pour Composer le Livre de la Genèse," published anonymously at Brussels in 1753, which furnished the starting-point for the modern criticism of the Pentateuch.

Long before Astruc, certain Jewish scholars—among them Ibn Ezra and Baruch Spinoza—not being satisfied with the summary reply of the rabbinical commentators, "The Torah does not arrange its facts chronologically" (אין מוקדם ומאוחר בתורה. Yer. Soṭah viii. 22*d*), had dealt more or less critically with the anachronisms and chronological incongruities of the Pentateuch. Astruc's immediate predecessors were Le Clerc (Clericus), Richard Simon, Fleury, and François; but none of these went beyond the generalization that the Pentateuch was composed of different documents. Astruc was the first to offer an explanation of the character and mutual relations of these documents.



Jean Astruc.
(After a drawing by Vigée in "Biographie Universelle.")

Struck by the fact that in some portions of Genesis the divine name "Elohim" (Engl. version, "God") was used, and in others the divine name "Yhwh" (Engl. version, "the Lord"), he advanced the hypothesis that there had originally existed a number of isolated documents, the materials of which Moses separated and then rearranged, and into which confusion was subsequently introduced by copyists. Thus (from the method of Moses and the work of the copyists) he accounted for the two lines of narrative (Elohistic and Jahvistic) and for the repetitions and antichronisms. Astruc assumed two principal documents: the Elohim narrative, A; the Yhwh story, B, and some ten fragmentary ones. On the basis of this conjecture he rearranged (in two columns, A and B) Genesis and the first two chapters of Exodus. To the Elohim narrative he assigned Gen. i.-ii. 3; v.; vi. 9-22; vii 6-10, 19, 22, 24; viii. 1-19; ix. 1-10, 12, 16, 17, 28, 29; xi. 10-26:

GENEALOGICAL TREE OF THE ASTRUC FAMILY.

xvii. 3-27; xx. 1-17; xxi. 2-32; xxii. 1-10; xxiii.; xxv. 1-11; xxx. 1-23; xxxi. 4-47, 51-54; xxxii. 1-3 (1, 2), 25 (24)-33; xxxiii. 1-16; xxxv. 1-27; xxxvii.; xl.-xlviii.; xlix. 29-33; l.; Ex. i.; ii. To the YHWH source belong ii. 4-iv.; vi. 1-8; vii. 1-5, 11-18, 21, 24; viii. 20-22; ix. 11, 13-15, 18-29; x.; xi. 1-9, 27-32; xii.; xiii.; xv.-xvii. 2; xviii.-xix. 28; xx. 18; xxi. 1, 33, 34; xxii. 11-19; xxiv.; xxv. 19-34; xxvi. 1-33; xxvii.-xxviii. 5, 10-22; xxix.; xxx. 24-43; xxxi. 1-3, 48-50; xxxii. 4-24 (3-23); xxxiii. 17-20; xxxviii.; xxxix.; xlix. 1-28. To a third column, C, he assigned various repetitions (vii. 20, 23, 24; xxxiv. [?]). A fourth division, D, supposed to contain material foreign to Hebrew history, he subdivided into eight columns, as follows: E, xiv.; F, xix. 29-38; G, xxii. 20-24; H, xxv. 12-18 (and perhaps 1-5); K, xxvi. 34, 35; xxviii. 6-9; I, xxxiv.; L, xxxv. 28, 29; xxxvi. 1-19, 31-43; M, xxxvi. 20-30. He assumed also a few additions by the compiler, and some glosses. As authors of the documents he suggested Amram (who drew perhaps from Levi, and this last from Jacob, Isaac, and Abraham), Joseph, the Midianites (for the genealogies in H.K.L.M), and the Moabites and Ammonites (for F).

Astruc's hypothesis was accepted (or, perhaps, independently reached) and further developed by Johann Gottfried Eichhorn, who made it the foundation of what he was the first to designate as "the Higher Criticism." The chief advance of modern Pentateuch criticism has been to divide Astruc's Elohistic source into two—one of which (P) is the latest constituent of the Hexateuch—to distinguish the Deuteronomistic writings, and to define the literary characters and the historical and religious points of view of the documents. While certain of the details of Astruc's analysis have not stood the test of time, his general critical principles have been retained substantially as he held them.

ASTRUC KALONYMUS. See KALONYMUS.

ASTRUC HA-LEVI OF DAROCA: Talmudic scholar; lived in Spain at the end of the fourteenth and at the beginning of the fifteenth century. He was a delegate to the famous disputation at Tortosa, in 1413, under the presidency of Pope Benedict XIII., at which he displayed great energy and breadth of mind. Attacks having been made on the Talmud, based on some extravagant haggadic sentences, Astruc handed to the assembly a written declaration, in which he denied any authority to the Haggadah, and utterly renounced it.

On another occasion, Astruc dared even the anger of the pope. Benedict XIII. having pointed out the improbability of the haggadic legend that the Messiah was born on the day of the destruction of the Temple and was now in paradise, Astruc said: "Lord and Pope, you believe so many improbabilities about your Messiah, let us believe this single one regarding ours."

ASTRUC DE PORTE. See NAHMANIDES.

ASTRUC RAIMUCH (FRANCISCO GOD-FLESH, DIOSE CARNE). See RAIMUCH.

ASTRUC, ZACHARIE: French sculptor, painter, and author; born at Angers, department of Maine-et-Loire, in 1839. While still a boy he left his native city to seek his fortune in the French metropolis. In 1859 he founded, in collaboration with Valéry Vernier, the "Quart d'Heure Gazette des Gens à Demi-Sérieux"; devoting himself, at the same time, with great zeal to the study of art. He was commissioned in 1874 to make a reproduction of the famous statue of St. Francis of Assisi, which had been jealously guarded from the envious eyes of all artists in a shrine of a monastery in Toledo. He was thus enabled to carry out of Spain the first sculpturally exact and faithful copy of Alonzo Cano's masterpiece. It was exhibited in 1875 at the Exposition des Beaux-Arts, Paris, and the numerous copies taken from that exquisite model have made it a familiar subject with all lovers of art.

Astruc is a member of the Society of French Artists, and has been for many years a faithful and prolific contributor to the Salon of the Champs Elysées, where his works have always called forth favorable comment. His talents are as varied as they are excellent, and he wields a brush as readily as a chisel. Particularly noteworthy among his paintings are his large panels in water-color, of which a series of six was purchased by the state and placed in the museum of St. Etienne. As a sculptor his reputation is even greater, and won him a prominent place among the best modern French artists. Rewarded at the Salons of 1882, 1884, 1885, 1886, as well as at the Universal Exposition of 1889, he is now "hors de concours." In 1890 he was decorated with the Cross of the Legion of Honor.

The principal art works of Astruc are: "Mars et Venus," plaster group, 1886; "Hamlet," 1887; "Le Roi Midas," statue in bronze, 1888; "Portrait de M. le Comte Fabre de l'Aude," bust in bronze, 1888; "Perce-neige," statue in plaster, 1889; "Portraits Masques," 1889; "Le Repas de Prométhée," plaster statue, 1891; "Le Moine: L'Extase dans le Sommeil," marble statue, 1893 (bought by the government); "Barbey d'Aurevilly," bust in bronze; "L'Enfant Marchand de Masques—now in the gardens of the Luxembourg; "Le Saint-François d'Assises," statue—copy of the original of Alonzo Cano described above; "Manet," bust in bronze; "L'Aurore," bronze relief, now at the Ecole de Saint Cyr; "Le Sâr Peladan," salon of 1899; decorative figures for the exposition at Nice, etc.

Astruc is, moreover, a litterateur of no mean reputation. Besides his early venture as editor of the "Quart d'Heure," he has written: "L'Histoire Funèbre de Faubert"; "Les Onze Lamentations d'Eliacin"; "Le Récit Douloureux"; "Les Quatorze Stations du Salon de 1859," a collection of art criticisms published in one volume, with a preface by George Sand. He has also contributed, as an art critic, to "Le Pays," "L'Etendard," "L'Echo des Beaux-Arts," "Le Peuple Souverain," etc. He is the author of several novels, short stories, and plays, among which may be mentioned: "Bug

Mug," a short story which appeared in the pages of the "Opinion Nationale"; "Sœur Marie Jésus," a novel published in the "Revue Germanique"; and "L'Arme de Femme," a comedy published in the "Revue Internationale." In 1863, in collaboration with the great writers of the day, Astruc founded "Le Salon," a journal devoted exclusively to art, and which appeared daily during the annual exposition. It lasted only for a short time. In 1870 he founded in Madrid another art journal, "L'Espagne Nouvelle," and wrote several sketches for different contemporary reviews, descriptive of his sojourn in Spain. Astruc was the author of a novel entitled "Romancero de l'Escurial," which he wrote in Spanish, and which was published in Paris by Charpentier in 1884, followed by its sequel, "Le Généralité." He is also the author of a volume of Spanish poems, "Les Alhambra."

S. A. S. C.

ASUFOT: "Collection"; that is, the name of a medieval compilation of laws, customs, habits, and practises of a religious character, similar to other medieval compendiums of a legal character. It is preserved in a unique manuscript (No. 115) in the Montefiore College Library, Ramsgate, England. The author, who lived at the beginning of the fourteenth century, collected from numerous authors, of whom he mentions a large number, a rich store of information from halakic decisions, special "minhagim," and popular customs; and the collection throws light upon the ordinary life of the Jews in the Rhine country during the twelfth and thirteenth centuries. The manuscript is almost throughout endowed with vowel-signs. It is probably the only non-liturgical and non-Biblical text that has these signs.

Character.

The author had at his disposal very rich literary resources, and displays more interest in every branch of religious life than the majority of similar compilers. He has a peculiar gift for noting down local customs and even superstitions, a feature that greatly enhances the value of the book. Another important characteristic is the accuracy with which he indicates the sources of his information. Many fragments of literature and many a name have been preserved by these quotations.

From a philological point of view the book possesses considerable interest, from the fact that numerous German glosses are found in the text that explain difficult or obscure terms, and some that show, incidentally, the intimate knowledge of German possessed by the Jews of that time.

Contents.

The contents are, in brief, as follows: the laws relating to the ritual slaughtering of animals; laws concerning the observance of Passover, with a description of the ritual of the Seder; laws relating to the New-Year, the fast-days, and to all the feasts, including the semi-festivals; laws concerning the observance of the Sabbath; laws about proselytes; a string of medical prescriptions and charms; mourning and burial customs; marriage ceremonies and laws, including directions for the ceremony under the canopy; laws and formulas of divorce; mezuzot; a condensed form of the prayer-book; formulas and types of numerous commercial and religious contracts, and of various forms of excommunication as well as of repentance, followed by short chapters recapitulating and supplementing the subjects already treated.

The vocalization of the manuscript is also important, showing, as it does, that the pronunciation of the Jews of that period was much akin to the so-called Sephardic pronunciation.

Bibliography: A full description of the work, as well as bibliographical references to the writers that have had access to it and made use of it, together with a series of abstracts of the more important passages, such as the Seder ritual, the short prayer-book, superstitions, customs, etc., is given by M. Gaster in *Report of the Judith Montefiore College for the Year 1892-93*, London, 1893, pp. 31-74.

L. G. M. Ga.

ASUSA, ASUTA (אסותא = "health!"): A sentiment expressed toward one who is sneezing. In Tosef., Shab. vii. (viii.) 5 it is declared to be a forbidden heathen (Amorite) practise to wish one health ("marpe"), whereas R. Eliezer b. Zadok, of the first century, says: "It is forbidden only in the schoolhouse, as causing a disturbance during study"; to which is added: "Those of the house of Rabban Gamaliel would not say 'marpe.'" In Ber. 53*a* the reading is: "Those of the house of Rabban Gamaliel avoided saying 'marpe' in the schoolhouse." Maimonides (Talmud Torah iv. 9) follows the Talmud, prohibiting the saying of "refuah" (healing) only during study. So also Shulḥan 'Aruk, Yoreh De'ah, 246, 17; but the later annotators are inclined to permit it during study. In Yer. Ber. v. 10*d*, R. Mana teaches that while eating one should not say יי״ם, explained by Frankel, Levy, Kohut, and Krauss as *ἴασις* ("healing") or as י״ם ("may He heal!"). 'Aruk reads זט, interpreted by Frankel and Kohut as *ζήτω* ("may he live"!); both readings explained by Jastrow as abbreviations either of י״י סעדי ("the Lord my help") or of זרירי לטובה ("my sneezing be for good!"), as there is the danger of choking. In Pirḳe R. El. lii. and Yelamdenu to Toledot, quoted in 'Aruk, *s.v.* עטש (compare Yalḳ., Gen. 77), the story is told that until Jacob's time man, at the close of his life, sneezed and instantly died; but Jacob prayed to God to grant him time to prepare for his death by making his will. This, to the surprise of all, was granted to him; and so it was told Joseph, "Behold thy father is sick" (Gen. xlviii. 1). Henceforth it became the rule that illness should precede death. For this reason when one sneezes he should wish himself "ḥayyim" (for life!) or "ḥayyim ṭobim" (for a happy life!); so that the sign of death was transformed into a sign of life, according to Job xli. 10 [A. V. 18].

The wish "Asuta" is often given in the vernacular, "Your health!" or "God bless thee!" "God help thee!" To children, people would say, "Good and old and fair until your hundredth year!" The one who sneezes usually cites from Gen. xlix. 18, "For thy salvation I wait, O Lord!" and in response to the wishes offered by his neighbor, he would say in Hebrew, "Be thou blessed" ("baruk tiheyeh"; see Solomon Luria, "Yam shel Shelomoh": B. Ḳ. viii. 64; "Magen Abraham Oraḥ Ḥayyim," 230, note 6). The custom of uttering some prayer or wish at sneezing was universal among ancient and is also observed among modern nations: it originated in the belief that it was the work of the spirits, good or evil (see section on "Sneezing" in Tylor, "Primitive Culture," i. 97–102).

ASVERUS. See Severus.

ASYLUM.—Biblical Data (ἄσυλον, "inviolable"): A place of refuge for slaves, debtors, political offenders, and criminals; a sacred spot, a sanctuary, altar, or grave, protected by the presence of a deity or other supernatural being, and sharing his inviolability. In many cases there was attached to the sacred place a larger or smaller area within which it was forbidden to shed the blood of man or beast or to cut down trees or plants (so in the harem or sacred enclosure of Mecca), and where the fugitive might dwell in comfort. The custom was one of the earliest developed in society; it is found among very low tribes (Australian and others), among some of whom the guilt or innocence of a fugitive was determined by a tribunal. It is probable that this character of refuge belonged originally to all sacred places, the degree of security being in proportion to the sanctity of the spot, the shrines of the more powerful deities naturally having greater potency. Into such a system, abuses, of course, crept: some shrines were nurseries of criminals: and it often became necessary to limit the number of asylums. In Athens only certain sanctuaries were recognized by law as refuges (for example, the temple of Theseus for slaves); in the time of Tiberius the congregations of desperadoes in shrines had become so dangerous that the right of Asylum was limited to a few cities (in the year 22). The sanctuary did not always protect a refugee: if the law were not explicit, or if the man were already condemned or believed to be guilty or dangerous, he was sometimes taken from the sacred spot, or even put to death there; such cases were, however, exceptional.

Origin and Character.

Early Hebrew Custom.

In Israel the custom of Asylum probably existed from the earliest times, but there is no record of it before the days of Solomon. Possibly an allusion to it is involved in the story of Cain (Gen. iv.): Cain, as murderer, would in any case be exposed to the attack of the avenger of blood, but his situation is made harder by the fact that he is banished from the land and the worship of YHWH, and therefore can not take refuge in a sanctuary. Absalom, after the murder of Amnon, fled the country (II Sam. xiii. 37), and took refuge with his mother's father. The first distinct notice of the right of Asylum is contained in the narrative of the attempts to place Adonijah on the throne (I Kings i., ii.): Adonijah flees to the altar and refuses to come forth till he has Solomon's word that his life shall be spared; Joab, on the other hand, refusing to leave the altar, is slain, by special command of Solomon, on the sacred spot. There was thus at this time a recognized right of Asylum for offenders (in this case political offenders), which, however, was not absolute. The right was denied Joab, probably, not because he had murdered Abner and Amasa (I Kings ii. 29–34), but because he was a dangerous conspirator, and Solomon had absolute authority over the royal shrine of Jerusalem. Doubtless every sanctuary in the land was an Asylum (Ex. xxi. 14, compared with Ex. xx. 24), and this state of things continued down to (and probably after) the reform of Josiah, when the attempt was made to abolish all sanctuaries except the Temple of Jerusalem. The plan was not carried out at that time; the provincial shrines continued to exist (Jer. ii. 28; vii. 9, 18; xi. 13; Ezek. vi. 3, 4), and later all reforms were interrupted by the capture of Jerusalem and the consequent confusion that reigned throughout the land. It may thus be assumed that down to the time of the Babylonian Exile all Levitical settlements had the privilege of Asylum for certain offenders, such as homicides and political disturbers, but whether it was also extended to slaves and debtors is not clear. The area of protection probably included all the land attached to the sanctuary.

Josiah's Attempts at Reform.

Legislation.

The right of Asylum was defined gradually by custom and law. In Solomon's time, as just noted, a distinction, based on regard for the safety of the throne, was made between refugees. As the legal organization of society was more and more worked out, the just distinction between the innocent and the guilty came to be recognized. This distinction is made definitely in the earliest law-book (Ex. xxi. 13, 14, eighth century): He who slays unintentionally is to be protected from the avenger of blood by the sanctuary, but the wilful slayer is to be taken from the altar and put to death (that is, delivered over to the avenger of blood). Further details are not given—nothing is said of a tribunal to try the case, or of the duration of the fugitive's stay in the sanctuary; these points were, however, probably settled by the existing custom. The first modification of the old usage is made in the Book of Deuteronomy (xix. 1–7, 11–13). As the rural shrines were abolished by the law of that book, it became necessary to make other provisions for the innocent homicide that lived too far from Jerusalem to find shelter there; and accordingly three cities were appointed (their names are not given in the text) to which such a person might flee and within their boundaries be safe. In any one of these a homicide might take refuge and remain secure till his case was decided. The decision was made by the elders of the refugee's city: in general, it may be supposed, by the legal authorities [elders] of the place where the homicide was committed. If he proved to be innocent, he was, of course, under the protection of the authorities of the city of refuge; but it is not said whether or when he was allowed to go home. If he was found guilty, the elders of his own city sent and fetched him, and he was put to death by the avenger of blood. The three cities referred to in Deut. xix. were, no doubt, on the west of the Jordan. The measure was preliminary or tentative, and the trans-Jordanic region, at that time—toward the end of the seventh century—loosely connected with the west (which was really the seat of the nation), was either not thought of, or was left for future legislation. At a later time, probably during or after the Exile, the sense of the ecclesiastical unity of the land grew stronger, and it was thought proper to set apart three cities on the east of the Jordan; or it may be that this step was merely the natural completion of the first measure. The first intimation of this extension of the law is found in Deut. xix. 8–10, which, as it stands, is an interruption of the legal statement, and is manifestly an interpolation by a scribe who wished to bring the Deuteronomic law up to the later usage. In this paragraph it is merely said that three additional cities are to be appointed, but their names are not given; we find them, however, in Deut. iv. 41–43, which, likewise, is an exilic or post-exilic editorial addition to the text, intended, perhaps, as the historical sequel to xix. 8–10. The regulation is stated more fully in Josh. xx. (post-exilic): The fugitive, standing at the entrance of the city-gate, is to lay his case before the elders, who then protect him till he can be tried before the congregation. If he is adjudged innocent by the congregation, he is at liberty, on the death of the high priest of the time, to go to his own house, and can not then be called to account by the avenger of blood. Presumably, if he is adjudged guilty, he is handed over to the avenger. It is expressly stated, in accordance with the humane spirit of the period, that this law is to apply to the resident alien as well as to the native inhabitant. The two new points in the regulation of Joshua (the congregation as tribunal, and the death of the high priest as ushering in the period of liberty for innocent homicides) belong to the post-exilic ecclesiastical organization of the Jewish community. Substantially the same form of the law is given in Num. xxxv. 11–32, where also the fact is emphasized that, up to the death of the high priest within whose reign the offense was committed, the fugitive is safe only within the borders of the city of refuge. It thus appears that the movement of legislation was in the direction of exact justice; the object was to take the decision respecting homicide out of the hands of the angry avenger—whose function was doubtless necessary in a certain stage of society—and assign it to an impartial tribunal. The important specifications in the latest form of the law are: The abolition of the right of Asylum in sanctuaries, and the appointment of cities, in which presumably an innocent fugitive might have a house and live comfortably with his family; the determination of the tribunal that was to try the case; and the fixing a day when the man might go freely and without fear to his own home. The six cities of refuge named are Kedesh in Naphtali, Schechem in Ephraim, Hebron in Judah, and, on the east of the river, Bezer in Reuben, Ramoth in Gad, and Golan in Manasseh. The first three were old sacred places, and so, probably, were the second three. In the texts referred to there is no mention of a right of sanctuary for fugitive debtors and slaves; the reference in Deut. xxiii. 16 [15] is to foreign fugitives, and these are protected by residence anywhere in the land.

Later History.

As to how far this post-exilic law was actually in force there is no definite information. Under the rule of the Persians, the Greeks, and the Hasmoneans, the Judean state never had control of the whole of the old territory. If the statement may be trusted (I Macc. x. 43; Josephus, "Ant." xiii. 2, § 3) that the Seleucid Demetrius I. (about 152 B.C.) offered to make the Jerusalem Temple an Asylum, the natural inference will be that it was not then so regarded; the offer seems, however, not to have been accepted. The custom of Asylum doubtless continued, though the function of the avenger of blood ceased; the six cities may have retained their legal privilege, and possibly the right of Asylum was extended to the other Levitical cities. Under the Greek and Roman rule a number of cities in Syria enjoyed this privilege (lists are given in Barth, "De Græcorum Asylis").

J. JR. T.

——**In Rabbinical Literature:** The Biblical ordinances on Asylum are formulated and developed into a complete system in the tannaite tradition. As in many other instances of the Halakah, the law on Asylum is in its main features merely theoretic; at the same time the tannaite sources often hand down actual facts, as, for example, the regulation of the right of Asylum in the period between 100 B.C. and 30 C.E., especially that which is mentioned by Eliezer ben Jacob (Tosef., Mak. iii. [ii.] 5; Mak. 10*a et seq.*). Eliezer was a tanna who, shortly after the destruction of the Temple in 70, set himself the task of studying and arranging the laws and customs that had lost their force with the fall of the Jewish state.

Although nothing else is known about Jewish Asylum in Palestine (Josephus, "Ant." xiii. 2, § 3, does not mean Asylum in the Jewish sense, and furthermore the passage is of doubtful historic value in view of I Macc. x. 31 *et seq.*), the authority of Eliezer is sufficient to prove its existence in Palestine at the beginning of the common era, especially since the validity of his statements is proved by the account of actual conditions in the cities of refuge handed down by tannaim of Akiba's school (Mak. ii. 6). Jewish tradition fixes upon the year 30 as the time when the Jewish courts were deprived of their power to inflict capital punishment (Sanh. 41*a*). From the remark found in a Baraita (Sotah, 48*b*), that after the destruction of the first Temple the Levitical cities ceased to exist, it does not follow that the cities of refuge, which formed part of them, also passed away; the remark simply means that there were no longer any Levitical cities laid out in the manner prescribed in Num. xxxv. 2–5 (compare also Sifre, Num. 161, where it is expressly stated that the cities of refuge are not dependent on the existence of the Temple).

Changed political conditions, it is true, occasioned a modification also in the location of the cities of refuge. The country east of the Jordan was in later times no longer looked upon as Israelite territory; nor could Shechem (Sebaste), the seat of the Samaritans, or the Idumean Hebron—which even after its capture by Judas Maccabeus was not really a Jewish city—be considered a city of refuge.

Cities of Refuge.

It was therefore resolved, and perhaps also partly carried out, that not only the six cities of refuge named in the Bible could be regarded as asylums, but also all the forty-eight Levitical cities enumerated in I Chron. vi. 39-66 (A. V. 54-81). The difference between the six cities expressly mentioned in the Bible and these forty-eight cities lay in the fact that the Levitical cities could be used as asylums only with the consent of the inhabitants (לדעת, Mak. 10*a* is to be explained this way, not as Rashi has it; compare Jastrow, "Dictionary," *s.v.*, where several examples are given of this meaning of the word דעת), while the cities of refuge always afforded protection. Nor did these six cities of refuge always need to remain the same as designated in the Biblical law; others might be substituted, provided the number were kept up, and their situation conformed to the Biblical law with regard to distances and geographical relations (Tosef., Mak. iii. [ii.] 4). For instance, the distance between the southern boundary of Palestine and its nearest city of refuge was exactly the same as that between the northern boundary and the city of refuge nearest to it, and the same distance was maintained between every northern and southern city of refuge and those lying between, so that they were evenly distributed over the country and easily reached. It is even asserted (Tosef., Mak. iii. [ii.] 2; Sifre, Deut. 180) that the cities of refuge on the east of the Jordan and those on the west were parallel to each other—an assertion that does not exactly conform to the facts.

Corresponding to the care for the proper location of these cities were the other ordinances referring to them. The roads leading to them were marked by sign-posts at the crossroads, with the inscription "Miklaṭ" (Refuge): the roads were very broad—32 ells, twice the regulation width—smooth and level, in order that the fugitive might not be hindered in any way (Sifre *l.c.*; Tosef. *l.c.* 5; Mak. 10*b*; B. B. 100*b*). The cities chosen must be neither too small nor too large: in the former case a scarcity of food might arise, and the refugee might consequently be forced to leave his Asylum and imperil himself; in the latter case the crowds of strangers would make it easy for the avenger of blood to enter undetected. There were other measures of precaution in favor of the refugee. Dealing in weapons or implements of the chase was forbidden in the cities of refuge. Furthermore they had to be situated in a populous district, so that a violent attack by the avenger of blood might be repelled, if necessary (Sifre, Num. 159; Tosef., Mak. *l.c.* 8; Mak. 10*a*).

Besides the six cities of refuge mentioned in the Bible and the forty-eight Levitical cities, the rabbinic law, basing upon Ex. xxi. 14, also recognized the altar as an Asylum, although only for the officiating priest who had accidentally committed manslaughter; but compare Yer. Mak. ii. 31*d*, where R. Johanan denies that the altar can afford protection. The priest could not remain at the altar, however, but had to be taken to a city of refuge (Mak. 12*a*). The altar—according to the Talmud only the one at Jerusalem—afforded in a way more protection than the cities of refuge; since a political refugee became inviolable as soon as he had touched the altar (Maimonides, "Yad," Roẓeaḥ, v. 14, probably after an old source, based on I Kings ii. 28, that, however, is not found in extant literature).

Unpremeditated Homicide, Accident.

The rabbinical law concerning Asylum devotes much space to an exact determination of the cases in which the Asylum shall offer protection to the manslayer, and of those in which he must flee to and remain in it. Deliberate murder is of course excluded: that crime can be atoned for only by the blood of the murderer. The following three grades are distinguished in unpremeditated homicide: (1) grave carelessness; (2) contributory negligence; and (3) complete innocence. Only in the second case is exile to the cities of refuge prescribed. Complete innocence—that is, a mere accident or an extraordinary occurrence that could not be foreseen—needs no atonement; but grave carelessness is not sufficiently punished by such exile. The Talmud gives many examples illustrating these grades of homicide, among them the following:

> "Any one who neglects the necessary precautions in a courtyard or a shop, so that a person entitled to admittance there is killed, can not atone by going to the city of refuge [*i.e.*, banishment is not sufficient] (B. Ḳ. 32*b*); but if he who was killed was a trespasser and had no right in such a court or shop, the owner goes free, as he can not be held responsible for accidents on his private property when he did not anticipate the possible presence of strangers" (Mak. ii. 2, 8*a*).

Next to the cases of innocence that do not require atonement are those where death has been occasioned in the course of professional or other duties. A teacher punishing his pupil, a father compelling the obedience of his son in learning a trade or in attending to the study of the Law, a servant of the Law scourging an offender according to the instructions he has received (Deut. xxv. 2 *et seq.*), are not banished to the city of refuge in case the person disciplined should die under their hands; for they were but fulfilling a duty incumbent upon them (Mak. ii. 2, 8*a et seq.*). Only in such cases as those mentioned in Deut. xix. 4 *et seq.*, where one negligently commits homicide during an act that is permissible but not commanded by law, does an atonement become necessary.

Although many of the rabbinical ordinances regarding the asylums are directed chiefly to securing protection for the refugee, the Asylum is, nevertheless, according to the rabbinical law, not a place of protection, but one of expiation. If the homicide die after receiving his sentence, but before reaching the city of refuge, his body must be taken there. If he die before the high priest he must also be buried there until after the high priest's death. Asylum ("galut" = exile) and death of the high priest have together the atoning power ("kapparah") which

Asylum a Place of Expiation.

is to relieve the homicide's conscience (Mak. 11*b*; compare Tosafot, *s.v.* מידי). Therefore the banishment to the Asylum must not be interrupted: the condemned man may not leave the Asylum under any circumstances, not even should the interests of the state demand it (Mak. 11*b*). The consciousness of having taken a human life must never leave the homicide. When, therefore, the inhabitants of a city of refuge wish to honor such a man, he must declare to them that he is a homicide and unworthy such honor; but should they still persist, he may accept it (Mak. ii. 8; on the confession of crime as part of the atonement, compare CONFESSION). Even the death of the high priest does not entirely wipe out the homicide's guilt; for a man condemned to Asylum may never fill an office, since he has been the cause of an accident (*l.c.*; compare the opinion of R. Judah b. Il'ai, which Maimonides, Hilkot Rozeah, vii. 14, thinks the correct one).

The Rabbis so strongly emphasized the guilt of a man who became a homicide against his will, not only because they held that a man is responsible even for his involuntary actions (compare SIN), but also in accordance with the following theories as expressed by Philo:

> "God, the all-merciful and gracious, neither delivers a wholly innocent man up to death nor will He suffer a man who committed a deed entirely against his will to go into exile. The ordinance of Ex. xxi. 13 must be interpreted as follows: When a murderer has escaped from human justice, God assumes the office of judge, and brings it about that the murderer is killed inadvertently by some one else. God chooses as His executioner a man who has also sinned in some way and is in need of atonement. This homicide is therefore exiled to a city of refuge, where he must remain until the death of the high priest, in expiation of some sins that he must have committed, because an entirely innocent man is never chosen as the instrument of another man's death" ("De Specialibus Legibus," § 20; ed. Mangey, ii. 319; compare "De Profugis," § 13; ed. Mangey, i. 555 *et seq.*).

The Biblical Asylum law is explained in almost the same words as these of Philo in Mekilta (Mishpatim iv.) and the Talmud (Mak. 10*b*).

Death of the High Priest.

The Talmudic sources agree also with Philo in explaining why the death of the high priest releases the exiled homicide. Philo says that, since the high priest was immaculate and sinless, it is fitting that he should abhor (*i.e.*, not suffer in his presence) those who had even involuntarily killed a man, since they themselves were not entirely sinless ("De Specialibus Legibus," xxiii., xxiv., ed. Mangey, ii. 322). Rabbi gives the following explanation: "The murderer pollutes the land, and drives away the SHEKINAH; but the high priest brings it about that the Shekinah dwells in Israel. It is therefore not fitting that he who pollutes the land should appear before him who brings the Shekinah among the people" (Sifre, Num. 160). This explanation, however, does not tally with that given by the Halakah, that even the death of a dispensed high priest releases the exile (Mak. ii. 6); and the phrase, frequently recurring in the Talmud, "the death of the high priest atones" (Mak. 11*b*), really shows that, according to the opinion current among the Rabbis, the chief factor was the death with its atoning power.

This is easily explainable from the point of view of rabbinical theology, since in general the death of the pious acted as an atonement for Israel (Yer. Yoma i. 38*b*; M. K. 28*a*; and the many parallel passages in Bubers' Tan. iii. 66, notes 140-142), and the death of the high priest all the more possesses power of atonement (approximately so, Ibn Ezra on Num. xxxv. 25). Maimonides' explanation (Moreh iii. 40), that the death of the high priest was an event that moved the entire people so much that no thoughts of vengeance could arise in the avenger of blood, conforms as little to the spirit of the early rabbis as to that of the Bible.

The tradition found in the Mishnah may be mentioned; namely, that the mother of the high priest supplied food and clothing to homicides, in order that they might not wish for the death of her son (Mak. ii. 6). The Talmud thinks (Mak. 11*a*) that such wishes might have been efficacious against the high priests, because they had omitted to implore God's mercy for their contemporaries, that no such hapless events might occur. Compare AVENGER OF BLOOD.

ASYLUM CHARITABLE INSTITUTIONS.

See CHARITY.

ATAD: A place on the eastern side of the Jordan where Jacob's funeral cortège stopped and mourned for him (Gen. l. 10, 11). Tradition (Gen. *ib.*) assigns to this circumstance the change in the name of the place to **Abel Mizraim**, "mourning of Egypt," though in reality the element "Abel" signifies "meadow."

J. JR. G. B. L.

ATAKI: Town in the province of Bessarabia, Russia, on the right bank of the Dniester, opposite Mohilev. Of the 1,000 families composing its population, 832 are Jews, that have a synagogue and three prayer-houses. Formerly Ataki was a flourishing town; but the opening of the Novoseiitz railroad in 1893 destroyed all its business, while the population was increased by the expulsion of Jews from surrounding villages and their settlement in Ataki. Those who had the means emigrated to the United States of America. During the famine of 1900 the Jewish Relief Committee of St. Petersburg gave assistance to 109 families of Ataki; but a far greater number remained destitute. See BESSARABIA.

H. R.

ATARAH.—Biblical Data: A wife of Jerahmeel and the mother of Onam (I Chron. ii. 26). If Jerahmeel, as seems probable, is the name of a clan, the expression "wife" might point to an alliance (or in the case of "wives" alliances) with other clans.

J. JR. G. B. L

——**In Rabbinical Literature:** Atarah was a Canaanite woman of rank, whom Jerahmeel married in order "to be crowned" through her; that is to say, to be raised to nobility (עטרה, "crown," "decoration"). But she brought evil upon him, and was therefore called "the mother of Onam"; that is, "the mother of mourning" (אונם = אונן, "mourner"). On account of this irregular marriage, a portion of the tribe of Judah did not recognize the children of Jerahmeel as of pure descent (Yer. Sanh. ii. 20*b*; Ruth R., end).

J. SR. L. G.

ATARGATIS: A Syrian divinity referred to in the Apocrypha. A temple of Atargatis existed in Carnion or Carnaim (I Macc. v. 24; II Macc. xii. 26), on the east side of the Jordan. Just what goddess is meant by the name has not as yet been definitely ascertained. The first element of the name is evidently the Aramean equivalent of Astarte; the second element may be the name of another goddess, Athe or Athah, who has been found in Phenician inscriptions. The chief temple of Atargatis in Palestine was the one in Ascalon. At Carnaim she had another, and it was in that sanctuary that Judah Maccabeus, without regard for the sanctity of the place, slew the inhabitants that had fled there for refuge. The temple with all its objects used in the cult was burned by him.

J. JR. G. B. L.

ATAROTH: District in Palestine, east of the Jordan. This place is mentioned along with Dibon and Jazer as a very fertile tract of land and good for raising cattle. Reuben and Gad both asked for the land. Gad received it (Num. xxxii. 3) and built a city there (*ib.* 34).

J. JR. G. B. L.

ATAROTH: The name of several towns in Palestine: **1.** A city on the eastern side of the Dead Sea in the land taken from Moab and given to Gad (Num. xxxii. 3). From Num. xxxii. 34 it appears that the city was rebuilt by the Gadites: a fact which the Moabite Stone (line 10) confirms. It has been identified with the modern Attarus (Buhl, "Geographie," p. 267).

2. A town on the border line between Ephraim and Benjamin (Josh. xvi. 2), though Buhl (*ib.* 172) disputes the site.

3. Ataroth Addar: A border town of Ephraim (Josh. xvi. 5, xviii. 13), perhaps the same as Ataroth, 2.

4. Ataroth beth Joab: Mentioned in the list of the descendants of Caleb (I Chron. ii. 54).

5. Ataroth Shophan: A city in the domain of the Gadites (Num. xxxii. 35).

J. JR. G. B. L.

ATBASH. See Gematria.

ATEL (Idl, Itil, Etel): The capital of the Chazars in the tenth century; situated about eight English miles from Astrakhan. Together with the city of Balanjara, which was equally renowned in ancient times, it is now buried under the highest of the numerous mounds covering the right bank of the Volga, called also Atel (אתל, "Sefer ha-Ḳabbalah," in "Med. Jew. Chron." i. 78, 190).

According to the Arabic writers, Ibn Fudlan, Ibn Ḥaukal, Ibn Khaldun, Mas'udi, and others, Atel was situated about sixty miles from the mouth of the Volga. The western part of the city was surrounded by a wall with four gates, one of which led to the river, and the others to the steppes. Here lived the ḥakam of the Chazars, whose palace was the only building of brick in the city. The rest of the inhabitants dwelt in huts, or in tents of felt. Mas'udi, however, states that the palace of the ḥakams was situated not in the western part of the city, but on an island, and the city consisted of three parts. The eastern part, called Khazaran, was inhabited by merchants of various nationalities.

Atel had a large population of Mohammedans, Christians, Jews, etc. The Turkish and Chazar languages predominated. Some of the inhabitants were called "blacks," and the others "whites," according to their complexions. The ḥakan and his staff were Jews. His suite, numbering fully 4,000 persons, was composed of representatives of different races. In 969 the Russians destroyed the city.

ATER: **1.** A family that returned with Zerubbabel (Ezra ii. 16; Neh. vii. 21), the head of which signed the covenant with Nehemiah (Neh. x. 18). In I Esd. v. 15, Ater is called **Aterezias.**

2. Doorkeepers of the Temple, who returned with Zerubbabel (Ezra ii. 42; Neh. vii. 45); called "sons of Jatal" in I Esd. v. 28.

J. JR. G. B. L.

ATHACH: A town in Judah, to the inhabitants of which David sent a part of the spoil taken from the Amalekites (I Sam. xxx. 30). It has not been definitely identified. Several scholars consider Athach (עתך) the same as Ether (עתר; Josh. xv. 42); but if it be Ether, it is quite impossible to decide which reading is correct. The manuscripts of the Greek versions to the passages in question furnish additional variants.

ATHALIAH: Daughter of Ahab (II Kings viii. 26) and, presumably, of Jezebel; also called the daughter of Omri (II Chron. xxii. 2). The political alliance of Jehoshaphat, fourth king of Judah, with Ahab, king of Israel (I Kings xxii. 2-4; II Chron. xx. 35), resulted in a domestic alliance also between his son Jehoram and Ahab's daughter Athaliah (II Kings viii. 18-27; II Chron. xxi. 6). The death of Ahaziah, the only surviving son of Jehoram and Athaliah (II Chron. xxi. 16, 17), at the hand of Jehu (II Kings ix. 27; II Chron. xxii. 9), opened the way for the queen-mother to assert herself. She immediately slew "all" of royal blood

(II Kings xi. 1; II Chron. xxii. 10), and made herself queen of Judah. Her influence, since her marriage with Jehoram, had fostered Baal-worship in Judah, and temporarily thrust into the background the worship of YHWH (II Chron. xxiv. 7). Her six years (842-836 B.C.) of rule doubtless led to a vigorous cultivation of the Baal cult. But in her seventh year the stalwart high priest Jehoiada brought from his hiding-place a young claimant to the throne, Joash, son of Ahaziah (see JOASH). Athaliah, being apprised of the great and enthusiastic coronation-assembly at the Temple, rushed into the edifice, apparently unattended by her guard. As soon as she saw the newly crowned king, she rent her clothes in despair, and cried defiantly, "Treason! Treason!" Jehoiada ordered that she be taken forth through the ranks, and he also pronounced a death-sentence upon any who should espouse her cause. "So they made way for her, and she went to the entry of the horse-gate by the king's house: and they slew her there" (II Kings xi. 4-20; II Chron. xxiii. 1-15).

ATHANASIUS: Bishop of Alexandria; born in 293, probably in Alexandria; died there May 2, 373. Athanasius was the greatest combatant of the Old Church. No less than twenty out of the forty-seven years of his official life (he was made bishop in 326) were passed in exile, owing to the activity of enemies—personal, religious, and political—he had made. With the extremes of courage and of obstinacy, he united a certain pliability of character, which naturally made him one of the foremost leaders in the religious contests of his time.

A Writer of Polemics.

His writings resembled his life; for the greater part of his literary productions have the polemic character strongly marked. His very first works, an "Address Against Heathens" and an "Address on the Incarnation of the Logos," are devoted to an attack upon heathenism and a refutation of Judaism. From the outbreak of the Arian disputes—to the campaign against which and all kindred heresies Athanasius devoted his life—he concentrated his literary activity upon one field, that of the defense of orthodoxy, thus earning for himself the title of "the Father of Orthodoxy." Of his work of this nature may be mentioned his "Defense Against the Arians," his "Pastoral Letter," and "Four Speeches Against the Arians." Of his other writings, his so-called "Exegetical Essays on the Psalter," in explanation of the Psalms; "A Letter to Marcellinus," and "Arguments and Explanations of the Psalms" are worthy of mention.

Athanasius' historical importance is neither as an author nor as a theologian; his works were for the most part born of passing circumstances and filled no literary want; and his dogmatics can not be considered original, as they are almost identical with those of Alexander, his predecessor in the bishopric of Alexandria. It was Athanasius nevertheless who actually enabled Nicene Christianity to triumph over Arianism and kindred heresies, and who for more than a thousand years shaped the course of the Christian Church so absolutely that he rightly deserves the titles of "the Great" and "the Father of Orthodoxy," bestowed upon him by grateful Catholicism.

Attitude Toward Judaism.

Athanasius, as the chief representative of Nicene Christianity, removed from Christology every trace of Judaism and gave to it a Hellenic cast; so that, curiously enough, at the very time that the Greek world was surrendering its earthly dominion to Christianity, Hellenism was asserting itself spiritually. The Christology, which began with John's doctrine of the Logos and reached logical completion in the Nicene confession, and was opposed to the *Monarchian Sabellian* idea of the person of Jesus which attained fulness in the doctrines of Arius, reflects fundamentally the identical opposition between the strictly Jewish conception of the Messiah as a human, moral ideal, and the Hellenic, according to which Jesus is a metaphysical religious principle. In illustration of Athanasius' position, the following sentences placed by him at the head of his polemic against the Arians may serve: "He, whom we acknowledge, is an actual and genuine and real Son of the Father, whose Being belongs to him likewise. He is neither creature, nor made, but the product of the Essence of the Father; wherefore is he truly God, because of similar being with the true God" ("Orationes Contra Arianos," i. 9). Jesus is for Athanasius not only the true and real Son of God, but he is also of similar essence (*homoüsios*) and of like eternity, but in such fashion as to permit of a duality of the divine personages. This, of course, is contradictory not only to the ruling idea of strict monotheism among the Jews, but also to the teachings of the Old Testament; and the Arians therefore rightly asked (*ib.* iii. 7) how Athanasius could harmonize his doctrine with such words of Scripture as "The Lord our God is one Lord" (Deut. vi. 4); "See now that I, even I, am he, and there is no god with me" (Deut. xxxii. 39), and similar passages.

The O. T. with Athanasius.

A lack of all critical sense marked both Athanasius and Arius, and prevented them from realizing that their mutually contradictory conceptions of the person of Jesus lay in the divergent presentation of the same by the Jewish synoptic gospels contrasted with that of the Greek writer of the fourth Gospel and of the Epistle to the Hebrews. Athanasius did not perceive how far removed he really stood from the Old Testament conception of God. In his controversy with Arius he had no scruple in making the fullest use of the Old Testament. The following are illustrations of his explanations and applications of such passages. Proof of the eternity and infinity of the Logos is found by him in Isa. xl. 28, "the everlasting God," and in Jer. ii. 13, "they have forsaken me, the fountain of living waters" (*ib.* i. 19). The immutability of the Logos he finds expressed in Deut. xxxii. 39, "See now that I, even I, am he," and in Mal. iii. 6, "I am the Lord, I change not." In such fashion, by simply applying to the Logos-Christus all Bible passages relating to God, it was not a very difficult task for him to found his whole system of dogmatics upon the Old Testament—at least to his own satisfaction. The unity of revelation in both Testaments is an essential principle with

Athanasius; and he therefore stigmatizes their separation as "Manichean" and "Jewish" (*ib.* iv. 23).

Christianity Versus Judaism.

This peculiar method of Old Testament exposition, which was the customary one in the Christian Church even before Athanasius, was also employed by him in replying to Jewish attacks upon Christianity by means of Old Testament teachings. In a polemic against the Jews upon the incarnation of the Logos ("De Incarnatione Dei Verbi"), he endeavors to reply to the arguments of the Jews against the Incarnation, as being something unworthy of the God-Logos, and particularly against the Crucifixion (ch. xxxiii.), by observing that nothing is easier than to confute the Jews: "Out of their own Holy Scriptures in which they daily read, they can be controverted." It is true, he promises more than he performs; for when he discovers the doctrine of the Incarnation of the Logos in Num. xxiv. 5 and Isa. viii. 4, or finds that the Virgin's conception is predicted in Isa. vii. 14, it is easily understood why his Jewish opponents were so "prejudiced that they prefer their own exposition of the passages" (*ib.* ch. xl.). Athanasius nevertheless sets up the reasonable hermeneutic principle, that both the time and the person to which a passage applies, as well as the circumstances originating such passage, must always be taken into consideration ("Orationes Contra Arianos," i. 54*b*) in expounding it. This rule seems to have been derived by him from Jewish sources where it was long recognized, for it is frequently noticeable that he willingly has recourse to Jewish authority in Scripture explanation, just so soon as his dogmatics permit him to do so. His canon of Old Testament books ("Festal Letters," ii. 1176) excludes Wisdom of Solomon, Ecclesiasticus, and Tobit, which certainly is an approximation to the authoritative Jewish canon. He gives the Jewish view concerning the collection of the Psalms and their superscriptions, that a Babylonian prophet, living in the Exile, collected them, and put them together as he received them. The anonymous psalms were written by this prophet. Although called "the Psalms of David," many of them are not by the Jewish king; but their authors were chosen by him to write them, and the whole may thus be considered as originating with him.

Contact with Jews made Athanasius acquainted with many rabbinic legends, as for instance that of Isaiah being sawn asunder ("De Incarnatione Dei Verbi," ch. xxiv.), as well as with the interpretation of many proper names, such as David "the beloved." Athanasius did not understand Hebrew; thus, for instance, he had only "heard" that the number of letters in the Hebrew alphabet was twenty-two ("Festal Letters," *l.c.*).

G. L. G.

ATHEISM: A term derived from the Greek, meaning literally the "disbelief in a God." As originally used in the writings of the people that coined it, it carried the implication of non-recognition of the God or the gods acknowledged as supreme, and therefore entitled to worship by the state. It was in this sense that Socrates was accused and convicted of Atheism. The same note is dominant in the oft-quoted dictum attributed to Polybius, that reverence for the gods is the foundation of all public order and security.

Impossible in Ancient Israel.

The Hebrew dictionary has no word of exactly similar import. The reasons for this are not difficult to establish. Atheism, in the restricted sense of the Greek usage, could not find expression among the Hebrews before they had come into contact and conflict with other nations. As long as their tribal consciousness was strong and supreme among them, recognition on the part of all members of the clan or tribe of the god to whom the family clan or tribe and people owed allegiance was spontaneous. Recent researches in this field have established beyond the possibility of doubt that this sense of family or tribal or national affinity is focal to all primitive religion. Sacrifice and all other features of private or public cult center in this all-regulating sentiment. The deity is entertained by the members of the family at the sacrificial meal. Even some institutions of the Israelitish cult, such as the Pesaḥ meal, reflect the mental mood of this original conviction. Denial of the family or tribal or national deity would have amounted to relinquishment of one's family or people; and such abandonment is a thought of which man is incompetent before a long stretch of historical experience has changed his whole mental attitude.

In the development of the Jewish God-idea, as traced by modern Biblical criticism, the conflict between the Prophets and their antagonists pivots not so much around the controversy whether God be or be not, but around the recognition of Yhwh as the only and legitimate God of Israel. Even they who opposed the Prophets were not atheists in the modern acceptation of the word. They may be so styled, if the implications of the term be restricted to the original Greek usage. According to prophetic preachment, Israel owed allegiance to Yhwh alone. This is the emphasis of their oft-repeated statement that it was Yhwh who led the people of Israel out of Egypt. The first statement of the Decalogue is not a protest against Atheism in the modern sense. It posits positively the prophetic thesis that no other God but Yhwh brought about Israel's redemption from Egyptian bondage. The force of this prophetic contention is well illustrated by the counter or corresponding claim advanced in behalf of the deities nationalized by Jeroboam at Dan and Beth-el (I Kings xii. 28). With all the strenuousness of their insistence upon the sole supremacy and legitimacy of Yhwh as Israel's God, the Prophets never went the length to call their opponents atheists. That the gods whom the followers of the false prophets worshiped were not gods is a conviction that appears only in later prophets, and then not in a very violent emphasis. Jeremiah resorts to mild sarcasm (Jer. ii.

27, 28). The second Isaiah is more pronounced in his ridicule heaped upon the worshipers of idols. Yet the quarrel is not because some or many deny God. Their censure is evoked by the fact that some or many worship gods that have no claim upon the recognition of Israel, the people of YHWH.

Again, Atheism always is the result of criticism and skepticism. Both in the individual and in the race it is, as it were, an afterthought. No people starts out with Atheism. The original religiousness of man is always spontaneously theistic in one form or another. And as long as the religious consciousness of man is in its prime vigor, there is no provocation for critical analysis of its contents. Periods of decline in religiousness produce skepticism, which, in turn, breeds Atheism. Up to the Exile the conditions for Atheism—in this sense—were lacking in Israel. Even the Exile, though fatal to the religious fervor of a great number—as is apparent by a study of the "'Ebed YHWH" hymns, portraying as they do the indignities and ridicule to which a pious minority were exposed at the hands of their compatriots—brought to bear upon the minds of the Jews influences much more potent in the opposite direction. Contact with the Babylonian-Assyrian, and shortly after with the Persian, civilization had a pronounced tendency to develop an abiding predisposition toward mysticism, which is always fatal to sober Atheism. In this connection it is well to remember that Jewish angelology and demonology took their rise in the Captivity; and certainly an age susceptible to suggestions of the order vocalized in the belief in angels and their counterparts is not very propitious for the cultivation of atheistic proclivities. The literature assigned to the Exile evidences the prevalence of the very opposite inclination. It is safe to hold that anterior to the Greek period there was but little cause among the Jews to pay attention to atheistic enunciations. This fact accounts for the absence of a term to denote both the professor and the system of Atheism.

Atheism the Result of Skepticism.

Psalm liii., preserved in a double version (in Ps. xiv.), mentions the speech of one who maintains that there is no God. The professor of this belief is styled "nabal," and in the context is contrasted with the "maskil" (verse 3); wherefore the word was understood to be "fool," or, as Ibn Ezra has it in his commentary, the contrary of "ḥakam" (wise). This meaning the Targum to Psalm xiv. also accepts, rendering it by "shaṭya." Other commentators hold that the psalm does not register a general proposition, but records the utterances of some definite person—Titus or Nebuchadnezzar. From the character of these men it may be inferred that the interpreters who refer the expression in the Psalm to them, took the word "nabal" in the secondary sense of "knave," implying that foolishness which always characterizes a corrupt or pervert mind. "Nabal" would thus be a synonym of "rasha'" or "zed."

The nearest approach to a phrase which might be considered the equivalent of our modern "atheist" is the rabbinical "kofer be-'iḳḳar," one who denies a fundamental tenet of the Jewish religion; namely, the existence and then the unity of God. Of all the other designations applied in rabbinical writings to heretics, none other seems so directly to suggest or to stand for avowed and open negation of the Deity's existence and supremacy (B. B. 15*b*; Pesiḳ. p. 163). Atheism is included among the heresies charged against the "minim" (Shab. 116*b*; and Maimonides, Yad ha-Ḥazaḳah, Teshubah, iii., where he enumerates among the heretics "minim," "those that declare that there is no God and that the world has neither governor nor leader").

Talmudic Designations.

But as in the case of the Biblical "nabal," so in the descriptions of the atheist by the Rabbis it would appear that Atheism was much more a matter of perverse and immoral conduct than of formulated philosophical or metaphysical assertion and conviction. At least it is from the conduct of man that his Atheism is inferred. Observance of the Sabbath was regarded as evidence of belief in the Creator; while neglect to keep the day of rest holy gave point to the presumption of atheistic leanings. The passage in Sifra, Beḥuḳḳotai, iii. 2, shows that the observance or the rejection of the "laws and ordinances" was the decisive factor in the attribution of Atheism, according to rabbinical understanding. Adam is said to have been an atheist; for in hiding himself to escape, he gave proof of his belief that God was not omnipresent (Sanh. 38*b*).

How far the term "Epicurean," אפיקורוס (see APIḲOROS), served to denote an atheist, is not very clear. It is patent that by this name were designated men who denied the doctrine of resurrection and revelation. As both of these may be said to be involved in the (rabbinical) doctrine concerning the Godhead, the appellation "Epicurean" may in a loose way have been synonymous with the latter-day atheist. Connecting this Greek word with the Aramaic root "paḳar" (to free oneself), the rabbinical sources—even Maimonides—assumed as the characteristic trait of an Epicurean's conduct disregard of all that made for reverence and decency. "Scoffer" might, therefore, be suggested as the best rendering in English. As one that would scoff at the words of the learned and wise, of the God-fearing and pious (Ned. 23*a*; Sanh. 99*b*), the Epicurean naturally created the impression by his conduct that he shared the views of the "nabal" and was under suspicion that in his insolence he would go so far as to deny the existence of God and to stand in no awe of His providential guidance of life and the world. Hence the advice always to be ready to refute the arguments of the Epicurean (Abot ii. 14).

Jews Accused of Atheism.

Strange to say, the Jews often had to defend themselves against the charge of being atheists, though, in the conception of the Prophets, Israel's history was the convincing proof of God's providence. Israel was chosen to be His witness. The prime solicitude of Moses (Ex. xxxii. 12, 13) lest the "Egyptians" should put a wrong construction on the events of Israel's career and become confirmed in their false conceptions of Israel's God, is also, as it were, the "leitmotif" of the theology of later Biblical writers. The appeal of the Seventy-ninth Psalm is for God to manifest Himself in His avenging splendor, lest, from the weakness of Israel, the "nations" might infer that He had abdicated in favor of their idols. Psalm cxv. 2 *seq.*—undoubtedly of the Maccabean period—expresses the same anxiety but on a higher and more spiritual plane. It reflects the arguments and conceits of even the enlightened among the Greeks. The invisible God of the Jews was beyond the range of the ancient world's intelligence. A visible God alone was entitled to recognition.

Greek thought may not have gone so far as Pharaoh did—according to the Midrash (Ex. R. v.), reflecting certainly the anti-Jewish attitude of the Greco-Roman period—in refusing to recognize YHWH for the reason that his name was not included in the official list of deities, yet it did erect an altar to "the unknown God" (Acts xvii. 23), as, in fact, the hospitality of the Pantheon was elastic enough to admit every new deity. Still, two considerations dominated the judgment of the Greek world on the religion, or, according to them, irreligion, of the Jews. The Jews believed in an invisible God; therefore, according to the Greek mode of thinking, in no God. Secondly, the Jews refused to join them in their worship, though the Greeks were prepared to pay honor to the gods of other nations. These two complaints are at the bottom of the accusation of Atheism against the Jews which is very frequent and violent in the writings of Alexandrian detractors and Roman historians. The philosophers among the Greeks, indeed, furnished many an argument in defense of the excellence of Jewish monotheism; but the vast multitude was still addicted to the grosser notions. If the Jews were citizens of the towns where they resided, as they claimed to be, why did they not join in worshiping the communal gods? This was the burden of the popular prejudice against them; and Apion (Josephus, "Contra Ap." ii. § 6), Posidonius, and Apollonius Molo made themselves the willing mouthpieces of popular distrust. Here was proof that the Jews were really atheists. In the Roman empire they refused to pay religious honors to the statues of the emperors. This fact sufficed, in the eyes of Tacitus and Pliny, to accuse them of despising the gods and to describe them as atheists, as a people void of all virtue (Tacitus, "Historiæ," v. 5; see Schürer, "Gesch." 3d ed., iii. 417).

The same feeling that led the Greek and Roman enemies of the Jews to accuse them of irreligion is potent in the modern charge brought against them of unbelief. Atheism is indeed a relative term. The Mohammedan regards both the Christian and the Jew as infidels; and the Christian is not slow to return the compliment to the follower of the Prophet. Refusing to accept the construction of his history that Christian theology puts on it, and declining to subscribe to many of the Christological interpretations of his Bible, the Jew is under the suspicion of irreligion and Atheism. The "amixia," the stubborn defense of his historical identity, and his right to maintain his religious distinctness, which puzzled and angered the Greeks (compare Haman's argument in Esther iii. 8, the precipitate of the Maccabean era), is still a pretext for denying to the Jew genuine religious feeling, and a provocation to class him among the wanton deniers of God.

The attitude toward the Jews in the Koran illustrates the same fact. Mohammed, incensed at the refusal of the Jews to acclaim him as the expected final prophet, pours out over them the vials of his wrath and abuse. Though "the people of the book," they have falsified it. They claim to believe, and still are unbelievers. They disavow him, simply because he believes in God and they do not (Koran, suras ii. 70-73, 116; v. 48, 49, 64-69; ix. 30).

Attitude of Mohammed and Philo.

That there were atheists among the Jews stands to reason, and is made evident among other things by the tenor of the Book of Ecclesiastes, which, without the later addition of the saving concluding verses, is really an exposition of the skepticism that had impregnated the minds of the higher classes during the Greek fever preceding the Maccabean rebellion. In Alexandria, too, Jews must have been openly or tacitly inclined to accept the philosophy of negation. Philo takes occasion to discuss Atheism. He quotes the arguments advanced in its defense by those who maintain that nothing exists but the perceptible and visible universe, which had never come into being and which would never perish, but which, though unbegotten and incorruptible, was without pilot, guardian, or protector ("De Somnis," ii. 43). He does not state that they who advance these theories are Jews; but as he mentions others who embrace a pantheistic interpretation, and describes them as Chaldeans ("De Migratione Abrahami," p. 32), it is not improbable that "the others" may have been of his people. To Atheism he opposes the doctrine of Moses, "the beholder of the invisible nature, and seer of God" ("De Mutatione Nominum," § 2), according to which the Divine exists, and is neither the cosmos nor the soul of the cosmos, but is the supreme God.

The religious philosophy of the Middle Ages has no occasion to deal directly with formulated Atheism. Its preoccupation is largely apologetic, not so much against the attacks of formal and formidable Atheism as against certain theistic or semitheistic schools or other controverts: first Karaite, then Arabic, and, still later, Christian theologians. But in their discussions of the fundamentals of faith the problem of theism versus Atheism in one way or another is involved. The contentions of the Dahri, Mohammedan atheists, believing in the eternity of matter, and the duration of the world from eternity, and denying resurrection and final judgment, as well as the theories of the Motazilites, the Mohammedan freethinkers, rejecting all eternal attributes of God, furnish the text for a large portion of the speculation of the Jewish philosophers. The one objective point of all medieval Jewish philosophy is the clarification of the concept of the Godhead by the removal of every form of anthropomorphism and anthropopathism, and to vindicate to human reason concordance with the true intents of the revealed word of God. The question which Mohammedan Atheism raised regarding the eternity of matter is in the very center of polemic debate. But in the later speculation, the system of Crescas, for instance, the eternity of matter, is admitted without reservation.

This throws light at once on the problem whether Spinoza should be classed among the *athoi*. From the Jewish point of view this must be denied. Under close analysis, Spinoza does not go beyond the positions maintained on some points by Maimonides, on more by Crescas. He carries to its furthest consequences the Jewish solicitude to divest the idea of the Godhead of anthropomorphic associations (on this point see Joel, "Zur Genesis der Lehre Spinoza's," Breslau, 1871).

In modern Judaism, as is evinced by printed sermons and other publications, Atheism of every kind has found voice and adherents. The influence of the natural sciences, and the unwarranted conclusions now recognized as such by none more readily than by the thinkers devoted to the exploration of nature's domain, have also left their mark on Jewry. Both the idle Atheism of conceit and the more serious Atheism of reaction against the dogmatism of anterior days have had exponents in the circles grouped around the synagogues. As elsewhere, evolution was invoked to dethrone God, and therefore, departing from the methods of scholasticism, the arguments based on evolution were not ignored by the defenders of theism in the pulpit. In the discussion two lines were more especially followed. Atheism was tested as to its rationality, and was found of all irrational theories of the world and life the most irrational. Mind presupposes mind. The gap between thought and matter has not been bridged by natural selection or by evolution. Du Bois-Reymond's agnosticism left the domain of faith to religious cultivation. Whatever difficulties from a materialistic point of view the doctrine of God as the Creator and guide of world and of man, as the Author of life, and as the Ultimate Reality underlying the All may present and must present—for to know God as He is man would have to be God—the divine element in man, his conscience and self-consciousness, his moral power and experiences, are inexplicable and unreadable riddles to the materialist. Materialism has no key for their solution. History, especially the history of the Jews, witnesses to a will which is not ours, but may be made ours; to the potency of purposes which are not ours, but may be followed by us; to laws in harmony with which alone man can attain unto happiness and preserve his dignity. To these facts and factors the Jewish theist has pointed in defense of his theistic interpretation of life and its phenomena, while always ready to modify the symbolism into which he would cast the supreme thought. The old demonstrations of God's existence indeed, after Kant, can not be said to be cogent. But the moral proof of theism in refutation of Atheism has taken on new strength in the very searching by Kant's master criticism. The theism of Israel's religion has been verified by the facts and forces of Israel's history, as the "witness to YHWH."

ATHENIANS in Talmud and Midrash: The Jewish folk-lore of Palestine was fond of contrasting the inhabitants of Athens and of Jerusalem, and of opposing the Rabbis to the Attic sages. Greek philosophy and esthetics did not greatly impress the Jewish people, who thought themselves far superior to the Greeks in wit and wisdom.

In the Haggadah occur a number of wit combats between Jews and Athenians, in which their quickness at repartee and skill in propounding and solving problems are displayed in rivalry. Thus an Athenian arriving at Jerusalem met a child, and, giving him a small piece of money, asked him to buy him something to eat, from which he could satisfy himself and yet have enough left for the rest of his journey. The child brought him salt. Another Athenian coming to Jerusalem and visiting a school found the children in recess, and amusing themselves with guessing riddles. Requested to ask him a riddle, they put to him the following enigma: "Nine pass by, eight come, two pour out, one drinks, and twenty-four serve." The Athenian declared himself unable to solve the riddle, of which the solution is "Nine months of pregnancy, eight days until circumcision, two breasts, the boy's mouth, and the twenty-four months until he is weaned" (Lam. R. to i. 1, ed. Buber, p. 48).

Two anecdotes of this cycle have passed into the literature of the Arabs, the Persians, and a number of European peoples. The first of these is about an Athenian's one-eyed Jewish stable-boy who, despite his infirmity, could tell what kind of camel was passing at a distance of four miles, and what it was carrying (Lam. R. *l.c.* 12). The second tells of the wisdom of four men of Jerusalem who came to Athens, and of their acuteness in guessing at the true character of the objects and persons about them (Lam. R. *l.c.* 4). These two anecdotes, with the details adapted to Arabic taste, occur in many Persian and Arabic works; and the Italians learned them from the Arabs. This latter fact is attested by the appearance of the anecdotes in "Il Novellino" or "Cento Novelle," a collection of stories of the thirteenth century. Either through the Italians or through D'Herbelot they became known to Voltaire, and were used by him for the first chapter of his "Zadig."

An Athenian wanted to make sport of a tailor at Jerusalem, and handed him a broken mortar, asking him to sew it. The tailor gave him a handful of sand, asking him in turn to spin thread out of it with which he might sew the mortar (Lam. R. *l.c.* 8). Again, an Athenian asked a boy of Jerusalem, who had brought him eggs and several balls of cheese, to tell him which cheese was of the milk of a white and which of a black goat. The boy promised to answer if the Athenian, being the older, would first tell him which was the egg of a white and which of a black hen (Lam. R. *l.c.* 9; compare also 'Ab. Zarah 17*b*).

The last two witticisms, slightly changed, occur also in the Talmud in the account of the disputation between Joshua ben Hananiah and the wise men or elders of Athens, "Sabe de-be Atuna" (Bek. 8*b*). It may be assumed as tolerably certain that "be atuna" is merely an Aramaic form for Athens, and does not refer to the Atheneum at Rome, as Dubsch, Grätz, and Berliner believe.

The Talmud (Bek. *l.c. et seq.*) gives an account of the disputation between these wise men of Athens and Joshua ben Hananiah. The Cæsar (Hadrian), when discussing a point of biology with Joshua, mentioned that the sages of Athens held a different opinion from the Rabbis. Joshua declared the Rabbis wiser than the Greeks, and promised to prove this to the emperor. Joshua, going to Athens, went to a butcher as he was dressing the head of an animal. "What will you sell your head for?" asked Joshua. When the butcher told him the price, which was agreed to, the rabbi insisted that the butcher had sold his own head. Joshua, however, agreed to cancel the bargain if the butcher would show him the way to the wise men.

Now, the wise men had forbidden any one, on penalty of death, to point out where they lived. When the butcher remonstrated that the wise men, surrounded by a strong guard, had given orders to kill any Athenian that should betray their meeting-place, Joshua taught him a trick by which he could signalize the place without being exposed to danger. When Joshua after another trick had safely passed the guard and surprised the Athenian sages, the contest of wit against wit was undertaken on condition that the defeated party should be left entirely to the mercy of the victor. Joshua, in the first place, had to answer various philosophical questions put to him by the sages. This he did to their satisfaction. They then tried to drive him to bay by proposing riddles to him. Their first question was: "If salt has lost its savor, wherewith shall it be salted" (that is, be made fit for use; compare Matt. v. 13)? His answer, "With the afterbirth of a mule," shows that to an impossible query he had ready an equally impossible answer (compare Aḥiḳar).

Joshua won the contest, and then conveyed the wise men on a ship to Hadrian. The emperor delivered them into the hands of Joshua, who poured into a vessel some water taken from a whirlpool and having the peculiar quality of absorbing other water (בלע, "swallow"). He then directed the sages to fill the vessel, and they proceeded to do so; but after wearying themselves vainly in their attempted task, had to give it up in despair (probably an echo of the Danaid myth).

In later times, when it was thought impossible that a sacred book like the Talmud should contain anything amusing, much ingenuity was displayed in order to read into these jests a deep and secret significance.

Besides the commentaries to the Haggadot in the Talmud (see Jacob ibn Ḥabib, "En Ya'akob," ed. Wilna, *ad loc.*), there are about a dozen works devoted to the "Sabe de-be Atuna" (elders of Athens).

J. SR. L. G.

ATHENS, ANCIENT: The principal city of Greece, situated five miles from its seaport, Piræus, on the Saronic gulf. When, as a result of the Persian wars, Athens attained the hegemony of the eastern Mediterranean, it was already one of the most important commercial cities of antiquity. It retained this commercial supremacy in times of political decay, far into the period of the Roman emperors. Hence numerous foreign merchants did business in Athens, and some of them settled there, forming close corporations which mutually supported each other, and at the same time retained their respective national religions. The practise of their religions and the building of temples were not permitted in the city of Athens, but these privileges were allowed in the Piræus. As early as 333 B.C., the Egyptians possessed a temple of Isis there. There, too, permission was given to the Κιτιεῖς (merchants from the city of Citium in Cyprus) to build a temple to Aphrodite; and somewhat later the Sidonians erected one to their god, Baal-Sidon (Schürer, "Gesch." iii. 58).

First Jews in Athens.

Together with the wealthy Egyptian and Phenician wholesale merchants, many Jews settled in Athens for commercial reasons and organized a community. The residence of Jews in Attica in general is testified to by Philo ("Legatio ad Cajum," p. 36; ed. Mangey, ii. 587). From the Acts of the Apostles (xvii. 17) it is certain that there was a Jewish synagogue in Athens. Among the Greek inscriptions found in Athens are some of Jewish origin. "Corpus Inscriptionum Atticarum," iii. 2, contains three, numbered 3545, 3546, and 3547 respectively. In the first two the seven-branched candlestick is depicted. No. 3545 reads: "This is the resting-place of Eutychia, mother of Athenaos and Theoktistes"; No. 3546: "This is the resting-place of Theodula and Moses"; and No. 3547: "[Jac]ob and Leontius, descendants of Jacob of Cæsarea." This Jacob probably came from Palestine; for Cæsarea means either Cæsarea Stratonis or Cæsarea Philippi. The Jews not only worshiped in their accustomed manner in Athens, but appear to have made proselytes among the heathen population there. Just as the Egyptians and Phenicians successfully introduced their particular cults in Athens, so the Jews gained many adherents in the chief city of Greek culture by their preaching of the spiritual adoration of the one true God who must be without pictorial representation. These "devout persons" (*σεβόμενοι*, Acts xvii. 17) joined themselves to the Jewish community as a first step. They attended the Jewish services, but did not observe the Law in its entirety, only obeying certain of the more elementary commands, such as Sabbath-observance and the most important laws of purity.

As far back as the first century B.C., there existed official relations between the authorities of Athens and certain Jewish princes. Among the documents preserved by Josephus is an interesting decree by the people of Athens in favor of the Jewish high priest Hyrcanus (Josephus, "Ant." xiv. 8, § 5). Omitting the introduction, it reads:

Hyrcanus Honored by Athens.

"Since Hyrcanus, the son of Alexander, high priest and ethnarch of the Jews, continues to bear good-will toward the people [the Athenians] in general and to each one of the citizens in particular, and treats them with great consideration and most kindly welcomes those Athenians who come before him, either as ambassadors or on their own private affairs, and displays thoughtful care concerning the safety of their return; now, therefore, having had several former testimonies and on the report of Theodosius [other manuscripts have "Dionysius"], son of Theodorus of Sunium, who has reminded the people of the virtues of this man, and that he has always endeavored to do all the good that lay in his power, be it resolved, that this man be honored with a golden crown according to the law, that a statue of him in bronze be set up in the district where was the temple of Demos and of the Graces, and that announcement of this be made at the Dionysian festival in the theater, at the representation of the new tragedies, and at the Panathenaean and Eleusinian games," etc.

From its introductory formula, this decree appears to have been issued under the archon Agathocles. If he ruled, as many modern authorities think, toward the end of the second century B.C., this resolution must have referred to Hyrcanus I. But it is not at all certain that Agathocles is correctly assigned to that time. Besides, Hyrcanus is therein styled "son of Alexander"; but only Hyrcanus II. was a son of Alexander; and there being no reason to doubt the correctness of the received text, it is more probable that the Athenian resolution had reference to Hyrcanus II. (see especially Th. Reinach, in "Revue Etudes Juives," 1899, xxxix. 16–27). This would bring it to about 47–40 B.C., at which time Hyrcanus, by Cæsar's appointment, was "high priest and ethnarch of the Jews." It appears, then, that ambassadors from the Athenians and Athenian merchants were in the habit of coming to Judea and were well received by Hyrcanus, and that the Athenians expressed their appreciation by voting to him a gold crown and a bronze statue.

Similar friendly relations existed in the time of Herod and his descendants. Josephus ("B. J." i. 21, § 11) mentions Athens among the cities which "are full of gifts from Herod." The Athenians seem to have honored the latter in a manner similar to that in which they honored Hyrcanus; for it is probable that an inscription which describes the erection of a statue in honor of Herod refers to Herod the Great. It reads: "The People [the Athenians] honor, through the erection of this monument, the king Herod, the friend of the Romans, for kindly acts performed by him and for his friendly disposition" ("C. I. A." iii. 1, No. 550). Another inscription which deserves notice on account of the variation in the title refers to another Herod, probably Herod of Chalcis, a grandson of Herod the Great, who ruled over the little kingdom of Chalcis in the Lebanon about 41–48. It reads: "The people honor King Herod the Pious, the friend of Cæsar, on account of his virtue and benevolence" (*l.c.* No. 551).

Other Jews Honored.

The last Jewish princess, Berenice, whose name is associated with that of Titus, was honored in a similar way: "The Council of the Areopagus and the Council of Six Hundred and the people of the Athenians honor, by the erection of this statue, Julia Berenice, the great queen, daughter of King Julius Agrippa, and descendant of great kings who were benefactors of the city. Erected under the supervision of the governor of the city, Tiberius Claudius Theogenes of Pæania" (*l.c.* No. 556). The description of Berenice as the "descendant of great kings who were benefactors of the city" corresponds with the statements of Josephus and with other inscriptions.

G. E. Sch.

ATHENS, MODERN: The Jewish community of Athens is hardly thirty years old. One of the oldest families, if not the oldest, is that of Max Rothschild, a Bavarian Jew, who went to Greece in 1833 with King Otho. The community had neither synagogue nor rabbi, but a Turkish "ḥakam" held services in very unsuitable quarters. The majority of the Athenian Jews are of Levantine-Spanish extraction, and reside close together; they are mostly artisans or pedlers. Those in better circumstances are mainly of German descent, though some of those from Chalcis and Zante have means. In 1899 the Jews of Athens, on the initiative of M. Haim Cohen of Smyrna, appointed a committee to revise the communal constitution, and, if possible, to find means to erect a modest synagogue. He succeeded in hiring a hall for prayers and obtained from the government a concession of land for a separate cemetery. The Jews had previously been buried in a corner of the ordinary cemetery. Mention may be made in this connection of the celebrated duchess of Plaisance. This rather eccentric woman—who, though not of Jewish origin, had a strong interest in Judaism—in 1855 left as a legacy to the community a large tract of land for the erection of a "temple to the God of Israel." Either because the land was far from the city—close to the Olympia grounds—and of small value then, or possibly because the community was not at that time actually organized, the legacy was forgotten; and, remaining unclaimed for thirty years, it was forfeited by law. [Paul Lucas, who was at Athens early in the seventeenth century, found only 15 or 20 Jewish homes ("Rev. Et. Juives," xviii. 105).—G.]

D. M. C.

ATHIAS, ATIAS, or **ATHIA:** A Spanish family distinguished by the great number of its scholars and promoters of learning. The name is spelled in Hebrew variously, עטייה. עטיאה. עטיאם, עטיאש. עטיים. אטיעש. עזיה, אתיה (from an Arabic word meaning "present," "gift"). As early as the sixteenth century some of its members lived in Italy and Palestine; while another branch settled in the cities of Hamburg, Amsterdam, and London. In addition to those mentioned below, the following names are found in the list of the members of the Portuguese community at Amsterdam in 1675: Abraham Atias, Abraham Atias, "el viejo," Ḥayyim Franco Atias, Isaac de Semuel Atias, Isaac de David Atias, Jahacob Atias, Jahacob Costa Atias (De Castro, "De Syn. der Portug.-Israel. Gem. te Amsterdam," pp. xlviii. *et seq.*; Steinschneider, in "Jewish Quarterly Review," xi. 480).

Abraham Athias: Publicly burned, together with Jacob Rodriguez and Rachel Nunez Fernandez, on July 9, 1667, by the Inquisition at Cordova on account of his religion (Kayserling, "Sephardim," p. 263; Grätz, "Gesch. der Juden," x. 270).

Abraham ben Raphael Hezekiah (Hisquia) Athias: A printer in Amsterdam, 1728–41 (Steinschneider, "Jüd. Typographie" in Ersch and Gruber, "Encyklopädie," II. sec. J. 28, p. 67; *idem*, "Cat. Bodl." No. 7830).

David Israel Athias: Ḥakam of the Portuguese community at Amsterdam from 1728 till his death March 22, 1753.

David ben Moses Athias: Merchant, born at Leghorn. He was master of several modern languages, among them Servian, Russian, and Turkish, which he learned during his short stay at Constantinople. He wrote a book containing proverbs, fables, and sympathetic remedies, which was published in Hebrew characters under the title "La Guerta de Oro, o sea Tratamiento Gustoso, Saberoso y Provechoso," Leghorn, 1778. The book also contains "Lettres-Patentes du Roi Confirmatives des Priviléges, dont les Juifs Portugais Jouissent en France Depuis 1550," with a Ladino translation; and the outlines of a method of learning Italian and Greek in a short time contains also "sympathetic" remedies, a treatise on physiognomy, etc. ("Hebr. Bibl." xvi. 114).

Immanuel Athias: Printer at Amsterdam till 1707; son and business successor of Joseph Athias. The most elegant editions of Hebrew works, among them Maimonides' "Yad ha-Ḥazakah," etc., were issued by his office (Steinschneider, in Ersch and Gruber, "Encyklopädie," II. sec. J. 28, p. 66).

Isaac Athias: Ḥakam of the first Portuguese-Jewish congregation in Hamburg, and after 1622 at Venice, where he died. He was a pupil of Isaac Uzziel, and wrote in Spanish "Tesoro de Preceptos Donde se Encierran las Joyas de los Seyscientos y Treze Preceptos que Encomendò el Señor a su Pueblo Ysrael," Venice, 1627; second edition, Amsterdam, 1649.

The first edition is dedicated to Elijah Aboab at Hamburg, and contains also "Dinim de Degollar por un Estilo Facilissimo y Breve." In 1621 he translated "Ḥizzuḳ 'Emunah," a polemical work in defense of Judaism by Isaac Troki, a Karaite, which translation still exists in manuscript (see Grätz, "Gesch. der Juden," x. 20, 23).

Isaiah Athias: A prolific Italian writer on halakic, exegetical, and homiletical topics. His works, seven in number, were published at Leghorn—1793, 1821, 1823, 1825, and 1831.

Isaiah ben Ḥayyim Athias: Wrote notes to the ritual codes and sermons of Caro, and published them under the title "Bigde Yesha'" (Garments of Salvation), Leghorn, 1853. On another Isaiah Athias, see Jellinek, "Ḳontres ha-Maspid," p. 28.

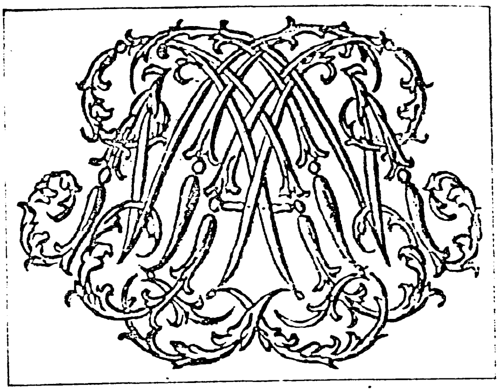
Jacob Athias: Rabbi at Bayonne, France, during the first half of the nineteenth century. He died in 1842. See "Voice of Jacob," i. 198.

Jacob Hezekiah Athias: Member of the Talmudical academy "'Eẓ Ḥayyim" at Amsterdam from the year 1737. He was a son of David Israel Athias.

G. M. K.—G.

His Printing-Press.

Joseph b. Abraham Athias: Printer and publisher; born in Spain, probably at Cordova, at the beginning of the seventeenth century; died at Amsterdam, May 12, 1700. When very young he was sent by his father to Hamburg in order to receive a Jewish education. Somewhat before 1658 he seems to have gone to Amsterdam, where he established himself as a printer and publisher; for in the following year there was issued from his press "Tikkun Sefer Torah" (Order of the Book of the Law), with an introductory poem by Solomon de Oliveyra. During the next two years he was engaged on his well-known edition of the Bible, the proof-reading for which was entrusted to John Leusden, professor at Leyden. As Steinschneider says, the admirable mechanical execution of the edition entitles it to rank among the most beautiful specimens of Hebrew presswork; and it won for Athias so great a reputation that he was thereupon taken into the Printers' Gild (March 31, 1661).



Printer's Mark of Joseph Athias.

Other works published by Athias were: Pentateuch, with Megillot and Hafṭarot, 1665; the Psalms, with a Dutch translation (proof-reader J. Leusden), 1666–67; the second edition of his Bible, 1677, more carefully prepared than the first, and with still more beautiful type and decorations. For this edition the States General of the Netherlands awarded him a gold medal and chain worth 600 Dutch florins. On the title-page is a cut of the medal. This edition gave occasion for a small broadside by Athias, entitled "Cæcus de Coloribus, contra Reprehensiones Sam. Maresii de ed. Bibl." Amsterdam, 1669. Athias published also "En Ya'aḳob" (1684–85), as well as prayer-books and liturgies according to the Portuguese and German rituals.

Athias' printing-establishment was one of the best equipped in Amsterdam. His wealth enabled him to lavish money on the cutting and casting of type, and to demand artistic work of his designers and die-sinkers. The edition of Maimonides' Yad ha-Ḥazaḳah, with "Leḥem Mishneh," 5 vols., Amsterdam, 1702–3, begun by Athias and completed after his death by his son Emanuel, is, as Steinschneider says, one of the most elegant and most admired products of the Hebrew press. At the end of the work the fact is mentioned that on July 9, 1667, Athias' father was burned as a Marano at an auto da fé at Cordova. The molds and letters used by Athias came into the possession of the printing-house of PROOPS.

One ugly feature in Athias' business career was the circumstance connected with a Judæo-German edition of the Bible. The printer Uri Phœbus, grandson of Moses Uri Levi, the first Sephardic rabbi at Amsterdam, employed a certain Jekutiel Blitz to write a Judæo-German translation of the Bible; and, before he began to print it, he obtained from the Polish Council of the Four Lands the privilege that for ten years all reprints were to be prohibited and laid under ban (Nisan, 1671). The rabbis of the Portuguese and German congregations of Amsterdam and elsewhere confirmed this privilege. Phœbus, whose entire fortune was risked in the undertaking, felt himself under the necessity of taking two Christian partners, the alderman Wilhelm Blau and the jurist Laurens Ball. Through their influence he obtained from John III. Sobieski of Poland the further privilege that this Judæo-German translation was to have copyright in Poland for twenty years (Oct., 1677). The work was not completed, when one of his compositors, impelled by envy, robbed him of the fruits of his labor. This compositor, Josel (Joseph) Witzenhausen, himself made a translation for which he secured Athias as printer and publisher. Athias through his wealth possessed certain advantages over his rival, and was also able to obtain privileges for his translation from Holland and Zealand, and even succeeded, through a Jewish agent of the Polish crown in Holland, Simon by name, in gaining still more favorable protection from the Council of the Four Lands (Jaroslaw, Sept. 21, 1677; Lublin, April 27, 1678). Although Witzenhausen was warned not to compete with Phœbus and Blitz (Oct. 13, 1676), neither he nor Athias paid any attention to the injunction, and they began to print as early as Dec. 5, 1678. The edition of Phœbus appeared at Amsterdam in 1678; that of Athias, in its complete form, in 1679. The latter contained a Latin preface dedicated to the Great Elector, in which Athias praises the condition of the Jews in Prussia.

Judæo-German Bible.

A justification for Athias' conduct was claimed in the fact that ten years had elapsed between the first and second approbations given by the Council of the Four Lands. Whether Meyer Stern, first at Frankfort-on-the-Main, then chief rabbi of the German community at Amsterdam, was proof-reader for Athias' edition as well as for that of Phœbus, and whether he thus lent his countenance to the unjustifiable wrong done to the latter, is uncertain, despite Witzenhausen's mention of him as proof-reader for Athias. The matter has been so fancifully discussed, and so much that has been written concerning it is such pure invention, that nothing can now be accurately determined. The literature on the affair is now rare, having consisted mainly of loose leaflets and broadsides.

G. J. Vr.

Menahem Athias: Rabbi at Leghorn, Italy, in 1728.

G. M. K.

Michael Athias: Jewish merchant; born at Constantinople, 1853. Though engaged in commerce, he applied himself to literary pursuits. He is the author of a Jewish-Spanish translation from the Arabic of a novel entitled "Saif Dhu-l Yazan," treating of the manners and customs of the Arabs and Abyssinians (Constantinople, 1873).

Bibliography: Franco, *Histoire des Israélites*.

S. M. Fr.

Mordecai ben Isaac Athias: Author of "Mor Deror" (Pure Myrrh), a commentary on the Talmud, Smyrna, 1730. He was a contemporary of Menahem Athias (see Steinschneider, "Cat. Bodl." No. 6215).

G. M. K.—G.

Moses Israel Athias: Was the first rabbi of the Marano congregation in London; that is, of the secret synagogue which existed in 1658 in Cree Church Lane, where he and his wife Sarah resided. He was a cousin of the wealthy and respected Antonio Fernandez Carvajal, who mentioned him generously in his will ("Transactions of the Jewish Historical Society," i. 55).

Samuel Athias: A contemporary of Joseph Caro and Moses de Trani, with whom he corresponded; lived at Nicopolis, Bulgaria, about 1550. He wrote indices to Maimonides' Yad ha-Ḥazakah, Mantua, 1563 (see Steinschneider, "Cat. Bodl." No. 7008). He was contemporary of Shem-Ṭob Athias.

Solomon ben Shem-Ṭob Athias (Athia, עתיה): Lived in Jerusalem during the sixteenth century. He was a brother of Samuel Athias, and disciple of Joseph Fazi of Salonica, Abraham Shamsuli, and Levi ibn Habib. For several years he followed a mercantile career, but did not succeed and became reduced to poverty.

He then returned to the pursuit of learning, and wrote a commentary on the Psalms which is, in the main, a compilation of Rashi and David Ḳimḥi (Venice, 1549). In the preface he tells of his travels in Turkey and Italy, as well as of the scholars with whom he had come in contact. His contemporary was Yom-Ṭob Athias.

Bibliography: Rossi, *Dizionario Storico*, transl. by Hamberger, p. 50; Steinschneider, *Cat. Bodl.* No. 6900; Zedner, *Cat. Hebr. Books in Brit. Mus.* p. 126; Azulai, *Shem ha-Gedolim*, i. 171, 176; Cod. Oxford 128 on Rieger, *Gesch. der Juden in Rom*, ii. 80, 97.

G. M. K.—G.

Yom-Ṭob ben Levi Athias: One of the editors of the Spanish translation, from the Hebrew, of the Pentateuch, known as the Ferrara Bible, which was printed at Ferrara, Italy, in 1553, he having, together with Abraham Usque, established there a printing-office. On the colophon of the work, his name is given in full as "Yom-Ṭob Atias, hijo de Levi Atias, Español." Nothing is known of him beyond the fact that he helped defray the cost of this Bible. Grätz ("Gesch. der Juden," ix. 562) and, following him, Steinschneider and Kayserling identify Athias with Jeronimo de Vargas, another name mentioned in some of the copies of the Ferrara Bible; but such an identification is entirely unwarranted.

G. W. M.

ATHLETES, ATHLETICS, AND FIELD-SPORTS: Men who perform feats of strength, or practise games and sports the pursuit of which depends on physical strength; the feats, games, and sports themselves.

——**Biblical Data:** Long before the Greeks made Athletics a compulsory branch of their curriculum, "giants" and "mighty hunters," whose achievements the Greeks even with their training could not excel, are mentioned in the Bible, such as Nimrod, the son of Cush, "a mighty hunter before the Lord" (Gen. x. 9); and Esau, "a cunning hunter, a man of the field" (Gen. xxv. 27). In his "Jewish Life in the Middle Ages," Israel Abrahams says (p. 375):

Notable "Mighty" Men.

"Already in the Bible the figures introduced as devoted hunters—Nimrod and Esau—are by no means presented in a favorable light." Of Esau it is safe to assume, from the characterization of him recorded in Gen. xxv. 27, that he was regarded as more crafty in the chase, though less renowned, than Nimrod. Jacob, Esau's brother, although a quiet man dwelling in tents (Gen. *ib.*), is represented as having possessed great strength: for when he saw Rachel, the daughter of Laban, come to water her flock, he rolled away a great stone that was upon the well's mouth (Gen. xxix. 10). It was he who also wrestled with a man "until the breaking of the day" (Gen. xxxii. 25 [A. V. 24]).

Undoubtedly the greatest of all the mighty men of Biblical times was SAMSON, who, soon after he had reached man's estate, rent a lion "as he would have rent a kid" in the vineyards of Timnath (Judges xiv. 6). His might is attributed to spiritual strength, not to "brute natural strength" (Fausset, "Bible Cyclopedia," *s.v.*). This is shown in the Book of Judges, which introduces his achievements with the words "and the spirit of the Lord came mightily upon him" (xiv. 6); and the same words are used in verse 19 (A. V.).

Other Biblical mighty men were Shamgar (Judges iii. 31), Saul, Jonathan, David, Joab, Abishai, Asahel, Jashobeam the Hachmonite, Eleazar, and Shammah. Saul is said to have gathered around him strong and valiant men, and encouraged physical development among his subjects.

The career of Jonathan embodies a noteworthy incident of his entering the camp of the Philistines accompanied only by an armor-bearer. Here on a "half acre of land which a yoke of oxen might plow," he and his companion fell on the enemy, "and that first slaughter, which Jonathan and his armorbearer made, was about twenty men" (I Sam. xiv. 14). Jonathan is also described as an expert archer (I Sam. xx. 20), where he says to David: "I will shoot three arrows on the side thereof [of the stone Ezel], as though I shot at a mark," and again in the lamentation of David (II Sam. i. 22): "From the blood of the slain, from the fat of the mighty, the bow of Jonathan turned not back, and the sword of Saul returned not empty." His skill was also acknowledged in David's words, "How are the mighty fallen, and the weapons of war perished!" (*ib.* i. 27).

Jonathan and David.

In his youth David showed himself "mighty, valiant," and withal "prudent" (I Sam. xvi. 18). Before he set out against the Philistine Goliath, David said to Saul, in reply to the latter's warning that he (David) was but a youth, and his opponent a man of war: "Thy servant kept his father's sheep, and there came a lion, and a bear, and took a lamb out of the flock: And I went out after him, and smote him, and delivered it out of his mouth: and when he arose against me, I caught him by his beard, and smote him, and slew him. Thy servant slew both the lion and the bear" (I Sam. xvii. 34-36). Of his fleetness and strength David himself sang praises to God. "He maketh my feet like hinds' feet, and setteth me upon my high places. He teacheth my hands to war, so that a bow of steel is broken by mine arms" (Ps. xviii. 33, 34).

Biblical references to running point to the swiftness of the Israelites. In II Sam. i. 23 David laments the deaths of Saul and Jonathan, who were "swifter than eagles"; in Ps. xix. 6 [A. V. 5] the reference is "rejoiceth as a strong man to run a race"; but the Preacher declares "that the race is not to the swift" (Eccl. ix. 11).

After the defeat by Joab of Abner's army at Gibeon, as Abner retreated, he tried in vain to deter Asahel, Joab's brother, from pursuing him, as he shrank from a blood-feud with Joab. Asahel, however, would not be deterred; and Abner "with the hinder end of the spear smote him under the fifth rib, that the spear came out behind him" (II Sam. ii. 23).

Jehu was an expert archer who "drew a bow with his full strength and smote Jehoram between his arms, and the arrow went out at his heart" (II Kings ix. 24). The tribe of Benjamin was renowned for the dexterity of its left-handed slingers, of whom "there were seven hundred chosen men, . . . every one could sling stones at an hair breadth, and not miss" (Judges xx. 16), and for the efficiency of its archers (I Chron. xii. 2).

Swimming was known among the ancient Hebrews and practised by them (sometimes with the aid of skins) according to the hand-over-hand method (see Isa. xxv. 11). "And he shall spread forth his hands in the midst of them, as he that swimmeth spreadeth forth his hands to swim," which Fausset [*l.c.* under "Swimming," p. 667, col. 2] interprets "the swimmer beating down with his hands; *i.e.*, bringing down each hand forcibly."

Evidence that racing also was practised is found in Jer. xii. 5: "If thou hast run with the footmen, and they have wearied thee, then how canst thou contend with horses?"

E. C. F. H. V.

——**Post-Biblical, Medieval, and Modern Times:** The origin of Athletics is to be traced to the Greeks, among whom bodily strength and agility were so highly esteemed that in their society the athlete held a prominent position.

With the spread of Hellenism among the Jews the first to feel its effects were the upper classes, whose more ambitious members strove to remodel Jewish life according to Hellenistic principles.

A Gymnasium at Jerusalem.

The first attempt in this direction seems to have been made by Menelaus, brother of Jason, the high priest (170 B.C.), who, in order that he might ingratiate himself with the king Antiochus Epiphanes, established a gymnasium, modeled on the Greek plan, close to the Temple at Jerusalem, where men and boys might practise wrestling, boxing, ball-playing, throwing, slinging, archery, jumping, riding, swimming, diving, etc., under the supervision of a gymnasiarch.

The opposition of the conservative element among the Jews to the gymnasium became, however, so strenuous that devout Jews began to look upon the exercises with horror, especially because most of them were practised "in puris naturalibus," and the Covenant of Abraham had become an object of derision. Nevertheless, for a time at least, the rage for Athletics spread even to the priests, who, Hamburger says ("R. B.T." ii. 436, 1220), neglected spiritual duties to take part in gymnastics. Indeed, so far did the contestants go that it is said they wore the broad-brimmed petasus of Hermes, the pagan god of gymnastic science, as an emblem of their prowess.

Much of the strength of the Hasmonean rebellion has been attributed to the bitter opposition which the introduction of the gymnasium in Jerusalem brought about. "Pugilism," says Hamburger (*l.c.*), "has perhaps never exercised a greater influence in the development of spiritual life than it did at Jerusalem."

The Hasmonean rising wiped out every vestige of Hellenism, but scarcely a century passed before the influence of the Romans was felt; instead, however, of the gymnasium, the circus was introduced, and with it the gladiatorial contests, which no doubt offended the religious feelings of the Jews, for the Rabbis prohibited attendance at both circus and theater (Targ. Yer. Deut. xxviii. 19; Pesik., ed. Buber, 119*b*; Lam. R. 36*c*; 'Ab. Zarah 18*b*). Indeed, a rabbi of the first century decreed that any one who attended a circus was a murderer (Yer. 'Ab. Zarah 40*a*).

Herod Reintroduces Olympic Games.

Herod the Great was responsible for the reintroduction of Athletics to Jewish life; "for, in the first place, he appointed solemn games to be celebrated every fifth year in honor of Cæsar, and built a theater at Jerusalem, as also a very great amphitheater in the plain" (Josephus, "Ant." xv. 8, § 1). These were both costly works, erected by Herod for the purpose of securing the good-will of Emperor Augustus (7 B.C.); but even though Herod strove to dazzle the Jews by the magnificence of the sports, and though he appointed every fifth year for the celebration of Olympic games, yet these were "looked on by the sober Jews as heathenish sports, and tending not only to corrupt the manners of the Jewish nation, and to bring them in love with paganish idolatry and paganish conduct of life, but to the dissolution of the law of Moses, and accordingly were greatly and justly condemned by them" (Josephus, *ib.*, note). But this was not the universal opinion. Some rabbis, who considered Athletics as a part of "Greek wisdom," learned to appreciate the value of gymnastic exercises for the physical development of Jewish youth; and among them was Gamaliel II., the patriarch, who favored the introduction of the gymnasium as a means of preparing the Jews for their intercourse with the Roman rulers (Soṭah 49*b*; B. K. 83*a*). Notwithstanding the fact that some looked on Athletics with favor, and that amphitheaters had been built at Jericho, Tiberias, and Taricheæ, shortly after the Roman wars the sports became repugnant to the Jews, and ultimately they were no longer followed. Resh Laḳish was noted however for his gladiatorial skill and strength; and instances of Jews hiring themselves to the masters of the games for exhibition were not rare (see Jastrow, "Dict." *s.v.* לודים).

The lifting of heavy weights was practised at an early date by the Jews, as is attested by Jerome (cited by Israel Abrahams, "Jewish Life in the Middle Ages," p. 375), who relates that when visiting Judean towns in the fourth century he saw "large, heavy stones which Jewish boys and youths handled and held aloft in the air to train their muscular strength."

That archery was practised is seen from the record of Herod's achievements cited by Josephus ("B. J." i. 21, § 13): "They saw him throw the javelin directly forward, and shoot the arrow upon the mark." Abrahams (*l.c.*) says: "The Palestinian Jews were wont to practise archery, probably as a form of recreation"; and he cites in a note W. Bacher's article, "Une Vieille Controverse au Sujet de מטרא (Lam. iii. 12)," in "Revue Etudes Juives," xxvi. 63-68. Here Bacher challenges the interpretation of מטרא, which he claims should be translated as "arrow" and not as "javelin," which view is maintained in the Authorized Version ("and set me as a mark for the arrow"), and does not admit the correctness of Levy's ("Neuhebr. Wörterb." i. 130*b*) interpretation, "I was set there as a buckler to be pierced by the javelin."

Juggling also was known among the Jews and practised by the Rabbis; for of Simon ben Gamaliel, who perished at the destruction of the Temple by Titus in 70, it is said that on the occasion of one of the Tabernacle feasts he astonished those present by juggling with eight burning torches. Rabbi Judah I. witnessed a similar feat with eight knives, which was performed by Levi b. Sisai. Samuel, the physician-astronomer, exhibited his dexterity in this direction before Sapor with eight goblets; and Abaye was able to juggle with four eggs (Tosef., Suk. iv. 2; Yer. Suk. v. 55*c*.; Tosef., Suk. iv. 4; Bab. Suk. 53*a*).

That the Jews were strong swimmers is proved by Josephus, who relates that in his twenty-sixth year he "came to Rome, though it were through a great number of hazards by sea; for, as our ship was drowned in the Adriatic sea, we that were in it, being about six hundred in number, swam for our lives all the night," and "I and some others, eighty in all," were taken aboard a ship of Cyrene (Josephus, "Vita," § 3). According to some tannaim, it is the duty of every father to teach his son to swim (Ḳid. 29*a*); the amora Simeon ben Laḳish was a noted swimmer (B. M. 84*a*).

Although permitted to bear arms and to hold important military offices during the fourth century, the Jews were prohibited from doing so, and, in fact, were excluded from all military service in 418. Under the Assize of Arms issued in England by Henry II. in 1181, by which every freeman was compelled to serve in defense of the realm, Jews were prohibited from keeping with them mail or hauberk, and were ordered either to sell them or to give them away (Stubbs, "Select Charters," pp. 155–157; see also Jacobs, "Jews of Angevin England," p. 75).

With the notable exceptions of the cities of Worms and Prague, where the Jews were efficient in the bearing of arms, these restrictions seem to have been put upon them wherever they dwelt; so that possibly such restrictions were chiefly responsible for the neglect of hunting, in which weapons were needed. Abrahams quotes Meïr of Rothenburg as opposed to hunting. Meïr declared that "he who hunts game with dogs . . . shall not partake of the joy of the Leviathan" (Meïr of Rothenburg, Resp., ed. Mekize Nirdamim, p. 7, § 27). 'Ab. Zarah (18*b*) forbids hunting; nevertheless, there were Jews who disregarded the prohibition and were reproved for it (Or Zarua', Alfab. No. 47). Of their actions in this regard Abrahams (*ib.* p. 376) says: "Jews did at least occasionally participate in hunting. Nor are indications wanting that this was the case . . . throughout the Middle Ages. Zunz cites an instance" ("Z. G." p. 173). Abrahams, citing Nowack ("Lehrbuch der Hebräischen Archäologie," i. 367) as authority, says the ancient Jews were never noted riders; but, quoting Berliner ("Aus dem Innern Leben," p. 17), he adds that in Provence "the Jews possessed trained falcons, and used them in hawking, themselves riding on horseback."

Joseph Jacobs ("Jewish Ideals," p. 226) cites from the Forest Roll of the county of Essex for 1277, a document in which reference is made to an improvised hunt near the city of Colchester in 1267, in which several Jews took part, but afterward suffered for having thereby been guilty of a breach of the forest laws. Abrahams (*op. cit.*), in a note on this event, refers the reader for other records of Jewish hunters to "Hatam Sofer," resp. xiv., §§ 52, 53; J. Reischer, "Shebut Ya'akob," ii. 63.

Among other exercises popular with the Jews were ball-playing, the tourney, and dueling. The first was chiefly practised by the young women, and in some measure resembled tennis; but it brought upon them the displeasure of certain rabbis, who condemned its indulgence, especially on the Sabbath, as one of the causes of the destruction of the Temple (see Lam. R. ii. 4), and probably because it distracted attention from the more serious duties of life (Yer. Ta'anit, iv. 5).

The tournament was not altogether unknown to the Jews, especially to those of Spain and Italy. In those countries it was the custom of the Jewish boys to attend mimic tourneys, at which they fought on foot, while the men, mounted on horses, rode to the tilt-yard and there displayed their skill in tilting with blunted wooden lances at suspended effigies. Sometimes at these sports the cavaliers were escorted by mounted buglers, and their approach was heralded by a fanfare of trumpets. It has been suggested that in the fourteenth century the Jews also took part in actual tourneys, the suggestion being based on a fracas that occurred at Weissenfels in 1386; but according to Berliner ("Aus dem Innern Leben," p. 16) and Zunz ("Z. G." p. 184) the incident was a genuine case of attack by marauders against the Jews, who merely defended themselves (Abrahams, *l.c.* xxi. 378).

That Athletics were not always unpopular with the Rabbis is shown by the various references found in rabbinical literature. In Gen. R. (lxxvii. 2) there is a comparison of "an athlete engaged in battle with the son of a king," and in Ex. R. (xxi. 10) is another: "as two athletes, one weak and one strong; one overcomes the other and places a wreath on his head."

The persecutions to which the Jews were subjected in almost every country during the Middle Ages restricted their movements and their liberty to such a degree that most of their time was given up to the transaction of such business as the laws of the countries in which they dwelt allowed, and to the protection of their lives. Under such conditions athletic exercises and sports did not flourish among them; but toward the close of the eighteenth century in tolerant England a small band of Jewish pugilists stepped into the ring, and once more the Jew took an active part in the athletic life and exercises of the country in which he dwelt. The most notable of the English fighters of this period were Jews, and among them were Daniel Mendoza, champion of England from 1792 to 1795; Solomon Sodickey, Isaac Bittoon, and Samuel Elias, better known as "Dutch Sam." For nearly thirty years these men and their descendants (Samuel Evans, "Young Dutch Sam," Abraham and Israel Belasco, and others), steadily maintained the position of their race in the prize-ring; and they were succeeded in the nineteenth century by others equally skilful.

But it is not in the prize-ring alone that Jews have become prominent. Muscular Judaism has asserted itself also in field and athletic sports. Athletic clubs and "Turnvereine" have been formed in most of the large cities where there are many Jews. A special journal devoted to Jewish Athletics is published in Berlin, and nearly all Jewish papers devote space to the reporting of events in the fields of gymnastics, sports, and games. The spirit of physical development has so permeated the Jew of modern times that there is now no branch of Athletics in which he does not take a part. On the roll of fame may be noted the names of Jewish men who have defeated all comers in open competition when they met the Athletes of the nations of the world, as at the recent revival of the Olympic Games in Greece and at the Paris Exposition of 1900.

A Jewish athletic association has been formed recently in London, England, which embraces all sports. The membership rolls of the principal yacht-clubs bear many Jewish names. In the boating-clubs are to be found many expert Jewish oarsmen. The Jew is an enthusiastic cyclist, and has shown his dexterity at tennis, baseball, and cricket. There are few cricket-clubs in England that have not one or two Jewish members. In the United States one of the prominent baseball teams has a Jewish president, while a number of Jews play the game throughout the country. On the football field the Jew has shown his strength and nimbleness, and on the running-track his fleetness. Recently a Jewish student at Cambridge University, Raphael, was selected to play football for England in the International games and cricket in the inter-university sports. As a jumper few competitors can excel the Jew; in fact, the world championship at the running jump was held by Meyer Prinstein, a Jew. The holder of the world's amateur record for heavy-weight lifting is E. Lawrence Levy. There have been, and probably there are still, Jewish jockeys. David Adler, who died in 1900 at Buluwayo, South Africa, proved conclusively that the Jewish jockey is a capable horseman.

As a swimmer the Jew's power and endurance are probably not so marked as his quickness in covering short distances; nevertheless, there are many strong swimmers among the Jews, and there is little doubt that in this number are to be found men who would hold their own in competition with non-Jews.

ATHRIBIS: A city, during the Ptolemaic period, in Lower Egypt on the Damietta arm of the Nile near the present Bencha (Benha al Asi), southwest of Zagazeeg. On the hill near Benha there are vestiges of the old city of Athribis. A Jewish colony must have dwelt here, as is proven by two Greek inscriptions which were discovered on the hill in 1876. The first reads, "In honor of King Ptolemy and of Queen Cleopatra, Ptolemy, son of Epicydus, chief of the guards, together with the Jews resident in Athribis [consecrate] this place of prayer to God the Most High." The second inscription reads, "In honor of King Ptolemy and of Queen Cleopatra and of their children, Hermias and his wife Philotera and their children [consecrate] this exedra and this place of prayer." It seems probable that all the persons mentioned here were Jews. The expression "God the Most High" is the equivalent of the Hebrew "El 'Elyon" (compare Eusebius, "Præp. Evan." i. 10, [illegible]). The word used for "a place of prayer" [illegible] occurs in this same sense in other Jewish inscriptions, in the New Testament, Josephus, Philo, etc. The exedra mentioned in the second inscription was probably a hall or an arcade used for religious or philosophical discussions (=חצר, LXX. to Ezek. [illegible]; "the hall of the schoolhouse," ליׂשכה, B. B. [illegible]; see Jastrow, "Dict." s.v. אכסדרא). It is impossible to tell the exact date of these inscriptions, as Ptolemy V., VI., and VIII. had each a wife whose name was Cleopatra. S. Reinach thinks it probable that Ptolemy V. is intended, who died in 181 B.C.

K. G.

ATHRONGES: Leader of the Jews during the insurrection under Archelaus (4 B.C.-6 C.E.). A shepherd and bold adventurer, without any other claim to power but that of gigantic strength and stature, he managed, in common with his four brothers of equal size and vigor, to rally large bodies of men around him, and, after assuming the royal title, to wage war both on the Romans and on the forces of Archelaus. After a protracted and brave struggle, he and his brothers were defeated. Rapoport has explained the name "Athronges" by the Hebraized Persian word אתרוג. אתרונגא. "orange," or "melon" (see Fleischer in Levy, "Neuhebr. Wörterb." i. 77), and identified it with Ben Baṭiaḥ, "Son of the Cucumber" (that is, like a cucumber), the popular hero, the size of whose fist [אגרוף] has become proverbial in ancient rabbinical literature (Kelim xvii. 12; Tosef., Kelim, B. M. vii. 2); the form of his hand having, as Rapoport thinks, given rise to both terms. At a later time, legend identified him with the leader of the insurrection, Abba Saḳḳara, the nephew of Johanan ben Zakkai.

G. K.

ATLANTA: Since 1868 capital of the State of Georgia in the United States. The city was captured and burned by the United States troops in 1864, and all of the civic and congregational records were destroyed.

From the best tradition obtainable, it appears that the first Jewish resident of Atlanta was Jacob Haas, who, with his family, settled there about 1846, to be followed soon after by Moses Sternberg. The daughter of Jacob Haas was the first Jewish child born in the place. She married her cousin, also named Jacob Haas.

The Hebrew Benevolent Congregation was formed during the war, and held services on holidays in the Masonic Temple, located on Decatur street. It is now the leading Jewish congregation in the place. Other religious organizations are the Ahawat Achim and Gemilath Chesed. In 1867 a social organization, the Concordia, was founded, in 1870 the Hebrew Ladies' Benevolent Association, and later the Hebrew Relief Association.

In 1889 there was established here, by District Grand Lodge No. 5 of the Independent Order of B'nai B'rith, the Hebrew Orphans' Home, of which the Hon. Simon Wolf of Washington is president. In 1900 it cared for sixty-eight inmates.

The rabbis of the community have been the Revs. Borcheim, Henry Gersoni, E. B. M. Brown, J. S. Jacobson, Leo Reich, and David Marx.

Atlanta has furnished two Jewish members to the Georgia legislature; namely, Col. Samuel Weil and Adolph Brandt. David Mayer, one of the earlier settlers, was instrumental in the organization of the public-school system of Atlanta, and was commonly known as "the father of the public schools."

In a total population of 100,000 there is an estimated Jewish population of 1,500 to 2,000. Jews are engaged on a large scale in the manufacture of paper boxes and other goods made from paper, also furniture, machinery, and cotton goods. A cotton-mill owned by a Jewish family has the unique distinction of making bags from cloth woven in the same building, in which the cotton was also spun. Jews are also engaged in the manufacture of harness, candy, crackers, paints, mattresses, spring beds, iron bedsteads, clothing, stationery, and leather.

A.

ATLAS, ELAZAR (LAZAR): Literary critic; son of David Atlas; born March 5, 1851, in Beisegola, in the government of Kowno, Russia. His early years were spent at Novo Zhagory in the study of the Talmud. In 1884 he arrived at Warsaw and became one of the chief contributors to the year-book "Ha-Asif," which N. Sokolow then published. In 1888 he edited the year-book "Ha-Kerem," of which only one number appeared. Next, he collected a number of literary essays, which he had published from time to time in "Ha-Ẓefirah," and issued them under the title מה לפנים ומה לאחור ("What Is Progressive and What Retrogressive," Warsaw, 1898).

In 1900 he again contributed to Sokolow's "Sefer ha-Shanah."

Atlas' occupation is that of a bookkeeper. In 1895 he settled at Byelostok, in the government of Grodno, Russia. When practically unknown in the literary world, he was entrusted with the criticism of such important works as Herzberg's "Handelsgeschichte der Juden des Alterthums" and the third volume of I. H. Weiss' דור דור ודורשיו (History of Jewish Tradition), besides six other works of minor importance ("Ha-Asif," i. 24-37, 229-250). This work brought him into prominence.

The review of Herzberg's book is practically a sketch of the progress of trade among the ancient Hebrews, following in the main the outline of Herzberg, but showing, nevertheless, independent reasoning and fearless criticism, and proving that the critic was as much at home in the subject as the author. His criticism of Weiss showed that he was in his element when dealing with Talmudic literature.

Atlas' critical studies in the second year of the "Ha-Asif" range over works widely divergent in character. The "Bet Talmud" of Weiss, a Hebrew periodical devoted to rabbinic lore; the "Ha-Shahar" of Smolenskin, a periodical of a general character; two Russian monthlies ("Voskhod" and "Evreiski Obozrenie"), and Grätz's "Monatsschrift," all pass his review. The wide learning, the critical acumen, the lucid style, and the sound reasoning displayed in these studies at once place him among the foremost living critics in Hebrew literature.

He next ventured on editorial ground, and his "Ha Kerem" showed that he had a following, for we find among his coworkers such men as Epstein, Mandelkern, and Reifmann. Of his own contributions to that volume we may say that they all attest to his originality and erudition. Whether reconstructing the order of Isaac ben Shesheth's Responsas ("Ha-Kerem," pp. 6-9), or treating of the Masoretic work אכלה ואכלה (*ib.* pp. 27-32), he shows that he has the whole rabbinic literature at his command. His review of S. J. Fuenn's כנסת ישראל, the first comprehensive biographical dictionary in Hebrew, is worth the study of all editors of similar works (*ib.* pp. 258, 259). His criticism of Radner's translation of Cassel's "History of the Jews" proves how severe one may be in criticism without being offensive. He hoped to continue the publication of the "Ha-Kerem" (*ib.* p. 24), but his hopes were not fulfilled.

In the writings thus far discussed, as well as in his criticism of Ha-Levy's דורות הראשונים (ספר השנה, pp. 102-124), Warsaw, 1900, Atlas appears only as the student of history. It is in his article on the yeshibah of Wolozyn ("Ha-Kerem," pp. 77-82), and especially in his collected essays, that he shows himself the man of the world. His views on current questions are stamped with the same originality as his discussions in history. The study of Jewish history is to him not an end in itself, but a means of getting at the proper system of education ("Essays," pp. 62-64). Hence he advocates the establishment of a premium by some representative Jewish body for the encouragement of historic work done with this end in view ("Essays," p. 74). Zionism is an economic question with him ("Ha-Asif," i. 245). Religious reform should not be the product of a few scholars, who would fashion the law after their own heart. The true reformers are the people themselves. When a certain law has been hopelessly infringed by the people, it is time then for the rabbi to find a legal fiction as an excuse for the infringement. Such was the origin of many reforms, which are now accepted by Orthodox Judaism, *e.g.*, lending money on interest and the like ("Essays," pp. 22-26).

L. G. I. D.

ATOMISM (from Greek ἄτομος = indivisible): The theory concerning atoms. Two opinions of the nature of matter were professed in the Greek philosophical schools. The Eleatic school asserted that matter is infinitely divisible. Democritus, Leucippus, and Epicurus maintained, on the contrary, that in the repeated division and subdivision of anything a point is reached when, by no conceivable means, can it be divided in two; the molecule being a real unity, not compounded of separable parts; in other words, it is an *atom*. On this idea of indivisibility of matter, Democritus founded his cosmological system. In his opinion, nothing exists but atoms of different shapes and forms, and a vacuum in which the atoms move. The atom possesses, besides the property of solidity, that of movement. The vacuum is nothing by itself; it is only the absence of any impediment to the movement of the atoms. Genesis and destruction proceed from the aggregation and disaggregation of atoms that existed from all eternity (compare Lucretius, "De Rerum Natura," i. 601 *et seq.*).

The Motekallamin.

This theory—which in ascribing the existence of the whole universe to a fortuitous combination of atoms was intended to exclude all intelligent principle from the world-formation—was later adopted, with many amendments, by the Motekallamin as the basis of their dogma of creation *ex nihilo*. The universe, they asserted, is composed of atoms (جوهر الفرد or الجزء), which, on account of their smallness, are indivisible. An atom has no magnitude; but when several atoms combine the sum has a magnitude, and thus forms a body. Atoms were created, and are not—as was supposed by the Greek atomists—always numerically the same in the order of things; but are created anew whenever it so pleases the Creator; their annihilation being impossible. According to Maimonides, the Motekallamin extended the theory of atoms even to space and time. Having seen that Aristotle had proved that space, time, and motion could be divided into parts standing in such relations to one another that if one be divisible the others must be correspondingly divisible, they maintained that space could not be continuous, but that it was composed of indivisible elements; and that time likewise was reducible to corresponding indivisible time-elements.

Saadia.

Although the Kalam exercised a great influence on the earlier Jewish philosophy, Atomism found nothing but adversaries among the Jewish philosophers. Saadia rejects the theory of atoms on the ground that it is impossible to imagine that atoms, having no magnitude, could become dimensional bodies ("Al Imanât weal-I'tikadat," ed. Landauer, p. 43; Hebrew text, ed. Slutzki, p. 23).

Maimonides.

Maimonides devoted a whole chapter in his "Guide of the Perplexed" to combating the theory of atoms as that theory had been elaborated by the Motekallamin. If every motion, he says, is to be resolved into a series of successive motions of single atoms of substance, through one atom of space, and these atoms are supposed to be equal, the velocity of all moving bodies must be the same, which is absurd. In the revolution of a millstone, for example, each point in the extreme circumference of the stone describes a large circle in the very same time in which a point nearer the center describes a smaller circle; the velocity of the outer circle is therefore greater than that of the inner circle ("Moreh," I. lxiii.).

Among the Karaite philosophers Atomism found no more adherents than among the Rabbinites. Aaron ben Elijah of Nicomedia fully explains the views of the atomists (אנשי המחקר); and, except Levi ben Jefet, who may possibly have been an atomist, all other Karaite philosophers quoted by Aaron ben Elijah were against Atomism ("Ez Ḥayyim," ed. Delitzsch, iv.).

K. I. Br.

ATONEMENT: The setting at one, or reconciliation, of two estranged parties—translation used in the Authorized Version for "kapparah," "kippurim." The root כפר ("kipper"), to make atonement, is explained by W. Robertson Smith ("Old Testament in the Jewish Church," i. 439), after the Syriac, as meaning "to wipe out." This is also the view taken by Zimmern ("Beiträge zur Kenntniss der Babylonischen Religion," 1899, p. 92), who claims Babylonian origin for both the term and the rite. Wellhausen ("Composition des Hextateuchs," p. 335) translates "kapparah" as if derived from "kapper" (to cover). The verb, however, seems to be a derivative from the noun "kofer" (ransom) and to have meant originally "to atone."

Original Meaning.

Just as by old Teutonic custom the owner of a man or beast that had been killed was to be pacified by the covering up of the corpse with grain or gold ("Wergeld") by the offender (Grimm, "Deutsche Rechts-Alterthümer," p. 740), so Abimelech gives to Abraham a thousand pieces of silver as a "covering of the eyes," in order that his wrongdoing may be overlooked (Gen. xx. 16, R. V.; A. V., incorrectly "he" for "it"). "Of whose hand have I received any [kofer] bribe [A. V., "taken a ransom"] to blind my eyes therewith?" says Samuel (I Sam. xii. 3).

"Kofer" was the legal term for the propitiatory gift or ransom in case a man was killed by a goring ox: "If there be laid on him a [kofer] ransom [A. V., inaccurately, "a sum of money"] (Ex. xxi. 30); but this "kofer nefesh" (ransom for the life) was not accepted in the case of murder (Num. xxxv. 31, 32). The dishonored husband "will not regard any ransom" ("kofer"; Prov. vi. 35). No man can give a kofer for his brother to ransom him from impending death (Ps. xlix. 8, Hebr.; A. V. 7). At the taking of the census "they shall give every man a ransom for his soul unto the Lord . . . half a shekel" (Ex. xxx. 12, Hebr.). Similarly, Jacob, in order to make his peace with his brother Esau, says, "I will appease ["akapperah"] his [angry] face with the present" (Gen. xxxii. 21, Hebr. [A. V. 20]); that is, "I will offer a kofer." When the blood of the murdered Gibeonites cries to heaven for vengeance, David says: "Wherewith shall I make atonement ["bammah akapper"]?" that is, "With what kind of kofer shall I make atonement?" (II Sam. xxi. 3). "The wrath of a king is as messengers of death: but a wise man will [by some propitiatory offering or kofer] pacify it" (Prov. xvi. 14). Every sacrifice may be considered thus as a kofer, in the original sense a propitiatory gift; and its purpose is to "make atonement ["le kapper"] for the people" (Lev. ix. 7, x. 17).

Connection with Sacrifice.

In the priestly laws, the priest who offers the sacrifice as kofer is, as a rule, the one who makes the Atonement (Lev. i.-v., xvi., etc.); only occasionally is it the blood of the sacrifice (Lev. xvii. 11), or the money offering ("kesef kippurim," Ex. xxx. 15, 16; Num. xxxi. 50), that makes Atonement for the soul; while the act of Atonement is intended to cleanse the person from his guilt ("meḥaṭato," Lev. iv. 26, v. 6-10).

In the prophetic language, however, the original idea of the kofer offering had become lost, and, instead of the offended person (God), the offense or guilt became the object of the Atonement (compare Isa. vi. 7, Hebr.: "Thy sin ["tekuppar"] is atoned for [A. V., "purged"]"; Isa. xxvii. 9, Hebr.: "By this, therefore, shall the iniquity of Jacob be atoned for [A. V., "purged"]"; I Sam. iii. 14: "The iniquity of Eli's house shall not be atoned for [A. V., "purged"] with sacrifice nor offering for ever"; Prov. xvi. 6: "By mercy and truth iniquity is atoned for [A. V., "purged"]"); and, consequently, instead of the priest as the offerer of the ransom, God Himself became the one who atoned (Deut. xxi. 8, "Kapper le'amka Israel," "Atone thou for thy people Israel" [Driver, Commentary, "Clear thou thy people"; A. V., "Be merciful, O Lord"]; compare Deut. xxxii. 43, "And he will atone for the land of his people" [Driver, Commentary, "Clear from guilt"; A. V., "will be merciful unto his land, and to his people"]; see also Jer. xviii. 23; Ezek. xvi. 63; Ps. lxv. 4, lxxviii. 38, lxxix. 9; II Chron. xxx. 18).

Atonement Idea Spiritualized.

Thus there is in Scripture a successive spiritualization of the idea of Atonement. Following the common view, David says (I Sam. xxvi. 19): "If the Lord have stirred thee up against me, let him accept an offering [to appease the anger of God]." But while this cruder view of sacrifice underlies the form of worship among all Semites (see Robertson Smith, "Religion of the Semites," pp. 378-388), the idea of Atonement in the priestly Torah is based upon a realizing sense of sin as a breaking-away from God, and of the need of reconciliation with Him of the soul that has sinned. Every sin—whether it be "ḥeṭ," a straying away from the path of right, or "'avon," crookedness of conduct, or "pesha'," —rebellious transgression—is a severance of the bond of life which unites the soul with its Maker. "The soul that sinneth, it shall die," says Ezek. xviii. 20 (compare Deut. xxx. 15–19; Ps. i. 6; Jer. ii. 13). It is the feeling of estrangement from God that prompts the sinner to offer expiatory sacrifices—not only to appease God's anger by a propitiatory gift, but also to place his soul in a different relation to Him. For this reason the blood, which to the ancients was the life power or soul, forms the essential part of the sacrificial Atonement (see Lev. xvii. 11). This is the interpretation given by all the Jewish commentators, ancient and modern, on the passage; compare also Yoma 5*a*; Zeb. 6*a*, אין כפרה אלא בדם = "There is no Atonement except with blood," with the identical words in Heb. ix. 22, R. V.: "Apart from shedding of blood there is no remission [of sins]." The life of the victim was offered, not, as has been said, as a penalty in a juridical sense to avert Heaven's punishment, not to have man's sins laid upon it as upon the scapegoat of the Day of Atonement, and thus to have the animal die in his place, as Ewald thinks ("Alterthümer," p. 68), but as a typical ransom of "life by life"; the blood sprinkled by the priest upon the altar serving as the means of a renewal of man's covenant of life with God (see Trumbull, "The Blood Covenant," p. 247). In Mosaic ritualism the atoning blood thus actually meant the bringing about of a reunion with God, the restoration of peace between the soul and its Maker. Therefore, the expiatory sacrifice was accompanied by a confession of the sins for which it was designed to make Atonement (see Lev. v. 5, xvi. 21; Num. v. 7; compare Maimonides, "Yad," Teshubah, i. 1): "no atonement without confession of sin as the act of repentance," or as Philo ("De Victimis," xi.) says, "not without the sincerity of his repentance, not by words merely, but by works, the conviction of his soul which healed him from disease and restores him to good health."

Atonement for the Whole People.

The sacrificial Atonement, based as it was on the symbolic offering of life for life, assumed a more awful or somber character when a whole community was concerned in the blood-guiltiness to be atoned for. While, in the time of David, people in their terror had recourse to the pagan rite of human sacrifice (II Sam. xxi. 1–9), the Deuteronomic law prescribed in such a case a mild and yet rather uncommon form of expiation of the murder; namely, the breaking of the neck of a heifer as a substitute for the unknown murderer (Deut. xxi. 1–9). To the same class belongs the goat in the annual Atonement ritual (Lev. xvi. 7–22), which was to carry away all the sins of the children of Israel into an uninhabited land and was sent out to Azazel in the wilderness, while another goat was killed as usual, and its blood sprinkled to make Atonement for the sanctuary, cleansing it of the uncleanness of all the transgressions of the children of Israel. In the case of the one goat, the doom emanating from unknown and therefore unexpiated sins of the people was to be averted; in the other case the wrath of God at the defilement of His sanctuary—which often implied the penalty of death (Num. i. 53)—was to be pacified. The very idea of God's holiness, which made either the approach to Mt. Sinai, the seat of God (Ex. xix. 12), the Ark (II Sam. vi. 7), or even the mere sight of God (Isa. vi. 5; Judges xiii. 22), bring death, rendered the ritual of the Day of Atonement the necessary culmination of the whole priestly system of expiation of sin.

Repentance and Atonement.

Yet, while the sacrificial rites were the only means of impressing upon the people God's holiness and the dreadful consequence of man's sinfulness, the idea of the Atonement assumed a far deeper and more spiritual aspect in the lives and teachings of the Prophets. Neither Hosea, Amos, and Micah, nor Isaiah recognizes the need of any means of reconciliation with God after estrangement by sin, other than repentance. "Take with you words, and turn to the Lord: say unto him, Take away all iniquity and receive us graciously: so will we render as bullocks the offerings of our lips" (Hosea xiv. 2, Hebr.; compare Amos v. 22–24; Isa. i. 13–17, and the well-known passage, Micah vi. 6–8): "Shall I come before him with burnt offerings, with calves of a year old? . . . Shall I give my first-born for my transgression, the fruit of my body for the sin of my soul? He hath shewed thee, O man, what is good; and what doth the Lord require of thee but to do justly, and to love mercy, and to walk humbly with thy God?").

Ezekiel.

But the prophet Ezekiel—a priest and therefore more deeply penetrated with the sense of sin and purity than other prophets—is not satisfied with the mere negation of ritualism. Repudiating, like Jeremiah, the idea held by his contemporaries that men undergo punishment on account of their fathers' sins, he lays the greater stress on the fact that the fruit of sin is death, and exhorts the people to cast away their sin and, returning to God, to live (Ezek. xviii. 4–32). For him Atonement is wrought by acquiring "a new heart and a new spirit" (*ib.* 31). In striking contrast with the other prophets, Ezekiel combines the belief in a complicated atoning ritual (as mapped out in Ezek. xl.–xlvi.) with the prophetic hope in the redeeming power of God's spirit which shall cleanse the people from their impurities and endow them with "a new heart and a new spirit" (xxxvi. 26).

Moses.

In no one, however, does the most elaborate ritualism of the Atonement sacrifice appear so closely intertwined with the profoundest spiritual conception of God's atoning powers as in Moses the lawgiver himself. When the worship of the Golden Calf had provoked God's wrath to such a degree that He said to Moses, "Let me alone . . . that I may consume them; and I will make of thee a great nation" (Ex. xxxii. 10), the latter, desirous of making an Atonement for their transgression, asked the Lord to forgive the people's sin, or else to blot Moses' own name out of His book (the book of life); and he persisted in imploring God's pardon even after He had said, "Whosoever hath sinned against me, him will I blot out of my book," until finally, in answer to Moses' entreaty, the full glory of God, His compassionate mercy, His long-suffering and forgiving love, were revealed and Moses' prayer for the people's pardon was granted (Ex. xxxiv. 1–9;

Num. xiv. 17-20). There Moses' own self abnegating love, which willingly offered up his life for his people, disclosed the very qualities of God as far as they touch both the mystery of sin and the divine forgiveness, and this became the key to the comprehension of the Biblical idea of Atonement. The existence of sin would be incompatible with a good and holy God, but for His long-suffering, which waits for the sinner's return, and His condoning love, which turns man's failings into endeavors toward a better life. Each atoning sacrifice, therefore, must be understood both as an appeal to God's forgiving mercy, and as a monition to the sinner to repentance. "Let the wicked forsake his way and the unrighteous man his thoughts: and let him return unto the Lord, and he will have mercy upon him: and to our God, for he will abundantly pardon" (Isa. lv. 7).

Substitutes for Sacrifice.

It was quite natural that, during the Exile, when no sacrifice could be offered, other means of obtaining forgiveness and peace should be resorted to. First of all, prayer rose in value and prominence. As Moses interceded for his people, praying and fasting for forty days and forty nights in order to obtain God's pardon (Ex. xxxii. 30; Deut. ix. 18, 25), so did every prophet possess the power of obtaining God's pardon by his prayer. Abraham, as a prophet, prayed for the life of Abimelech (Gen. xx. 7); Pharaoh, after a confession of his sin, asked Moses and Aaron to pray to God for the withdrawal of the plague of hail (Ex. ix. 27, 28); acknowledging their sin, the people ask Samuel to intercede for them (I Sam. xii. 19); and Jeremiah is expressly warned: "Pray not thou for this people, neither lift up a cry or prayer for them" (Jer. xi. 14; compare *ib.* xv. 1). See Prayer.

Fasting, Alms-giving, Suffering.

The great dedication prayer of King Solomon requires on the part of the sinner only a turning of the face in prayer in the direction of the Temple in order to meet with a response from heaven and with forgiveness of his sin (I Kings viii. 30, 33, 35, 48-50). The very idea of sacrifice is spurned by the Psalmist (Ps. l. 8-14, li. 12-20 [A. V. 11-19]): "Sacrifice and offering thou dost not desire" (xl. 7 [A. V. 6]): "The sacrifices of God are a broken spirit" (li. 18 [A. V. 17]). Throughout the Psalms sincere repentance and prayer form the essentials to Atonement. Prayer is "as incense" and "the evening sacrifice" (Ps. cxli. 2); with the Lord is forgiveness. "He shall redeem Israel from all his iniquities" (Ps. cxxx. 4-8). Fasting especially appears to have taken the place of sacrifice (Isa. lviii. 1-3; Zach. vii. 5). Another means of Atonement in place of sacrifice is offered to King Nebuchadnezzar by Daniel: "Break off thy sins by almsgiving ["zedakah" (A. V., "righteousness")], and thine iniquities by showing mercy to the poor" (Dan. iv. 24, Hebr. [A. V. 27]). Most efficacious seemed to be the atoning power of suffering experienced by the righteous during the Exile. This is the idea underlying the description of the suffering servant of God in Isa. liii. 4, 12, Hebr.:

> "The man of sorrows and acquainted with grief . . . he hath borne our pains [A. V., "griefs"], and carried our sorrows. . . . But he was wounded for our transgressions, bruised for our iniquities . . ."
>
> "The chastisement for [A. V., "of"] our peace was upon him: and with his stripes were we [A. V., "we are"] healed."
>
> "All we like sheep had [A. V., "have"] gone astray; we had [A. V., "have"] turned every one to his own way."
>
> "And the Lord hath laid on him the iniquity of us all."
>
> "He was cut off out of the land of the living: for the transgression of my people was he stricken."
>
> "He bare the sin of many and made intercession for the transgressors."

Post-Biblical Atonement.

Whoever may have formed the subject of this tragic song—whether Zerubbabel or some other martyr of the Babylonian Exile—the seer, in embodying it in his message of comfort to his people, desired to assure them that of greater atoning power than all the Temple sacrifices was the suffering of the elect ones who were to be servants and witnesses of the Lord (Isa. xlii. 1-4, xlix. 1-7, l. 6). This idea of the atoning power of the suffering and death of the righteous finds expression also in IV Macc. vi. 27, xvii. 21-23; M. K. 28*a*; Pesiḳ. xxvii. 174*b*; Lev. R. xx.; and formed the basis of Paul's doctrine of the atoning blood of Christ (Rom. iii. 25). It was the inspiration of the heroic martyrdom of the Ḥasidim or Essenes (Ps. xxix. 2, cxvi. 15; Philo, "Quod Omnis Probus Liber," § xiii.). The principle of Atonement by sacrificial blood was, on the whole, adhered to during the second Temple. Job's intercession on behalf of his friends is accompanied by their burnt offering, which is to atone for their sins (Job xlii. 8; compare i. 5). In the Book of Jubilees Noah and Abraham make Atonement for the earth and for man by means of sacrificial blood (vi. 2, vii. 3, xvi. 22). In Sibyllines iii. 626 *et seq.*, the heathen are told to offer hecatombs of bulls and rams to obtain God's pardon for their sins (compare Ps. lxxvi. 12; Isa. lvi. 7); but in Sibyllines iv. 29, 161, the Essene view, deprecating sacrifice, seems to be expressed. Nevertheless, the conception of Atonement underwent a great change. The men of the Great Synagogue—disciples of the Prophets and imbued with the spirit of the Psalms—had made prayer an essential element of the Temple service; and whereas the Ḥasidean liturgy, accentuating divine forgiveness and human repentance, took little notice of sacrifice, the Levites' song and the prayers introduced as parts of the worship lent to the whole sacrificial service a more symbolic character. Accordingly, each of the two lambs ("kebasim") offered every morning and evening as a burnt-offering (Num. xxviii. 3, 4) was declared by the school of Shammai to be "kobesh," intended "to subdue" the sins of Israel (see Micah vii. 19: "Yikbosh 'avonotenu" = "He will subdue our iniquities." A. V.) during the year until the Day of Atonement should do its atoning work. By the school of Hillel the lamb was to be "kobes," "to wash Israel clean" from sin; see Isa. i. 18; Jer. ii. 22; Pesiḳ. vi. 61*b*; Pesiḳ. R. 16 (ed. Friedmann, p. 84) and 81, p. 195; and more especially the notes by Buber and Friedmann, *ad loc.* Compare also the expression "Behold the Lamb of God, which taketh away the sin of the world" (John i. 29). "The morning sacrifice atoned for the sins committed during the previous night, the afternoon sacrifice for the sins committed in the daytime" (Tan., Pinḥas, 12).

The whole idea of sin was, in fact, deepened. It was regarded rather as a breaking-away from the original sinless state of man as the child of God—which state must be restored—than as a wrong committed against God needing covering up. The expressions "temimim," "spotless," and "ben shanah," "of the first year" (Num. xxviii. 3), suggested the thought that sin-laden man should become "spotless like a child of one year" (Pesik. R. *l.c.*; compare Shab. 89*b*). Of course, as a symbolic rite, this mode of cleansing oneself from sin could be, and actually was, replaced by daily baptism and fasting such as were practised by the Ḥasidim—those heroes of prayer who in time of national distress made intercession for the people far more effectively than did the priests in the Temple (Josephus, "Ant." xiv. 2, § 1; xviii. 8, § 4; compare Ta'anit 19*a*, 20*a*; 23*a*).

Still the words of Simon the Just, "The world rests on the Law, worship, and works of benevolence" (Ab. i. 2), retained their validity likewise for the Ḥasidim, who felt the need of an atoning sacrifice (Ned. 10*a*; Ker. vi. 3). It was especially owing to the assistance offered by the "ma'amadot," the chosen representatives of the people, with their fasts and prayers, that the daily sacrifice assumed a more spiritual character, so that to it was applied the passage (Jer. xxxiii. 25): "If my covenant be not maintained day and night [by the service] I would not have made the ordinances of heaven and earth" (Meg. 31*b*; Ta'anit 27*b*).

After the Fall of the Temple.

The cessation of sacrifice, in consequence of the destruction of the Temple, came therefore, as a shock to the people. It seemed to deprive them of the divine Atonement. Hence many turned ascetics, abstaining from meat and wine (Tosef., Soṭah, xv. 11; Ab. R. N. iv.); and Joshua ben Ḥananiah, who cried out in despair, "Wo unto us! What shall atone for us?" only expressed the sentiment of all his contemporaries (IV Esd. ix. 36: "We are lost on account of our sins"). It was then that Johanan b. Zakkai, pointing to Hosea vi. 6 (R. V.), "I desire mercy and not sacrifice," to Prov. xvi. 6, "By mercy and truth iniquity is purged [atoned for]," and to Ps. lxxxix. 3 (A. V. 2), "The world is built upon mercy," declared works of benevolence to have atoning powers as great as those of sacrifice.

Christian Idea of Atonement.

This view, however, did not solve satisfactorily for all the problem of sin—the evil rooted in man from the very beginning, from the fall of Adam (IV Esd. iii. 20, viii. 118). Hence a large number of Jews accepted the Christian faith in the Atonement by the blood "shed for many for the remission of sins" (Matt. xxvi. 28; Heb. x. 12; Col. i. 20) or in Jesus as "the Lamb of God" (John i. 29; Apoc. of John vii. 14, and elsewhere). It was perhaps in opposition to this movement that the Jewish teachers, after the hope for the rebuilding of the Temple in the second century had ended in failure and wo, strove to develop and deepen the Atonement idea. R. Akiba, in direct opposition to the Christian Atonement by the blood of Jesus, addressed his brethren thus: "Happy are ye, Israelites. Before whom do you cleanse yourselves, and who cleanses you? Your Father in heaven: for it is said: 'I will sprinkle clean water upon you, and ye shall be clean: from all your filthiness . . . will I cleanse you. A new heart also will I give you, and a new spirit will I put within you'" (Ezek. xxxvi. 26); and again it is said that the Lord, "the hope of Israel" (Jer. xiv. 8), is also a "fountain of water" (a play on the Hebrew word "miḳweh"). "As the fountain of water purifies the unclean, so does God purify Israel" (Yoma viii. 9). This doctrine, which does away with all mediatorship of either saint, high priest, or savior, became the leading idea of the Jewish Atonement.

Elements of Atonement.

Accordingly, Atonement in Jewish theology as developed by the Rabbis of the Talmud, has for its constituent elements: (*a*) on the part of God, fatherly love and forgiving mercy; (*b*) on the part of man, repentance and reparation of wrong. The following exposition will serve to enlighten the reader on these elements:

(*a*) While God's quality of justice ("middat ha-din"), which punishes the wrong-doing, would leave no hope for man, since "there is not a righteous man upon earth that doeth good and sinneth not" (Eccl. vii. 20, R. V.), God's quality of mercy ("middat ha-raḥamin") has from the very beginning provided repentance as the means of salvation (Gen. R. i., xii.; Pesiḳ. xxv. 158*b*; Pesiḳ. R. 44; Pes. 54*a*.) "Thou hast mercy upon all; thou condonest the sins of men in order that they should amend" (Wisdom xi. 23). "Wherever there are sins and righteous deeds set against each other in the scale of justice, God inclines it toward mercy" (Pesiḳ. xxvi. 167*a*).

Divine Mercy.

Far from being merely judicial compensation for an outward act, as Weber ("System der Alt-Synagogalen Theologie," pp. 252, 300-304) asserts, the divine mercy is expressly represented by Hillel as working in favor of pardoning those who have no merit: "He who is plenteous in mercy turns the scale of judgment toward mercy" (Tosef., Sanh. xiii. 3; R. H. 17*a*). This quality of mercy is sure to prevail as soon as it is appealed to by the mention of the thirteen attributes with which the Lord appeared to Moses in response to his prayer for forgiveness after the sin of the Golden Calf (R. H. 17*b*). No matter how vile the sinner—be he as wicked as Menasseh or as Ahab—the gate of repentance is open to him (Pesiḳ. xxv. 160*b*, 162*a*).

> "Human Wisdom, when asked, 'What shall be done with the sinner?' replieth, 'Evil pursueth sinners' (Prov. xiii. 21). Prophecy, when asked, 'What shall be done with the sinner?' replieth, 'The soul that sinneth, it shall die' (Ezek. xviii. 4). The Law, when asked, 'What shall be done with the sinner?' replieth, 'Let him bring a guilt-offering and the priest shall atone for him' (Lev. i. 4 [Hebr.]). God himself, when asked, 'What shall be done with the sinner?' replieth, 'Let him repent, and he will be atoned for; was it not said: "Good and upright is the Lord: therefore will he teach sinners in the way of repentance" (Psalms xxv. 8). For, my children, what do I require of you? "Seek me and live"'" (Pesiḳ. xxv. 158*b*; Yer. Mak. ii. 31*d*).

Upon these ideas, which can be traced through the entire Apocryphal literature, was based the liturgy of the fast-days, and that of the Day of Atonement in particular; they are probably best expressed in the NE'ILAH prayer of the latter, which, going much further back than the second century (see

Yoma 87*b*, where Rab of Babylonia and R. Johanan of Palestine refer to some portions of it), contains such sentences as the following:

> "Thou offerest thy hand to transgressors, and Thy right hand is stretched out to receive the repentant" (Pes. 119*a*). "Not in reliance upon our merits do we lay our supplications before Thee, O Lord of all the world, but trusting in Thy great mercy. Thou dost not find delight in the perdition of the world, but Thou hast pleasure in the return of the wicked that they may live."

The saying of the Rabbis, "Higher is the station of the sinner who repenteth than that of him who has never sinned" (Ber. 34*b*; see Pes. 119*a*; Luke xv. 10), emanates from the same principle of God's redeeming grace:

> "God says, 'Open for me a gate no wider than a needle's eye, and I will open for you a gate through which camps and fortifications can pass'" (Pesiḳ. xxv. 163*b*). "When the angels wanted to shut the windows of heaven against the prayer of Menasseh, saying, 'Can a man who set an idol in the Temple repent?' God said, 'If I receive him not in his repentance, I shut the door upon all penitents'; and He bored a hole under His throne of Glory to hear his supplication" (Pesiḳ. *ib.* 162*b*).

Repentance.

(*b*) On the part of man Atonement is obtained in the first place by repentance, which consists of an outward Confession of Sins ("widdui," Lev. v. 5; xvi. 21) prescribed for the high priest on the Day of Atonement (Yoma 36*b*), and for the criminal before his execution, to expiate his sins (Sanh. vi. 2); and recited on penitential and fast days and by proselytes at the time of their admission into the Jewish fold (see "Prayers of Asenath," xiii.-xiv.) also by the dying ("Ebel Zuṭṭarti," in Brüll's "Jahrb." i. 11). This is to be the expression of self-reproach, shame, and contrition. "They must feel shame throughout their whole soul and change their ways; reproaching themselves for their errors and openly confessing all their sins with purified souls and minds, so as to exhibit sincerity of conscience, and having also their tongues purified so as to produce improvement in their hearers" (Philo, "De Execratione," viii.). The verse, "He who sacrifices thank-offerings [A. V., "praise"] glorifies me" (Ps. l. 23), is taken by the Rabbis as signifying, "He who sacrifices his evil desire while offering his confession of sin ["zobeaḥ todah"] honors God more than if he were praising Him in the world that now is and in the world to come" (Sanh. 43*b*). "He who feels bitter shame and compunction over his sins is sure of obtaining pardon" (Ber. 12*b*; Ḥag. 5*a*).

Reparation of Wrong.

But the main stress is laid upon the undoing of the wrong done. "No sin that still cleaves to the hand of the sinner can be atoned for; it is as if a man would cleanse himself in the water while holding the contaminating object in his hand; therefore it is said, 'He that covereth his sins shall not prosper, but whoso confesseth and forsaketh them shall have mercy'" (Prov. xxviii. 13; Ta'anit 16*a*). If a man steal a beam and use it in building, he must tear down the building in order to return the stolen thing to its owner; thus of the men of Nineveh it is said, "Let them turn every one from his evil way, and from the violence that is in [cleaves to] their hands" (Jonah iii. 8; Yer. Ta'anit ii. 65*b*; Bab. B.Ḳ. 66*b*).

Further, repentance consists in abandoning the old ways, and in a change of heart; for it is said "Rend your heart and not your garments, and turn unto the Lord your God" (Joel ii. 13); that is to say, "If you tear your heart, you need not tear your garments over a loss of sons and daughters" (Pesiḳ. xxv. 161*b*; Yer. Ta'anit, *l.c.*). "They poured out their hearts like water before God" (Yer. Ta'anit ii. 65d). "He who says, 'I will sin and repent; I will sin again and repent again,' will never be allowed time to repent" (Yoma viii. 9). Repentance rests on self-humiliation. "Adam was too proud to humiliate himself, and was therefore driven from Paradise" (Num. R. xiii. 3). "Cain who humbled himself was pardoned" (Pesiḳ. xxv. 160*ab*; Gen. R. xi., xxii.). "Great is the power of repentance; for it reaches up to the throne of God; it brings healing (Hosea xiv. 5 [A. V. 4]); it turns sins resulting from ill-will into mere errors (according to Hosea xiv. 2 [A. V. 1]); nay, into incentives to meritorious conduct" (Yoma 86*ab*). "He who sincerely repents is doing as much as he who builds temple and altar and brings all the sacrifices" (Lev. R. vii.; Sanh. 43*b*).

Prayer, Fasting, and Charity.

Hand in hand with repentance goes prayer. "It takes the place of sacrifice" (Pesiḳ. xxv. 165*b*, according to Hosea xiv. 3 [A. V. 2]). When God appeared to Moses after the sin of the Golden Calf, He taught him how to offer prayer on behalf of the sin-laden community (R. H. 17*b*). That prayer is the true service ('Abodah) is learned from Dan. iv. 24, there having been no other service in Babylonia (Pirḳe R. El. xvi.; Ab. R. N. iv.). "As the gates of repentance are always open like the sea, so are [holds R. 'Anan] the gates of prayer" (Pesiḳ. xxv. 157*b*).

But repentance and prayer are as a rule combined with fasting as a token of contrition, as is learned from the action of King Ahab recounted in I Kings xxi. 27, of the men of Nineveh referred to in Jonah iii. 7, and of Adam in Vita Adæ et Evæ, 6; Pirḳe R. El. xx.; 'Er. 18*b*. Fasting was regarded like "offering up the blood and fat of the animal life upon the altar of God" (Ber. 17*a*; compare Pesiḳ., ed. Buber, p. 165*b*, note). With these is, as a rule, connected charity, which is "more acceptable to the Lord than sacrifice" (Prov. xxi. 3). On every fast-day charity was given to the poor (Sanh. 35*a*; Ber. 6*b*). "Prayer, charity, and repentance, these three together, avert the impending doom" (Yer. Ta'anit ii. 65*b*). "Repentance and works of benevolence are together the paracletes [pleaders] for man before God's throne (Shab. 32*a*), and a shield against punishment" (Abot iv. 11).

Suffering as Means of Atonement.

Another thing considered by the Rabbis as a means of Atonement is suffering. Suffering is more apt than sacrifice to win God's favor and to atone for man (Mek., Yitro, 10; Sifre, Deut. 32; Ber. 5*a*). Poverty also, in so far as it reduces man's physical strength, has atoning power (Pesiḳ. xxv. 165*a*). Similar power was ascribed to exile (Sanh. 37*b*); also to the destruction of the Temple, which was held as a security—a play on the word משכן—for Israel's life (Gen. R. xlii.; Ex. R. xxxi.; Lev. R. xi.). Above all, death atones for sin (Sifre, Num. 112; Mek., Yitro, 7). "Let my death make atonement for all my sins," say men when dying or in peril (Ber. 60*a*; Sanh. vi. 2). Particularly the death

Suffering or Death of the Righteous.

of the righteous atones for the sins of the people: "Like the sanctuary, he is taken as security ["mashkon"] for the life of the community" (Tan., Wayaḳhel 9; Ex. R. xxxv. 4; Lev. R. ii.). That the death of the righteous atones is learned from II Sam. xxi. 14, which says that after the burial of Saul and Jonathan "God was entreated for the land" (Pesiḳ. xxvii. 174*b*). "Where there are no righteous men in a generation to atone for the people, innocent school-children are taken away" (Shab. 33*b*). So also does the suffering of the righteous atone; as in the case of Ezekiel (Sanh. 39*a*) and Job (Ex. R. xxi.). R. Judah ha-Nasi's suffering saved his contemporaries from calamities (Gen. R. 96). God is the King whose wrath is, in Prov. xvi. 14, referred to "as messengers of death," and the wise man who makes Atonement for it is Moses, who pacifies Him by prayer (Ex. R. xliii.). The death of Israel at the hands of his persecutors is an atoning sacrifice (Sifre, Deut. 333).

Study of the Torah.

Atoning powers are ascribed also to the study of the Law, which is more effective than sacrifice, especially when combined with good works (R. H. 18*a*; Yeb. 105*a*; Lev. R. xxv.). The table from which the poor received their share atones for man's sins in place of the altar (see ALTAR); the wife being the priestess who makes Atonement for the house (Ber. 55*a*; Tan., Wayishlaḥ, vi.). The meritorious lives of the Patriarchs especially possess a great atoning power (Ex. R. xlix.). The Holy Land itself has atoning qualities for those who inhabit it or are buried in its soil, as is learned from Deut. xxxii. 43, which verse is interpreted "He will make His land an Atonement for His people" (see Sifre, Deut. 333; Gen. R. xcvi.; Ket. 111*a*; Yer. Kil. ix. 32*c*). On the other hand, the descent of the wicked (heathen) into Gehenna for eternal doom is, according to Isa. xliii. (A. V.), an atoning sacrifice for the people of Israel (compare Prov. xxi. 18). "I gave Egypt for thy ransom [kofer], Ethiopia and Seba for thee" (Sifre, Deut. 333; Ex. R. xi.).

Atonement Is Regeneration.

The whole idea underlying Atonement, according to the rabbinical view, is regeneration—restoration of the original state of man in his relation to God, called "teḳanah" (R. H. 17*a*; 'Ar. 15*b*). "As vessels of gold or of glass, when broken, can be restored by undergoing the process of melting, thus does the disciple of the law, after having sinned, find the way of recovering his state of purity by repentance" (R. Akiba in Ḥag. 15*a*). Therefore he who assumes a high public office after the confession of his sins in the past is "made a new creature, free from sin like a child" (Sanh. 14*a*; compare Midr. Sam. xvii., "Saul was as one year old"; I Sam. xiii. 1, A. V. "reigned one year" R. V. "was thirty years old"). In fact, the Rabbis declare that the scholar, the bridegroom, and the NASI, as well as the proselyte, on entering their new station in life, are freed from all their sins, because, having by confession of sins, fasting, and prayer prepared themselves for the new state, they are, as it were, born anew (Yer. Bik. iii. 65*c*, *d*; Midr. Sam. *l. c.*). This is the case also with the change of name or locality when combined with change of heart (Pesiḳ. xxx. 191*a*; R. H. 16*b*). The following classical passage elucidates the rabbinical view as taught by R. Ishmael (of the second century; Yoma 86*a*):

> "There are four different modes of Atonement. If a man fails to fulfil the duty incumbent upon him in case of a sin of omission, for him repentance suffices, as Jeremiah (iii. 22) says, 'Return, ye backsliding children, and I will heal your backsliding.' If he has transgressed a prohibitory law a sin of commission the Day of Atonement atones; of him the Law says, 'On this day He shall atone for your sins to cleanse you' (Lev. xvi. 30). If he be guilty of crimes such as entail the death penalty and the like, repentance and the Day of Atonement can not expiate them unless suffering works as a purifying factor; to this the Psalmist refers when he says, 'I will visit their transgressions with the rod and their iniquities with stripes' (Ps. lxxxix. 33 [A. V. 32]). And if the crime amount to a desecration of the name of God and the doing of great harm to the people at large, nothing but death can be the penalty; as Isaiah (xxii. 14) says, 'Surely this iniquity shall not be atoned for you [A. V. "purged from you"] till ye die, saith the Lord God of Hosts'" (compare Mishnah Shebu. i. 1-6).

Whether the Day of Atonement atoned only for sins committed in error and ignorance or involuntarily (Heb. ix. 7), or also for those committed wilfully with a high hand (Num. xv. 26, 30), whether only after due repentance or without it, is discussed by the Rabbis (Shebu. 13*a*; Yoma 85*b*); and the resulting opinion is that just as the scapegoat atoned for all the sins of the nation, whether committed involuntarily or wilfully (Shebu. i. 6), so also does the Day of Atonement, true repentance having the power of turning all sins into mere errors, such as are forgiven to the whole congregation according to Num. xv. 26. All the greater emphasis is laid on sincere repentance, without which the Day of Atonement is inefficient (Maimonides, "Yad," Teshubah, i. 3).

Annual Redintegration of Man.

All the various elements effecting Atonement are in a marked degree combined in the Day of Atonement, to make it the occasion of the great annual redintegration of man. It is called "Shabbat Shabbaton," the holiest of rest-days as the Shabbath of the Sabbatical month (Lev. xxiii. 32), because it was to prepare the people for the festival of harvest joy, the Succoth feast at the close of the agricultural season (Ex. xxiii. 16, xxxiv. 22; Lev. xxiii. 34, xxv. 9, 10; Ezek. xl. 1). Whereas Ezekiel (xlv. 18-20) intended to have the first and the seventh day of the first month rendered days of Atonement for the year, the Mosaic law ordained that the new moon of the seventh month should be a Sabbath (Lev. xxiii. 24), heralding forth with the trumpet in more solemn sounds than on other new-moon days (Num. x. 10) the holy month; and this was to be followed by the day which was to consecrate both the nation and the sanctuary by imposing atoning rites. These rites were of a twofold character. Atonement for the people was made in a form without any parallel in the entire sacrificial system, Lev. xvi. 7-22, or Deut. xxi. 4, perhaps excepted.

Day of Atonement.

A scapegoat, upon which the high priest laid the sins of the people, was sent forth into the wilderness to Azazel (a demon, according to Ibn Ezra on Lev. xvi. 10, related to the goat-like demons, or satyrs, referred to in Lev. xvii. 7; compare Yoma 67*b*); and its arrival at the rock of Ḥadudo, where it was cast down the precipice, was signalized as the moment of the granting of pardon to the people by the waving of a wisp of snow-white wool in place of one of scarlet, over the Temple gate, crowds of young people waiting on the hills of Jerusalem to celebrate the event by dancing (Yoma vi. 1–8; Ta'anit vi. 8).

Obviously this primitive rite was not of late origin, as is alleged by modern critics, but was a concession rather to ancient Semitic practise, and its great popularity is shown by the men of rank accompanying it, by the cries with which the crowd followed it, and by tales of a miraculous character related in the Mishnah and the Gemara (Yoma 66*a*, 67*a*, 68*b*). On the other hand, the sprinkling by the high priest of the blood of the bullock, the ram, and the second goat, consecrated to the Lord, was in full keeping with the usual Temple ritual, and distinguished itself from the sacrificial worship of other days only by the ministrations of the high priest, who, clad in his fine linen garb, offered the incense and sprinkled blood of each sin-offering upon the Holy of Holies and the veil of the Holy Place for the purification of the whole sanctuary as well as of his own household and the nation. The impressiveness of these functions, minutely described in Mishnah (Yoma ii.–vii.), has been vividly pictured by Ben Sira, whose words in Ecclus. (Sirach) l. were embodied in the synagogue liturgy at the close of the 'Abodah. But while, according to Scripture, the high priest made Atonement (Lev. xvi. 30), tradition transferred the atoning power to God, as was expressed in the high priest's prayer commencing, "Kapper na" (O Lord, atone Thou for the iniquities, the sins, and the transgressions," Yoma iii. 8, iv. 2, vi. 2); interpreting the verse (Lev. xvi. 30): "Through that day He, the Lord, shall atone for you" (Yoma iii. 8; Sifra, Aḥare Mot, viii.).

Great stress was laid on the cloud of incense in which the high priest was enveloped when entering the Holy of Holies; and many mystic or divinatory powers were ascribed to him as he stood there alone in the darkness, as also to the prayer he offered, to the Foundation Stone ("Eben Shetiyah"), on which he placed the censer, and to the smoke of the sacrifice (Yoma, 53*a*, *b et seq.*; Tan., Aḥare 3; Lev. R. xx., xxi.; compare Book of Jubilees xii. 16). The prayer offered by the high priest (according to Yer. Yoma v. 2; Tan., 'Aḥare 4; Lev. R. xx.) was that the year might be blessed with rain, heat, and dew, and might yield plenty, prosperity, independence, and comfort to the inhabitants of the land.

In the course of time the whole Temple ritual was taken symbolically, and more stress was laid on the fasting, the prayers, and the supplications, to which the people devoted the whole day, entreating pardon for their sins, and imploring God's mercy. This at least is the view expressed by Philo ("De Septenario," 23), even if it was not yet shared by the people in general, when the Epistle to the Hebrews (ix.) and that of Barnabas (vii.) were written. It was after the destruction of the Temple, and through the synagogue, that the Day of Atonement assumed its high spiritual character as the great annual regenerator of Jewish life in connection with New-Year's Day.

Day of Sealing God's Decree.

Down to the first century, in Apocalyptical as well as in New Testament writings, the idea of the divine judgment was mainly eschatological in character, as deciding the destiny of the soul after death rather than of men on earth. But under the influence of Babylonian mythology, which spoke of the beginning of the year—"zagmuk"—on the first day of Nisan, as the time when the gods decided the destiny of life (Jensen, "Kosmologie," pp. 84–86, 238), the idea developed also in Jewish circles that on the first of Tishri, the sacred New-Year's Day and the anniversary of Creation, man's doings were judged and his destiny was decided; and that on the tenth of Tishri the decree of heaven was sealed (Tosef., R. H. i. 13; R. H. 11*a*, 16*a*), a view still unknown to Philo ("De Septenario," 22) and disputed by some rabbis (R. H. 16*a*). Thus, the first ten days of Tishri grew to be the Ten Penitential Days of the year, intended to bring about a perfect change of heart, and to make Israel like new-born creatures (Pesiḳ. xxiii., xxiv.; Lev. R. xxix.), the culmination being reached on the Day of Atonement, when religion's greatest gift, God's condoning mercy, was to be offered to man. It was on this day that Moses came down from Mount Sinai with the Tables of the Law received in token of God's pardon of the sin of the golden calf, while the whole congregation fasted and prayed. The Day of Atonement was thenceforth made the annual day of divine forgiveness of sin, when Satan, the accuser, failed to find blame in the people of Israel, who on that day appeared pure from sin like the angels (see Seder 'Olam R. vi.; Tan., Ki Tissa, 4; Pirḳe R. El. xlvi.). According to Pirḳe R. El. xxix., the circumcision of Abraham took place on the Day of Atonement, and the blood which dropped down on the very spot where the altar afterward stood in the temple on Moriah is still before the eyes of God to serve as means of Atonement.

A Day of Confiding Joy.

Far from being the means of "pacifying an angry God," as suggested by Cheyne ("Encyc. Bibl." *s.v.*), or from leaving a feeling of uncertainty and dread of suspense concerning God's pardoning love in the heart, as Weber ("Altsynagogale Theologie," p. 321) maintains, these ten days are the days of special grace when the Shekinah is nigh, and God longs to grant pardon to His people (Pesiḳ. xxiv.). The Day of Atonement is the "one day" prepared from the beginning to unite the world divided between the light of goodness and the darkness of sin (Gen. R. ii., iii.), "a day of great joy to God" (Tanna debe Eliyahu R. i.). "Not depressed and in somber garments as the suppliant appears before the earthly judge and ruler should Israel on New-Year's Day and on the Day of Atonement stand before the Ruler and the Judge on high, but with joy and in white garments betokening a cheerful and confiding spirit" (Yer. R. H. i. 57*b*). Only later generations regarded these white garments, the Sargenes in which also the dead were dressed in order to appear before the Judge of all flesh full of gladsome hope—as shrouds, and considered them as reminders of death (Yer. R. H. *l.c.*; Eccl. R. ix. 7; Gen. R. *l.c.*; Brueck, "Pharisäische Volkssitten," 1368). "The first day of Succoth is called the first day [Lev. xxiii. 35] because on it a new record begins, the sins of the year having been wiped off on Atonement Day" (Tan., Emor., 22). The sins of the preceding year therefore, unless they have been repeated, should not be confessed anew (Tosef., Yoma, v. 15; Yoma 86*b*; Ex. R. lii.).

"He who says, 'I will sin, and the Day of Atonement shall make atonement for me,' for him the Day of Atonement is of no avail. Only such sins as concern man's relation to God will be pardoned. Sins committed by man against his fellow man are pardoned only after his fellow man's pardon has been obtained; for it is said: 'From all your sins before the Lord ye shall be cleansed' (Lev. xvi. 30), thus excluding sins before man" (Yoma viii. 9).

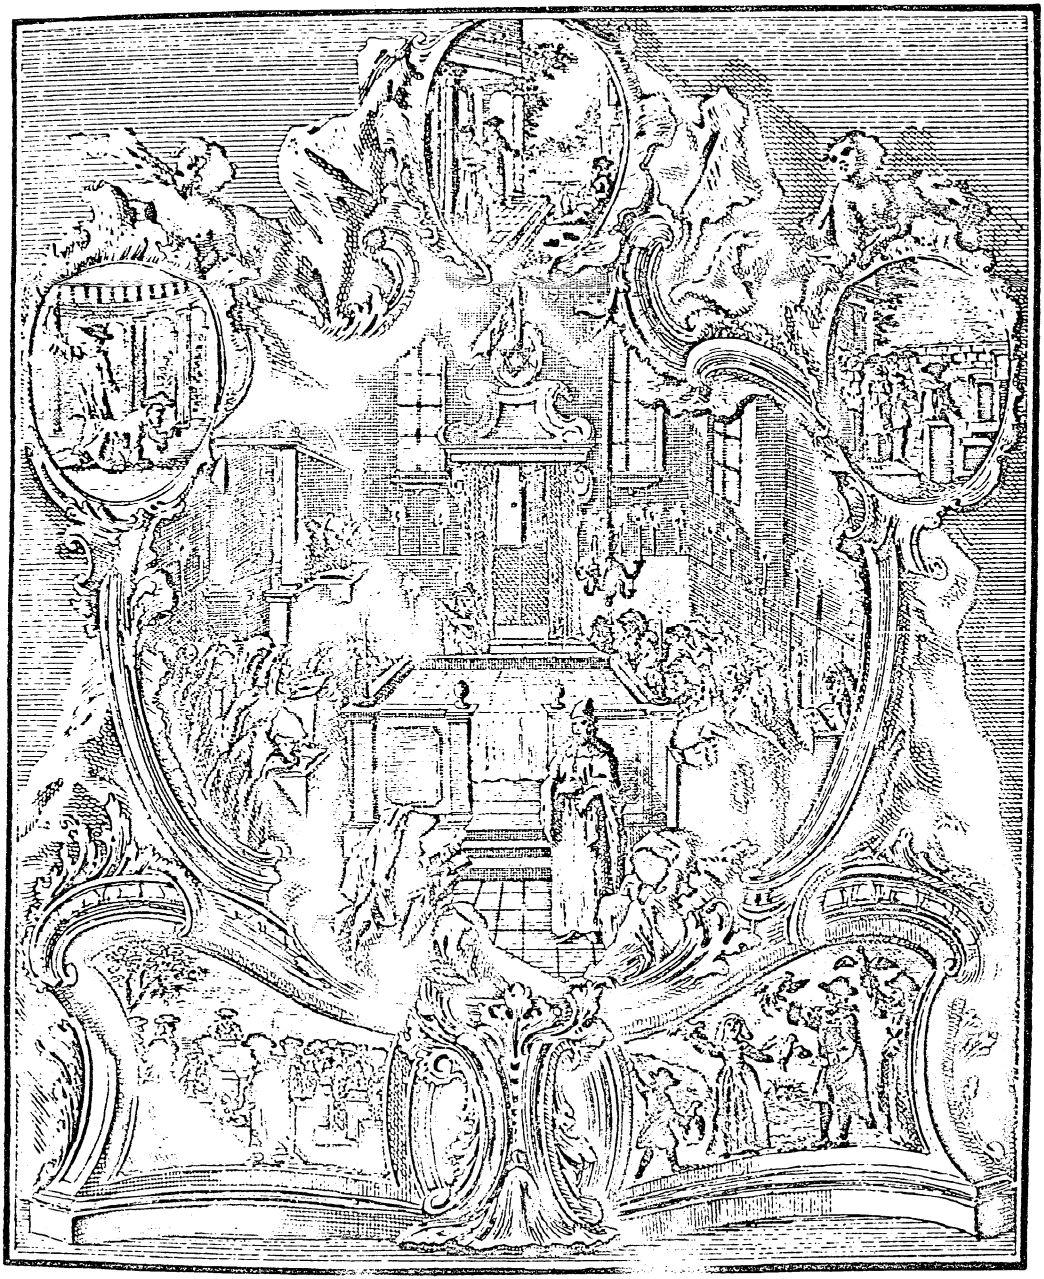
Both Fast-Day and Festal Day.

The Day of Atonement has thus a double character; it is both a fast-day and a festal day. It comprises the elements of the great fast-day of the year, on which are prohibited all those things from which the people abstained on any other public fast-day, such as eating and drinking, bathing and anointing, the wearing of sandals or shoes, etc. (Yoma 76*b* and 77*a*). Any other mode of affliction or penitence, however, is prohibited (Yoma 74*b*; Sifra, Aḥare, vii.). There were likewise embodied in the liturgy of the Day of Atonement all those forms of supplications and portions of the liturgy used on public fast-days (Ta‘anit iv. 1), including the most characteristic portion recited at sunset, NE‘ILAH ("the closing of the gates of the sun"). Of these the confession of sins forms the oldest and most prominent part of each portion of the day's liturgy, the alphabetical order in the catalogue of sins having originated in Ḥasidic circles (Rom. i. 29 *et seq.*; Didache v.; Shab. 54*a*) rather than in the Temple liturgy (Sifra i.; Yoma iii. 8) This is to be followed by the "Seliḥot," the appeals to God's forgiveness as expressed in the thirteen Attributes of God as He appeared to Moses on Sinai, promising "Salaḥti," "I have forgiven" (Num. xiv. 18-20). The reading from the Law of the chapter on the Atonement sacrifice in Lev. xvi., in the morning portion, is followed by the reading from the prophet Isaiah (lvii. 15-lviii. 14) as Hafṭarah, which has been significantly chosen to impress the worshipers with the lesson that the external rite of fasting is valueless without the works of righteousness and beneficence.

Differing in this respect from any other fast-day, and resembling all Sabbath and festival days, the celebration of the Day of Atonement begins in the synagogue on the preceding evening, in conformity with Lev. xxiii. 32 (Yoma 81*b*). It probably did so during the time of the Temple (Yoma 19*b*), but not in the Temple itself (Yoma i. 2). This evening service—called KOL-NIDRE from its opening formula, which canceled rash vows—with its strongly marked melodies and songs, assumed in the course of time a very impressive character. On the Day of Atonement itself, the noon or "musaf" (additional) service—presenting as its chief feature the ‘ABODAH, a graphic description of the whole Atonement service of the Temple—is followed by the afternoon or "Minḥah" service, which begins with the reading from the Law of the chapter on incestuous marriages, with a side-reference, as it were, to Azazel, the seducer to lewdness (Meg. 31*a*; Tos. *ad loc.*; Yoma 67*b*), and as Hafṭarah, the Book of Jonah, containing the great lesson of God's forgiving love extended to Gentiles as well as to Jews. This is followed by the NE‘ILAH service, in which the main ideas of the day are especially emphasized—repentance conditioning forgiveness, and God's sealing the decree of man for the ensuing year. The service ends with a solemn invocation of God's name, the Shema‘, and the sevenfold exclamation, "The Lord, He is God" (compare I Kings xviii. 39), forming the climax of the continuous devotions of the day. As a signal of the close of the sacred day, so that the people may know that they can work or eat (Tos. to Shab. 114*b*), or for other reasons (see Kol Bo, lxx.; Shulḥan ‘Aruk, Oraḥ Ḥayyim, 623, 6; Ṭur Oraḥ Ḥayyim, 624), the trumpet is blown once, or, as in Palestine, four times—"Teḳi‘ah, Shebarim, Teru‘ah, Teḳi‘ah" (see Maḥzor Vitry, pp. 345, 356; Abudrahim, "Seder Tef. Yom Kippurim"). Either in the Kol-Nidre service, as in Jerusalem, before the main prayers (Schwartz, "Das Heilige Land," p. 336), or after the morning service (Maḥzor Vitry, p. 353; Shulḥan ‘Aruk, Oraḥ Ḥayyim, 621, 6), the dead are commemorated, and gifts are offered for their salvation (see Tan., Haazinu, i. ed. Vienna, 1853, p. 28; Pesiḳ. xxvii. 174*b*, and Roḳeaḥ, quoted in Beth Joseph to Ṭur Oraḥ Ḥayyim, *l.c.*)—a custom which in the Reform liturgy has been made a more prominent part of the service. In preparation for the Day of Atonement it is usual to offer gifts of charity, according to Prov. x. 2, "Righteousness [charity] delivereth from death," and to go to the cemetery to visit the graves of the dead, a practise taken over from the fast-days (Ta‘anit 16*a*; Yer. Ta‘anit ii. 65*a*).

The custom of bringing candles to burn in the synagogue the whole day, in memory of the dead, may have originated in the desire to light up the otherwise dark synagogue for the recital of prayers and psalms by the pious during the entire night. This is the one view expressed in Kol Bo lxviii.; but other reasons of a mystic nature are given for it there as well as in Maḥzor Vitry, p. 340; Abudrahim, *l.c.*; and Shulḥan ‘Aruk, Oraḥ Ḥayyim, 610.

Very significant, as showing a deep-rooted desire for some form of atoning sacrifice, is the custom—known already in the time of the Geonim, and found in Asia and Africa (see Benjamin II., "Acht Yahre in Asien und Africa," 1858, p. 273), as well as in Europe (Asheri Yoma viii. 23; Maḥzor Vitry, p. 339; Kol Bo lxviii.; Shulḥan ‘Aruk, Oraḥ Ḥayyim, 605), though disapproved by Naḥmanides, Solomon ben Adret, and Joseph Caro (Ṭur Oraḥ Ḥayyim, *l.c.*)—of swinging over one's head, on or before the eve of Atonement Day, a fowl, usually a rooster or hen; solemnly pronouncing the same to be a vicarious sacrifice to be killed in place of the Jew or Jewess who might be guilty of death by his or her sin. Fishes and plants, also (see Rashi, Shab. 81*b*), perhaps originally only these, were used in the gaonic time. The slaughtered animal or its equivalent was then given to the poor (see KAPPAROT). Another custom of similar character is the receiving on the eve of Atonement Day, either in the synagogue or at home—the latter is usually the place in Jerusalem (see Schwartz, *l.c.*)—of thirty-nine stripes at the hand of a neighbor



Day of Atonement in the Synagogue (Center). Rites on Preceding Day (Surrounding).

as penalty for one's sins, according to Deut. xxv. 3, while reciting the Confession of Sins. (See Maḥzor Vitry, p. 344; Kol Bo, lxviii.; Shulḥan 'Aruk, Oraḥ Ḥayyim, 607.) According to Benjamin II., *l.c.*, people in Persia strip themselves to the loins in order to receive these stripes on the naked body (see Malkut Schlagen). This is followed by bathing, so that man may appear pure in both body and soul before God on "the great day."

The Karaite Day of Atonement with its liturgy is to a great extent similar to that of the Rabbinite Jews. It also begins half an hour before sunset of the preceding day, and lasts until half an hour after sunset of the day itself (see Karaites).

The Samaritans, also, adopted the custom of preparing for the day by a purificative bath and of spending the night and the day in the synagogue with prayer and fasting, singing hymns, and reading from the Law (see SAMARITANS).

K.

ATONEMENT, DAY OF (יום הכפרים, Yom ha-Kippurim).—**In Bible, Talmud, and Liturgy:**

Biblical Data.

The term יום כפור, "Yom Kippur," is late rabbinic. The Biblical laws relating to it are found in Lev. xvi. (ceremonies); *ib.* xxiii. 26-32 (list of holidays); *ib.* xxv. 9 (ushering in the jubilee); Num. xxix. 7-11 (sacrifices).

Ceremonies According to Bible and Mishnah.

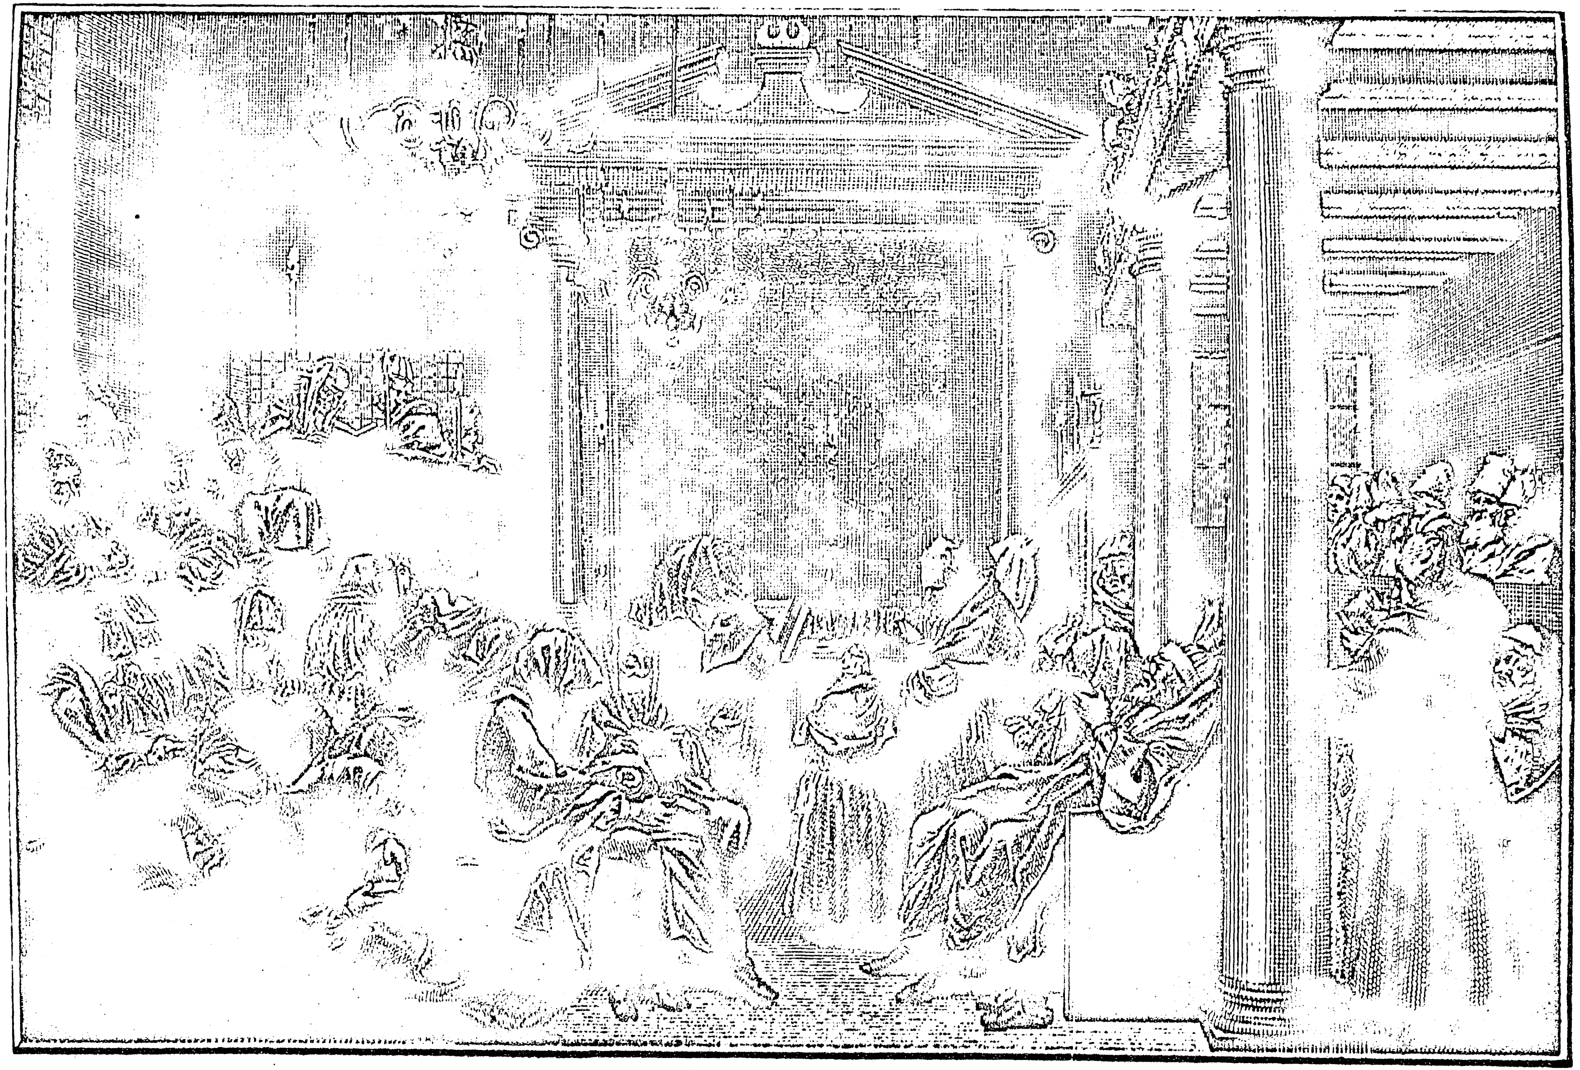
The Day of Atonement, according to Biblical tradition, is one in the cycle of holidays instituted by Moses. It occurs on the tenth day of the seventh month, and is distinguished by abstaining thereon from food ("afflicting one's soul"; compare Isa. lviii. 3, 5) and by an elaborate ceremonial. The details of the ritual, in accordance with rabbinical interpretation (Sifra and Rashi on Lev. xvi.; Mishnah and Gemara Yoma; "Yad" Hil. 'Abodat Yom ha-Kippurim; Asheri), proceed about as follows: In the early morning the high priest, in his robes of office (described Ex. xxviii., xxxix.), offered the daily morning sacrifice (Num. xxix. 11; Ex. xxix. 38 *et seq.*) and performed the ordinary morning rite of dressing the lamps, which was accompanied by an offering of incense (Ex. xxx. 7). Next in order was the festival sacrifice of a bullock and seven lambs (Num. xxix. 7 *et seq.*). Then began the peculiar ceremonies of atonement, for which the high priest put on special vestments of linen (Lev. xvi. 4). With his hands placed on the head of a bullock (contributed from his own means), he made confession of his own sins and of those of his nearer household (verse 6, see Rashi). The two goats contributed by the people (verse 5) were placed before him, being designated by lot, the one for a sin-offering "for the Lord," and the other to be sent away into the wilderness "for Azazel" (verses 7-10). Once more the high priest made confession over his own bullock, for himself and his wider household—his brother priests (verse 11*a*). After killing the animal (verse 11*b*) and receiving its blood into a vessel, he took a censer full of live coals from the altar of burnt offering (Ex. xxvii. 1-8) and two handfuls of fine incense into the sacred recess behind the curtain, the Holy of Holies; there he placed the incense on the coals, the cloud of incense enveloping the so-called "mercy-seat" (verse 12 *et seq.*), and offered a short prayer (Yoma v. 1). He returned for the vessel containing the blood of the bullock and reentered, sprinkling some of it with his finger eight times between the staves of the Ark (verse 14; Ex. xxv. 13-15). He then left the sacred compartment to kill the people's goat (marked "for the Lord"); with its blood he reentered the Holy of Holies, there to perform the same number of sprinklings in the same place (verse 15).

Process of Purification.

By these rites the most holy place was rendered free from all impurities attaching to it through the intentional or unintentional entrance of unclean persons into the sanctuary (verse 16, see Rashi; Num. xix. 13, see Rashi). By sprinkling the bullock's blood and similarly that of the goat eight times against the curtain, the entrance to the Holy of Holies was purified (verse 16*b*, see Rashi). No one was permitted to remain in the sanctuary while the high priest officiated in the Holy of Holies (verse 17). The high priest then mixed the blood of the bullock and goat, and put some of it on the four corners of the altar of incense (Ex. xxx. 1-10); he furthermore sprinkled some of it with his finger seven times on the surface of the altar, cleaned of its coal and ashes (verse 18 *et seq.*), while the remainder was poured out at the base of the altar outside (Lev. iv. 7). The live goat was now brought forward. The high priest laid his hand upon his head and confessed "all the iniquities of the Israelites, and all their transgressions, even all their sins," which were thus placed upon the goat's head. Laden with the people's sins, the animal was sent away into the wilderness (verses 20-22). The high priest then took those portions that belonged on the altar out of the bodies of the bullock and the goat, and placed them temporarily in a vessel; the carcasses of the animals were sent away "to the place where the ashes are thrown out" (Lev. iv. 12) and burned there (verse 27; Yoma vi. 7). Clothed in his ordinary robes, the high priest offered another goat for a sin-offering (Num. xxix. 11), and two rams for a burnt offering, one of which was contributed by himself (verse 24). The altar portions of the bullock and goat were now burned on the altar (verse 25; Yoma *l.c.*; see Bertinoro), and the daily evening sacrifice was offered (Num. xxix. 11; Ex. xxix. 41). Once more the linen garments were put on, for the high priest again repaired to the Holy of Holies in order to remove thence the censer; the sacred vestments were then deposited in the sanctuary. In his ordinary robes, the high priest closed the service with the evening rite of lighting the lamps, which was accompanied by an offering of incense (Ex. xxx. 8; Yoma vii. 4).

Talmudical Amplifications.

In the Mishnah the ceremonial is further enriched by elements having no Scriptural basis. Thus, before removing his linen garments for the first time, the high priest read to the people portions from the Pentateuch relating to the Day of Atonement (Yoma vii. 1). The Mishnah reproduces the exact wording of the three confessions (iii. 8, iv. 2, vi. 2); it states also that as often as the high priest uttered the divine name (TETRAGRAMMATON), the assembled multitudes outside, while prostrating themselves, responded: "Blessed be the name of the glory of His kingdom for ever and ever" (vi. 2). Much is also said about the preparations which the high priest was to undergo during the week preceding the fast-day, and the night previous to the great day in particular; especially how he was to guard against pollution (i. 1-7). So great, according to the Mishnah (vii. 4), was the dread that some mishap might befall the high priest while officiating in the Holy of Holies, that at the conclusion of the service



he was escorted home and congratulated by his friends, whom in turn the priest was wont to entertain in the evening at a feast. Mirth was indulged in by the people in general; the young men and maidens enjoyed themselves by dancing in the vineyards (Ta'anit iv. 8).

Place in Post-Exilic Judaism.

The Day of Atonement is the keystone of the sacrificial system of post-exilic Judaism. In the belief that the great national misfortunes of the past were due to the people's sins, the Jews of post-exilic times strove to bring on the Messianic period of redemption by strictly and minutely guarding against all manner of sin. The land being defiled by the sin of the people, the pollution must be removed lest the Divine Presence withdraw from among them. Hence the sacrificial system with its sin- and guilt-offerings. While provision was made for the expiation of the wrong-doings of individuals by private offerings, the public sacrifices atoned for the sins of the community. Especially dangerous seemed the errors unwittingly committed (Ps. xix. 13). On the Day of Atonement such sins as may not have been covered by the various private and public expiatory sacrifices were to be disposed of by a general ceremony of expiation. In this elaborate ceremonial, as described, the ordinary rites of the sin-offering are to be discerned in an intensified form. In every sacrifice there is the idea of substitution; the victim takes the place of the human sinner. The laying of hands upon the victim's head is an ordinary rite by which the substitution and the transfer of sins are effected; on the Day of Atonement the animal laden with the people's sins was sent abroad (compare the similar rite on the recovery of a leper, Lev. xiv. 7; see AZAZEL). The sprinkling of the blood is essential to all sin-offerings. By dipping his finger in the victim's blood and applying it to a sacred object like the altar, the priest reestablishes the union between the people that he represents and the Deity.

Place in Rabbinic Judaism.

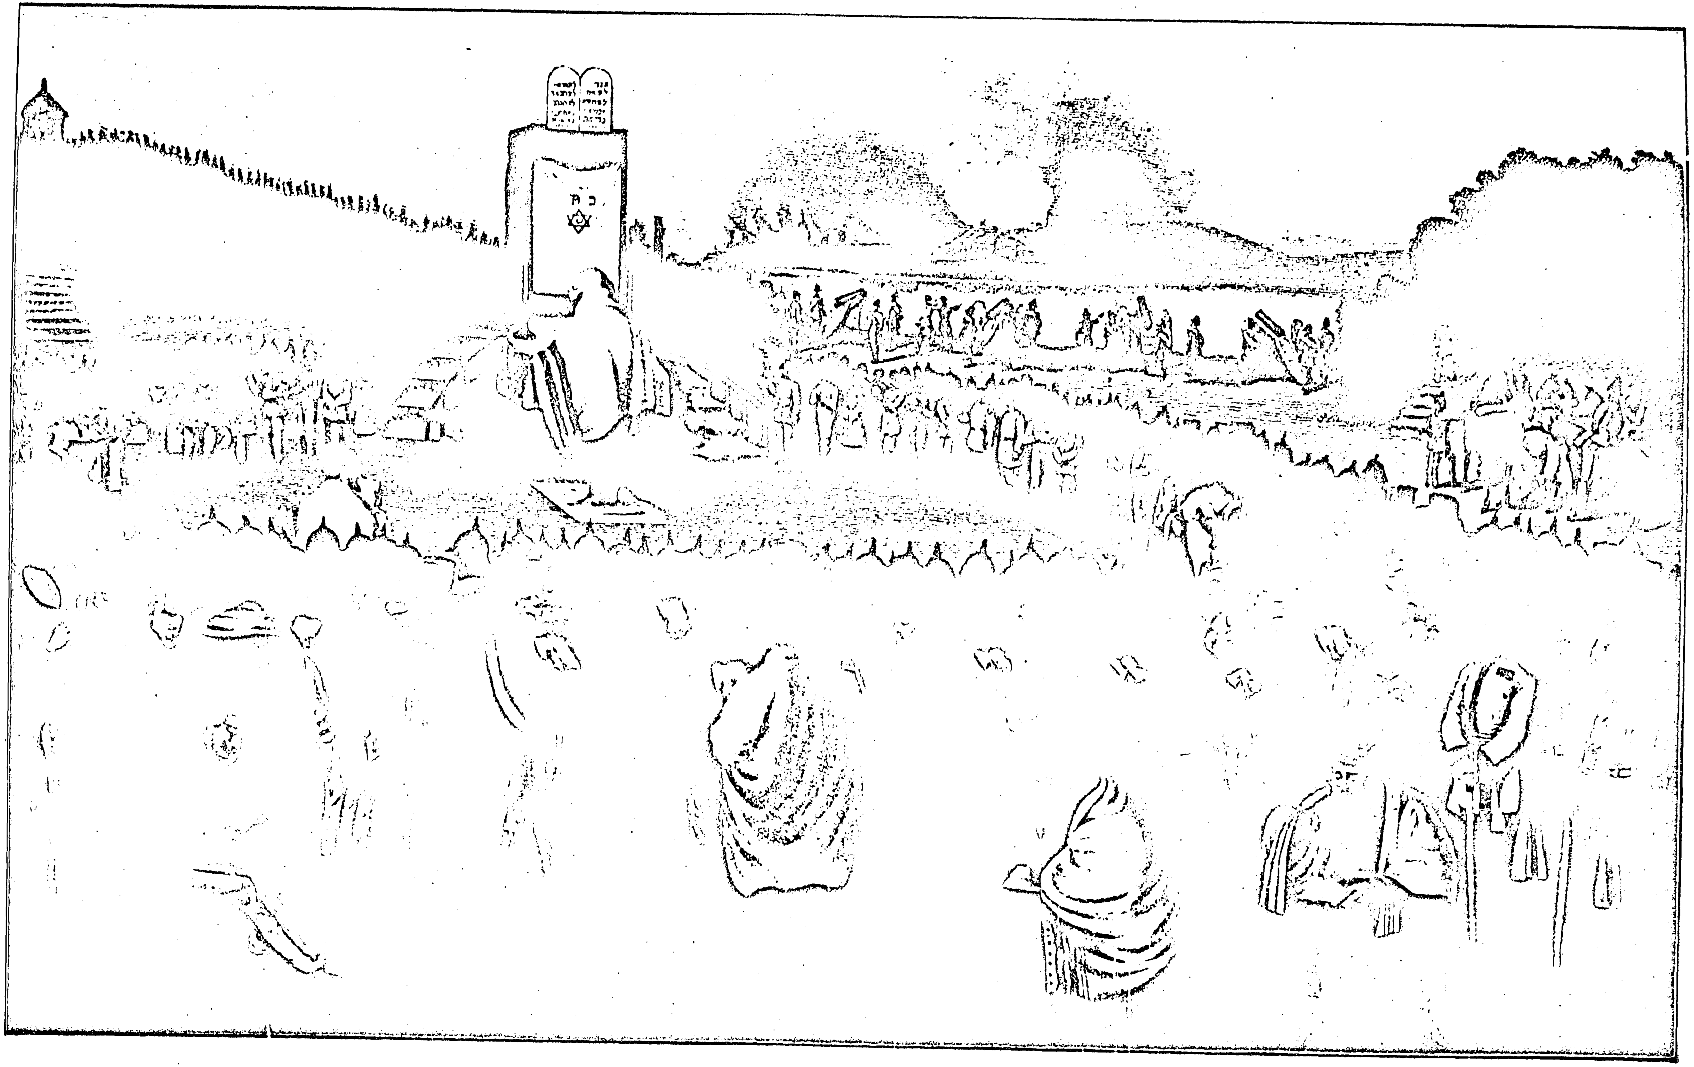
In rabbinic Judaism the Day of Atonement completes the penitential period of ten days (עשרת ימי תשובה) that begins with New-Year's Day, the season of repentance and prayer; for though prayerful humiliation be acceptable at all times, it is peculiarly potent at that time (R. H. 18*a*; Maimonides, "Yad," Teshubah, ii. 6). It is customary to rise early (commencing a few days before New-Year); the morning service is preceded by litanies and petitions of forgiveness (סליחות, "selihot") which, on the Day of Atonement, are woven into the liturgy (Shulhan 'Aruk, Orah Hayyim, 581; Zunz, "S. P." 76 *et seq.*). New-Year's and Atonement days are days of serious meditation (ימים נוראים, "awful days," Zunz, "S. P." 82, note). The former is the annual day of judgment (יום הדין), when all creatures pass in review before the searching eye of Omniscience (R. H. i. 2). According to the Targum, the day of the heavenly session in Job i. 6 *et seq.* was no other than the first of the year (ריש שתא, resh shatta; see also Zohar Ex. 32*b*, ed. Wilna, 1882). Accordingly, the Divine Judge receives on that day the report of Satan, arch-fiend and accuser in heaven; the other angels, it is presumed, are friendly to the accused, and plead their cause before the august tribunal. The sounds of the "shofar" are intended to confuse Satan (R. H. 16*b*). There is, indeed, in heaven a book wherein the deeds of every human being are minutely entered (Abot ii. 1, iii. 16; a book of record, "book of remembrance," is alluded to, Mal. iii. 16). Three books are opened on the first day of the year, says the Talmud (R. H. 16*b*): one for the thoroughly wicked, another for the thoroughly pious, and the third for the large intermediate class. The fate of the thoroughly wicked and the thoroughly pious is determined on the spot; the destiny of the intermediate class is suspended until the Day of Atonement, when the fate of every man is sealed (R. H. 16*a*). In the liturgical piece "Unetanneh Tokef," ascribed to R. AMNON OF MAYENCE (Zunz, "Literaturgesch." p. 107), a still weirder scene is unfolded:

> "God, seated on His throne to judge the world, at the same time Judge, Pleader, Expert, and Witness, openeth the Book of Records; it is read, every man's signature being found therein. The great trumpet is sounded; a still, small voice is heard; the angels shudder, saying, this is the day of judgment: for His very ministers are not pure before God. As a shepherd mustereth his flock, causing them to pass under his rod, so doth God cause every living soul to pass before Him to fix the limit of every creature's life and to foreordain its destiny. On New-Year's Day the decree is written; on the Day of Atonement it is sealed who shall live and who are to die, etc. But penitence, prayer, and charity may avert the evil decree."

All depends on whether a man's merits outweigh the demerits put to his account (Maimonides, "Yad," Teshubah, iii. 3). It is therefore desirable to multiply good deeds before the final account on the Day of Atonement (*ib.* iii. 4). Those that are found worthy are entered in the Book of Life (Ex. xxxii. 32; Isa. iv. 3; Ps. lxix. 29 [A. V. 28]; Dan. xii. 1; see Charles, "Book of Enoch," pp. 131–133). Hence the prayer: "Enter us in the Book of Life" (כתבנו, "inscribe us"; but חתמנו, "seal us," that is, "seal our fate"—in the closing prayer on the Day of Atonement). Hence also the formula of salutation on New-Year's Eve: "May you be inscribed [in the Book of Life] for a happy year." In letters written between New-Year and the Day of Atonement, the writer usually concludes by wishing the recipient that God may seal his fate for happiness (גמר חתימה טובה). Thus, in late Judaism, features that were originally peculiar to New-Year's Day were transferred to the Day of Atonement. The belief that on the first day of the year the destiny of all human beings was fixed was also that of the Assyrians. Marduk is said to come at the beginning of the year ("rish shatti") and decide the fate of one's life (Schrader, "K. B." iii., second div., 14 *et seq.*).

Rabbinic Aspects of Atonement.

The Day of Atonement survived the cessation of the sacrificial cult (in the year 70). "Though no sacrifices be offered, the day in itself effects atonement" (Sifra, Emor, xiv.). Yet both Sifra and the Mishnah teach that the day avails nothing unless repentance be coupled with it (Yoma viii. 8). Repentance was the indispensable condition for all the various means of atonement. Repentance must unquestionably accompany a guilt- or sin-offering (Lev. v. 5; Maimonides, "Yad," Teshubah, i. 1). Penitent confession was a requisite



כ ת

for expiation through capital or corporal punishment (Sanh. vi. 2; Maimonides, *ib.*). "The Day of Atonement absolves from sins against God, but not from sins against a fellow man unless the pardon of the offended person be secured" (Yoma viii. 9). Hence the custom of terminating on the eve of the fast-day all feuds and disputes (Yoma 87*a*; Maimonides, *ib.* ii. 9 *et seq.*). Even the souls of the dead are included in the community of those pardoned on the Day of Atonement. It is customary for children to have public mention made in the synagogue of their departed parents, and to make charitable gifts on behalf of their souls (Shulḥan 'Aruk, Oraḥ Ḥayyim, 621, 6). But no amount of charity will avail the soul of a wicked man (Ṭure Zahab to Shulḥan 'Aruk, Yoreh De'ah, 249, note 5).

Jews Confessing Their Sins in the Prayer "Ashamnu" in a New York (East Side) Synagogue.
(From a photograph by Mandelkern.)

The Liturgy.

The service in the synagogue opens in the evening with the Kol-Nidre. The devotions during the day are continuous from morning until evening. Much prominence is given to the liturgical pieces in which the Temple ceremonial is recounted ('Abodah service; Zunz, "Literaturgesch." pp. 27 *et seq.*, 64 *et seq.*). Ibn Gabirol's כתר מלכות ("Crown of Royalty") skilfully deals with the problem of sin: it is appended to the Sephardic liturgy for the evening service, and is also read by the more devout in the Ashkenazic synagogues. In the center of the older liturgy is the confession of sins. "For we are not so bold of face and stiff-necked as to say to Thee, We are righteous and have not sinned; but, of a truth, we are sinners. . . . May it be Thy will that I sin no more; be pleased to purge away my past sins, according to Thy great mercy, only not through severe chastisements." The traditional melodies with their plaintive tones endeavor to give expression alike to the individual's awe before the uncertainties of fate and to a people's moan for its departed glories. On the Day of Atonement the pious Jew becomes forgetful of the flesh and its wants, and, banishing hatred, ill-feeling, and all ignoble thoughts, seeks to be occupied exclusively with things spiritual. However rigorously the rabbinical law may insist on the outward manifestation of contrition, the corrective is provided for in the lessons from the Prophets (Isa. lviii.; Jonah; see Ta'anit ii. 1), which teach that the true fast-day in which God delights is a spirit of devotion, kindliness, and penitence. The serious character impressed upon the day from the time of its institution has been preserved to the present day. No matter how much else has fallen into desuetude, so strong is its hold upon the Jewish conscience that no Jew, unless he have cut himself entirely loose from the synagogue, will fail to observe the Day of Atonement by resting from his daily pursuits and attending service in the synagogue. With a few exceptions, the service even of the Reformed synagogue is continuous through the day.

Analysis of Sources.

——**Critical View:** The Pentateuchal references to the Day of Atonement cited in the preceding belong to the Priestly Code, but by no means to one and the same stratum. Lev. xvi., which is entirely devoted to the subject of the fast-day, is apparently composite in origin, as is shown by the incongruity at the beginning: "Aaron shall not enter the Holy of Holies at all times" (verse 2); he may, however, it may be inferred, go in at stated intervals. But the immediate sequel (verses 3 *et seq.*) rather says: With such and such ceremonies Aaron may go in; only toward the end (verses 29-34) reference is made to the annual celebration of a Day of Atonement. The rabbinical interpretation is obviously harmonistic (see Rashi on verses 2 *et seq.*); yet there are dissenting voices (see Lev. R., § 21; Ex. R., § 38) which maintain that, while entering the Holy of Holies is obligatory on the Day of Atonement, the high priest may go in at all times provided he carry out the ceremonies prescribed. Observe also the repetitions in verses 6 and 11*a*; hence the duplicated confession in the Mishnah,

Analysis of Lev. xvi.

verses 29*a* and 34*a*. According to the analysis of Benzinger (in Stade's "Zeitschrift," 1889, pp. 65–89), the chapter is made up of three distinct strata: (1) verses 1–4, 6, 12, 13, 34*b* (omitting several glosses), dealing with the manner (no matter what the occasion) of Aaron's entering the Holy of Holies; (2) verses 29*b*–34*a*, a law very much like that of Lev. xxiii. 26 *et seq.*, prescribing the annual observance of a day of fasting and rest, on which the sanctuary and the people are to be purified, presumably by such simple rites of atonement as those carried out on the occasion of the dedication of the tabernacle (Lev. ix.; the Day of Atonement is thus an annual occasion of rededication); (3) verses 5, 7–10, 14–28, of later date than (2), ordaining a more elaborate ceremonial. With (3) goes Ex. xxx. 10. Lev. xxv. 9*b* is probably a gloss (the surrounding text mainly belongs to II). No mention is made of the Day of Atonement in the older codes, J, E, and D (Ex. xxiii. 14–17; xxiv. 18, 22 *et seq.*; Deut. xvi. 1–17).

History of the Institution.

The beginnings of the institution may in the critical view be sought for in Ezekiel. In addition to the festivals of Passover and Tabernacles, the prophet ordains two days in the year on which the sanctuary may be cleansed, by the sprinkling of a bullock's blood, from all impurities occasioned through inadvertence: the first day of the first month, and the first day of the seventh (so read with LXX; Ezek. xlv. 18–20); that is, with the beginning of both the civil (in the spring) and the ecclesiastical year (in autumn). It appears (from Lev. xxv. 9; Ezek. xl. 1) that the new-year was then made to begin with the tenth day of the month. In the Pentateuchal legislation the second alone of Ezekiel's Days of Atonement is kept; it is at the same time transferred to the tenth day of the month, while the first day is made into New-Year's Day, the two days changing places. From the simple rites prescribed by the prophet of the Exile to the elaborate ceremonial of the latest strata in P, there is, however, a lengthy process. Stated days of fasting, mentioned for the first time by Zechariah (vii. 1–5), clearly refer to the anniversaries of national calamities (the murder of Gedaliah took place in the seventh month; Jer. xli. 1). No other regular day of fasting was known to the prophet; otherwise he would have mentioned it when he reiterated the indifference of the old prophets to outward ceremonial. Even when Ezra comes to Palestine in the year 444, a day of fasting is observed, not on the tenth but on the twenty-fourth of the seventh month, and by no means according to the ceremonial of Lev. xvi. (Neh. ix. 1). The law of Ezra may have contained the simpler prescription of Lev. xxiii. 26 *et seq.*, and the corresponding stratum in chapter xvi.; the day was certainly not considered then of the importance that it assumed in the times subsequent to Ezra. See also LITURGY, SIN.

J. JR. M. L. M.

ATTAH HORE'TA (אתה הראת) (Deut. iv. 35): The first of a series of versicles, seventeen in number, chanted on the Rejoicing of the Law in the Northern ritual, before the scrolls are taken from the Ark for the "hakkafot" or processional circuits. The chant resembles a Gregorian psalm-tone in structure, and falls in the first ecclesiastical mode (D to D on the natural notes). But the intonation, meditation, and ending of the Hebrew chant diverge from the rules of the plain-song, and show that it is simply another utilization of that antique and peculiarly Oriental cadence around the fifth degree of the minor scale which is closely associated with the Feast of Tabernacles; and it appears also in the melody sung by the cantor while waving the palm-branch (LULAB) during the HALLEL on the first days (see MUSIC, SYNAGOGAL), and in the melody for the Rain-Prayer (GESHEM) introducing the MUSAF of the eighth day (SHEMINI 'AẒERET). By some Polish cantors this characteristic cadence is further freely employed in the services of the Days of Penitence.

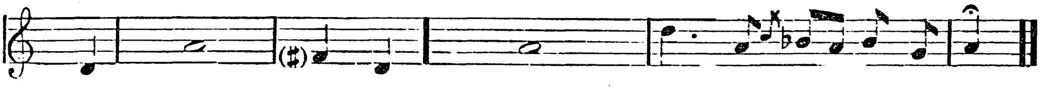
ATTAH HORE'TA



At - tah hore'ta la - da - 'at Ki Adonai hu ha-elo-him, en 'od mil-l'ba - do.

ATTAI: 1. Son of the Egyptian Jarha, to whom Sheshan the Jerahmeelite gave his daughter to wife (I Chron. ii. 35, 36).

2. A Gadite chieftain who joined the forces of David at Ziklag (I Chron. xii. 11).

3. A son of Rehoboam, and Maachah, the daughter of Absalom (II Chron. xi. 20).

J. JR. G. B. L.

ATTAR, IBN: A family name among the Sephardic Jews. In Arabic the word "attar" means "apothecary" or "spice-dealer"; but it is found Hebraized, and applied in its original sense as an epithet, as early as 1150 (Harkavy, "Meassef Niddaḥim," p. 83; compare also Zunz, "Z. G." p. 521; עטר מליאונש occurs in Neubauer, "Cat. Bodl. Hebr. MSS." No. 2142, 32, "Raba Attare"). From the fourteenth century (see No. 11, below) the prefix "ibn" is employed with "Attar," although "Attar" alone coexists as the name of a possibly different family The Attars were especially numerous in northern Africa; and among the Sephardim in Amsterdam, Italy, and Palestine to-day the name is represented by such forms as "Abenatar," "Abeatar," and "Benattar." In Hebrew the name usually takes the form אבן עטר, also אביאטאר (Halberstamm, "Cat. Hebr. Handschriften," p. 80, line 2), which latter is not a clerical error, as Steinschneider thinks, but a form of the name borne by many individuals, as is evident from the spelling "Abeatar" in De Castro's epitaphs (see his "Keur van Grafsteenen," pp. 25, 26). The Amsterdam branch of the family has frequently intermarried with that of Melo, although the exact relationship of these families is by no means clear. The connection of the various individual bearers of this name is also at times obscure, although the majority of them probably belong to the same family. The following list enumerates twenty-two Attars distinguished in literature from the fourteenth to the eighteenth century:

1. Abraham Abenatar Melo: Student at the rabbinical academy Keter Shem-Ṭob, in Amsterdam, toward the end of the seventeenth century; probably a nephew or a son of Emanuel Abenatar (Kayserling, "Sephardim," p. 175).

2. Abraham b. Jacob ibn Attar: Cabalist and Talmudist; flourished in Morocco in the beginning of the seventeenth century. He was the grandfather of Judah b. Jacob ibn Attar I. (Nacht, "Meḳor Ḥayyim," p. 34).

3. Amram Meshullam b. Jacob Attar: Algerian payyeṭan. Luzzato ("Oẓar Ṭob," 1880, p. 64) calls him "Amar," for which Steinschneider reads "Attar," in "Jew. Quart. Rev." xi. 342.

4. David Abenatar: Lived in Amsterdam at the beginning of the seventeenth century (De Castro, *l.c.* p. 24). (A David Benattar was rabbi in Tunis about the middle of the nineteenth century.—Cazes, "Notes Bibliographiques," p. 195.)

5. David Abenatar Melo. See MELO, DAVID ABENATAR.

6. Emanuel Abenatar Melo. See MELO, EMANUEL ABENATAR.

7. Ḥayyim ibn Attar: Moroccan rabbi, famous for his learning, philanthropy, and piety. He flourished in Salé toward the end of the seventeenth century, but left that town, on the occasion of a rising against the Jews, and settled in Miguenez, where a college was established for him by the learned and wealthy Moses b. Isaac de Avila, from which institution many learned rabbis were graduated. One of his grandsons was Ḥayyim b. Moses ibn Attar (No. 8); compare Nacht, "Meḳor Ḥayyim," pp. 2, 3. (A payyeṭan, Ḥayyim Abeatar, is mentioned in Halberstamm, *l.c.* p. 88, line 2.)

G. L. G.

8. Ḥayyim ben Moses ibn Attar: Talmudist and cabalist; born at Salé, Morocco, in 1696; died at Jerusalem July 6, 1743. He was one of the most prominent rabbis in Morocco. Ten years before his death he left his native city for Europe, to publish his voluminous manuscripts and, in accordance with rabbinical usages, to submit them for approbation ("haskamah") to the leading authorities. He was everywhere received with great honor, due to his wide learning, keen intellect, and unusual piety. In the middle of 1742 he arrived at Jerusalem, where he presided at the bet ha-midrash Keneset Yisrael. One of his disciples there was Ḥayyim Joseph David AZULAI, who seems to have been completely overwhelmed by the excellencies of his master. In a truly Oriental strain he wrote of him: "Attar's heart pulsated with Talmud; he uprooted mountains like a resistless torrent; his holiness was that of an angel of the Lord, . . . having severed all connection with the affairs of this world."

He published: (1) "Ḥefeẓ Adonai" (God's Desire), Amsterdam, 1732—dissertations on the four Talmudic treatises Berakot, Shabbat, Horayot, and Ḥullin. (2) "Or ha-Ḥayyim" (The Light of Life), Venice, 1742—a commentary on the Pentateuch after the four methods known collectively as PARDES; it was reprinted several times. His renown is based chiefly on this work, which became popular also with the Ḥasidim. (3) "Peri Toar" (Beautiful Fruit), novellæ on the Shulḥan 'Aruk, Yoreh De'ah, dealing especially with Hiskiah de Silva's commentary "Peri Ḥadash," Amsterdam, 1742; Vienna and Lemberg, 1810. (4) "Rishon le-Zion," Constantinople, 1750—consisting of novellæ to several Talmudic treatises, on certain portions of the Shulḥan 'Aruk, on the terminology of Maimonides, on the five Megillot, on the Prophets and on Proverbs. (5) Under the same title were published at Polna, 1804, his notes on Joshua, Judges, Samuel, Isaiah, etc. See KUTTOWER, ABRAHAM GERSHON.

L. G. M. B.

9. Isaac Attar: Talmudist of the eighteenth century, mentioned by Abraham Ankava in his "Kerem Ḥemed," Nos. 155, 167.

10. Jacob Abenatar: Member of the governing body of the Spanish-Portuguese congregation in Amsterdam in the year 1749 (De Castro, *l.c.* p. 39).

11. Jacob b. Abraham ibn Attar: Earliest known member of this family. He wrote a supercommentary upon Rashi to the Pentateuch, completing it in 1436. The manuscript is preserved in the Leuwarden Library, Holland (see Neubauer, in Roest's "Letterbode," ii. 83).

12. Jacob ibn Attar: Died March 24, 1583. Saadia Longo composed a poetical epitaph on Jacob which was published by Edelman in his "Dibre Hefez," p. 14, and which described Jacob as a great scholar and influential man. He is perhaps identical with Jacob, the father of Abraham b. Jacob ibn Attar (Nacht, *l.c.* p. 34).

13. Joseph ibn Attar: Leader in the Jewish community of Lisbon shortly before the expulsion of the Jews from Portugal (Samuel b. Moses de Medina, Responsa, No. 371). L. G.

14. Judah ben Jacob I. ibn Attar: Rabbi and author; lived at Fez in Morocco toward the end of the seventeenth and the beginning of the eighteenth century. His name is found attesting a pamphlet in the year 1700. He was chief rabbi of Fez and enjoyed the reputation of a profound Talmudist and saintly man. Popularly he was supposed to have wielded miraculous powers; his biographer, Azulai, narrates that, being thrown once into a cage of lions, he remained there for twenty-four hours and then left it unharmed. He wrote in 1715 a work entitled "Minḥat Yehudah" (Judah's Offering), containing Midrashic explanations to various passages in the Pentateuch, portions only of which have been published by Judah Koriyyat in his "Ma'or we-Shemesh," 1838.

M. K.—G.

15. Judah b. Jacob II: Equally renowned as a Talmudist and secular scholar; flourished, probably at the end of the fourteenth century, in Spain. The Greek Joseph Kilti (or Kelti) dedicated to him a philosophical work, "Minḥat Yehudah" (Zotenberg, "Cat. des Manuscrits Hebr. de la Bibliothèque Imperiale," No. 707, 2). Carmoly (in Jost's "Annalen," 1839, p. 163) designates him as a Spanish exile, but without reason, for Kilti, in his dedication, speaks of him simply as "the Sephardi" (compare "Literaturblatt des Orients," x. 708).

16. Mordecai b. Reuben ibn Attar: Arranged with the printer Proops of Amsterdam to print the "Azharot" of Solomon ibn Gabirol and of Isaac b. Reuben; they were accordingly published in 1721 (Steinschneider, "Jüdische Typographie," p. 72). He is probably distinct from the Mordecai ibn Attar mentioned in the Responsa, "Mishpaṭim Yesharim," of Raphael Birdugu, p. 102.

17. Moses b. Ḥayyim: Talmudist of Miguenez, about 1700. Son of Ḥayyim (No. 7) and father of the celebrated Talmudist and cabalist Ḥayyim (No. 8). His daughter married Samuel b. Moses de Avila.

18. Moses b. Shem-Ṭob ibn Attar: Talmudist and philanthropist; died in Fez 1725. Moses, a man of great wealth and learning, distinguished himself by his philanthropy in founding schools for poor children, which he maintained. He was the father-in-law of Ḥayyim b. Moses ibn Attar and the son of Shem-Ṭob, who was the brother of Ḥayyim.

19. Obed b. Judah ibn Attar: Flourished in the seventeenth century; son of Judah (No. 14). He wrote a preface to his father's work, "Shir Miktam," and narrates many details of the latter's life.

20. Samuel ibn Attar: Published in 1605 the well-known little book, "Ḥibbur Ma'asiyot" (Collection of Stories). He is erroneously considered the author of the work "Zarzir Matnayyim" (Steinschneider, "Cat. Bodl." col. 2408).

21. Shem-Ṭob ibn Attar: Talmudist, mentioned by Ankava, *l.c.* No. 235. Perhaps identical with Shem-Ṭob ibn Attar, the brother of Ḥayyim ibn Attar, equally renowned as Talmudist and philanthropist. When he died (1700) the community of Fez sent a letter of condolence to his brother Ḥayyim, which is still existing in the Berlin Library (Nacht, *l.c.* p. 8).

22. Solomon ibn Attar: Distinguished and learned Tunisian; lived at the end of the eighteenth century. He is mentioned in Jacob Fetussi's work, "Berit Ya'aḳob," Leghorn, 1800 (Cazes, *l.c.* p. 183).

ATTESTATION OF DOCUMENTS

(Ḥatimah): The general rule of evidence is that a fact can be established only by the testimony of two witnesses. With the introduction of writing and the custom of making written records of the transactions, the strictness of the rule requiring the actual presence of the witnesses to deliver their testimony orally was relaxed, and a written instrument setting forth the fact and subscribed by two witnesses was considered evidence of equal validity. In Jewish law a written instrument by which a person bound himself to do or pay something was usually prepared by the witnesses or under their direction, and not by the person charged thereby; nor did the debtor or obligor, as a rule, sign the instrument. The distinction, therefore, between the attestation of witnesses in Jewish law and in modern law lies in the fact that in the latter the subscribing witnesses attest the genuineness of the signature of the debtor, whereas in Jewish law they attest the fact that the transaction purported in the instrument to have occurred actually did occur. It is the substance of the instrument, and not the signature of the obligor, that is proved by the attestation of the subscribing witnesses. The formula of attestation varies. An approved formula is the following:

> "We [the witnesses] have taken symbolic possession ["Ḳinyan sudar"] from............ . the son of............, according to all which is written and expressed above, with an article that may be used for taking symbolic possession, this......day of ......; and all is fixed and established.
>
> "............, the son of............, a witness.
>
> "............, the son of............. a witness."

An older formula reads simply:

> "We have written and signed our names here on this [date]; and all is fixed and established."
>
> [Names of witnesses.]

Inasmuch as the testimony of the subscribing witnesses goes to the substance of the instrument, the formalities required are numerous; and great strictness is observed in enforcing them, although such strictness is relaxed in the cases of bills of divorce and bills of manumission of slaves.

The witnesses must read the document word for word before they sign it. It is not sufficient if some one else reads it to them, though some authorities are of the opinion that it may be read to them by *two* other persons. If the document is prepared in a language unknown to one of the witnesses, and has been translated for him, the document is valid (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 45, 2).

Mode of Attestation.

The witnesses must know both parties and their names, or have them properly identified by others, for the obvious reason that in the absence of the signature of the party bound, fraud in the preparation of the instrument would be more possible. In the case of a bill of sale or an instrument of indebtedness, the later law somewhat relaxed the rule, and provided that the witnesses need know only the seller or the debtor, these being the persons to be bound respectively by these instruments (*ib.* 49, 2). According to Maimonides, however, the strict rule requiring the witnesses to know both parties can not be relaxed ("Yad," Malweh, xxiv. 3). The witnesses must sign their own names; and illiterate witnesses, unable to write, are incompetent; thus, even if some one have traced the signature for the witness and the latter have written the letters over the tracing, it is invalid; although some authorities are of the opinion that in such cases the witness is considered competent, especially so in cases of bills of divorce.

An attestation in the form "A. B. has authorized me to sign for him" is invalid, because of the general reason that the subscription of the witness is equivalent to testimony delivered in open court, and hence must be direct, and not hearsay. In some communities it became customary for public scribes to prepare all documents; in such cases the witnesses appeared before the scribe and, if illiterate, directed and authorized the scribe to sign for them. The formula in such cases was: "A. B. has authorized me to sign this document for him"; and where such custom prevailed, such attestation was considered valid (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 45, 5).

Connection with Body of Deed.

A peculiar rule of the Jewish law was that the signatures of the witnesses must be affixed at a distance of less than two lines from the body of the instrument. The history of this rule is interesting. The older Talmudic law, which had no special formula for documents whereby the end of the body of the document could be fixed beyond the danger of any addition thereto after the witnesses had subscribed, attempted to prevent the addition of such matter by the rule quoted by Rab Amram, "The last line proves nothing" (B. B. 162*a*); meaning that if any matter of importance was brought into the last line of the document, it signified nothing, because it was presumed that this last line had been interpolated, as the witnesses rarely signed their names so closely to the body of the document as not to leave a space wide enough for an interpolation.

Another rule is cited in the name of Rabbi Johanan: "Some of the substance of the document is repeated in the last line" (B. B. 161*b*). Thus, by summing up what had already appeared in the body of the document, the last line becomes of no importance whatever except as an indication of the end of the instrument. If, therefore, the signature of the witness is at a distance of a line or a little more than a line from the body of the instrument, no interpolation could take place. But if the signatures are two lines distant, then interpolation could take place, because in the first of these two lines some matter of importance could be added, and in the second the formula of repetition could be written. Hence the necessity for the rule that, in order to prevent any interpolation of this sort, the witnesses must sign within the distance of two lines from the body of the instrument, or the instrument is absolutely void (Ḥoshen Mishpaṭ, *l.c.* 6). The formula "Everything is fixed and established" (והכל שריר וקים) is universally recognized as the end of the instrument, and, as anything appearing thereafter would be immediately recognized as an interpolation, the strictness of the above rule seems to be unnecessary; yet the rule was nevertheless not relaxed, upon the ground that that which is not done according to the ordinance of the sages is not valid ("Be'er ha-Golah" on Ḥoshen Mishpaṭ, *l.c.*).

Deeds of Indebtedness.

An instrument of indebtedness duly attested by two witnesses is in some respects equivalent in its effect to an instrument which has been made a matter of public record at modern law. The debt thus secured becomes a lien on the property of the debtor; and the creditor may follow such property for the purpose of collecting his claim, even though the property has been transferred to third persons bona fide, because all persons are presumed to take such property subject to the lien of the debt, since the instrument of indebtedness attested by two witnesses is deemed to be such publication of the debt as to be legal notice to all the world (B. B. x. 8).

The rule of law providing that at least two witnesses must subscribe does not imply that the document has greater validity if more than two subscribe. It is simply a rule providing for a proper form of attestation; and two witnesses are sufficient. An instrument attested by only one witness is equivalent to the oral testimony of one witness; and if the obligation is repudiated by the person bound by the instrument, he is obliged to take the oath of purgation (B. B. x. 1; Ḥoshen Mishpaṭ, 51, 2). For although the instrument does not create a perfect obligation by reason of the fact that there is but one witness, it nevertheless raises the presumption of indebtedness, which the debtor is obliged to meet by taking the oath that he does not owe anything.

If a duly signed instrument is delivered in the presence of two witnesses, even though they are not the signers of the document, the creditor may follow the property of the debtor (*ib.* 7); although some authorities do not concede the same validity to the document that is delivered in the presence of two as to the one that is subscribed by two ("Beer Heṭeb" on Ḥoshen Mishpaṭ, *l.c.*). If a document is signed by a number of witnesses, some of whom are incompetent, some authorities require evidence that the witnesses last subscribing are competent (*ib.* 45, 12, gloss); but the general rule seems to be that if there are among the signers two witnesses who are competent, the instrument is valid, no matter in what order they have signed, unless it can be proved that all the signers have been simultaneously called to sign the document (*ib.* text). If there are only two witnesses, and one of them is incompetent, the instrument is invalid, even if it has been delivered in the presence of two qualified witnesses (Maimonides, "Yad," 'Edut, xiv. 6; see Shulḥan 'Aruk, Eben ha-'Ezer, 130, 17).

According to the Talmudic principle, where Jewish and non-Jewish laws differ, and the Jew is subrogated to the rights of the non-Jew, the case is decided according to the non-Jewish law; hence, if a non-Jew has sold an instrument of indebtedness to a Jew, it is the prevailing opinion of the jurists that the rights of the Jew are determined according to the non-Jewish law (Ḥoshen Mishpaṭ, 66, 25). If such instrument of indebtedness is signed by the witnesses at a distance of more than two lines from the body of the instrument, this does not invalidate such instrument, if the same is valid according to non-Jewish law (*ib.* 45, 17).

As stated above, the strictness of the rules concerning attestation of instruments is somewhat relaxed in the cases of bills of divorce and bills of manumission of slaves, since these instruments were always construed liberally in favor of the slave to be freed from bondage or the woman to be freed from matrimony. The subscription of the witnesses to the GET was ordained by Rabban Gamaliel as a matter of public policy, in order to facilitate the proof of legal documents (Giṭ. iv. 3); but after this ordinance it was still for a long time maintained by the authorities that where there were no subscribing witnesses, but the geṭ had been properly delivered to the wife in the presence of witnesses, it was valid, and could be proved by the witnesses of the delivery (*ib.* ix. 4). Although the general rule required that the witnesses should be personally acquainted with the parties, yet in cases where the exigencies of the situation made it impossible to follow the usual formalities, a bill of divorce was permitted to be delivered to the wife, even though the witnesses did not personally know the parties (Giṭ. 66*a*). If the witnesses did not sign their full names, or omitted the words "a witness," following their names, it was nevertheless presumed that they wrote their names with the intention of being witnesses to the document, and hence the attestation was deemed valid (*ib.* ix. 8).

Bills of Divorce and Manumission.

There was one exception to the general rule that two witnesses are sufficient to attest any instrument: this was a curious form of a bill of divorce known as "the folded geṭ." It was prepared in the following manner: A line was written, the parchment was then folded and fastened, and a witness signed on the back of the fold; then another line was written, and the parchment again folded and fastened, and this fold likewise attested by another witness; and as there were not less than three folds, there could not be less than three witnesses (B. B. x. 1, 2), because of the rule that the folded geṭ must have as many witnesses as it has folds; and if one fold was blank, the geṭ was called "a bald geṭ," and was void (Giṭ. viii. 9, 10). This form, however, was no longer used in Talmudic times. Such instruments are declared absolutely void by the later law (Ḥoshen Mishpaṭ, 42, 1, gloss).

J. SR. D. W. A.

ATTIA, ISAAC B. ISAIAH: Talmudic scholar; lived in Aleppo in the nineteenth century. He was the author of the following works, published in Leghorn, 1821-31: (1) "Eshet Ḥayil" (A Virtuous Woman), explaining Prov. xxxi.; (2) "Wayiḳra Yiẓḥaḳ" (And Isaac Called), annotations on the Pentateuch, divided into three parts, the last two of which are entitled "Doresh Ṭob" (He Who Preaches Well) and "'Eḳeb 'Anawah" (For Modesty's Sake); (3) "Mesharet Mosheh" (The Servant of Moses), containing novellæ on Maimonides' Yad ha-Ḥazaḳah and its commentaries; (4) "Rob Dagan" (Abundance of Corn), with an appendix, "Ot leṬobah" (A Sign of Good), on different halakic subjects, divided into two parts and arranged in alphabetical order; (5) "Tannia we-Shayar" (He Taught and Left Unexplained), and (6) "Pene ha-Mayim" (The Surface of the Water); two volumes of annotations on the Pentateuch.

L. G. I. BR.

ATTORNEY: A legal representative, empowered to plead on behalf of the person represented. Attorneys at law are unknown in Jewish law. The examination and cross-examination of the witnesses were conducted by the judges; and in criminal cases the law imposed upon the judges the duty of carefully guarding the prisoner's rights. Attorneys in fact were permitted to appear for their principals and conduct litigation, subject to certain restrictions.

Attorney for Plaintiff: The Talmudic law on the subject is found in the treatise Baba Ḳamma (70*a*). According to this passage, an Attorney was authorized to represent his principal only for the purpose of receiving property from a bailee or trustee, when there was no dispute concerning its ownership. If there was a contest as to the title to the property, the Talmudic law did not authorize an Attorney to appear.

At the law academy in Nehardea it was taught that an Attorney could appear only for the purpose of taking possession of real estate, but not to recover movable property. The Geonim, however, modified this Talmudic principle, and permitted attorneys to appear in contested cases also. Rabbi Hananeel of Kairwan, who lived during the eleventh century, reports that in his time it was lawful to appoint attorneys in all cases, whether the controversy was concerning movable or immovable property, and whether there was a contest or not (Tosafot, B. Ḳ. 70*a*, אמטלטלין); and this opinion was generally accepted in the later law (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 123, 1).

The power of Attorney had to be in writing, and to contain the words "proceed, litigate, acquire, and possess for thyself and compel the adversary to give up what is due," or words to that effect; and if such words were not used, the defendant was not obliged to answer the Attorney, and could plead in bar of the Attorney's right (B. Ḳ. *l.c.*; Maimonides, "Yad," Sheluḥin, iii. 1; Ḥoshen Mishpaṭ, 122, 4).

Relation of Attorney and Client.

It was at first thought that the relation of Attorney and client was like that of partners, and that the Attorney could retain one-half of what he collected; but the final decision was that their relation is like that of principal and Agent, and that the Attorney was obliged to account to his principal for all that he had done or received (B. Ḳ. *l.c.*). The principal was obliged to pay all the expenses of the Attorney and to indemnify him for all outlays; and all powers of Attorney were customarily drawn with a provision to that effect (Ḥoshen Mishpaṭ, 122, 6).

Persons Qualified to Act.

Any person could act as Attorney for another. Even women and slaves could be empowered. The principal's own slaves, however, were not permitted to represent him (*ib.* 123, 13); and, subject to certain regulations, even non-Jews were authorized to act as attorneys for Jewish claimants (*ib.* 14).

Unless specially authorized to do so, the Attorney could not appoint another Attorney in his place; and the principal could revoke the power of Attorney at his will (*ib.* 123, 4; 123, 3).

In case the principal appointed another Attorney, this was an implied revocation of the power granted to the first one, unless the second appointment was simply intended as a precautionary measure whereby the second Attorney was substituted only in case the first could not act (*ib.*).

If the subject of contention was a debt, the death of the principal revoked the power of Attorney; but if it was real estate, or if the Attorney had been given authority through the ceremony of symbolical seizure (Ḳinyan), the death of the principal was not a revocation of the power (*ib.* 1).

A husband could act as Attorney for his wife without any special power given to him, in controversies concerning those portions of his wif[illegible]erty in which he had usufructuary rights; [illegible] had no such implied power in matters concerning those portions of her estate the fruits of which she enjoyed (Giṭ. 48*b*; Ḥoshen Mishpaṭ, *l.c.* 8).

Members of a partnership or heirs of an estate of which no partition had been made could appear as attorneys for their copartners or coheirs without any special power given to them, because, their interest being joint, each is authorized to act for the others. If, however, one of the coheirs or copartners was absent in another city, and unable therefore to intervene personally in the case, if he so chose to do, he was not bound by the action of his coheir or copartner; and it was a rule, therefore, that in cases where a coheir or copartner appeared to represent the estate, the defendant might demand a production of the power of Attorney from absent parties interested (Ket. 94*a*; Maimonides, "Yad," Sheluḥin, iii. 3; Ḥoshen Mishpaṭ, *l.c.* 9).

Attorney for Defendant: The defendant was not entitled to be represented at court by an Attorney (Ḥoshen Mishpaṭ, 124, 1). The only case, it appears, known to the Talmudists, in which it was assumed that an Attorney (אנטלר. ἐντολεύς) might eventually be permitted to appear for the defendant, was one in which the high priest was sued (Yer. Sanh. ii., beginning 19*d*).

The principal reason for compelling the defendant to appear in person seems to have been the feeling that if he were obliged to face the plaintiff in open court, there would be a slighter probability of false plea or concealment of the truth on his part (Ḥoshen Mishpaṭ, *l.c.*; Beer ha-Golah, *ib.*).

Women of standing and scholars were respected to this extent, that they were permitted to make their statements in their own homes in the presence of the plaintiff; and the record of their statements was taken by the official recorder and presented to the court (Asheri Sheb. iv. 2; Ḥoshen Mishpaṭ, *l.c.*). See Agency, and Attorney, Power of.

J. SR. D. W. A.

ATTORNEY, POWER OF (Harshaah): An instrument empowering an agent to act on behalf of a principal. The following formula of a Power of Attorney is taken from "Naḥalat Shib'ah," chap. xliv.:

"A memorial of testimony taken before us witnesses whose names are subscribed below. On the......day of the month of......, in the year......of the creation, there came before us A, the son of B, and he said unto us, 'Be ye witnesses and acquire from me by symbolic seizure ["ḳinyan"] and sign this and give it into the hands of C, the son of D, that it may be unto him for a testimony and as proof that I do this voluntarily and of my own free will. I have given to the said C, the son of D, four ells of ground, and through them and through the aforesaid symbolic seizure, I empower and authorize the said C, the son of D, to be my attorney and representative ["murshah"=empowered, and "entelar"=ἐντολεύς, mandatory], that he may have power and authority to demand and collect the amount which E, the son of F, owes me on a certain instrument of indebtedness which I have transferred to him [my attorney]; "and now acquire it for thyself and all rights under it; and thy hand shall be as my hand; and thy mouth as my mouth; and thy act as my act; and thy release as my release; and everything that thou shalt do concerning the aforesaid debt shall be done as though I had done it myself"'; and thus the aforesaid A, son of B, said to the aforesaid C, son of D, 'Go litigate and acquire and lay out whatever is necessary for thy expense, and whatever shall be decided for thee in court I shall accept whether in my favor or against me, nor shall I have the right to say to thee I have sent thee to benefit me, and not to harm my cause'; and he shall also have power and authority to summon the debtor to court or to compromise with him or to extend the time of payment and to give acquittance. To all the above, the said A, son of B, bound himself by symbolic seizure and by the four ells of ground as aforesaid, and by a hand-clasp, and by an audible statement, and by a lawful oath, and under the sanction of the heavy ban to approve and ratify everything that the attorney may do. This letter of attorney shall not be invalidated nor shall its power be minimized by anything wrongful or detrimental forever; but it shall have permanent force and effect according to the effect of all letters of attorney that are customarily made among Israelites, according to the regulation of our sages of blessed memory, not as a mere 'asmakta' nor as a mere form. And we have taken symbolic possession from A, son of B, on behalf of C, son of D, according to everything that is written and expressed above by an object through which symbolic possession may lawfully be taken; and all is firmly fixed and established." (Signed by two witnesses.)

The Power of Attorney is, like most documents in Jewish law, prepared and signed by the witnesses and not by the parties. By the ceremony of symbolic seizure and by the conveyance of four ells of ground to the attorney, the latter became invested with all the powers specifically defined in the instrument.

The foregoing formula contains all the necessary and formal words required by the law. It enables the attorney to expend money on behalf of his principal in the prosecution of his claim, and whether well or ill spent, he is entitled to be repaid; and it furthermore authorizes the attorney to bring suit, to compromise, to grant an extension of time of payment, and to give a receipt or acquittance to the debtor.

For further explanation of the terms and phrases used in this formula, see articles Sheṭarot, Asmakta, Attorney.

J. SR. D. W. A.

ATTRIBUTES: The fundamental and permanent properties of substance, so-called by logicians in contradistinction to accidents, which are modifications representing circumstantial properties only. Aristotle makes the distinction between "fundamental being" (*τὰ ἐν τῇ οὐσίᾳ ὄντα*) and its fundamental properties (*τὰ συμβεβηκότα*; "Metaphysics," iv. 30, 1025*a*, 30; and "De Animalium Partibus," i. 3, 643*a*. 27). Similarly the Arabian-Jewish philosophers discriminate between תואר, "attribute," and מקרה, "accident"; and the typical defenders of the Attributes, the Sifatiya, are called by these philosophers בעלי התארים, "accepters of attributes." The theory of Attributes was always an important problem of scholasticism, because of its intimate connection with the Christian doctrine of the Trinity. It came into prominence with Saadia's work, "Emunot we-Deot" (ii. 5, 53), in which the doctrine of Attributes is employed directly against the dogma of the Trinity. Saadia, who denies the positive attributes of God, with the exception of existence, unity, power, and wisdom, places the following alternative before Christian Trinitarianism: "God is either corporeal or incorporeal. If He be considered corporeal, positive attributes would indeed be possible, but then the idea of God would be open to the grossest anthropomorphism of the ignorant masses. If, on the other hand, God be considered incorporeal, He can possess no attributes (positive properties), for with the possession of attributes differences in God must be admitted, and differences can be predicated of that alone which is corporeal, not of that which is incorporeal." From this comparatively clear statement of the problem of Attributes it is apparent that it touches the very core of scholasticism. It is interesting, therefore, to inquire what attitude is assumed toward it by Judaism, with its fundamental and constant insistence on the unity of God, who possesses manifold spheres of work; with its many-sided forms of revelation; with its all-wise, all-good, all-powerful, all-animating God. Antithetically expressed, what is the relation of unity to multiplicity? Logically formulated, what is the relation of the individual to its species, of the species to its genus? Sociologically stated, what is the relation of human personality to the community, and of the community, on its part, to the state?

It is evident from the preceding that the question of the Attributes of substance—be this substance God, Nature, Atom, Monad (ἓν καὶ πᾶν), Idea, Will, the Unknowable—concerns the very highest problems of human intellect; the question being intimately entwined with the fundamental problems, not only of scholastic, but of all philosophy, with the problem, indeed, of universals. It is therefore not surprising that in the Arabian-Jewish philosophy there should be a division between the defenders and the opponents of the doctrine of Attributes; or that within the field of attribute-conception the most minutiose attempts at adjustment are evolved, as was so ably shown in the pioneer literary production of David Kaufmann, "Attributenlehre in der Jüdischen Religionsphilosophie," Gotha, 1877.

Though the problem of Attributes merited the most earnest consideration of the loftiest minds, the treatment it actually received was barren and unsatisfactory in the extreme. How great was the need for a scholarly consideration of the problem of Attributes is shown by the fact that as late as the seventeenth century much of the thought of a Descartes, a Locke, and a Spinoza was devoted to it, and that even in the nineteenth century there could occur such a vigorous discussion concerning the proper interpretation of Attributes as that which took place between J. E. Erdmann and Kuno Fischer. Descartes (in his "Principia Philosophiæ," i. 53, 1644) had drawn the distinction between "attributum" and "modus"; but Spinoza was the first to set the doctrine of Attributes in the very center of a system. "By attribute I understand whatever the mind conceives as constituting the essence of substance" ("Ethics," i., def. 4). God therefore is conceived as containing infinite Attributes, each one of which expresses His eternal essence (*ib.* prop. xi.). Of all of the divine Attributes, however, the human mind conceives but two, thought and extension ("Ethics," ii., prop. 1 and 2). While Erdmann explained these Attributes of Spinoza as being merely the modes of cognition in the mind considering them, Fischer maintained that they were real and separate forms of the substance's existence.

This modern example will serve to show that speculative metaphysics still has its attribute-problem. Indeed, even the natural sciences of to-day have, on their metaphysical side, attributive implications. Witness, for example, Häckel's naturalistic monism (see Ludwig Stein, in "Archiv für Geschichte der Philosophie," ii. 319, 1898; *idem*, "Sociale Fragen im Lichte der Philosophie," p. 516, 1897; *idem*, "An der Wende des Jahrhunderts," p. 894, 1899). The historical continuity of philosophy is evidenced by the fact that old problems are continually being revived and modified through the influence of new ideas. Each succeeding age presents for its own consideration the problem of Attributes—though clad in its own scientific phraseology. With scholasticism the problem of Attributes was a theological one; with Spinoza it was a mathematical one (the relation of the One to the Many); with Häckel it is a biological problem (the relation of the Organic to the Inorganic). Häckel's monistic conception of the universe (calling it "the conception of coming ages") is in substance that the forms of organic, as well as those of inorganic, matter are the necessary products of natural forces. It is readily seen, however, that his "natural forces" of the underlying substance are in truth just as attributive as any of the fundamental qualities of a Spinoza or of any section of scholasticism.

Certain basic problems of metaphysics recur at intervals throughout the ages, clothed always in the scientific dress of the period, and receive more or less adequate formulation according to some one or the other of the dominant scientific tendencies of the day.

K. L. S.

It is difficult to determine whether it was the influence of the Motazilites or the desire to convince his Karaite adversaries of the danger of always taking Biblical words literally, that actuated Saadia in raising the question of the divine Attributes. He was, however, the first among Jewish writers to do so; and the question having been propounded, it was thereafter considered by all the philosophers, each making an effort at its solution according to his respective school.

Saadia.

Saadia, like the Motazilites, denies all Attributes save those of existence, unity, power, and wisdom, inasmuch as these four, expressing as they do the very essence of God, involve neither multiplicity nor variety in Him; and furthermore because each of these four essential Attributes being necessitated by, or implying, the other, they can be reduced to one attribute. No other divine attribute found in the Bible can be taken literally without surrender to coarse anthropomorphism ("Kitab al-Imanat Wal-I'tikadat," ed.

Landauer, pp. 80–90). But Saadia, in admitting these four Attributes, did not foresee the objection of Maimonides, that these Attributes either add to the essence of God—and in that case they ascribe to Him accidents, which ascription is inadmissible—or are useless repetitions. Indeed these Attributes are in such predicament that if the question be asked, "What is God?" it should be answered, "God is God" (compare "Moreh," i. 52). This objection did not escape Baḥya, whose theory of Attributes is accordingly more precise.

Bahya.

The author of "Duties of the Heart" divides Attributes into two classes, those that indicate God's essence ("dhatiyat") and those that express His actions ("fa'iliyat"). The essential Attributes are those of existence, unity, and eternity, which, being every one of them necessitated by the others, are in fact but one. However, in describing God by these Attributes, it must be borne in mind that they do not present Him as an existing, eternal, and unique being, inasmuch as the sense generally attached to these expressions can not be applied to God, who is beyond our conception; they simply negative the possibility of His having the opposite Attributes ("Duties of the Heart," x.).

Judah ha-Levi.

With Judah ha-Levi the question changes. While Saadia admits without reserve four essential Attributes, and while Baḥya does not object to three, provided they be taken negatively, and while both refuse to admit any other Attributes than these, Judah ha-Levi sees no harm in Attributes other than essential, provided they be used negatively. Accordingly he divides all Attributes found in the Bible into three classes, namely: into active ("taziriyah"), such as rich-making (מעשיר = he maketh rich), poor-making (מוריש = he maketh poor), etc.; into relative ("idafiyat"), such as blessed (ברוך), merciful (רחום), etc.; and into negative ("salbiyah"), which comprise all essential Attributes, inasmuch as all essential Attributes must be taken negatively. The names of God found in the Bible are all, except the Tetragrammaton, Attributes belonging to one or another of the three classes mentioned ("Cuzari," pp. 73 *et seq.*, ed. Hirschfeld).

Abraham ibn Daud, like Judah ha-Levi, admits all relative Attributes. As for the essential ones, there are eight by which God can be described, for the simple investigation of their mutual relations shows that they have not the same significations as are generally attached to them. These eight are unity, existence, immutability, truth, life, knowledge, power, and will ("Emunah Ramah," pp. 54 *et seq.*).

Maimonides.

Maimonides, on this question, adopts the theory of Aristotle. He divides the positive Attributes into four classes: (1) Those that include all the essential properties of an object. Such Attributes, however, can not be applied to God, because, as all philosophers agree, God can not be defined—definition being established only by giving the genus and the specific differentia. (2) Those that include only a part of the essential properties. Neither can these Attributes be applied to God, who, being incorporeal, has no parts. (3) Those that indicate a quality. These latter also are inapplicable to God, who, having no soul, is not subjected to psychical affections, that indicate the relation of one object to another. (4) Those that express actions or effects. At first sight the two last-mentioned Attributes can be applied to God, because, having no connection with His essence, they do not imply any multiplicity or variety in Him; but on closer examination it will be seen that even these present many difficulties. There is only one kind of Attributes by which God can be described, and those are negative Attributes.

Spinoza follows Maimonides to a certain degree. Like him he says that the essential Attributes of power and will do not exist in reference to God; for He can not have power or will as regards Himself (compare "Cogitata Metaphysica," part ii., ch. viii. § 2). He agrees with him likewise in declaring that God's essence is not complex but simple (*ib.* v., vi.). But while Maimonides concludes from this conception that all positive Attributes must be banished from God, Spinoza makes a distinction between proprieties and Attributes, and maintains that God is conceived by an infinite variety of Attributes, every one of which expresses His eternal essence ("Ethics," part i., prop. x.).

K. I. Br.

AUB, HIRSCH: Rabbi and Talmudist; born, 1807, in Baiersdorf, a small town near Erlangen, the birthplace of a number of prominent Jews; died at Munich, 1876. He studied in Prague and became known as a Talmudist. In 1827 he was elected chief rabbi of Munich, which position he filled for forty-nine years. His congregation was composed both of Orthodox and of Reform Jews, but he held its various elements together by his love of peace, gaining through this strongly marked trait the name of "ba'al sholom" (peacemaker). In 1848 he was one of the principal workers for the emancipation of the Jews and the abolition of the law under which only a limited number of married Jews were allowed to live in each town. Aub was held in high esteem and favor by three kings of Bavaria, Ludwig I., Maximilian, and Ludwig II. The last-named decorated him, on his seventieth birthday, with the Cross of St. Michael. S.

AUB, JOSEPH: Oculist; born in 1846; died May 13, 1888, at Cincinnati, O. He attended the Talmud Yelodim Institute and the public schools, and later entered the Ohio Medical College, from which institution he was graduated in 1866. He then went to Erlangen, Bavaria, where he received the degree of M.D. After serving for a short time in the Austro-Prussian war, he studied at Paris and Berlin under the eminent oculists Liebreich and Albrecht von Gräfe, and then became assistant to Dr. Knapp in Vienna. On the latter's removal to New York, Aub settled permanently in Cincinnati, where his remarkable success as an operator soon insured him a large practise. Aub was one of the first to use the electromagnet for removing foreign bodies from the eye. He was oculist to the Cincinnati Hospital, and for five years professor of ophthalmology at the Cincinnati College of Medicine and Surgery. He was a frequent contributor on this subject to medical periodicals.

BIBLIOGRAPHY: *Jewish Chronicle*, June 1, 1888, p. 7.

A. B. B.

AUB, JOSEPH: German rabbi; cousin of Hirsch Aub; born at Beiersdorf, in Bavaria, 1805; died May 22, 1880. He held various rabbinical posts for fifty years, first in Baireuth (1830–50), then in Mayence (1850–65), and, finally, in Berlin from 1865 until his death. Joseph Aub was distinguished as one of the first Bavarian rabbis who delivered their sermons in German and published them later in pamphlet form. He was a partizan of the Reform movement, but without losing the historic ground of Judaism. He founded a weekly entitled "Sinai" in 1846, but this independent organ met with mediocre success only. Among his writings on theological questions may be mentioned: "Betrachtungen und Widerlegungen," in two parts, 1839; "Biblisches Sprachbuch für den Vorbereitenden Unterricht in der Mosäischen Religion," 1868; "Grundlage zu einem Wissenschaftlichen Unterrichte in der Mosäischen Religion."

S. A. S. C.

AUB, LUDWIG: Author and poet; born Aug. 4, 1862, in Munich, Germany. He is a grandson of the rabbi Hirsch Aub, of Munich. When his father, Max Aub, a lawyer, was recalled to Munich from the little town of Uffenheim, Franconia, where he held an office under the government, Ludwig entered the gymnasium of his native city.

From early boyhood he gave evidence of that all-absorbing love for books which afterward led him to seek employment with different firms of booksellers in Vienna and Leipsic, until he himself became a dealer in rare books. This occupation gave him a comprehensive knowledge of modern German literature and, at the same time, put him in touch with men calculated to stimulate his literary tastes. Unfortunately a serious affection of his eyes not only forced him to give up his business, but has seriously interfered with his literary career. Aub has occasionally championed Jewish interests against anti-Semitic attacks.

His first attempt as author was with "Abriss der Deutschen Literaturgeschichte," Leipsic, 1888. The "Münchner G'stanzl'n," a book of poems in the North-Bavarian dialect, which appeared in 1889, met with pronounced success. In the same year Aub, in collaboration with Thom, published a collection of aphorisms and epigrams under the title of "Gnomen und Kobolde."

Aub is president of the Orion Literary Association in Munich, which he founded, and is a regular contributor to German periodicals and newspapers.

S. A. S. C.

AUBRIOT, HUGUES: A provost of Paris, France; born at Dijon; died in Burgundy in 1382. He was in office at the accession of Charles VI. (1380), when the populace, irritated beyond endurance by the taxes levied upon them, demanded of the king that "Jews and usurers be expelled from Paris" (J. des Ursins, "Histoire de Charles VI."). Without waiting for the king's action, "some of the lower classes . . . ran about the city, . . . entered about forty of the Jewish houses, robbing them of plate, jewels, clothes, and bonds" (*ibid.*). For four days the dwellings of the Jews were attacked and thus pillaged. The mob rushed upon the terrified Hebrews, cut their throats and tore from the arms of mothers infants whom they hurried to the churches so that they might be baptized (Halphen, "Legislation Concernant les Israélites," Introduction). Aubriot earnestly pleaded the cause of the Jews before the king, and through his influence succeeded in obtaining a royal decree, ordering the restoration of the children to their mothers and the restitution of all property taken from the Jews.

For thus championing the cause of the Jews, Aubriot incurred the hostility of the Church, which denounced him as being secretly a Jew, and accused him of various crimes, including that of immorality with Jewesses (J. des Ursins, *l.c.*; compare Sauval, "Antiquités de Paris," ii., book x.). Aubriot was finally compelled to do penance and was condemned to perpetual imprisonment on bread and water.

He was confined in the Bastile, but about a year later (1382) was released by the mob, during the riots of the "Maillotins." Unfortunately for the Jews, the rioters, unrestrained in their fury (Félibien, "Histoire de la Ville de Paris"), fell upon them, massacring great numbers, and pillaging their homes ("Ordonnances des Rois de France," vi.).

Of the survivors of this massacre some fled, while others were baptized; the moneys and other valuable property being given to the Chapel of Vincennes (Léon Kahn, "Les Juifs à Paris," p. 31).

G. S. K.

AUER, LEOPOLD: Hungarian violinist; son of a poor house-painter; born in Veszprim, Hungary, June 7, 1845. His musical talent manifested itself early. When only four years old he marched in front of the revolutionary troops, beating the drum, and exciting patriotic enthusiasm among the spectators. He received his first musical education from Ridley Kolene at the Conservatory at Budapest; then went to the Vienna Conservatory, where he studied under Dont (1857–58); and completed his studies with Joachim at Berlin. He was musical conductor at Düsseldorf from 1863 to 1865, and at Hamburg from 1866 to 1868. On the invitation of the St. Petersburg Musical Society he succeeded Wieniawski as professor of the violin at the conservatory there. Appointed soloist of the imperial theaters (1873), with the title "court-soloist to the Czar," he conducted the concerts of the imperial court-singers (1880–81), and later led the concerts of the Russian Imperial Musical Society (1887–92). Auer still occupies this last position (1902). From 1881 to 1888 he made a number of tours through Europe as a solo violinist, and participated in the musical festivals at Carlsruhe (1885) and Düsseldorf (1888).

His eminence as a talented musical instructor is attested by the many renowned violin-players that have been among his more than forty pupils; of them Kolakovski, soloist of the Imperial Theater at Moscow; Krasnokutski, Pusternakov, Galkin, Mlynarski, Korguyev, and Krüger, the last four soloists of the Imperial Musical Society of St. Petersburg, and many more celebrated artists of the imperial theaters of St. Petersburg. Some of his compositions, among them "Tarantelle de Concert" and "Rhapsodie Hongroise" for violin and piano, and transpositions for the violin, have been published by Bote and Back in Berlin, and by Fr. Kistner in Leipsic.

S. H. R.

AUERBACH: A family of scholars, the progenitor of which was **Moses Auerbach**, court Jew to the bishop of Regensburg, about 1497. One of his daughters, who went after her marriage to Cracow, is the reputed ancestress of the celebrated R. Moses Isserles (רמ״א).

Another branch of the family settled at Vienna. A near relative, **Meshullam Solomon Fischhof-Auerbach**, occupied such an eminent position in the community of Vienna that he married Miriam, the daughter of a well-known rabbi and physician Leo Lucerna (Judah Löb Ma'or-katon). She died July 29, 1654 (Frankl, "Inschriften," No. 202). In his old age it was his misfortune to be driven from Vienna and exiled (1670) with his coreligionists. Before his death (1677) he had the satisfaction of seeing his sons occupy honorable positions. Nearly twenty years before, his son **Menahem Mendel Auerbach** was called as rabbi to Reussnitz, Moravia, after having officiated as assessor to the rabbinate at Cracow. The pupil of such men as Lipmann Heller, Joel Sirkes, Joshua b. Joseph, at the Talmud school in Cracow, Menahem Mendel attained such a reputation as a Talmudic authority that the rabbis of large foreign communities submitted difficult questions to him for decision. (For detailed account of his career see separate article.)

The best known among Mendel's brothers is **Simon**, who at the age of 23 wrote a penitential poem, on the occasion of an epidemic that broke out among children in Vienna, in 1634. This poem passed through several editions, under the title "Mish'on (*sic*) la-Yeladim" (Support to Children), Frankfort-on-the-Main, 1711. The author died March 11, 1638, at Eibenschütz. The poem was printed by the grandson of the author, Meshullam Solomon Fischhof, who added a commentary, "Rab Shalom" (Much Peace). He also published several prayers and hymns of Israel Nagara, with additions of his own (Frankfort-on-the-Main, 1712).

Ḥayyim, a second brother of Menahem Mendel, settled at Cracow, but later returned to Vienna as assessor of the rabbinate, dying there Oct. 7, 1665. A third brother, **Benjamin Wolf**, settled at Nikolsburg, and was held in high esteem as elder of the community, even officiating temporarily as chairman of the college of the rabbinate. His testament, printed together with the work "Meḳor Ḥokmah" (Source of Wisdom), which contains an abundance of worldly wisdom and pious reflection, was published by his son, **Meshullam Solomon**, assessor of the rabbinate at Nikolsburg, who published an ethical work at the same time. Menahem Mendel's successor as rabbi of Krotoschin was his grandson who bore the same name (the son of Moses Auerbach—died May 9, 1739), and was president of the congregation of Krotoschin and of the Synod of the Four Lands. He was the son-in-law of Rabbi Saul of Cracow. A son of the Simon Wolf mentioned above was **David Tebele**, surnamed "Ha-Kadosh" (the Holy), who died as rabbi of Prague. His name was commemorated by his son SAMUEL, the author of "Ḥesed Shemuel" (Samuel's Charity), Amsterdam.

A member of the same family was PHINEAS AUERBACH, president of the Jewish court at Cracow (1695), and author of "Halakah Berurah" (Lucid Law), a commentary on Oraḥ Ḥayyim.

Hirsch Auerbach belongs to another branch of the family. He was first assessor of the rabbinate at Brody, fleeing thence to Germany with a part of the community to escape exorbitant taxation and the machinations of informers. After wandering from one place to another he settled at Worms, whither he had been called in 1733 to R. Löb Sinzheim's college, and was appointed rabbi in the same community in 1763. He died at Worms May 3, 1778, in the 88th year of his life, his pious wife Dobresch (daughter of the president Isaac at Brody) dying a few weeks before him. His son, born at Brody, **Abiezri Selig**, was at first rabbi at Edenkoben, then at Buxweiler, where he died 1767; his wife was the daughter of Isaac Sinzheim, rabbi at Trier and Niederehnheim.

D. L. L.

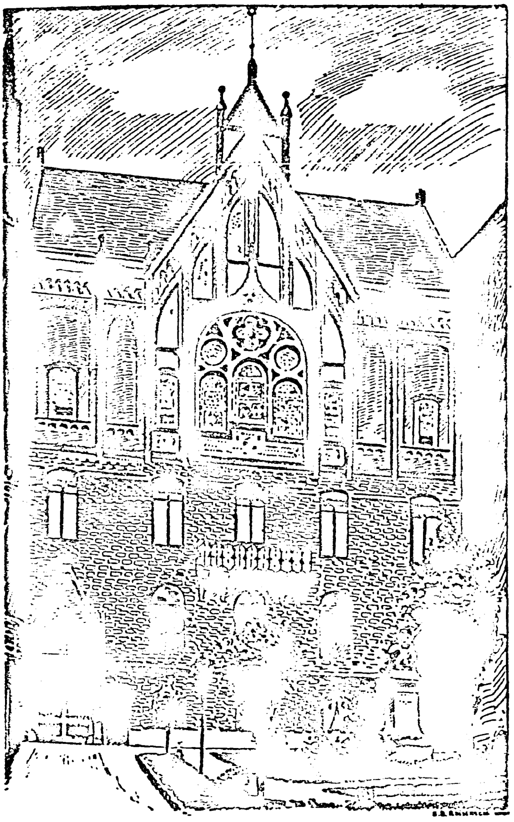
AUERBACH, ABRAHAM BEN ABIEZRI SELIG: German rabbi; born at Buxweiler, Alsace, in the middle of the eighteenth century; died at Bonn Nov. 3, 1846. Being a descendant of an old rabbinical family, he was destined from his childhood for the rabbinate, and was educated first by his grandfather at Worms, and later by his uncle, David Sinzheim, subsequently president of the central consistory at Paris. Under the latter's direction, Auerbach acquired not only extensive Talmudic knowledge, but a secular education as well. When, owing to the efforts of Cerfberr of Medelsheim, a Jewish community had been formed at Strasburg, Auerbach was charged with its administration. At the outbreak of the Reign of Terror in France, Auerbach, on account of his connection with Cerfberr (who as former contractor to the royal army was suspected by the revolutionists), was thrown into prison where he remained a whole year. On leaving Strasburg he was appointed rabbi at Forbach, then at Neuwied, and in 1809 at Bonn. In 1837 he resigned the latter position, ostensibly on account of his great age, but really to have his son succeed him in his place.

Auerbach was the author of several liturgical poems and prayers, and of a poem on the abolition of the poll-tax, entitled "Dibre ha-Mekes we-Beṭuloh" (History of the Tax and its Abolition), still extant in manuscript. The poem was dedicated to Cerfberr, who by his intervention brought about the abolition. A specimen of the poem was given by Fuenn, who was the possessor of the manuscript. Auerbach left seven sons, among whom the best known was Benjamin Hirsch Auerbach, rabbi at Darmstadt and Halberstadt, who died in the latter city Sept. 30, 1872.

BIBLIOGRAPHY: Fuenn, *Keneset Yisrael*, p. 277; *Allgemeine Zeitung des Judenthums*, 1839, No. 98, p. 593.

L. G. I. BR.

AUERBACH, BARUCH: Educator and philanthropist; born in Inowrazlaw, in the province of Posen, Prussia, Aug. 14, 1793; died at Berlin, Jan. 22, 1864. He was the founder and life-long director of the Jewish Orphan Asylum, Berlin. Being the son of a poor rabbi, the days of his boyhood were spent in the study of the Talmud and other Jewish literature. In 1817 he went to Berlin, following his elder brother, Dr. I. L. Auerbach, who at that time enjoyed some reputation in the Jewish community as a minister and preacher. After pursuing his studies at the university, where he paid special attention to the classical languages, he became, in 1829, principal of a school for Jewish boys in Berlin.



Baruch Auerbach Orphan Asylum, Berlin.
(After a photograph.)

In 1833 he took under his care, into his own house, four orphan children, for whom no special provision had been made; and from this small beginning grew the noble institution now connected with his name.

In 1843, when 15 boys were under Auerbach's care, he took also some Jewish girls left without parents into his house, and ten years later the institution had grown so much that 50 boys and 26 girls were housed in a special building in the Oranienburgerstrasse, Berlin. The institution has since been moved to the Schönhäuserallee, Berlin. Nearly 300 children were cared for during his lifetime; and on the day of his death there were 70 orphans in the asylum, while the total amount of funds collected by Auerbach's indefatigable efforts reached the sum of 600,000 thalers (about $450,000), in addition to the beautiful and valuable grounds of the asylum.

Nothing gives a clearer insight into both the spirit of the institution and the character of its founder than his own oft-repeated words: "Orphans are not merely poor children, but children without parents; to raise and bring them up, an orphan asylum should give those children not merely bread and a shelter, but parental love also, and practical training."

S. H. BA.

AUERBACH, BENJAMIN HIRSCH: One of the most prominent leaders of modern German orthodoxy; born at Neuwied in 1808; died at Halberstadt Sept. 30, 1872. His father, Abraham Auerbach—a descendant of an old rabbinical family which traced its origin back to Menahem Auerbach, one of the exiles of Vienna—was on the maternal side a nephew of Joseph David Sinzheim, the first president of the French Sanhedrin, and after having held various rabbinical positions became rabbi of the consistory of Bonn. Benjamin received his first instruction from his father, subsequently studying at the yeshibot of Krefeld and Worms. Well equipped with Talmudic learning he entered the University of Marburg, where he studied from 1831 to 1834. Immediately afterward he was called to the rabbinate of Hanau, but declined, preferring the call to Darmstadt, as chief rabbi (Landesrabbiner) of the grand-duchy of Hesse, for which office no less a personage than Zunz was his competitor. His position was, however, very difficult, as he was strictly Orthodox, while the majority of the congregation were Liberal. He remained for twenty-three years, but was forced to resign in 1857. He went to Frankfort-on-the-Main, where he busied himself with literary work until, in 1863, he was called as rabbi to Halberstadt, in which post he served until his death.

As a scholar and author, Auerbach ranks among the first in his party. He was among the first Orthodox rabbis that preached in pure German; and his text-book for religious instruction enjoys deserved popularity. In the controversy aroused by the publication of Zacharias Frankel's "Darke ha-Mishnah," he naturally sided with Frankel's opponents, defending the view of the divine origin of the rabbinical law. Besides numerous sermons, he published: (1) "Lehrbuch der Israelitischen Religion," 1839, 3d ed., by his son Selig Auerbach, Giessen, 1893; (2) "Berit Abraham, oder die Beschneidungsfeier und die Dabei Stattfindenden Gebete und Gesänge. In's Deutsche Uebersetzt und mit einer Ausführlichen Literarhistorischen Einleitung Versehen," Frankfort-on-the-Main, 1869, 2d ed., 1880; (3) "Ha-Zofeh 'al Darke ha-Mishnah," a criticism of Frankel's "Introduction to the Mishnah," Frankfort-on-the-Main, 1861; (4) "Mishnat R. Nathan," notes on the Mishnah, written by Nathan Adler of Frankfort, who had been Abraham Auerbach's teacher. Frankfort-on-the-Main, 1862; (5) "Sefer ha-Eshkol," an edition of the ritual code of Abraham of Narbonne, Halberstadt, 1862; and (6) "Geschichte der Israelitischen Gemeinde Halberstadt," Halberstadt, 1866.

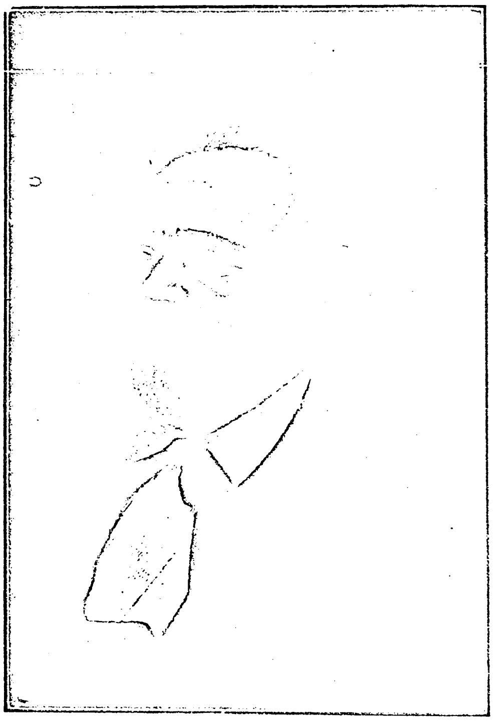
S. D.

AUERBACH, BERTHOLD (BARUCH): German author; born in the Black Forest village of Nordstetten, Germany, Feb. 28, 1812; died at Cannes, France, Feb. 8, 1882. He was one of eleven children, and received his earliest training from a well-equipped German teacher named Frankfurter and from the local Protestant minister. Intended by his father for the rabbinical profession, Auerbach was early initiated into Jewish studies, and in his twelfth year was sent to the Talmud school at Hechingen, and afterward to Carlsruhe, to complete his rabbinical training. In the latter town, however, he soon gave up his Talmudical studies entirely, and devoted himself to secular branches. He attended the Stuttgart Obergymnasium to prepare for the university, and at Tübingen (1832) studied law. Coming, however, under the influence of David Friedrich Strauss, author of "Das Leben Jesu" (whom he ever held in reverence), he exchanged the study of law for that of history and philosophy, to which subjects he continued to devote himself (1832–35) at Munich under Schelling, and at Heidelberg under Daub and Schlosser. Spinoza now became Auerbach's ideal philosopher and guide, and remained so throughout the whole period of his literary activity. Like others among the student-corps, Auerbach manifested something of the democratic spirit; and, as the result of a governmental investigation, he was imprisoned for three months at Hohenasperg (1837).



Berthold Auerbach.

His Early Writings.

The period was one of petty despotism in Germany, and Auerbach suffered the rigors of university discipline to such an extent as to compel him to abandon his university career and to turn to literature for a livelihood. In 1836, in reply to Wolfgang Menzel's attack on the "Junge Deutschland," for all of whose literary and political sins he held the Jews responsible, Auerbach had published his first pamphlet, "Das Judenthum und die Neueste Literatur" (Stuttgart), wherein he pleaded for a fuller recognition of Jewish ideals; but the age was hardly ripe for such progress: the days of '48 had not yet dawned. He also wrote, under the pseudonym of "Theobald Chauber" (an anagram of his name), a biography of Frederick the Great, Stuttgart, 1834–36, and numerous articles for periodicals. His early works were romances illustrating various types of Jewish thought and activity. Thus, in 1838, together with N. Frankfurter, he continued the "Gallerie der Ausgezeichneten Israeliten Aller Jahrhunderte; Ihre Portraits und Biographien" (3d and 4th instalments), begun by Spazier. Along this same line was his other book, "Spinoza, ein Historischer Roman in Zwei Theilen" (Stuttgart, 1837, newest edition, with supplement, "Ein Denkerleben," 1880); half story, half philosophical dissertation, in which his admiration for the Jewish thinker attained the point of glorification. It was followed by "Dichter und Kaufmann" (Stuttgart, 1839; 4th revised ed., 1860; 7th ed., 1871), based on episodes in the life of Moses Ephraim Kuh, a luckless Breslau poet, and wherein he drew a lively picture of the Jews in the time of Moses Mendelssohn.

Auerbach's idealism, however, was not to limit itself to heroes of the Ghetto: he was to enter a broader field and do his share in arousing the German people to a sense of national unity long before the battle of Sedan. To familiarize the German of the North with the character and temperament of the German of the South (after having published, in 1841, a German translation of Spinoza's works, with biography, in five volumes, and, in 1842, a popular treatise, "Der Gebildete Bürger, ein Buch für den Denkenden Menschenverstand"), he published his incomparable "Schwarzwälder Dorfgeschichten," Mannheim, 1843, which at once gave their author international fame. It was an epoch-making work in the history of German literature, and was translated into almost all European languages. What is particularly noteworthy therein is the success of Auerbach, a Jew, in describing all the depth of the religious life of the Christian peasant. That an atmosphere of "Spinozism" breathed through these most artless tales did not materially detract from their charm. In his second collection of "Dorfgeschichten" (Mannheim, 1848, 1853), stronger characters and more complex plots were substituted for the idyllic backgrounds of his former literary attempts. In the interval between these two works, Auerbach published a treatise descriptive of his literary methods, "Schrift und Volk, Grundzüge der Volksthümlichen Literatur," and from 1845 to 1848 issued a very popular calendar, called "Gevattersmann."

In Breslau, in 1847, he married Augusta Schreiber, who died the following year in childbirth. This bereavement prevented him from taking any very active part in the Revolution of 1848. He nevertheless went to Vienna, where he witnessed the October days, and described his impressions of those stormy scenes in his "Tagebuch aus Wien; von Latour bis Windischgrätz," Breslau, 1849. He married again in Vienna soon after, espousing Nina Landesmann, a sister of the poet Hieronymus Lorm, and in 1849 settled in Dresden, whence, ten years later, he removed to Berlin, which then became his permanent abode. There he came into contact with the foremost writers and artists of the Prussian capital, and was received at court; but spent every summer in his native village in the Black Forest, seeking there recuperation and new inspiration for his literary labors.

A couple of plays produced by him, a tragedy, "Andreas Hofer," and a drama, "Der Wahrspruch," Leipsic, 1860, were not at all successful; nor did he have better fortune with his next novel, a tale of modern life, entitled "Neues Leben," Mannheim, 1851. He therefore reverted to his village tales; publishing "Barfüssele" in 1856 (30th ed., 1896; illustrated by Vautier, 1872), "Joseph im Schnee" in 1861 (illustrated by Kindler, 1867), and "Edelweiss" in the same year. From 1858 to 1869 he edited a "Volkskalender," which numbered among its collaborators the most famous writers. He then again essayed a romance of modern life, this time most successfully; and to-day his "Auf der Höhe," Stuttgart, 1875, and "Das Landhaus am Rhein," Stuttgart, 1868, are numbered among the best works of German prose fiction.

As Patriot.

Auerbach was a fervent German patriot, and took the deepest interest in the unification of Germany. During the Franco-Prussian war (1870–71) he was attached to the headquarters of the grand duke of Baden (a great admirer of the poet), and gave vent to his patriotic enthusiasm first in his "Wieder Unser! Gedenkblätter," Stuttgart, 1871, and again in his novel, "Waldfried; eine Familiengeschichte" (1874). He again resumed his "Dorfgeschichten" in "Nach Dreissig Jahren" (1876).

The productions of the last four years of Auerbach's life show some traces of increasing age. To this period belong "Landolin von Reutershofen," Berlin, 1878; "Der Forstmeister," 1879; "Brigitta," Stuttgart, 1880. To complete the list of his writings, the following may be added: "Deutsche Abende," a number of speeches and lectures, Stuttgart, 1866; "Zur Guten Stunde," illustrated by Menzel, Kaulbach, L. Richter, and Meyerheim, Berlin, 1872; and "Tausend Gedanken eines Collaborators," 1876.

Attitude Toward Judaism.

Auerbach's attitude toward Judaism receives ample illustration from many a character and passage in his stories. He strove to diffuse the kindliest sentiments among those of all creeds. His world-philosophy was a species of exalted patriotism, conjoined with a pure idealism; but it was destined to suffer a severe shock when anti-Semitism arose in Germany, and, despite the triumph of the German national idea, a wave of pessimism followed closely on the nation's victories. Private troubles may have contributed their share to his unrest: his second marriage had not brought him happiness. He found philosophy and life in ominous opposition, which, to one of his gentle mold, was a deep disappointment. For many years Auerbach, at least publicly, held somewhat aloof from Judaism, though always a Jew in heart and soul. But aroused in his last years, by Theodor Billroth's anti-Semitic work, "Warum Studiren Unsere Juden Medizin?" he openly took up the defense of his coreligionists.

When the blood-accusation was revived in Russia, Auerbach issued an appeal, "An Alle Männer der Wahrheit und Sittlichkeit" ("To All Men of Truth and Morality"), and he also addressed an open letter of thanks to Dr. von Döllinger, president of the Academy of Sciences in Munich, for his courageous speech in behalf of the Jews. In 1880 (July 14) he had the satisfaction of attending the unveiling of the Spinoza monument at The Hague. Auerbach, who had devoted his entire life to the glorification and realization of German ideals, lived to hear himself stigmatized by the Judæophobes as a foreigner, without share or interest in anything German. The anti-Semitic agitation, then centered in Berlin, and family cares broke down the health of the poet. In the fall of 1881 he went for his health to Cannstadt, but, becoming worse there, he removed to the milder climate of Cannes. There he died, just as extensive preparations were being made to celebrate his seventieth birthday.

His Letters.

The inner life of Berthold Auerbach is abundantly illustrated by his works; but it receives its fullest light and interpretation in his "Briefe an Seinen Vetter, Jacob Auerbach," issued by the latter (in accordance with the author's request) in 1884, with a preface by Spielhagen. These letters extend over a period of 52 years (1830–82), and contain in Auerbach's own words "all that was most important in the development of his general and individual life." They form a mirror, in which his every mood is reflected, and wherein his genuine nature is depicted with an artlessness and naturalness typical of the man. They form the best commentary upon his philosophy, politics, and religion; and throughout them all, two points are constantly expressed; viz., love for the Black Forest and enthusiasm for Israel.

Auerbach always possessed a love for dramatic art, and at his death there was found among his papers a series of studies relating to the stage. These were published under the title "Dramatische Eindrücke," Stuttgart, 1892.

A complete edition of Auerbach's works in 22 volumes was published at Stuttgart in 1863–64; the most recent edition is that of 1892–95 in 18 volumes. His posthumous works were acquired in 1897 by the Schwäbische Schillerverein, and deposited in the archives of Marbach. A biography of Berthold Auerbach is now (1902) being prepared by Arnold Bettelheim, of Vienna.

AUERBACH, ELIEZER BEN HAYYIM. See Auerbach, Isaac ben Ḥayyim.

AUERBACH, FELIX: German physicist; born Nov. 12, 1856, in Berlin. He was only twenty years old when he graduated from the university of his native city, and received the degree of Ph.D. upon the presentation of an excellent thesis, "Untersuchungen über die Natur des Vokalklanges," which appeared in Poggendorff's "Annalen der Physik und Chemie" for 1876. Continuing his studies at the University of Berlin until 1879, he was in that year appointed assistant in the Physical Institute of the University of Breslau. In 1890 Auerbach was appointed assistant professor of physics in Jena University, which position he continues to occupy.

Among Auerbach's scientific contributions is a treatise on hydrodynamics, "Die Theoretische Hydrodynamik. Nach dem Gange der Entwickelungen in der Neuesten Zeit in Kürze Dargestellt," Brunswick, 1881, which received the prize of the Reale Istituto Veneto di Scienze, Lettere ed Arti, and was subsequently translated into Italian (Milan, 1882). Auerbach is also the author of numerous papers of a more technical nature in the "Archiv für Physiologie," in Poggendorff's "Annalen der Physik und Chemie," in the "Nachrichten der Königlichen Gesellschaft der Wissenschaften und der Georg-August Universität zu Göttingen," etc. Short notices of his scientific contributions may be found in the annual "Die Fortschritte der Physik," G. Reimer, Berlin.

AUERBACH, ḤAYYIM B. ISAAC: Rabbi at Lencziza, Russia, and author; of the first half of the nineteenth century. He was the contemporary and friend of R. Akiba Eger of Posen and of R. Solomon Posner of Warsaw. He wrote "Dibre Mishpaṭ" (Words of Judgment), published at Krotoschin, 1835—a halakic work, with additions by his sons Menaḥem and Isaac. Compare Auerbach, Isaac b. Ḥayyim.

AUERBACH, ISAAC B. ḤAYYIM: Polish rabbi; lived in the first half of the nineteenth century; was first rabbi at Dobria, near Kalisz, then at Plock; later he succeeded his father, Ḥayyim Auerbach, as rabbi of Lencziza, government of Warsaw, Poland. He wrote "Dibre Ḥayyim" (Words of Life), Breslau, 1852, a pilpulistic disquisition on the Shulḥan 'Aruk, and on other rabbinical codes ("poskim"). His work includes a pilpulistic treatise, "Mayim Ḥayyim" (Living Waters), by his father, Ḥayyim Auerbach, and additions and notes by the author's brother Eliezer.

AUERBACH, ISAAC (איזיק) B. ISAIAH (also known as **Reis**): Grammarian, and exponent of Rashi; flourished toward the beginning of the eighteenth century at Fürth, Amsterdam, and Frankfort-on-the-Main. The works of Auerbach, which are enumerated below, are particularly interesting because of the history of their origin, which curiously illuminates the educational condition of the German Jews of the period. Auerbach, who, like all Jewish scholars of his time, devoted himself exclusively to the study of the Talmud, relates that, as regards certain passages, Rashi's commentary on the Bible was to him a closed book, because even the simplest elements of Hebrew grammar were unknown to him.

The scholars of Fürth, however, were not only incapable of expounding the difficult passages in Rashi, but ridiculed Auerbach's peculiar taste for Hebrew philology. He thereupon left Fürth and went to Amsterdam, where for ten years he studied Hebrew grammar with Samuel Posen. As the fruit of his labors he published (Wilmersdorf, 1718) "Girsa de-Yanuḳa" (The Boy's Study), an elementary grammar with paradigms in Hebrew and Judæo-German. This—one of the first elementary Hebrew grammars written by a Jew—met with such success, particularly in Frankfort, where Auerbach had meanwhile settled, that the author soon afterward published his second Judæo-German grammar (Fürth, 1728), entitled "Shuta de-Yanuḳa" (The Boy's Talk). The Hebrew and German elementary book of Baruch (Bendet) b. Michael Moses Meseritz (Altona, 1808; Breslau, 1814), entitled "Girsa de-Yanuḳta" (The Study of Childhood), is based on excerpts from these two works.

Auerbach had not forgotten that he had been first stimulated to the study of grammar by the works of Rashi; and he now published his comments and explanations on Rashi's commentary on the Pentateuch (Sulzbach, 1730; Fürth, 1762), under the title "Beer Reḥobot" (Well of Enlargement); also reissued, after the death of the author, by his son Aaron and extended by him to the Five Rolls. This book may be ranked among the best supercommentaries that have been written on Rashi's Bible commentary, and has proved of great benefit both to teachers and to pupils. Auerbach also translated into Judæo-German the "Beḥinat 'Olam" of Jedidiah b. Abraham Bedersi, which, under the title "Zaphnath-paaneah" (Gen. xli. 45, "revealer of secrets"; LXX, "savior of the world"), was first published at Sulzbach in 1743, and has since been frequently reprinted. Appended to this work is Auerbach's Judæo-German translation of Bedersi's "Baḳḳashat ha-Memin."

Auerbach's father was a martyr; but the occasion on which he met death is not known.

L. G.

AUERBACH, ISAAC LEVIN: A German preacher, educator, and author; born at Inowraclaw, Prussia, March 21, 1791; died at Dessau July 5, 1853. He was the son of Levin Isaac Auerbach, rabbi of Inowraclaw, and brother of Baruch Auerbach, the well-known founder of the Jewish Orphan Asylum in Berlin. Isaac belonged to that small band of Jewish young men in Berlin who, in the first quarter of the nineteenth century, paved the way for reforms in Judaism. After receiving an education in Bible and Talmud from his father and at Lissa, he went to Berlin, where he devoted himself to the study of languages and science. His attainments and abilities must have been considerable, for he was appointed preacher at the Jacobsen temple, in which also Kley, Günsburg, and Zunz delivered their German sermons. His next position was on the teaching staff of the Jewish girls' school of Berlin, and finally he was called to the temple of Leipsic, where he officiated for more than twenty-five years.

Auerbach's activities were chiefly directed toward a reform of the divine service. He considered it first an exigency of changed conditions; secondly, the most potent factor in the improvement of the whole religious and ethical life. Likewise he pointed out the necessity of establishing schools, and pleaded for a spirit of toleration in all religious and political matters. These ideas pervade his works and sermons, of which the following were published: (1) "Sind die Israeliten Verpflichtet Ihre Gebete Durchaus in Hebräischer Sprache zu Verrichten?" Berlin, 1818—arguing on rabbinical grounds for the introduction of the German language into the service; (2) "Die Wichtigste Angelegenheiten Israels," Leipsic, 1828—containing nine sermons; (3) "Die Aufnahme Israels in die Grosse Gemeinschaft der Nationen," Leipsic, 1833; (4) "Israels Jüngste Heimsuchung," Leipsic, 1840—on the Damascus affair; (5) "Das Verständniss der Zeit," Leipsic, 1845—on the reform tendencies in Judaism.

S. M. B.

AUERBACH, JACOB: Educator and author; born at Emmendingen, Baden, Nov. 14, 1810; died Oct. 31, 1887. He received his early education in Carlsruhe, where, in the autumn of 1827, he met his cousin and, later, brother-in-law, Berthold Auerbach, the famous novelist, with whom he formed ties of close and lasting friendship. When, on account of straitened circumstances, Jacob was compelled to abandon his studies at the University of Heidelberg, Berthold came to his assistance. In Wiesbaden, where the young scholar was called to occupy the position of a religious teacher after his graduation from the university, he became one of the most intimate friends and enthusiastic followers of Abraham Geiger. Called to Frankfort-on-the-Main in 1842, his time was occupied for nearly forty years with his duties as religious teacher in the Jewish community and (after 1848) at the gymnasium, and with occasional sermons at the "Andachtssaal." He was pensioned by the government in 1879; and, in recognition of his services at the Frankfort Gymnasium, he was decorated with the Order of the Red Eagle.

Among Auerbach's contributions to Jewish history and literature are his essay on "Lessing and Mendelssohn," 1867, and a "History of the Jewish Community of Vienna from 1784." His most valuable work, however, was the publication of the letters received by him from Berthold Auerbach, covering the period from the time of the separation of the two friends at Carlsruhe in April, 1830, to the death of the novelist, Feb. 8, 1883. These letters, which appeared in two volumes under the title "Berthold Auerbach: Briefe an Seinen Freund Jacob Auerbach," Frankfort-on-the-Main, 1884, and in which the whole character and individuality of Berthold Auerbach were unconsciously revealed, form an excellent autobiography of the writer.

Jacob was also the author of several educational works and of the "Schul- und Hausbibel," 1858, which had a wide circulation in Jewish communities in Germany.

D. A. R.

AUERBACH, LEOPOLD: German physician and biologist; born at Breslau April 27, 1828; died there Sept. 30, 1897. He studied in Breslau, Leipsic, and Berlin, receiving his doctorate in 1849. The following year he began the practise of medicine in Breslau, and at the same time devoted himself, under the direction of Purkinje, to the study of histology and neuropathology. In 1863 he became docent at Breslau University, and remained in that position nine years, when he was promoted to the rank of assistant professor of general biology and histology, which he held for a quarter of a century.

His chief contribution to science is in the domain of cellular biology and histology, in which he attained considerable eminence. The results of his weighty studies on the cell are embodied in the "Organologische Studien" (parts i. and ii., Breslau, 1874), which treats of the structure, chemical constitution, and life-history of the cell-nucleus, and of the early stages of development of the fertilized ovum. Auerbach belongs to the class of modern biologists whose investigations not only paved the way toward the elucidation of important problems in biology, but raised wholly new questions regarding the mechanism of the development and rôle of the cell in hereditary transmission. His researches have materially advanced the knowledge of cell-life and cell-structure. According to Oscar Hertwig, Auerbach established satisfactorily that during cell-division the nucleus does not become dissolved, but becomes metamorphosed. Auerbach also made the important discovery that during conjugation the nuclei of oval eggs rotate so that the axis of the spindle coincides with the longest diameter of the egg. To his cytological researches must be added his investigations on the lymphatics of the intestines as well as his discovery of the cellular structure of the capillaries and his work on the physiology of muscle. Besides his "Organologische Studien," which he published separately, Auerbach contributed a number of papers to medical and biological journals and to the transactions of several scientific societies. During half a century of active scientific work he published: "De Irritamentis Nervorum, Studia Critica," Berolini, 1849; "Ueber Psychische Thätigkeiten des Rückenmarks," in Günsberg's "Zeitschrift für Medicin," 1853, iv.; "Ueber die Erscheinung bei Oertlicher Muskelreizung," in "Abhandlungen der Schlesischen Gesellschaft für Vaterländische Cultur," 1861, pp. 291, 326; "Ueber Perkussion des Muskels," in "Zeitschrift für Rationelle Medicin," 1862; "Bau der Blut- und Lymph-Capillaren," in "Centralblatt für die Medicinische Wissenschaft," 1865; "Lymphgefässe des Darmes," in Virchow's "Archiv," 1865, xxxiii.; "Ueber einen Plexus Mesentericus," Breslau, 1862; "De Ventriculo Carnoso Avium," 31 pp., Breslau, 1863; "Wahre Muskelhypertrophie," in Virchow's "Archiv," 1871; "Ueber den Einfluss Erhöhter Temperatur auf die Nervösen Central Organe," 28 pp., Heidelberg, 1880.

Auerbach is the author also of several scientific monographs which appeared in the "Zeitschrift für Wissenschaftliche Zoologie," in Reichert-Du Bois' "Archiv"; in the "Verhandlungen der Berliner Medicinischen Gesellschaft"; in the "Verhandlungen der Preussischen Akademie der Wissenschaften zu Berlin"; and in Ferdinand Cohn's "Beiträge zur Biologie der Pflanzen."

AUERBACH (JUDAH), LOEB B. ISRAEL: Galician Talmudist of the second half of the eighteenth century. He is the author of "Meḥoḳeḳ Yehudah" (The Lawgiver of Judah), Lemberg, 1792, a commentary on those sections of the Oraḥ Ḥayyim of Joseph Caro's Shulḥan 'Aruk which treat of the regulations for Passover. The work consists of two distinct parts, entitled respectively (1) "Ḥuḳḳe 'Olam" (Eternal Laws), which gives the halakic decisions briefly, and (2) "Ḥuḳḳe Da'at" (Laws of Knowledge), which gives discussions of the preceding.

AUERBACH, MEÏR B. ISAAC: Talmudist and chief rabbi of the Ashkenazim in Jerusalem; born Feb. 10, 1815, at Dobria near Kalish, Russian Poland; died May 8, 1878, at Jerusalem. He was rabbi at Kalish when, in 1860, actuated by his love for the Holy Land, he removed to Jerusalem, where he organized the congregation and yeshibah Ohel Jacob, and subsequently became chief rabbi of the Ashkenazim. He also organized an independent board of Sheḥiṭah for the Ashkenazim. This action was opposed by the "ḥakam bashi," David Ḥazan, and his Sephardic congregation, who controlled the Sheḥiṭah. They were upheld by the Mussulmans, who favored the Jewish mode of killing animals, which corresponded with their religious belief and custom, and who would not eat meat slaughtered by Christians or by Ashkenazic Jews, the latter not being recognized by them as sons of Abraham. This greatly hampered the undertaking of the Ashkenazim, as none but Christians would buy the surplus of the Sheḥiṭah, and, being excluded from the Mussulmans' trade, the Ashkenazim found the Sheḥiṭah quite expensive. Auerbach appealed to the ḥakam bashi to intercede on behalf of the Ashkenazim, and requested him to obtain from the Turkish government the recognition of the Ashkenazic Jews as sons of Abraham. The ḥakam bashi hesitated, and Auerbach threatened him with excommunication for refusing to perform his plain duty and to do justice to the Ashkenazim. At last in 1864 the ḥakam bashi was not only obliged to remove his objection, but actually compelled to establish the fact before the Ottoman authorities that as regards their religion there was no difference between the Sephardim and Ashkenazim.

Auerbach and Rabbi Samuel Salant in 1866 organized the Central Committee known as the "Wa'ad ha-Kelali" in Jerusalem, as an agency for the distribution of funds from the charity-boxes all over the world for the Ashkenazic poor in Palestine, the income from which from the United States alone amounts to about $20,000 per annum. In 1875, on the occasion of the visit of Sir Moses Montefiore to the Holy Land, Auerbach protested in an open letter addressed to Montefiore (in Hebrew and English, London, 1875) against the charges of unfair manipulation of the gifts sent to the poor in Palestine.

Auerbach is the author of "Imre Binah" (Words of Understanding), novellæ on Oraḥ Ḥayyim and Yoreh De'ah, and responsa on Ḥoshen Mishpaṭ, Jerusalem, 1871–76; of annotations to his father's "Dibre Ḥayyim," and to Loeb Guenzburg's "Ture Eben." He left many manuscripts on Talmudical subjects, which are still unpublished. Auerbach was known as a great pilpulist.

A "bet ha-midrash" has been founded in Jerusalem to perpetuate Auerbach's memory.

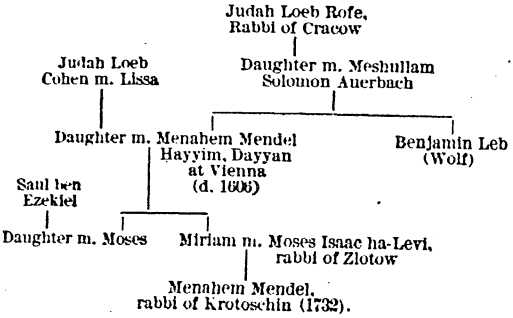
AUERBACH, MENAHEM MENDEL BEN MESHULLAM SOLOMON: Austrian rabbi, banker, and commentator; born in Vienna at the beginning of the seventeenth century; died at Krotoschin, Posen, July 8, 1689. He was descended from the well-known Auerbach-Fischhof family, both his father, Meshullam Solomon, and his maternal grandfather, Rabbi Judah Loeb Rofe, being members of the Vienna Ghetto.

Auerbach received a Talmudic education, and was a pupil of Joel Sirkes (ב"ח), of Joshua ben Joseph of Cracow, and of Menahem Mendel Krochmal of Nikolsburg. He married the daughter of Judah Loeb Cohn of Cracow (died 1645), and then settled in Cracow with his brother Ḥayyim. For many years Auerbach held the position of dayyan of the Cracow community, being at the same time engaged in the banking business with his brother. Later, both returned to Vienna, where Menahem remained after his brother's death in 1666, up to the expulsion of the Jews from Vienna by the emperor Leopold I. in 1670. Benjamin Leb (Wolf) Fischhof, probably the youngest of the brothers, was also expelled at the same time, and became rabbi in Nikolsburg.

After the expulsion Auerbach became rabbi at Rausnitz, Moravia, and in 1673 of Krotoschin, where for sixteen years and until his death he occupied the double position of rabbi and parnass of the district of Posen. In Krotoschin he established a yeshibah, which soon became known throughout Poland, and to which he devoted much of his time and energy (Eliakim ben Meïr, "Responsa," § 61). His son Moses was parnas of the district of Posen, one of the leaders of the Synod of Great Poland, and president of the Assembly of Kobylin in 1733. The following pedigree exhibits the relationship of this branch of the Auerbach family:



Judah Loeb Rofe,
Rabbi of Cracow
Judah Loeb Cohen m. Lissa
Daughter m. Meshullam Solomon Auerbach
Daughter m. Menahem Mendel Hayyim, Dayyan at Vienna (d. 1606)
Benjamin Leb (Wolf)
Saul ben Ezekiel
Daughter m. Moses
Miriam m. Moses Isaac ha-Levi, rabbi of Zlotow
Menahem Mendel, rabbi of Krotoschin (1732).

Auerbach was the author of "'Aṭeret Zekenim" (The Crown of Old Men; compare Prov. xvii. 6), a commentary on Oraḥ Ḥayyim, a division of the Shulḥan 'Aruk, printed at Dyhernfurth, 1720, and republished in most editions of that work. He also left in manuscript "'Akeret ha-Bayit" (The Barren One of the House; compare Ps. cxiii. 9), a commentary on another division of the Shulḥan 'Aruk; namely, Ḥoshen Mishpaṭ.

AUERBACH, MESHULLAM SOLOMON. See Auerbach, Menahem Mendel, and Auerbach Family.

AUERBACH, PEREZ B. MENAHEM NAHUM: Polish Talmudist; flourished in the first half of the eighteenth century. He was the author of the work, "Peër Halakah" (Ornament of the Halakah), Zolkiev, 1738, which contains novellæ to the Talmud, to the commentaries on the Talmud, and to Maimonides' Yad ha-Ḥazaḳah. The section in the treatise Pesaḥim (14*a*, 21*a*), known as the "section of R. Ḥanina, the chief priest," is treated in a particularly exhaustive manner.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 455; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 64.

D. L. G.

AUERBACH, PHINEAS BEN SIMON WOLF: Rabbi and Talmudist; lived at the end of the seventeenth and beginning of the eighteenth century. He was chief of the court of justice at Cracow ("bet din"), but on account of the persecutions of the Jews in Poland he was forced to leave his native country (1714), settling later at Frankfort-on-the-Main, where he married the daughter of the rabbi, Joseph Samuel. He is the author of "Halakah Berurah" (The Clear Law), a commentary on the Shulḥan 'Aruk, Oraḥ Ḥayyim (Wilmersdorf, 1717). This work contains, mainly, solutions of questions on which the Aḥaronim had widely divergent opinions.

AUERBACH, SAMUEL B. DAVID TEBELE: A cabalistic commentator on the Bible; flourished in the seventeenth century. His father, David, died as a martyr during the persecution of the Jews in Poland, and he himself narrowly escaped a similar fate, first at Lublin, Oct. 16, 1655, and then at Reisen, near Lissa. Auerbach was the author of a work entitled "Ḥesed Shemo El" (Mercy, Its Name Is God, the letters of "Shemo El" corresponding with those of "Samuel," the author's name). This work, published at Amsterdam in 1699, contains Midrashic and cabalistic explanations of Genesis, of no value whatever. However, of considerable value to the historian, as records of an eye-witness, are the numerous scattered references to the persecution of the Jews of Poland during the years 1648 and 1655.

Bibliography: Gurland, *Le-Korot ha-Gezerot*, v. 75; Steinschneider, *Cat. Bodl.* col. 2409; Zunz, *Literaturgesch.* 439.

K. L. G.

AUERBACH, SIMEON. See Auerbach Family.

AUERBACH, SIMON (ZE'EB) WOLF B. DAVID TEBELE: Talmudist and rabbi of several large communities; born at Posen about 1550; died Nov. 12, 1631, at Prague. His father was either rabbi or, at least, an eminent Talmudic authority in Posen; and his father-in-law was Solomon b. Jehiel Luria, whom he succeeded, after the latter's death, in the rabbinate of Lublin (1578-84). Before this, however, he had officiated as rabbi of the communities of Turbin and Lubomil, Poland. At Lublin he had a bitter quarrel with the celebrated Talmudist of that town, Meïr b. Gedaliah (Maharam). The latter apparently had at this time no official appointment at Lublin, but was the leader of one of the largest yeshibot; and by virtue of his great Talmudic authority, he had it in his power to make it very unpleasant for the rabbi of his community. Although the two men had been friends before Auerbach entered upon his office (compare MaHaRam, Responsum No. 27), this relation was disturbed when Auerbach, as rabbi of the community, became the superior of MaHaRam. In addition there was an ancient feud between Luria and Maharam's father, which passed over to their sons.

Auerbach left Lublin, in order to accept the rabbinate of Przemysl, retiring after a few years to Posen, as he had private means. In 1621 he was appointed chief rabbi of his native place.

Auerbach's great reputation is evident from the fact that the community of Posen set aside in his favor the statutory law under which no native of the city could be appointed chief rabbi. In Posen, also, Auerbach's position was not entirely pleasant; for, while he was chief rabbi, Benjamin of Morawczyk was the "rosh yeshibah" (head of the college), and difficulties frequently arose between the two. Hence Auerbach, who had refused a call to Vienna as rabbi in 1628, accepted that position in the following year. He did not stay there long, however, being appointed chief rabbi of Prague, and district rabbi of Bohemia. While in office at Prague he had a quarrel with his predecessor, Lippmann Heller, who had been removed from office by the government.

Auerbach wrote several works, none of which has been preserved, nor are any of the names of his many pupils known. According to the testimony of his contemporaries, Auerbach was not only a renowned Talmudist, as is evidenced by the positions he held in the largest community of Poland and of Austria, but a man of inflexible and fearless character, as his controversies with many of his colleagues have demonstrated.

Bibliography: Bloch, *Simon Wolf Auerbach, Oberrabbiner von Grosspolen*, in *Gedenkbuch zur Erinnerung an David Kaufmann*, Breslau, 1900; Lewinstein, in *Ha-Goren*, i. 41–43 (many of whose statements are inaccurate; *e.g.*, there was in Amsterdam no Solomon Aboab, who is alleged to have been the umpire in a controversy between Auerbach and Maharam); Lieben, *Gal-Ed*, pp. 75, 76 (epitaph), German part, p. 62; Nissenbaum, *Le-Korot ha-Yehudim be-Lublin*, pp. 23, 24, Lublin, 1899 (see also the remarks therein of Harkavy, Buber, and Lewinstein; it is doubtful whether the period given by Nissenbaum for Auerbach's activity at Lublin is correct).

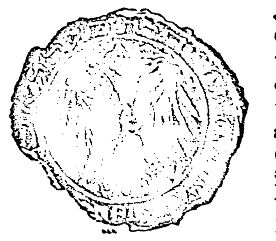
K. L. G.

AUERBACH, SOLOMON HEYMANN: Hebrew scholar; born at Posen at the end of the eighteenth century; died there in 1836. He translated Habakkuk into German with explanatory notes (Breslau, 1821). He also collaborated in the translation of the Bible undertaken by Zunz, for which he furnished the translation of Ecclesiastes, on which book he wrote also a Hebrew commentary (Breslau, 1837).

Bibliography: Steinschneider, *Cat. Bodl.* col. 763; Winter and Wünsche, *Jüdische Literatur*, iii. 745.

L. G. I. Br.

AUGSBURG: Capital of the districts of Swabia and Neuburg, Bavaria. According to tradition, it is one of the oldest Jewish communities in Germany. The first documentary mention of the city is in 1259; but individual Jews of Augsburg are spoken of earlier. Of the six houses belonging to the church-chapter, and mortgaged in 1259 by Bishop Hartmann of Augsburg, one is described as "a Jewish house."



Seal of the Jews of Augsburg, 1298.
(From "Literaturblatt des Orients.")

In 1276 the congregation possessed a synagogue and a cemetery. The chief occupation of the Jews of Augsburg was money-lending; trade in meat and wine was also permitted with certain limitations. In 1316 the Jews of Augsburg must have been affluent, for the city of Munich mortgaged its revenues to them for six years. Thirteen years later the Jews (that is, the revenues from them) were pledged by the emperor to the counts of Oettingen, and by the latter to the family of Hoheneck. In 1364 the council of Augsburg acquired possession of them.

Affluence of Jews.

The city owed large sums to the Jews, and to liquidate them instituted, in 1341, forced loans from the citizens. The bishop's debts to the Jews were canceled in part by Charles IV. When the Black Death raged in 1348, and the Jews in Augsburg were massacred, the emperor pardoned the burghers for the crime. In 1349 the bishop again received Jews into the city, but six years later transferred to the city council both the duty of protecting them and the privilege of taxing them. The emperor demanded 10,000 gulden (1 gulden = 41½ cents) from the Jews of Augsburg in 1373; and the council vainly sought to protect them from this amercement. In 1384 they had to pay to the council 22,000 gulden; and in 1385 King Wenzel canceled all debts owing to the Jews. King Sigismund, in 1429, pledged them to Count von Pappenheim, to whom they had to pay 200 gulden yearly. The council bought back this right from Pappenheim in 1439. A year later 300 Jews were expelled from the city, and the gravestones in their cemetery were used in the construction of a city hall. In 1456 Frederick III. demanded that the city deliver to him "all his privileges"; he was appeased by the payment of 13,000 gulden, for which the city retained the right to admit or to expel Jews. From that time no Jews were permitted to dwell in Augsburg. In 1540 the council decided that Jews might stay no longer than a day and a night in the town; and they had to pay the officer who accompanied them during their stay one "sechser" for the service. In 1601 it was forbidden to borrow money of Jews.

During the Thirty Years' war some Jews came to Augsburg. These were officially plundered from time to time under threat of being expelled; in 1649 they were again driven out; and in 1680 the former edicts of expulsion were revived and intensified. While the War of the Spanish Succession raged, a few Jews again ventured into the city; and in 1704 there were 62 families resident there. In 1718 even their temporary sojourn was again forbidden. From 1741 to 1745, Jews were again permitted to dwell in Augsburg on account of the War of the Austrian Succession. In 1742 they were 36 families; but they were driven out again in 1745. The council made an agreement with the Jews of the surrounding villages in 1751 to the effect that for the yearly payment of 1,100 gulden they might have free admission to the city for trading-purposes. In the years following, the council endeavored to restrict their commercial undertakings; but in 1791 edicts were issued, protecting the Jews against ill-treatment and pillage. They were again in the city during the French war of 1796.

The Jews Persecuted.

Of interest is the medieval seal of the congregation, with its inscription, partly in Latin and partly in Hebrew, surrounding a two-headed eagle, and with a conical hat above all ("Literaturblatt des Orients," 1842, col. 73). In "Monatsschrift," 1861, (p. 280) mention is made of a "Jewish congregational dance-house" in Augsburg (1290). Numerous Hebrew books, distinguished for their beautiful typography, were printed there between the years 1514 and 1543.

Ancient Congregational Dance-House.

Of the various rabbis of the congregation of Augsburg mention must be made of the venerable Senior, who in 1348, an eighty-four-year-old sage, was assassinated while poring over his books. Elijah of Augsburg wrote a commentary upon Moses of Coucy's "Sefer Miẓwot Gadol" (Semag), which exists in manuscript in the Vatican library; Jacob Weil, son of Judah, one of the most distinguished rabbis in Germany in the fifteenth century, was also of Augsburg. The cemetery adjacent to the town served as the burial-place for five communities of Swabia. The new congregation has been in existence since 1861. In 1862 Dr. Hirschfeld was appointed rabbi; and he was succeeded by Heinrich Gross. The congregation now (1900) numbers 1,156 members.

Early Hebrew Printing.

Hebrew typography is coeval with the study of the Hebrew language in Germany. In 1514 Erhard Oeglin printed the Decalogue and several parts of the New Testament in Boeschenstein's "Elementale Introductorium in Hebræas Literas," which is embellished with an elaborate border, falsely ascribed to Hans Holbein. Actual printing in Hebrew was practised by the traveling printer Ḥayyim Schwarz, who in 1533 completed the Megillot and Rashi's Commentary on the Pentateuch as the first printed production in Augsburg. On Jan. 19, 1534, the Passover Haggadah was completed; and in the same year there was published at Augsburg by an anonymous author a guide to correspondence which became very popular during the seventeenth century. Previous to 1536 there successively appeared a daily prayer-book ("tefillah"), a festival prayer-book ("maḥzor"), and a penitential prayer-book ("seliḥot"), all according to the German ritual.

With his son Isaac and his son-in-law Josef b. Yakar, Schwarz in 1540 published the "Turim" of Jacob b. Asher, and "Abkat Rokel" (The Merchant's Spicebox), a work ascribed to one Makir. These were followed by the Book of Kings (1543), and the Book of Samuel (1544), both in Judæo-German rime. All of these typographical productions are exceedingly beautiful, and may be classed among the rarest specimens of the printer's art. In 1544 Paulus Æmilius, later professor at Ingolstadt, edited at Augsburg a Judæo-German Pentateuch.

G.—J. A. F.

AUGURY: Originally, prophesying by the flight of birds; but later the term was applied to all forms of foretelling (*augur = avi-gur*, *οἰωνὸς*, *οἰωνισταί*, etc.).

Augury was first systematized by the Chaldeans. The Greeks were addicted to it; and among the Romans no important action of state was undertaken without the advice of the augurs. In fact, the belief in augury has existed at all times, among the uncivilized as well as the most civilized nations, to the present day, the wish to know the future continually giving rise to some art of peering into it.

Kinds of Augury.

The various species of Augury, however, depend on the conditions of external nature, race peculiarities, and historical influences. The future was foretold by the aspect of the heavens (Astrology); by dreams, lots, oracles, and such things; or spirits were invoked (Necromancy), and the Teraphim and Urim and Thummim were questioned. As these forms of prognostication, as well as the pagan method, Divination, are treated under their several headings, this article will be devoted to Augury in the strict sense of the word, including, however, all predictions dependent on chance happenings. All signs and intimations coming under the concepts "niḥush" (whisper) and "siman" (omen) belong to Jewish Augury, the history of which may be divided into Biblical, Talmudic, and medieval periods.

Flight of Birds.

Hydromancy, Rhabdomancy, and Belomancy.

——**In Bible Times:** The observation of the flight of birds for the purpose of prophesying, or as a prognostication, is not expressly mentioned in the Bible. That it was not unknown, however, is shown in Eccl. x. 20, "for a bird of the air shall carry the voice, and that which hath wings shall tell the matter." This knowledge may also be assumed in view of the fact that among the Arabs the raven was a bird of omen. The Greek version several times translates "naḥash" by *οἰωνὸς*; but this word, like the Latin "augurium," means any kind of prognostication, and not merely that by the flight or the cry of birds. It is nevertheless a curious fact that tradition also originally applied the prognostication designated by naḥash to the omens derived from animals. Joseph practised hydromancy. He divined (naḥash) the future by pouring water into a cup, throwing little pieces of gold or jewels into the fluid, observing the figures that were formed, and predicting accordingly (Gen. xliv. 5, according to Dillman's commentary). Laban found out in a similar way (naḥash) that God blessed him on account of Jacob (Gen. xxx. 27). King Manasseh also practised this species of divination (II Kings xxi. 6; II Chron. xxxiii. 6). Another method consisted in observing the signs from staves planted upright or flung on the ground ("Cyril of Alex." in Winer, "B. R." ii. 673), a method that is not identical with the arrow oracle (Hosea iv. 12; perhaps Ezek. viii. 17; compare Num. xvii. 16 *et seq.*). Ezekiel (xxi. 26 [A. V. 21]) speaks of the arrow oracle of the king of Babylon; but the prophet Elisha also directs the Israelite king Joash to shoot two arrows through the window in order to find out whether Joash will vanquish the Aramaic king (II Kings xiii. 14-19).

Accidental occurrences (*ἄψυχα*) are of great importance in divination, and may be taken as omens (*σημεῖα* = "siman"). Eliezer, Abraham's servant, said: "I stand at the well . . . and the damsel to whom I shall say, Let down thy pitcher, I pray thee, that I

Omens, Accidental and Others.

may drink; and she shall say, Drink, and I will give thy camels drink also, let the same be the wife appointed by God for Isaac" (Gen. xxiv. 12-19). Jonathan, when he is about to attack the Philistines, says: "Behold, we will pass over unto these men, and we will discover ourselves unto them. If they say thus unto us, Tarry until we come to you; then we will stand still in our place, and will not go up unto them. But if they say thus, Come up unto us; then we will go up: for the Lord hath delivered them into our hand; and this shall be a sign unto us" (I Sam. xiv. 8-11). The prophet Isaiah even gives to the pious king Hezekiah a sign, as an indication that he will get well (II Kings xx. 9). The Lord commands Gideon to choose those warriors who lap the water with their tongues like a dog, but to reject those who get down on their knees to drink (Judges vii. 5). The diviners advised the Philistines to send back the Ark of the Lord in order that the deaths among them might cease:

> "Now therefore make a new cart, and take two milch kine, on which there hath come no yoke, and tie the kine to the cart, and bring their calves home from them. And take the ark of the Lord, and lay it upon the cart; and put the jewels of gold, which ye return him for a trespass offering, in a coffer by the side thereof; and send it away, that it may go. And see, if it goeth up by the way of his own coast to Beth-shemesh, then he hath done us this great evil: but if not, then we shall know that it is not his hand that smote us: it was a chance that happened to us. . . . And the kine took the straight way to the way of Beth-shemesh, and went along the highway, lowing as they went, and turned not aside to the right hand or to the left" (I Sam. vi. 7-12).

King David listens to a sound in the tops of the trees when he asks God whether he shall go against the Philistines (II Sam. v. 24), a fact that reminds us of *φυλλομαντεία* and "siḥat dekalin" (compare below; also "elon me'onenim," Judges ix. 37; and Baudissin, "Studien zur Vergleichenden Semitischen Religionsgesch." ii. 194, note 4). The incident of Balaam, who attempted prognostication on a hill, refers perhaps to some divination of this kind, since he too uses the characteristic word "naḥash" (Num. xxiii. 23). It is highly improbable that the Hebrews prognosticated from the drifting of the clouds, as has been assumed from מעונן (derived from ענן, cloud); nor was any attention paid to the lightning flash, which belonged to Augury among the Romans.

The Law strictly and repeatedly forbade all Augury (Lev. xix. 26; Deut. xviii. 10, etc.). The interpretation of signs, however, as in the case of Eliezer and Jonathan, where nothing was done in the way of conjuration, was not considered to be Augury.

——**The Talmudic Period:** Augury is more frequently referred to in post-Biblical times, but it would be rash to assume therefore that it was more widely practised. As among the classical peoples of antiquity and among the Germans to-day, the arts of Augury proved effective only with the person who believed in them, and only such a person was injured by them (Yer. Shab. 8*d*; Bab. Ned. 32*a*; L. Blau, "Das Altjüdische Zauberwesen," p. 77, note 4). The prohibition in Lev. xix. 26 (לא תנחשו, "neither shall ye use enchantment") is referred by Sifra on that passage (ed. Weiss, p. 90) to divination by means of weasels, fowls, and stars, meaning the omens found in the flight and cries of birds and in similar signs; while Sifre, Deut. 171 takes it in a still more general sense, saying: "Who is a menaḥesh [enchanter]? He, for instance, who says: 'My bread fell out of my mouth'; or 'My staff out of my hand'; or 'A snake crept to my right'; 'A fox ran to my left and his tail crossed my path'; furthermore, he who says: 'Do not begin anything to-day, because it is the new moon'; or 'It is Friday'; or 'It is the Sabbath evening.'" In the parallel passage, Sanh. 65*b*, other evil omens are added; namely, if a man's son calls after him; if a raven croaks at him, or a deer gets in his way; and more explicitly, if one avoids being the first to pay the tax.

The belief in animal omens was widely spread among the Babylonians, who also divined by the behavior of fish, as was well known (Lenormant, "Die Magie und Wahrsagerei der Chaldäer," p. 473; Blau, *l.c.* pp. 45 *et seq.*; Pauly-Wissowa, "Real-Encyklopädie der Classischen Alterthumswissenschaft," iv. 1397, *ἰχθυομαντεία*). Snake and cloud omens were also known (Levy, "Chal. Wörterb." ii. 102*b*).

Flight and Cries of Birds.

Augury proper was known among the Jews, but was considered as a foreign Roman or Arabic art. Josephus narrates ("Ant." xviii. 6, § 7; xix. 8, § 2) that a bird (an owl) alighted on the tree against which Agrippa was leaning while a prisoner at Rome; whereupon a fellow prisoner, a German, prophesied that he would become king, but that if the bird appeared a second time, it would mean he would die. The third of the Sibylline Books (line 224) says about the Jews: "They do not consider the omens of flight as observed by the augurers." In the account of the martyrdom of Isaiah ("Ascensio Jesaiæ," ii. 5) it is stated that in the time of King Manasseh not only magic and other crimes increased, but also Augury by the flight of birds, which is denoted by "we-niḥesh" (II Kings xxi. 6). According to the Aristeas Letter (§§ 165 *et seq.*), the weasel is the symbol of the informer. This apparently has some connection with the *auspicium*.

Augury and astrology are "the wisdom of the East," mentioned in I Kings v. 10 (Pesiḳ. 33*b*, יודעים במזלות וערומים בטייר). By the "bird of the air" (Eccl. x. 20) is meant the raven, in Augury, says a Palestinian teacher of the Talmud of the third century (Lev. R. xxxii. 2; compare 'Aruk, *s.v.* טייר זה העורב בחכמת הטיירין; Blau, *l.c.* p. 48, note 2). The Arabic expression itself, as well as the mention of the raven, the bird of omen of the Arabs, proves that Arabic Augury is here referred to. When Rab 'Ilish was in prison a man who understood the language of the birds interpreted to him the cry of a raven as meaning "'Ilish" (flee!), "'Ilish" (flee!). Rab paying no attention—the raven being proverbially a liar—a dove addressed him, and when her cry was interpreted in the same way, he obeyed the warning and escaped, since the dove means Israel; that is, the dove is Israel's bird of omen (Giṭ. 45*a*, bottom). The place where the flight of birds was observed is also mentioned (טירונא; Targ. Yer. to Num. xxxi. 10; compare Sifre on the passage, and Levy, *l.c.* ii. 157*a*). With one exception the doves of Herod cried *Κύριε*, *Κύριε* (lord, lord!); and when this one was taken to task by the others, she cried *χείριε*; that is, "Herod was a slave"—whereupon she was killed by the followers of Herod. R. Kahana understood this conversation (Ḥul. 139*b*; 'Aruk, *s.v.* קר: Levy, *l.c.* ii. 324*a*).

The Romans also understood the language of the birds (Pauly-Wissowa, *l.c.* i., lxxvii. 51; lxxxvi. 29). Judah does not dare, even in a whisper, to advise the emperor Antoninus to proceed against the nobles of Rome; for the birds carry the voice onward ('Ab. Zarah 10*b*; compare Lenormant, *l.c.* p. 451). God is angry each day for one minute (Ps. xxx. 6) during the first three hours; that is the time when the comb of the cock turns white, or when not a single red stripe is to be found in his comb, and he stands on one leg. R. Joshua ben Levi, who wanted to seize this moment to curse a heretic who had offended him, tied a cock and watched him intently, and in doing so he involuntarily fell asleep (Ber. 7*a*; 'Ab. Zarah 4*b*; Sanh. 105*b*).

The Babylonians divined also by flies (Lenormant, *l.c.* p. 472). In this connection arose perhaps the saying that no fly alighted on the table of the prophet Elisha (see BEELZEBUB). The language of trees, which the ancient peoples, especially the Babylonians, are said to have understood, was probably known to the Babylonian Jews as early as the eighth century (Blau, *l.c.* p. 47; "Knistern des Lorbeers Glückbringend," in Pauly-Wissowa, *l.c.* i. 66, note 24). Thus Abraham learned from the sighing of the tamarisk-tree that his end was nigh (see ABRAHAM, TESTAMENT OF). Lev. xix. 26, לא תעוננו is translated by the Septuagint *κληδονίζεσθαι*; *i.e.*, to divine by sounds and noises (compare Grünbaum, in "Z. D. M. G." xxxi. 253 *et seq.*).

Prognostications.

To interrogate Chaldeans (Pes. 113*b*, etc.) or to practise divination in general is not permitted. He who abstains from so doing is admitted into a section of the heavens which even the ministering angels may not enter (Ned. 32*a*). But since desire often outbalances precept, a fundamental difference was made by setting up the rule: "There is no such thing as divination, but there are prognostications" (שאין נחש יש סימן, אעפ׳. Yer. Shab. 8*c*; Bacher, "Ag. Pal. Amor." ii. 25, note 5). The Romans also distinguished between greater and lesser divinations, calling the latter signs (*σημεῖα*, "signa," סימן; see Derenbourg-Saglio, "Dictionnaire des Antiquités Grecques et Romaines," ii. 293*b*, bottom). Such, for instance, are the signs of Eliezer (Gen. xxiv.), of Jonathan (I Sam. xiv.), and also Gen. xxxviii. 11, and xlii. 36; the last-named also leading to the conclusion that every sign had to be repeated three times. In consequence of this distinction even the most eminent amoraim made use of certain signs. Rab looked upon it as a favorable omen if the ship that ferried him came to meet him, but as a bad omen if it was not ready. Samuel opened his Bible for a chance intimation. Johanan made a boy recite a Bible verse with the same purpose. When in passing a school he heard a boy say "Samuel has died" (I Sam. xxv. 1), he took it as an omen and did not visit the amora of that name as he had intended to do. The expression "a house, a wife, and a child give signs" must mean that signs may be taken from them, Rashi to the contrary notwithstanding (Yer. Shab. 8*c*, bottom; Ḥul. 95*b*; Gen. R. lxxxv. 5, commentaries).

Boys were often used by diviners to peer into the future, being for that purpose bewitched by magic formulas (Pauly-Wissowa, *l.c.* iv. 1399). The Talmud says, curiously enough (B. B. 12*b*, where two cases are cited): "Since the destruction of the Temple, prophecy has been given into the hands of the insane and of children." The Jewish view is not far removed from the Greco-Roman one; namely, that the insane were possessed by demons. Bewitchment was strictly forbidden, as was generally the interrogation of demons, except by means of oil or eggs, to find a lost article; but "the princes of oil and of eggs lie" (Sanh. 101*a*; compare DEMONOLOGY and DIVINATION). This view of R. Johanan (died 279) explains that he often sought advice from boys with the formula, "Tell me thy verse!" meaning the verse which the boy had just learned, or which came into his mind at that moment (Ḥag. 15*a*; Meg. 28*b*; Giṭ. 57*a*, 68*a*, etc.; Horowitz, "Sammlung Kleiner Midrashim," p. 69, "mah pasukekem"). The same teacher of the Talmud says that if any one happens to remember a verse of the Bible early in the morning, it is a prophecy in miniature (Ber. 57*b*), the prophetic element being in such cases the accidental. He looked upon a voice which he heard accidentally behind him as being a divination, and followed it; for it is written (Isa. xxx. 21), "Thine ears shall hear a word behind thee, saying, This is the way, walk ye in it." But, says the Talmud, the voice must be an unusual one, such as a man's voice in a city, or a woman's voice in a desert (Yer. Shab. 8*c*; Bab. Meg. 32*a*). Other teachers of the Talmud also paid attention to this kind of voice, which was called BAT ḲOL. Two persons intending to visit a sick teacher said, "We will be guided by the Bat Ḳol," whereupon they heard one woman say to another, "The light has gone out." Then they said, "It shall not go out, and may the light of Israel never be extinguished" (*ib.*). As among other peoples, the Jews also considered the last words of the dying as divinations. Thus Eliezer ben Hyrkanus and Samuel ha-Ḳaṭan prophesied the martyrdom of several scholars (Sanh. 68*a* and 11*a*; Pauly-Wissowa, *l.c.* i. 92, note 11).

Other Omens.

Some other omens must be mentioned, called "siman," although not all strictly belonging to the subject in hand. It is a bad sign for any person to make a mistake in his prayers, but a good sign to know them fluently (Mishnah Ber. v., end; compare Talmud 34*b*, bottom, and 24*b*, top). It is a bad sign for the remainder of the year if it rains after Nisan or at the Sukkot festival; or if the wine does not turn out well; or if the Feast of Weeks fall on the fifth of the month. If there is fine weather on the day of that feast it is a good omen for the world (Mishnah Ta'anit 12*a*, 2*a*; Ab. R. N. i. 4; Tosef., 'Ar. i. 9; see Ab. R. N. ii. 33 and Sifre i. 112, and in general Levy, "Neuhebr. Wörterb." and Krauss, "Griechische und Lateinische Lehnwörter," under the word סימן). It is a good sign for sick people to sneeze (Blau, *l.c.* p. 163; Tylor, *l.c.* i. 98-100, German ed.). Generally much attention was paid to omens (סימנא מלתא היא, an omen is a thing to be considered). In order to find out if one will live the year through, one must take a candle during the ten days between New-year and the Day of Atonement, and light it in a house where there is no draft; if the candle burn to the socket, that one will live the year through. In order to know if some matter of business will succeed, one must feed a hen; if she grow fat and plump, the matter in hand will succeed. In order to know if one will return home from a journey, one must go into a dark room, and if one see there the "shadow of the shadow," one will return. The Talmud discourages, however, recourse to these oracles given by R. Ami, as a person becomes low-spirited if they are unfavorable (Ker. 5*b*, bottom: Hor. 12*a*). The first form of Augury reminds of pyromancy; the second, of the feeding of chickens (the "tripudium" of the Romans).

——**In the Middle Ages:** It may be said in general that the philosophers were averse to Augury, as well as to any other form of superstition. This is true especially of Maimonides, who, although bound by the Talmudic tradition, was not inclined to make any concessions on this point (Hilk. 'Ab. Zarah xi. 4, 5). The Talmudists, again, for whom the Talmud was the decisive authority, could not accept all the utterances and stories found therein. Hence a curious discrepancy between theory and practise arose, as indeed is found in the Talmud itself. While, on the one hand, everything that at all suggests idolatry is strictly forbidden, much, on the other hand, is permitted, or practised in spite of the interdiction, probably in consequence of overwhelming popular opinion (see Ṭur and Shulḥan 'Aruk, Yoreh De'ah. 178-179, together with the commentaries). Expressly heathenish practises, however, were mercilessly condemned. The mystics readily accepted all such beliefs, since all superstitious practises coincided with their views of the world. Moreover, a part of the people could never wean itself from these views.

As Güdemann has shown in his "Gesch. der Cultur der Juden in Frankreich und Deutschland," the Jews of Europe were greatly influenced by the superstitions of the peoples in the midst of whom they were living. A few examples only may here be given. Judah the Pious (died 1216 at Regensburg), who was highly venerated by his contemporaries, and especially during the thirteenth century, gives in his "Book of the Pious" a mass of superstitions. He condemns on the whole the "interpretation of signs, which to-day is so much practised in Israel," and declares that the choosing of a day (for instance, starting children in their schooling only on the new moon) is idolatry. He admits, however, that there are certain reliable signs, of which he would rather not speak in order not to lead others into superstition. Thus the itching of the foot indicates that one will go to an unknown place; of the ears, that one will hear something new; of the eye, that one will see or read something new; of the hand, that one will receive money (Güdemann, *l.c.* i. 200 *et seq.*, §§ 59 and 162). This superstition is so firmly rooted as to be given credence to-day. Any one who, during the night or the day, sees his own shadow or form with closed mouth and eyes will die soon (*l.c.* § 547).

Germany and France.

R. Moses of Coucy (about 1250) explains קסם קסמים (Deut. xviii. 10) to be a form of divination still practised in Slavonia at his time. Slivers of wood, from which the bark had been removed on one side, were thrown into the air, and according as they fell on the peeled or on the barked side, the omen was favorable or unfavorable. Flames leaping up on the hearth indicated that a guest was coming. Cup and nail divination was practised. Children were made to look into glasses filled with water, into crystals, etc., while invoking a demon, the pictures they saw being then interpreted. For nail divination the children looked upon the finger-nail (Güdemann, *l.c.* §§ 82 and 208, note 1). Asher ben Jehiel thought it permissible to find out a thief by means of divination (Yoreh De'ah, 179), a proceeding that elsewhere is described in detail (Güdemann, *l.c.* § 208, note 1). In France and Germany in the thirteenth century the future was foretold by means of the "name of interpretation" ("shem ha-meforash"), a species of the name of God, to the astonishment of the Spaniard Naḥmanides (*l.c.* § 222).

"Nishmat Ḥayyim."

The book "Nishmat Ḥayyim," by Manasseh ben Israel, a celebrated Dutch rabbi, is a mine of information respecting all kinds of superstition. Although a highly educated man, well versed in the knowledge of his time, one who could even enter into negotiations with Cromwell regarding the return of the Jews to England, the author believed in every superstition. In the nineteenth chapter of the third treatise of his book he rejects the opinion of Maimonides, who declared all the black arts to be lies and deceptions, and refers for the veracity of rhabdomancy even to the Chinese and the wild Africans. He knows the kinds of divination mentioned above, and speaks also of chiromancy and others.

The cabalistic works, to which Manasseh's book belongs, include of course also other directions for foretelling the future, a practise that obtains even to-day among the uneducated and among persons given to mysticism. In Baden, Germany, coins and beans are used, the diviner prognosticating according to their position and the stamp on the coins. An earlier form of divination, for finding a drowned person, was to let a wooden bowl float on the water. Wherever it stopped, the corpse lay on the bottom (Grünwald, "Mitteilungen," i. 111). On pagan methods of prognostication (κατ' ἐξοχήν), see DIVINATION.

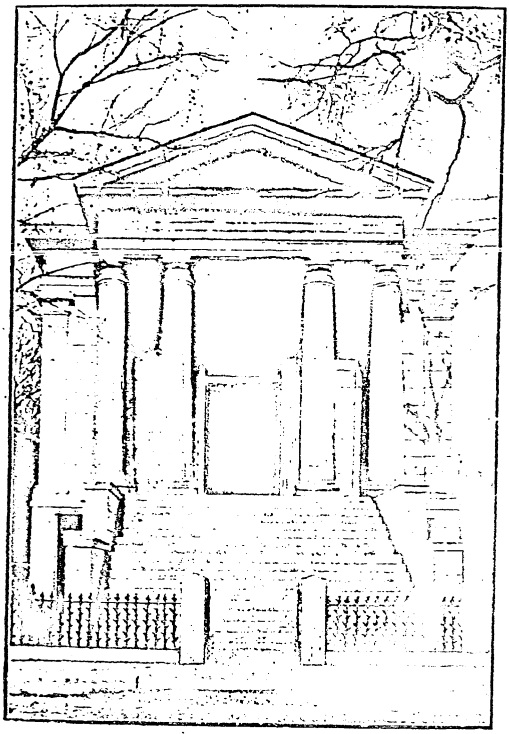
AUGUSTA: The capital of Richmond county, Georgia, received its first Jewish settlers about 1825, when a Mr. Florence arrived with his wife. About a year later, Isaac and Jacob Moise and Isaac Hendricks and his wife came there from Charleston; their number was added to by others from the same place, and subsequent to 1844 Jews from Germany began to find their way to Augusta (Markens, "The Hebrews in America," p. 113). It has a congregation, Children of Israel, organized in 1850. The religious services were originally held in a hall, where the Sunday-school children also received their instruction. The first rabbi was Rev. H. S. Jacobs, who held that position from 1860 to 1865. During the Civil war many Israelites from Charleston came to Augusta, thus considerably increasing the members of the congregation. During that time a cemetery was acquired and a benevolent society formed. Henry S. Jacobs was called to New Orleans, and was succeeded by Rev. Fisher-Fux, 1869. Rev. A. Blum was called to the pulpit, and he succeeded in getting a permanent building. Until then the services were strictly orthodox, a mixture of the Portuguese and Ashkenazic rites. In the fall of 1870 the synagogue was completed and dedicated by its minister. Family pews were introduced, an organ and mixed choir took the place of the old chanting, the Jastrow prayer-book was adopted, and the Sunday-school placed on a modern footing. Rev. Levinson was minister, 1871-76; E. S. Levy, 1876-86; Leo Reich, 1886-87. In 1887 A. Blum was recalled, but remained only one year. J. H. M. Chumaceiro was minister from 1888-94; the present rabbi is J. Feuerlicht.



Synagogue at Augusta, Ga.
(From a photograph.)

The congregation has, besides the benevolent society, a ladies' aid society, and a Sunday-school with five teachers, attended (1900) by fifty pupils. There is also a Russian Polish congregation in Augusta, called Adas Jeschurun; this synagogue is on Tenth and Greene streets.

Prominent Israelites of Augusta have been: Samuel Levy, who was judge of the probate court from 1866 to 1877; Isaac Levy, who held the position of sheriff for many years; Hon. Adolph Brand, who was a member of the Georgia legislature.

The Jewish population of Augusta numbers about 600 in a total of 47,000. The Israelites are mostly merchants, but there are some cotton brokers and lawyers.

A. A. Bm.

AUGUSTI, FRIEDRICH ALBRECHT (originally **Joshua ben Abraham Herschel**): German author; born at Frankfort-on-the-Oder in 1691; died at Eschberge May 13, 1782. He received the usual Jewish education of that time. According to a biography, printed anonymously during his lifetime and probably inspired by him, he left home very young in the company of a meshullah, or collector of alms for the poor of Palestine of the name of Yekutiel, intending to accompany him to the Holy Land. While on the way Augusti was taken captive by Tatar robbers and sold as a slave in Turkey. He was ransomed and set free at Smyrna by a wealthy Jew from Podolia, and went to Poland, spending several years in Pintzov, which is now in the government of Kielçe, in Russian Poland. Here the Jews and Socinians lived on terms of intimate friendship, and through them young Augusti became acquainted with secular knowledge, especially Latin, an uncommon accomplishment for a Jew in Poland at that time. He visited Cracow and Prague, and, returning to Frankfort, started from there on a journey to Italy. While living in Sondershausen in 1720, he was maltreated by a gang of robbers that broke into the house in which he resided, and was found apparently lifeless on the following morning. He recovered, however, and during his convalescence became acquainted with a clergyman of that place, who succeeded in converting him to Christianity. With much pomp and ceremony Augusti was baptized on Christmas day, 1723, in the presence of the duke of Saxe-Coburg-Gotha and other notables, and soon after began to study theology at the Seminary of Gotha. In 1727 he went to Jena and afterward to Leipsic. He was appointed assistant professor at the Gymnasium of Gotha in 1729, and in 1734 became minister of the parish of Eschberge, in which position he remained until his death. The famous theologian Johann Christian Wilhelm Augusti was his grandson.

Augusti published several works in Latin and German, of which "Das Geheimniss des Sambathian" (The Mystery of the Sambathian), the fabulous river mentioned in Talmudic literature, which casts stones during six days of the week and rests on Saturday, is probably the most curious. His work on the Karaites, mentioned by Fürst in his "Geschichte des Karäerthums," vol. iii. 66, 67, of which the full title is "Gründliche Nachrichten von den Karaiten, Ihre Glaubens-Lehren, Sitten und Kirchen-Gebräuche" (Erfurt, 1752), is full of inaccuracies and extravagant statements. Baumgarten, in his "Nachrichten von Merkwürdigen

Büchern," vol. i. 341-351, exposes many of these, and justly refuses to believe Augusti's claim that his sources were rare manuscripts which, after he had used them, were partly burned and partly stolen, and of which no duplicates remained. The best proof of his negligence or ignorance of the subject is that he wholly ignores the דד מרדכי (Dod Mordecai), the full description of the Karaites and Karaism which was written by the Karaite Mordecai ben Nissim, at the end of the seventeenth century for Prof. Jacob Trigland of Leyden, and published with a Latin translation with Trigland's "De Karæis" by Johann Christian Wolf in 1714. Augusti also confuses Judah ben Tabbai, who lived at least a century before the common era, with Judah ha-Nasi, who flourished about three hundred years later.

The "Life of Augusti," by an anonymous author, published in 1751 by Weber, is also reviewed and severely criticized by Baumgarten in the volume cited above (pp. 337-340). The Christian critic displays sufficient familiarity with Jewish affairs and customs to disprove the biographer's claim that Augusti, before his conversion, was a rabbi at Sondershausen, and proves that in reality he was a schoolmaster and possibly a slaughterer of animals or "shohet." Several other biographies of Augusti were written, mostly for missionary purposes, one translated into English by Macintosh, London, 1867.

G. P. Wi.

AUGUSTINE: The greatest and most important of the Latin church fathers; born Nov. 13, 354, at Tagaste, a town of Numidia; died at Hippo Aug. 28, 430. After a riotous youth as a heathen, he became first a devotee of the Manichean confession, and then after nine years was converted to Christianity by Ambrosius, in 386. He became presbyter in 392 and bishop in 395, and eventually the greatest pillar of the Catholic Church.

His Complex Character.

This remarkable round of religious experience indicates very well the complexity of Augustine's character; for in it were combined qualities the most opposite, such as overexuberance of fancy and sharpest critical acumen; vehement prejudice and delicate consideration; romanticism and scholasticism; glowing sentimentalism and hair-splitting casuistry. As a result, Augustine's writings are sometimes introspective in the extreme, frequently soaring into the heights of religious adoration of the Divine Being; at other times he concentrates attention upon the Christian dogma, and attacks with pitiless logic, sometimes indeed with subtle casuistry, all deviations from the strict and rigid faith of the Church. Of introspective writings are his "Confessions," a work translated into nearly all the languages of civilization; of quite another kind are his letters and sermons, his dogmatic and exegetical treatises, and his polemics. These curious psychological contrasts in Augustine—who was too sensuous for a philosopher and too precise for a poet—make it impossible to discern any definite system in his writings, his doctrines having no common foundation, being, indeed, for the greater part mutually contradictory. On the one side he may be said to have been a forerunner of Descartes and of the modern theory of perception and psychology, and yet, on the other side, he leaned toward mysticism. One might just as easily find connecting-links between Augustine and Luther as between the former and the fathers of the Inquisition. This conflict in Augustine's principles is perhaps nowhere more strikingly revealed than in his attitude toward those two constituents of Christianity, Hellenism and Judaism. His conception of the Deity reveals throughout a strongly marked trace of Hellenism, derived by way of Neoplatonism; and yet, on the other hand, one can not help noticing his stringently legalistic Jewish views, which, curiously enough, are most apparent when he is endeavoring to combat Judaism.

His Theory of Man.

The foundation of his doctrine concerning man was that he is a "massa peccati," incapable of raising himself to virtue, and can find the means of approaching God through the mediation of Jesus alone. This doctrine is so foreign to the essential spirit of Judaism that it may serve to indicate the extreme point in the divergence of Christianity from its origin in Judaism. Yet grace, according to Augustine, is the result of faith and love; and these, inconsistently enough, he interprets in true Jewish fashion—faith as involving adherence to the law and love as combined with fear. "Quæ caritas tunc perfecta, cum pœnalis timor omnis abscesserit," is his expression ("Perf. Just." x. 22), which recalls the terse saying of the Talmud. "Where joy [the feeling of communion with God] is, there also must be fear" (Ber. 30*b*).

Of the Church.

Another specifically Jewish conception, dominating Augustine as none other of the church-fathers, is his doctrine concerning the Church; a conception which indeed has exerted signal and decisive influence upon the whole development of Christian theology. The system of Jewish theocracy, by which the welfare of the individual was conditioned by his reception into the community through the sacrament of circumcision, was turned into a Christian form by Augustine in the conception of the holy institution of the Church, upon incorporation with which the salvation of the individual is made dependent. Connected with his doctrine of the Church is also his well-known theory of predestination. Since the Church is the only means of salvation, it results that all not belonging to it ("civitas diaboli," as Augustine calls it, in contradistinction to the "civitas dei") are excluded from salvation. The old particularism of Judaism, without which the Christian Church would never have spread among the heathen, thus survives in somewhat modified form in the teachings of the greatest Christian genius of all time.

Of Scripture.

The fact that Augustine, in the presentation of his tenets, very frequently arrives at conclusions opposed to his principles, is partly owing to his very sweeping theory of inspiration. Scripture, including the Greek translation—that legacy from the Alexandrian Jews to the Church—has, for Augustine, divine dignity as well as authority. As a consequence he considers a thing true because it is stated in the Bible, and it is stated in the Bible because it is true. In this tenet, moreover, he makes no distinction between the Old Testament and the New Testament: "Novum testamentum in veteri latet, vetus in novo patet"; that is, the Old Testament is the concealed New, the New is the revealed Old. How little may be expected exegetically from such a standpoint can be easily understood.

His Rationalism.

His Typology.

Not infrequently he gives rationalistic explanations of Biblical anthropomorphisms, which approximate closely to the teachings of both older and later Jewish scholars. Thus, for instance, the statement that Creation took place all at once, and not in six days—that, in other words, "before" and "after" can not be predicated of the Creator, but only of things created ("De Genesis a Lit." iv. 56, v. 12)—is found in Jewish sources (Tan., ed. Buber, i. 2) ascribed to R. Nehemiah, a tanna of the middle of the second Christian century. He explains God's speaking, as a voice "per aliquam imperio suo subditam creaturam" (*l.c.* ix. 3), and the same is said by Maimonides ("Moreh," ii. 33), and similarly before him by Saadia Gaon ("Emunot we-De'ot," iii., ed. Leipsic, p. 77; compare also Schmiedl, "Studien über Religionsphilosophie," pp. 253-256), who is followed by the majority of Jewish religious philosophers. Rationalism, however, constitutes the smallest portion of his exegesis, which is superabundantly allegorical or typological. Having learned much of his allegorical conception from Ambrose, Origen, and Philo, while at the same time he is not disinclined to allegorize for himself, the curious result is that he interprets the same image differently, even contradictorily, in divers passages. Thus the moon is indifferently explained as representing either carnal man, the Church, or mortality; the clouds are prophets and teachers, but also dark superstitions. He gives much room to the typological interpretation of the Old Testament, which, as mentioned, contains and conceals the New Testament. Biblical history, as well as the laws contained in it, is transformed by Augustine into a history of Christianity and its tenets. Thus, Abel, Seth, and Joseph represent different aspects of Jesus: as crucified, as risen from the dead, and as translated to heaven. Noah's Ark is the Church; in the two lower stories are Jews and heathens; in the third, faith, hope, and love.

Augustine Opposes Jerome.

Augustine's lack of critical conception of the Old Testament is shown by his opposition to Jerome's undertaking to make a Latin translation of the Scriptures from the Hebrew. To portray as vividly as possible the dangers of such an innovation, he informed Jerome in a letter of the fierce tumult which had arisen in an African congregation, when the bishop adopted the Vulgate, rendering "ivy" instead of the Septuagint "gourd" (in Jonah iv. 6); and what was even of deeper importance, as he narrates, the bishop had had to declare Jerome's translation faulty upon appealing to the authority of a certain Jewish scholar ("Epist. Aug." 171). When, on the other hand, in another letter (82) to Jerome, Augustine suddenly declares himself convinced of the necessity for his undertaking, this must not be considered as a change of conviction on his part, for in the same epistle he declares that the ruling Church translation, "gourd," must be maintained in spite of its erroneousness. He foresaw that he would have to yield sooner or later in a struggle against a man of such upright character and learning as Jerome was acknowledged to be.

Information from Jews.

On the other hand, Augustine did not despise assistance from African Jews—who however, were not among the most learned of the race—upon obscure passages in the Old Testament. Although the passages in which he quotes directly from such Jewish sources are few, much that is of haggadic and even halakic origin points to at least oral communication with Jews. His remarks about the material of Jewish tradition are important, "quas non scriptas habent, sed memoriter tenent, et alter in alterum loquendo transfundit, quas Deuteroses vocant" (c. Advers. leg. ii. 1). This would indicate that the Jews of Africa in the beginning of the fifth century possessed only an unwritten Mishnah (Deuterosis), and Rabbi's Mishnah could not therefore have been written down. The only two Haggadot mentioned by Augustine as definitely of Jewish origin are a legend concerning Adam's second wife (see Ginzberg, "Die Haggada bei den Kirchenvätern," p. 61) and the story of Abraham in the fiery furnace. The latter, however, he may possibly have drawn from Jerome ("Quæstio" in Gen. ix.). Of the many rabbinical traditions that he does not describe as Jewish, the following examples may serve: Light created by God on the first day of Creation is not the earthly light (De Gen. v.); the same view is given by the Baraita in Ḥag. 12 and Gen. R. iii. 6. The moon was created when full, because God created nothing imperfect (Gen. ii. 31); wherefore also Adam was created as a perfectly developed man (*l.c.* vi. 23), which is identical with an old Haggadah ascribed in the Talmud (Ḥul. 30*a*) to R. Joshua b. Levi, who flourished about 230. Augustine's teaching that Adam was created by God Himself directly, and not by God's word as everything else was, is also of Jewish origin (see Ginzberg, *ib.* p. 21).

His remarks on the Heptateuch contained much that is rabbinical, but he may have received it from the Roman deacon, Hilarius. His rationalistic explanation of the "sons of God" (Gen. vi. 2) by *viri justi* is that of R. Simeon b. Yoḥai (flourished 150; see Gen. R. xxvi. 5). (For the rabbinical sources of his statements that Noah was a hundred years in building the Ark; that he, Noah, possessed such control over the animals therein that even the lions lived on hay; that Rebecca before the birth of her sons inquired of Melchizedek concerning herself, see Ginzberg, *ib.* pp. 75, 77, 118.) Rabbinical influence is also recognizable in the statement that Rebecca, by means of her prophetic powers, discovered Esau's plans of vengeance against Jacob (compare "Quæst." 81 with Gen. R. lxvii. 9); and also in the interpretation in Gen. xxxvi. 31, of the word "king," as meaning Moses (*l.c.* cxxi.), which coincides with the rabbinical interpretation of Deut. xxxiii. 5, where also the word "king" is applied to Moses. Augustine gives interpretations that can be described as halakic (*l.c.* Ex. 162): in agreement with the Rabbis (Bab. Pes. 5*b*), he interprets

Ex. xxiii. 18 as a prohibition against having leavened bread in one's possession when bringing the paschal lamb into the house. The offense committed by the sons of Aaron (Lev. x. 1) is understood by Augustine (Lev. x. 31) as being their use, in their sacrifices, of fire from some outside source and not from the altar; following in this interpretation Akiba's teaching (Sifra, *ad loc.*), which is the accepted one among the Jews. In this same passage Augustine has a rabbinical interpretation received from his Jewish teachers, which, as now evident, is obviously the result of a mistake either in writing or in comprehension. The Rabbis very ingeniously connect the passage Leviticus x. 3 with Ex. xxix. 43; but Augustine's Jewish teacher confused the word ונעדתי ("and I will meet"), with which this verse begins, with the word הודעתני ("Thou hast let me know"), occurring in Ex. xxxiii. 12; and thus gave foundation for Augustine's polemic.

Polemic Against Jews.

His dependence upon Jewish tradition did not, however, prevent him from reproaching the Jews for not understanding, or not wishing to understand, the O. T. In his "Tractatus Adversus Judæos" he endeavors, as his main object, to prove from Scripture that the Law is fulfilled in Jesus, and that therefore Christians may rightfully have recourse to the O. T. even if they do not observe the Law. His endeavor to prove the Messianic character of Jesus from Psalms xliv., xlviii., and lxx. is very far-fetched; as well as his plea for the rejection of the Jews, based on Isaiah ii. and Mal. i. 10, 11. He says on this point, "If the Jews in the Isaiah passage [verse 5] understand 'the house of Jacob' to be equivalent to 'Israel,' because both names were borne by the patriarch, they only show how incapable they are of comprehending the true contents of the O. T." "The house of Jacob" means the rejected Jews, while "Israel" designates the Christians. The results of such polemics—which, however, belong to the weakest and least important productions of his pen—were, of course, quite inconsiderable. Jewish natural intelligence sufficed to warn them against such conceptions of Scripture.

Jewish References to Augustine.

In view of the almost exclusively Aristotelian character of the Jewish philosophy of the Middle Ages, Augustine's Neoplatonism remained entirely unknown to them. As Kaufmann ("Attributenlehre," p. 41) observes, it is highly improbable that Saadia's polemic against the Christians, who desired to prove the Trinity from the personification of the divine attributes (Being, Living, Knowing), was directed against the Augustinian doctrine of the Trinity, the *memoria*, *intelligentia*, and *voluntas* of God. The agreement of Saadia and Augustine concerning the creation of time (Kaufmann, *l.c.* 307) is based upon the fact that both depend upon the Platonic sentence, "Time came into being with the heavens" ("Timæus"). Judah Romano (born 1292) and Isaac Abravanel (died 1508) cite Augustine by name, as do likewise a number of anonymous writers about the same period. For the relation of the Keneset Yisrael (Jewish Church of the Cabalists) to Augustine's doctrine of the Church, see the articles CABALA, ZOHAR.

H. R.

AUGUSTUS (called later **Caius Julius Cæsar Octavianus**): The first Roman emperor that bore the honorary title of "Augustus"; born Sept. 23, 63 B.C.; died at Nola, Campania, Aug. 19, 14 C.E. He was the son of Caius Octavius. In his attitude toward the Jews he continued the friendly policy of his uncle, Julius Cæsar, who had made him his sole heir. With a great anxiety to arouse and to further at Rome interest in the national religion, he combined a broad tolerance for other faiths. Though he sanctioned the course of his nephew Claudius, who, while touring the Orient, had neglected to sacrifice at the Temple of Jerusalem, he showed his sympathy clearly on other occasions, both by sending gifts to the Jewish sanctuary and by causing the daily sacrifice to be offered up in his name.

His Edicts.

Augustus renewed the edicts which Julius Cæsar had promulgated in behalf of the Jews living at Cyrene and in Asia Minor, granting them perfect freedom of worship, sanctioning the collection of money for the Temple, and proclaiming as inviolable their sacred books and synagogues (Josephus, "Ant." xvi. 6, §§ 1-7). Particular regard was paid to their Sabbath; neither on that day, nor on its eve after the ninth hour, could the Jews be required to appear in court; while in Rome, if a public distribution of corn occurred on a Sabbath, needy Jews were entitled to claim their share on the day following. The contemporary Jewish population of Rome was quite considerable, as appears beyond question from the several synagogues the origin of which may be traced to the Augustan age. To one synagogue the name "of the Augustesians" (συναγὼγ Αὐγυστησίων) was given, in honor of the emperor.

The friendship between Augustus and Herod the Great began after the victory at Actium (Sept. 2, 31 B.C.), which rendered the former sole ruler of the Roman domain. Herod lost no time in passing over to the side of the victor, to whom he proffered all

Friendship with Herod.

the homage and loyalty which thitherto he had yielded to Antony. Augustus, accepting the offer, confirmed the royal position of Herod and bestowed upon him, after the suicide of Antony and Cleopatra, all the provinces of which he had been bereft through the influence of the latter (Josephus, "Ant." xv. 6, § 7). He tried also to aid the harassed Jewish king in his domestic troubles, by effecting a temporary reconciliation between him and the two sons of Mariamne, Alexander and Aristobulus (*ib.* xvi. 4, § 4). Herod showed his appreciation of his patron's favors by naming his new capital, built up out of Samaria, "Sebastè" (Greek for "Augustus," which title the emperor had just then assumed), in honor of the emperor, and its magnificent seaport, which occupied twelve years in the building, "Cæsarea" (*ib.* xv. 8, § 5; 9, § 6).

Judea During His Reign.

Under Augustus, moreover, Judea forfeited the actual or nominal independence it had possessed for a century and a half, and was made a Roman province. After the death of Herod (3 C.E.), an embassy of fifty prominent men from Jerusalem betook itself to Rome to protest against the continuance of the tyrannical rule of the Herodian dynasty, and to plead with Augustus for the annexation of Judea to Syria, and the appointment of a mild magistracy which would leave to Judea internal autonomy. About 8,000 Roman Jews joined the delegation, which was received by the emperor at the Temple of Apollo. The preliminary result of this movement was that Augustus divided Herod's realm between Archelaus—whom he appointed ethnarch, promising him the kingly title if good conduct should warrant such reward—and Philip and Antipas; making liberal provisions, also, for Salome, Herod's sister, and for his two daughters (*ib.* xvii. 11, § 5). At this juncture Augustus rendered another good service to Judea by unmasking and punishing a pretender to Herod's throne, who, emerging from Sidon, had passed for Alexander, one of Mariamne's slain sons, and who, on his triumphal journey from Puteoli to Rome, had gained many a follower among the credulous Jews (*ib.* xvii. 12).

Augustus Banishes Archelaus.

The rule of Archelaus, however, was tyrannous; and about ten years after his accession another embassy of leading Jews appeared before Augustus with an arraignment of his cruel despotism. The emperor thereupon summoned him to Rome, and banished him and his wife, Glaphyra, to Vienne, a city of Gaul, now in the Isère department, France. His wealth was confiscated, while Quirinius, a prominent senator, accompanied by Coponius, was delegated to Syria and Judea (6-7 C.E.) for the purpose of taking a census of those provinces and of introducing the Roman system of poll and property taxation, as well as of making the proper disposal of the belongings of Archelaus.

The census proved highly unpopular, particularly among the Zealots, a band of resolute republicans led by Judas the Galilean, or the Gaulanite, and by Zadok, who saw in this innovation a menace to national and personal liberty, and opposed it accordingly, though without permanent success. In some places open resistance even may have occurred (Josephus, "Ant." xviii. 1, § 1; xx. 5, § 2; *idem*, "B. J." ii. 8, § 1; 17, § 8; Luke ii. 1-3; Acts v. 37). Judea thus became wholly a Roman province of the second order, not incorporated into Syria, as Josephus says, but having an imperial representative in the person of a procurator, who resided at Cæsarea.

New marks of loyalty were shown to Augustus by his Herodian protégés. Antipas fortified Sepphoris, the chief city of Galilee, dedicating it to the emperor; while the new fortress at Betharamptha he named "Julias," after the emperor's wife. Similarly, Philip built an important city at the head of the Jordan valley, styling it "Cæsarea Philippi," in distinction from its namesake built by Herod the Great; while he enlarged and embellished Bethsaida, near the Lake of Gennesaret, and called it also "Julias," after the daughter of Augustus (Josephus, "Ant." xviii. 2, § 1).

G. H. G. E.

AUGUSTUS II., THE STRONG: Elector of Saxony 1694-1733, and from 1697 king of Poland with the title Frederick Augustus I.; born at Dresden May 12, 1670; died at Warsaw Feb. 1, 1733. He confirmed the privileges of the Jews, following the example of his predecessor, John Sobieski (1674-96); but while that monarch always manifested a friendly disposition toward them, Augustus II., with his lavish expenditures—which impoverished Poland and laid the foundations for her future misfortunes—was quite indifferent to the condition of the Polish Jews, who had hitherto always been protected by the throne. This indifference was in face of the fact that the Jewish bankers—Oppenheimer of Vienna, Liebmann of Berlin, and Meyer and Lehmann of Dresden—furnished the greater part of the 10,000,000 thalers used by Augustus to buy up the Polish nobles for the purpose of securing the throne. Another Jew, Berend Lehmann (b. 1659 at Halberstadt), furnished the money necessary for his coronation at Warsaw, and in order to do this he negotiated the sale of the hereditary estate of Quedlinburg to Brandenburg for 340,000 thalers (according to Vehse and Gretschel). But this indifference with regard to the protection of the Jews may be explained by the fact that Augustus was also indebted to the Jesuits of Vienna, who furnished a part of the funds for the purchase of the Polish throne, taking his jewelry as security. With the aid of the Jesuits he attempted to corrupt the inconstant Poles with money, and by intrigues to keep them in dependency; for this purpose he even tried to change the electorate to a hereditary order.

Assisted in Election by Jews.

That he personally favored certain Jews is evident from his letter dated Sept. 23, 1707, in which he praises Berend Lehmann for his services, fidelity, and good character. The same friendly tone marks a letter of protection dated March 27, 1708, authorizing Berend Lehmann's family and servants, and also his brother-in-law, Jonas Meyer of Hamburg, to settle at Dresden (see Berend LEHMANN).

Measures Against the Jews.

During his reign the discipline in the Polish army became very lax, and the Jews suffered much from the violence and robbery of the soldiers. The Catholic clergy ordered the enforcement of the decree of the Council of Basel instituting conversionist sermons in the synagogues, which decree had hitherto remained a dead letter. In vain did the Jews ask to be relieved from such sermons, pointing out their futility. Often this preaching could be maintained only with the aid of military force, as, for instance, at Lemberg in 1721. The land-owners, synods, and courts took energetic measures against the renting of inns by Jews. The poll-tax was collected from the Jews through their "kahals" with more energy than ever before, even after the long wars with Charles XII. of Sweden had ruined the Jews. At the Diet of 1717 in Warsaw, the Jewish poll-tax was still more increased. The gentry (*shlyakhta*), the merchants, and the gilds soon observed that the Jews no longer enjoyed the favor of the throne, and their attitude toward them became more and more hostile. The ordinances of the Catholic Church exceeded in hostility to the Jews those passed in the seventeenth century. The animosity between the Jews and the Christians at this period was more of a religious than of an economico-social nature, as had been the case in the preceding period. The persecution of the adherents of non-Catholic creeds, of dissident Christians and Jews, was the predominating policy of Poland in the time of Augustus II. The Catholic synod of 1720, held at Lovich, passed an edict, "that the Jews shall not dare to build new synagogues or to repair the old ones," threatening them with the courts of the Church.

At the end of his reign Augustus II. abandoned himself to a life of pleasure, and his last years, characterized as they were by boundless luxury and corruption of morals, hastened the downfall of Poland.

H. R.

AUGUSTUS III.: Elector of Saxony, and as such Frederick Augustus II., king of Poland; son of Augustus II., "the Strong"; born at Dresden Oct. 17, 1696; died there Oct. 5, 1763. Like his father, he was brought up in the Protestant religion, but secretly embraced Catholicism in 1712, although he did not formally announce his conversion until 1717. Without the abilities of his sire, he inherited his passions, and, following his example, distinguished himself by the splendor of his feasts and the extravagance of his court. Like his predecessors, he continued the privileges of the Jews in Poland; but under him they became but a dead letter. Neither he nor his favorite, Count Brühl—who was the actual ruler of both countries—did anything to protect the Jews from the attacks of the Catholic clergy and the Christian merchants.

Soon after Augustus had ascended the throne (April 4, 1733), he issued an edict, levying, almost without distinction of age, sex, or state, a special tax (*Leibzoll*) on every Jew passing through Dresden (Codex Augustus, iii. 10). Only on a petition of the Jews of Dresden, presented by their delegate, Elias Berend Lehmann, children under ten years of age were exempted by virtue of an edict issued Sept. 24, 1733. In Poland, in the same year, the synod of Plotzk endorsed the medieval dictum, "that the Jews ought to be tolerated in Christian countries only to remind us of the torments of Christ, and with their wretched position of slaves to serve as an example of God's just chastisement of the unbelievers."

The reign of Augustus was very unfortunate for the Jews of Poland. Blood-accusations and destruction of Jewish property, synagogues, and cemeteries were of frequent occurrence; and in the courts the cunning lawyers of the Catholic Church always succeeded in convicting the innocent victims of the Jesuits. In vain Baruch Yavan, agent of Count Brühl, appealed to that obdurate statesman for aid in behalf of the unfortunate Polish Jews. The minister made liberal promises, but referred Yavan to the nuncio of the pope. From 1758 to 1760 the pontiff repeatedly instructed his representatives in Poland to prevent the spread of these accusations (the falsehood of similar ones had been stated as early as the thirteenth century by a bull of Innocent IV.); but it proved easier to inculcate such prejudices in the masses than to root them out.

During this reign the Frankists appeared in Poland, and caused great disturbances among the Jews, enjoying the protection of the clergy, and even of the king himself. At the same time Dembovski, archbishop of Lemberg, with the aid of the clergy, police, and the Frankists, began to confiscate copies of the Talmud and works of rabbinical literature, which were gathered in Kamenetz-Podolsk, and burned by the thousands. This hostility to the Talmud, which extended throughout the country as far as Lemberg, lasted till Dembovski's death (Nov. 17, 1757). In Dresden an order was issued Aug. 16, 1746, restricting their right to trade in that city and prohibiting them from building synagogues and from meeting in any place for prayer. See Frankists.

AURANITIS. See Hauran.

AURUM CORONARIUM: A tax paid to the emperor by all the Roman provinces. Originally it was a voluntary contribution toward the golden crown to be offered to those to whom a "triumph" was given, and to the emperors (compare Cicero, "In Pisonem," xxxvii.); but later it became a statutory tax. The emperors who displayed moderation in it—Augustus (compare Dio Cassius, book 51, p. 458, ed. Hanover, 1606), Hadrian, and Antoninus Pius—were much praised on that account by the Augustan historians.

The Romans also applied the term "Aurum Coronarium" to the yearly tribute paid by the Jews of Rome for the maintenance of the patriarchate. The name of the tribute was of itself objectionable to the Roman emperors, as implying regal rights in the patriarch, and they sought in every way to prevent its payment: even Julian the Apostate, otherwise friendly to the Jews, asked the patriarch Julus to absolve the Roman Jews from paying it.

The Aurum Coronarium pressed heavily upon the Romans, and still more upon the Jews in Palestine, where the Roman functionaries could impose it arbitrarily. The Talmud relates that at the time of the patriarch Judah I. all the inhabitants of Tiberias fled in order to avoid the payment of this tax (B. B. 8*a*, where it is called דמי כלילא). See APOSTOLÉ.

G. I. BR.

AUS OF ḲURAIẒA: A poet belonging to the Jewish tribe of Ḳuraiẓa in Medina. When this tribe was besieged by Mohammed, the wife of Aus saved her life by embracing Islam and summoned her husband to do likewise. He refused to follow her example, improvising the following verses:

"When next we met, she bade me turn
My faith to hers, but I declined:
Come back, then, false one, to the fold,
To Israel's law by God defined!

"By Moses and his code we live,
In his commandments will we walk:
Mohammed's faith is bad in sooth;
'Tis nothing but insensate talk.

"Both we and he believe our own
To be the truest, straightest road:
That one is right whose natal faith
Doth guide him to the blest abode."

The second verse now reads, "How *good* is the religion of Mohammed," but such an alteration is common in antagonistic poems handed down by Moslem litterateurs. To the same poet is attributed another poem of similar character.

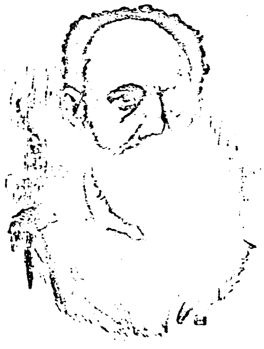
AUSPITZ, HEINRICH: Austrian dermatologist; born at Nikolsburg, Moravia, Sept. 2, 1835; died May 23, 1886, at Vienna, barely two years after succeeding Zeissl. Auspitz acquired his medical training at the University of Vienna, where he was a pupil of Brücke, Skoda, Rokitansky, Oppolzer, and Hebra; and upon being received as privat-docent at his alma mater, in 1863, lectured on dermatology and syphilis. He was appointed director of the general clinic of Vienna in 1872, and, as soon as a vacancy occurred in the faculty of the university, he was promoted to the position of associate professor in 1875, having still charge of the courses in dermatology and syphilis.



Heinrich Auspitz.

Among his most important contributions to medical science are: "Anatomie des Blatternprocesses," in Virchow's "Archiv," 1863; "Die Lehren vom Syphilitischen Contagium," Vienna, 1865; "Die Zellen-Infiltrationen der Lederhaut bei Lupus, Syphilis, und Skrophulose," in "Medicin. Jahrbücher," Vienna, 1866; "System der Hautkrankheiten," Vienna, 1881, besides a great number of papers and articles which have appeared on the pages of the "Vierteljahresschrift für Dermatologie und Syphilis"—a journal founded (1869) and edited by him—and which had considerable influence on the pathology of skin-diseases.

His views, often novel and striking, raised no little discussion and debate; but it is universally conceded that dermatology is indebted to him for a beneficial and fruitful impetus, and for many important and lasting contributions. Especially is this true in regard to his "System der Hautkrankheiten" (translated into French by Doyon under the title "Traité de Pathologie et de Thérapeutique Générales des Maladies de la Peau," Paris, 1887. The same excellence of treatment and originality of thought characterize the chapter (on general pathology and therapeutics of skin-diseases) that H. Auspitz prepared for Ziemssen's "Handbuch der Speciellen Pathologie und Therapie" (vol. xiv.).

AUSPITZ, JACOB: Geographical writer; lived at Budapest, Hungary, in the first quarter of the nineteenth century. He was the author of "Beër ha-Luḥot" (Explanation of the Tablets), consisting of five Biblical maps, copied from a Latin source, and of copious annotations of the same. The maps represent: (1) The spread of mankind after the Deluge; (2) the migrations of the Hebrew tribes in the desert; (3) their camps; (4) the Mediterranean and the projected division of Palestine; (5) Palestine, according to Jewish and Gentile sources. The work was published at Vienna in 1818.

S. M. B.

AUSPITZ, RUDOLF: Austrian member of parliament and leading manufacturer; born at Vienna July 7, 1837. He is a member of one of the oldest and most prominent Jewish families of Moravia, which settled in the city of Auspitz, whence it derived its name. One of his ancestors, Abraham Auspitz, was chief rabbi of Moravia during the latter part of the eighteenth century; his grandfather, Lazar Auspitz, was the founder of the well-known firm of L. Auspitz (at present [1901] "Auspitz Enkel"), manufacturers of woolens, the leading members of which are Rudolf and his elder brother Karl Auspitz, Elder von Artenegg.

Auspitz received his early education in his native town, attending the Technische Hochschule. To complete his education he visited Berlin and Paris, being interested in the natural sciences, and returned to Austria in 1858. He has since taken an active part in the industrial and political life of his country.

When, in the middle of the last century, the manufacture of beet-sugar was being introduced into continental Europe, Auspitz was one of the first large landowners and leading capitalists to encourage the industry. Combining business enterprise with capital and knowledge, he founded in 1863 a company for the production of sugar from beets. In this undertaking he was very successful; and in 1862 his company absorbed the great sugar manufacturing concern of Count Chorinsky in Bisenz. By this transaction his firm, under the style of "Die Rohatetz-Bisenzer Zucker Fabriken Rudolf Auspitz und Co.," became the only sugar manufacturers in northern Moravia. His grandfather having made the name Auspitz prominent in the woolen trade, Rudolf has now made it equally prominent in the sugar trade. Not only in the business world was he conspicuous, but also in the political field which, he entered in 1871 as the successful candidate for the Moravian Landtag, representing the district comprising the cities of Gaya, Butschowitz, and Wischau from 1871 to 1884, and from 1884 to 1900 the chamber of commerce of Brünn. In 1873 he was also elected a member of the Austrian Reichsrath for the district Auspitz-Wischau. He was also a member of the chamber of commerce for Lower Austria from 1888 to 1892, and since 1900 he has been trustee of the Jewish congregation of Vienna.

Auspitz has always belonged to the German Liberal party, in whose caucuses he has taken a prominent part, and whose platforms have been ably advocated and successfully defended by him. He has been very active in the meetings of the houses of which he has been a member.

Auspitz's wide knowledge of economics, his sagacity and enterprise as a merchant and manufacturer, and his manifold connections in the export and import trade have made his advice much sought after in state and national legislation. During the controversy between Austria and Hungary in 1898 he was one of the mediators through whose untiring energy the seemingly irreparable breach between the two constituents of the dual monarchy was finally and satisfactorily healed (1901).

In 1899 Auspitz was a member of the house committee of the Reichsrath for the investigation of the anti-Semitic movements in Holleschau and Wsetin, Moravia; and in 1900 he was chosen speaker of the committee of leading Jews of Vienna, which waited on the Austrian minister-president Freiherr von Körber, to protest against the anti-Semitic excesses in Austria.

Auspitz, in spite of his political and other duties, has still found leisure for scientific researches, the fruits of which are embodied in his well-known work (edited jointly with R. Lieben), "Ueber die Theorie des Preises."

AUSSEE: Town in Moravia, Austria. It had a Jewish community in the seventeenth century. In 1622 Emperor Ferdinand II. presented the town to Prince Karl of Lichtenstein, on condition that none but Catholics should be permitted to reside there; and as late as 1834, out of a population of 4,534, only 24 were Protestants. In 1688 the dean of Müglitz gave orders for the erection of a synagogue at Aussee. This building was destroyed in 1722 under the following circumstances: During the services on the eve of Yom Kippur a Catholic priest entered the synagogue and began to preach a missionary sermon to the people assembled for worship. The officers of the congregation asked him to withdraw; but he persistently refused to do so, and they were compelled to eject him. When the Jews brought charges against the priest for disturbance of the peace, he claimed that they had assaulted him. After a protracted lawsuit a decision was rendered to the effect that the synagogue be destroyed and that no other be built. Of those charged by the priest with assault three men were branded with a hot iron and exiled; while the fourth, a man seventy-four years old, was sentenced to work upon a Catholic church then in course of construction. Thirty-two years elapsed before permission was granted the Jews to establish three places of worship; and none of these was allowed to bear the name or to have the appearance of a synagogue. It was not until 1783 that permission was given to build a regular synagogue (Abraham Broda, "Megillat Sedarim"); and when this was dedicated Abraham Prostiz was chosen rabbi. Other rabbis were Israel, brother of R. Manli Fuchs, of Kromau; Loeb Pollak, and M. Duschak. David ben Jacob Szczebrszyn, author of notes on the Targumim, is said to have occupied the rabbinate in the seventeenth century.

Under the law of March 21, 1890, relating to the legal conditions of the Jewish congregations in Austria, the community of Aussee was amalgamated with the neighboring communities; and, through personal and local considerations, Mährisch-Schönberg became the seat of the Jewish communal district.

AUSTERLITZ: Town in Moravia, Austria. Its Jewish congregation is one of the oldest in the province; according to some historians, dating from the beginning of the twelfth century. Records seem to point to a tribute paid by the Jews to King Wenzel in 1288, which revenue he presumably turned over to the Teutonic Knights when they obtained possession of the domain. The payment of this tribute was continued to the successors of the Knights, the counts of Kaunitz. A record in the archives of the present congregation of Austerlitz shows that the Jewish tribute for the year 1757 included pepper, ginger, and other spices. The Jewish merchants visited all the Mediterranean ports, and dealt extensively in the natural and artificial products of the Orient; and it was for this reason that the tribute mentioned was exacted from them, not only by the local secular and ecclesiastical officials, but even by the papal court itself.

Jewish Community in Twelfth Century.

The fact that as late as 1798 the Jewish community was ordered, under penalty of legal enforcement, to pay arrears amounting to 503 florins, 3 kreutzers = $200, indicates that this tribute had been exacted from them for a considerable period.

The relations existing between Jews and Christians were at all times friendly. During the Hussite movement, which in 1550 had its headquarters at Austerlitz, no change in the friendly relations between Jews and Christians had occurred: at least the movement was not provocative of any ill-feeling toward the Jews. A striking testimony of this friendly feeling even at a much later date is the fact that on the occasion of the closing of the monasteries by Joseph II. (1780–90), an abbot deposited his valuables with a poor Jew, who later, on finding with no little difficulty the dwelling of the depositor, returned to him intact all he had received from him.

Known as "the White City."

The main occupation of the Jews was trading, and the chief articles sold by them were starch and lime. In connection with this fact it is interesting to note that in Jewish records still extant Austerlitz is called "'Ir Laban" (the White City). The Jewish inhabitants numbered about 445 individuals, occupying thirty-four houses, one of which bears the inscription "Moses Abraham in the year 1523."

When Maria Theresa issued the edict restricting the number of Jewish families in the province of Moravia to 5,100 (later to 5,400), Austerlitz was permitted to shelter 72 Jewish families. Charitable societies for the sick and needy, and schools, established about that time, are still in existence.

According to manuscripts left by R. Josef Weisse, the following ministers officiated at Austerlitz as rabbis: in 1560, R. Löb, a contemporary of R. Moses Isserles, with whom he was in correspondence for some time; in 1570, Jacob, son of Moses, a contemporary of Rabbi Loewe ben Bezaleel; in 1594, Ḥayyim Meling, son of Rabbi Isaac Meling, of Prague; in 1620, Baer Eilenburg; in 1643, Joel Glogau; in 1659, Mordecai; in 1690, Abraham, son of the author of "Bet Yehudah"; in 1703, Nathan Feitel; in 1770, Simḥa Leipnik; in 1780, Elijah Hirsch Istels; in 1790, Jacob Gleiwitz; in 1811, Gerson Buchheim, great-grandfather of Dr. Gustav Karpeles, editor of "Die Allgemeine Zeitung des Judenthums" at Berlin; and in 1845, Hirsch Duschak, who had received a thorough rabbinical training, and possessed wide secular knowledge.

Jewish Synods Meet at Austerlitz.

In 1662 and in 1724 Jewish synods held their sessions at Austerlitz, passing the important resolutions now embodied in the ש"א תקנות (311 regulations) (see INSTITUTIONS). A noteworthy incident took place in 1805, when a French officer of high rank asked the rabbi to summon ten Jews that he might say "kaddish" for a deceased member of his family.

AUSTERLITZ: Name of a Jewish family. As is the case with all names derived from places, the surname "Austerlitz" does not necessarily signify that all the persons so named belong to one family. It denotes that an ancestor of the person came from that place or was for some time a resident there. In the tombstone inscriptions of the old cemetery at Prague this name occurs after 1620. The name is also found in Prague among those of Jews banished from Vienna in 1670, and in other localities in Austria and Hungary. Of the members of this family known in literature and communal life, the following may be mentioned:

Aaron b. Meïr Austerlitz: Secretary to the rabbinate of Berlin, 1775.

Baruch b. Solomon Austerlitz: Rabbi in Cologne and preacher at Prague at the beginning of the eighteenth century; grandson of Baruch, an exile from Vienna. He was son-in-law of the "primator" (president of the congregation), Samuel Tausk, or Taussig, of Prague. He wrote approbations ("haskamot") to an edition of the Midrash Rabbat printed at Frankfort-on-the-Oder, 1705, and to the 'Aruk ha-Ḳazer, Prague, 1707. One of his sermons was published in Prague, 1713. His daughter became the second wife of R. Moses Ḥarif (Brandeis).

Hirschel Austerlitz: A communal leader exiled from Vienna in 1670. In 1675 he, together with Hirz Coma, Max Schlesinger, Solomon Wolf, and Solomon Auspitz, signed a petition to Emperor Leopold I., praying that the Jews might be allowed to resettle in Vienna.

Mayer Austerlitz: Now rabbi in Eperies, Hungary; was one of Hildesheimer's earliest pupils.

Moses b. Joseph Austerlitz: A scholar and promoter of Jewish learning; lived in Vienna, but when the Jews were expelled from that city and from Lower Austria (1669), he removed to Nikolsburg, Moravia. His house was the resort of scholars, especially after the fire of Prague in 1689. Thus he helped to support the cabalist Moses ben Menahem Graf, author of "Wa-Yaḳhel Mosheh" (And Moses Gathered); Judah b. Nisim, author of "Bet Yehudah" (The House of Judah); and Isaac Ẓoref, author of "M'ozene Ẓedeḳ" (Just Scales), all of whom speak highly of him.

M. BA.

AUSTRALIA: The island-continent between the Indian and Pacific oceans. In more senses than one it has been a land of sunshine to the Jews. Nurtured and reared on British traditions, Australia has inherited the national characteristics of the mother-country. The spirit of democracy, so strong in Australia, has always manifested itself as a unified current that absorbs in itself all the varied elements of race and religion. Religious freedom accordingly has always been granted in full measure as soon as the colonies received legislative independence. Amid such conditions it was only natural that the Jews who settled there should find a cordial welcome and a hospitable home.

Australia offered its great undeveloped resources to all who were willing to develop them. Many Jews embraced the opportunity and prospered. Though the Jews of Australia have never aggregated much more than 15,000 out of a population of three and a half millions, they have appreciably assisted in the development of the country, and many of them have gained distinction. A few have devoted themselves to agriculture; but the majority found here as elsewhere that manufacturing and trade offered inducements well suited to their capabilities. Industry has been largely developed by them; and in the raising of sheep and cattle they have been particularly prominent. In science, art, and literature Jews have been active participants; and in the government of the colonies they have had an honorable share.

Social Position.

Earliest Jewish Congregation.

As Australia itself has been developed in but little more than a hundred years, it is not surprising that the formation of the earliest Jewish community was not accomplished before the end of the first quarter of the nineteenth century. Sydney, the capital of the mother-colony of New South Wales, contains the oldest Hebrew congregation. Its early history is recorded in "Sydney in 1848," which states that there were about twenty Jews in the colony in 1817, and that these were "little versed in the faith of their ancestors." Nevertheless, they were sufficiently attached to their religion to form themselves into a Jewish society for the purpose of attending to the interment of their dead. In 1820 the Jews obtained their own "bet ḥayyim" or burial-ground by applying to the Rev. Dr. Cowper, who allotted to them the right-hand corner of the Christian cemetery. The death of one Joel Joseph prompted the application; and he was the first Jew buried there. During the next ten years there was no great increase in membership; and the services of the society were not called for more than once a year. The account continues:

> "In 1827 and 1828 the worldly condition of the Hebrews in the colony improved considerably, in consequence of the great influx of respectable merchants; and this, with other circumstances, has raised the Hebrews in the estimation of their fellow-colonists. About this period Mr. P. J. Cohen having offered the use of his house for the purpose, divine worship was performed for the first time in the colony according to the Hebrew form, and was continued regularly every Sabbath and holiday. From some difference of opinion then existing among the members of this faith, divine service was also performed occasionally in a room hired by Messrs. A. Elias and James Simmons. In this condition everything in connection with their religion remained until the arrival of Rev. Aaron Levi, in the year 1830. He had been a dayyan, and, duly accredited, he succeeded in instilling into the minds of the congregation a taste for the religion of their fathers. A Sefer Torah [scroll of the Law] was purchased by subscription, divine service was more regularly conducted, and from this time may be dated the establishment of the Jewish religion in Sydney. In 1832 they formed themselves into a proper congregation, and appointed Jacob Montefiore as the first president."

In the same year the first Jewish marriage was celebrated, the contracting parties being Moses Joseph and Miss Nathan. Three years later a Mr. Rose came from England and acted as the ḥazan, shoḥet, and mohel. He was succeeded by Jacob Isaacs. The condition of the Jews improved to such an extent that in 1844 they erected a handsome synagogue in York street, in which they continued to worship for more than thirty years.

Following upon the formation of the Sydney community, Jews began to assemble in Victoria, and congregations sprang up in the towns of Melbourne, St. Kilda, Geelong, Bendigo, and Ballarat (1853). The congregations of Geelong and Bendigo are now (1902) extremely small, in fact all but non-existent. In South Australia, Jews settled considerably later than in Victoria; and it was not till 1871 that they were numerous enough to erect a synagogue in the capital city of Adelaide. Somewhat later still, the Brisbane (Queensland) congregation took form. For more than twenty years (1865–1886) they continued to hold services in the Masonic Hall; and at the end of that period they were able to build a commodious synagogue in Margaret street, with a seating capacity of 400.

Congregations and Synagogues.

The youngest of the Australian communities is that of Perth, the capital of West Australia, the formation of which in 1892 was due to the great influx of people into the western colony after the discovery of gold in the nineties. The Jewish congregation grew rapidly; five years after the first "minyan" (the minimum of ten males over thirteen years of age necessary to form a congregation for divine service) gathered in the colony, a handsome synagogue was built and consecrated in Brisbane street. Each of the colonies, except South Australia, has witnessed the rise and decline of a congregation. In New South Wales there was at one time a flourishing community in Maitland. A synagogue was built there in 1879; but owing to adverse circumstances most of the Jews left for other parts, and now little more than sufficient to form a minyan remains. The same fate has befallen the congregation of Toowoomba in Queensland, where in 1879 the Jews built a beautiful house of worship on their own ground, and under such favorable conditions that within a few years the synagogue was entirely free from debt. It is now used only on the high holy days by the few living at Maitland. Rockhampton, also in Queensland, has suffered similarly.

Decline of Congregations.

Perhaps the shortest career was that of the Coolgardie community in western Australia. In 1896 a number of Jews, attracted by the rich gold-fields, were in that city. They at once obtained a grant of land from the government, collected subscriptions, and forthwith proceeded to build a synagogue. Within three years, however, such a thinning-out had taken place that the remaining members were unable to pay the debt on the synagogue; and the building was sold by the creditors to a Masonic body and converted into a Masonic hall.

Jews have been mayors of nearly all the capital cities of Australia, as well as of many smaller towns. The title of justice of the peace, which is only conferred upon men highly respected by their fellow-citizens, has been gained by an exceptionally large number of Jews, as many as thirteen receiving that distinction at one time (1897) in New South Wales alone. The Hon. H. E. Cohen is on the bench in Sydney; and the appointment of chief justice was offered to, but was refused by, Sir Julian Salomons. The agent-generalship of New South Wales, the premier colony, has been administered by two

Jews, Sir Saul Samuel, Bart., K.C.M.G., one of the most prominent and successful Jews in Australian politics, and Sir Julian Salomons.

Jews in Public Life.

A goodly number of Jews have sat in the various parliaments; and, in proportion to the population, a large percentage have held ministerial portfolios. Indeed, the highest office attainable was held by a Jew, when, for a short time in 1899, V. L. Solomon was premier of South Australia. Sir John Vogel, whose history, however, belongs to New Zealand, was also premier for many years.

The foremost among the Jews that have figured as pioneers in Australia is Jacob Montefiore, a cousin of Sir Moses Montefiore. South Australian history records him as one of the founders of the colony; and he was selected by the British government to act on the first board of commissioners, appointed in 1835 to conduct its affairs. His portrait hangs in its National Gallery, and his memory is perpetuated by Montefiore Hill, one of the leading thoroughfares of Adelaide. Jacob Montefiore's activity was not confined to South Australia. With his brother Joseph he gave an impetus to, and left his impress upon, the progress of New South Wales. Jacob owned one of the largest sheep-runs in the colony, and founded and for many years acted as director of the Bank of Australia. The firm that the two brothers established in Sydney in its early days ranked among the first of the business houses of that city. The close connection of these brothers with the colony is further evidenced by the township of Montefiore, which stands at the junction of the Bell and Macquarie rivers in the Wellington valley. Joseph Montefiore was the first president of the first Jewish congregation formed in Sydney in 1832.

Distinguished in Politics.

The Hon. V. L. Solomon of Adelaide is remembered for the useful work he achieved in exploring the vast northern territory of his colony, the interests of which he represented in Parliament. M. V. Lazarus of Bendigo, known as Bendigo Lazarus, also did much to open up new parts in the back country of Victoria. The coal industry of Victoria received a great impetus from the persistent advocacy of the Hon. Nathaniel Levi, who for many years urged the government of Victoria to develop it. The cultivation of beet-root for the production of sugar and spirits likewise owes its existence as an industry to Levi's ceaseless efforts. In his labors on behalf of this industry he published in 1870 a work of 250 pages on the value and adaptability of the sugar-beet. In western Australia the townships of Karridale and Boyanup owe their existence to the enterprise of C. M. Davies, a large lumber merchant.

It is noteworthy that in the theatrical history of Australia a Jew, Barnett Levy, stands as the pioneer. A record of that fact is found in the following entry in "Sydney in 1848," a work published in that year: "In the late twenties His Excellency Sir R. Bourke granted Barnett Levy a license for dramatic performances, with a restriction that he should confine himself to the representation of such pieces only as had been licensed in England by the Lord Chamberlain." Levy was at that time the owner of the original Royal Hotel in George street; and he fitted up the saloon of that establishment as a theater, where the first representations of the legitimate drama in the colony were given. The encouragement that this undertaking received induced the enterprising proprietor to enlarge his sphere of action. He built a theater called the Theater Royal, which was opened in 1833.

Jew Establishes the First Theater.

In the course of the half-century of communal life in Australia, four important Jewish journals appeared: "The Australian Israelite" was issued from 1870 to 1882 in Melbourne, and was edited by S. Joseph, a practised journalist, who also conducted "The Tainororth News"; "The Jewish Herald" of Melbourne has been published, first weekly and then fortnightly, from 1885 onward, under the joint editorship of Rev. E. Blaubaum and Maurice Benjamin; "The Australian Hebrew," conducted by Jacob Goldstein, appeared for only eighteen months in 1895-96; "The Hebrew Standard" was first published in 1897, under the directorship of Alfred Harris.

Journalism and Art.

In the domain of art two Jews, E. P. Fox and Abbey Alpon, have done good work. Paintings by both these artists have been hung in the Melbourne National Gallery. In the Adelaide Gallery hangs a tribute to the memory of H. Abrahams for the services he rendered to the progress of art in Australia. Two Jews of Australian birth have attained to some distinction as writers—S. Alexander and Joseph Jacobs. During the South African war Jews contributed their quota to the Australian contingents to the number of 15. The numbers of Jews in the Australian colonies at the census of 1891 were as follows:

New South Wales	5,484	Tasmania	84
Victoria	6,459	Western Australia	129
South Australia	840	New Zealand	1,463
Queensland	809		
		Total	15,268

The following estimate has recently been given of the Jewish population of Australasia for 1899: New South Wales, 8,140; Victoria, 5,820; South Australia, 1,110; Queensland, 930; Tasmania, 550; Western Australia, 850; New Zealand, 2,270. Total, 19,670.

See ADELAIDE, MELBOURNE, and SYDNEY.

AUSTRIA:* Empire in Europe now united with the kingdom of Hungary; its territorial extent has changed considerably during the past thousand years.

From the Earliest Times to the Charter of Frederick II. (1238): The date of the first settlement of the Jews in Austria, like that of almost all other European countries, is enveloped in obscurity. Folk-lore speaks of a Jewish kingdom supposed to have been founded in Austria, 859 years after the Deluge, by a Jew or pagan called Abraham, who came from the wonderland "Terra Ammiracionis" to Auratim (Stockerau) with his wife, Susanna, and his two sons, Salim and Ataim. This country was ruled over by seventy-two princes down to 210 B.C. It is possible that the Jews themselves in Austria, as in other countries, invented such fables in order to free themselves from the accusation of having participated in the crucifixion of Jesus; but more likely the whole story is an invention of the chroniclers, who wanted to present to their readers interesting tales (Pez, "Scriptores Rerum Austriacarum," i. 1046 *et seq.*, quoted by Scherer, "Rechtsverhältnisse der Juden," 1901, i. 112). The first reliable report of the existence of the Jews in Austria is found in a law respecting tolls issued at Raffelstätten during the reign of Louis the Child, 899–911, article 9 of which reads: "Lawful merchants—*i.e.*, Jews and other merchants—whencesoever they come, whether from this or any other country, shall pay a just toll on their slaves and on other merchandise, as has been the case under the former kings" (Pertz, "Monumenta Germaniæ," Leges, iii. 480). From this statement it would appear probable that Jews lived in those days in Austria. The first documentary evidence comes, however, from the twelfth century. Duke Leopold V. (1177–94), who did a great deal for the development of commerce in Austria, had a Jewish "mintfarmer" (master of the mint) called Shlom, who was engaged in a litigation with a Vienna monastery about the possession of a vineyard. Shlom was assassinated by a mob of Crusaders, because he had had arrested a servant of his who had stolen some money and had subsequently taken the cross ("Quellen zur Gesch. der Juden in Deutschland," ii. 92; "Emeḳ Habaka," ed. Wiener, p. 37). A synagogue in Vienna is first mentioned in 1204; somewhat later appear Krems, Wiener Neustadt, Tulln, Klosterneuburg. As in all German cities, Jewish settlements ("Judendorf," "Vicus Judæorum") were found in Austria in those days. Vienna must have been a considerable community; for in the first half of the twelfth century one of the most prominent rabbis of the time, Isaac ben Moses, author of the compendium on ritual "Or Zarua'," lived there, as well as Abigdor ben Elijah ha-Kohen and his brother Eliezer. At the same time Moses ben Ḥasdai חקן (of Tachau?) was living in Wiener Neustadt. Others are mentioned in Mordecai ben Hillel's (died Aug. 1, 1298) glosses to Alfasi. During the first half of the twelfth century the Jews of Vienna must have been a very influential factor in commercial and political life, because Duke Frederick II. the Belligerent (1230–46) prohibited on their advice the exportation of corn and wine from Austria during his war with Hungary (Pertz, *l.c.* ix. 706); and, if the statement of this chronographer be exaggerated, it is certainly significant that in the charter which Emperor Frederick II. granted to the citizens of Vienna (1237) he should have agreed that no Jew should henceforth hold office. The emperor, who was at war with the duke and who naturally desired to have the good-will of the citizens of Vienna, must have made this concession upon the complaint of the citizens. That the sentiment with regard to the Jews was far from friendly appears from the fact that the emperor expressly states that the Jews, because of their crime—*i.e.*, for having killed Jesus—should be held in everlasting servitude ("cum imperialis auctoritas . . . Iudæis indixerit perpetuam servitutem"). A year later the emperor granted to the Jews of Vienna a charter in which the Jews are called, for the first time in Germany, the emperor's serfs ("servi cameræ nostræ"); and although this expression is meant in the first sense to assert the emperor's right over the Jews, it is, with regard to the fact that the emperor considers them as condemned to eternal servitude, a matter of some importance.

---

* In the present article no reference is made to Hungary or to the former Italian provinces of Austria or to the Austrian Netherlands; Bohemia, Galicia, and the other outlying provinces of contemporary Austria are only treated in so far as they are connected with the history of the monarchy as a whole.

Important Rabbis.

"Servi Cameræ Nostræ."

Charter of Emperor Frederick II. (1238): The jurisdiction over the Jews, like many other fiscal rights, was a subject of controversy between the emperor and the feudal lords. While Emperor Frederick, when he had conquered Vienna, catered to the burghers by excluding the Jews from public offices, he also wished to attach them to his cause, and therefore defined their rights in a charter which is, in its most important features, a repetition of the one granted to the Jews of Germany in 1236. The charter contains ten sections, and states first that the Jews shall be under the emperor's protection ("servi cameræ nostræ"). They are exempt from the duty to furnish vehicles and horses for the royal retinue ("hospites"). If stolen property is found in their possession, they have merely to swear how much they have paid for it in order to receive that sum from the lawful owner. The baptism of Jewish children without the consent of their parents is expressly prohibited; and a heavy fine is imposed on transgressors of this law. Baptism of the slaves of Jews is similarly prohibited. Converts shall be given three days during which the sincerity of their desire to embrace Christianity shall be tested. In civil law Jews and Christians are treated as equals; but a Jew can not be forced to the ordeal and can free himself by oath from any accusation. Jews can not be condemned on the testimony of Christians alone. Their lives are under the protection of the law, and for killing or assaulting a Jew a fine is imposed, which, according to the views of the time, is the reparation for such a crime. In their internal affairs they have perfect autonomy and shall be judged by their rabbis and communal officers ("coram eo qui preest eis"); only in important matters jurisdiction is reserved to the emperor. In connection with the commercial activity of the Jews, dealing in wines, paints, and antidotes is especially mentioned; some of them must, therefore, have been physicians.

Charter of Duke Frederick II. of Austria (1244): After Frederick II. had regained possession of his country he vigorously asserted his rights, although he made some concessions to the states ("Stände"). Thus, he confirmed to the citizens of Wiener Neustadt the privilege that the Jews should not be placed in office, just as Emperor Frederick had confirmed it to the citizens of Vienna; but, on the other hand, he regulated the position of the Jews, and evidently with a benevolent intention. He says that he grants this charter in his desire to give to all those who are living within his dominion a share in his grace and benevolence. This law is a classic type of the legislation on the Jews during the thirteenth and the two subsequent centuries. It remained in force until the expulsion of the Jews from Austria in 1420, and was more or less literally copied in the laws of the following rulers: Bela IV. of Hungary, 1251; Przemysl Ottocar II. of Bohemia, 1254; Boleslav of Kalisz, 1264; and Bolko of Silesia, 1295. The most important feature of this charter is the large space given to money-lending; no fewer than ten of its thirty sections dealing with questions of interest, pledges, and the like, in addition to the sections dealing with the jurisdiction over the Jews. Of greatest importance is the fact that the duke claims the Jews as his own subjects, which is the first instance in which they are claimed by the territorial ruler instead of by the emperor. It may also be noted that the Jews are permitted to receive as interest eight denars a week on the talent, a rate of 173.33 per cent per annum. If any pledge prove to have been stolen, the Jew has merely to swear how much he loaned on it, and that he did not know that it was stolen, in order to receive its value from the owner. Everything may be accepted as pledges, with the exception of bloody or wet garments; and in case of loss by fire or robbery the oath of the Jew is sufficient to prove his assertion. It is expressly stated that Jews may lend money on real estate; but it is uncertain whether, in cases of foreclosure of their mortgages, they may possess them. For the murder of a Jew by a Christian the death penalty is inflicted; while for manslaughter and injury a fine is imposed, part of which is to be paid to the duke, part to the person wounded. Capital punishment is also the penalty for desecration of a Jewish cemetery; while for damage to a synagogue a fine of two talents is inflicted. Abduction of a Jewish child is punishable as theft. Their lawsuits are conducted in the duke's court, and he appoints a special judge for Jewish affairs ("judex Judæorum"). There is also a "magister Judæorum," a rabbi or overseer of the congregation, elected by the Jews and confirmed by the duke; he is their legal representative, and has authority to administer their internal affairs. Like the imperial law, that of Duke Frederick also states that a Jew can not be condemned unless there is a Jewish as well as a Christian witness against him; but it differs from the imperial law in that the duke permits Jews to challenge an evil-doer to the ordeal. It is, however, most likely that in such a case the Jews hired a champion.

The Interregnum (1254-1276): Duke Frederick fell in battle June 15, 1246; and as he left no children, his dominion became the bone of contention for various claimants, from whom King Przemysl Ottocar II. succeeded in 1251. The new ruler naturally sought to gain the good-will of the citizens in his newly acquired territory, and, therefore, soon after the occupation of Austria, he confirmed to the cities the privilege granted to them by Duke Frederick of the exclusion of Jews from public office. His political plans required for their accomplishment a great deal of money, and this was evidently the reason that he renewed (March 29, 1254) the privileges granted to the Jews by Duke Frederick; proclaiming, like his predecessor, his desire to show his good-will to all his subjects ("Wann wir wellen, das allerlay leut die in unser herrscheft wonund sind, unser genad und gütwilligkait tailheftig werden funden"). The only difference between the charter of Ottocar and that of Frederick is that Ottocar prohibits taking sacred vestments as pledges. He, further, exempts the Jews from returning pledges on their holy days, does not limit the rate of interest, and protests against the Blood Accusation, referring to the papal decrees on that subject. These insignificant differences can scarcely have been due to a change in policy: they were most likely caused by emergencies of the intervening period. It seems that these charters were not respected; for, on his return from the crusade against the heathen Prussians, Ottocar again renewed the grants to the Jews (March 8, 1255). Further, he did not enforce the ordinance excluding Jews from public office; for, in a document dated 1257, two Jews are mentioned as the king's financiers ("comites cameræ").

The Church, then at the height of her power, had, since the Lateran Council of 1215, attempted to circumscribe the position of the Jews; but her decrees were not carried into effect. Pope Clement IV., therefore, sent Cardinal Guido, a Cistercian monk, as his delegate to northern Europe to enforce ecclesiastical discipline. In this capacity Guido presided over various diocesan councils which discussed, among other matters, the enforcement of the law against the Jews. Such a council was held in Vienna May 10-12, 1267. The canons of this council enjoin the distinctive Jewish dress, and the payment by the Jewish inhabitants to the priest in whose parish they dwell of an annual sum equal to that which he would receive were Christians living in their places. Jews are prohibited from frequenting bathing-houses and taverns of Christians, from employing Christian domestics, from acting as tax-collectors, and from holding any other public office. A Jew cohabiting with a Christian woman shall be heavily fined; while the woman shall be whipped and expelled from the city. Social intercourse between Jews and Christians is strictly prohibited, and Christians shall not buy meat or other food from Jews, as the latter are likely to poison it. If a Jew exacts exorbitant interest from Christians, he shall be excluded from all intercourse with Christians. When the host is carried through the streets, the Jews shall close the doors and shutters of their houses and shall remain within. A similar duty is enjoined for Good Friday. Jews shall not discuss matters of religion with the common people, shall not prevent the wives and children of converts from embracing Christianity, nor convert a Christian to Judaism. They shall not attend Christian patients nor call upon them. They shall not build new synagogues, and when they repair an old synagogue they shall not enlarge it. On days of abstinence they shall not carry meat in the streets uncovered (Pertz, *l.c.*, "Scriptores," ix. 699 *et seq.*; H. Baerwald, "Die Beschlüsse des Wiener Conciliums über die Juden aus dem Jahre 1267 in Wertheimer's Jahrbuch," 1859-60, pp. 180-208). Ottocar renewed this charter of 1254 on Aug. 23, 1268. Complaints by the ecclesiastics, that the Jews kept Christian servants, show that the canons of the Vienna council remained to a great extent a dead letter.

Under the House of Hapsburg (1276-1420): Through the treaty of Nov. 21, 1276, the Austrian territories were ceded to Rudolph of Hapsburg as a vacant vassalage, which he later transferred, in his capacity as German emperor, to his sons Albrecht I. and Rudolph (Dec. 27, 1282). He at once asserted his rights by granting a new charter to the Jews, because in this respect, as in many others, he was anxious to emphasize the fact that Ottocar's dominion was not a legitimate one. This charter, dated March 4, 1277, was also, in its principal points, a reproduction of that issued by Frederick II. in 1244, although Rudolph issued it not as duke of Austria, but as German emperor. It was not until 1331 that the dukes of Austria received the right to keep Jews. Another important difference lies in the fact that the charter of Rudolph was limited to the Austrian possessions, while in Bohemia the regulations of Ottocar remained in force. Rudolph, who naturally, like Ottocar, wished to attach the cities to his government, also confirmed to several of them the privilege of excluding Jews from public office; however, he refused to confirm forged privileges of Wiener Neustadt dating from about 1270, and which were still more unfavorable to the Jews. Under his successor, Albrecht I. (duke of Austria from 1282; German emperor from 1298; assassinated 1308), the Jews were protected in Germany; while, in his own dominions, Albrecht connived at the outrages committed upon them by mobs or by princes. The sentiment of the populace with regard to the Jews may be judged from the verses of the contemporary poet, Seyfried Helbling, who complains that there are too many Jews in the country, and that thirty Jews are enough to fill the largest city with "stench and unbelief." He therefore advises that all the Jews be burned, or sold at the rate of thirty for a penny (Haupt, "Zeitschrift für Deutsche Alterthümer," iv.). In 1293 the Jews of Krems were accused of having murdered a Christian; two were broken on the wheel, and the others had to pay heavy ransom for their lives.

Persecutions.

The persecution started in Franconia by Rindfleisch also showed its effects in Austria, and in various cities the accusation was made that the Jews had desecrated the host; so that while Albrecht fined the cities in Franconia heavily for outrages committed against the Jews, the Jewish inhabitants of Korneuburg were killed or expelled (1306). There is no report of any punishment of the participants in the massacre, although it had been proved by the bishop that the miracle of the host was a fraud perpetrated by a priest who, after dipping a host in blood, claimed that it bled because the Jews had pierced it. Only from St. Poelten is it reported that Albrecht threatened the city with destruction for an outrage committed against the Jews, and that the city had to pay a ransom of 3,500 talents. Under Albrecht's successor, Frederick (1308-30), the only event of importance is his assignment of the Jewish taxes to the archbishop of Salzburg for services rendered in the war against his rival, Ludwig of Bavaria. Frederick levied taxes on the Jews in Austria on the basis of his rights as German emperor; he also canceled the debt of Albert von Rauhenstein to a Jewish money-lender, the first instance of a usage that became frequent in later times (see Tötbrief). Frederick's order, that no Jew should engage in tailoring or in selling cloth ("Gewand-Schneiden") in the city of Wiener Neustadt, is a further evidence of the growing hostility of the municipalities toward the Jews and of the disposition of the rulers to yield to them.

The First Tötbrief.

Under Albrecht II. (1330-58) and Otto (1330-39), brothers and successors of Frederick, the right to keep Jews was expressly granted by the emperor to the dukes of Austria by the treaty of Munich, May 4, 1331 ("Darzu sollen sie die Juden, die hinter in gesessen seindt, in allen den Rechten und Gewohnheiten haben und niessen, als sie oder ir Vordern herbracht haben"). It became the custom in those days for the emperor, in order to obtain the good-will of his powerful vassals, to transfer among other royal privileges the right to keep Jews; that is, to tax them. In spite of the greater interest which the territorial rulers took in their Jews, when they became their taxable property, the persecutions, begun under Armleder in Alsace in 1338, had their counterparts in Austria. In Retz, Znaim, Horn, Eggenburg, Neuburg, and Zwetl the Jews were massacred, and in the first-named city, where a desecrated host had performed the usual miracles, a church of the "Holy Blood" was erected in commemoration of it. Evidently because of their fear of similar massacres, the Jews of Vienna voluntarily reduced the rate of interest from 173.33 per cent, to which they were entitled under the charter of 1244, to 65 per cent on large and to 86 per cent on small loans. This document, written both in Hebrew and in German, is preserved in the municipal archives of Vienna (Wolf, "Studien zur Jubelfeier der Wiener Universität," Vienna, 1865, p. 170). The desire of Duke Albrecht II. to protect the Jews against mob violence, for which the desecrated host furnished pretexts, is evident from the fact that he wrote to Pope Benedict XII. asking him to order an investigation of alleged miracles in connection with a desecrated host in Pulka, which, according to the opinion of some, were merely a pretext to pillage the Jews.

The pope, in an ambiguous reply dated Aug. 29, 1338, directs that an investigation be made; but of the result nothing is known.

New sufferings came upon the Jews of Austria with the appearance of the Black Death (1349), though not to so great an extent as elsewhere in Germany. In various cities the accusation was spread that the Jews had caused the plague by poisoning the wells; and in Krems, Stein, Mautern, and other places the Jewish communities were massacred. For this infringement of the public peace and for the destruction of the duke's property the cities were fined, three of the mob leaders were executed, while others had to pay ransom for their lives. Contemporary chronographers call the duke for this act of justice a partizan of the Jews ("fautor Judæorum"). A report, first found in an old manuscript, "Wiener Geserah" (Steinschneider, "Cat. Bodl." col. 537; Grätz, "Gesch. der Juden," 3d ed., vii. 344, wrongly based on Pez, *l.c.* i. 541), according to which the

Jews of Vienna killed themselves in their synagogue upon the advice of their rabbi Jonah, is unfounded (see Scherer, *l.c.* p. 371). Albrecht's successor, Rudolph IV. (1358-65), forged the so-called "Privilegium majus," according to which Emperor Frederick I. had in 1156 given to the dukes of Austria unusual privileges, among which was the right to keep Jews and "public usurers." Emperor Karl IV. confirmed the right of the Austrian dukes to keep Jews in all places in their dominion, and made a treaty with the dukes of Austria, in his capacity as king of Bohemia, that neither party would allow Jews who had left their country to settle in that of the other (Dec. 13, 1360). This measure was adopted in order to prevent Jews who might endeavor to escape from extortions from seeking another home. If a Jew found another home, his bonds were invalidated. Such "Tötbriefe," issued by Rudolph are extant from the year 1362. The same conditions prevailed under Rudolph's brothers and successors, Albrecht III. (1365-95) and Leopold III. (1365-86). When Jews had left the country, those who remained had to indemnify the duke for the loss which he had suffered. In 1367 several Jews, probably the representatives of their coreligionists, made a treaty with the dukes, promising to pay 20,000 florins for two Jews, Musch and Chadgim (Ḥayyim), who had left the Austrian territory; in consideration of which payment the dukes allowed them to take all of the fugitives' property. In 1366 the dukes issued an order that no Jew should engrave a seal; and two years later they prohibited dealing in gold and silver and money-changing by Jews, restricting them to lending money on pledges.

Restrictions on Occupations.

About 1370 all the Jews in the Austrian territories were imprisoned by secret order, and their property was confiscated. One report has it that the object of this outrage was to convert the Jews to Christianity. However this may have been, the attempt failed; only two, a man of forty and a young girl, were baptized, the former of whom returned to Judaism and was burned at the stake. At a subsequent period, probably in 1378, a new charter was granted to the Jews. The deed is not now extant; but from quotations in later documents it is learned that the Jews were given a renewed assurance of the ducal protection; the right of residence in all the ducal lands was accorded to them; they were to be assisted in collecting their debts; and the dukes undertook to issue no letters of invalidation. The Jews were not to be blackmailed by loans and taxes beyond those stipulated by their charters, and accusations against them must be proved by the testimony of honest ("unversprochenen") Christians and Jews.

Notwithstanding the promise that they should not be troubled with demands for loans by the dukes, the latter in 1379-80 exacted another loan of 10,000 pounds of Vienna pennies, assessed under the penalty of excommunication against all the Jews of Austria. Similarly, in spite of the promise granted in the charter, the dukes in 1382 remitted the interest which the citizens of Vienna owed to the Jews on loans. An order of 1371 prohibits the sale of wine and grain by the Jews of Styria; yet the Jews of Vienna are expressly exempted from the impost laid by the municipality of Vienna on wine brought into the city.

How did the Jews, who in 1370 were robbed of all their property, levy ten years later the sum of 10,000 pounds of pennies on the members of their community? This is easily answered, when the fact is considered that the confiscation did not include the bonds which they had in their hands and which constituted the greater part of their possessions. Thus the condition of the Jews under rulers who were considered partial to them was rather precarious; but their situation became worse under the succeeding dukes. Of the Jews under Albrecht IV. (1395-1404), son of Albrecht III., and Wilhelm, the son of Leopold III. (1395-1406), who ruled over Austria in common, very little is known. The charter granted to the Jews of Carinthia and Styria Oct. 23, 1396, which states that the privileges granted them in 1377 shall be confirmed, is merely a confirmation of the "Handfeste" (charter) described above.

Further Restrictions.

Restrictions, such as the prohibition of dealing in any merchandise in the city of Linz (1396), or of holding real estate, even where it had been obtained as a foreclosed mortgage, are based on the principle that Jews should be restricted to money-lending. Of particular interest is the fact that a Jew, named Guntzenhauser, had to sign a promise that he would not practise medicine (1403). This was evidently done upon the demand of the university, whose professors frequently complain of the competition of Jewish physicians. The invocation of the "great Jew Czaphonas Paneach," found in that document, is evidently not, as Scherer (*l.c.* p. 403) and Wolf ("Studien zur Jubelfeier der Wiener Universität," p. 16, Vienna, 1865) interpret it, a mystic formula: it refers to the Aramaic version of Gen. xli. 45, and means, therefore, an oath in the name of Him who knoweth all secrets.

The hostility of the general population to the Jews manifested itself in 1406, when a fire broke out in the synagogue of Vienna and the mob used the opportunity to sack the Jewish quarter. The worst, however, was to come under Albrecht V. (1404-39), who, when at fourteen he was declared of age, succeeded his father Albrecht IV., and the latter's cousin, Leopold IV. Albrecht was a religious fanatic; and the popular prejudice, which declared the Jews responsible for every evil, had at that time accused the Jews of having caused the Hussite schism. This fanaticism found soon a pretense of justification in the circulation of the story that a rich Jew, Israel of Enns, had bought of a sexton's wife a consecrated host in order to profane it.

Host-Tragedy of Enns.

Under the order of the duke, all the Jews of Austria were imprisoned (May 23, 1420); the poor among them were expelled from the country; and the well-to-do were kept in prison, and their property was confiscated. Some, in order to save their lives, embraced Christianity, but of these the majority returned to Judaism and were burned at the stake. Others committed suicide; and this probably gave rise to the legend that R. Jonah and the whole congregation of Vienna killed themselves in the synagogue. The only result of an appeal to the pope (Martin V.) by the Jews of Italy was the bull of Dec. 23, 1420, decreeing that Jewish children under the age of twelve should not be baptized. The fate of the Jews he either could not or would not alter, although in his bull of Feb. 12, 1418, he had confirmed to them the whole of the privileges which they had possessed in Germany. All the Jews who had not professed Christianity were burned near Vienna, March 12, 1421; the duke confiscated their property; their houses were either sold or donated to persons of distinction; and the synagogue was destroyed, and the materials given to the university. The children of the Jews were placed in monasteries to be educated; and the duke made a treaty with his cousin Ernst of Styria that the Jews in the latter's dominion should have no dealings with his subjects. Even in his own dominion, however, he could not enforce his law, for in 1438 he issued a safe-conduct to a Jew, named Isserlein, basing this favor on the fact that the latter was innocent of the crime for which the Jews had been punished. His epitaph, however, praises him for the cremation of the Jews ("Jussi Judæos ante cremare meos").

Culture: While the number of Jews in Austria must have been considerable, and some congregations, as those of Vienna, Wiener Neustadt, and Krems, had contained Jewish settlements as early as the cities along the Rhine, and while Eliezer of Bohemia speaks with an expression of pity of the spiritual conditions among the Jews of Hungary and Poland (Buber, "Anshe Shem," p. x, Cracow, 1895), little is known of literary activity among the Jews of this country. Of the fourteenth century is Meïr ben Baruch ha-Levi in Vienna, who is reported to have introduced the title Morenu as license for the exercise of the rabbinical prerogative. Among his contemporaries were Abraham Klausner, Shalom of Neustadt, and Aaron of Neustadt. Their activity is chiefly in the field of the minutiæ of law, in which Shalom's disciple, Jacob ha-Levi (Maharil), became specially prominent. The latter has preserved to us the fact that as early as the fourteenth century the Jews of Austria had their own ritual and their peculiar melodies in public worship ("Minhag Bene Oesterreich"; see Maharil, in "Laws of Yom Kippur," ed. Warsaw, 1874, p. 47). Religious practises in Austria must have been so developed in the twelfth century that Isaac of Durbalo, a Frenchman, thought them worthy of his special attention, and he quotes what he has heard about them in Olmütz (Maḥzor Vitry, p. 338, Berlin, 1896–97). There must, however, have been some participation in the spiritual life of their neighbors, as Jewish physicians are frequently mentioned, and their practise seems to have aroused the jealousy of their Christian competitors. It is further probable that G. Wolf is right when he thinks that the title "Morenu" was introduced by R. Meïr ha-Levi in imitation of the conferring of degrees in the University of Vienna founded in 1365 ("Studien zur Jubelfeier der Wiener Universität," p. 15, Vienna, 1865). The only Talmudic scholar of great literary reputation was Israel Isserlein of Marburg, Styria, author of "Terumat ha-Deshen," who lived in the first half of the fifteenth century. The great-grandfather of Isserlein, Israel of Krems, was appointed by Emperor Rupert chief rabbi of all the Jews in the German empire (May 3, 1407), which most likely meant that he should be responsible for the collection of taxes (Grätz, "Gesch. der Juden," 3d ed., viii. 102). The assumption that Israel was from Kremsier (Frankel-Grün, "Gesch. der Juden von Kremsier," i. 15, Breslau, 1896) is improbable (see "Deborah," 1902, p. 132). The Jews refused to submit to him.

From the Expulsion of 1420 to that of 1670: Albrecht's posthumous son, Ladislaus (1440–57), who was declared of age in 1452, was a religious fanatic, and in the treatment of the Jews followed the example of his father. In charters granted to the municipality of Vienna (June 6, 1453, and Sept. 27, 1455) he confirmed his father's law, that no Jew should have the right to reside in that city. He further declared that loans contracted by his subjects from Jews residing elsewhere should be invalid, just as his father had in 1423 made an agreement with his cousin, Ernst of Styria, that the Jews living in the latter's dominion should not be permitted to lend money to the subjects of Albrecht. The physicians of Vienna complained that a Jew who had a safe-conduct from the German emperor Frederick III., Ladislaus' cousin, practised medicine (1454). The young king's enmity toward the Hussites was even more bitter than that of his father; and under his protection the fanatic monk Capistrano preached against the heretics, arousing the population against the Jews. They were expelled from Olmütz, Brünn, Znaim, Neustadt, Breslau, Schweidnitz, and other cities of Silesia (1454–55).

Persecutions: Capistrano.

Ladislaus died when only seventeen years old (Nov. 23, 1457), and his lands passed into the possession of Frederick V. of Styria, who was also German emperor after 1440. Frederick was always in financial difficulties, and therefore needed the Jews; but he was also favorably inclined to them from humanitarian reasons, so that people gave him the nickname "King of the Jews." Probably because of the attacks on them by Capistrano, Frederick obtained from Pope Nicholas V. a bull (issued Sept. 20, 1451) granting him express permission to allow Jews to reside in all of his dominions, which included Austria, Carinthia, Carniola, Styria, Tyrol, and Alsace (Vorder-Oesterreich). This permission is explained by the fact that the Jews were tolerated for the benefit of the inhabitants needing money-lenders (Christians not being allowed to engage in this business), and, further, because tradition had from time immemorial sanctioned this toleration. A correct text is found in Scherer (*l.c.* p. 436). When Frederick succeeded to the possessions of Austria, the states ("Stände") petitioned (1458) that the expulsion of the Jews from Upper and Lower Austria be enforced. The petition was renewed in 1460, and in his reply (March 23, 1460) in which he grants the petitioners' request and states that Jews shall settle nowhere in his territories except where they have been permitted to reside before, he repudiates the rumor that he favored the Jews: "Wie man sein genad beschulldig, sein genad halt hye hewser vol Juden und thue den gnadig schub und fürderung, etc., wolt sein kay. gn. gern solcher zicht vertragen

Restrictions on Occupations.

Jews of Vienna killed themselves in their synagogue upon the advice of their rabbi Jonah, is unfounded (see Scherer, *l.c.* p. 371). Albrecht's successor, Rudolph IV. (1358-65), forged the so-called "Privilegium majus," according to which Emperor Frederick I. had in 1156 given to the dukes of Austria unusual privileges, among which was the right to keep Jews and "public usurers." Emperor Karl IV. confirmed the right of the Austrian dukes to keep Jews in all places in their dominion, and made a treaty with the dukes of Austria, in his capacity as king of Bohemia, that neither party would allow Jews who had left their country to settle in that of the other (Dec. 13, 1360). This measure was adopted in order to prevent Jews who might endeavor to escape from extortions from seeking another home. If a Jew found another home, his bonds were invalidated. Such "Tötbriefe" issued by Rudolph are extant from the year 1362. The same conditions prevailed under Rudolph's brothers and successors, Albrecht III. (1365-95) and Leopold III. (1365-86). When Jews had left the country, those who remained had to indemnify the duke for the loss which he had suffered. In 1367 several Jews, probably the representatives of their coreligionists, made a treaty with the dukes, promising to pay 20,000 florins for two Jews, Musch and Chadgim (Ḥayyim), who had left the Austrian territory; in consideration of which payment the dukes allowed them to take all of the fugitives' property. In 1366 the dukes issued an order that no Jew should engrave a seal; and two years later they prohibited dealing in gold and silver and money-changing by Jews, restricting them to lending money on pledges. About 1370 all the Jews in the Austrian territories were imprisoned by secret order, and their property was confiscated. One report has it that the object of this outrage was to convert the Jews to Christianity. However this may have been, the attempt failed; only two, a man of forty and a young girl, were baptized, the former of whom returned to Judaism and was burned at the stake. At a subsequent period, probably in 1378, a new charter was granted to the Jews. The deed is not now extant; but from quotations in later documents it is learned that the Jews were given a renewed assurance of the ducal protection; the right of residence in all the ducal lands was accorded to them; they were to be assisted in collecting their debts; and the dukes undertook to issue no letters of invalidation. The Jews were not to be blackmailed by loans and taxes beyond those stipulated by their charters, and accusations against them must be proved by the testimony of honest ("unversprochenen") Christians and Jews.

Notwithstanding the promise that they should not be troubled with demands for loans by the dukes, the latter in 1379-80 exacted another loan of 10,000 pounds of Vienna pennies, assessed under the penalty of excommunication against all the Jews of Austria. Similarly, in spite of the promise granted in the charter, the dukes in 1382 remitted the interest which the citizens of Vienna owed to the Jews on loans. An order of 1371 prohibits the sale of wine and grain by the Jews of Styria; yet the Jews of Vienna are expressly exempted from the impost laid by the municipality of Vienna on wine brought into the city.

Further Restrictions.

How did the Jews, who in 1370 were robbed of all their property, levy ten years later the sum of 10,000 pounds of pennies on the members of their community? This is easily answered, when the fact is considered that the confiscation did not include the bonds which they had in their hands and which constituted the greater part of their possessions. Thus the condition of the Jews under rulers who were considered partial to them was rather precarious; but their situation became worse under the succeeding dukes. Of the Jews under Albrecht IV. (1395-1404), son of Albrecht III., and Wilhelm, the son of Leopold III. (1395-1406), who ruled over Austria in common, very little is known. The charter granted to the Jews of Carinthia and Styria Oct. 23, 1396, which states that the privileges granted them in 1377 shall be confirmed, is merely a confirmation of the "Handfeste" (charter) described above. Restrictions, such as the prohibition of dealing in any merchandise in the city of Linz (1396), or of holding real estate, even where it had been obtained as a foreclosed mortgage, are based on the principle that Jews should be restricted to money-lending. Of particular interest is the fact that a Jew, named Guntzenhauser, had to sign a promise that he would not practise medicine (1403). This was evidently done upon the demand of the university, whose professors frequently complain of the competition of Jewish physicians. The invocation of the "great Jew Czaphonas Paneach," found in that document, is evidently not, as Scherer (*l.c.* p. 403) and Wolf ("Studien zur Jubelfeier der Wiener Universität," p. 16, Vienna, 1865) interpret it, a mystic formula: it refers to the Aramaic version of Gen. xli. 45, and means, therefore, an oath in the name of Him who knoweth all secrets.

Host-Tragedy of Enns.

The hostility of the general population to the Jews manifested itself in 1406, when a fire broke out in the synagogue of Vienna and the mob used the opportunity to sack the Jewish quarter. The worst, however, was to come under Albrecht V. (1404-39), who, when at fourteen he was declared of age, succeeded his father Albrecht IV., and the latter's cousin, Leopold IV. Albrecht was a religious fanatic; and the popular prejudice, which declared the Jews responsible for every evil, had at that time accused the Jews of having caused the Hussite schism. This fanaticism found soon a pretense of justification in the circulation of the story that a rich Jew, Israel of Enns, had bought of a sexton's wife a consecrated host in order to profane it. Under the order of the duke, all the Jews of Austria were imprisoned (May 23, 1420); the poor among them were expelled from the country; and the well-to-do were kept in prison, and their property was confiscated. Some, in order to save their lives, embraced Christianity, but of these the majority returned to Judaism and were burned at the stake. Others committed suicide; and this probably gave rise to the legend that R. Jonah and the whole congregation of Vienna killed themselves in the synagogue. The only result of an appeal to the pope (Martin V.) by the Jews of Italy was the bull of Dec. 23, 1420, decreeing that Jewish children under the age of twelve should not be baptized. The fate of the Jews he either could not or would not alter, although in his bull of Feb. 12, 1418, he had confirmed to them the whole of the privileges which they had possessed in Germany. All the Jews who had not professed Christianity were burned near Vienna, March 12. 1421: the duke confiscated their property; their houses were either sold or donated to persons of distinction; and the synagogue was destroyed, and the materials given to the university. The children of the Jews were placed in monasteries to be educated: and the duke made a treaty with his cousin Ernst of Styria that the Jews in the latter's dominion should have no dealings with his subjects. Even in his own dominion, however, he could not enforce his law, for in 1438 he issued a safe-conduct to a Jew, named Isserlein, basing this favor on the fact that the latter was innocent of the crime for which the Jews had been punished. His epitaph, however, praises him for the cremation of the Jews ("Jussi Judæos ante cremare meos").

Culture: While the number of Jews in Austria must have been considerable, and some congregations, as those of Vienna, Wiener Neustadt, and Krems, had contained Jewish settlements as early as the cities along the Rhine, and while Eliezer of Bohemia speaks with an expression of pity of the spiritual conditions among the Jews of Hungary and Poland (Buber, "Anshe Shem," p. x, Cracow, 1895), little is known of literary activity among the Jews of this country. Of the fourteenth century is Meïr ben Baruch ha-Levi in Vienna, who is reported to have introduced the title Morenu as license for the exercise of the rabbinical prerogative. Among his contemporaries were Abraham Klausner, Shalom of Neustadt, and Aaron of Neustadt. Their activity is chiefly in the field of the minutiæ of law, in which Shalom's disciple, Jacob ha-Levi (Maharil), became specially prominent. The latter has preserved to us the fact that as early as the fourteenth century the Jews of Austria had their own ritual and their peculiar melodies in public worship ("Minhag Bene Oesterreich"; see Maharil, in "Laws of Yom Kippur," ed. Warsaw, 1874, p. 47). Religious practises in Austria must have been so developed in the twelfth century that Isaac of Durbalo, a Frenchman, thought them worthy of his special attention, and he quotes what he has heard about them in Olmütz (Maḥzor Vitry, p. 338, Berlin, 1896–97). There must, however, have been some participation in the spiritual life of their neighbors, as Jewish physicians are frequently mentioned, and their practise seems to have aroused the jealousy of their Christian competitors. It is further probable that G. Wolf is right when he thinks that the title "Morenu" was introduced by R. Meïr ha-Levi in imitation of the conferring of degrees in the University of Vienna founded in 1365 ("Studien zur Jubelfeier der Wiener Universität," p. 15, Vienna, 1865). The only Talmudic scholar of great literary reputation was Israel Isserlein of Marburg, Styria, author of "Terumat ha-Deshen," who lived in the first half of the fifteenth century. The great-grandfather of Isserlein, Israel of Krems, was appointed by Emperor Rupert chief rabbi of all the Jews in the German empire (May 3, 1407), which most likely meant that he should be responsible for the collection of taxes (Grätz, "Gesch. der Juden," 3d ed., viii. 102). The assumption that Israel was from Kremsier (Frankel-Grün, "Gesch. der Juden von Kremsier," i. 15, Breslau, 1896) is improbable (see "Deborah," 1902, p. 132). The Jews refused to submit to him.

From the Expulsion of 1420 to that of 1670: Albrecht's posthumous son, Ladislaus (1440–57), who was declared of age in 1452, was a religious fanatic, and in the treatment of the Jews followed the example of his father. In charters granted to the municipality of Vienna (June 6, 1453, and Sept. 27, 1455) he confirmed his father's law, that no Jew should have the right to reside in that city. He further declared that loans contracted by his subjects from Jews residing elsewhere should be invalid, just as his father had in 1423 made an agreement with his cousin, Ernst of Styria, that the Jews living in the latter's dominion should not be permitted to lend money to the subjects of Albrecht. The physicians of Vienna complained that a Jew who had a safe-conduct from the German emperor Frederick III., Ladislaus' cousin, practised medicine (1454). The young king's enmity toward the Hussites was even more bitter than that of his father; and under his protection the fanatic monk Capistrano preached against the heretics, arousing the population against the Jews. They were expelled from Olmütz, Brünn, Znaim, Neustadt, Breslau, Schweidnitz, and other cities of Silesia (1454–55).

Persecutions: Capistrano.

Ladislaus died when only seventeen years old (Nov. 23, 1457), and his lands passed into the possession of Frederick V. of Styria, who was also German emperor after 1440. Frederick was always in financial difficulties, and therefore needed the Jews; but he was also favorably inclined to them from humanitarian reasons, so that people gave him the nickname "King of the Jews." Probably because of the attacks on them by Capistrano, Frederick obtained from Pope Nicholas V. a bull (issued Sept. 20, 1451) granting him express permission to allow Jews to reside in all of his dominions, which included Austria, Carinthia, Carniola, Styria, Tyrol, and Alsace (Vorder-Oesterreich). This permission is explained by the fact that the Jews were tolerated for the benefit of the inhabitants needing money-lenders (Christians not being allowed to engage in this business), and, further, because tradition had from time immemorial sanctioned this toleration. A correct text is found in Scherer (*l.c.* p. 436). When Frederick succeeded to the possessions of Austria, the states ("Stände") petitioned (1458) that the expulsion of the Jews from Upper and Lower Austria be enforced. The petition was renewed in 1460, and in his reply (March 23, 1460) in which he grants the petitioners' request and states that Jews shall settle nowhere in his territories except where they have been permitted to reside before, he repudiates the rumor that he favored the Jews: "Wie man sein genad beschulldig, sein genad halt hye hewser vol Juden und thue den gnadig schub und fürderung, etc., wolt sein kay. gn. gern solcher zicht vertragen

Petitions Against Re-settlement.

sein von den die es erdencken, nachdem sein kay. gn. daran zumal ungütlich beschieht" (Scherer, *l.c.* p. 427). The complaints against the residence of Jews in Austria were frequently repeated in spite of the emperor's assurance that they would not be allowed to settle there; so that in his reply, dated Dec. 13, 1463, he makes the remark that while he was willing to carry out his promise not to allow any Jews to settle in Austria, he could not, in his capacity as king of the Romans, refuse them permission to come to his court whenever they had business to transact there. For some years this seems to have sufficed; but in 1479 the complaint is repeated, and the emperor is petitioned to issue a decree that no debt shall be valid unless the bond is signed in the presence of a judge.

The hostility to the Jews was constantly fomented by the clergy, who refused to give absolution or to admit to communion any judge or other official who in a litigation should render sentence in favor of the Jews. In order to stop this agitation, Frederick obtained from Pope Paul II. the bull "Sedis apostolicæ copiosa benignitas" (May 31, 1469), in which the pope declared that the Jews had a claim to be treated justly. The emperor also intervened in favor of the Jews of Endingen, who had been accused of the murder of a Christian child (see Blood Accusation and Josel von Rosheim); and he took similar action when charges of a like nature were made in Trent (1476) and Regensburg (1478). The animosity of the citizens remained unabated. When the Hungarian king Matthias Corvinus captured Vienna in 1485, the citizens petitioned him that "in consideration of their disgraceful action toward God Almighty, the Jews should be expelled." The king granted the petition. The hostility of the population is further manifested in various polemical works of the period (Scherer, *l.c.* p. 433).

Expulsions: Carinthia and Styria.

The death of Frederick (Aug. 19, 1493) at once changed the condition of the Jews. His successor, Maximilian (1493–1519), seems, as heir presumptive, to have tried to induce his father to change his attitude toward the Jews. When Maximilian took possession of the throne, conditions changed to some extent in favor of the Jews, because his political ambitions—especially his wars with Francis I. of France—forced him to protect the Jews, who furnished his only reliable source of income. As under his father, the states ("Stände") of Austria constantly complain that, contrary to their privileges, Jews are tolerated. Maximilian always answers by referring to the temporary character of his grants to the latter. Still, as can be seen from his attitude toward the charges made by the convert Pfefferkorn, who demanded the confiscation of all rabbinical books, the emperor was not favorably inclined to the Jews. When, therefore, the states in Carinthia and in Styria declared their willingness to indemnify him for the taxes of the Jews, he decreed their expulsion from those provinces (Carinthia, March 9, 1496; Styria, March 12, 1496), which, partly under his father, partly under his own reign, had been united with the Austrian possessions. The states of Styria paid for the privilege of the expulsion of the Jews 38,000 pounds of Vienna pennies; while those of Carinthia paid 4,000 Rhenish florins (the text of this decree was published in "Allg. Zeit. des Jud." 1849, p. 23). The motives assigned for the expulsion are partly religious, arising from alleged insults to the sacrament, and partly economic, in view of the Jews' usurious and fraudulent business practises. Carniola had only one Jewish settlement, in Laibach, and the citizens of that town also obtained a decree ordering the expulsion of the Jews (Jan. 1, 1515). In all of these territories Jews had existed since the thirteenth century, and probably earlier, as is indicated by the names of many places; *e.g.*, Judenburg, Judendorf, etc.

General Policy.

The decrees of expulsion, with very few exceptions, remained in force until the new era following the year 1848. In Austria proper the petition of the states for the expulsion of the Jews, though often repeated, was never fully granted; and in 1518 the emperor, in replying to a petition for expulsion, stated that, while he was willing to expel the Jews from Vienna and from the province of Austria, it was not his intention to expel them from the province at once. He, therefore, permitted them to reside in the cities on the border, Eisenstadt, Marchegg, etc., where they should have a chance to look for a place of definite settlement. This policy the emperor maintained to the last. Shortly before his death (Jan. 12, 1519), he, in reply to repeated complaints of the states, announced that Jews who had been expelled from his various dominions would be allowed to reside in the border towns; and he further exempted from the expulsion the Jew Hürschl, who had been permitted to reside in Vienna (May 24, 1518). This is the beginning of the era of the Court Jews. Maximilian was succeeded by his grandson Charles V. (1519–56), who, in his capacity of German emperor, exercised a considerable influence upon the condition of the Jews in Austria. The frequent expulsions at the end of the fifteenth and at the beginning of the sixteenth century had made it imperative for the German emperor (who, in his illusionary capacity as Roman emperor, considered himself as the protector of all the Jews, and who, as such, derived an income from the Jewish taxes) to provide some remedy. Charles, therefore, at the commencement of his reign confirmed the privileges of the Jews (1520), among which was the important stipulation that they should not be expelled without his consent from places where they had been allowed to settle. This charter he confirmed after his coronation as Roman emperor (May 18, 1530), and again on April 3, 1544. In the latter document he also declared against the blood accusation. The policy of maintaining the Jews where they had once been tolerated and of prohibiting their settlement elsewhere remained in general the policy of the Austrian rulers after his time, although this rule was not without exceptions. When, in 1525, the states of Austria again demanded that Jews should not be permitted to reside in any part of Austria, Ferdinand (to whom, in 1522, Charles had assigned his Austrian possessions) emphatically replied (Feb. 23, 1526) that he would allow them to live in any part of his possessions where Jews had previously dwelt. On May 28, 1529, he again confirmed the charter of the Jews in Austria. Individual Jews occasionally received special favors, as, for example, the physician Lazarus, whom the tutor of the emperor's children commends highly for services rendered to the imperial household (1534), and the Jew Moyse, who had distinguished himself by services rendered to the mint (1542). The latter was granted, as a special favor, permission to deal in all kinds of merchandise, though he was prohibited from lending money on interest. In spite of his promises to allow Jews to reside in places where they had been tolerated, Ferdinand ordered an expulsion of the Jews from Austria (Jan. 31, 1544). The order was, however, never executed. An expulsion from Bohemia, decreed by Ferdinand in 1561, was repealed owing to the efforts of Mordecai Meisels, who went to Rome and obtained from Pope Paul IV. the absolution of the emperor from his vow.

Under the successors of Ferdinand, Maximilian II. (1564-76), Rudolph II. (1576-1612), and Matthias (1612-19), the conditions remained the same. Expulsions were threatened and revoked; taxes were imposed on every occasion; and petty persecutions, especially in regard to the distinctive Jewish costume or badge, were the key-note of the legislation. In 1567 a charter granted to the Jews of Bohemia confirms the right of residence to the Jews of Bohemia "for all time"; while in the following year it is decreed that they shall not be permitted to reside in the mining towns. From these latter they remained excluded until the new constitution of 1848 abolished their disabilities. Another decree of expulsion followed, for the Jews of Lower Austria, in 1572, which was suspended in the following year, but seems to have been finally executed in 1575 or 1576. This expulsion, like that decreed in 1561 in Bohemia, must either have been revoked or, more probably, became again a dead letter owing to the exceptions in favor of the court Jews, who had the right to take other Jews into their employ; for in 1597 the states of Lower Austria again demand the expulsion of the Jews from the province, and, as if they knew that such a decree would not be carried out, they demand the enforcement of the decree compelling Jews to wear a badge. Rudolph II. took a great interest in the Jews from a scientific point of view also. Being an alchemist, he, like many others at that time, believed that cabalistic literature contained information on the mysteries which he was studying, and therefore he called Rabbi Löwe ben Bezalel to his castle in Prague (1592) to give him the much-desired information ("Ẓemaḥ David," ed. Frankfort-on-the-Main, 1692, p. 66b).

Ferdinand II. (1619-37) was a bigoted Catholic and a disciple of the Jesuits, who, in their desire to crush out all heresy, were naturally enemies of the Jews. As during the sixteenth century complaint was made that the Jews sympathized with the Turks and served them as spies, so after the battle at the White Mountain near Prague (1620), which restored Bohemia to the house of Hapsburg and to Catholicism, the charge was made that the Jews favored Protestantism. Thus, the dean of Teplitz complains in a report to the archbishop of Prague that the Jews receive Protestants into their houses, and that the noise of their synagogues ("rugitus et mugitus illorum") disturbs the church services ("Allg. Zeit. des Jud." 1887, p. 30). In spite of his religious prejudices, however, Ferdinand treated the Jews with comparative fairness. When the town council of Vienna ordered landlords having Jews as tenants to require them to vacate the premises, the emperor at once intervened, enjoined the council from disturbing the Jews, and also took measures to protect them against further disturbances by allotting an area in one of the suburbs of Vienna to be set apart for the habitations of the Jews, in which they would be permitted to acquire real estate (1624). In a charter, dated Dec. 6, 1624, the Jews have assured to them undisturbed residence in Vienna; they are permitted to enter the city without the badge; the population is warned not to molest them; they are placed exclusively under the jurisdiction of the imperial authorities; and their houses are exempted from the obligation to billet soldiers. On the other hand, Ferdinand, as a strict Catholic, ordered that both in Vienna and in Prague Jews should be forced to attend a mission service on every Sabbath, when a Jesuit would preach to them on the truth of the Catholic religion (1630).

The Vienna Ghetto.

The policy of Ferdinand seems to have been to exempt individual Jews from the disabilities imposed upon the Jews as a class. Thus, he gave to Jacob Bassevi hereditary nobility, and to the court Jews of Vienna a privilege which exempted them from the jurisdiction of the congregational authorities. This privilege and the immunity of the Jews from communal taxes and from the jurisdiction of the municipal authorities proved bones of contention; and after the death of Ferdinand (1637) the Jews of Vienna compromised with the city authorities, offering to pay the sum of 6,000 florins into the city treasury. This offer had not, however, the desired effect. The municipal authorities of Vienna demanded of the new emperor, Ferdinand III. (1637-57), the expulsion of the Jews from Lower Austria; and the emperor acceded to the extent of ordering that Jews should not be permitted to keep stores in the city, and that their exemption from municipal jurisdiction should cease (1638). A year or two later this law was revoked. In 1641 the *status quo* of 1624 was restored, and in recognition of the services rendered by the Jews to the imperial treasury during the severe crisis which the war with the Swedes had brought upon Austria, the former privileges were confirmed in 1645. Although the Jews had been accused of secret complicity with the enemy, they suffered terribly during the Thirty Years' war. In various congregations of Moravia Jewish houses were pillaged, and in Kremsier seventeen people were killed and a considerable number wounded (June 26, 1643) (Frankl-Grün, "Gesch. der Juden in Kremsier," pp. 96 *et seq.*). The heavy taxes exacted from the Jews, in consequence of the depletion of the imperial treasury during the protracted war, and the constant quarrels in the overburdened Jewish communities, induced the emperor to give to the Jews of Vienna a new constitution (1646) which should enable the officers to enforce their authority (Meynert, in Wertheimer, "Jahrbuch für Israeliten,"

Immunity from City Taxes.

v. 22). The enforcement of a decree of expulsion against the Jews of Lower Austria in 1652 could only be averted by the payment of a contribution of 35,000 florins.

Expulsion from Vienna.

Ferdinand's son and successor, Leopold I. (1657–1705), had originally been destined for the priesthood, and only the death of his elder brother Ferdinand placed him on the throne. Of deeply religious character and a blind admirer of the Jesuits, he was only too eager to listen to the ever-renewed complaints of the citizens of Vienna. At the beginning of his reign he confirmed the privileges of the Jews (1658); and repeated his assurance of their protection, when the municipal council of Vienna ordered an appraisement of the houses and other property of the Jews, though they were not subject to municipal taxation (June 21, 1661). He also successfully checked the mob when, in 1665, the body of a murdered woman most found in the ghetto, and a rumor was spread that the Jews had committed the crime. His attitude soon changed, however. In 1660 he had married Margaret Theresa, a Spanish princess, and her influence was strongly brought to bear against the toleration of the Jews, for to this fact she ascribed the misfortune of the death of her first-born. To this was added the influence of the patriotic but fanatic bishop of Wiener Neustadt, Count Kollonitsch; and at length the emperor yielded to the demands of the citizens of Vienna, and ordered the expulsion of the Jews from the city and from the provinces of Lower and Upper Austria (Feb. 27, 1670). All Jews were required to leave the capital by July 25, 1670, and those living in the country were expelled in the following spring. The synagogue of Vienna was converted into a church (Aug. 18, 1670), which, in honor of the emperor, was named after his patron saint, Leopold. The persecution of the Jews soon bore fruit. The city could not, as it had promised, pay the taxes of the Jews in addition to those which they had paid before; and many citizens complained that the commerce of the city had suffered through the emigration of such a large number of consumers. Leopold then adopted a milder policy. He not only allowed the exiles to settle in his other provinces, notably in Moravia and Bohemia, but further permitted (1673) Jews to visit the fairs in the province of Lower Austria, whence they had been expelled. Moreover, when in 1680 the ghetto of Prague was destroyed by incendiaries, he refused to listen to the entreaties of the municipality of Prague, who wanted to use the opportunity to expel the Jews altogether. Negotiations with the representatives of the Vienna exiles at Wischau, Moravia, for their resettlement in the capital did not lead to the desired result; nevertheless, not long after the expulsion Jews again appeared in Vienna.

Culture: Though the Jews of Austria were not very prominent in rabbinical literature and other spiritual activities, the two congregations of Vienna and Prague, and, later on, that of Nikolsburg, contained quite a number of important Talmudists. Many of them had come from Germany, like Yom-Ṭob Lipmann Heller, rabbi in Nikolsburg, Vienna, and Prague, who in 1630 became the object of a treacherous calumny and had to leave the country. Before him R. Löwe ben Bezalel (d. 1609) occupied a very prominent position in Prague. The massacres by the Cossacks in Poland (1648–56) also brought many learned fugitives to Austria, like Ephraim Cohen, Shabbethai Cohen, Samuel Kaidanower, and others. Menahem Mendel Krochmal was rabbi of Nikolsburg, where he died in 1661, and was succeeded by his son-in-law, Gerson Ashkenazi, who was the last officiating rabbi of Vienna before the expulsion. Prague was the first town in Germany in which a printing-press was established (1513). Jewish physicians were always to be found in Vienna, successful rivals of their Christian colleagues. In the sixteenth century occurs the name of Leo Lucerna, called "Maor Ḳaṭon"; in the seventeenth century, those of Leo (Löw) Winkler, who graduated in Padua in 1629, and of his two sons, Jacob and Isaac, who were graduated there in 1669. Acquaintance with German seems to have been rare, for the documents signed by the Jews are signed in Hebrew. Still, the knowledge of spoken German was evidently very general, for the Jesuit priests who preached the mission sermons for the Jews were instructed to preach in German. Some Jews could write in German, as is seen from a letter addressed to Wagenseil by Enoch Fränkel, one of the exiles who settled in Fürth. This letter is also interesting from the broad-mindedness of the author, who protests against the accusation that the Jews hate Christians, as he can not see any reason why the professors of different religions should not be tolerant toward one another (Kaufmann, "Die Letzte Vertreibung der Juden aus Wien," p. 197).

Court Jews.

From the Expulsion of 1670 to the Toleration Edict of Joseph II. (1782): As has been stated above, the needs of commercial life made the expulsion from Vienna a dead letter. The Jews went to the city on business, and the only difference was that they were not permitted to reside there. Even this prohibition was soon disregarded in exceptional instances. The war with the Turks, who in 1683 nearly captured Vienna, required large means; and among those who furnished the army with provisions and the treasury with money was Samuel Oppenheimer, a Jew from Heidelberg, who was given the right of residence and even that of acquiring property in Vienna. His right of residence dated from about 1685. Through him other members of his family were permitted to dwell in the city, either as members of his household, or as his employees. Prominent among them was Samson Wertheimer (1658–1724). Others followed, such as Simon Michael of Presburg, who had deserved well of the imperial treasury by furnishing gold and silver for the mint; so that in a comparatively short time the city had again a Jewish congregation, only with the difference that it possessed no corporate rights as such. The short reign of Leopold's son and successor, Joseph I. (1705–11), brought no change in their condition. Under Charles VI. (1711–40), a brother of Leopold, the traditional policy was also maintained. About 1725 there came from London to Vienna as a court Jew Diego d'Aguilar, who farmed the tobacco monopoly, and who, according to the testimony of Maria Theresa, had a claim on her gratitude because of his disinterested services.

The malignant fanaticism of the clergy continued. Typical for their position is the case of the congregation of Aussee, when its synagogue was destroyed and three members were exiled on the charge of the local priest, who asserted that they had assaulted him, when he (contrary to the law) had entered their synagogue on Yom Kippur and preached Christianity to them (1722). In Brünn, whence Jews had been expelled through the efforts of Capistrano in 1454, one Solomon Deutsch in 1706 held services in an inn. When this became known the repetition of such an act was prohibited under a fine of 100 reichsthaler. On the application of Deutsch permission was, however, given to read prayers, but not to use a scroll of the Law ("cum res sapiat synagogam," "Tagesbote aus Mähren," Nov. 7, 1901). The taxes were very heavy. Charles demanded of the Jews of Vienna 148,000 florins to defray the expenses of his coronation (1711). In 1717 they had to lend 1,237,000 florins, toward which Samson Wertheimer contributed 500,000 florins. On the other hand, these court Jews used their influence in the interest of their coreligionists elsewhere when the latter were in trouble. It was due to Samuel Oppenheimer's influence that the work "Neu Entdecktes Judenthum," by J. A. Eisenmenger, was prohibited. They also tried, though in vain, to obtain a repeal of the cruel sentence against the Jews of Aussee mentioned above. The treatment of the Jews was still guided by the principle that they were a nuisance which required constant watching, lest it became pernicious. Thus Charles issued an order that of every Jewish family only one member should be considered "pro incola," which meant that only one should be permitted to marry (Sept. 23, 1726). Jews were expelled from Breslau in 1738 upon the demand of the merchants.

Under Maria Theresa.

Maria Theresa (1740–80), who was very bigoted, was especially hostile to the Jews. During the war with Frederick the Great the rumor spread, as had been the case during the war with the Swedes and with the Turks, that the Jews had betrayed the country to the enemy. The empress imposed upon them a contribution of 50,000 florins, and in 1744 issued an edict that all the Jews in the kingdom of Bohemia, including the provinces of Moravia and Silesia, should be expelled. Only after great efforts by various philanthropists and foreign ambassadors did she consent to suspend the edict for ten years for an annual payment of 3,000,000 florins (Aug. 5, 1748). Later on the matter was abandoned. During the seven years' war with Prussia the empress permitted the statement to be published that the suspicion against the Jews was unfounded. In 1756 the district rabbi of Moravia, Moses Lemberger, upon the demand of the empress pronounced an excommunication against all traitors. In spite of her aversion to the Jews, the empress took a deep interest in all matters pertaining to the administration of Jewish congregations. Her statute for the Jewry of Moravia, "General-Polizey-Process- und Kommerzialordnung für die Judenschaft im Marggrafthum Mähren" (1754), is a classic type of paternal legislation in the administration of Jewish affairs. The duties of the district rabbi, the mode of his election, and even the course of Talmudic studies were regulated in detail. She examined personally the bill of the delegates to the election of the Jewish representatives (1751), and demanded that a Jesuit should be a member of the commission which should examine all Hebrew books. Her special confidence was enjoyed by the Jesuit Franz Haselbauer (1677–1756), who in 1726 brought the charge against a Jewish calendar, printed in Amsterdam, that it contained blasphemies against the Catholic religion ("Zeit. für die Gesch. der Juden in Deutschland," ii. 388). In 1760 she issued an order that all unbearded Jews should wear a yellow badge on their left arm.

Of the restrictions placed on the Jews a specimen may be given from a petition of the community of Prague. They complain that they are not permitted to buy victuals on the market before a certain hour —vegetables not before 9, and cattle not before 11 o'clock; to buy fish is sometimes altogether prohibited; Jewish druggists are not permitted to buy herbs at the same time with Christians ("Allg. Zeit. des Jud." 1887, pp. 676 *et seq.*). The taxation was exorbitant. For instance, it was decreed in 1744 that the Jews should pay a special tax of 40,000 florins for the right to import their citrons for the Feast of Booths (see Etrog). Upon the petition of the Jews this tax was reduced to 4,000 florins. Only occasionally was the empress humane in her treatment of the Jews. Thus, on Feb. 15, 1769, she ordered that no Jewish child should be baptized against the will of its parents; and in a special case she decided against the Church (Wolf, "Judentaufen in Oesterreich," pp. 55 *et seq.*, Vienna, 1863). An evident intention to improve the material condition of the Jews is found in her orders (1) that the Jews may sell new garments made by themselves, against which the gild of tailors had protested (April 10, 1772); (2) that Jews may engage in jewelers' work, although they must not keep an apprentice (April 24, 1772); and (3) that they may keep tanneries under certain restrictions (Sept. 20, 1775).

Culture: The mental activity among the Jews during this period is still almost exclusively restricted to Talmudic literature. Higher literary aims were pursued by David Oppenheim, nephew of the court Jew Samuel Oppenheimer, who was rabbi of Nikolsburg 1690–1705, and of Prague 1705–36. His rich and well-selected library could not, however, be brought into Austria on account of the severe censorship, then in the hands of the Jesuits. The movement of Shabbethai Ẓebi agitated the Jews of Austria to no small degree; and some of the mystics who followed the pseudo-Messiah were Austrians, like Loebele Prossnitz; or they found a fertile soil in Austria in men like Nehemiah Ḥayyim and Joseph Frank. The controversy between Jacob Emden and Jonathan Eybeschütz also caused a great commotion in Austria, where the latter had spent a great part of his early life and where, also, Emden had lived for some time in the house of his father-in-law, Mordecai ha-Kohen, rabbi in Ungarisch Brod. Members of the Auerbach family who had lived in Vienna and in Nikolsburg were called to important rabbinical positions in Poland; others, like Schmelke Horowitz, rabbi in Nikolsburg (d. 1778), and Ezekiel Landau, chief rabbi of Prague (1754–93), were called to Austria from Poland. Prominent men from Austria filled positions in Germany; *e.g.*, the Teomim-Fränkel family, the Bacharachs, Jacob Poppers in Frankfort-on-the-Main, and Jacob Reischer in Metz, both the latter being natives of Prague. To Bohemia, as the country of their nativity, point the names of Horowitz and Lipschütz, the latter derived from Liebeschütz in Bohemia. Even secular knowledge began to spread in Austria, as can be seen from the physicians Abraham Kisch, the teacher of Mendelssohn, and Jonas Jeitteles (1735–1806), who had studied medicine in Halle.

From the Emancipation Edict of Joseph II. to the Revolution of 1848: Under Maria Theresa's son and successor, Joseph II. (1780–90), a new era began for the Austrian Jews. Joseph was an admirer of Voltaire and a disciple of the school of enlightenment, and he, therefore, adopted an attitude toward the Jews differing from that of his mother and considered it his duty to improve their condition. One of the first acts of his government was the abrogation of all the laws requiring the Jews to wear a distinctive dress (Oct. 21, 1781). The enlightenment ("Aufklärung") of the Jews was one of Joseph's cherished plans. To this end he demanded that the Jews should assimilate themselves to their surroundings, adopt the language of the country, and establish schools according to the plan of modern pedagogy ("Normalschulen"), that they should be allowed to enter all high schools and universities (which, as he expressly states, had been at no time directly prohibited), to lease lands for agricultural purposes (if they worked it with Jewish hands), to engage in all mechanical trades, arts, and wholesale commerce (Oct. 19, 1781). He abolished the poll-tax (Dec. 19, 1781), directed the authorities to treat the Jews like fellow-men ("Nebenmenschen"), and commanded that Jewish children in the public schools should also receive proper consideration. Joseph's views are most clearly expressed in what is called the Toleranzpatent (Jan. 2, 1782). He introduces this law with the statement that it is his aim to permit all his subjects, without distinction as to creed and nationality, to participate in the welfare and freedom of his government; and, although the restrictions on residence in the other provinces and the prohibition to reside in Lower Austria are expressly maintained, the law breathes the spirit of a new era. The specific ecclesiastic restrictions, dating from the time of the Vienna council, prohibiting Jews from being abroad before noon on Sundays and Catholic holy days, and from visiting places of amusement, are abolished. He also compelled the Jews to assume fixed family names (1787) and to serve in the army—in each case the first instance of the kind in Europe.

Beginning of a New Era.

The short reign of Leopold II. (1790–92), brother and successor of Joseph, was too uneventful to leave any traces in the history of the Austrian Jews; but it may be mentioned that upon his ascent to the throne the bishops presented a petition asking that the laws of Joseph II. relating to the Jews be abrogated, and that the Jews be again declared crown vassals ("Kammerknechte") whose position depended solely on the good-will of the monarch. Leopold replied evasively that the times were too troublous to allow him to take any decisive steps in the matter. Francis II. (1792–1835), Leopold's son and successor, reigned during the most critical period of Austria's history. He was a man of narrow views, a typical Philistine; and his conception of the political and economic situation of the Jews was in harmony with his general policy. When, in 1793, Baron von Saurau, one of the highest officials, made a motion to abolish a special department of the police, the "Judenamt," an invidious distinction against the Jews, the emperor agreed that the department should be called a commission. Economic and social restrictions were numerous. The principle of improving the condition of the Jews by opening to them new ways of activity, as Joseph II. had intended, was given up. Agriculture, which Joseph II. endeavored to introduce among them, was restricted. They were prohibited from farming rural property. Only in the case of the estates of noblemen ("Landtäfliche Güter") was an exception made (March 29, 1793); and even then hereditary tenancy or acquisition was prohibited. Similarly, a Jew could foreclose a mortgage on real estate only under the condition that he should not buy it or take it under his administration (Oct. 23, 1816, and July 20, 1827). The Jews of Vienna were especially restricted: The emperor wrote with great indignation to one of his ministers stating that he had heard that the Viennese Jews bought houses in the names of Christians, and that this scandal ("Unfug") would not be tolerated (May 27, 1814). A law of 1804 prohibited dealing in saltpeter; one of 1814, in salt and grain. Although Simon von Lämmel, a favorite of the emperor, petitioned to have the last-mentioned act repealed, the emperor refused (1819). A law of 1818 (repeated in 1829) prohibited Jews from establishing themselves as druggists; only one exception being made; namely, in favor of Michael Perl, the son of Joseph Perl, whose father had done good service in the cause of education among the Jews of Galicia. In 1802 it was decreed that thenceforth no Jew should obtain a "Toleranz," or grant, to reside in Vienna, which law was later amended in favor of the wealthiest. The law that Jews should not keep Christian domestics, dating back to the Council of Vienna, 1267, was repeatedly renewed between 1803 and 1817. Typical for the condition of the Jews and the policy of the authorities is the case of Abraham Heimann and his family, natives of Bavaria, who during the French occupation (1809) had settled in Laibach, whence the Jews had been expelled since 1515. As soon as the Vienna congress (1815) restored the former conditions, Heimann received an order of expulsion, and until 1848 he had to fight in the courts for the most natural rights of a human being. The highly interesting details of this struggle are described by a member of the family in "Allg. Zeit. des Jud." 1849, pp. 41 *et seq.* Isaac Samuel Reggio, who during the French occupation had been professor at the Lycée in his native town, Gorice, was

Case of Abraham Heimann.

discharged when Austria again took possession of Illyria.

The ecclesiastical laws were also applied with regard to the internal affairs of the Jews. The latter were not permitted to have any music in Advent, which generally occurred during Ḥanukkah; and an order was issued that Christians should not be permitted to dance at the balls of the Jews on Purim (1806 and 1824). How little the Jews were understood can be seen from the fact that when the assembly of Jewish notables convened in Paris, an order was given to watch the correspondence of the Jews, so as to ascertain whether they were plotting against the government. The police soon reported that, aside from some insignificant letters, which some Jews received from their relatives living in France, no interest was taken by them in the proceedings of the assembly and of the subsequent Sanhedrin (1806). The only Austrian Jew who received an invitation to attend this meeting, Bernhard von Eskeles, loyally turned over his invitation to the police. Another ecclesiastical restriction against the Jews was the prohibition of the assumption of names of Christian saints as first names (Nov. 6, 1834), which was evidently a reflex of the similar prohibition issued in Prussia Dec. 22, 1833. There was somewhat of the humorous in the report of a court councilor upon the synagogue which the Jews of Vienna desired to build: he expressed the fear that, if the Jews should have an attractive building and good sermons, the synagogue would soon be better frequented than the church (1824) (Wolf, "Gesch. der Juden in Wien," p. 133).

Interest in Communal Organization.

On the other hand, it must be acknowledged that Francis had the intention of being in a measure just to the Jews, and that he sincerely wished to improve the desolate condition of their religious organization. It is certainly a notable sign of progress that as early as 1810 a Jew, Hönig, member of a family of famous financiers, was appointed an officer in the army—except in France, the first case of the kind in Europe. Even a tyrannical measure, such as that requiring every one who wished to marry to pass an examination in religion (based on Herz Homberg's text-book, "Bene Zion," 1810), was well meant, although its maintenance down to 1856 was vexatious. As early as 1795 the emperor had busied himself with a scheme to improve the spiritual condition of the Jews. He intended to establish a rabbinical seminary; and the failure of the scheme was due to the opposition of rabbis of the old school, like Eleazar Fleckeles, Samuel Landau, and Marcus Benedikt. It certainly is creditable to him that he declined to entertain the propositions of narrow-minded rationalists like Herz Homberg and Peter Beer—who denounced the rabbis as blind fanatics, and the Talmud as the source of all evil among the Jews—and it is especially creditable that he did not reward Homberg's defamations of Judaism with the much-coveted "Toleranz."

The next result of the investigations of the spiritual condition of Judaism was the "Patent" for Bohemia, issued Aug. 3, 1797, which stated the principle that it was the emperor's object ultimately to remove all Jewish disabilities, although for the present the only tangible progress was the law requiring every rabbi to take a course of philosophical studies. This law was repeated for the other provinces of Austria (Jan. 22, 1820, and Jan. 29, 1826). It remained for a long time a dead letter, and even to-day (1902) it is not fully carried into practise. Next followed the establishment of the first scientific institution for the education of rabbis, opened in Padua (then under Austrian dominion) Nov. 10, 1829. It also redounds to the emperor's honor that he refused to entertain the proposition made by three Jews to pay into the treasury the annual sum of 150,000 florins, if they were given the right to levy a tax on Etrogim. The emperor considered it wrong to impose a tax on a religious practise (Dec. 12, 1799) ("Israelitisches Familienblatt," Hamburg, Oct. 10, 1901). It showed also considerable progress when the Jews in Vienna obtained permission to build a "Tempel," named so after the one founded in Hamburg, 1817. This name is in itself significant; for in 1620 the citizens of Vienna complain that, while the emperor had given the Jews the right to build a synagogue, they had erected a "Tempel." On the other hand, the name "congregation" was still denied to the Viennese Jews: they were merely "the Jews of Vienna," and their representatives not a board of trustees ("Vorstand"), but merely delegates ("Vertreter"), their rabbi an inspector of "kosher" meat, and their preacher (I. N. Mannheimer) merely a teacher of religion.

The Vienna "Tempel."

Francis was succeeded by his son, Ferdinand I. (1835–48), an invalid of no brilliant intellect, and practically without influence on the affairs of the government. The ministers who ruled for him were bent on maintaining the patriarchal state of affairs which had existed under Francis I., and which was considered by the leading statesman, Metternich, to be the best safeguard of public order. Still, the progress of the age demanded here and there a milder interpretation of the existing laws. Thus, when the administration of Count Salm's estate in Raitz prohibited the giving of a night's lodging to Jewish pedlers, the authorities of the central government set aside the order (1836). The position of the Jews of Vienna was somewhat improved. Those that possessed the right of residence were allowed to transfer it to their children, and strangers were permitted to remain in the city two weeks. Further, the police did not carry out these restrictions rigorously; and sometimes they became a dead letter. Those not having the right of residence had merely to have their passports revised, as if they had left the city. Immediately after having passed the gate, they returned and applied for a new permission to reside in the city two weeks (Wolf, "Gesch. der Juden in Wien," p. 142). Here and there senseless restrictions were introduced, probably upon the complaint of some overzealous official or of an unsympathetic population, as when (Jan. 31, 1836) a prohibition against pedling in the border districts was issued because the Jewish pedlers were supposed to be responsible for smuggling, or when (1841) the Jews of Prague were prohibited from spending the summer in the suburb of Bubentsch.

Signs of Progress.

But, on the whole, the policy of the government made for progress. Thus an order of June 4, 1841, permitted the possession by Jews of rural estate when they worked the farms themselves; and the restrictions (dating from the beginning of the eighteenth century) against the number of Jewish marriages, and which even Joseph II. would not remove, were more liberally interpreted. Teachers and rabbis were permitted to marry, even when there was no vacancy in the number of legally permitted families. Similar favors were bestowed on manufacturers, on the owners of large estates, and on prominent scholars. The need of a revision in the legal status of the Jews is strikingly illustrated by the fact that in 1847, when the famous composer Meyerbeer visited Vienna, the government had to issue an order declaring him to be a "cavalier" and not a Jew, so that he might be exempt from the tax which every non-resident Jew had to pay when visiting the city. One great mark of progress was the abolition of the Jewish Oath (Aug. 18, 1846), in which matter Austria preceded most of the German states. Another important step was the law of March 24, 1841, for Galicia, which promised certain improvements for the Jews of that province who should dress in European costume and acquire a knowledge of either German or Polish. For the same reason the government established there county rabbinates ("Kreisrabbinate"). The government also took a great interest in the reform of public worship; and the authorities of Prague ostentatiously took part in the dedication of the new "Tempel für Geregelten Gottesdienst" in that city, which was dedicated on the emperor's birthday, April 19, 1837. Similarly it encouraged the endeavors to induce the Jews to devote themselves to agriculture and mechanical pursuits. These endeavors are treated below under Culture.

From the Revolution of 1848 to the Present Time: The revolution in France awakened an echo everywhere in Europe. In Vienna tumults occurred March 13, and one of the first victims of the revolution was a Jewish student, Heinrich Spitzer, who was shot by the troops. Legislation relating to the Jews was at once revised in a liberal sense. In the new constitution of April 25 the free exercise of religion was granted; and the special Jewish taxes were abolished Oct. 28. For the first time in the history of Austria, Jews were appointed professors in the universities; *e.g.*, Jacob Goldenthal in Vienna and Wolfgang Wessely in Prague, both, however, as assistant professors in Semitic languages. Jews took a prominent part in the revolutionary movement. To the first parliament, assembled first in Vienna and later on in Kremsier, five Jewish deputies were elected: Adolph Fischhof, who had always taken a prominent position, and was one of the most popular men in Vienna; Joseph Goldmark, also from Vienna; Abraham Halpern from Stanislau; I. N. Mannheimer, the Vienna preacher, for Brody; and Bär Meisels, rabbi of Cracow, from that city. Another Jew who had taken an active interest in the revolutionary movement was one of the victims of reaction, when Prince Windischgrätz captured Vienna. Hermann Jellinek was shot as a rebel Nov. 23, 1848.

Reaction.

Ferdinand, who was too weak to remain at the helm of the state's ship in such critical times, abdicated, and was replaced by his nephew, the present emperor, Francis Joseph, who, at the age of eighteen, ascended the throne Dec. 2, 1848. The young emperor was soon prevailed upon to adopt a more autocratic policy. The Reichstag of Kremsier was suddenly dissolved, and a constitution, proclaimed by the emperor without the consent of the parliament, was promulgated ("Octroyierte Verfassung") March 4, 1849. This constitution still retained the principle of religious liberty, and the administrative authorities still interpreted the laws in a liberal sense, the right of the Jews to acquire real estate and the abolition of the restriction on marriages being expressly acknowledged. Signs of reaction were, however, not wanting. The clergy agitated against the abolition of Austria's character as a Roman Catholic country, and petitioned (April 18, 1850) the emperor to appoint no Jews to any office. The population, on the other hand, was also unwilling to allow the Jews an extension of their former rights. In cities where they had been excluded, the population would not have them admitted; and in cities where their right of residence had been restricted to certain quarters, objections were made to their removal into forbidden districts. Even before the constitution of April 25, 1848, had been promulgated there were excesses in Prague, which spread over various parts of the country and assumed very serious proportions in Hungary. The city of Sternberg, Moravia, passed a resolution that at no time should a Jew be given the city's franchise; and the council of Laibach excluded the Jews from the right to acquire real estate. In Prague the burgomaster demanded that the Jewish congregation should prevail upon its members to close the stores which they had rented outside of the ghetto (1849). The government seemed to favor this agitation; for, when a Jew applied for a position in the postal service, he was told that he must bring a certificate from the rabbi that he was permitted to write on the Sabbath. Officially the reaction was introduced when the government repealed (Dec. 31, 1851) the constitution of March 4, 1849, although even then it was declared that religious liberty should not be disturbed. This provision, however, had hardly any practical value. As the civil code had provided that a Jew who married had to show permission from the authorities, and this clause had not been abrogated, the government decided that a Jew who wished to marry had to bring a special license, a view which changed the former status only in so far as the number of marriages was no longer limited. At the same time the right of the Jews to hold real estate in all parts of the country was suspended, and the prohibition (1817 and 1834) against keeping Christian domestics and against assuming the names of Christian saints was renewed (Oct. 2, 1853). In a new regulation concerning notaries public (May 21, 1855), the Jews were excluded. In the same spirit in which, under Francis I., the Jews were suspected of conspiring against the government, an order was issued that the Jews of Austria should not be permitted to have any dealings with Ludwig Philippson, nor to join his society for the promotion of Jewish literature (Aug. 5, 1855).

The Concordat of Aug. 18, 1855, which delivered Austria altogether into the hands of the clericals, had its effects upon the condition of the Jews. They were excluded from positions as teachers in elementary and high schools, and, contrary to the spirit of the legislation of Joseph II., the government wished even to exclude Jewish children from the public schools, which were to be exclusively Catholic. Count Thun, minister of public education, attempted to force the congregation of Vienna to establish a Jewish school. Jewish house-physicians in the Vienna hospital were to be limited in numbers (1856); and even the farming of rural estates was prohibited. The language of some of the governmental orders is in itself significant; for instance, one was issued to the administrative authorities requiring them to see that the Jews "who have sneaked into Christian real estate are removed" (March 23, 1856). Returning to the policy of 1670, the government prohibited the establishment of Jewish congregations in the province of Lower Austria (April 28, 1857), and restricted the appointment of Jewish veterans to civil positions to towns where Jews possessed the right of residence (1858). The commercial high school ("Handelsakademie") in Vienna, established from funds appropriated by merchants, among whom were quite a number of Jews, could not be opened because the minister insisted that no Jew should be appointed to a position therein. Some municipal authorities followed the example of the government in their own way. The burgomaster of Saaz, Bohemia, on the strength of the privileges granted to the city in 1561, ordered that all Jews should leave the city within two weeks; and the municipal authorities of Marburg, insisting on the legality of the edict of expulsion issued in 1496, ordered a Jew who had lived in that city for nine years to leave within a fortnight. The defeat of Austria in the Italian war of 1859, terminated by the peace of Villafranca (July 11, 1859), brought a change of policy. As late as June 6, 1859, the prohibition against keeping Christian domestics was reenforced, and on June 17 the marriages concluded without special license were declared void; but on Nov. 29 these restrictions were removed, and on Aug. 22 a liberal legislation on the position of the Jews was promised.

Dawn of Freedom.

This legislation was promulgated Feb. 18, 1860. It gave to the Jews of most of the Austrian provinces full right to hold property. In Galicia and in the Bukowina this right was limited to those who possessed a certain education; while Upper Austria, Styria, Carinthia, Tyrol, and Vorarlberg were excluded from the law, and in these provinces Jews were not permitted to hold any real estate until the new constitution, Staatsgrundgesetze of Dec. 21, 1867, abolished all disabilities on the ground of religious differences. In the population the new condition of affairs aroused enmities, and again occasional disturbances occurred, as in Trebitsch, Moravia, and Lemberg. The clerical party also protested against the admission of the Jews to the full rights of citizenship. Noteworthy in this connection is the libel suit brought against Kuranda by Sebastian Brunner, the anti-Semitic editor of the "Wiener Kirchenzeitung," May 10, 1860, though it was dismissed. At the election to the new parliamentary bodies, the "Landtage," a number of Jews were returned, two of whom, Kuranda and Winterstein, were delegated by the Landtage to the Reichsrath. The emperor called into the House of Lords Baron Anselm von Rothschild, which is perhaps the first case of a Jew being made a peer. The constitution of Dec. 21, 1867, finally removed all disabilities, and from that date the political history of the Jews in Austria is limited to their treatment by the administrative authorities and to the position of the several political parties, on which subject information will be found under Anti-Semitism.

The government of Austria has always taken great interest in internal Jewish affairs. Even under the clerical minister of public instruction, Count Thun, religious instruction in the high schools was made compulsory (Feb. 11, 1852). At a later period the government paid the teachers' salaries. On March 21, 1890, a law was issued which regulated the condition of Jewish congregations. It makes it compulsory for every Jew to be a member of the congregation of the district in which he resides, and so gives to every congregation the right to tax the individual members. In elective bodies and in governmental positions since the beginning of the constitutional era the Jews have always held their own, especially in the army, where some of them have even risen to the rank of general. The Reichsrath has since its inception had its quota of Jewish members, and the House of Lords has always numbered Jews among its members; at present there are three, the two brothers Gomperz and Baron von Oppenheimer. As soon as the new era began (1860), Jews were appointed to positions in the university. The first regular professor in the University of Vienna was the dermatologist Zeissl, and in Prague in the same year Wolfgang Wesserly was appointed full professor of criminal law.

Culture: The intentions of Joseph II. to raise the intellectual and moral status of his Hebrew subjects awakened an echo in the hearts of the Austrian Jews. In towns where there were already centers of civilization, as in Triest and Prague, Jewish schools ("Normalschulen") were established. Other places followed, especially after the awakening of the modern spirit in Austria (about 1830–39). In Galicia this movement was not very successful, although even there some men like Perl obtained good results. In Lemberg, Abraham Kohn died a martyr to the cause of education and progress (Sept. 7, 1848). The movement to lead the Jews to mechanical and to agricultural occupations was very energetically reciprocated by the Jews of Austria. The noble and active philanthropist Joseph von Wertheimer founded the Society for the Promotion of Mechanical Occupations in Vienna, 1840; and similar societies followed in other parts of the country, as in Prague, 1846. Wertheimer was also instrumental in introducing the Kindergarten in Austria. Hirsch Kolisch in 1844 established in Nikolsburg the first Jewish institute for deaf-mutes, which in 1852 was transferred to Vienna. There, through the efforts of Ludwig August Frankl, the first Jewish institute for the education of the blind was founded in 1870. An institution for the training of rabbis, which at the end of the eighteenth century had already engaged the attention of the government, was finally opened in Vienna, 1894.

Religious Conservatism.

In religious matters Austria has always been conservative. The first introduction of any changes in the service took place in Vienna, where M. L. Biedermann, the moving spirit of the congregation, hoped to introduce the reforms of the Hamburg temple; but Mannheimer, who had himself participated in these services, felt that for Vienna a more conservative spirit was necessary. The latter, therefore, limited the reforms to the omission of some Piyyuṭim, to a trained choir, to decorum in service, and to the introduction of a German sermon. This type of temple, dedicated 1826, was introduced everywhere in the civilized parts of Austria, and also in Galicia, where, in Tarnopol, Lemberg, and Brody, the cultured element of the community founded what was called a "Chorschul." From Brody this type of reform was even introduced to Odessa, where many people from Brody had settled.

Secular education had made rapid progress after the decree of Joseph II., although, owing to the fact that the practise of medicine was the only field open for Jews through academic education, the students could not be numerous. The events of 1848 increased this number. In 1851 the number of Jewish students in the high schools of Austria was 1,598; in 1857 they had increased to 2,143. The increasing number of students in the secular schools drove the yeshibot out of existence; and so the Talmudists of the old school, with the exception of those of Galicia, have almost completely disappeared. To the first part of the nineteenth century belong: Eleazar Fleckeles (d. 1826), rabbi of Prague; Ephraim Zalman Margulies in Brody (d. 1828); Marcus Benedikt, district rabbi in Moravia (1753–1829); Jacob Ornstein, rabbi in Lemberg (d. 1839); Nahum Nehemiah Trebitsch, district rabbi in Moravia (1777–1842); Hirsch Chajes, rabbi in Zolkiev (d. 1855); Solomon Kluger in Brody (d. 1869); Marcus Wolf Ettinger (d. 1863) and Joseph Saul Nathansohn (d. 1875), both in Lemberg; and Aaron Kornfeld in Goltsch-Jenikau (d. 1881). The Jewish scholars of a more modern type are so numerous that only the most prominent names can be quoted here. Among those who belong to the school of the Biurists must be mentioned Herz Homberg (1749–1841) and Peter Beer (1758–1838). In the school of systematic scholars Z. Frankel (1801–75) deserves the first rank. The Polish circle counts Nachman Krochmal (1789–1840), S. L. Rapoport (1790–1867), and Isaac Erter (d. 1851). The succeeding generation has Solomon Buber (b. 1827) and S. H. Halberstamm (1832–1900). One of the best-known writers of the present historical school is I. H. Weiss (b. 1815). Others are: Leopold Löw (1811–75), M. Steinschneider (b. 1816), H. B. Fassel (1802–83), A. Jellinek (1821–94), S. I. Kämpf (1815–93), Nehemias Brüll (1843–91), David Kaufmann (1852–99). Further might be included the Italians I. S. Reggio (1784–1855), Joseph Almanzi (1801–60), and S. D. Luzzatto (1800–65), all of whom spent their life under Austrian dominion. Of prominent poets and authors those may first be mentioned who have written on Jewish subjects; viz., Leopold Kompert (1822–86), Leo Herzberg-Fränkel (b. 1827), Karl Emil Franzos (b. 1848), L. A. Frankl (1810–94), Moritz Rappaport (1808–80), Seligmann Heller (1831–90), Michael Klapp (d. 1888), J. L. Lederer (1808–76), and Moritz Hartmann (1821–73). The pianist Ignaz Moscheles (1794–1870) and the actor Adolph Sonnenthal (b. 1834) are distinguished; and to them may be added the regenerator of synagogue music, Solomon Sulzer (1804–90); the mathematician Simon Spitzer (1826–87); the chess-player W. Steinitz (d. 1900); statesmen like Kuranda, Fischhof, and Winterstein; scientists like Jacob Fischel, an authority on psychiatry (d. 1892); the dermatologist Zeissl, and others, too numerous to mention, show how, in a comparatively short time, the Jews of Austria have risen to the level of their non-Jewish fellow-citizens.

Bibliography: For the earliest period of the history treated the best source is J. E. Scherer: *Die Rechtsverhältnisse der Juden in den Deutsch-Oesterreichischen Ländern*, Leipsic, 1901; [Joseph von Wertheimer] *Die Juden in Oesterreich vom Standpunkte des Rechts und des Staatsvortheils*, 2 vols., *ib.* 1842; (appeared anonymously) G. Wolf, *Gesch. der Juden in Wien*, Vienna, 1876; *Judentaufen in Oesterreich*, Vienna, 1863; D. Kaufmann, *Samson Wertheimer, der Oberhoffactor und Landesrabbiner*, Vienna, 1888; idem, *Urkundliches aus dem Leben Samson Wertheimer's*, Vienna, 1892; idem, *Die Letzte Vertreibung der Juden aus Wien und Ihre Vorgeschichte*, Vienna, 1889. A bibliography of the essays which appeared in periodicals treating of the history of the Jews in Austria will be found in *Zeit. für die Gesch. der Juden in Deutschland*, ii. 136 *et seq.*

D.

AUTHENTICATION OF DOCUMENTS (Kiyyum, Ashsharta, Henpeḳ): An official certificate of genuineness. This is either the result of actual litigation on the subject, in which case the decision of the court is the official authentication, or where the proper persons appear before a competent tribunal, which takes their testimony and officially authenticates the instrument for the purpose of preventing litigation concerning it. The use of authentication is well known in Talmudic law. Strict law does not require the authentication of an instrument in order to give it validity, because, according to Resh Laḳish, the attestation of subscribing witnesses is equivalent to the testimony of those who have been examined in court (Giṭ. 3*a*). The reason for this rule is obvious: there may be danger of fraud and forgery in the case of an instrument signed by the debtor, but such danger is far removed in the case of an instrument which is signed by two disinterested witnesses. An instrument is considered judicially authenticated (1) if the judges themselves recognize the handwritings of the subscribing witnesses; or (2) if the witnesses sign in the presence of the court; or (3) if the subscribing witnesses appear before the court and acknowledge their signatures, stating that they witnessed the transaction; or (4) if other witnesses appear and testify that they recognize the handwriting of the subscribing witnesses; or (5) if the court, after comparison of the signatures in issue with the signatures in at least two other instruments, reaches the conclusion that the signatures are genuine.

Methods of Authentication.

In the latter case, the instruments with which the comparison is to be made must be at least three years old (this being the period in which prescriptive rights to real estate may be obtained), and must be instruments of conveyance of real estate in the hands of the persons in open and undisputed possession of such estate. If the instruments with which the comparison is to be made are in the possession of the person who is interested in having the signatures authenticated, they can not be used for such purposes. Some authorities are of the opinion that a comparison with the signatures in a letter or with the handwriting of the author of a book in manuscript is not permitted (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 46, 7, gloss).

Frankel ("Der Gerichtliche Beweis," p. 415) reduces these five cases to three fundamental principles: (1) Acknowledgment by subscribing witnesses; (2) the testimony of third persons who know the signatures of the subscribing witnesses; and (3) comparison of handwritings.

As to the acknowledgment of their signatures by the subscribing witnesses, the Mishnah provides (Ket. ii. 4) that if one witness says, "This is my signature, and the other signature is in the handwriting of my associate, the second witness," and the other witness testifies in the same manner, their testimony is sufficient for authentication. If the one says, "This is my signature," and the other likewise says, "This is my signature," a third person must be called who recognizes both signatures, in order that there may be two witnesses for each signature. This is the decision of Rabbi Judah; but the Sages say that a third person need not be called in, because it is sufficient if each one proves his own handwriting.

The point raised here touches the very essence of attestation of documents. According to Rabbi Judah, the witnesses admitting their own handwriting are testifying merely to that fact, and not to the substance of the document; whereas, according to the Sages, the testimony of each of the witnesses acknowledging his own handwriting is to the substance of the document; hence, according to the latter, there are in fact two witnesses attesting the fact in issue; namely, the substance of the document. Therefore, it is unnecessary to call in a third person who is familiar with their signatures.

Proof of Handwriting.

Proof of the handwriting of the witnesses is alluded to in the Mishnah above cited and in the Baraita (Ket. 19*b*). In this case, each of the signatures must be proved by two witnesses, because the testimony is not as to the substance of the instrument, but as to the genuineness of the signature. If one of the subscribing witnesses admits his signature, and he and a third person prove the signature of the other subscribing witness, this is not sufficient, because thereby the instrument is proved for the greater part by one witness: to wit, the subscribing witness, who admits his own signature and proves the signature of the other. The Talmudic law requires that in every case the testimony of the witnesses, in order to establish a fact, must go to the entire matter; and a fact is not proved if the testimony of one of the witnesses proves more than that of the other (see Ket. 21*a*; B. B. 57*a*).

On the question of comparison of handwritings for the purpose of proving the signatures, the rule seems to be that the comparison may be made with two other instruments, as above stated; but comparison may also be made with an instrument the validity of which has been attacked and which has been judicially declared genuine (Ket. 19*b*), and such a judicially authenticated instrument is for this purpose as good as two ordinary instruments (Ḥoshen Mishpaṭ, *l.c.*).

Examples of Formulas.

In authenticating the document, it is customary to mention the mode of authentication (*ib.*). The Shulḥan 'Aruk simply prescribes that, if the court merely writes, "In the presence of us three sitting together, this instrument was authenticated," this is sufficient, although they do not state in what manner it was authenticated. The following formulas are customarily used:

(1) When the subscribing witnesses themselves admit their signatures:

> We three sat together in court and considered the aforesaid document to which there are subscribed two witnesses: A, the son of B, and C, the son of D. These two witnesses came before us and acknowledged their signatures, and admitted that they were their own handwritings. Therefore, we, as is proper, have found them to be genuine and authentic. (Here follow the date and the signatures of the three judges.)

(2) When other witnesses testify to the signatures of the subscribing witnesses:

> We three sat together in court and considered the aforesaid document to which there are subscribed two witnesses: A, the son of B, and C, the son of D; and there came before us two other witnesses: E, the son of F, and G, the son of H; and they testified before us concerning the signatures of the aforesaid witnesses who have subscribed these documents, and they made clear to us that the said signatures are in the handwritings of the said witnesses. Therefore, we, as is proper, have found them to be genuine and authentic. (Here follow the date and the signatures of the three judges.)

The formula in each case is varied to suit the nature of the proof brought before the court. A list of such formulas may be found in Naḥalat Shib'ah, xxvi.; see also "Seder Tikkune Sheṭarot," by J. G. C. Adler, Hamburg, 1773.

As a rule, the signatures of the three judges are required; but it is sufficient if the authentication is signed by two of them (Ḥoshen Mishpaṭ, 46, 29).

Two Judges Must Sign.

The tribunal authenticating the document need not necessarily be learned in the law, nor is it necessary that the debtor or the person to be charged by this document be present; indeed, the authentication may take place even if the debtor declares the instrument a forgery (*ib.* 5). The authentication is simply a judicial affirmation of the correctness of the signature of the subscribing witness, and the truth of the facts set forth in the document is not directly in issue (Ket. 109*b*, top; Ḥoshen Mishpaṭ, *l.c.* 20).

In order that there might be no danger of the authentication being used for some other instrument, the rule was adopted that no space must be left between the document and the authentication, but that the latter must be written immediately under the signature of the witnesses, or on the back of the instrument immediately behind the writing (B. B. 163*a*; Ḥoshen Mishpaṭ, 46, 31). If, however, the space between the signatures of the witnesses and the authentication is filled up by lines and dots, it is sufficient (*ib.* 32 *et seq.*). Maimonides (Malweh we-Loweh, xxvii. 6) and the Ḥoshen Mishpaṭ (*l.c.*) seem to have been of the opinion that the authentication could be written alongside of the document.

Although an authenticated document was in the nature of a public record, and had all the faith and credit given to it as such, nevertheless the question of its genuineness could be raised. If any such question arose, it was sufficient for two of the subscribing judges to acknowledge their signatures to the authentication. Other rules concerning the proof of authenticated instruments, when the same are attested, are stated by the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 46, 14-16, 37, 38.

J. SR. D. W. A.

AUTHORITY, RABBINICAL: The power or right of deciding the Law, in dubious cases, or of interpreting, modifying, or amplifying, and occasionally of abrogating it, as vested in the Rabbis as its teachers and expounders.

In Biblical times the Law was chiefly in charge of the priests and the Levites; and the high court of justice at Jerusalem, which formed the highest tribunal to decide grave and difficult questions, was also composed of priests and Levites (Deut. xvii. 9, 18; xxxi. 9; xxxiii. 10; Jer. xviii. 18; Mal. ii. 7; II Chron. xix. 8, 11; xxxi. 4). In the last two pre-Christian centuries and throughout the Talmudical times the Scribes ("Soferim"), also called "The Wise" ("Ḥakamim"), who claimed to have received the true interpretation of the Law as "the tradition of the Elders or Fathers" in direct line from Moses, the Prophets, and the men of the Great Synagogue (Abot i. 1; Josephus, "Ant." xiii. 10, § 6; 16, § 2; x. 4, § 1; "Contra Ap." i. 8; Matt. xv. 2), included people from all classes. They formed the courts of justice in every town as well as the high court of justice, the Sanhedrin, in Jerusalem, and to them was applied the law, Deut. xvii. 8-11, "Thou shalt come . . . unto the judge that shall be in those days, . . . and thou shalt do according to the sentence which they . . . shall show thee; . . . thou shalt not decline from the sentence which they shall show thee, to the right hand, nor to the left." This is explained thus: Whosoever the judge of those days may be, if he be recognized as competent and blameless, whether he be a Jephthah, a Jerubbaal, or a Samuel, he is, by virtue of his position as chief of the court of justice, invested with the same authority as Moses (Sifre, Deut. 153; R. H. 25*ab*). Even when they decide that left should be right, or right left, when they are mistaken or misled in their judgment, they must be obeyed (R. H. 25*a*). Heaven itself yields to the authority of the earthly court of justice as to the fixing of the calendar and the festival days (Yer. R. H. i. 57*b*; compare also Mak. 22*b*).

Powers of the Rabbis.

The power of the Rabbis is a threefold one: (1) to amplify the Law either by prohibitory statutes for the prevention of transgressions ("gezerot") or by mandatory statutes for the improvement of the moral or religious life of the people ("taḳḳanot"), and by the introduction of new rites and customs ("minhagim"); (2) to expound the Law according to certain rules of hermeneutics, and thereby evolve new statutes as implied in the letter of the Law; and, finally, (3) to impart additional instruction based upon tradition. But the Rabbis were also empowered on critical occasions to abrogate or modify the Law (see Abrogation of Laws and Accommodation of the Law). In many instances where greater transgressions were to be prevented, or for the sake of the glory of God, or the honor of man, certain Mosaic laws were abrogated or temporarily dispensed with by the Rabbis (Mishnah Ber. ix. 5, 54*a*, 63*a*; Yoma 69*a*; compare also Yeb. 90*b*).

In matrimonial matters the principle adopted is that, since marriages are, as a rule, contracted in accordance with the rabbinical statutes, the Rabbis have the right to annul any marriage which is not in conformity with their ruling (Yeb. 90*b*). In money matters the Rabbis claimed the same right of confiscation in cases when their ruling was disregarded as was exercised by Ezra (see Ezra x. 8; Giṭ. 36*b*).

As to the validity of the decisions of the Rabbis, the following rules are to be considered:

"No rabbinical court [bet din] can impose laws or institute forms of practise which the majority of people can not without great hardship accept and observe" ('Ab. Zarah 36*a*, B. B. 60*b*).

Dissenting Rabbis.

"No rabbinical court can abrogate laws and institutions made by any other court, unless it is superior in both wisdom and number" ('Eduyyot i. 5). If, however, such a prohibitory law has been accepted by the entire Jewish people, no rabbinical court, even though superior to the one that introduced it, has the power of abrogating it ('Ab. Zarah 36*b*; Maimonides, "Yad," Mamrim, ii. 4). In case two rabbis, or two rabbinical courts, differ in their opinions, the rule is that in questions concerning Mosaic laws the more rigid decision should prevail; in questions concerning rabbinical laws the more lenient decision should be followed ('Ab. Zarah 7*a*). "After one of rabbinical authority has declared a thing to be unclean, no one else has the power to declare it clean; after one rabbinical authority has forbidden a thing, no other can permit it" (Baraita in Nid. 20*b*; Ber. 63*b*). If a teacher dissents from the decision of the highest court, he may state his dissent and teach accordingly; but he is not allowed to oppose the authority of the court in practise, in which case he falls under the category of a "zaḳen mamre" (a rebellious elder) (Deut. xvii. 12; 'Eduyyot v. 6; B. M. 59*b*; Yer. 'Ab. Zarah ii. 42*d*; Ber. 63*a*).

As a matter of course, the Rabbinical Authority and legislative power rested with the entire body of the court of justice or rabbinical academy, and not with the president or patriarch only. Still, the more eminent the latter in knowledge and wisdom, the better he succeeded in making his opinion or propositions prevail in the deliberation; and so the new

Authority of President or Patriarch.

measure or institution was ascribed to him, or to him and his bet din (R. H. ii. 5–9, iv. 1–4; Yeb. 77*a*, and elsewhere). At any rate, the Nasi, or patriarch, announced the decision, proclaimed the New Moon, and represented on all official occasions the whole rabbinical body as its highest authority. The power of investing others with Rabbinical Authority was therefore presumably his exclusive privilege. It is known that from the beginning of the third century before the common era, rabbinical authorization by the patriarch consisted in the bestowal of authority and power ("reshut") to teach, to judge, and to grant permission regarding "the forbidden first-born among animals" ("yore yore, yadin yadin, yattir bekorot," Sanh. 5*a*). But it is obvious that this is no longer the original form of rabbinical authorization. Far more significant and expressive of the idea of Rabbinical Authority are the words used by Jesus when ordaining Peter as chief apostle, or his disciples as his successors, and undoubtedly taken from pharisaic usage: "I will give unto thee the keys of the kingdom of heaven: and whatsoever thou shalt bind on earth shall be bound in heaven; and whatsoever thou shalt loose on earth shall be loosed in heaven" (Matt. xvi. 19, xviii. 18). This corresponds exactly with what Josephus, or rather his source, tells of the Pharisees in the time of Queen Alexandra: "They were the real administrators of the public affairs; they removed and readmitted whom they pleased; they bound and loosed [things] at their pleasure" ("B. J." i. 5, § 2). The terms "bind" and "loose" ("asar we-hittir"), employed by the Rabbis in their legal terminology, point indeed to a sort of supernatural power claimed by the Pharisees for their prohibitory or permissory decrees, probably because they could place both men and things under the ban, or "ḥerem." See Binding and Loosing.

But there are other expressions which were presumably used in the old formula of rabbinical ordination. "Elijah," says Johanan ben Zakkai ('Eduy. viii. 7), "does not come to declare as clean or unclean and to separate or bring nigh." This was indeed a very important function at the time when the Levitical laws of purity and the questions of family or purity of blood ruled the entire social life of the Jews. Here the authority of the Pharisees made and unmade men and homes; and it is to this that Josephus (*l.c.*) possibly refers in saying, "They removed and readmitted whom they pleased."

When with the Bar Kokba war the solemn act of ordination ceased, Rabbinical Authority changed its character also, inasmuch as the continuity of tradition was no longer its basis and safeguard. Hence the greater learning became the chief source of authority. Thus, for instance, Rab's authority was decisive in ritualistic questions and Samuel's in legal matters. From Abaye and Raba onward the latter-day authorities were regarded as of greater weight than the earlier ones, because they could weigh all sides better. In the Middle Ages this attitude changed, from lack of self-confidence, and the respect for the former generation, which amounted to blind adoration, grew greatly (see Aḥaronim). In fact, the great lack of a central body representing Rabbinical Authority was felt more and more, and the attempts of Jacob Berab to reintroduce the ordination, or Semikah, failed. See Semikah.

Thus Rabbinical Authority was transferred from the personality of the teachers to the codes of law, until finally the Shulḥan 'Aruk became its embodiment, while Jewish synods in various countries provided for temporary emergencies. Singularly enough, the abolition of the power of excommunication, under the influence of modern times and through the interference of the worldly government, marks the beginning of the decline of Rabbinical Authority in occidental Judaism; while the derogation of the Shulḥan 'Aruk in the modern life of the Jew practically hastened the process, and led to the convocation of rabbinical conferences, synods and like measures. See Synods; Conferences, Rabbinical; Rabbinism; Reform; Halakah; Ordination; Codification of Law; Karaism.

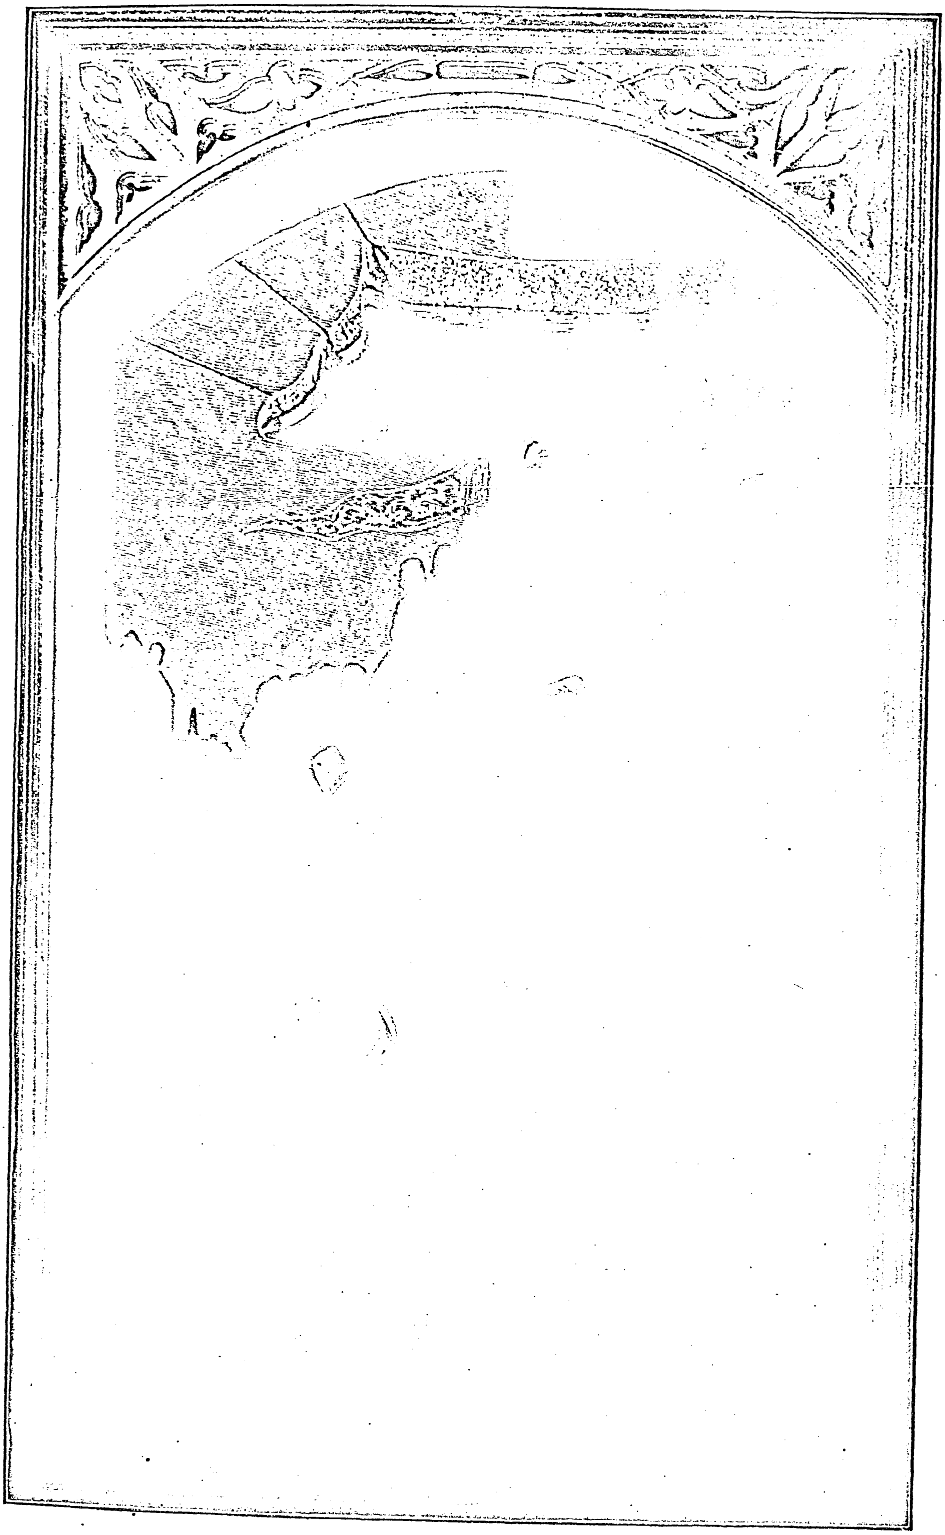
K.

AUTO DA FÉ: Portuguese form of the Spanish "auto de fé" (in French, "acte de foi," from the Latin "actus fidei"), the solemn proclamation and subsequent execution of a judgment rendered by the Court of the Inquisition on "reos," or persons condemned by it; though in the ordinary acceptance of the term it is applied to the carrying out of the sentence only. The expression is also erroneously, or perhaps metaphorically, applied to the burning of books (the Talmud, etc.) in the early Middle Ages.

The solemn proclamation was ordinarily made in a church and on the first Sunday in Advent; because on that day the lection from the Gospel (Luke xxi.) deals with the last judgment. Some authorities held that such sentences should not be publicly read in a church because of the death-penalty connected with many of them. Where this view was held, as in Spain, some public place in the city was chosen where a large estrade was erected so that a great concourse of people could gather and witness the ceremony; "for," says Nicolas Eymeric ("Manuel des Inquisiteurs," p. 143), "it is a sight which fills the spectators with terror and is an awful picture of the last judgment. Such fear and such sentiments ought to be inspired, and are fraught with the greatest advantages."

Some time previous to the auto a formal proclamation was made before the public buildings and in the public squares of the city, which proclamation, in the case of the auto held at Madrid in 1680, was worded as follows: "The inhabitants of the town of Madrid are hereby informed that the Holy Office of the Inquisition of the city and kingdom of Toledo will celebrate a general Auto da Fé on Sunday, the 30th of June of the present year, and that all those who shall in any way contribute to the promotion of or be present at the said auto will be made partakers of all the spiritual graces granted by the Roman Pontiff."

There were various kinds of autos: the "Auto Publico General," which was surrounded with much pomp and was held in the presence of all the magistrates of the city, often in celebration of the birth



AN AUTO DA FÉ.
(From a painting in The National Gallery, Madrid.)

or marriage of a prince; the "Auto Particular," at which the inquisitors and the criminal judges alone were present; the "Autillo" (little auto), which was held in the precincts of the palace of the Inquisition in the presence of the ministers of the tribunal and some invited guests; and lastly the "Auto Singular," held in the case of a single individual.

Costume of the Condemned.

After having been immured for months or even years in the dungeons of the Inquisition, and after the trial, the condemned persons whose sentences were to be read were taken out of prison on the night preceding the auto and led to a place where they were prepared for the ceremony. A special dress was given them, consisting of a vest, the sleeves of which came down to the wrists, and a pair of trousers reaching to the heels, both made of black stuff striped with white. Over this was thrown a scapular, called "sanbenito"—usually made, for those accused of some crime against the church, of yellow cotton marked both on breast and back with the St. Andrew cross painted in red. For those, however, who had been convicted and who persisted in their denial, or who had relapsed, the scapular was gray and was called "samarra," and there was figured on it both in front and behind the likeness of the prisoner resting upon burning torches and surrounded by devils. Often the name of the prisoner and the crime for which he was convicted were written beneath the picture. For those who had accused themselves the flames were inverted; and for such as had been convicted of sorcery a bonnet of paper in the form of a sugar-loaf was also prescribed, upon which were figured devils and flames of fire. These bonnets were called "carochas." The culprit's feet were bare, and in his hand he carried a taper of yellow wax.

In the solemn procession which was formed, the banner of the Inquisition with its inscription "Justitia et Misericordia" was carried foremost; then came the officers of the Inquisition and other dignitaries. One or two citizens were assigned to each culprit to act as godfathers, whose duty it was to see that those given in their charge were returned safely to the prison. In the procession were also carried the bones of those who had died before sentence could be pronounced upon them; for, says Bernardus Comensis ("Lucerna Inquisitor," p. 52), "Mortui hæretici possunt excommunicari et possunt hæritici accusari post mortem . . . et hoc usque ad quadraginta annos." The procession also included effigies of those who had been condemned *in absentia*. The reason for this course was because the Inquisition, when it condemned a person, was able to sequester his property. As Bernard Gui expressly states in his "Practica Inquisitionis," "The crime of heresy must be proceeded against not only among the living, but even among the dead, especially when it is necessary to prevent their heirs from inheriting, because of the beliefs of those from whom they inherit" (Molinier, "L'Inquisition dans le Midi de la France," p. 358).

Procession and Ceremony.

In the church elaborate preparations had been made for the ceremony. The great altar was draped with black cloth, and upon it were placed two thrones, one for the Inquisitor-General, the other for the king or for some high dignitary. A large crucifix was also erected: those to whom its face was turned were to be spared; while those to whom its back was shown were to die. Before the actual ceremony took place the secular authorities had solemnly to swear to lend all their aid to the Inquisition and to carry out its behests. A long sermon was then preached for the purpose of exhorting those who still remained obdurate to confess, and of inciting the onlookers to the profession of faith which was made at various intervals. On this account the auto was sometimes called "sermo publicus," or "sermo general de fide" (Molinier, *ib.* p. 8). A good example of this preaching may be seen in the sermon of Don Diego Annunciazaro Justinianus, at one time archbishop of Craganor (translated by Moses Mocatta, and published in Philadelphia, 1860). A bibliography of such sermons preached at the autos in Portugal is given by I. F. da Silva ("Diccionario Bibliographico Portuguez," Lisbon, 1858 *et seq.*, s.v. "Autos da fé").

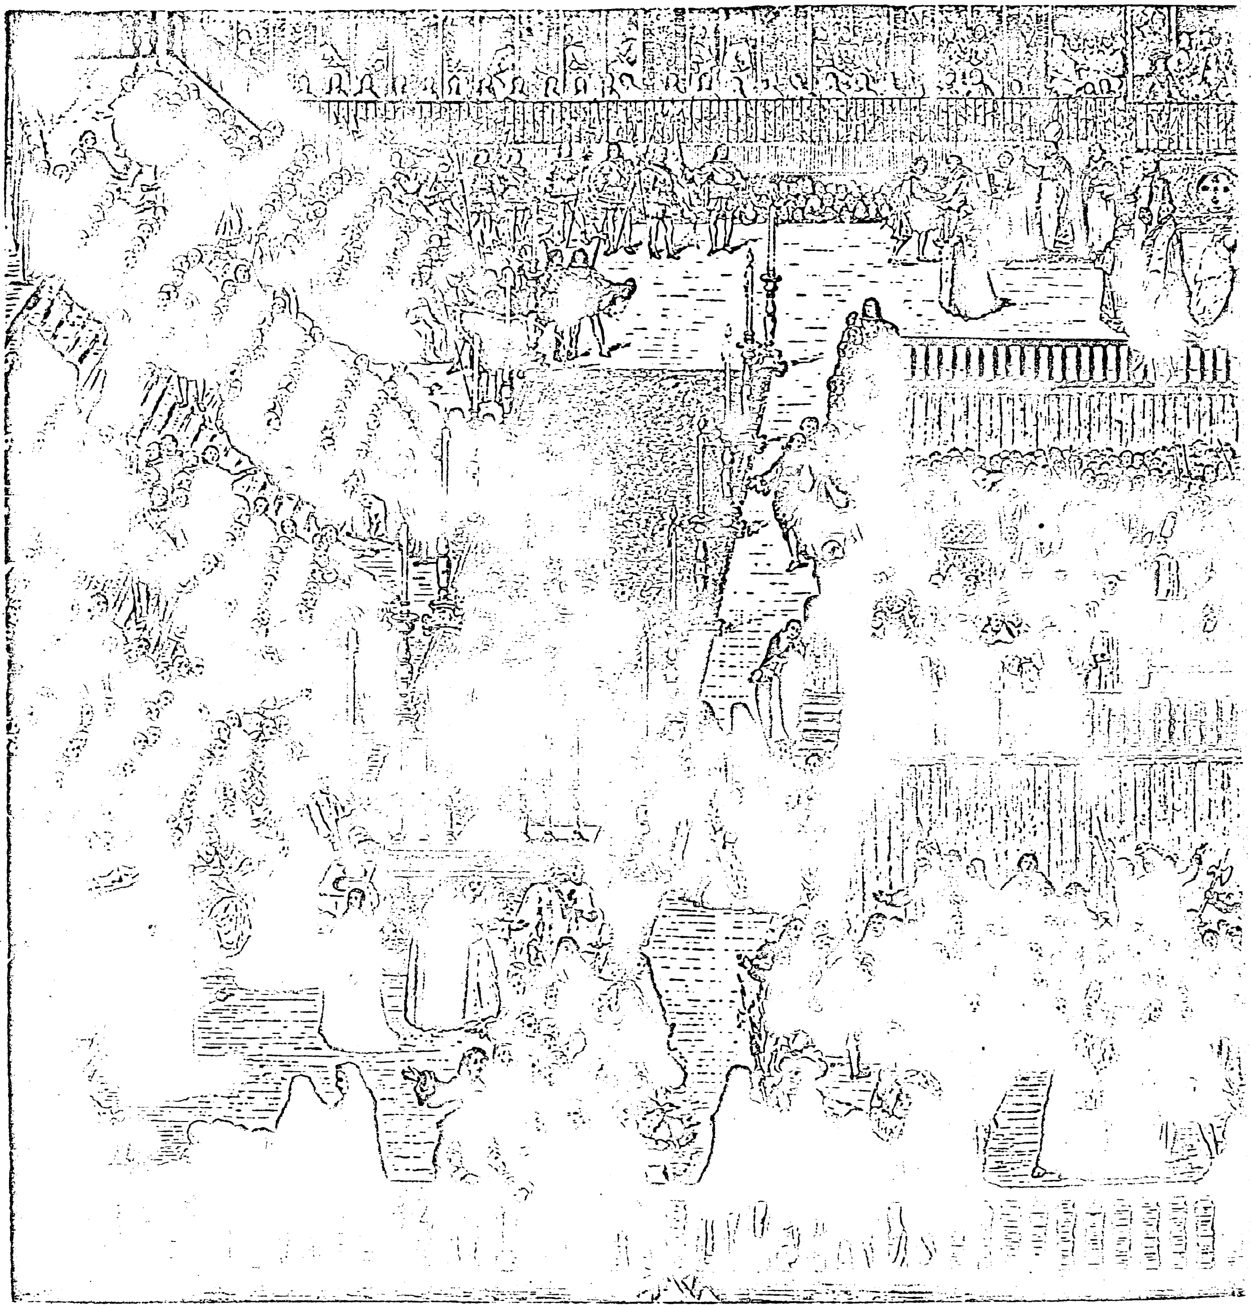
A chance was also given to those so inclined to make abjuration of their heresies, this being done at a table on which lay several open missals. Two clerks then read the report of the trial and the punishment meted out, the reading of which often occupied a whole day. As each report was read, the culprit was led out by one of the familiars of the Inquisition into the middle of the gallery, where he remained until the sentence had been pronounced.

The same ceremony was gone through when the service was held in a public square. Here a large amphitheater was erected with all the necessary appurtenances for the service, and with temporary dungeons beneath the platforms for the condemned.

Punishments.

The punishments meted out by the Inquisition were of four kinds according to the official enumeration: (1) Citation before the Inquisition; (2) the performance of pious deeds; (3) public pilgrimages, flagellations, and the wearing of large crosses; and (4) confiscation of goods, perpetual imprisonment, and death. All those found guilty at the trial were led back again in the same solemn procession; the heretic penitent and relapsed, the heretic impenitent and not relapsed, the heretic "impenitent and relapsed," the heretic negative (who denied his crime), and the heretic contumacious, were all delivered over to the secular arm, as the Inquisition itself technically refused to carry out the death-sentence on the principle "ecclesia non sitit sanguinem" (the Church thirsts not for blood). The various sentences of death always ended with some such formula as "For these reasons we declare you relapsed, we cast you out of the forum of the church, we deliver you over to the secular justices; praying them, however, energetically, to moderate the sentence in such wise that there be in your case no shedding of blood nor danger of death."

Bellarmin says expressly, "That heretics deserve the sentence is clearly seen, or at least is referred to in Deut. xiii. 6 *et seq.*" The doctors of the Church were merely divided on the question whether those convicted should be put to death by the sword or by fire (compare Julien Havet, "L'Heresie et le Bras Séculier au Moyen Age," Paris, 1881). Death by fire



The Jewish Encyclopedia Vol II.

AUTO-

NTING BY RICI.)

was preferred as more in keeping with John xv. 6, "If a man abide not in me, he is cast forth as a branch, and is withered; and men gather them and cast them into the fire, and they are burned." Simancas and Roias were even of opinion that the culprits ought to be burned alive; the only precaution necessary being that their tongues be bound, or their mouths stuffed, in order that they do not scandalize the audience. The custom seems to have been that the penitent were first strangled and then burned, while the impenitent were cast into the flames alive. It was also held that the secular arm should not delay too long in carrying out sentences of the Inquisition. Innocent IV., in his bull "ad extirpanda," fixes five days as the longest period of delay. In Spain it was customary to carry out the sentence immediately after its proclamation, which was so timed as to occur upon some feast-day, when the populace would be at liberty to witness the burning.

Execution of Sentence.

The same pomp which marked the public reading of the sentence was observed at its execution; the imposing procession wending its way from the Inquisition dungeons to the "quemadero," the place where the scaffolds were erected. The dignitaries of both Church and state were present; and at the auto of June 30, 1680, in Madrid, which Charles II. held in honor of his newly married bride, the king himself lighted the first brand which set fire to the piles.

During the night preceding the carrying out of the sentence a commission sat continuously to hear the recantations of the prisoners, whenever they were minded to make them. The victims were carried on asses with escorts of soldiers, and accompanied by priests who exhorted them to take the last chance of becoming reconciled to the Church.

A full report—called in Spain "Relacion," in Portugal "Relaçao"—of the auto was drawn up and often printed for the double purpose of inciting the faithful to greater zeal and of bringing order into the process of the ecclesiastical court (E. N. Adler, in "Jewish Quarterly Review," xiii. 395). These reports were sent not only to the central organization of the Inquisition, but to other tribunals as well.

The earliest record of the execution of Jews at an Auto da fé relates to that held in Troyes (L'Aube) on Saturday, April 24, 1288. Jewish accounts of this event are given in the Hebrew seliḥot (penitential poems) of Jacob ben Judah, Meier ben Eliab, and Solomon Simḥa, as well as in an old Provençal account in verse by the aforementioned Jacob. This execution called forth strenuous protests from Philip le Bel (May 17, 1288), who saw in the actions of the Holy Office an infringement of his own rights (compare A. Darmesteter, in "Romània," iii. 443 *et seq.*; *idem*, in "Revue Etudes Juives," ii. 199; Salfeld, "Martyrologium des Nürnberger Memorbuches," p. 162). We have, however, little documentary evidence about the Jews of the Inquisition in countries outside of the Spanish Peninsula. Most of the information relating to the Inquisition in its relation to the Jews refers to Spain and Portugal and their colonies (see below). That Jews suffered, however, from the tribunal in Italy may be seen from the fact that in Venice during the sixteenth century there were 43 persons before the Holy Office for the crime of "Judaismo," and in the seventeenth, 34. Many Jews may even be comprised under those who were charged with "Maomedanismo." The Inquisition worked its greatest havoc in Spain and Portugal, in the Balearic Islands, in Spanish America (Mexico, Brazil, Peru), in Guadelupe, and in Goa (India). In Spain autos were held from the time that Sixtus IV. (1480) issued a bull empowering Catholic kings to appoint inquisitors over all heretics, and in Portugal since 1531, when Clement VII. issued the bull "cum ad nihil magis," which formally established the Inquisition in Portugal (Herculano, "Estab. da Inquisiçao," i. 255). The Holy Office was established in America by letters patent of Philip II. on Feb. 7, 1569. The Inquisition in Venice was abolished in 1794; at Goa, in 1812. The last auto held in Portugal was at Lisbon, Oct. 19, 1739; but as late as Aug. 1, 1826, in a short period of reaction, an auto was celebrated at Valencia, in which one Jew was burned alive ("Revue Etudes Juives," v. 155). The Inquisition was finally abolished in Spain July 15, 1834. In Peru the Holy Office had already been abolished on March 9, 1820, at the earliest moment after the cessation of the connection with Spain.

Spain and Portugal.

It is impossible to tell the exact number of Jews who met their death at the many autos da fé in Spain and Portugal. They were usually charged with Judaizing—a charge which might have been made against Moriscos, or even against Christians who were suspected of heresy. This was especially the case with the Maranos or Neo-Christians; and yet, from the documents already published, and from the lists which are now accessible (see below), it is known that many thousands must have met their death in this way. Albert Cansino, ambassador of Ferrara, writes on July 19, 1501: "I passed several days at Seville, and I saw fifty-four persons burned" ("Revue Etudes Juives," xxxvii. 269). According to Llorente, the Inquisition in Spain dealt with 341,021 cases and over 30,000 people were burned (see also Kohut, in "Proceedings Am. Jew. Hist. Soc." iv. 109). According to another authority, during the two hundred and fifty years that the Inquisition existed in America, 129 autos da fé were held.

From the details given by Adler the following numbers can be given of the Jews condemned, not always to death, so far as known. But in many instances, especially during the sixteenth century, no details are given:

Fifteenth century,	1481-1500	3,881
Sixteenth "	(number of "reos")	868
Seventeenth "		821
Eighteenth "		878

Or in all 6,448 of whom the names and fates can be ascertained from the "relaciones" of 115 out of 464 autos da fé which are known to have taken place from 1481 to 1826.

The following list of autos da fé in which it is positively known that Jews were concerned has been selected from those held by the Inquisition; the thousands of volumes of Inquisition reports in the archives at Madrid, Seville, Simancas, Lisbon, etc., when published, will doubtless add largely to the number. As a basis the list drawn up by E. N. Adler ("Jewish Quarterly Review," xiii. 392), with the additions made by the writer of this article (*ib.* xiv. 80) and S. N. Kayserling (*ib.* 136), has been made use of wherever definite details are given, showing that Jews or Judaism were concerned in the Auto da fé. The authorities are given in the articles mentioned.

Several paintings of autos da fé are in existence. Two of these are in the National Gallery at Madrid. The older, attributed to Berruguete (fifteenth century), depicts one over which San Domingo de Guzman presided, and represents the actual burning at the stake. The other pictures the celebrated auto held at Madrid in 1680 before Charles II., his wife, and his mother. Of this a "relacion" was published by Joseph del Olmo (Madrid, 1680, 1820). An abstract in German was published by Kayserling, "Ein Feiertag in Madrid," and another in English by J. Rivas Puigcerner, in "Menorah Monthly," xxx. 72. A painting of an Auto da fé by Robert Fleury was exhibited in the Paris Salon in 1845. See also INQUISITION.

G.

AUXERRE: Chief city of the department of Yonne, France. Since the eleventh century an important community of Jews existed here and was presided over by eminent rabbis. These rabbis, known as "the sages of Auxerre," were in correspondence with Rashi (Geiger, "Melo Hofnayim," quoted by Gross, "Gallia Judaica," p. 61). Several of the sages of Auxerre took part in the proceedings of the synod convened by Rabbenu Tam and Rashbam in Troyes about the middle of the twelfth century; and one of them, Samuel ben Jacob, was a signatory to the decisions. At this time Auxerre had a Talmudic school, over which Hezekiah presided, a rabbi whom Gross identifies as the savant of that name mentioned in one of R. Tam's letters (*op. cit.* p. 61).

The Jews were always treated kindly at Auxerre. From a letter written by Pope Innocent III. to the bishop of Auxerre, it is shown that they enjoyed the right to own farms, fields, and vineyards, for which they paid tithes to the clergy. But in 1208, emboldened no doubt by the protection granted them by the lord of the manor, the Jews refused to continue to pay the tithes. The bishop, having no other alternative, brought his grievance before the pope, who in turn could do no more than command all Christians, under penalty of excommunication, to avoid intercourse with the Jews until the demands of the clergy were satisfied ("Innocentis Epistolæ," vol. ii., book x., ep. lxii., Paris, 1682).

There is preserved in the municipal archives of Dijon a document, dated 1323, which relates to the confiscation of a house which belonged to a certain Jew of Auxerre, named Heliot (Gerson, "Essai sur les Juifs de la Bourgogne," p. 35). In 1379 a certain number of privileges were granted to the citizens of Auxerre by the Countess Mahaud and Count John of Châlons. Of these privileges, many of which related especially to the Jews, the eighteenth runs as follows:

> "The Jews of the countess are permitted to lend money to the citizens at the rate of threepence in the pound per week upon indentures passed under her seal or executed in the presence of two citizens, said interest not to continue for more than one year." ("Ordonnances des Rois de France," vi. 417.)

By the royal edict of Sept. 17, 1394, all Jews were expelled from France; and since that date there has been no Jewish community in Auxerre.

D. S. K.

AVÉ-LALLEMENT, FREDERICK CHRISTIAN BENEDICT: Noted criminologist; born in Lübeck May 23, 1809; died there July 20, 1892. In his standard work, "Das Deutsche Gaunertum," Leipsic, 1858–62, he devotes a chapter to the Jews, in which he expresses views unfavorable to their morality. In the protracted struggle of the Jews of Lübeck for emancipation, Avé-Lallement ranged himself with their opponents. He claimed that the Jew had been a dangerous element in the economic development of the world, ever since the time of the Patriarchs. His nomadic nature and his commercialism prevented him from achieving anything tangible, even in those branches of science for which he showed decided talent. His articles appeared in the "Neue Lübeckische Blätter" for 1841 and in the "Volksbote" for 1850. They were answered by Gabriel RIESSER.

AVEN: 1. One of several Egyptian cities threatened with God's vengeance (Ezek. xxx. 17). The name is evidently a corruption or an intentional vowel-change of "On" (Gen. xli. 45), which is thus made to signify "vanity." The Septuagint renders it "Heliopolis." **2.** In Hosea x. 8 ("the high places also of Aven"), "Aven" probably stands for Beth-aven (Hosea x. 5), by which name Beth-el is intended. Some scholars, however (G. A. Smith, "The Twelve Prophets," for example), are inclined to regard Aven as a term for "false worship," and render the phrase "high places of idolatry." **3.** The "plain of Aven" (R. V. "valley of Aven"), mentioned in Amos i. 5, applies to the valley of Cœle-Syria, between Lebanon and Anti-Libanus, noted for the idolatrous worship of the sun at the temple of Baalbek. The valley is now called "Beka'a" (Baedeker-Socin, "Palestine," p. 447).

J. JR. G. B. L.

AVENEL, GEORGES: French author; born at Chaumont-en-Vexin, department of the Oise, France, Dec. 31, 1828; died at Bougival July 1, 1876. He was a brother of Paul Avenel. Avenel devoted the greater part of his life to a study of the French Revolution. In 1865 he published his first book, "Anacharsis Clootz, l'Orateur du Genre Humain," after which he plunged with renewed energy into historical research. The outcome of several years of continuous study was the publication of "Lundis Révolutionnaires," Paris, 1875, a collection of essays representing only a portion of his extensive researches. He died before he could finish the second series of his "Lundis," which was in process of preparation, and in which the biography of Pache was to occupy an important place. Of the first series, one chapter has been published separately under the title, "La Vraie Marie Antoinette, d'après la Correspondence Secrète," Paris, 1876. Avenel also edited an improved and popular edition of the complete works of Voltaire, generally known as the "édition du siècle," 9 vols., in 1867–70.

S. A. S. C.

AVENEL, HENRI MAYER: French author; born in Paris, March 7, 1853. He is an adopted son of Paul Avenel. He began his career by editing "L'Événement," the daily political Parisian paper, and several departmental newspapers. In 1888 he took charge of the "Annuaire de la Presse Française," founded by Emile Mermet in 1880, and improved it in many ways, especially by the addition of a political department.

Avenel is the author of "Chansons et Chansonniers" (Paris, 1889), a history of song in all ages; "La Loterie: Historique Critique de l'Organisation Actuelle; Projet de Réorganisation"; "L'Amérique Latine" (Paris, 1890), with an interesting introduction "on the present state and future prospects of French commerce in America."

AVENEL, PAUL: French author; born at Chaumont-en-Vexin, department of the Oise, France, Oct. 9, 1823. After a brief course in medicine at the University of Paris, he, in 1850, abandoned his studies to devote himself exclusively to literature. Beginning as journalist, he became successively poet, novelist, and dramatic author.

Among Avenel's dramatic works, which number more than fifty, are: "Les Chasseurs de Pigeons," farce-comedy in three acts, produced at the Folies Dramatiques in 1860; "La Paysanne des Abruzzes," drama in five acts, written in collaboration with H. de Charlieu and produced at the Théâtre Beaumarchais in 1861; "Sayez donc Concierge," farce-comedy, produced at the Folies Dramatiques in 1861; "Un Homme sur le Gril," farce-comedy, produced at the Théâtre des Variétés; "L'Homme à la Fourchette," one-act comedy, 1874; "Les Plaisirs du Dimanche," comedy in five acts; "Le Saint Pierre," drama in five acts; "Mimi-Chiffon," comedy in four acts; "Le Beau Maréchal"; "Le Pavé d'Or," and the lyric comedy, "L'Antichambre en Amour."

Of Avenel's novels and short stories the following are noteworthy: "Le Coin de Feu," 1849; "Les Tablettes d'un Fou, ou le Voyage Entre Deux Mondes," 1852, and "Les Etudiants de Paris," reminiscences of the Latin Quarter; "Le Roi de Paris," 1860; "Le Duc des Moines," 1864, and "Les Lipans, ou les Brigands Normands," 1868, three historical novels of the time of the League; "Les Prussiens à Bougival," a collection of stories of the Franco-Prussian war; "Une Amie Dévouée, Mœurs Parisiennes," 1884, a Parisian novel; "Le Docteur Hatt," a novel of a philosophical character, 1887; and "Les Calicots," scenes of real life, first published as a novel in 1866, and afterward dramatized.

As an author of poems and verse, Paul Avenel has published "Chansons de Paul Avenel," 1875; "Chants et Chansons Politiques," 1869-72—in the 8th edition, 1889, figure the most prominent political occurrences from 1848 to 1860; "Alcôve et Boudoir," a collection of verses, 1855, which was at once suppressed by the French courts. Thirty years later Quantin published an édition de luxe of the condemned verses.

Avenel is a member of the following societies: Société des Gens de Lettres; Société des Auteurs Dramatiques; Société des Auteurs, Compositeurs, et Editeurs de Musique, of which he was president from 1878 to 1881; and Lice Chansonnière, over which he presided from 1892 to 1894. He is also an honorary member of the Caveau Séphanois, at Saint Etienne.

S. A. S. C.

AVENGER OF BLOOD.—Biblical Data: (Hebrew "go'el"): The Hebrew name for the clansman, "next of kin," upon whom devolved the duties: (1) of avenging, on the person of the murderer, the blood of a murdered kinsman—in this capacity the more specific term "go'el ha-dam" (blood-avenger) was generally used—and (2) of redeeming the property or the person of a relative that had fallen into debt.

Among Primitive Peoples.

(1) Among primitive peoples of low political development—such as the ancient Greeks, Germans, and Slavs, some North American tribes, the modern Sicilians, Corsicans, and Arabs—the clan or family had to assume the right to protect itself. One of the most important clan duties then was plainly for the nearest of kin to hunt down and carry out the death-penalty on a person that had slain a member of the sept or family. That this idea of family retribution—which even to-day is by no means extinct in some comparatively civilized communities—was also current among the ancient Hebrews may be seen from Gen. xxvii. 45, where the existence of the custom is clearly taken for granted. It appears, furthermore, from Josh. vii. 24, and II Kings ix. 26, that, in the most primitive period, such a vendetta was extended to the entire family of the murderer, as is still the custom among the desert Bedouins. The Hebrew religious justification for the system of family blood-revenge was undoubtedly the firm belief that God, in order to insure the sacredness of human life, had Himself fixed the death-penalty for murder (Gen. ix. 5 *et seq.*; Lev. xxiv. 17). In the earliest times blood-money was not accepted either for murder or for excusable homicide. Such a payment would have made the land "polluted by blood" (Num. xxxv. 31 *et seq.*). Unavenged blood "cried out" for vengeance to God (Gen. iv. 10; Isa. xxvi. 21; Ezek. xxiv. 7 *et seq.*; Job xvi. 18). The Avenger of Blood, then, was regarded as the representative, not only of the murdered man's family, but of Yhwh Himself, who was the highest avenger (Ps. ix. 13 [A. V. 12]).

Modification of the System.

Such a stern system, however, could not, of course, survive unmodified after the community had begun to advance from the purely savage state. Abuses of the privilege of blood-revenge must have soon become evident to the tribal chiefs, as one finds in Ex. xxi. 12 (compare Gen. ix. 6) that the commonly accepted formula that a life must be given for a life is modified by a careful legal distinction between *wilful murder* and *accidental manslaughter*. In order to establish a case of wilful murder, it must be shown that weapons or implements commonly devoted to slaughter were used, and that a personal hatred existed between the slayer and his victim (Ex. xxi. 12; compare Num. xxxv. 16; and Deut. xix. 4). The law enumerates three exceptions to this general principle: (*a*) The slaying of a thief caught *at night* in *flagrante delicto* is not punishable at all; but if he is captured by day there is blood-guilt which, however, is not liable to the blood-revenge (Ex. xxii. *et seq.*). (*b*) If a bull gored a human being to death, the punishment was visited upon the animal, which was killed by stoning. Its flesh in such a case might not be eaten. If gross contributory negligence could be proved on the part of the animal's owner, he was liable only for blood-money (Ex. xxi. 28). (*c*) Where the master kills his slave, the offense is punishable only when the latter dies at once, and then probably not by the death-penalty, as some of the rabbinical writers thought (Ex. xxi. 23).

Six Cities of Refuge.

The later codes develop at some length the very just distinction between wilful murder and accidental homicide (see Murder). Six Cities of Refuge were appointed for the purpose of affording an asylum to the homicide, where he might be secure from the hand of the avenger (Deut. xix. 12) until the elders of the community of which the accused was a member should decide whether the murder was intentional or accidental (Num. xxxv. 9-34; Deut. xix. 1-13; Josh. xx.). According to the later procedure, at least two witnesses were necessary to establish a case of wilful murder (Num. xxxv. 30; Deut. xix. 15). In case, however, it was not possible to apprehend the murderer or manslayer, the adjudication might take place and a verdict be rendered in his absence.

It appears from Josh. xx. 4 that the elders of the city of refuge chosen by the slayer had the right to decide as to whether he should be permitted to have a temporary asylum or not. If the case were simply one of unintentional manslaughter the slayer was immediately accorded the right of asylum in the city of refuge, where he had to remain until the death of the reigning high priest (Num. xxxv. 25), whose death, in ancient Hebrew law, marked the end of a legal period of limitation (Num. xxxv.; Deut. xix.; Josh. xx.). If the "go'el ha-dam" were to find the slayer of his kinsman outside the limits of the city of refuge, he had the right to kill him at sight.

The Family Executioner.

In a case in which the verdict against the slayer was one of wilful murder, the murderer incurred the blood-revenge without any restrictions. If he were already in a city of refuge, the elders of his own city were obliged to fetch him thence by force if necessary, and to deliver him formally to the Avenger of Blood, who thus became little more than a family executioner (Deut. xix. 11 *et seq.*).

Two very important restrictions should here be noticed: (*a*) Although the entire family or gens to which the murdered man belonged were theoretically entitled to demand the blood-revenge (II Sam. xiv. 7), still, in the practise of later times, only one member—for example, the next of kin, who was also legal heir—might assume the duty of carrying it out. According to the later Jewish tradition, when there was no heir, the court had the right to assume the position of the "go'el." (*b*) The law expressly states that the blood-revenge was applicable only to the person of the guilty man and not to the members of his family as well (Deut. xxiv. 16; compare II Kings xiv. 6). This is a most significant advance on the primitive savage custom that involved two gentes in a ceaseless feud. Anent this advance, it is interesting to note that, in the time of the kings, the king himself, as the highest judicial authority, was entitled to control the course of the blood-revenge (II Sam. xiv. 8 *et seq.*).

It is difficult to decide exactly how long the custom of blood-revenge by the "go'el" remained in vogue among the Hebrews. According to II Chron. xix. 10; Deut. xvii. 8, the law of Jehoshaphat demanded that all intricate legal cases should come before the new court of justice at Jerusalem. It is not probable, however, that this regulation curtailed the rights of the "go'el ha-dam," which must have continued in force as long as there was an independent Israelitish state. Of course, under the Romans, the right of blood revenge had ceased (John xviii. 31).

The Redeemer of His Kinsmen.

(2) As indicated above, the term "go'el" had also a secondary meaning. From the idea of one carrying out the sentence of justice in the case of bloodshed, the word came to denote the kinsman whose duty it was to redeem the property and person of a relative who, having fallen into debt, was compelled to sell either his land or himself as a slave to satisfy his creditors (compare Lev. xxv. 25, 47-49). It would appear from Jer. xxxii. 8-12 that the "go'el" had the right to the refusal of such property before it was put up for public sale, and also the right to redeem it after it had been sold (see Ruth).

From the Book of Ruth (iv. 5) it would appear that the duty of the nearest of kin to marry the widow of his relative in case of the latter's dying without issue was included in the obligations resting upon the "go'el"; but inasmuch as the term is not used in the passage in Deut. (xxv. 8-10) in which this institution is referred to—the obligation resting upon the brother to marry his deceased brother's widow—the testimony of so late a production as Ruth can not be pressed. The usage in the book may not be legally accurate.

From this idea of the human "go'el" as a redeemer of his kinsmen in their troubles, there are to be found many allusions to Yhwh as the Divine Go'el, redeeming His people from their woes (compare Ex. vi. 6, xv. 13; Ps. lxxiv. 2); and of the people themselves becoming the "redeemed" ones of Yhwh (Ps. cvii. 2; Isa. lxii. 12). The reference to God as the "go'el" and as the one who would "redeem" His people was applicable to the relationship between Yhwh and Israel in the exilic period, when the people actually looked to their God to restore their land for them, as the impoverished individual looked to his kinsman to secure a restoration of his patrimony. Hence, of thirty-three passages in which "go'el" (as a noun or verb) is applied to God, nineteen occur in the exilic (and post-exilic) sections of Isaiah—the preacher par excellence of "restoration"—for example, in xlviii. 20, xlix. 26, lii. 9, lxii. 12, etc. See Asylum; Cities of Refuge; Job; Murder.

——**In Rabbinical Literature:** Several primitive social regulations touching the rights of the blood-relation, the "go'el ha-dam" (Avenger of Blood), are acknowledged by the Biblical law (Num. xxxv. 19 *et seq.*; Deut. xix. 12); although, according to the higher conception of the Bible, a murder is not so much a crime against the individual as against the community. This conception is carried still further by the rabbinical law, under which the avenging relative has no rights left. The hunting down of a murderer is no longer the business of the avenger, but of the state; accordingly, whether there is any relative or not, whether the relative lodges complaint or not, the state must prosecute the murderer (Sifre, Num. 160 on xxv. 19; Deut. 181). Every murderer, or one who had committed manslaughter, fled to one of the cities of refuge before his case was investigated; and there he was secure from any attack on the part of the avenger, who was forbidden, under penalty of death, to assail such a fugitive in his asylum (Mishnah Mak. ii. 6; Sifre, Num. 160 on xxv. 25). It was obligatory upon the court of justice to arrest the fugitive there, bring him to court, try him, and, if found guilty, to execute him. If it was proved that the death was a case of carelessness and not of intentional murder, he was sent back to the city of refuge in care of armed officers of the court, so as to protect him from the avenger (Mishnah Mak. ii. 5, 6). Should he leave his place of refuge, the avenger had, according to R. 'Akiba, the right—and, according to R. Jose the Galilean, the duty—to slay him, but only when the fugitive had voluntarily left his retreat (*ib.* 7). But even here it is evident that the avenger enjoyed no peculiar prerogative; for, should the fugitive be slain by a disinterested party, the latter was not held accountable (*ib.*; for the correct reading of this passage compare Rabbinowicz, "Variæ Lectiones," on the passage). One teacher, however, goes so far as to maintain that neither the avenger nor, still less, a third party can be permitted to take the man's life, should he have left his asylum (Tosef., Mak. ii. 7; Gemara *ib.* 12*a*).

All these details, however, are hardly to be considered as ever having been matters of actual enforcement; for, although it is highly probable that rabbinical tradition contained much concerning the cities of refuge which existed during the second Temple (see ASYLUM IN RABBINICAL LITERATURE), the regulations concerning the Avenger of Blood are rather of an academic nature and are scarcely drawn from actual life.

K. L. G.

AVERROES, or ABUL WALID MUHAMMED IBN AHMAD IBN ROSHD: Arabian philosopher of the twelfth century; born at Cordova in 1126; died in 1198. Although himself a prolific writer on philosophy and medicine, his chief importance is as a commentator upon the works of Aristotle, and for this reason he is often styled "the commentator par excellence." Like Avicenna, who also commented Aristotle, Averroes wrote an original compendium of philosophy of his author, and, in addition to this, wrote the so-called "Middle Commentaries," which latter follow the text, with, however, the omission of passages here and there; and finally he made a full and copious exposition of every Aristotelian statement, incorporating the sentence indistinguishably with his text. His reputation was so great that his books found their way during his lifetime even into Egypt, where, in 1190, Maimonides made their acquaintance. As a matter of course, Averroes' views frequently conflicted with those of his Mohammedan coreligionists, and his works were therefore extensively condemned and prohibited. It is owing to his Jewish admirers that his writings are preserved to-day, for only in the shape of Hebrew translations or by a transliteration of the Arabic text in Hebrew characters did they escape the fanaticism of the Moors.

Jewish Preservation of His Writings.

As to the relation between Averroes and Maimonides, which has frequently been misconceived, it is quite certain that Maimonides can not be called a disciple of Averroes, nor Averroes a pupil of Maimonides. The latter read Averroes' writings far too late to permit of his having used them in his own works. Both, it is true, coincide on many points. Both are strong Aristotelians and energetically opposed to the teachings of the Motakallemin concerning atoms and the non-existence of natural laws. Both deny to the Deity the possession of "attributes." Their theories of the intellect are identical, and both take the same position as regards the relation of faith and knowledge. It has yet to be determined whether these striking resemblances are not founded upon some third or common source not yet discovered.

Relation to Maimonides.

In a letter to his favorite pupil, Joseph b. Judah Aknin, dated Cairo, 1190, Maimonides writes: "I have recently received Ibn Roshd's work upon Aristotle, besides the book, 'De Sensu et Sensito'; and I have read enough to perceive that he has hit the truth with great precision; but I lack the leisure now to make a study of it." A passage in a letter to Samuel Tibbon, 1199, in which he recommends Averroes' commentaries, is not quite clear.

Original Works.

Less known than his commentaries upon Aristotle are Averroes' own original writings, although they have left indubitable traces upon Jewish thought. His essay on "The Relation of Faith to Knowledge" (published by Joseph Müller with German translation, Munich, 1875) seems to have inspired Shem-Ṭob Falaquera to write his "Iggeret Havikkuaḥ." It is extant in an anonymous Hebrew translation dated 1340, as is also another work of Averroes of similar tendency, "The Book of the Revelation of the Method of Proof Touching the Principles of Religion"; both works were familiar to Kalonymus ben Kalonymus and Simon Duran in 1423. Better known than these is his reply to Gazzali's book, "A Confutation of Philosophers," Averroes calling his "A Confutation of the Confutation." Kalonymus, son of David b. Todros, translated this book into Hebrew in 1328; and there is also another translation by an unknown author. Kalonymus gives a curious reason for his undertaking. Knowing that Averroes is justly condemned as a denier of God, he protests that he translates it only because it contains in its text the whole work of Gazzali, who defended religion; had he been able to procure Gazzali's book, he would not have undertaken the ungrateful task or translated a single word of Averroes' specious argumentation. Kalonymus' translation was rendered into Latin by a Neapolitan physician, also named Kalonymus ben David, and published in Venice, 1527.

Admired in Jewish Circles.

This "Confutation" contains a few contradictions of statements made elsewhere by him, but such inconsistencies are by no means infrequent in other writings of Averroes. The change of views thus evidenced gave rise to the legend that Averroes had embraced Judaism, Christianity, and Mohammedanism in succession, and that he wrote the notorious work, "De Tribus Impostoribus." In similar strain is the assertion by a writer of the seventeenth century, that the "Confutation of the Confutation" was actually written by Gazzali himself, who thus secretly furnished a defense against his own attacks upon philosophy, these attacks having been prepared at the command of a fanatical king. Be all this as it may, Averroes' importance as a philosopher was universally acknowledged by Jewish thinkers. Not even his opinions antagonistic to Judaism could prevent their admiration of his genius. When, however, Averroes fiercely assailed Avicenna, Jewish authors are sometimes found to side with the latter as being nearer to Judaism; and Ḥasdai Crescas, who mournfully notes the havoc wrought in Jewish circles by philosophy through laxity of observance, vehemently denounces both Aristotle and his commentator Averroes. Crescas must, however, have been blinded by his zeal when he terms Averroes a mere chatterer. Levi ben Gerson and Moses Narboni may with all propriety be called followers of Averroes; for with them, too, the claims of the peripatetic philosophy as formulated by him seem to be rated higher than the claims of revelation. But Averroes' absolute sovereignty in the fourteenth century was soon followed by his decline. Platonism displaced Aristotelianism, and with the latter vanished all traces of Averroism.

K. A. Lö.

AVERROISM: Averroes, like his contemporary Maimonides, was a strict Peripatetic; yet they differed greatly in matters of faith. While Maimonides, with all his admiration for Aristotle, dared to contradict his theories, or at least sought to attenuate them when they were in direct opposition to religion, Averroes indorsed them to their utmost extent, and seemed even to take pleasure in emphasizing them. "God," says Averroes, "has declared a truth for all men that requires for understanding no intellectual superiority; in a language that can be interpreted by every human soul according to its capability and temper. The expositors of religious metaphysics are therefore the enemies of true religion, because they made it a matter of syllogism" (J. Müller, "Philosophie und Theologie," including the Arabic text, pp. 104 *et seq.*). In expounding what he thought to be the doctrines of Aristotle, it made no difference to Averroes whether they were or were not in harmony with those taught by the Koran. Thus Averroes asserts again and again the eternity of the universe; although, as Maimonides demonstrated in his "Guide" (ii. 28, 121-127), Aristotle himself is not very decisive on this point. Averroes goes still further and declares that not only is matter eternal, but that form even is potentially existent, otherwise there would be creation *ex nihilo* ("De Cœlo et Mundo," p. 197). Maimonides advocates man's absolute free-will, but Averroes restricted that freedom. "Our soul," says the latter, "can have preferences indeed, but its acts are limited by the fatality of exterior circumstances; for if its deeds were the production of its will alone, they would be a creation independent of the first cause, or God" (Joseph Müller, *ib.* Arabic text, p. 110). Maimonides, like Avicenna, places the existence of all creatures in the category of the *possible*; that of God, in that of the necessary ("Moreh," ii., Introduction, propositions 19 and 20). Averroes combats Avicenna's classification for the simple reason that, every being having a cause, its existence is necessary ("Destructio Destructionis" at the end of the "Disputatio," x.).

However, it was due to Maimonides that the philosophy of Averroes found admirers during four centuries among the Jews, who by their translations and commentaries preserved his writings from destruction and transmitted them to the Christian world.

First Translators.

But if Averroes owed the preservation of his writings to the Jews, Jewish literature, in its turn, is indebted to him, directly and indirectly, for many valuable contributions. In addition to the translations of Averroes' works and commentaries on them—which in themselves form a fairly large library—the thirteenth, fourteenth, and sixteenth centuries witnessed the production of numerous essays and treatises inspired by Averroism. The first to introduce his philosophy to Jewish literature was Samuel ibn Tibbon, the same who translated Maimonides' "Moreh." Tibbon published, at the beginning of the thirteenth century, an "Encyclopedia of Philosophy," which frequently is nothing but literal extracts from Averroes, whom the author declares to be the most reliable interpreter of Aristotle. A little later, 1232, appeared the first real translation, by Jacob ben Abba Mari Anatoli, a son-in-law of Ibn Tibbon. He was a Provençal, living in Naples, and engaged by Frederick II. to popularize Arabian science. In 1260, Moses ibn Tibbon translated nearly the whole of the Short Commentary. About the same time, Solomon ben Joseph ben Job, originally from Granada, but living in Beziers, translated of the Short Commentary that on Aristotle's treatise, "De Cœlo et Mundo," under the title of השמים והעולם. In 1284, Zeraḥia ben Isaac of Barcelona translated of the Middle Commentaries that on Aristotle's "Physics," as well as Averroes' treatises, "De Cœlo et Mundo" and "Metaphysics." The same Anatoli translated in 1298 Averroes' "Abridgment of Logic," under the title of הגיון קצור; and in 1300, under the title of ס' בעלי חיים, the commentaries upon books xi.-xix. of the "History of Animals."

Other writers of this century that expounded Averroes were Judah ben Solomon Cohen of Toledo, author of "Peripatetic Encyclopedia," 1247; and Shem-Ṭob ben Joseph b. Falaquera (1224-95), who inserts lengthy extracts from Averroes in his books, the "Moreh ha-Moreh," "Hanhagat ha-Guf weha-Nefesh," and the "Sefer Hama'alot."

The study of Averroism was so wide-spread that, not content with the foregoing translations, the first

New Series of Translations.

half of the fourteenth century produced a new series. Kalonymus b. Kalonymus, son of Meïr of Arles (1277–1330), translated, in 1314, under the following titles, the Grand Commentaries on the "Organon" (הגיון), the "Physics" (הטבע), the "Metaphysics" (מה שאחר הטבע), and the treatises "De Cœlo et Mundo," "Generation and Corruption," "Meteors," "The Soul," and "The Letter on Union," etc. R. Samuel b. Judah b. Meshullam of Marseilles translated the Short Commentary on the "Nikomachean Ethics," under the title ס' המדות, and the paraphrase of Plato's "Republic," under the title of הנהגת המדינה. Todros Todrosi of Arles translated in 1337, under the following titles, the commentaries on the "Topics" (מאמרות), the "Sophisms" (ההטעה), the "Rhetoric" (המליצה), and "Poetics" (השיר). In addition to these a crowd of other translators of uncertain date likewise devoted themselves to the study of the works of Averroes. Shem-Ṭob Isaac of Tortosa translated the commentary on the "Physics," and the treatise on the "Soul"; Jacob b. Shem-Ṭob, the "First Analytics"; Judah ben Taḥin Maimon, the "Physics," the treatises on "Heaven" and on "Generation"; Moses ben Tahora b. Samuel b. Shudai the treatise on "Heaven"; Moses b. Solomon of Salon, the "Metaphysics"; Judah b. Jacob, books xi.–xix. on "Animals"; Solomon b. Moses Alguari, the treatise "De Somno et Vigilia."

The Golden Age of Averroism.

The second half of the fourteenth century is the golden age of Averroism among the Jews. There were no more translations, but scholars innumerable vied with one another in commenting on the commentaries and applying the teachings of those commentaries to theology. Levi ben Gerson of Bagnols (Gersonides) wrote such commentaries, as well as some upon the original works of Averroes, as, for instance, on the "Substantia Orbis," the treatise on the "Possibility of Union," etc.; Joseph Caspi, in the middle of the century, wrote a commentary upon Aristotle's "Ethics" and Plato's "Politics," after Averroes' method. In 1344, Moses of Narbonne (Messer Vidal) wrote a commentary on the "Possibility of Union," etc.; and in 1349 on the "Substantia Orbis," and on other physical treatises. The "Physics," the "Ethics," the commentary upon "Alexander of Aphrodisias on the Intellect," underwent a complete remodeling at his hands. As directly due to Averroism must be mentioned: The ethical and rhetorical work by Jedayah Penini (1261–1321), entitled "Beḥinat Olam" (Examination of the World), and his "Iggeret ha-Hitnaẓelut" (Letter on Self-Exculpation), defending philosophy against the vehement attack of Solomon b. Adret; also Joseph Caspi's double commentaries on Maimonides' "Guide"; Levi ben Gerson's philosophical commentary upon the Pentateuch—wherein the author admits the eternity of the universe, the natural gift of prophecy, original matter without form, and the impossibility of "Creation"; and finally, Moses Narboni's commentary upon the "Guide."

Displaced by Theology.

The fifteenth century, though still rich in productions of Averroism, gave signs of decadence. Boldness had vanished from the world of letters, and every author felt himself constrained to break a lance for religion. In 1455 Joseph ben Shem-Ṭob of Segovia commented on the "Ethics," according to his own statement, to supply Averroes' omissions; he likewise commented on the "Possibility of Union," and on the analysis of Alexander's book on the Intellect. His son Shem-Ṭob, as well as Moses Falaquera and Michael ha-Kohen, wrote Averroistic treatises toward the end of the century. Elia del Medigo, of Rome, the last representative of Averroism among Jews, wrote in 1485 a commentary on the "Substantia Orbis"; in 1492 a treatise on the "Intellect," on "Prophecy," and on various other works. Of other Averroistic writings there were the same Shem-Ṭob's commentary on the "Guide"; Elia del Medigo's "Beḥinat ha-Dat"; Abraham Shalom ben Isaac's theological and philosophical dissertations; and the "Miklal Yofi," by Menahem b. Abraham Bonfous of Perpignan.

In the sixteenth century Averroism gave place to theology. People read and studied Averroes, but very evidently only to hunt out his weak points and disprove him. Isaac Abravanel, largely indebted as he was in his commentary on the "Guide" to Averroes, does not scruple to attack him frequently in his "Shamayim Ḥadashim" and other works. Abraham Bibago, who commented on Aristotle's "Analytica Posteriora," abuses Averroism in his "Derek Emuna." Moses Almosnino, about 1538, comments on Al-Gazzali's "Happalat-ha-Filosofim" (Destruction of the Philosophers), and uses it as a weapon against the Peripatetic philosophy. Many other, but more insignificant, writers essayed to drag the colossus to the ground, but the traces stamped by Averroes on Jewish literature are irremovable.

Jewish Interest.

AVESTA: The canonical book of the religious sect known as the Parsees, more frequently though less precisely called Zend-Avesta—an inversion of the Pahlavi phrase "Avistāk va Zand," the Scriptures and the Commentary or the Law and Its Interpretation. The Avesta is the Zoroastrian Bible supplemented by the Pahlavi, or Middle Persian, writings, as the Hebrew Scriptures are by the Talmud.

The Avesta has special claims upon the interest of Jewish scholars, there being certain points of similarity between the Avesta and the Old as well as the New Testament, points that are striking or close enough to call forth frequent comment. In the next place, the Avesta, as the sacred book of early Persia, must command attention because of the historical points of contact between the Jews and the Persians. Note especially such passages as the following: Isa. xlv. 1, 13, 28; II Chron. xxxvi. 22, 23; Ezra i. 1–11; v. 13–17; vi. 1–15; and perhaps Ezek. viii. 16. See Persian Religion.

The Avesta represents the ancient priestly code of the Magi: for Zoroaster, or Zarathushtra, as his name is called in the original texts, has stood in history as the typical Magian, as the sage, priest, prophet, and

The Typical Magian.

lawgiver of ancient Iran. According to the more recent views on the subject, which agree with the traditional date for his era, he flourished about 660–583 B.C.; though the common tendency is to believe that he lived and taught at a much earlier period. It is certain that King Artaxerxes and the later Achaemenian rulers professed his faith: less certain is it according to some scholars whether Darius and Xerxes, and still less whether Cyrus, were really followers of the Avesta and genuine Zoroastrians, although much may be said in the affirmative It is beyond doubt that they were all worshipers of Ahuramazda, or Ormuzd, the supreme God of the Avesta; and this makes the passages in Isaiah (xliv. 28; xlv. 1, 13) relating to Cyrus doubly interesting. In the Old Persian inscriptions the Mazda worship of Darius is most pronounced. For these reasons still more importance is to be attached to the Avesta in the history of religious thought, especially when the power and the wide-spread influence of the Persian empire in early times are taken into account.

According to the book itself the Avesta represents a direct revelation from Ahuramazda to Zarathushtra. The sacred text (Vend. xxii. 19) mentions "the Forest and the Mountain of the Two Holy Communing Ones"—Ormuzd and Zoroaster—where special intercourse through inspired vision was held between the Godhead and his prophetic representative on earth, as between YHWH and Moses on Sinai. Later tradition repeats the view that the sacred book was the result of inspiration, for the Pahlavi texts (Dk. vii. 3 51-62; viii. 51; Zsp. xxiv. 51) recount not only how Zoroaster communed with Ormuzd, but like the Zoroastrian Gāthās they tell also of ecstatic visions of the six archangels and of other revelations which were vouchsafed to him. According to a tradition preserved in the Pahlavi writings (Dk. Bk. 3, end, quoted by West, "Sacred Books of the East," xxxvii., Introd. 30-32), the Avesta itself was committed to writing at the instance of King Vishtāspa, whom Zoroaster converted to the faith and who became Zoroaster's patron. The king's own prime minister, Jāmāspa, had a hand in the redaction as scribe, and Zoroaster's mantle descended upon him, so that he succeeded the great priest in the pontifical office on the latter's death (Dk. iv. 21; v. 34; vii. 5, 11).

It is said by Ṭabarī and by Bundarī after him, that Vishtāspa caused two copies of the holy texts to be inscribed in letters of gold upon 12,000 ox-hides (see Jackson, "Zoroaster," p. 97)—a tradition which is confirmed by Pliny's statement that Zoroaster composed no less than 2,000,000 verses (N. H. xxx. 2).

Traditions About Origin.

These two archetype copies, mentioned in the Dinkard, the Artā-Vīrāf, and the Shatrōihā-i-Airān, were to serve as the standard priestly codes of Vishtāspa's realm. The faith was to be promulgated throughout the world in accordance with the teaching of these. There is likewise a tradition (see Dk., references above) to the effect that one of these original copies came into the hands of the Greeks and was translated into their tongue. Support for this tradition may perhaps be found in the Arabic lexicon of Bar-Bahlūl (963), according to which the Avesta of Zoroaster was composed in seven tongues, Syriac, Persian, Aramean, Segestanian, Mervian, Greek, and Hebrew. A still earlier Syriac manuscript commentary on the New Testament by 'Ishō'dād, bishop of Ḥadatha, near Mosul (852), similarly speaks of the Avesta as having been written by Zoroaster in twelve different languages. As for the other archetype copy, which seems to have been the principal one, the direct statement, again of the Pahlavi treatise Dinkard, says that it was burned by Alexander the Great when he invaded Iran.

Whatever may be the value of these traditions regarding the Avesta, the fate of the sacred book was connected with the history of the people, and with the rise and fall of the fortunes of Iran. The five centuries that followed the invasion of Alexander with the government of the Seleucidæ and the sway of the Parthians were dark ones for Zoroastrianism.

The Fate of the Avesta.

Nevertheless, there is no reason for making the strong claim that Darmesteter does to the effect that the tradition was lost. It is known that the last of the Parthian monarchs were filled with the true Zoroastrian spirit; and it can be proved from Greek, Latin, and other writings, that the tradition of the wisdom of Zoroaster lived on during the long period between Alexander and the rise of the House of Sassān in the third and fourth centuries. The entire Sassanian period was a most flourishing time for the creed which was now restored to its pristine glory. But in the seventh century, with the rise of Islam, the Avesta gave place in Persia to the Koran; Ormuzd sank before Allah; and Zoroaster yielded to Mohammed. A number of the faithful cherishers of the sacred fire, however, sought safety in flight from Iran and found refuge in India, where they are still known by their ancient name *Parsi*: it is they that are the conservators of the remnants of the old Avestan texts that have passed through so many vicissitudes.

Much had been lost through Alexander, it was claimed; but the number of texts that were still extant was nevertheless considerable, and they represented the ancient Avesta fairly well. The canon was divided into twenty-one *nasks*, or books. These again were subdivided into three classes, each comprising seven books. The first group ("Gāthā" or "Gāsān") was theological; the second ("Dāt") was legal; the third ("Hadha-māthra") was of a somewhat miscellaneous character. In this threefold classification of the nasks, Darmesteter sought to prove Jewish influences at work upon the Avesta, and he compared the classification of the Biblical texts into "Torah" (Law), "Nebiim" (Prophets), and "Ketubim." But of this Sassanian Avesta there is much less extant now because of the havoc wrought, directly or indirectly, upon Zoroastrianism and the Avesta by the Mohammedan conquest and the Koran. To-day only two of the twenty-one nasks are in any degree complete. These are the Vendīdād, or law against demons, and the Stōt Yasht, which answers to Yasna (xiv.-lix.), yet these show signs of being very imperfect. There exists also, in addition to these two remnants, an important part of another nask—this is the Bakān Yasht; and portions or fragments of others. There thus exist specimens of about fifteen of the original nasks. This material, moreover, is supplemented by various passages that have been translated from the original Avesta into Pahlavi and are thus preserved; or by quotations of the Avesta text itself incorporated into the Pahlavi treatises. All this bears but a small proportion to the Avesta of Zoroaster's time, and the remnant is but small in extent when compared with the Hebrew Scriptures.

What is still extant is commonly divided into the following six classes: (1) Yasna, including the Gāthās, or Zoroastrian Psalms; (2) Vīspered; (3) Yashts; (4) minor texts; (5) Vendīdād; (6) fragments.

The Extant Avesta.

The Yasna—a liturgical work, comprising seventy-two chapters—contains texts used by the "dastūr," or priest, in connection chiefly with the sacrifice of "haoma." In the midst of the Yasna the Gāthās are inserted. These are the Zoroastrian psalms, and they represent the verses of Zoroaster's own preaching and teaching, embodying especially his belief in a new and better life; the coming of a Messiah, or Saoshyant; the annihilation of Satan and the evil principle, Angro-Mainyush, and the Druj, "Falsehood" (see AHRIMAN); and the general restoration of the world for ever and ever. For theologians the Gāthās are the most interesting and important part of the Avesta; but at the same time they are by far the most difficult.

Less characteristic is the short book known as the Vīspered. It consists of brief invocations and offerings of homage to "all the lords" ("vīspe ratavō"), as the name implies. The Yashts, or Praises, twenty-one in number, contain praises of the angels or glorification of the spirits, and personified abstractions of the faith. They are generally written in meter, with some claim to poetic merit. One of the most interesting is the thirteenth, or Farvadīn Yasht, on the worship of the spirits ("fravashis"). The doctrine of the ancient Persian faith, which this Yasht contains, has been brought by Paul de Lagarde into connection with the Purim festival. Another Yasht (Yt. 19) is in praise of the kingly glory ("hvarenah"), the halo, sheen, or majesty which surrounds and protects the king as a mark of divine favor (compare Moses' shining face, Ex. xxxiv. 29). The Vendīdād, in twenty-two chapters, is an Iranian Pentateuch, and it contains numerous parallels of interest to the Biblical student.

The real pioneer exegete at the end of the eighteenth century was Anquetil du Perron; then followed Burnouf and Rask; later came Haug, Westergaard, Spiegel, Roth, Hübschmann, De Harlez; or more recently, West, Mills (a stanch advocate of the Pahlavi), and especially Geldner and James Darmesteter. The latter's theory of the late origin of the Avesta (in "Le Zend-Avesta," iii., Introduction, and "Sacred Books of the East," 2d ed., iv., Introduction) can not be said to have found much favor among specialists or support among those best qualified to judge; but he has brought out numerous likenesses between the Avesta and the Old Testament.

AVIANUS, HIERONYMUS: Christian Oriental scholar; lived at Leipsic at the end of the sixteenth and at the beginning of the seventeenth century. He devoted himself to Hebrew versification, and published a work in two volumes, entitled, "Clovis Poeseos Sacræ, Trium Principalium Linguarum Orientalium, etc., ita Disposita ut Simul Lexici Vulgaris Usum Admittat, Exhibens: qua Aperitur via, etc., Omnis Generis Carmina, etc., Scribendi" (Leipsic, 1627).

AVICEBRON, SOLOMON IBN GABIROL. See GABIROL.

AVICENNA (ABU ALI IBN ABDALLAH IBN SINA): Physician and philosopher of note; born at Bokhara in 980; died in 1037. His works, which were brought to Spain about one hundred years after their publication, exerted a great influence upon Jewish thought in the Middle Ages. His philosophical investigations are embodied in a great encyclopedic work entitled "Al Shefa'" (Healing), a term which in the Latin translation has been corrupted into "Sufficentia." This Latin translation, prepared by the aid of Jewish interpreters, has been frequently used by Jewish authors, notably Samuel ibn Tibbon in his "Yiḳḳawu ha-Mayyim." It is divided into four parts; namely, logic, physics, mathematics, and metaphysics. In addition to the "Shefa'," there is a smaller encyclopedia, "Al-Najah," which, under the title "Healing of the Soul," was, in 1330, translated by Todros Todrosi in Rome.

His Importance as a Philosopher.

In regard to Avicenna's importance as a philosopher, Maimonides and Shem-Ṭob Falaquera have both expressed their views. Maimonides says: "The works of Avicenna, although distinguished by tolerable accuracy as well as by subtlety of speculation, are nevertheless inferior to those of Abu-Nasr al-Farabi; they are useful, however, and deserve to be studied." This opinion is shared by Shem-Ṭob Falaquera, who declares that Avicenna's works are "exact, but incomprehensible to those unfamiliar with logic." Of greater importance are the medical works of Avicenna, and as an author he has been distinguished in this domain by the honorary title of "Prince of Physicians." His chief medical publication is the "Canon," a complete system of medicine, which, in 1279, was translated into Hebrew by Nathan ha-Meati ("of Cento"). Parts of the work were translated also by two other Jewish scholars, and numerous commentaries have from time to time been written upon it. In addition to this work, Avicenna has left a smaller medical compendium in ten volumes, and has even given expression to his medical knowledge in rime. The last-mentioned publications were likewise perpetuated in Hebrew translations.

The "Canon" ("El Kanun fi'l Tib'"), the greatest literary production of Avicenna, is a colossal work,

The "Canon."

which for five centuries was accepted as a guide in European universities, and which was used as a text-book in the universities of Louvain and Montpellier until about 1650. It consists of five books, subdivided into funûn or fen (sections), tractatus, summa, and caput. Of these volumes the first and second treat of physiology, pathology, and hygiene; the third and fourth, of the methods of treating disease; and the fifth, of materia medica. The many points of excellence possessed by the voluminous work and its admirable literary style make it possible to understand readily the reason for its great popularity both in the Oriental schools and among the Occidental Arabists of a later date. It was among the latter, rather than in Arabian Spain—where the influence of Averroes was predominant—that Avicenna's works attained their greatest popularity.

In some respects the "Canon" of Avicenna is not unlike the works of his predecessors Rhazes and Ali, although excelling the "El-Ḥawi" (Continens), or "Summary," of the former by greater exactness of method.

Logic and Metaphysics.

This power of systematization was due perhaps to his mastery of logic—a domain in which his acquirements entitled him to be ranked as one of the principal forerunners of Albertus Magnus and his immediate successors, all of whom were compelled to draw their formulas largely from Avicenna's works. The logic of Avicenna is distinguished by great comprehensiveness of scope, and by a scrupulously conscientious endeavor on the part of the author—who here evidently follows the example of Al-Farabi—to present the subject clearly, comprehensively, and circumstantially.

As regards the fundamental tenets of his philosophy, Avicenna taught that matter, the principle of individuation, does not directly emanate from the Godhead, although it is in its primal origin eternal, and includes within itself all possibilities of development. In other words, he held that while all things are primarily traceable to the agency of an immutable Deity, they can not owe their existence to the immediate influence of such a Deity, inasmuch as the immutable can not itself create substances subject to the element of change. The first and only immediate product of God, therefore, is the world-soul or world-intelligence, which unwinds an endless chain of creation throughout all the celestial spheres down to the earth. The cause that produces, however, must also conserve, for cause and effect are identical; from which it follows that the world itself, like God, must be eternal.

Psychology.

Avicenna's psychological views, expressed in the sixth volume of his work on physics (the second part of the "Shefa'," in the so-called "Liber Sextus Naturalium"), exerted great influence upon Jewish scholars. In his preface to this book the Latin translator, Johannes Hispalensis, declares that it contains "Quidquid Aristoteles dixit in libro suo de anima et de sensu et sensato et de intellectu et intellecto." In addition to this, Avicenna's principal work on psychology, he wrote a number of dissertations on the soul, nearly all of which have been translated into Hebrew; and although in general based upon the psychological theories of Aristotle, Avicenna's views are in many respects original. As an example mention may be made of his division of the soul's attributes into four classes: namely, the external powers, or five senses; the internal powers; the motive powers, and the intellectual powers. Avicenna was also the first philosopher after Galen to indicate the three cavities of the brain as the seat of the soul's functions; his opinions on this as on other subjects being later adopted by Jewish authors, and more particularly by Shem-Ṭob Falaquera, who in his work on psychology shows himself a true adherent of Avicenna. Like the latter, Falaquera proceeds upon the principle, "Have cognizance of yourself, and you will have cognizance of your Maker," hereby establishing psychology as an introduction to metaphysics.

The works of Avicenna not infrequently contain conflicting theories—a fact explained by Averroës (the keenest opponent of the great philosopher) upon the ground that Avicenna was afraid to avow his opinions, as he desired to preserve the favor of all parties and to offend none. Indeed, it was early asserted that Avicenna's true views were not contained in the "Shefa'" at all, but were to be found in the mystical work entitled "Oriental Wisdom or Philosophy"—a work which now exists neither in Arabic nor in Latin, only a fragment having been preserved in a Hebrew manuscript (Steinschneider, "Jüdische Literatur," p. 301).

Thus it appears that Avicenna's Neoplatonic theory of evolution gradually led him to mysticism, and as adherent of the new Platonic system the soul of the rationalist and that of the mystic were strangely blended in him, which caused him to become the originator of the ultimately fatal doctrine of the twofold truth—a doctrine focused in the sentence "Secundum fidem verum; secundum rationem falsum" (True according to faith; false according to reason), and later employed in defense of his own bold opinions by Isaac Albalag (compare Joel, "Ḥasdai Crescas," p. 7).

AVIGDOR, ELIM D': Engineer and communal worker (died in London Feb. 9, 1895); was the eldest son of Count Salamon Henri d'Avigdor and of Rachel, second daughter of Sir Isaac Lyon Goldsmid. He was educated at University College, London, and the University of London. Having been articled to the engineer Hawkshaw, D'Avigdor in 1862 went first to Hull, then to Rangoon (Burma) in connection with his professional work. He supervised the construction of railways in Syria and in Transylvania, and of water-works in Vienna. It was D'Avigdor's railway experience added to his interest in Palestine as chief of the Chovevi Zion Association which led him to contract in railway work in Syria and to form the Tyrian Construction Company. Gaining some experience in literary work in connection with "Vanity Fair," he bought the "Examiner." He subsequently brought out a paper called the "Yachting Gazette." Under the pseudonym of "Wanderer," D'Avigdor published many hunting stories of merit for which he was well qualified, being himself an intrepid rider to hounds. D'Avigdor was a warden of the Spanish and Portuguese synagogue, and served on several committees. He was chief of the Chovevi Zion Association, in which movement he took the keenest interest; joining this in 1891 he helped to consolidate it, and was instrumental in bringing it into connection with similar associations on the Continent. He was a member of the council of the Anglo-Jewish Association from 1871 until his death.

He married a daughter of Bethel Jacobs of Hull, by whom he had one son and five daughters. The son, Osmond d'Avigdor Goldsmid, inherited the Goldsmid estates on the death of Sir Julian Goldsmid.

AVIGDOR, JACOB: Chief rabbi ("ḥakam bashi") at Constantinople from 1860 to 1863; born 1794; died 1874. He was a capable Talmudist and conversant with several foreign languages. Avigdor was instrumental in organizing several institutions in the Turkish dominions, among them the Assembly of Jewish Notables, which latter has introduced many beneficial regulations. In 1863 a fanatical rabbi, Isaac Akrisch, who had excommunicated Count Abraham de Camondo, succeeded in so inciting the people against Avigdor that in July of that year he was compelled to resign his office. He was subsequently elected "Rab ha-kolel," or spiritual leader of the community, and retained the office till his death.

S. M. K.

AVIGDOR, JULES D': Banker, and member of the Piedmont Parliament; born in Nice; died at Paris February, 1856. He was a grandson of **Isaac Samuel d'Avigdor,** secretary of the Paris Sanhedrin; see SANHEDRIN. He was the first Jew elected by his Catholic fellow-citizens to the lower house of Parliament, February, 1854. He was, however, at the same time also Prussian consul at Nice, and as such ineligible to Parliament; his election, therefore, was annulled by the house, but he was returned again by an overwhelming majority, and, having resigned the consulship, was admitted. Avigdor, equally devoted to his religion and his country, died in the prime of his life, and by his own last request was interred at Nice.

S. M. K.

AVIGDOR, RACHEL, COUNTESS D': Communal worker at London, England; born Sept. 19, 1816; died Nov. 5, 1896. She was the second daughter of Sir Isaac Lyon and Isabel Goldsmid, and was privately educated by some of the most eminent teachers of the time, including Thomas Campbell, the poet. In June, 1840, she was married to Count Salamon Henri d'Avigdor, son of the d'Avigdor who was a member of the Great Sanhedrin assembled by Napoleon. Shortly after their marriage, the count and countess d'Avigdor went to London, where were born their three sons and one daughter. Her husband, from whom she eventually separated, returned to Paris, and became a personal friend of Napoleon III., who conferred upon him the title of duke.

The countess took a deep interest in the communal institutions of the English metropolis. She was at one time president of the Ladies' Committee of the Jews' Deaf and Dumb Home, and honorary secretary of the West End Charity; also a member of the committees of the Jewish Convalescent Home, of the workhouse committee of the Jewish Board of Guardians, and of the West End Sabbath School. Both the Bayswater schools and the Jews' Deaf and Dumb Home owed their inception principally to her advocacy.

Early History.

AVIGNON: Capital of the department of Vaucluse, France; formerly seat of the papal court. The first settlement of Jews in Avignon goes back probably to the second century of the common era, a few years after the destruction of Bethar by Hadrian. In 390 they were already sufficiently numerous to take a leading part in a revolt against Bishop Stephen. As usual almost everywhere, they congregated in certain portions of the town, known later as the Jewry, or "Carrière des Juifs." It lay at first on the banks of the Rhône, along the slope of the Rocher, and exactly opposite the papal palace; its narrow lanes are still called the "Reille Juiverie" and the "Petite Reille." There are still shown the remains of an ancient building declared, with or without reason, to have been the first synagogue. But in the course of the thirteenth century, this quarter, having become too crowded, was demolished by Louis VIII., and the Jews were allotted a new and more spacious location in the heart of the city, corresponding with the present Place de Jerusalem and the Rues Abraham and Jacob. This location was covered with buildings, four, and sometimes five, stories high, and was intersected by narrow lanes, for the most part unclean, and lacking air and light. Two gates, opened only in the daytime, communicated with the outer world. The synagogue, or "escole," was toward the southeast. It was burned down in 1844, and the present building, of modern construction, arose in its place.

With regard to its internal administration, the Carrière formed a sort of semi-independent republic, although placed under the control of the provost representing the Holy Chair. It convened its own assemblies or parliaments, appointed its own magistrates and officials, made its laws, its statutes or "ascamot," and regulated its taxes. Its population was divided into three classes, according to their property qualifications; each class being represented in the parliament by five delegates or "baylons," who were invested with both executive and legislative powers. The taxes were pro rata; and every one liable was required to declare each year upon oath the actual amount of his property. The collection of the taxes was entrusted to both Jews and Christians; the school was supported at the common expense; and instruction was obligatory and free. Like every other government, that of the Carrière had its critical periods; the assessment and collection of taxes especially gave rise to great difficulties and numerous scandals; but, compared with other constitutions, that of the Carrière, taken all in all, was relatively just and liberal.

In the Fifteenth Century.

The history, properly so-called, of the Avignon Jewry may be divided into two parts: the period preceding the fifteenth century, and that following it. During the former period, the Jews of Avignon occupied themselves peaceably in many trades. The city authorities never disturbed them; their neighbors looked upon them with no jealous eye; and as farmers, laborers, peddlers, brokers, money-lenders, small merchants, matrimonial agents, sellers of books and manuscripts, surgeons, barbers, and physicians, the Jews were to be found in every branch of human activity. The popes relied on them as treasurers, commissaries, and stewards; the magistrates entrusted them with the assessments of furniture and books and utilized their knowledge in making inventories of the estates of deceased persons. The university employed them in the purchase of rare and precious manuscripts; in short, every branch of the state testified to its good opinion of the Jews of the city by the use it made of them.

Unfortunately, toward the second half of the fifteenth century, their position underwent a complete change. From that epoch dates an era of violence, disorder, and persecution, which lasted until the French Revolution. The causes of this transformation were manifold. First there was the state of general trouble and misery caused throughout the country by the departure of the popes from Avignon; then the ravages caused by pestilence and inundations; the ruin left behind them by the mercenary troops of Francis I.; the egotism and the jealousy of the freshly emancipated bourgeoisie; finally and especially, the ever-growing intolerance of the Church. Avignon had lost a great portion of its population; its commerce, always flourishing under the popes, had come to a standstill; business had almost completely ceased; and discontent was wide-spread. At this economic crisis, the population of the Carrière was considerably increased by the arrival of Jews who had been persecuted in surrounding districts and sought refuge in Avignon and the county. These unfortunate refugees came from Dauphiné, Arles, Marseilles, and the principality of Orange, and naturally brought with them all the energy and activity of their race. This was thought sufficient ground to hold them responsible for the deplorable situation in the city. In the eyes of the populace, it was the Jews who had destroyed the commerce of the country and, by their dubious intrigues, had monopolized all its wealth. A wide-spread outcry arose against them on every side; which, being taken up by the representatives of the city and the Three Estates, soon took the shape of precise accusations against them, against their unscrupulous doings, their robberies, their usuries, and so on; and also of denunciations of the liberty accorded to these formidable rivals. From that moment, the delegates of the city and the country incessantly clamored for harsh measures of repression against the inhabitants of the Carrière.

Under the Popes.

The Jews had in no way deserved these attacks. They certainly formed the most miserable portion of the population. They were for the most part poor people who lived from hand to mouth; if some of them practised usury, it was generally as brokers for rich Lombard or Italian financiers. Moreover, all the usurers of that time were not Jews. The registers of court indictments in the fifteenth century are full of proceedings relative to loans on pledges. Men and women, clerics and laymen, all dabbled in usury; and papal bulls were of no avail against it. The accusation of monopolizing wealth had no better foundation in fact. The "manifestes," declared each year by the Jews at the assessment for taxes, furnish complete evidence of the absurdity of this charge. More than once, the Carrière was upon the verge of being foreclosed and sold by its creditors, so difficult was it for the Jews to pay their debts and numerous fines. If there were any monopolists of wealth at this time, they were the convents and churches. In 1474 Sixtus IV. himself was compelled to issue a bull to restrain the constantly growing wealth of the Carthusian and Celestine monks; nevertheless, in the seventeenth century they owned houses in nearly every street in Avignon, and even the synagogue and a large portion of the Ghetto. However this may be, against the popular indignation the Jews had no protectors other than the sovereigns of the country; that is to say, the popes. But the papal policy toward the Jews was of a very capricious kind. It knew no constant principle, but varied according to circumstances. The Church defended the Jews when her interests recommended such course; and, with a right-about-face, she sacrificed them when there was profit in their ruin. The Jews of Avignon furnished to the popes both a source of income and a means of expiating political mistakes; and thus it came about that the same pope proclaimed himself at one time their defender, and at another their adversary.

In the fifteenth and sixteenth centuries, the popes generally welcomed the grievances of the populace.

On the demand of the Three Estates, Pius II. in 1457 issued an edict forbidding Jews to sell grain or other articles of food; to make contracts with Christians, or to take mortgages upon their property. Sixtus IV. renewed these restrictions; Leo X. in 1513 prohibited them from acquiring stores of grain before the harvest, and from going into the fields. Alexander VI., Clement VII., Paul IV., and Pius V. renewed and intensified these prohibitions, canceled all debts of ten years' standing owed to Jews, and compelled them to wear, under extreme penalties for disobedience, the infamous Jew-badge. In 1567 the Council of Avignon gravely proposed nothing less than the absolute cessation of all relations between Jews and the rest of the population. It forbade Christians, as the canon laws regularly did, to accept unleavened bread from the Jews, to employ their physicians, to enter their bathing-houses, to associate or to play with them, to be present at their marriages or their festivities, to enter their service as nurses or servants. It also forbade masons to speak to them during their work, barbers to dress their beards, etc. Further, it forbade Jews to deal in horses or mules; to pass the night outside the Ghetto, or to go out at all on Thursday, Friday, and Saturday in Holy Week; to show themselves on the street during the hours of church service; or to buy any articles pertaining to religious uses. Finally, Pius V. issued a decree banishing Jews from his dominions.

It is true, indeed, that a rigorous application of the foregoing regulations would have rendered the bull of Pope Pius V. quite superfluous. For the Jews, completely paralyzed in all their commercial activities, would have of necessity quitted the comté to beg from more hospitable countries the right to live. But in actual practise, the excessive harshness of these laws was considerably modified; and although the situation of the Jews was always sufficiently precarious and wretched, there were nevertheless moments when they were treated with a certain degree of toleration—interested toleration, no doubt, but the best obtainable.

Levies upon the Jews.

For the right of sojourn in Avignon, Jews had to pay a heavy tax to the representatives of the popes and the city. From the papal legates down to their cooks, from the consuls down to their coachmen, every official, and even the wives of certain officials, had the right to exact from them gifts and presents upon certain occasions, which, added to the regular taxes, must have amounted to very considerable sums. Being poor, the Carrière, to pay these, was obliged to have recourse to loans from individual Christians, convents, and churches, and sometimes even from the city. But the shackles imposed upon its commerce, as well as the poor state of trade in the country generally, prevented the Jews not only from paying their debts, but also the interest thereon. Their obligations therefore increased from year to year, and attained at time huge proportions. In addition to the regular taxes, both papal legates and the estates had no scruples in levying extraordinary contributions when they needed them. Thus in the seventeenth century, after the sojourn of the troops of Marshal de Belle-Isle in the county, the estates demanded of the Jews no less than 90,000 francs as their share of the expenses of supporting the army; although, with the rest of the people of Avignon, they had already contributed in advance. Naturally they were compelled to borrow this large sum.

But these very debts which, as has been stated, they contracted only under force and constraint, turned out to be for their benefit and made their banishment impossible. Their creditors, despairing of ever getting back their money, protested against the severity of these bulls and pontifical regulations, which hurt themselves indirectly, inasmuch as they prevented their Jewish debtors from honoring their obligations. They, therefore, insisted upon a less rigorous application of them, and opposed vehemently any idea of expelling the Jews.

The history of the Jews of Avignon in the seventeenth and eighteenth centuries is one long struggle between the city, the estates, and the Holy See. These three powers could never agree upon measures for or against the Jews. When the papacy needed funds, infractions by the Jews of the bulls and regulations of the councils were tolerated so long as the papacy profited by them. Thereupon, loud complaints from the populace would arise to remind the legates of their duty, and to insist upon the stringent application of the old prohibitory laws or even upon the expulsion of the inhabitants of the Carrière. On the contrary, when the Holy Church laid too many fetters upon the commerce of the Jews, and threatened their expulsion, the consuls flew to their aid, as is proved by certain inedited extracts from the instructions which they gave to their agent at the papal court. In 1616, upon the demand of the estates, the pope seems to have decided to order the expulsion of the Jews. The tidings produced great disquiet at Avignon, and the consuls, representing their constituents, wrote to their delegates at Rome as follows:

> "We are determined to oppose this new movement, and the petition which they are making, or will make, in this regard, as prejudicial to certain individuals and contrary to the public weal. We desire that you oppose it in the name of our city, demanding that we be heard."

In another letter addressed to the same, they said:

> "In continuation of what our predecessors wrote to you, concerning the Jews of the county, to insist that they shall not be expelled from the said county, we say to you that this city has right on its side to maintain that the Jews shall not leave this county, as well as to demonstrate that their residence in the country is necessary; seeing that the said Jews are indebted, both severally and as a community, in certain very considerable sums, as well to monasteries as to convents, noblemen, citizens, and merchants of this town; . . . another reason being, that the said Jews comport themselves decently and obey the rules of duty."

Thanks to this mutual antagonism of the three powers, the Jews were able to pass through the seventeenth and eighteenth centuries with expulsion only hanging as a menace over their heads. If dealing in land and grain was forbidden, if Jews were excluded from the positions of tax-collector and from other public offices, they continued to devote themselves, nevertheless, to small trading, pedling, and dealing in horses and mules.

But if their material existence, so uncertain and so wretched, was on the whole endurable, their moral condition was appalling. The Church, which permitted them to live, thought it necessary to degrade them in its own interests. The measures devised against them by the councils of the fifteenth and sixteenth centuries have already been mentioned; but it was especially in the second half of the seventeenth century that the intolerance of the Holy Office smote them most harshly. From that epoch, up to the French Revolution, the ordinances of legates and cardinals followed each other with ever-increasing rigor; and all former regulations were applied to the letter.

The fanaticism of the Inquisition did not stop even there; it aimed at the voluntary, or involuntary, conversion of the Jews, and the disappearance of Judaism. To this end Jews were forbidden to read the Talmud and other rabbinical books; Jesuits and Dominican monks were appointed to hold discussions, or to deliver sermons, every Saturday in the synagogue, where the presence of the Jews was absolutely compulsory. But these sermons did not produce the desired effect. Then the Church had recourse to force. During part of the eighteenth century the plague ravaged Avignon. The Carrière had many victims, who were carried to the hospital and nursed by Dominicans, who, by persuasion, by promises, and by threats, caused to be baptized a full third of the poor patients entrusted to their care. These were for the most part children and old men incapable of resistance. Stimulated by this semblance of success, the monks continued their exertions long after the epidemic had disappeared. Although the Church forbade it officially, they secretly encouraged the carrying off of young Jewish children, whom they then forced into the pale of the Church. There is nothing more moving than the protestations—as indignant as futile—of the Jewish fathers against such proceedings: a child once touched by the waters of baptism had to remain a Christian, and was lost to its parents and to its faith. Avignon to-day contains about forty Jewish families. It belongs to the *Circonscription Consistorial* of Marseilles. Services are only occasionally held in the synagogue, a modern edifice erected by the municipality to replace the older one, which was destroyed by fire.

The Jews of Avignon formed with those of Carpentras, L'Isle, and Cavaillon the four communities called "Arba' Kehillot" by Jewish authors of the Middle Ages. These communities had a special liturgy of their own, called "Comtadin," from the name formerly borne by the province in which these towns were included. This liturgy, while resembling the Portuguese greatly, is distinguished from it by numerous differences; a few only can be cited: the

Liturgy.

omission of the prayer "'Alenu," the substitution of "Shalom rab" for "Sim Shalom"; the insertion of certain special liturgical compositions and poems on Friday evenings, which are not to be found elsewhere. There are also reminiscences of the local history; as, for instance, נשמת דיום הסגר (the Nishmat for the Day of the Shutting In), recited on the Sabbath of the Christian Easter week in commemoration of the prohibition laid upon the Jews against leaving their quarters at that period, and the prayer על הנסים.

G. J. Ba.

AVILA (אבילה. אוילה): Town in Old Castile, fifteen miles from Madrid. In the Middle Ages it was one of the wealthiest and most flourishing cities of Spain. Jews have resided there since 1085, when they dwelt in the street called "Calle de Lomo" (now "Calle de Esteban Domingo"). In 1291 the congregation was of such large proportions that it paid more than 74,000 maravedis in taxes. It possessed several synagogues. One of them was on the same spot in the Calle de Lomo on which the Church of All Saints was afterward built; a second, not far from the former, was "presented" by the government in 1495 to the monastery of Santa Maria de la Encarnacion. The Jewish cemetery, which had a frontage of about 200 meters, lay in the valley; it is now called "Cerca de los Osos." After the expulsion of the Jews their Catholic majesties "presented" it to the monastery of St. Thomas, which purchased additional land with the proviso that converts to Christianity or descendants of converts should not be interred therein.

It was before the inquisitional tribunal of Avila in 1491 that the celebrated trial took place for the alleged ritual murder of the afterward canonized "child from La Guardia," a place that never existed. A shoemaker named Jucé Franco, his old father, and his brothers were accused of this murder, and were all put to death at the stake Nov. 16, 1491. As a sequel to the trial and execution a popular uprising took place, and the Jews in Avila were massacred and plundered. To such excesses did the popular fury give rise that a special edict had to be issued by the crown (Dec. 16, 1491) taking the Jews under royal protection.

Avila with its many churches and monasteries was extremely ecclesiastical; the Jews dwelling there were therefore inclined to religious mysticism. It was in Avila that a man named Abraham appeared in 1295 as Messiah and miracle-worker. Here, too, much attention was paid to the study of cabala; and many cabalists and scholars from Avila (or whose ancestors had belonged to the town) took the surname "de Avila."

G. M. K.

AVILA, ELIEZER B. SAMUEL DE: Author of rabbinical works, and rabbi at Rabat, Morocco; born 1714; died at Rabat Feb. 7, 1761. Avila was a scion of an illustrious family of scholars. His father Samuel, his grandfather Moses, and Ḥayyim b. Moses ibn Attar, his maternal uncle, were all prominent Talmudists and well-known authors. Like his uncle Ḥayyim, Avila desired to see the Holy Land and intended to settle in Jerusalem; but, owing to an epidemic and a famine in Morocco, which lasted a long time and compelled him to leave Rabat for a while, he lacked the necessary means to do so.

Avila was a prolific writer, and among his manuscripts were found notes dating from his sixteenth year. After his death the following of his works appeared: (1) "Magen Gibborim" (The Shield of the Mighty), Leghorn, 1781–85, in two volumes; the first containing novellæ to the treatises, Baba Meẓi'a and Horayot; the second, novellæ to the treatises Ketubot and Ḳiddushin. (2) "Milḥemet Miẓwah" (The War for the Law), *ib.*, 1806, containing the principles of the Talmudic and post-Talmudic Halakah. Some funeral sermons are appended under the title "Ḥesed we-Emet" (Kindness and Truth). (3) "Beër Mayyim Ḥayyim" (A Well of Living Waters), *ib.*, 1806, consisting of thirty-six responsa, treating of questions relating to jurisprudence and cases of 'Agunah. (4) "Ma'yan Gannim" (A Fountain of Gardens), explanations and elucidations of Jacob ben Yeḥiel's "Turim," especially of the second and third parts (*ib.*, 1806).

As these works show, Avila confined his work in rabbinical literature to the Halakah. In this province at all events he was an undisputed master; and his epithet, "Ner ha-Ma'arabi" (Light of the West) was not undeserved. His greatness as a Talmudist was recognized even by the most eminent Palestinian scholars, who, in the capacity of "Meshullaḥim," had the opportunity of becoming personally acquainted with him. It was to them that he owed this title. Among the scholars of Morocco, Avila, with his avowed inclination toward the casuistic treatment of the Halakah (Pilpul), was a rare personality. This tendency explains his independent attitude toward his colleagues, on whom his keen and brilliant intellect made a deep impression, as shown in his responsa. These responsa contain many interesting items concerning the condition of the Jews in Morocco ("Beër Mayyim Ḥayyim," p. 71).

Avila left one child, a daughter, who married her cousin Solomon de Avila, a man of wealth and a distinguished Talmudist. The sons by this marriage, **Moses** and **Samuel**, were, in a way, the successors of their grandfather, both being rabbis and Talmudic teachers in Rabat. **Joseph de Avila,** son of Moses, was the publisher of the works of his great-grandfather Eliezer.

Hebr. Books Brit. Mus.* p. 64; Benjacob, *Oẓar ha-Sefarim*, pp. 296, 333, 349.

L. G.

AVILA, SAMUEL BEN MOSES BEN ISAAC DE: Rabbi and preacher at Mequenez, Morocco, and later at Salé, Morocco, born in the first-named place in 1687 or 1688. He published, under the title of "Ozen Shemuel," a collection of sermons: Five on "Repentance," preached on the Sabbath preceding the Day of Atonement; ten on "The Sabbaths of the Lord," preached on the Sabbath preceding Passover and the other festivals; and sixteen funeral orations on some of his contemporaries, Joseph b. Bahatit (1705), Ephraim ibn Laba, (1705), Samuel Ẓarfati (1713), Isaac b. Amara (1713), and others. The book was approved by Judah ibn 'Attar, Abraham ibn Danon, and Jacob ibn Zur, and prefaced and published at Amsterdam, 1715, by Hananiah ibn Sikri. Samuel also published a work entitled "Keter Torah" (The Crown of the Law), pleading for the relief of scholars from taxation, and containing older regulations on the same subject as well as ethical rules. Appended to it are notes on Rashi, and Tosafot on the treatise Naẓir, Amsterdam, 1725.

AVIMS, AVITES. See Avvites.

AVITUS OF AUVERGNE: Bishop of Clermont-Ferrand, France, in the sixth century. While the Roman bishops at that time generally treated the Jews with great liberality, while Pope Gregory I. exhorted the clergy and the princes against the use of force in converting the Jews to Christianity, and while his predecessor Cautinus of Clermont was so favorably disposed toward the Jews that he paid them high prices for rare goods and jewelry, Avitus was one of those insolent bishops who, with the increasing power of the clergy under the feudal system, were overzealous in making proselytes among the Jews by force or by any other means. He repeatedly exhorted the Jews of Clermont to embrace Christianity, but met with no response. The people of Frankish Gaul at that time were entirely free from intolerance, and associated with the Jews without prejudice, intermarriages being frequent among them. Jews were among the shipowners on the rivers of Gaul and at sea, and distinguished themselves as physicians, judges, and warriors. This did not please the bigoted bishop, who at last had succeeded in converting one Jew, who was baptized on Easter Day, April 5, 576. When the new convert went in a procession through the streets in his white baptismal robe, he was sprinkled with rancid oil by a Jew. This act so aroused the mob that they attempted to stone the Jew, but were prevented from doing so by the bishop. On Ascension Day, May 14, however, the mob demolished the synagogue. On the following day the bishop gave the Jews a choice between baptism and banishment. After hesitating and delaying for three days, during which time many were attacked in their houses and some killed, over five hundred asked to be baptized (May 18, 576). Those who remained true to their religion emigrated to Marseilles.

Venantius Fortunatus, who at the request of the historian Gregory of Auvergne, bishop of Tours (544–595), wrote a poem on this occasion, hints at the fact that the Jews only concluded to be baptized when they found out that resistance by arms was impossible ("Carm." v. 5). From Gregory's letters to Virgilius of Arles and to Theodore of Marseilles, it appears that the Jews who escaped to Marseilles were later also forced to adopt Christianity.

AVLONA, AULONA, or **VALONA** (אוילונה, אבילונא): Varying names of a town and seaport of Albania, on the Gulf of Avlona, on the Adriatic. From early times there seems to have been a flourishing Jewish community in the place. Messer David Leon, born about 1470, son of the philosopher Judah Leon, was in Salonica about 1510, when he received an invitation to go to Avlona and assume charge of the three Jewish congregations there, with an annual salary of 70 florins. He accepted the offer because he wished to go to Corfu, and Avlona was on his way. David preached in the synagogues in rotation. A quarrel breaking out among the various Jewish nationalities of the town, the Sephardim (comprising under that name the Jews of Portugal and Castile) separated from the Catalans and organized a prayer-meeting in the house of Abraham Zarfati. Toward the end of the second year of David's stay dissensions broke out also among the Sephardim. David sided with the Portuguese, who, he said, were "hot-tempered but obedient; they are open and generous, and not hypocritical and proud like the Castilians." The Portuguese established a synagogue for themselves; the Castilians demanded that David should compel the Portuguese, under penalty of excommunication, to continue to attend the former common synagogue. But David declined on the ground that the Portuguese were in the majority, and therefore had the right to separate from the minority.

At this juncture there arrived at Avlona a Jewish physician of Lisbon, Don Solomon Cressente. Slowly recovering from a serious illness, he offered, in testimony of gratitude to God, a gift of paraphernalia to the Portuguese synagogue. He intended by this to bring about the reconciliation of the Castilians with the Portuguese; and upon the sacred evening of Kol Nidre (the eve of Atonement Day) he sent messengers to the Castilians in their synagogue to implore them to pardon the Portuguese for any wrong which the latter might have done them. But his exertions were of no avail. The next day, the Day of Atonement, he requested David to intervene as conciliator; but the Castilians refused to obey David's summons to come to him for a mutual explanation, and so the strife grew warmer. The Portuguese, with David at their head, launched anathemas against the Castilians, who responded similarly. At the head of the Castilians at that time were Abraham de Collier and Abraham Harbon, judge, the former an enemy of David.

In the question of the conflicting synagogues, however, Abraham Harbon, who was a friend of David, pronounced against him, though among other arguments David had instanced his title of מוסמך ("ordained teacher") to influence the obedience of the Castilians. The Sephardim, on the other hand, laughed at the custom of ordaining rabbis (סמיכה) as practised in France, Germany, and Italy. They claimed that the ceremony could only be legally performed in Palestine, and that rabbis who performed it in other countries did so only in imitation of the Gentiles. Moses ben Jacob Albelda, author of commentaries on various parts of the Bible, also lived in Avlona toward the end of the sixteenth century (Conforte, "Ḳore ha-Dorot," p. 39*a*).

G. A. D.

AVVITES, AVVA, AVVIM (in A. V. **AVITES**): **1.** A people mentioned in Deut. ii. 23 as being dispossessed by the Caphtorim. This, however, could not have taken place before the days of Joshua, for it is stated in Josh. xiii. 3 that the Israelites upon entering Canaan failed to conquer them; and their place of settlement is identical with the one mentioned in Deut. ii. 23. Although settled in the Philistine district, they do not appear to have had anything in common with the Philistines; they resemble rather the class of Bedouins who had made some progress toward the stage of permanent settlements.

2. A city in the domain of Benjamin, which may once have been a city of the Avvites (Josh. xviii. 23).

3. The place from which the king of Assyria brought people, worshipers of Nibhaz and Tartak, whom he settled in Samaria (II Kings xvii. 31). Called "Ivvah" in II Kings xviii. 34, xix. 13; Isa. xxxvii. 13.

J. JR. G. B. L.

AWANI, ISHAK IBN AL-: Head of the Academy of Bagdad until displaced by a rival; lived in the thirteenth century. He was a contemporary of Al-Ḥarizi, who seems to have made much fun of him. Referring to his displacement from his academical position, Al-Ḥarizi accuses him of having paid for the chair then occupied by another. Awani's poetry finds no mercy at the hands of this rigorous critic, who exhausts his supply of stings upon him. But Al-Ḥarizi's judgment upon Awani has proved to be a most unjust one, being simply the expression of discontent and revenge for insufficient payment of his own poetic efforts, or possibly of merely wounded vanity. Of all Awani's poems only one has been preserved, which has recently been published. It shows, however, sufficiently that the poet deserves a place among the foremost masters of "muwashshaḥ" (popular poetry). With regard to form, Awani faithfully observes all the rules of the art. His so-called "girdle-poem," which is a poem on friendship, is strictly metrical and fully rimed, and it shows the author's name in acrostic. In contents the poem is likewise of considerable merit. Babylonian though he was, he knew and had a skilful mastery of all the figurative expressions derived by the old Spanish classical writers from the Arabs and adopted into Hebrew poetry. The language is pure and free from all harshness; the connection is well preserved; and the whole is permeated by a genuine poetical spirit. Hazardous as it may be to pronounce a final judgment concerning a poet based on a single poem, it is nevertheless true that the perusal of this one production is sufficient to show that he was no bungler in the art.

G. H. B.

AWIA or IWIA, RAB: Babylonian amora of the fourth generation (fourth century), contemporary of Abaye and Raba (Ber. 28*b*; Shab. 46*a*), and brother-in-law of Rammi b. Pappa (B. B. 100*b*; Ket. 56*b*; compare "Aruch Completum," vii. 277, *s.v.* רבם). He was a disciple of R. Joseph, and very strict in ritual observances. An example of his extreme scrupulousness is given in Ber. 28*b*; and an instance of Awia's readiness in halakic argumentation is quoted in Shab. 46*a*. He once visited Raba's school with dust on his shoes. The master intended to punish him for his breach of etiquette by propounding puzzling questions to him that he hoped Awia would be unable to answer. Awia, however, stood the test and came forth victorious. The audience sympathized with Awia, and Naḥman b. Isaac exclaimed: "Thanked be the Lord, that Raba did not succeed in putting Awia to shame" (Shab. 22*a*, 23*a*, 46*b*, 63*a*; Beẓah 13*b*; Sanh. 14*a*; Men. 78*a*; 'Ar. 11*b*; Ex. R. i. 11).

J. SR. S. M.

AWIA SABA (THE ELDER), RAB: Babylonian halakist of the third amoraic generation (third and fourth centuries), a contemporary of Rab Pappa (the Elder) and of Rabbah b. Ḥanan (M. Ḳ. 24*b*; Ḳid. 39*a*). He was a Pumbeditan by birth, but often sat at the feet of Rab Huna I., who considered him a great scholar. The Talmud (Beẓah 21*a*; Ḥul. 124*b*) records two instances in which Awia, by his profundity of reasoning, became troublesome to his teacher, who, being exhausted by lecturing, broke up all further discussion by the evasive remark, "A raven has flown past." Awia was probably the father of Aḥa b. Awya.

J. SR. S. M.

'AWIRA, RAB: Babylonian amora of the third and fourth generations (fourth century); contemporary of Abaye and Safra—the latter speaking of him as of "a scholar coming from the West" (Palestine). 'Awira had emigrated to Palestine, where he officiated as usher at a college of "the great teacher" (probably Ammi); but he returned to his native land (Ḥul. 51*a*), bringing with him many Halakot and Haggadot of R. Ammi and of R. Assi, in transmitting which he frequently interchanged the names of the authors (Ber. 20*b*; Pes. 119*b* [correct version in MSS.]; Soṭah 4*b*; Giṭ. 7*a*; Ḥul. 84*b*; see Ammi). Besides those which he reported in the names of others, there are some original homilies by Rab 'Awira. "Come and see," he said once, "how unlike human nature is the nature of the Holy One. The man of high standing looks up with respect to a man higher placed than himself, but does not respect his inferior; not so the Holy One: He is supreme and yet respects the lowly, as Scripture says (Ps. cxxxviii. 6) 'Though the Lord is high, yet hath He respect unto the lowly'" (Soṭah 5*a*). [Others ascribe this to R. Eleazar.]

According to 'Awira [some ascribe the remark to R. Joshua b. Levi], "The tempter [evil inclination] is called by seven different names. The Holy One—blessed be He!—calls him simply 'Evil,' as it is said (Gen. viii. 21), 'The inclination of man's heart is evil'; Moses calls him 'The uncircumcised,' for so he says (Deut. x. 16), 'Ye shall circumcise the foreskin ("'orlat") of your heart'; David calls him 'Unclean,' for he prays (Ps. li. 12), 'Create in me a clean heart,' whence it appears that there is an unclean one; Solomon calls him 'Enemy,' for he says (Prov. xxv. 21, 22), 'If thine enemy be hungry, give him bread [religious nourishment] to eat; and if he be thirsty, give him water [spiritual refreshment] to drink,' etc. (compare Isa. lv. 1, 2); Isaiah calls him 'Stumbling-block,' for he cries (Isa. lvii. 14), 'Remove the stumbling block out of the way of my people'; Ezekiel calls him 'Stone,' for he says (Ezek. xxxvi. 26), 'I will remove the heart of stone out of your flesh, and will give you a heart of flesh'; Joel calls him 'Lurker;' for he says (Joel ii. 20, Hebr.), 'I will remove far off from you the "ẓefoni,"' which, in the Haggadah, is taken as a symbolical name of the tempter who lies hidden ('ẓafun') in the heart of man" (Suk. 52*a*). Pes. 110*b*; Ket. 112*a*; B. B. 131*b*; Men. 43*a*; Ḥul. 42*b*, 55*a*.

J. SR. S. M.

AXENFELD, AUGUSTE: French physician; born at Odessa Oct. 25, 1825; died at Paris Aug. 25, 1876. He was a son of Israel Aksenfeld. After completing his school education at his native town, he went to Paris to study medicine, and in due course received his diploma as doctor of medicine from the Sorbonne. For his services during the cholera epidemic in Paris in 1849 and 1854 he was awarded two medals, and after having become a French citizen he was presented with the great gold medal of the "Assistance Publique."

In 1853 Axenfeld became lecturer at the Sorbonne, and in 1857 was elected a fellow. Shortly afterward he was appointed physician-in-chief at the hospital Beaujin, substituting as such professors Andral in the École de Médecine and Rostan in the Hôtel-Dieu. These positions he retained until 1871, when he was attacked with the severe cerebral disease which finally caused his death.

Axenfeld contributed many essays to the publication of the Société Anatomique, and was the author of: "Des Influences Nosocomiales," Paris, 1857; "Des Lésions Atrophiques de la Moëlle Epinière," in "Archives Générales," 1863; "Traité des Névroses," in Requin's "Traité de Pathologie Interne," published later (1883) by Henri Huchard; "Jean de Wier et les Sorciers," Paris, 1865; and jointly with Jules Beclard, "Rapport sur les Progrès de la Médecine en France," Paris, 1867.

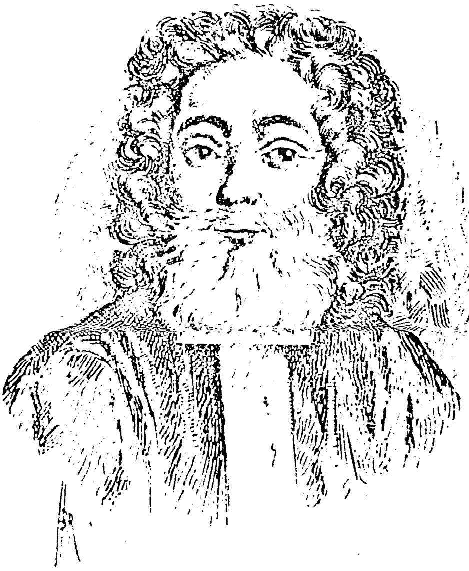
S. J.

'AYIN: The sixteenth letter of the Hebrew alphabet. Its numerical value is seventy. In its earlier form it was a circle, a rude picture of the eye, hence its name ("'Ayin" = "eye"). This form is still to be seen on the Moabite Stone, and also on the old Hebrew inscription found in the Siloam Pool. Its pronunciation in modern time ranges from no sound at all, as in the Judæo-German pronunciation, to the nasal *ng* of the Spanish and Portuguese Jews. One reason for this wide range in pronunciation is that there were originally two distinct sounds in Hebrew, as in other Semitic languages, both represented by an 'Ayin: the one a rough breathing (still retained in Morocco and Syria), the other a soft palatal. The distinction between the two, still indicated in the transliteration of proper names in the Greek version of the Old Testament, was gradually lost; in certain districts the Jews retained in their pronunciation traces of the palatal (which accounts for the Sephardic pronunciation), in others all traces of the letter disappeared, and the rough breathing became purely vocalic (see Zimmern, "Vergleichende Grammatik der Semitischen Sprachen," § 7). The letter 'Ayin, along with the Aleph, Waw, and Yod, has been used quite extensively in the Yiddish orthography as a vowel letter, indicating short *e*.

J. JR. G. B. L.

AYLLON (incorrectly also **Aylion, Aelion, Hillion**), **SOLOMON BEN JACOB**: Haham of the Sephardic congregations in London and Amsterdam and follower of Shabbethai Ẓebi; born in the Orient 1664 (1660?); died in Amsterdam April 10, 1728. His name is derived from a town in the Spanish province Segovia of the name of Ayllon. Ayllon was neither a general scholar nor a Talmudist of standing, as his responsa (found in Ezekiel Katzenellenbogen's "Keneset Yeḥezkel," Nos. 3, 5; in Samuel Aboab's "Debar Shemuel," Nos. 320, 324; in Ẓebi Ashkenazi's "Ḥakam Ẓebi," No. 1; in Jacob Sasportas' "Ohel Ya'aḳob," No. 64) amply show. See also the anonymous letter quoted by Grätz, "Geschichte," x. 482 (3d ed.). But his history is closely interwoven with that of Shabbethaism in both the East and the West.

Ayllon's youth was passed in Salonica, which was probably his birthplace, although some persons assert that Safed was the place, because many Shabbethaians claimed to be of Palestinian birth. He associated with the Shabbethaian circles of Joseph Philosoph, Solomon Florentin, and other leading spirits of antinomian and communistic tendencies. There he is said to have married as his divinely appointed spouse a woman from whom another man had separated without the formality of a divorce, only to experience that she soon left him for a third spouse, whose "affinity" seemed holier to this strange sect than the bonds of lawful matrimony (M. Ḥagis, "Shebeṭ Posh'im," 34; the passage is, however, somewhat obscure). A few years later he visited Europe as a "meshullaḥ" (messenger) from the Palestinian congregations to collect funds for the poor of the Holy Land, leaving his wife and children domiciled in Safed, and having apparently publicly broken with Shabbethaism. From Leghorn, where he was in 1688 (Aboab, *l.c.* 329), he repaired to Amsterdam and thence to London, where, after a few months' stay, he was appointed haham June 6, 1689. The very next year, however, he was vigorously attacked by a member of the congregation, named Ruby Fidanque, who had heard something of Ayllon's antecedents. The Mahamad, caring more for its dignity than for the truth, endeavored to suppress the scandal, but Ayllon's position was so hopelessly undermined by the exposure, that all the really learned members of the congregation would not submit to the new haham, which caused considerable friction, in spite of a pronunciamento ("haskamah") issued by the Mahamad that under penalty of excommunication it was forbidden "to any one except the appointed haham to lay down the law or to render any legal decision." Ayllon, in a letter to Sasportas ("Ohel Ya'aḳob," No. 69) six years later (1696), still complained bitterly of the unbearable relations between him and his congregation, and inasmuch as his olden Shabbethaian proclivities began to reassert themselves, and the congregation just then began to consider the propriety of asking for his resignation (M. Ḥagis, *l.c.*), he resolved to leave London, and was glad to accept an appointment as associate rabbi of the Sephardic congregation of Amsterdam, 1701.



Solomon ben Jacob Ayllon.
(From an engraving by J. Houbraken.)

Ayllon's first blunders in his new home took place when in 1700 he pronounced as harmless a heretical work by M. Cardozo (probably the work "Boḳer Abraham," still extant in manuscript), which he had been requested to examine by the Mahamad. This latter body, however, was somewhat distrustful of its ḥakam, and sought additional opinions from other learned authorities. They gave as their opinion that

Cardozo's work merited public burning, and this sentence was actually carried out. About this time, too, Ẓebi Ashkenazi came to Amsterdam as rabbi of the Ashkenazic community; his advent was a serious matter to Ayllon, as the former completely eclipsed his Sephardic colleague by his superior learning and dignity of character; he was also a noted heresy-hunter in the matter of the Shabbethaian movement. The clash could hardly have been averted, and Nehemiah Ḥayyun, a notorious Shabbethaian, precipitated it. At the request of M. Ḥagis, Ashkenazi examined the works of Ḥayyun (1711) and rightly denounced them as heretical; in addition, he notified the Mahamad of the fact. This august body, however, did not exactly welcome advice volunteered by a Polish German rabbi, and replied that, before taking action, Ashkenazi's opinion would have to be fortified by the assent of Ayllon and other members of their own body. Ashkenazi peremptorily declined this express invitation to sit in council with Ayllon, for he was well aware both of his ignorance of the Cabala and of his suspected affinity with Shabbethaism. Ayllon saw in this crisis an opportunity to make political capital. He persuaded an influential member of the Mahamad, a certain Aaron de Pinto, to take up the matter as an attempt on the part of the German rabbi to interfere with the autonomy of the Sephardic community. It is difficult to discover whether Ayllon was actuated herein by secret loyalty to Shabbethaism, or whether, for personal reasons, he merely sought to clear Ḥayyun from the imputation cast upon him. The adventurer was well acquainted with Ayllon's antecedents, and it would have been dangerous to make an enemy of him. Be this as it may, De Pinto succeeded in having a resolution passed by the Mahamad, declining to permit any such interference in their affairs by the German rabbi, and requesting Ayllon to appoint a committee to give an official opinion upon Ḥayyun's work. The finding of this commission was publicly announced Aug. 7, 1713, in the Portuguese synagogue, and it ran that Ḥayyun was innocent of the heresy charged against him, and that he had been unrighteously persecuted. The committee consisted of seven members, but its conclusions represented simply Ayllon's opinion, for the other six understood nothing of the matter. The affair, however, could not be considered closed herewith, for Ashkenazi and Ḥagis had already, on July 23, pronounced the ban of excommunication upon Ḥayyun and his heretical book. In the protracted discussion which ensued between Ayllon and Ashkenazi, a discussion into which the rabbis of Germany, Austria, and Italy were drawn, Ayllon made but a sorry figure, although, as far as Amsterdam was concerned, it might be said to have ended triumphantly for him, seeing that Ashkenazi was compelled to leave the city. Not alone did Ayllon permit his protégé, Ḥayyun, to assail the foremost men in Israel with foulest insults, but he supplied him with personal papers containing attacks upon his opponent Ḥagis, the unfounded nature of which he himself had formerly admitted and testified to. Ayllon was also no doubt the rabbi who laid charges against Ashkenazi before the Amsterdam magistrates, and thus made an internal dissension of the Jewish community a matter of public discussion. It is claimed that upon hearing of the death of Ashkenazi in 1718, Ayllon confessed that he had wronged the man. It is certain that when, a few years later, Ḥayyun visited Amsterdam again, he found matters changed so much that even Ayllon refused to see him.

Ayllon left a cabalistic work, a manuscript of which is preserved in the library of the Jews' College in London (Neubauer, Cat. Bodl. Hebr. MSS., No. 125).

AYYAS, JACOB MOSES: Son of Judah Ayyas; lived at Jerusalem, whence he was sent abroad to collect money for the Palestine poor. In 1783 he visited Algiers, where he was received with great honor. Following a call to Ferrara, he settled there as rabbi and teacher. One of his pupils was Nepi, the associate author of "Toledot Gedole Yisrael." Ayyas wrote "Derek Ḥayyim" (The Way of Life), treating of annulment of vows, of the ceremony known as Tashlik, etc., Leghorn, 1810.

Bibliography: Benjacob, *Ozar ha-Sefarim*, p. 116.

L. G. M. B.

AYYAS, JUDAH: A commentator and casuist; born in North Africa about 1690; died at Jerusalem Sept. 11, 1760. He pursued his Talmudic studies at Algiers under the supervision of Solomon Ẓeror, rabbi of that city. From 1728 to 1756 Ayyas officiated as dayyan of Algiers, in which capacity he was very popular and much consulted on ritual questions. In 1756 he went by way of Leghorn to Jerusalem, where he spent the closing years of his life. The chief motive for his departure seems to have been the progressive spirit that began to make itself felt in the Algerian community. Ayyas was a strict Talmudist, a keen casuist, but narrow-minded and without any sympathy for questions outside the domain of Halakah. He wrote: (1) "Leḥem Yehudah" (The Bread of Judah), a commentary on Maimonides' "Yad ha-Ḥazaḳah" (Leghorn, 1745). (2) "Bet Yehudah" (Judah's House), responsa on the four "Ṭurim" (Leghorn, 1746). This latter work throws some light on the social and economic conditions of the Jewry of North Africa in Ayyas' days. From the fifth responsum in Eben ha-'Ezer, for instance, it appears that cases of bigamy were not rare among Oriental Jews of the eighteenth century. Appended to it are the communal regulations of Algiers as laid down by R. Joseph ben Sheshet (ריב״ש) and R. Simon ben Ẓemaḥ Duran (רשב״ץ). (3) "Wezot li-Yehudah" (And This Too Is Judah's), commentaries on various subjects (Leghorn, 1776). (4) "Bene Yehudah" (Judah's Sons), on the terminology and style of Maimonides, Tosafot and Mizraḥi; this work contains also some responsa; appended to it is a treatise, "Ot Berit" (The Sign of the Covenant), on circumcision (Leghorn, 1758). (5) "Matteh Yehudah" (The Tribe of Judah) and (6) "Shebeṭ Yehudah" (Leghorn, 1783, 1788), containing novellæ on Shulḥan 'Aruk, Oraḥ Ḥayyim, and Yoreh De'ah. (7) "'Afra de Ar'a"

(The Dust of the Earth), a commentary on Jacob Algazi's "Ar'a de Rabbanan" (Leghorn, 1783).

AZ SHESH MEOT (אז שש מאות): A poem of three stanzas by R. Elias Priscus, introduced in the northern liturgy at the conclusion of the piyyutim in the Additional Service on the Feast of Weeks. A paraphrase is given below of the two melodies associated with the poem: both are equally quotations from the music of the Days of Penitence, and afford (the more usually followed intonation especially) an excellent illustration of the hermeneutical feeling by which so much of the traditional melody of the ḥazan has been guided in its shaping. The noble version here transcribed as sung in the "musaf" of the Feast of Weeks is quoted bodily from the same service of the Days of Memorial and of Atonement, where it is associated with that second part of the piyyut "U-netanneh Tokef," legendarily associated with R. AMNON OF MAYENCE, in which the Talmudical theory (R. H. 16*b*) of the writing and sealing of man's fate at the commencement and end of the Days of Penitence is rhapsodically developed. Reflecting that the destiny of man is in the end dependent upon his own obedience or disobedience to the Law, some old-time ḥazan considered that he might melodiously emphasize this Jewish doctrine of personal responsibility when singing of the giving of that Law. With this object he chanted "Az Shesh Meot" to the melody of "U-netanneh Tokef"; and the persistence of the practise shows that his intention was widely understood and appreciated.

The melody transferred already contained within itself a quotation, in the phrase between the points marked here "A" and "B," which had been excerpted from the melody of KOL NIDRE. It had been introduced because at that point in the original text mention was made of the Day of Atonement, on which alone "Kol Nidre" is sung. For this employment of a snatch of tune associated with a particular service as a representative theme of some idea suggested by that service or enshrined in the object of the occasion, see the general article MUSIC, SYNAGOGAL.

AZAL (R. V. **AZEL**): A place near Jerusalem, but the exact position can not be determined (Zech. xiv. 5). It is supposed by some to be the same as Beth-ezel (Micah i. 11). Clermont-Ganneau identifies it with the Wadi Yasul.

J. JR. G. B. L.

AZANKOT (אזנקוט), **SAADIA B. LEVI:** Orientalist of Morocco; lived in Holland in the first half of the seventeenth century. He was teacher of Jewish literature to Hottinger. There exists a versified paraphrase of Esther by him, which was printed under the title "Iggeret ha-Purim," Amsterdam, 1647. The Bodleian Library has two manuscripts bearing his name: one containing a transcription of Maimonides' "Dalalat al-Ḥaïrin" in Arabic characters, which Azankot made for Golius; the other manuscript containing the Hebrew translation of the "Lamiat al-Ayam" of Ḥusain b. Ali, appended to a printed copy of the same.

G. H. Hir.

AZAREEL (R. V. **AZAREL**, "God is help"): **1.** One of those who came to David at Ziklag (I Chron. xii. 7).

2. Son of Jeroham, chief of the tribe of Dan when David made the enumeration of the people (I Chron. xxvii. 22). **3.** A Levite, son of Heman, to whom fell the eleventh lot in the apportionment made by David for the choral service of the Temple (I Chron. xxv. 18). **4.** One of the sons of Bani, who had taken a foreign wife (Ezra x. 41). **5.** A priest (Neh. xi. 13, xii. 36) who played a musical instrument at the dedication of the wall. Here the name is spelled "Azarael."

J. Jr. G. B. L.

AZARIA BEN JOSEPH IBN ABBA MARI (also called **Bonafoux** or **Bonfos Bonfil Astruc**): One of the last Jewish writers coming from Perpignan, France. He flourished in the first half of the fifteenth century. A rising against the Jews was the cause of his leaving his native city. Neubauer ("Ecrivains Juifs," p. 759; see also "Revue Etudes Juives," v. 41) places this riot in the year 1414, when the friar Vincent Ferrer roused the angry passions of the mob against the Jews for refusing baptism (see Grätz, "Gesch. der Juden," viii. 123); but Gross ("Gallia Judaica," p. 473) is rather inclined to place the date in 1420, when the Jews of Perpignan were exposed to all manner of vexatious proceedings by the Inquisition ("Revue Etudes Juives," xvi. 14).

Be this as it may, Azaria had, in 1423, settled with his son in Italy, where he translated from Latin into Hebrew the following works: (1) "De Consolatione Philosophiæ" of Boethius (lived 470-524). Boethius was the only early Latin writer whose works were translated into Hebrew. The preface of the translator informs us that it was commenced Ṭebet 28, 5183 (*i.e.*, 1423) at Torre Maestrata de Montelfelatra (probably Macerata di Monte Feltro), in the province of Urbino Pesaro, and finished the same year at Castel San Pietro, in the province of Bologna. (2) A translation of the 28th book of the medical work entitled "Liber Practicæ," by Zahrawi (eleventh century), after the Latin of Simon of Genoa, was finished November, 1429, at Senise in the province of Basilicate. Neubauer maintains that Azaria made his translation not from the Arabic original, but from a translation made by Abraham of Tortosa, son of Shem-Ṭob, son of Isaac, who translated, in 1254, the whole work of Zahrawi at Marseilles ("Rabbins Français," p. 592). (3) A translation from the Latin of the second book of the "Simplicia" by the physician Dioscorides. The following is Azaria's brief introduction to this translation (Neubauer, "Revue des Etudes Juives," v. 46):

> "It often happens that physicians find themselves in places where they can not procure required drugs except with great difficulty, and hence are placed in great embarrassment. This is particularly the case with those of our coreligionists who are obliged to dwell in villages or in the mountains to gain their living. There are places where one can not find a variety of drugs wherewith to make the necessary medicaments. Therefore, I, Azaria, called Bonafoux in the vulgar tongue, have translated this alphabetical table which I found in use among Christians, entitled in Greek Περὶ τῶν Ἀντιβαλλομένων ["Book of the Equivalents of Drugs"], composed by the philosopher and physician Dioscorides for his uncle."

Bibliography: In addition to the works mentioned above, see Steinschneider, *Hebr. Uebers.* pp. 466, 650, 740.

G. S. K.

AZARIA B. MOSES DE ROSSI. See Rossi.

AZARIAH.—Biblical Data: The name given to twenty-six different persons in the Old Testament. The most important are:

1. A noble in the court of Solomon. According to I Kings iv. 2, he was the son of Zadok the priest. I Chron. v. 35 [A. V. vi. 9] makes him the son of Ahimaaz and grandson of Zadok. The same genealogical list (next verse) states that he in turn had a grandson bearing the same name who "executed the priest's office in the house that Solomon built in Jerusalem." Since Zadok figured as a prominent priestly noble in the court of Solomon, it seems more likely that not his grandson, but his son (as is stated by the older narrative of I Kings), occupied a similar position, probably succeeding his father in the high-priestly office. In that case the reference in I Chron. would apply to Azariah, the son of Zadok, rather than to Azariah's grandson. Similarity of name may have been the cause of the displacement at the hand of some later copyist.

2. The grandson of the Azariah of Solomon's reign and father of Amariah, who was high priest during the reign of Jehoshaphat (I Chron. v. 36 [A. V. vi. 10]; Ezra vii. 3).

3. The second Book of Chronicles (xxvi. 16-20), in assigning a cause for the leprosy of King Uzziah, states that the king impiously attempted to burn incense on the altar, and that Azariah "the priest" (that is, the high priest), with eighty attendant priests, opposed him, warning him that he as a layman had no right to burn incense to Yhwh. As a punishment for his impiety and his anger against the priests, Uzziah was at once smitten with leprosy. Josephus adds that an earthquake further evinced the divine disapproval ("Ant." ix. 10, § 4). This tradition of Josephus clearly arose from an association of the earthquake in the reign of Uzziah, referred to in Amos i. 1 and Zech. xiv. 5, with the story of the chronicler. The older narrative of Kings simply states that "the Lord smote the king, so that he was a leper" (II Kings xv. 5). The genealogical list in I Chron. v. [A. V. vi.], purporting to give the complete line of high priests in Judah, assigns to the reign of Uzziah none bearing the name of Azariah. The point of view of the entire story in II Chronicles is not that of the days of the kingdom, when it was the duty of the king to present offerings and burn incense (I Kings ix. 25), but of the late post-exilic period when the chronicler wrote. It has a close kinship with other traditions peculiar to him or to his age, and frequently introduced into his ecclesiastical history. Its aim was clearly to explain the horrible affliction of one who figures in the earlier narratives as a just and benign ruler; and also to point a priestly moral.

J. Jr. C. F. K.

——**In Rabbinical Literature:** The Haggadah identifies Azariah, chief priest under Uzziah, with the high priest Azariah of whom it is stated, as a special distinction, "He it is that executed the priest's office in the house that Solomon built in Jerusalem" (I Chron. v. 36 [A. V. vi. 10]), to indicate that he guarded the sanctity of the Temple from the sinful king Uzziah at the risk of his life (Sifre Zutta, cited in Yalk., Num. 754).

J. SR. L. G.

4. According to II Chron. xxxi. 10, 13, a certain Azariah of the house of Zadok was chief priest and "ruler of the house of God" during the reign of Hezekiah. During his high priesthood, chambers were built in the Temple to receive the oblations of the people.

5. The Levite Azariah (probably distinct from the preceding), whose son Joel is described by the chronicler (II Chron. xxix. 12) as active in carrying out the command of Hezekiah to cleanse the Temple.

6. Associated with the same traditional cleansing of the Temple in the days of Hezekiah was a third Azariah described as a Levite of the sons of Merari (II Chron. xxix. 12).

7. Son of the high priest Hilkiah, who was connected with the reformation of Josiah (I Chron. v. 39, 40 [R. V. vi. 13, 14]; in part, Ezra vii. 1). It was his son Seraiah who was put to death by Nebuchadnezzar. Perhaps it was this Azariah who gave his name to the priestly clan that figured in the reformation of Ezra and Nehemiah (Neh. x. 3 [R.V. 2]).

J. JR. C. F. K.

8. Son of Nathan, chief of the officers of Solomon (I Kings iv. 5).

9. Son of Hoshaiah, one of the men who disregarded the words of Jeremiah, and persisted in going to Egypt, taking the prophet along with them (Jer. xliii. 2).

10. The Hebrew name for Abed-nego, the companion of Daniel (Dan. i. 6 *et seq.*).

J. JR. G. B. L.

In Rabbinical Literature: Azariah and his friends Hananiah and Mishael were of royal lineage, like their colleague in the royal service, Daniel, being descendants of Hezekiah, to whom the prophet Isaiah had announced concerning them (Isa. xxxix. 7), "and of thy sons there shall be eunuchs in the palace of the king of Babylon" (Sanh. 93*b*; Pirke R. Eliezer lii.; Jerome, in his Commentary on Isaiah; Origines on Matt. xv. 5; a dissenting view in the Talmud, Sanh. *l.c.*, contends that only Daniel was a Judean: his friends belonging to other tribes). The cause of their having been eunuchs was the fact that the enemies of the Jews had accused them before King Nebuchadnezzar of leading impure lives, especially with the wives of the noble Babylonians, and in order to show the falsity of this accusation they mutilated themselves, and when arraigned before Nebuchadnezzar, they were not only able to refer to the Decalogue (Ex. xx. 14), which enforces chastity upon the Jew, but were also able to prove how unfounded was the accusation (Midr. Megillah, published by Gaster, in "Semitic Studies," p. 176).

Azariah and his friends were able to control themselves even to the suppression of every human inclination, and they were eminently fit for the service of the court (Dan. i. 4) because they did not permit themselves to be overcome by sleep or other needs (Sanh. *l.c.*). Devoted to their mundane ruler, they were equally faithful to their heavenly Father, obeying His commands strictly and keeping the Sabbath holy (Eliyahu R. xxvi.; Sanh. *l.c.*). Their faithfulness to the Jewish religion was demonstrated by their refusal to show homage to the idol erected by Nebuchadnezzar (Dan. iii.), although it was in reality no idolatry that was required of them, but rather an act of homage to the king's statue. They gave their lives for the glorification of the Eternal, saying, "If soulless animals like frogs hastened into the burning ovens of the Egyptians (Ex. vii. 28), how much more reason is there for us to do similarly" (Pes. 53*b*; compare Tosafot, under the word מה). Azariah and his friends Hananiah and Mishael were the men chosen as Jewish delegates to show homage to the statue, Nebuchadnezzar having commanded each nation to send three envoys on this occasion. They came to Daniel for advice; he sent them to the prophet Ezekiel, who advised them not to risk their lives, but rather to try to evade the command by flight. Although the prophet based his advice on the authority of Isaiah (compare Isa. xxvi. 20), they determined openly to insult the king's statue so that all the nations should say, "All peoples did homage to the image, Israel alone refused!" As Ezekiel could not make them desist from their plan, he bade them wait at least until he had questioned God; but the Almighty said to him: "Let them not depend upon Me herein, for it is precisely through the sinfulness of such aristocrats as they among My people, that My house is destroyed, My palace in ashes, and My children exiled among the heathens." This response, however, only confirmed their determination, and they each proceeded to a different point and there proclaimed loudly, "We will not serve thy gods, O king, nor worship the golden image which thou hast set up, even though God sustain us not" (Dan. iii. 18; verse 17, however, explicitly expresses faith in God's assistance). When they had thus proven their pious determination, it was revealed to the prophet Ezekiel that God would nevertheless intervene in their behalf, the former reply having been simply to test their fortitude (Cant. R. to vii. 8).

His Strength and Faith.

Opposes Idol-Worship.

When brought before him, Nebuchadnezzar reminded the young men that the Jews had freely worshiped idols before the destruction of Jerusalem, thus affording them a precedent; he also referred them to the words of Jeremiah (xxvii. 8), threatening destruction to all who should not obey Nebuchadnezzar; and appealing finally to the prophecy of Moses himself (Deut. iv. 28), predicting that the Jews would serve idols when scattered among the nations. But the three men remained steadfast, and intimated to the monarch that he might command their full obedience in such matters as taxes and imposts, but that in religious matters they could not obey. This defiance so enraged the king that he ordered them thrown into the fiery furnace (Lev. R. xxxiii. 6; compare also Tan., Noah, 10; ed. Buber, xv., and the parallel passages cited by Buber in note 130). Cast into the furnace, the men raised their eyes to heaven and prayed, "Lord of the universe. Thou knowest we did this thing not in reliance upon our own good deeds, but in reliance upon Thee, who wilt not permit the heathen to say, Where is their God?" (Tanḥuma, *l.c.*; the words here ascribed to the pious victims are a paraphrase of Ps. cxv. 1, 2, which psalm, according to Pes. 117*a*, was composed by these three men; compare also Ex. R. ix. 1, xviii. 4). The furnace into which they were thrown was so well heated with naphtha, tow, tar, and dry branches that the flames rose forty-nine cubits above the furnace, destroying all Chaldeans who were standing by (Septuagint and Theodotion on Dan. iii. 47; compare also Sanh. 92*b*; Cant. R. vii. 9.)

In the Fiery Furnace.

The angel of the hailstorm, Yurḳami, craved divine permission to cool the furnace, but the task was entrusted to the archangel Gabriel, who so arranged matters that the interior of the furnace was cooled, but its exterior was so furiously glowing that all heathens who gathered to the spectacle perished (Pes. 118*a*, *b*; different in Tan. *l.c.*, which states that God Himself delivered the victims; compare also Ex. R. xviii. 4). In the midst of the flames, Azariah meanwhile intoned a penitential prayer and confession of sins, in which his friends joined, acknowledging God's supreme justice; and when presently a strong wind, laden with moisture, blew through the furnace, they broke into a song of thanksgiving (Septuagint and Theodotion, *ib.* iii. 26-90). The extinction of the flames was but one of six miracles happening upon that day, which happened to be both the Sabbath and the Day of Atonement. The fiery furnace, which had been sunk deep in the ground, rose upon its foundations and its walls fell apart; four adjoining nations, hostile to the Jews, were burned by it; Nebuchadnezzar himself suffered from its fury, his statue being overthrown; and it was this identical wind-storm which reanimated the dead of Ezekiel's vision (Ez. xxxvii. 9) at God's command (Sanh. *l.c.*; Cant. R. *l.c.*). When the furnace fell, the men refused obedience to the angel's suggestion that they should leave the ruins, saying that they would not leave until Nebuchadnezzar would order them to do so, as otherwise it would look as if they had run away (Tan. *l.c.*). When Nebuchadnezzar at length approached to bid them come forth, he recognized in the fourth personage present the angel Gabriel, whom he had seen previously, destroying the army of Sennacherib before Jerusalem (Yalḳ., Dan. 1062).

The deliverance of these three men from the furnace made a deep impression upon the surrounding nations, who came to them and remonstrated with them: "You knew that your God could perform such great miracles; how, then, could you through your sinfulness bring about the destruction of His house and the banishment of His children?" They then so forcibly expressed their contempt for so rebellious a people, that the princes exclaimed, "O Lord, righteousness belongeth to Thee, but unto us confusion of face as at this day" (Dan. ix. 7) (Pesiḳta, ed. Buber, xi. 99*a*; Sanh. 93*a*).

According to one account, Hananiah, Mishael, and Azariah died on the spot; but, according to other accounts, they left Babylonia and settled in Palestine, where they married and had descendants, their sojourn in the furnace having remedied all their physical deformities (Sanh. *l.c.*; Yer. Shab. vi., end, 8*d*). Here they became the friends of the high priest Joshua, and in view of their past they were considered "men that are a sign" (Zech. iii. 8). Another result of the deliverance of these men was that the heathens broke up their idols and fashioned bells and spangles out of them, which they hung around the necks of their dogs and asses. The piety of Hananiah, Mishael, and Azariah has remained imperishable in the memory of the people, so that, for instance, when the supports of the order of the universe are spoken of, these men are referred to as its pillars (Cant. R. vii. 9).

BIBLIOGRAPHY: Brüll, *Jahrbücher*, viii. 22-27.

J. SR. L. G.

11. Son of Maaseiah, who rebuilt part of the wall of Jerusalem in the days of Nehemiah (Neh. iii. 23).

12. A leader who came with Zerubbabel (Neh. vii. 7). In the parallel account of Ezra ii. 2 he is called "Seraiah."

13. One of those who explained the Law (Neh. viii. 7).

14. One of "those that sealed" the covenant with Nehemiah (Neh. x. 3 [R. V. 2]).

15. A member of the tribe of Judah who took part in the dedication of the wall (Neh. xii. 33).

16. Son of Ethan, mentioned in the genealogy of Judah (I Chron. ii. 8).

17. A Jerahmeelite (I Chron. ii. 38, 39).

18. The same as UZZIAH, which see.

19. A Kohathite Levite (I Chron. vi. 21 [R. V. vi. 36]).

20. A priest residing in Jerusalem (I Chron. ix. 11).

21. Son of Oded, who, meeting the victorious army of Asa at Mareshah, on its return from the campaign against Zerah the Ethiopian, urged the necessity of a religious reform (II Chron. xv. 1-8).

22 and 23. Two sons of Jehoshaphat (II Chron. xxi. 2).

24. Son of Jeroham, captain of a hundred (II Chron. xxiii. 1).

25. Son of Obed, also captain of a hundred (II Chron. xxiii. 1).

26. Son of Johanan, an Ephraimite who refused to accept the booty taken by Israel from Judah (II Chron. xxviii. 12).

In II Chron. xxii. 6 "Azariah" is an error for "Ahaziah."

J. JR. G. B. L.

AZARIAH: A Palestinian scholar of the fourth amoraic generation (fourth century), often quoted in conjunction with R. Aḥa (Lev. R. vi. 5; Cant. R. to v. 16), R. Judan (Gen. R. xlvii.; Cant. R. to i. 4), and R. Judah b. Simon (Gen. R. xv.; Cant. R. to i. 2). Although his name appears in connection with some Halakot (Yer. Shab. vii. 9*b*; Yer. Pes. i. 28*a*), it is doubtful whether he ever became interested in legal topics; and the halakic questions with which his name is associated probably belong to R. Ezra (compare Frankel, "Mebo," p. 120*b*). Nor can the names of his teachers be definitely ascertained. Azariah transmits Haggadot in the name of leading amoraim of earlier generations, such as Ḥanina (Johanan) b. Pappa (Gen. R. xlv.; Cant. R. to ii. 14), Simeon b. Laḳish (Yer. Ber. i. 2*d*; Tan., Bereshit, ed. Buber, 15), and Johanan (Gen. R. xcviii. 5); and he also quotes his own contemporaries. Nevertheless, the assumption that he was a disciple of R. Mana II. (compare Bacher, "Ag. Pal. Amor." iii. 449, 458) is untenable, because both R. Cohen and R. Tanḥuma—the former a predecessor, the latter a contemporary, of R. Mana—report in the name of R. Azariah, which shows that he was a predecessor of both and of R. Mana (Ruth R. to i. 19; Esther R. to i. 2). For the same reason the identification of R. Ezra with R. Azariah (Bacher, *l.c.* 450) is inadmissible. The two names represent two distinct persons, who flourished in different generations, and, it seems, occupied themselves with different branches of rabbinic lore (compare Ezra).

R. Azariah was a versatile haggadist, to whom even single letters suggested ideas. Thus in the triliteral term "eshel" (אשל = the tamarisk; which, according to Gen. xxi. 33, Abraham planted at Beer-sheba), Azariah discovers three important duties connected with hospitality: the furnishing of the guest with meat (אכילה), with drink (שתיה), and with an escort (לויה) (Midr. Teh. cx. 1; see note in ed. Buber). According to him, the distinction conferred on the tribal princes of Ephraim and Manasseh at the consecration of the Tabernacle—the former offering his gifts on the Sabbath day and the latter immediately following him—was owing to the merits of their ancestor Joseph. The Lord said to Joseph: "Thou hast kept inviolate the seventh commandment and the eighth commandment, in that thou hast had no dealings with Potiphar's wife and hast not stolen of Potiphar's goods, nor dishonored his house; and a time will come when I shall reward thee; when the princes of the tribes shall come to consecrate the altar, the princes descended from thy two sons will approach one after the other with their offerings, and none will intervene between them, even as nothing intervenes between the two commandments thou hast kept." Therefore we find it written (Num. vii. 48), "On the seventh day . . . the prince of the children of Ephraim offered," and (*ib.* 54), "on the eighth day, . . . the prince of the children of Manasseh" (Num. R. xiv. 7; Tan., Naso, 28). The Biblical simile (Cant. ii. 3), "As the apple-tree is among the trees of the wood, so is my beloved among the sons," he thus explains (Cant. R. to *l.c.*): "As the apple-tree ripens its fruit only in the month of Siwan, so Israel emitted sweet savor (manifest ripeness for the reception of the Law) in the month of Siwan (Ex. xix. 1 *et seq.*); and as the apple-tree occupies fifty days between budding and ripening its fruit, so did Israel take fifty days between the exodus and the reception of the Torah." (Tan., ed. Buber, Index; Midr. Teh., ed. Buber, Index; Pesiḳ., ed. Buber, pp. 1*a*, 2*b*, 28*b*, 39*a*, 42*a*, 50*a*, 51*a*, 61*a*, 99*a*, 103*b*, 116*b*, 125*a*, 131*b*, 139*a*, 166*a*, 179*b*, 192*b*; Pesiḳ. R., ed. Friedmann, Index; see also Bacher, "Ag. Pal. Amor." iii. 458–465.)

J. SR. S. M.

AZARIAH, MENAHEM HA-KOHEN: Author and translator; born at Fürth, Germany; flourished at Amsterdam in 1727. He edited Eliezer ha-Ḳaṭan's (his father-in-law's) "Shulḥan 'Aruk," an extract from the first volume of the Shulḥan 'Aruk, Fürth, 1696–97. Appended to this work is Azariah's short commentary on the thirteen hermeneutic rules. He later removed to Amsterdam, where he published in 1727 his "Meẓiat 'Azariah" (Azariah's Find), a Judæo-German translation of Moses Sulzbach's "Sam Ḥayyim" (Tincture of Life)—an ethical work in rimed prose, which he provided with an exhaustive introduction and epilogue. A second edition of this translation was published at Zolkiew, Galicia, 1795.

AZARIAS: General in the army of Judas Maccabeus, who, together with Joseph, son of Zacharias, was left in command of the Judean army (165 B.C.) when Judas and Jonathan were absent in Gilead and Simon in Galilee. Orders had been given to Azarias to remain passive and not to engage in battle before the return of the leaders. Azarias, however, became restless upon hearing of the deeds of valor which others had performed, and went out to battle with the enemy at Jamnia. He was nevertheless beaten back by the Syrian general Gorgias, with a loss of two thousand men.

AZAZ: A Reubenite, father of Bela and son of Shema (I Chron. v. 8). G. B. L.

AZAZEL (Scapegoat, Lev. xvi., A. V.): The name of a supernatural being mentioned in connection with the ritual of the Day of Atonement (Lev. xvi.). After Satan, for whom he was in some degree a preparation, Azazel enjoys the distinction of being the most mysterious extrahuman character in sacred literature. Unlike other Hebrew proper names, the name itself is obscure.

—— **Biblical Data:** In Lev. xvi. the single allusion to Azazel is as follows: On the tenth day of Tishri (see Atonement Day) the high priest, after first performing the prescribed sacrifices for himself and his family, presented the victims for the sins of the people. These were a ram for a burnt offering, and two young goats for a sin-offering. Having brought the goats before YHWH at the door of the tabernacle, he cast lots for them, the one lot "for YHWH" and the other "for Azazel." The goat that fell to YHWH was slain as a sin-offering for the people. But the goat of Azazel (now usually known as the "scapegoat") was made the subject of a more striking ceremony. The high priest laid his hands upon its head and confessed over it the sins of the people. Then the victim was handed over to a man standing ready for the purpose, and, laden as it was with these imputed sins, it was "led forth to an isolated region," and then let go in the wilderness.

J. JR. J. F. McC.

—— **In Biblical, Apocryphal, and Rabbinical Literature:** The Rabbis, interpreting "Azazel" as "Azaz" (rugged), and "el" (strong), refer it to the rugged and rough mountain cliff from which the goat was cast down (Yoma 67*b*; Sifra, Aḥare, ii. 2; Targ. Yer. Lev. xiv. 10, and most medieval commentators). Most modern scholars, after having for some time indorsed the old view have accepted the opinion mysteriously hinted at by Ibn Ezra and expressly stated by Nahmanides to Lev. xvi. 8, that Azazel belongs to the class of "se'irim," goat-like demons, jinn haunting the desert, to which the Israelites were wont to offer sacrifice (Lev. xvii. 7 [A. V. "devils"]; compare "the roes and the hinds," Cant. ii. 7, iii. 5), by which Sulamith administers an oath to the daughters of Jerusalem as if thinking of a Roman faun.

Azazel Personification of Impurity.

Far from involving the recognition of Azazel as a deity, the sending of the goat was, as stated by Nahmanides, a symbolic expression of the idea that the people's sins and their evil consequences were to be sent back to the spirit of desolation and ruin, the source of all impurity. The very fact that the two goats were presented before Yhwh before the one was sacrificed and the other sent into the wilderness, was proof that Azazel was not ranked with Yhwh, but regarded simply as the personification of wickedness in contrast with the righteous government of Yhwh. The rite, resembling, on the one hand, the sending off of the epha with the woman embodying wickedness in its midst to the land of Shinar in the vision of Zachariah (v. 6–11), and, on the other, the letting loose of the living bird into the open field in the case of the leper healed from the plague (Lev. xiv. 7), was, indeed, viewed by the people of Jerusalem as a means of ridding themselves of the sins of the year. So would the crowd, called Babylonians or Alexandrians, pull the goat's hair to make it hasten forth, carrying the burden of sins away with it (Yoma vi. 4, 66*b*; "Epistle of Barnabas," vii.), and the arrival of the shattered animal at the bottom of the valley of the rock of Bet Ḥadudo, twelve miles away from the city, was signalized by the waving of shawls to the people of Jerusalem, who celebrated the event with boisterous hilarity and amid dancing on the hills (Yoma vi. 6, 8; Ta'an. iv. 8). Evidently the figure of Azazel was an object of general fear and awe rather than, as has been conjectured, a foreign product or the invention of a late lawgiver. Nay, more: as a demon of the desert, it seems to have been closely interwoven with the mountainous region of Jerusalem and of ancient pre-Israelitish origin.

Leader of the Rebellious Angels.

This is confirmed by the Book of Enoch, which brings Azazel into connection with the Biblical story of the fall of the angels, located, obviously in accordance with ancient folk-lore, on Mount Hermon as a sort of an old Semitic Blocksberg, a gathering-place of demons from of old (Enoch xiii.; compare Brandt, "Mandäische Theologie," 1889, p. 38). Azazel is represented in the Book of Enoch as the leader of the rebellious giants in the time preceding the flood; he taught men the art of warfare, of making swords, knives, shields, and coats of mail, and women the art of deception by ornamenting the body, dyeing the hair, and painting the face and the eyebrows, and also revealed to the people the secrets of witchcraft and corrupted their manners, leading them into wickedness and impurity; until at last he was, at the Lord's command, bound hand and foot by the archangel Raphael and chained to the rough and jagged rocks of [Ha] Duduael (= Beth Ḥadudo), where he is to abide in utter darkness until the great Day of Judgment, when he will be cast into the fire to be consumed forever (Enoch viii. 1, ix. 6, x. 4-6, liv. 5, lxxxviii. 1; see Geiger, "Jüd. Zeit." 1864, pp. 196–201). The story of Azazel as the seducer of men and women was familiar also to the rabbis, as may be learned from Tanna d. b. R. Yishma'el: "The Azazel goat was to atone for the wicked deeds of 'Uzza and 'Azzael, the leaders of the rebellious hosts in the time of Enoch" (Yoma 67*b*); and still better from Midrash Abkir, end, Yalḳ., Gen. 44, where Azazel is represented as the seducer of women, teaching them the art of beautifying the body by dye and paint (compare "Chronicles of Jerahmeel," trans. by Gaster, xxv. 13). According to Pirḳe R. El. xlvi. (comp. Tos. Meg. 31*a*), the goat is offered to Azazel as a bribe that he who is identical with Samael or Satan should not by his accusations prevent the atonement of the sins on that day.

The fact that Azazel occupied a place in Mandæan, Sabean, and Arabian mythology (see Brandt, "Mandäische Theologie," pp. 197, 198; Norberg's "Onomasticon," p. 31; Reland's "De Religione Mohammedanarum," p. 89; Kamus, *s.v.* "Azazel" [demon identical with Satan]; Delitzsch, "Zeitsch. f. Kirchl. Wissensch. u. Leben," 1880, p. 182), renders it probable that Azazel was a degraded Babylonian deity. Origen ("Contra Celsum," vi. 43) identifies Azazel with Satan; Pirḳe R. El. (*l.c.*) with Samael; and the Zohar Aḥare Mot, following Nahmanides, with the spirit of Esau or heathenism; still, while one of the chief demons in the Cabala, he never attained in the doctrinal system of Judaism a position similar to that of Satan. See articles Atonement and Atonement, Day of.

K.

——**In Talmudical Literature:** The Rabbis took the term "Azazel" to be the name of a mountain or precipice in the wilderness from which the goat was thrown down, using for it as an alternative the word "Ẓoḳ" (צוק) (Yoma vi. 4). An etymology is found to suit this interpretation. "Azazel" (עזאזל) is regarded as a compound of "az" (עז), strong or rough, and "el" (אל), mighty, therefore a strong mountain. This derivation is presented by a Baraita, cited Yoma 67*b*, that Azazel was the strongest of mountains.

The Name.

Another etymology (*ib.*) connects the word with the mythological "Uza" and "Azael," the fallen angels, to whom a reference is believed to be found in Gen. vi. 2, 4. In accordance with this etymology, the sacrifice of the goat atones for the sin of fornication of which those angels were guilty (Gen. *l.c.*).

The Rite.

Two goats were procured, similar in respect of appearance, height, cost, and time of selection. Having one of these on his right and the other on his left (Rashi on Yoma 39*a*), the high priest, who was assisted in this rite by two subordinates, put both his hands into a wooden case, and took out two labels, one inscribed "for the Lord" and the other "for Azazel." The high priest then laid his hands with the labels upon the two goats and said, "A sin-offering to the Lord"—using the Tetragrammaton; and the two men accompanying him replied, "Blessed be the name of His glorious kingdom for ever and ever." He then fastened a scarlet woolen thread to the head of the goat "for Azazel"; and laying his hands upon it again, recited the following confession of sin and prayer for forgiveness: "O Lord, I have acted iniquitously, trespassed, sinned before Thee: I, my household, and the sons of Aaron—Thy holy ones. O Lord, forgive the iniquities, transgressions, and sins that I, my household, and Aaron's children—Thy holy people—committed before Thee, as is written in the law of Moses, Thy servant, 'for on this day He will forgive you, to cleanse you from all your sins before the Lord; ye shall be clean.'" This prayer was responded to by the congregation present (see ATONEMENT, DAY OF). A man was selected, preferably a priest, to take the goat to the precipice in the wilderness; and he was accompanied part of the way by the most eminent men of Jerusalem. Ten booths had been constructed at intervals along the road leading from Jerusalem to the steep mountain. At each one of these the man leading the goat was formally offered food and drink, which he, however, refused. When he reached the tenth booth those who accompanied him proceeded no further, but watched the ceremony from a distance. When he came to the precipice he divided the scarlet thread into two parts, one of which he tied to the rock and the other to the goat's horns, and then pushed the goat down (Yoma vi. 1–8). The cliff was so high and rugged that before the goat had traversed half the distance to the plain below, its limbs were utterly shattered. Men were stationed at intervals along the way, and as soon as the goat was thrown down the precipice, they signaled to one another by means of kerchiefs or flags, until the information reached the high priest, whereat he proceeded with the other parts of the ritual.

The scarlet thread was a symbolical reference to Isa. i. 18; and the Talmud tells us (*ib.* 39*a*) that during the forty years that Simon the Just was high priest, the thread actually turned white as soon as the goat was thrown over the precipice: a sign that the sins of the people were forgiven. In later times the change to white was not invariable: a proof of the people's moral and spiritual deterioration, that was gradually on the increase, until forty years before the destruction of the Second Temple, when the change of color was no longer observed (*l.c.* 39*b*).

——**Critical View:** There has been much controversy over the function of Azazel as well as over his essential character. Inasmuch as according to the narrative the sacrifice of Azazel, while symbolical, was yet held to be a genuine vicarious atonement, it is maintained by critics that Azazel was originally no mere abstraction, but a real being to the authors of the ritual—as real as YHWH himself.

This relation to the purpose of the ceremony may throw light upon the character of Azazel. Three points seem reasonably clear. (1) Azazel is not a mere jinnee or demon of uncertain ways and temper, anonymous and elusive (see ANIMAL WORSHIP), but a deity standing in a fixed relation to his clients. Hence the notion, which has become prevalent, that Azazel was a "personal angel," here introduced for the purpose of "doing away with the crowd of impersonal and dangerous *se'irim*" (as Cheyne puts it), scarcely meets the requirements of the ritual. Moreover, there is no evidence that this section of Leviticus is so late as the hagiological period of Jewish literature.

(2) The realm of Azazel is indicated clearly. It was the lonely wilderness; and Israel is represented as a nomadic people in the wilderness, though preparing to leave it. Necessarily their environment subjected them in a measure to superstitions associated with the local deities, and of these latter Azazel was the chief. The point of the whole ceremony seems to have been that as the scapegoat was set free in the desert, so Israel was to be set free from the offenses contracted in its desert life within the domain of the god of the desert.

(3) Azazel would therefore appear to be the head of the supernatural beings of the desert. He was thus an instance of the elevation of a demon into a deity. Such a development is indeed rare in Hebrew religious history of the Biblical age, but Azazel was really never a national Hebrew god, and his share in the ritual seems to be only the recognition of a local deity. The fact that such a ceremony as that in which he figured was instituted, is not a contravention of Lev. xvii. 7, by which demon-worship was suppressed. For Azazel, in this instance, played a merely passive part. Moreover, as shown, the symbolical act was really a renunciation of his authority. Such is the signification of the utter separation of the scapegoat from the people of Israel. This interpretation is borne out by the fact that the complete ceremony could not be literally fulfilled in the settled life of Canaan, but only in the wilderness. Hence it was the practise in Jerusalem, according to Yoma vii. 4, to take the scapegoat to a cliff and push him over it out of sight. In this way the complete separation was effected.

AZAZIAH: **1.** A Levite who took part in the choral services on the return of the Ark to Jerusalem (I Chron. xv. 21). **2.** Father of Hoshea, who was the leader of Ephraim at the time that David enumerated the people (I Chron. xxvii. 20). **3.** A Levite who had charge of the offerings brought to the Temple in the days of Hezekiah (II Chron. xxxi. 13).

J. JR. G. B. L.

AZBAN, MORDECAI BEN ISAAC: Cabalist and rabbi in Leghorn; born in the interior of Africa; died at Jerusalem 1740. At Leghorn he had a controversy with Abraham Ḥayyim Rodriguez, which is printed in the latter's collection of decisions, entitled "Oraḥ le-Ẓadik." He went as rabbi to Aleppo, and later to Jerusalem, where he remained till his death. Azban composed "Zebaḥ Todah"

(Thank Offering), which contains a lengthy penitential prayer ("widdui gadol") with reference to the various human organs so far as they lead man to sin (Constantinople, 1733). This work was modeled after Eleazar Ascari's "Sefer Ḥaredim." He also wrote "Yissa Berakah" and other works of a mystic nature.

AZBUK: Father of Nehemiah; assisted in repairing the wall at Jerusalem (Neh. iii. 16).
J. JR. G. B. L.

AZEKAH: A city in the Shephelah, or plain of Judah; about midway between Jerusalem and the Philistine boundary, in a southwestern direction; probably not far from Socoh or Shochoh (I Sam. xvii. 1)—now Shuweikah—with which it is coupled (Josh. xv. 35). Its exact site has not been ascertained. Eusebius relates that a village, Ezekah, was to be found between Eluethe-ropolis and Elia.

Azekah existed before the conquest of Canaan by the Israelites. Joshua, having defeated the five kings at Gibeon, followed them up to Azekah (Josh. x. 10, 11). The Philistine army lay between Shochoh and Azekah, when David fought Goliath (I Sam. xvii. 1). Rehoboam fortified it (II Chron. xi. 9), and four centuries later, in the reign of Zedekiah, the Jews opposed Nebuchadnezzar's forces at Azekah (Jer. xxxiv. 7). After the return from the Exile it was resettled by the tribesmen of Judah (Neh. xi. 30).

J. JR. G. B. L.

AZEVEDO, DANIEL COHEN D': Ḥakam in Amsterdam; died in 1823; son and successor of the ḥakam David Cohen d'Azevedo. He is the author of a sermon—"Sermão Heroico pregado no K. K. de Talmud Torah en Amsterdam," Aug. 3, 1809 (eulogistic sermon, preached in the holy congregation), Amsterdam, 1809.
S. M. K.

AZEVEDO, DAVID COHEN D': Ḥakam of Amsterdam in the eighteenth century; died in 1792. He devoted himself to rabbinical studies and was elected ḥakam in Amsterdam in 1782. He published a sermon entitled "Triumphos da Virtude: Sermão á Ocasião do Natalicio de Guillermo V., Principe de Orange," Amsterdam, 1788.
D. M. K.

AZEVEDO, DAVID SALOM D': Diplomat, of the seventeenth century; died 1699. He was minister resident at Amsterdam of the dey of Algeria, and in that capacity negotiated a commercial treaty with the Netherlands. He was also an energetic member of the building committee of the great synagogue of the Portuguese congregation in Amsterdam. Azevedo was renowned for his wisdom and learning. His epitaph is to be found in D. H. de Castro's "Keur van Grafsteenen," p. 97.
D. M. K.

AZEVEDO, FRANCISCO D': Portuguese Marano of the seventeenth century. He was sent in 1673 to Rome to implore the papal curia to curb the inhumanity of the Inquisition. Well supplied with money, and seconded by the Jesuits—who were not in sympathy with the Inquisition—he succeeded in exposing the cruelties of its procedure. Clement X. thereupon issued a bull, dated Oct. 3, 1674, suspending the activity of the Portuguese Inquisition, and prohibiting any further accusations, condemnations, or confiscations until the grievances of the Maranos in that country should have been investigated by a Roman court of inquiry.

AZEVEDO, MOSES COHEN D': Haham of London; son of Daniel Cohen d'Azevedo; born in Amsterdam about 1720; died in 1784. He succeeded, in 1761, Moses Gomez da Mesquitta, his father-in-law, as haham (ḥakam) of the Spanish and Portuguese congregation of London.

The only publications credited to him are two sermons, one on the accession of George III., delivered December, 1760, before he was called haham. They were delivered in Spanish, and published, with an English translation, in 1776, containing prayers for the success of the British arms: "Order de la Oracion, en el Dia de Ayuno, 13 Dec., 1776. Implorando . . . la Divina Asistencia a las Armas de su Magestad." One of his descendants died a few years ago in Barrow's Buildings at the age of ninety. A portrait of the haham is the only relic left of him. His son, Daniel, was hazan of the congregation from 1779 until 1812.

AZGAD: The Bene Azgad returned with Zerubbabel from the captivity (Ezra ii. 12; Neh. vii. 17). Their number is variously given as 1,222 (Ezra ii. 12), 2,322 (Neh. vii. 17), 1,322 (I Esd. v. 13, where the form given to the name is "Astad"). Subsequently 110 more came up with Ezra (Ezra viii. 12; I Esd. viii. 38, "Astath"). Azgad signed the covenant with Nehemiah (Neh. x. 16).
J. JR. G. B. L.

AZHAROT (Exhortations): Liturgical poems treating of the precepts of the Law. The Babylonian Talmud (Mak. 23*b*) contains an utterance by R. Simlai to the effect that "613 commandments were revealed to Moses: 365, equal to the number of days in the year, were negative precepts; and 248, corresponding to the number of the component parts of the human body, were affirmative." R. Hamnuna finds a suggestive hint for this number in the alphabetical value of the Hebrew letters composing the word תורה ("law"; Deut. xxxiii. 4), which amount to 611, to which there are to be added the first two passages of the Decalogue which were spoken not by Moses, but by God Himself to Israel. Although this enumeration repeatedly recurs in Talmud and Midrash, even in the name of the earlier teachers (compare Bacher, "Ag. Pal. Amor."

The "613" Precepts.

i. 558, note 2), and later sages discovered new intimations of the number in various passages (see Rashi on Num. xv. 39; sources in Buber, "Midrash Agada," p. 113, note 24; further material in Steinschneider, "Hebr. Uebers." p. 926, note 152), it has not always remained undisputed: Baḥya, for instance (Ḥobot ha-Lebabot," Introduction), basing upon Ps. cxix. 96, eliminates the "duties of the heart" from these. Naḥmanides ("Sefer ha-Miẓwot," beginning) raises the question whether this number has traditional authority or whether it is merely an individual opinion of Simlai. From Abraham ibn Ezra, who points out ("Yesod Moreh," gate 2) that if all basic precepts and their derivatives, and those intended for all time, are considered, this number would be untenable, down to Simon b. Ẓemah Duran ("Zohar ha-Rakia'," end), who opines that Simlai counted the precepts after his own fashion and not in a manner authoritative for others, and that the number 613 is retained only as being incidentally correct, similar objections have repeatedly been made against the enumeration.

Prohibitive and Mandatory Precepts.

Many teachers, nevertheless, accepting the figure, have busied themselves with the detailed enumeration. The compiler of the "Ḥalakot Gedolot" was the first to attempt this in the introduction to his book. He divides his whole material into two main divisions, the first containing the prohibitive (negative) precepts, 71 of which are punishable with death, and 277 with scourging, total 348; the second containing the mandatory (affirmative) precepts, 200 in number, to which are to be added 65 laws and statutes incumbent upon the Jews as a whole, thus making 613 in all ("Hal. Gedolot," ed. Berlin, pp. 8 *et seq.*; compare Hildesheimer, "Die Vaticanische Handschrift der Hal. Gedolot" pp. 13 *et seq.*). There is said to be a work in Arabic by Ḥefeẓ b. Yazliaḥ, upon the same subject, but nothing further is known of it. Maimonides does not agree with the author of the "Hal. Gedolot"; in section 14 of his "Sefer ha-Miẓwot" (Arabic original published by M. Bloch under the title "Le Livre des Préceptes par Moïse ben Maimon," Paris, 1888; for Hebrew translations, see Steinschneider, *l.c.* § 554, 2) he lays down certain principles which must be the guide in the enumeration of the precepts, and then counts up 248 affirmative and 365 negative commands, amounting to 613. This division agrees only in its total with that of R. Simlai in the Talmud, and in later times has been made use of particularly by the cabalists. It seems, however, to have remained unknown to the author of the "Hal. Gedolot," and is omitted in the parallel passage in Tanḥuma. Maimonides, indeed, who found it necessary to revise his own work, is not always consistent on this point; and his son Abraham was called upon to defend his celebrated father against the attack of R. Daniel ha-Babli ("Ma'ase Nissim," ed. B. Goldberg, Paris, 1866). Maimonides also found a redoubtable opponent in Naḥmanides, who was, however, concerned not so much to attack Maimonides as to defend the author of the "Hal. Gedolot," whose words were accounted "holy tradition" ("Sefer ha-Miẓwot," first printed at Constantinople, 1510). But Maimonides was not destitute of champions. Many sided with him, of whom Simon Duran ("Zohar ha-Rakia'") and Isaac de Leon ibn Ẓur ("Megillat Esther") may be mentioned: the former writes in a conciliatory vein; the latter can not bring himself to admit that any opinion of Maimonides could be wrong.

It will suffice for present purposes merely to mention the "Sefer ha-Ḥinnuk," which follows a method of its own in enumerating the precepts. For the understanding of what follows, it must also be stated that, in addition to the 613 Biblical precepts, sometimes seven non-Biblical ones are added, making the total 620, which represents the numerical value of the letters in the Hebrew word כתר ("crown").

The Azharot.

It is this enumeration of the precepts of the Torah which furnishes the theme of all the poems known as "Azharot," a name derived from the first composition of this nature, which begins with the words אזהרות ראשית לעמך נתת ("Of old Thou didst give exhortations to Thy people"). The Azharot are variously described, both in printed works and in manuscripts, as "Exhortations of the Rabbis," "Exhortations Formulated in the Academy," "Exhortations of the Holy Academies of the Rabbis in Pumbedita," also "Exhortations of Elijah of Blessed Memory!" They are of great antiquity, and the probability must be conceded that they emanated from the academy of Joseph b. Abba Gaon of Pumbedita, concerning whom Sherira's "Letter" narrates that his academy was at times visited by Elijah the Prophet. Being of prior origin to the "Halakot Gedolot" (the last line, אז יש מאות, is found reproduced in the "Hal. Gedolot," ed. Hildesh. p. 9, and all ancient Azharot contain it), these older compositions do not enumerate the individual 613 precepts, and speak only in general terms of the 365 negative and 248 affirmative precepts, of their sources, contents, and of the manner in which they are derived from the actual words of the Scripture text, etc. Such specific enumeration was only possible after that of the "Hal. Gedolot," and this is found in the Azharot commencing אתה הנחלת תורה לעמך ("Thou didst grant a law unto Thy people"). This composition, which follows the "Hal. Gedolot" accurately, is found sometimes with the superscription "Azharot of the Rabbis of the Academy," sometimes "Azharot of Elijah (or 'Elijah the Tishbite') of Blessed Memory." It has been erroneously ascribed by some to Elijah ha-Zaḳen (see below); while others have considered Simeon ha-Gadol its author; it undoubtedly originated in Pumbedita. Its example was followed by a host of imitators. Saadia Gaon wrote Azharot (beginning with אנכי איש אוכלה, "I am a consuming fire"), and, in addition, summarized the 613 precepts in a piyyuṭ beginning, "The Lord thy God shalt thou fear" (both printed in I. Rosenberg, "Ḳobeẓ," ii. 26–54; the 613 precepts also by J. Müller in the Paris edition of Saadia's works, ed. Derenbourg, ix. 57). The suggestion that Saadia is not the author of these compositions is entirely gratuitous, seeing that his name appears therein acrostically. Other Azharot, by Isaac Gikatilla, were known to Moses ibn Tibbon, and are mentioned by Isaac Petit b. Mordecai Kimhi, but have not been preserved. Perhaps they are identical with the Azharot commencing אחגור חיל לרומם הבורא ("I will gird me with strength to extol the Creator"), which, according to Isaac b. Todros, were contained in the "siddur" of Amram Gaon; even the present recension of this siddur contains pieces which are later than Amram's time.

Solomon ibn Gabirol was the next to treat of the precepts in the Azharot commencing אלהיך איש אכלה ("Thy God is a consuming fire"), edited by Sachs-Halberstamm, "Ḳobeẓ 'al-Yad," 1893; later on he wrote complete Azharot to which reference will be had in the following. Isaac b. Reuben Albargeloni is the author of the Azharot איה מקום בינה ("Where is the abode of understanding?"). Elijah ha-Zaḳen b. Menahem of Mans wrote the Azharot אמת יהגה חכי ("Truth shall my mouth indite"), first published by Luzzatto in "Literaturblatt des Orients," 1850, part 16, and later reprinted by Rosenberg, *l.c.* pp 55 *et seq.* Mention may be made here of the piyyuṭ by Eliezer b. Nathan, אבי ראש לדברות, intended for the evening service of the second day of Pentecost, which also treats of the 613 precepts. The Azharot commencing אני בינה שוכנת מעונה ("I, Understanding, dwell on high") were written by Isaac Petit b. Mordecai Kimhi. Krespia ha-Naḳdan wrote Azharot beginning with the words ארוממך ד מלכי ("I will extol Thee, O Lord, my King"). A species of Azharot was composed by Joseph b. Solomon Yaḥya, but nothing definite is known concerning it save that it was lost in a conflagration. Elijah ha-Kohen Tchelebi (צלבי) wrote אברך לאל נורא ("I will bless the God Tremendous"). The Azharot "Pour forth Thy mercy" were written by Menahem Tamar. Menahem Egozi (Nut-Tree) entitles his Azharot, which begin מה מאד נעלה איאלה, with a play upon his own name פרח מגן אגוז ("A blossom from the nut-garden"). Similarly, those of Elijah Adeni (of Aden), which begin with the words אדני בם (Amsterdam ed., 1688), were entitled by him יד אליה. Finally, mention must be made of the Azharot of Joshua Benveniste, which are only known from Azulai's "Shem ha-Gedolim" (*s.v.* משמרת המצות).

The Material and Its Divisions.

R. Simlai's utterance, quoted above, speaks of the division of the Pentateuchal precepts into affirmative and negative commandments (עשה and לא תעשה). The "Hal. Gedolot" observe this division; and, in addition, they group the individual precepts as far as may be according to their subject-matter. The Azharot אתה הנחלת do not observe this method: affirmative and negative precepts follow each other in wild confusion regardless of subject, entailing a great sacrifice of perspicuity. Saadia, in his "613 precepts," places, in two divisions, first 97 duties of the person (מצות הגוף), and then 58 and 45 affirmative precepts referring to sacrifices, priests, and purification; in all, 200 affirmative commands. Then follow, in four divisions, 277 negative precepts (the specific enumeration is not correctly given in the present printed texts, nor even by Zunz): 71 punishable with death, and 65 sections pertaining to the community as a whole, amounting in all to 630. This clearly shows how closely Saadia adheres to the "Hal. Gedolot"; just so closely, too, does Isaac Albargeloni follow the same authority; and, indeed, this is the rule, as Maimonides remarks, with all Azharot composed down to the latter's time. Gabirol deviates from this practise only to the extent that he observes the Talmudic enumeration of 248 affirmative and 365 negative commands. Krespia ha-Naḳdan follows Maimonides in the enumeration, as do also Menahem Tamar and Joshua Benveniste. In his Azharot proper, Saadia disregards the strict demarcation between affirmative and negative precepts. He adduces the precepts according to their derivation from the Decalogue, an idea often imitated; by Saadia himself again in his Yeẓirah Commentary, and then, not only by later poets, but by writers on jurisprudence. Of examples may be adduced here the "Ma'amar ha-Sekel" by an unknown author, and the cabalist Ezra-Azriel in his commentary upon the Song of Solomon. The attempt to establish such a derivation was rendered all the more alluring by the discovery of the fact that the individual letters contained in the Decalogue number 620, thus corresponding to the 613 precepts and the seven additional ones mentioned above. For further references, see Zunz, "Literaturgeschichte," p. 95, and Steinschneider, "Hebr. Bibl." vi. 125.

Poetical Form.

As regards the poetical form of the Azharot there is little to be said. The oldest pieces אזהרת ראשית and אתה הנחלת are extremely simple in composition; the verses, which contain the alphabet in acrostic fashion, are two-membered and bare of all poetic adornment, such as rime, meter, etc. Rime appears later; and a division into strophes becomes general; the alphabet, both in its usual order and inverted (ת״ש ר״ק), being given acrostically, as is also the name of the writer. Saadia's composition is more artificial, in that he not only uses the opening words of each article of the Decalogue, but interweaves therewith phrases from the Song of Solomon and from the eight verses of Psalm lxviii., which are associated by the Talmudists with the Pentecost festival. The construction of these compositions is fully treated by Zunz, Sachs, and Landshuth. Saadia's "613 precepts" are less artificial in construction, but possess rime, strophes, and refrain.

Gabirol uses four-membered strophes, the first three of which have changing rimes of their own; the fourth, a rime running through the poem. Tchelebi's Azharot are also metric, although halting in many places; Tamar, whose Azharot are metrical and resemble Gabirol's in construction, endeavors to find excuse for the halting measure of his predecessors (Steinschneider, "Cat. Leyden," p. 396). Isaac b. Reuben closes his strophes most cleverly with a verse from the Bible, greatly to the admiration of Al-Ḥarizi, who was himself an adept in the ingenious application of Biblical passages. The same is true of the Azharot of Elijah ha-Zaḳen, whose Azharot consist of 176 four-membered strophes with alphabets (backward as well as forward) and frequent interweaving of names as acrostics.

That such poems can not possess poetic value is natural: the style is too stiff; in form it must be didactic; and every deviation or imaginative flight is barred. Their dry enumeration of the precepts indeed would compel the characterization which they receive from Jair Hayyim Bacharach (Responsa, No. 51, applied to special Azharot, see below); namely, that they read like a chapter from the Mishnah, save that their form and a certain choice of expression in the earliest attempts remind one that they are to be considered as poetical compositions. Fine passages are nevertheless to be found in the opening or introductory poems (פתיחה. פזמון) and in the closing verses. These poetical efforts were usually provided by the authors of the Azharot themselves; but in some cases they have been added by others; as, for instance, the introduction to Gabirol's Azharot, written by David b. Eleazar Pakudah, and the poems introducing the affirmative and the negative precepts, respectively, in Kimhi's Azharot, written by Levi b. Gershon.

Protest Against Azharot.

In the Liturgy.

As was to be expected, these poetical embodiments of the 613 precepts were at intervals met with the same violent remonstrance which greeted the computation of the number 613 for the precepts. Abraham ibn Ezra ("Yesod Moreh," gate 2, end) remarks that the authors of Azharot in general resemble a man who counts the various medicinal herbs enumerated in medical works without knowing anything of their virtues. Maimonides also expresses his disapproval (Introduction to "Sefer ha-Mizwot"); but he excuses the authors as being "poets and not rabbis." Dukes quotes from a Mahzor commentary that the Mayence sages express themselves against the Azharot אתה הנחלת because various Biblical commands are therein omitted ("Literaturblatt des Orients," 1843, col. 714). Moses Bödingen (Mahzor, ed. Metz, 1817) gives a list of the precepts omitted in these Azharot, and supposes that the author must have written ten sections, of which two were lost. As early as the Tosafot (Yoma 8*a*; B. B. 145*b*; Nid. 30*a*) attention was drawn to the fact that Elijah ha-Zaken had not been sufficiently careful in harmonizing his statements with the Halakah. Many similar protests might be adduced; but they all did not avail to prevent the incorporation of the Azharot in the rituals of all countries, where indeed they have maintained their position to this day. It was for the Feast of Weeks (Pentecost) especially, commemorating the Revelation on Sinai, that the Azharot were particularly intended; and they were recited in the Musaf (Additional) Prayer of that day. In some localities—probably at a later date, and in order not to prolong unduly the morning service—the Azharot were relegated to a position either before or after the Minhah (afternoon) service. When the Sabbath before this festival came to receive more regard, like the so-called "Great Sabbath" immediately before the Passover, Azharot were read on it also. Originally, the אזהרת ראשית were read upon the first day of the festival in Italy (Rome), Greece (Romania), Germany, Poland, Lorraine, and probably also in France. Later these were generally displaced by the Azharot אתה הנחלת, but retained their places in Rome and Greece, though not in the first edition of the Mahzor Romania. In the German and Polish ritual the Azharot were postponed until the second day; while in France they were completely displaced by the Azharot of Elijah ha Zaken. The אתה הנחלת is the form retained in the German and Polish ritual for the first day of the festival and in the first edition of the Mahzor Romania; in Rome only the first "Alphabet" is used on the second day. The whole of it was there read in former times on the Sabbath before the festival, but later on was displaced by Gabirol's Azharot. Saadia's compositions are contained in his "Siddur" and also in the siddur of Solomon Sigelmessi. Gabirol's Azharot were customarily read in Spain, Provence, Avignon, Palestine, Fez, Yemen, and to some extent in Algiers, and are found in the liturgy of the second day of the festival in the first edition of the Mahzor Romania. Albargeloni's Azharot are contained in the rituals of Constantine, Tlemçen, Tunis, Morocco (for the afternoon service), Algiers, and Oran; those of Elijah ha-Zaken in France and, earlier, in Germany. The Azharot of Isaac Kimhi are set down in the Mahzor Carpentras (Amsterdam, 1759) for the afternoon service, as they were also in Avignon. Tchelebi's Azharot and those of Tamar and Egozi are printed in the Mahzor Romania, and those of Elijah Adeni, strangely enough, in the Mahzor Cochin (China) for the Eighth Day of Solemn Assembly ("Shemini 'Azeret").

Commentaries.

Owing to their condensed style and didactic form, it is not to be wondered at that the Azharot required commentaries; indeed, some of the later authors themselves recognized this need and supplied them; as, for instance, Tamar and Joshua Benveniste. Explanations of the Azharot are therefore to be found in such Mahzors as aim at giving a commentary, and also separately in many varieties, of which a few may be mentioned here. Azharot ראשית were commented upon by Eleazar b. Nathan and Samuel b. Kalonymus. Albargeloni's Azharot were similarly dealt with by Moses Muesi (ייטיר מיטה) and Saul ibn Musa ha-Kohen (נתיב מצותיך). Gabirol's Azharot, however, have always been favorite subjects for commentation; thus, Moses ibn Tibbon, Isaac Kimhi, Isaac b. Todros, Simon b. Zemach Duran (זהר הרקיע), Joseph ha-Lo'ëz (Barbaro), Moses Pesante or Pisanti (נר מצוה), Jacob (Israel) Hagis (פתיל תכלת), Saul ibn Musa ha-Kohen (נתיב מצותיך), Elia Benamozeg, and numerous others. Translations, however, are rather rare. (On a Persian translation, see "Jewish Quarterly Rev." x. 593, and M. Seligsohn, in "Revue Etudes Juives," xliii. 101; concerning a Judæo-Spanish translation of Gabirol's Azharot and Shabbethai Wita's מיטבת נפיש, compare M. Greenbaum, "Jüd.-Span. Chrestomathie," pp. 37, 109.) Many commentaries on the Azharot of Elia ha-Zaken are extant in manuscript form.

Later Elaborations.

Besides the above-mentioned Azharot there are a number of poetical elaborations of the same material, which, however, are not called Azharot, nor are they incorporated in any ritual. Some of them are older than many of the later Azharot proper. The following may be enumerated in alphabetical order: דת יקותיאל by Jekuthiel Süsskind;

חרוזות נפלאות, by Mannes Ḥayyot; יד אברהם, by Abraham Gablai Isidro; יריעות עזים, by Samson b. Samuel Yerushalmi; כתר תורה, by David b. Solomon Wital; כתר תורה, by M. J. Stern; מעין החכמה, by Noah Ḥayyim Ẓebi Berlin; פתגם המלך, by Uri Phœbus b. Aryeh Löb (Breslau?); שירי מצות, by Jonathan Eybeschütz; שירת מצוה, by Moses b. Mordecai Meisels; שער השמים, by Jacob b. Sheshet; תרי"ג מצות בחרוזים, by Moses b. Abraham Mat; furthermore a poem by the younger Gershom Ḥefez, in which he recited the precepts in Maimonides' enumeration (in the first edition of the יד חרוזים).

Special Azharot.

In addition to Azharot which treat of all the precepts, there arose in the Middle Ages a species of Azharot which confined themselves to only one precept in all its details, or to a chain of precepts referring to one subject. They were intended for recital on the great Sabbath before Passover, or on the Sabbath immediately before one of the other festivals, and on similar occasions. They accordingly devote themselves to the consideration of the regulations for Passover, of the precepts concerning the shofar, the tabernacle, the citron and palm branch, the fringes, the tefillin, and similar matters, as well as the regulations for Ḥanukkah and Purim. This is not the place to consider the special Azharot; they belong to the halakic piyyuṭ (see PIYYUṬ).

AZIEL ("God is my strength"): A Levite singer in the Temple; assistant to Asaph, Heman, and Ethan (I Chron. xv. 20). In I Chron. xv. 18 he is called "Jaaziel." The name of the gens **Azieli** is found in I Chron. xxvi. 23.

J. JR. G. B. L.

AẒILUT (אצילות): Cabalistic term for "emanation" or "eradiation"; but philosophical authors prefer "shefa'" or "hashpa'ah." The word is derived from "aẓal" in reference to Num. xi. 17; and in this sense it was taken over into the Cabala from Solomon ibn Gabirol's "Meḳor Ḥayyim" (The Fountain of Life), which was much used by cabalists. The theory of emanation, which is conceived as a free act of the will of God, endeavors to surmount the difficulties that attach to the idea of creation in its relation to God. These difficulties are threefold: (1) the act of creation involves a change in the unchangeable being of God; (2) it is incomprehensible how the absolutely infinite and perfect being could have produced such imperfect and finite beings; (3) a *creatio ex nihilo* is difficult to imagine. The simile used for the emanation is either the soaked sponge that emits spontaneously the water it has absorbed, or the gushing spring that overflows, or the sunlight that sends forth its rays—parts of its own essence—everywhere, without losing any portion, however infinitesimal, of its being. Since it was the last-named simile that chiefly occupied and influenced the cabalistic writers, Aẓilut must properly be taken to mean "eradiation" (compare Zohar, Exodus Yitro, 86*b*).

Later on the expression "Aẓilut" assumed a more specific meaning, influenced no doubt by the little work, "Masseket Aẓilut." Herein for the first time (following Isa. xliii. 7: "I have created"; "I have formed"; "I have made"; בראתיו, יצרתיו, עשיתיו), the four worlds are distinguished: Aẓilah, Beriah, Yeẓirah, and 'Asiyah. But here too they are transferred to the region of spirits and angels: In the Aẓilah-world the Shekinah alone rules; in the Beriah-world are the throne of God and the souls of the just under the dominion of Akatriel ("Crown of God"); in the Yeẓirah-world are the "holy creatures" (ḥayyot) of Ezekiel's vision, and the ten classes of angels ruled over by METATRON; and in the 'Asiyah-world are the Ofanim, and the angels that combat evil, governed by Sandalphon. The Zohar apparently did not know of this fourfold world; for there Aẓilut is taken to be simply the direct emanation of God, in contradistinction to the other emanations derived from the Sefirot.

Moses Cordovero and Isaac Luria (sixteenth century) were the first to introduce the fourfold world as an essential principle into cabalistic speculation. According to this doctrine the Aẓilah-world represents the ten Sefirot; the Beriah-world (world of creation) the throne of God, emanating from the light of the Sefirot; the Yeẓirah-world (world of becoming) the ten classes of angels, forming the halls for the Sefirot; and the Asiyah-world (world of making, that is, of form) the different heavens and the material world. In contradistinction to the Aẓilah-world, which constitutes the domain of the Sefirot, the three other worlds are called by the general name "Pirud" (עולם הפירוד). Later cabalists explain "Aẓilut" (according to Ex. xxiv. 11, and Isa. xli. 9) as meaning "excellence," so that according to them the Aẓilah-world would mean the most excellent or highest world.

K. P. B.

AZMAVETH: 1. The Barhumite; one of the thirty heroes of David (II Sam. xxiii. 31; I Chron. xi. 33). His sons joined David at Ziklag (I Chron. xii. 3).

2. A Benjamite; son of Jehoadah (I Chron. viii. 36, ix. 42).

3. Son of Adiel, who had charge of the treasuries of King David (I Chron. xxvii. 25).

4. A town in Benjamin, whence some returned from captivity along with Zerubbabel (Ezra ii. 24; Neh. xii. 29). In Neh. vii. 28, which corresponds to Ezra ii. 24, it is called "Beth-azmaveth."

J. JR. G. B. L.

AZORES: Group of islands in the Atlantic ocean, northwest of Africa, belonging to Portugal. It was a place of refuge for the Jews expelled from that country. At present Ponta Delgada, the capital of the island of São Miguel, Fayal, Terceira, and other islands have some Jewish inhabitants. These are engaged in exporting goods. They keep the Jewish religious observances, but intermarry with Catholics. Christian women, when marrying Jews, often enter the fold of Judaism.

G. M. K.

AZOTUS: **1.** The equivalent of Ashdod; found in the Apocrypha (Judith ii. 28; I Macc. iv. 15, etc.) and in the New Testament (Acts viii. 40).

2. Mount of Azotus (I Macc. ix. 15), where Judas Maccabeus was killed. It is perhaps identical with **1.**

s. G. B. L.

AZOV (Turkish, **Azak**): A town in the government of Ekaterinoslav, Russia, on the left bank of the Don, about twenty-four miles from Rostov and five miles from the sea. In ancient times it was an important business center, belonging to Greece and known under the name of "Tanais." The Pontic king Mithridates conquered it in 115 B.C.; in the fourth century of the common era it was destroyed by the Huns; and in the eighth century it was rebuilt and passed into the possession of the Chazars. In the twelfth century, when Azov was a store-city for the trade with Indo-China, the Genoese carried on a considerable trade there, at first recognizing the sovereignty of the Polovtzy, whom in the thirteenth century they drove out; and in 1471 they themselves were conquered by the Turks, who in 1637 were for a short time subject to the Cossacks. Since 1736 Azov has belonged to Russia.

Jews have lived in Azov since they began to settle in the Crimea and in the neighboring provinces, probably in the first century B.C. In the time of the Chazars they were largely interested in the commerce of Azov with Constantinople and Dankov. From the latter the Russian products were transported down the Don to Azov, and all imported merchandise was forwarded from Azov to Dankov.

Azov is mentioned in an epigraph on the first page of a Pentateuch written in Azak, stating that one Shabbethai, son of Isaac, during his illness, on the twenty-ninth of Marheshwan, 5035 [1274], presented this Bible (twenty-four books) to the "Karaite Synagogue in Kirim" (D. Chwolson, "Yevreiskie Nadpisi," p. 217, St. Petersburg, 1884). Another epigraph, written on a board in the Karaite synagogue in Theodosia in 1404, relates to Isaac, son of Moses, and Sarah, daughter of Moses, and to the mother of their mother, Kellah of Azak (Azov), who "have put up this board in the synagogue of the community of Kaffa, the community of the Karaites" (*ib.* p. 209).

Of the 25,488 inhabitants in 1892, about 600 were Jews, who had a synagogue and a Talmud Torah.

H. R.

AZRIEL ("God is my help"): **1.** Father of one of the men deputed by Jehoiakim to capture Baruch, the scribe of Jeremiah (Jer. xxxvi. 26).

2. Chief of one of the families of Manasseh, living on the eastern side of the Jordan (I Chron. v. 24).

3. Father of Jerimoth, the leader of Naphtali at the time that David numbered the people (I Chron. xxvii. 19).

J. JR. G. B. L.

AZRIEL B. ḤAYYIM TRABOTTA. See Trabotta.

AZRIEL (EZRA) BEN MENAHEM (BEN SOLOMON): Founder of the speculative Cabala, and called "The Saint"; born at Gerona in 1160; died in 1238. As to the identity of Azriel and Ezra, taken for two brothers by Grätz ("Gesch." vii. 447 *et seq.*) and Bloch (Winter and Wünsche, "Jüd. Literatur," iii. 261), compare Jellinek ("Beiträge zur Geschichte der Kabbala," i. 41; Landauer, "Lit.-Bl." vi. 196; and Michael, "Or ha-Ḥayyim," No. 1151). Attracted by the mystical studies that had begun to spread in Spain, Azriel went early to southern France, and became there a pupil of the celebrated cabalist Isaac the Blind, the son of Abraham of Posquières. Later he left France and traveled all over Spain, making propaganda for the Cabala. He endeavored to win the philosophers over to his mystic views, but did not succeed, as he himself confesses in the introduction to his commentary upon the Ten Sefirot. "For," says he, "the philosophers believe in nothing that can not be demonstrated logically." He came back disappointed to Gerona, and there founded a school in which Naḥmanides received Azriel's cabalistic instruction, as is stated by Abraham Zacuto ("Yuḥasin"), Meïr ibn Gabbai, Ibn Yaḥya ("Shalshelet ha-Ḳabbalah"), and others (see Grätz, *l.c.*). Azriel wrote a commentary on the Ten Sefirot in the form of questions and answers, following therein the speculative method of philosophy (edited by N. A. Goldberg, Berlin, 1850). Its title, not given by the editor, was "Ezrat Adonai" (see Grätz, *l.c.*, following S. Sachs). He also wrote a commentary on "Shir ha-Shirim," ascribed often to Naḥmanides, published under his name (Altona, 1764), in which the 613 commandments are explained mystically as based upon the Decalogue. Azriel was, further, the author of a commentary on "Sefer Yeẓirah," entitled "Sefer ha-Milluïm," which was likewise ascribed to Naḥmanides, and published under his name in Mantua, 1719. Besides these he seems to have written a cabalistic commentary on the prayers, and a hymn with his name "Ezra" as acrostic. His system rests chiefly on his Neoplatonic conception of God as the "En Sof," the Endless One, Gabirol's "En lo Tiklah" (compare Joel, "Beiträge zur Geschichte der Philosophie," Appendix, p. 12, "Lewi ben Gerson," 1862.

His Doctrine of God.

God, he contends, can be determined only in a negative way; what He is not can alone be ascertained; not what He is. All positive attributes bear the stamp of sensualism. The Being that is the originator of all things can have no intention, desire, thought, word, or action. He is infinite; the negation of all negations; the Endless.

After having stated this strange conception of God, Azriel investigates the relation of this En-Sof to the universe. Has the universe been created from nothing? No. Aristotle is perfectly right in saying that nothing can proceed from nothing. Moreover, creation implies a decrease in the Creator's essence through subtraction, and that can not be predicated of the En-Sof. Nor can the universe have existed eternally, as Aristotle asserts, because nothing is eternal save God. Accordingly, the Platonic idea of a primary matter is not acceptable either. Azriel, in order to solve the problem of creation, has recourse to the theory of emanation, which he develops as follows:

The universe, with all its multifarious manifestations, was latent in the essence of the En Sof, in which, notwithstanding its infinite variety, it formed an absolute unit, just like the various sparks and colors that proceed from the one and indivisible flame potential in the coal. The act of creation did not consist in producing an absolutely new thing; it was merely a transformation of potential existence into realized existence. Thus there was really no creation, but an efflux (see AẒILUT). The effluence was effectuated through successive gradations from the intellectual world to the material, from the indefinite to the definite. This material world, being limited and not perfect, could not proceed directly from the En Sof; neither could it be independent of Him; for in that case He would be imperfect. There must have been, therefore, intermediaries between the En Sof and the material world; and these intermediaries were the Ten Sefirot. The first Sefirah was latent in the En Sof as a dynamic force; then the second Sefirah emanated as a substratum for the intellectual world; afterward the other Sefirot emanated, forming the moral, the material, and the natural worlds. But this fact of emanation does not imply a *prius* or a *posterius* or a gradation in the En Sof—a candle, the flame of which is capable of igniting an indefinite number of lights, although, in itself, it is a unit. The Sefirot, according to their nature, are divided into three groups: the three superior forming the world of thought, the next three the world of soul, the last four the world of corporeality. They all depend upon one another, being united like links to the first one. Each of them has a positive and a passive quality—emanating and receiving. The first Sefirah is called by Azriel not Keter, as the later cabalists call it, but Rum Ma'alah. Grätz (*l.c.*) thinks that Azriel meant by that term Ibn Gabirol's "Will" ("Ḥefeẓ")—the highest dynamic force of the Deity. Indeed, Azriel's contemporary, Jacob ben Sheshet, called the first Sefirah Raẓon ("Will"). The second and third Sefirah were Ḥokmah and Binah; the fourth, fifth, and sixth, Ḥesed, Paḥad, and Tiferet; the seventh, eighth, and ninth, Neẓaḥ, Hod, and Yesod 'Olam; and the tenth, Ẓedeḳ. These Ten Sefirot were put by Azriel into correspondence to the ten parts of the human organism and to the ten different refractions of light.

The whole system, with the exception of the theory of the Sefirot, is derived from Ibn Gabirol's "Meḳor Ḥayyim," which Azriel imitated, even as to its form, in arranging his commentary upon the Ten Sefirot, by putting it into questions and answers as Gabirol did. Azriel, however, had the merit of affording some guidance in the labyrinth of mysticism.

AZRIEL B. MOSES HA-LEVI. See ASHKENAZI, AZRIEL B. MOSES LEVI.

AZRIEL BEN MOSES MESHEL, OF WILNA: Grammarian; lived at the end of the seventeenth and at the beginning of the eighteenth century. About 1700 he left his native town, Wilna, and settled with his family at Frankfort-on-the-Main. There he published, in 1704, in collaboration with his son Elijah, a prayer-book entitled "Derek Siaḥ ha-Sadeh" (The Way of the Plant of the Field; Gen. ii. 5), according to the method of Shabbethai Sofer of Przemysl, with a commentary, "Miḳra Ḳodesh" (Holy Reading), containing the rules for punctuation and reading. A second edition of this prayer-book, with a German introduction, refuting the criticisms of Solomon Hanau on the first edition, was published by Azriel at Berlin in 1713, and a third at Wilhelmsdorf in 1721.

He published also: "Pilpula Ḥarifta" (Keen Discussions), novellæ on the order Neziḳin by Yom-Ṭob Lipmann Heller; and "Ma'amadot," recitations after the reading of the Psalms, by Menahem Lonzano, with additions of his own.

BIBLIOGRAPHY: Fuenn, *Ḳiryah Ne'emanah*, p. 102.

AZRIEL B. YEHIEL ASCOLI. See TRABOTTA FAMILY.

AZRIKAM: 1. Ancestor of a Levite residing in Jerusalem in the time of Nehemiah (Neh. xi. 15 = I Chron. ix. 14).

2. Son of Neariah, occurring in the list of the descendants of David (I Chron. iii. 23).

3. Son of Azel in the genealogical list of Benjamin, descended from Saul (I Chron. viii. 38 = ix. 44).

4. Governor of the palace under Ahaz, king of Judah; he was killed by Zichri, an Ephraimite (II Chron. xxviii. 7).

J. JR. G. B. L.

AZUBAH: 1. Daughter of Shilhi and mother of Jehoshaphat, king of Judah (I Kings xxii. 42 = II Chron. xx. 31).

2. Wife of Caleb, the son of Hezron (I Chron. ii. 18, 19).

J. JR. G. B. L.

AZUBIB, JOSEPH B. NEHORAI: Rabbi at Algiers; died at Blida, Algeria, January, 1794. At an early age he assisted his father in his duties as rabbi of Algiers; and at the death of the latter succeeded him. He published a work under the title "Yamim Aḥadim" (Some Days), containing sermons for all the feasts; preceded by a preface written by the bibliographer Azulai (Leghorn, 1790). Azubib signed one of the approbations attached to the work "Berit Abraham" of Abraham ben Raphael Jacob Bush'arah, Leghorn, 1791.

G. I. BR.

AZUBIB, NEHORAI B. SAADIA: Rabbi at Algiers; died October, 1785. He composed several prayers for the anniversary instituted by the community in commemoration of the repulse of O'Reilly's expedition against Algiers in 1775. Some Arabic poems of his figure in the collection "Shibhe

Elohim" (God's Praises), p. 173, published at Oran. Azubib wrote also a short commentary on the "Kerobez"—collection of hymns contained in the ritual of Algiers, and published at Leghorn. Azubib was celebrated for his disinterestedness. According to Loeb ("Rev. Et. Juives," i. 74) the name אזוביב is the same as אזובי.

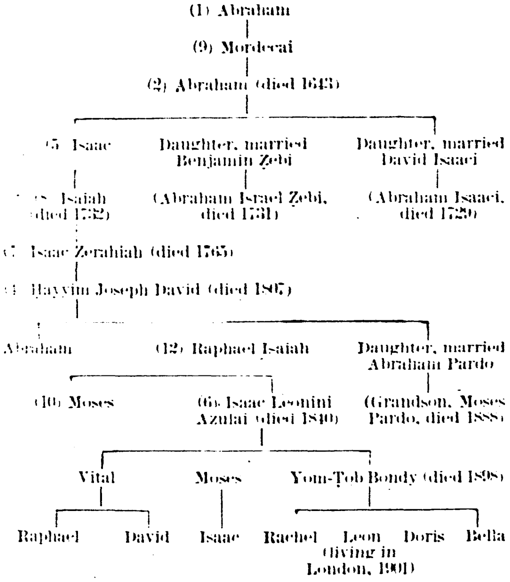
AZULAI, AZULAY: A family descended from Spanish exiles who, after the expulsion of the Jews from Spain in 1492, settled in the city of Fez, Morocco. Hayyim Joseph David Azulai (see No. 4) derives the family name from the initials of the Hebrew words אשה זנה וחללה לא יקחו ("They shall not take a woman that is a harlot, or profane," Lev. xxi. 7). This derivation, however, is not at all probable, and it is to be presumed that the name refers to a locality in Morocco or in Spain. The following genealogical tree gives the principal members of the family:



(1) Abraham
(9) Mordecai
(2) Abraham (died 1643)
(5) Isaac
Daughter, married Benjamin Zebi
Daughter, married David Isaaci
(8) Isaiah (died 1732)
(Abraham Israel Zebi, died 1731)
(Abraham Isaaci, died 1720)
(7) Isaac Zerahiah (died 1765)
(4) Hayyim Joseph David (died 1807)
Abraham
(12) Raphael Isaiah
Daughter, married Abraham Pardo
(10) Moses
(6) Isaac Leonini Azulai (died 1840)
(Grandson, Moses Pardo, died 1888)
Vital
Moses
Yom-Tob Bondy (died 1898)

(living in London, 1901)

1. Abraham Azulai: Grandfather of Abraham (No. 2), who speaks of him as having lived in Fez.

2. Abraham Azulai: Cabalistic author and commentator; born in Fez about 1570; died at Hebron Nov. 6, 1643. The expulsion of the Moors from Spain brought a great number of the exiles to Morocco, and these newcomers caused a civil war from which the country in general and the Jews in particular suffered greatly. Abraham Azulai, in consequence of this condition of affairs, left his home for Palestine and settled in Hebron. There he wrote a commentary on the Zohar under the title "Kirjath Arba" (City of Arba; Gen. xxiii. 2). The plague of 1619 drove him from his new home; and while in Gaza, where he found refuge, he wrote his cabalistic work "Hesed le-Abraham" (Mercy to Abraham; Micah vii. 20). It was published after the author's death by Meshullam Zalman ben Abraham Berak of Gorice, in Amsterdam, 1685. Another edition, published in Sulzbach in the same year, seems to be a reprint, although Steinschneider, in "Cat. Bodl." col. 666, thinks the reverse. Azulai's commentary on the Zohar, "Zohore Hammah" (Rays of the Sun), was printed in Venice, 1654. He also wrote: "Or ha-Lebanah" (Light of the Moon), "Ma'asse Hosheb" (Cunning Work), and "Kenaf Renanim" (Peacock's Wing).

Of the numerous manuscripts that he left and that were in the hands of his descendant, Hayyim Joseph David (No. 4), some are still extant in various libraries. Only one was published, a cabalistic commentary on the Bible, under the title "Ba'ale Berit Abraham" (Abraham's Confederates; see Gen. xiv. 13), Wilna, 1873. His most popular work, "Hesed le-Abraham," referred to above, is a cabalistic treatise with an introduction, אבן השתיה ("The Cornerstone"; see Talmud Yoma 53*b*), and is divided into seven "fountains" (see Zech. iii. 9), each fountain being subdivided into a number of "streams." The contents of the work are hardly different from the average vagaries found in cabalistic books, as evidenced by the following specimen from the fifth fountain, twenty-fourth stream, p. 57*d*, of the Amsterdam edition:

> "On the mystery of metempsychosis and its details: Know that God will not subject the soul of the wicked to more than three migrations; for it is written, 'Lo, all these things doth God work twice, yea thrice, with a man' (Job xxxiii. 29). Which means, He makes him appear twice and thrice in a human incarnation; but the fourth time he is incarnated as a clean animal. And when a man offers a sacrifice, God will, by miraculous intervention, make him select an animal that is an incarnation of a human being. Then will the sacrifice be doubly profitable: to the one that offers it and to the soul imprisoned in the brute. For with the smoke of the sacrifice the soul ascends heavenward and attains its original purity. Thus is explained the mystery involved in the words, 'O Lord, thou preservest man and beast' (Ps. xxxvi. 7 [R. V. 6])."

Bibliography: Azulai, *Shem ha-Gedolim*, s.v.; Benjacob, *Ozar ha-Sefarim*, p. 196; Fürst, *Bibliotheca Judaica*, i. 67; Michael, *Or ha-Hayyim*, p. 12.

3. Abraham Azulai, called "the illustrious cabalist": Rabbi and author; born in the city of Morocco; died there about 1745. He was popularly supposed to possess miraculous powers. He is the author of a Hebrew work upon the Cabala, "Mikdash Melek," a commentary upon the Zohar.

Bibliography: Azulai, *Shem ha-Gedolim*, s.v.

4. Hayyim Joseph David Azulai: Son of Isaac Zerahiah (No. 7); one of the most prolific of rabbinic authors in the eighteenth century, and a pioneer writer on the history of rabbinical literature; born in Jerusalem about 1724; died at Leghorn March 21, 1807. He studied under Isaac ha-Kohen Rapoport, Jonah Nabon, and Hayyim ibn 'Attar. While in general a type of the Oriental rabbi of his age, a strict Talmudist, and a believer in the Cabala, his studious habits and stupendous memory awakened in him an interest in the history of rabbinical literature and in its textual criticism. He accordingly began at an early age a compilation of passages in rabbinical literature in which dialectic authors had tried to solve questions that were based on chronological errors. This compilation he called העלם דבר ("Some Oversights"). It was never printed.

His Early Scholarship.

Azulai's scholarship made him so famous that in 1755 he was chosen as meshullaḥ (emissary), an honor bestowed on such men only as were, by their learning, well fitted to represent the Holy Land in Europe, where the people looked upon a Palestinian rabbi as a model of learning and piety. He traveled in this capacity through Italy, France, Germany, and Holland. On his return to Palestine he settled in Hebron, where his ancestor Abraham Azulai (No. 2) had first settled when he came to Palestine. Joseph David Sinzheim, in a eulogy on Azulai, states that the latter left Palestine three times on his missions, in 1755, 1770, and 1781. His diary and his other works are, however, not clear on this point. In 1755 he was in Germany, in 1764 in Egypt, and in the year 1773 in Tunis, Morocco, and Italy, in which latter country he seems to have remained until 1777, most probably occupied with the printing of the first part of his biographical dictionary, "Shem ha-Gedolim," Leghorn, 1774, and with his notes on the Shulḥan 'Aruk, entitled "Birke Yosef," Leghorn, 1774-76. In 1777 he was in France, and in 1778 in Holland. On October 28 of the latter year he married, in Pisa, his second wife, Rachel; his first wife, Sarah, had died in 1773. Noting this event in his diary, he adds the wish that he may be permitted to return to Palestine. This wish seems not to have been realized. At all events he remained in Leghorn, occupied with the publication of his works.

Azulai's literary activity is of an astonishing breadth. It embraces every department of rabbinical literature: exegesis, homiletics, casuistry, Cabala, liturgics, and literary history. The last is, as has already been stated, the only department in which he was original. A voracious reader, he noted all historical references; and on his travels he visited the famous libraries of Italy and France, where he examined the Hebrew manuscripts.

His "Shem ha-Gedolim."

His notes were published in four booklets, comprising two sections, under the titles "Shem ha-Gedolim" (The Name of the Great Ones), containing the names of authors, and "Wa'ad la-Ḥakamim" (Assembly of the Wise), containing the titles of works. They were, however, so unsystematically arranged that the mass of facts contained therein was of little value until Isaac Benjacob, in 1852, published the work systematically arranged, with copious cross-references. This treatise has established for Azulai a lasting place in Jewish literature. It contains data that might otherwise have been lost, and it proves the author to have had a critical mind, except when touching cabalistic doctrines. By sound scientific methods he investigated the question of the genuineness of Rashi's commentary to Chronicles or to some Talmudic treatise (see "Rashi," in "Shem ha-Gedolim"). Nevertheless he firmly believed that Ḥayyim Vital had drunk water from Miriam's well, and that this fact enabled him to receive, in less than two years, the whole Cabala from the lips of Isaac Luria (see "Ḥayyim Vital," in "Shem ha-Gedolim").

His Superstition.

The amount of blind superstition found in his diary and other works is almost incredible in a man of such admirable critical ability; and his liturgical works have greatly helped to make this superstition general. In his diary he notes all the cabalistic recipes found by him in manuscripts, and gives many instances of the miraculous effects of his prayers. In his religious attitude he is a strict rigorist. He discusses the question of early burial, which he recommends chiefly on the ground of the cabalistic doctrine that the delay of burial occasions suffering to the dead, and actually writes: "If it should happen in one case out of ten thousand that one would be buried alive, this would not be the slightest sin; for it was so foreordained in order to avoid the evil that would result to the world from this man or his posterity" ("Ḥayyim Sha'al," i. 25).

Azulai's exegetical works are of the same character, being filled with interpretations of numerals and of casuistic methods. Instances of this kind are found on every page of his "Ḥomat Anak" (Wall Made by a Plumb-Line: Amos vii. 7) and in his commentary to the Psalms, entitled "Yosef Tehillot" (To Add Praise), Leghorn, 1794.

His Works.

As a writer Azulai was most prolific. The list of his works, compiled by Benjacob, runs to seventy-one items; but some are named twice, because they have two titles, and some are only small treatises. Still, his activity was marvelous. The veneration bestowed upon him by his contemporaries was that given to a saint. He reports in his diary that when he learned in Tunis of the death of his first wife, he kept it secret, because the people would have forced him to marry at once. Legends printed in the appendix to his diary, and others found in Walden's "Shem ha-Gedolim he-Ḥadash" (compare also "Ma'aseh Nora," pp. 7-16, Podgoritza, 1899), prove the great respect in which he was held. Even to-day a great many Oriental and Polish Jews undertake pilgrimages to his grave or send letters to be deposited there.

Azulai left two sons, Abraham and Raphael Isaiah (No. 12). Of the former nothing is known.

Bibliography: A complete bibliographical list of his works is found in the preface to Benjacob's edition of *Shem ha-Gedolim*, Wilna, 1852, and frequently reprinted; Carmoly, in the edition of *Shem ha-Gedolim*, Frankfort-on-the-Main, 1843; Fuenn, *Keneset Yisrael*, p. 342; Hazan, *Hama'alot li-Shelomoh*, Alexandria, 1894; Walden, *Shem ha-Gedolim he-Ḥadash*, 1879; and the diary *Ma'agal Tob*, edited by Elijah Benamozegh, Leghorn, 1879; Michael, *Or ha-Ḥayyim*, No. 88.

L. G. D.

5. Isaac Azulai: Noted cabalist; lived at Hebron in the seventeenth century; son of Abraham (No. 2). He wrote "Zera' Yiẓḥaḳ" (The Seed of Isaac), a cabalistic work, now lost. He died at Constantinople, presumably while traveling as an emissary for the congregations of the Holy Land. Isaac had two sisters. One married **Benjamin Ẓebi** and was the mother of **Ḥayyim Abraham Israel Ẓebi**, who was rabbi in Hebron (died 1731) and the author of "Orim Gedolim" (The Great Lights)—a treatise on rabbinical law—and of "Yemin Mosheh" (The Right Hand of Moses), glosses to the Shulḥan 'Aruk (The Hague, 1777). The other became the wife of **David Isaaci**; and their son, **Abraham Isaaci** (died Jan. 10, 1729), was an eminent rabbi in Jerusalem and the author of responsa entitled "Zera' Abraham" (The Seed of Abraham), 2 vols., Constantinople, 1732, and Smyrna, 1733.

6. Isaac Leonini Azulay: Under the name "Joseph Leonini" (Leonini was the family name of his mother) he published in Berlin in 1794 a Spanish comedy, "El Delinquente Honrado," on the title-page of which he describes himself as "Teacher of Princess Augusta and in the gymnasium of Berlin." He is said to have traveled to Prague in order to study at the university there, but was robbed of his money and found himself stranded in Berlin, where he resorted to the teaching of languages to gain a livelihood. Azulay subsequently settled in London, where he married Bella Friedlaender, a cousin of Chief Rabbi Herschell. He died in that city July 17, 1840.

7. Isaac Zerahiah Azulai: Father of Ḥayyim Joseph David (No. 4). Died in Jerusalem Jan. 16, 1765.

8. Isaiah Azulai: Father of Isaac Zerahiah (No. 7) and grandfather of Ḥayyim Joseph David (No. 4). Died in Jerusalem March 3, 1732.

9. Mordecai Azulai: Father of Abraham (No. 2). Lived in Fez toward the end of the sixteenth century.

10. Moses Azulai: Son of Raphael Isaiah (No. 12). He edited some of his father's responsa in the collection "Zikron Mosheh" (Remembrance of Moses), Leghorn, 1830, and made an epitome of some of the works of his grandfather, Ḥayyim Joseph David (No. 4).

11. Nissim Zerahiah Azulai: Editor and annotator of Shabbethai Cohen's "Shulḥan ha-Ṭahor" (The Pure Table), a treatise on the 613 commandments, Safed, 1836. He perished in the earthquake at Safed Jan. 1, 1837.

12. Raphael Isaiah Azulai: Rabbi in Ancona, where he died about 1830. One of his daughters married Abraham, son of the renowned rabbi David Pardo; and her grandson Moses Pardo was rabbi of Alexandria from 1871 to 1888. He was the author of a number of responsa and decisions, which appeared partly under the title "Tiferet Mosheh" (The Splendor of Moses), and partly in the "Zikron Mosheh" of his son Moses (No. 10).

Bibliography: Azulai, *Shem ha-Gedolim*, s.v.; Zedner, *Cat. Hebr. Books British Museum*; Ḥazan, *Ha-Ma'alot li-Shelomoh*, 1894; *The Leisure Hour*, London, Aug., 1886; *Allg. Zeit. des Judenthums*, 1889, p. 60; private sources.

D. D.—A. P.

AZZUR or **AZUR: 1.** Father of Hananiah, a false prophet, contemporary with Jeremiah (Jer. xxviii. 1).

2. A leader who sealed the covenant with Nehemiah (Neh. x. 17).

3. Father of Jaazaniah, a prince of the people denounced by Ezekiel (Ezek. xi. 1 *et seq.*).

J. JR. G. B. L.

'AZZUT PANIM (עזות פנים, "brazen-facedness"): A term applied to an impudent person. The phrase "'az panim" occurs in Deut. xxviii. 50 ("a nation of fierce countenance"), and in Dan. viii. 23 ("a king of fierce countenance"). "The brazen-faced one goes to Gehenna, the shame-faced, or bashful, to Gan 'Eden," says R. Judah (Mas. Kallah, ii., and thence transferred to Abot v. 20; see Taylor, "Sayings of the Fathers," p. 96). "He who has not 'boshet panim' [bashfulness or shamefacedness], of a surety his ancestors stood not on Mount Sinai"; that is, he has not the pure blood of the Jewish race in him (Ned. 20*a*; compare Mek., Yitro, 9 on "His fear be upon your face that ye sin not," Ex. xx. 20). One of the characteristics of the Jewish people, next to their being compassionate and benevolent, is their bashfulness (Yeb. 79*a*). No greater insult can therefore be inflicted upon a Jew than to call him "'Azzut Panim," in dialect also "Azzes Pōnim." "Every priest that shows 'Azzut Panim is surely a descendant of the slaves of Pashhur, the son of Immer, the priest who smote the prophet Jeremiah and put him in stocks [Jer. xx. 1]; these slaves having intermarried with priestly houses" (Ḳid. 70*b*.) According to R. Eliezer, R. Joshua, and R. Akiba, an "'az panim" (shameless person) exposes himself to the suspicion of being the offspring of an incestuous marriage or of some forbidden connection ("mamzer," or "ben ha-niddah": Mas. Kallah, ii.). An "'az panim" may be called "rasha'" (wicked), in accordance with Prov. xxi. 29 ("A wicked man hardeneth his face"), or be hated, in accordance with Eccl. viii. 1 (which, with the reading "yesunne," means "the boldness of his face causeth him to be hated"). An "'az panim" is sure of falling a victim to sin, and it is on account of "'azze phanim" (the shameless) in the land that rain is withheld, according to Jer. iii. 3: "Therefore the showers have been withholden, . . . thou refusedst to be ashamed" (Ta'an. 7*b*).

At the close of his daily prayers Rabbi Judah ha-Nasi used to say: "May it be Thy will, O Lord our God and God of our fathers, to save us from ''azze phanim' [the shameless ones] and from ''azzut panim' [shamelessness], from an evil man, an evil plague," etc. (Ber. 16*b*)—a prayer which found a place in the daily morning prayer of the common liturgy.

Rabbi of the Congregation Emanu-El, San Francisco, Cal.; Professor of Semitic Languages and Literatures, University of California, Berkeley, Cal.

EDWARD J. WHEELER, M.A.,

Editor of "The Literary Digest," New York; Author of "Stories in Rhyme," etc.

FOREIGN BOARD OF CONSULTING EDITORS

ISRAEL ABRAHAMS, M.A.,

Coeditor of "The Jewish Quarterly Review"; Author of "Jewish Life in the Middle Ages," etc.; Reader of Rabbinic, Cambridge University, England.

W. BACHER, Ph.D.,

Professor in the Jewish Theological Seminary, Budapest, Hungary.

M. BRANN, Ph.D.,

Professor in the Jewish Theological Seminary, Breslau, Germany; Editor of "Monatsschrift für Geschichte und Wissenschaft des Judenthums."

H. BRODY, Ph.D.,

Rabbi, Nachod, Bohemia, Austria; Coeditor of "Zeitschrift für Hebräische Bibliographie."

ABRAHAM DANON,

Principal of the Jewish Theological Seminary, Constantinople, Turkey.

HARTWIG DERENBOURG, Ph.D.,

Professor of Literary Arabic at the Special School of Oriental Languages, Paris; Member of the Institut de France.

S. M. DUBNOW,

Author of "Istoriya Yevreyev," Odessa, Russia.

MICHAEL FRIEDLÄNDER, Ph.D.,

Principal of Jews' College, London, England; Author of "The Jewish Religion," etc.

IGNAZ GOLDZIHER, Ph.D.,

Professor of Semitic Philology, University of Budapest, Hungary.

M. GÜDEMANN, Ph.D.,

Chief Rabbi of Vienna, Austria.

BARON DAVID GÜNZBURG,

St. Petersburg, Russia.

A. HARKAVY, Ph.D.,

Chief of the Hebrew Department of the Imperial Public Library, St. Petersburg, Russia.

ZADOC KAHN,

Chief Rabbi of France; Honorary President of the Alliance Israélite Universelle; Officer of the Legion of Honor, Paris, France.

M. KAYSERLING, Ph.D.,

Rabbi, Budapest, Hungary; Corresponding Member of the Royal Academy of History, Madrid, Spain.

MORITZ LAZARUS, Ph.D.,

Professor Emeritus of Psychology, University of Berlin; Meran, Austria.

ANATOLE LEROY-BEAULIEU,

Member of the French Institute; Professor at the Free School of Political Science, Paris, France; Author of "Israël chez les Nations."

ISRAEL LÉVI,

Professor in the Jewish Theological Seminary; Editor of "Revue des Etudes Juives," Paris, France.

EUDE LOLLI, D.D.,

Chief Rabbi of Padua; Professor of Hebrew at the University, Padua, Italy.

IMMANUEL LÖW, Ph.D.,

Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

S. H. MARGULIES, Ph.D.,

Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

H. OORT, D.D.,

Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

ABBÉ PIETRO PERREAU,

Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

MARTIN PHILIPPSON, Ph.D.,

Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Jüdische Gemeindebund, Berlin, Germany.

SAMUEL POZNANSKI, Ph.D.,

Rabbi in Warsaw, Russia.

E. SCHWARZFELD, LL.D.,

Secretary-General of the Jewish Colonization Association, Paris, France.

LUDWIG STEIN, Ph.D.,

Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

HERMANN L. STRACK, Ph.D.,

Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

CHARLES TAYLOR, D.D., LL.D.,

Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise ' or by dieresis; e.g., Ze'eb or Meïr.*

ב	*b*	ז	*z*	ל	*l*	פּ	*with dagesh, p*	שׁ	*sh*
ג	*g*	ח	*ḥ*	מ	*m*	פ	*without dagesh, f*	שׂ	*s*
ד	*d*	ט	*ṭ*	נ	*n*	צ	*ẓ*	ת	*t*
ה	*h*	י	*y*	ס	*s*	ק	*ḳ*		
ו	*w*	כ	*k*	ע	'	ר	*r*		

NOTE: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

ָ	*a*	ֻ	*u*	ַ	*a*	ֱ	*e*	וֹ	o
ֵ	*e*	ֶ	*e*	ֳ	*o*	ִי	*i*		
ִ	*i*	ְ	*e*	ֲ	*a*	וּ	*u*		

Ḳameẓ ḥaṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ	*a*	خ	*kh*	ش	*sh*	غ	*gh*	ن	*n*
ب	*b*	د	*d*	ص	*ṣ*	ف	*f*	ه	*h*
ت	*t*	ذ	*dh*	ض	*ḍ*	ق	*ḳ*	و	*w*
ث	*th*	ر	*r*	ط	*ṭ*	ك	*k*	ي	*y*
ج	*j*	ز	*z*	ظ	*ẓ*	ل	*l*		
ح	*ḥ*	س	*s*	ع	'	م	*m*		

2. Only the three vowels—a, i, u—are represented:

َ *a* or *ā* ِ *i* or *ī* ُ *u* or *ū*

No account has been taken of the *imālah;* *i* has not been written *e*, nor *u* written *o*.

---

* In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al;* no account being taken of the assimilation of the *l* to the following letter; *e.g.*, *Abū al-Salt*, not *Abu-l-Salt; Nafīs al-Daulah*, not *Nafīs ad-Daulah.* The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah;* but, when followed by a genitive, *at; e.g.*, *Risālah dhāt al-Kursiyy*, but *Hī’at al-Aflāk.*

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g.*, *‘Amr*, not *‘Amru* or *‘Amrun; Ya‘akūb*, not *Ya‘akūbun;* or in a title, *Kitāb al-amānāt wal-‘itikādāt.*

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	*a*	Н н	*n*	Щщ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h*, *v*, or *g*	Р р	*r*	Ь ь	halfmute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.*, Moses Nigrin under *Nigrin;* Moses Zacuto under *Zacuto;* Moses Rieti under *Rieti;* all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi;* Israel ben Joseph Drohobiczer under *Drohobiczer.* Cross-references are freely made from any other form to the most specific one; *e.g.*, to Moses *Vidal* from Moses *Narboni;* to Solomon Nathan *Vidal* from Menahem *Meiri;* to Samuel *Kansi* from Samuel Astruc *Dascola;* to Jedaiah *Penini*, from both *Bedersi* and *En Bonet;* to *John* of Avignon from Moses de *Roquemaure.*

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g.*, *Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* ha-Ḥasid; *Gershom* of Metz, *Isaac* of Corbeil.

3. Names containing the word *d'*, *de*, *da*, *di*, or *van*, *von*, *y*, are arranged under the letter of the name following this word; *e.g.*, de Pomis under *Pomis*, de Barrios under *Barrios*, Jacob d'Illescas under *Illescas.*

4. In arranging the alphabetical order of personal names *ben*, *da*, *de*, *di*, *ha-*, *ibn**, *of* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Ze'eb
Abraham Benveniste

5. In order to facilitate reference, complete groups of all persons bearing such common names as Aaron, Abraham, Jacob, are given in small type in a group immediately under the first key-word.

---

* When IBN has come to be a specific part of a name, as IBN EZRA, such name is treated in its alphabetical place under "I."

LIST OF ABBREVIATIONS

[Self-evident abbreviations, particularly those used in the bibliography, are not included here.]

THE
JEWISH ENCYCLOPEDIA

BENCEMERO, or BEN ZAMAIRA, ABRAHAM: Mediator, in 1526, between the Moors and the governor of Saffee and Azamor, employed by the Portuguese. He lived at Azamor on the west coast of Africa. Abraham Cazan (Ḥazan), the most prominent Jew of that city, was also employed in the same capacity.

Bibliography: João de Souso, *Documentos Arabicos para la História Portugueza*, pp. 159 *et seq.*, Lisbon, 1790; Kayserling, *Gesch. der Juden in Portugal*, p. 161.

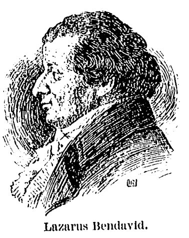
G. M. K.

BENCEMERO, ISAAC: Relative of Abraham Bencemero of Azamor; the deliverer of Nuno Fernandes d'Atayde, commander-in-chief of Saffee. When in 1511 this latter city was besieged and surrounded by an army of more than 100,000 men and Atayde was exposed to the greatest danger, Bencemero and a certain Ismael formed the bold plan of bringing assistance to the Portuguese. At their own expense they fitted out two vessels, manned them with co-religionists, and sailed to Saffee. Eluding the sentinels on watch, they entered the city in the darkness of night, and thus saved Atayde and his men.

Bibliography: Hieronymo de Mendoça, *Jornada de Africa*, p. 89a, Lisbon, 1667; Kayserling, *Gesch. der Juden in Portugal*, p. 159.

G. M. K.

BENDAVID, LAZARUS: German philosopher and reformer; born in Berlin Oct. 18, 1762; died there March 28, 1832. In his younger days he supported himself by polishing glasses, and in his leisure time studied mathematics, in which he attained great proficiency. His earliest published work was on a geometrical subject, "Ueber die Parallellinien" (Berlin, 1786), and attracted much attention. Bendavid studied at the universities of Göttingen and Halle and became a stanch adherent of the Kantian philosophy.



Lazarus Bendavid.

After failing in his effort to enter the service of the Prussian government in the Department of Justice, Bendavid in 1793 went to Vienna and lectured on Kant's philosophical system in one of the halls of the university. He was, however, soon compelled to terminate his lectures there, but continued them in the mansion of Count Harrach, where he attracted large and distinguished audiences. When, in 1797, foreign residents were forced to leave Vienna, Bendavid returned to Berlin, and was for several years editor of the "Spener'sche Zeitung," which he directed with great ability and circumspection during the dangerous times of the French domination.

Lectures on Kant.

In 1806 Bendavid became the director of the Freischule (Jewish Free School), which had been founded in 1778 by David Friedländer and Daniel Itzig. Bendavid brought the school to such a high standard that nearly a third of its pupils were non-Jews in 1819, when the attendance of Christian children at Jewish schools was prohibited by the government. He served without compensation until the school was closed in 1825. His services as an expert accountant were much sought after by commercial and financial institutions; and he was also employed in that capacity for many years by the directors of the Royal Fund for Widows (Königliche Wittwenkasse). The extreme simplicity of his mode of living brought him the nickname of "The Modern Diogenes"; while by his thrifty habits he succeeded in being as independent in worldly affairs as he strove to be in the domain of philosophy. He is called by Heine "a sage after the pattern of antiquity." He never married.

"The Modern Diogenes."

In philosophy Bendavid remained a Kantian throughout his life. His published lectures, such as the "Vorlesungen über die Kritik der Praktischen Vernunft" (Vienna, 1796), "Vorlesungen über die Kritik der Reinen Vernunft" (*ib.* 1796), and several similar works, are simply expositions of the philosophy of his great master. When new metaphysical leaders like Fichte, Schelling, and Hegel commenced to dominate the world of German thought, Bendavid offered no resistance and engaged in no polemics like other Kantians, but withdrew from the field of active philosophical studies and exercised his mind on other subjects.

Bendavid's influence on the development and popularization of philosophy in his time is generally recognized. His "Ueber den Ursprung Unserer Erkenntnisse" (Berlin, 1802) was crowned by the Academy of Berlin. This work and his other independent philosophical researches, like "Beiträge zur Kritik des Geschmacks" (Vienna, 1797), "Versuch einer Geschmackslehre" (Berlin, 1798), and "Versuch einer Rechtslehre" (Berlin, 1802), which are now almost forgotten, were of importance at the time of their appearance. The truths which they contain, now generally accepted, had to struggle hard for recognition in those days; and Bendavid's lucid style contributed much to their popularization. He will always be remembered as one of the trio of Jewish philosophers (the other two being Marcus Herz and Solomon Maimon) who, as much as any other German thinkers, helped to spread the Kantian philosophy at the end of the eighteenth century.

In the Jewish world Bendavid's influence was also considerable, and by no means imperceptible, as is claimed by Grätz. In his "Etwas zur Charakteristick der Juden" (Vienna-Leipsic, 1793; improved ed., Berlin, 1813) he pleaded boldly for abolition of ceremonial laws, and is thus among the first, if not actually the first, advocate of practical religious reform in Judaism as the only means to stem the tide of conversions to Christianity which began to rise in those days with startling rapidity. In this work (pp. 33, 34) Bendavid pays high tribute to Moses Mendelssohn, who befriended and encouraged him in his early struggles. It is interesting to note that Bendavid was summoned before Cardinal Migazzi in Vienna to defend himself against the charge that he traduced Christianity in that work (see Schreiber, "Reformed Judaism," pp. 28-31, Spokane, Wash., 1892).

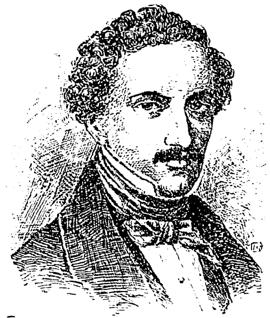
A Radical Bible Critic.

Bendavid was one of the first radical Bible critics among the Jews of Germany. His "Ueber die Religion der Ebräer vor Moses" (Berlin, 1812) and the essay "Ueber Geschriebenes und Mündliches Gesetz," which appeared in Zunz's "Zeitschrift für die Wissenschaft des Judenthums," 1823, claim to be parts of a comprehensive critical study of the Pentateuch which was probably never finished. In the same periodical also appeared his "Ueber den Glauben der Juden an einen Künftigen Messiah," where he uses his knowledge of the Talmud and rabbinical literature to insist on the principle, first brought forward by Joseph Albo, that the belief in the coming of a Messiah is not essential to Judaism. His "Zur Berechnung und Geschichte des Jüdischen Kalenders" (Berlin, 1817) was also a radical departure from the usual treatment of the subject by Jewish writers, and called forth a vehement rejoinder in the booklet, "Dabar Be'itto," by Meïr ben Moses Kornick (Breslau, 1817). The last work published by Bendavid, which appeared in Berlin in 1824, was a report on the condition of the Freischule.

BIBLIOGRAPHY: Bendavid wrote an autobiographical sketch which appeared in the *Bildnisse Berliner Gelehrten*, Berlin. 1806. His biography, written by Moritz Veit, appeared in the *Blätter für Lit. Unterh.* for 1832. *Allgemeine Deutsche Biographie*, ii. 318-320; Grätz, *Gesch. der Juden*, xii. 139; Jost, *Gesch. des Judenthums und Seiner Sekten*, iii. 318; L. Geiger, *Gesch. der Jüd. Gemeinde in Berlin*, pp. 168 *et seq.*; *Zeit. für Gesch. der Juden in Deutschland*, iv. 75-86 (his letters to Bellerman).

S. P. Wi.

BENDEMANN, EDUARD JULIUS FRIEDRICH: German painter; born Dec. 3, 1811, in Berlin; died Dec. 27, 1889, at Düsseldorf. His father was a prominent banker of Berlin and associated with the intellectual circles of the capital. His talented son was therefore at an early age brought into contact with such celebrities as Gottfried Schadow and his two sons, as well as with Felix Mendelssohn and Werder. It was, however, the intercourse with Julius Hübner, who afterward became his brother-in-law and was then a pupil at the Berlin Academy, that induced Bendemann to devote himself to art. After a short course of elementary study with W. Schadow at Berlin, Bendemann accompanied him to Düsseldorf, where he became a member of that celebrated fraternity of art students afterward designated "the Düsseldorf School."



E. Bendemann

As early as 1828 Bendemann had attracted attention in Berlin by an excellent portrait of his grandmother, which had been exhibited in that city. His next picture, "Boaz and Ruth," his first independent creation, also met with recognition, without, however, giving evidence of the triumphs that the painter was soon to achieve. When, in 1830, Schadow went to Italy, Bendemann, Karl Sohn, Th. Hildebrandt, and Hübner accompanied him, and remained there for an entire year, devoting themselves exclusively to the study of Raffael and Michelangelo.

His "Jews in Babylonian Exile."

Upon his return in 1831, Bendemann began the work "Jews Mourning in the Babylonian Exile," now exhibited (1901) in the Städtisches Museum, Cologne. This work was considered the masterpiece of the 1832 exhibition of the Berlin Academy, and at once elevated the young artist to an equality with the leading painters of the day. The grandeur and majesty of the conception, the nobility and depth of the emotions portrayed, the simple and earnest rhythm of the composition, and the avoidance of the extremes of characterization, all combined to make this picture remarkable in the world of art, and one that was welcomed with the most intense satisfaction.

From 1831 to 1835 Bendemann produced several of his best works. In the latter year the crown prince of Prussia, upon the recommendation of Schadow, renounced his intention to order a copy of "The Mourning Jews," and commissioned Bendemann to paint a picture on the subject "Jeremiah at the Fall of Jerusalem." (See Frontispiece.) This work, now (1901) in the royal palace at Hanover, was first exhibited at the Berlin Academy of Art, where it attracted the greatest attention. About 1835 the artist married a daughter of Gottfried Schadow, and went to live in the house of his father-in-law at Berlin. There he executed the famous painting, "The Arts at the Fountain of Poetry."

Becomes Professor at Dresden.

Unsuccessful in his attempt to obtain an order for a work of monumental proportions in Berlin, Bendemann in 1838 accepted a professorship at the Dresden Academy, and there, in the following year, he was commissioned to decorate three rooms of the royal palace. Notwithstanding an affection of the eye, that in 1841 compelled him to go to Italy, Bendemann, throughout a period of sixteen years, actively prosecuted this work, which to-day constitutes the greatest monument to his genius. Upon the resignation of Schadow in 1859, Bendemann accepted the directorship of the Düsseldorf Academy. This position he retained until 1867, when an affection of the throat compelled him to resign. Among his most distinguished pupils may be mentioned his son Rudolf, Theodor Grosse, and Peter Janssen.

Bendemann was a knight of the Ordre Pour le Mérite, member or honorary member of the principal art academies of the world, and the recipient of numerous honors and decorations.

Bendemann's principal works on Biblical subjects are, besides those already mentioned: "The Three Wise Men of the East on Their Way to Bethlehem" (1833); "Jeremiah At the Fall of Jerusalem" (original title, "The Jews Led into Captivity in Babylon"). The last-mentioned work — perhaps Bendemann's greatest—was first exhibited in 1872, and in 1876 was in the National Gallery at Berlin. It is described in the official catalogue as follows:

"Jeremiah at the Fall of Jerusalem."

> "In the foreground, the prophet Jeremiah is seated upon the ruins in speechless sorrow, attended by his faithful pupil, Baruch, who kneels beside him in prayer. The prophet is compelled to hear the curses of his countrymen, who, driven into exile, accuse him of conniving with the enemy. To the right is a group of despairing women and children, from whose midst a Babylonian warrior has just seized a boy. In the center, Nebuchadnezzar, in royal attire, rides in a chariot drawn by two horses. He is accompanied by a group of jubilant women, and is preceded by the army, heavily laden with spoils. Following Nebuchadnezzar's chariot is King Zedekiah, blind, and groping his way with a staff. The latter is accompanied by his wives, and followed by the priests bearing the Ark of the Covenant, and by the camels and the baggage-train. In the background, and somewhat to the left, are the smoking ruins of YHWH's Temple."

In addition to paintings of Biblical subjects, Bendemann produced numerous other compositions, such as "The Two Girls at the Well" (1833); "Shepherd and Shepherdess"; "Penelope" (now in the Antwerp Academy), and "Kaiser Lothar" (Imperial Gallery of the Römer, Frankfort-on-the-Main). He also drew the designs for the Cornelius Gallery in Berlin, and these were afterward executed in encaustic by his pupils (see Rudolf BENDEMANN).

As a Portrait-Painter.

Equally noteworthy was his genius as a portrait-painter, as evidenced by the numerous pictures of distinguished persons painted by him during a period of thirty years. Among these are life-size portraits of the following: Quandt (1850); Droysen (1855); Karl Sohn (1858); L. Richter (1859); Rietschel (1862); Joachim (1865); Cornelius (1870); Achenbach (1878); Clara Schumann (1878); Du Bois-Reymond (1880); Langenbeck (1880); Niels W. Gade (1881); W. v. Schadow; the artist's father; and Fürst Anton v. Hohenzollern. Bendemann's portrait of General Oberwitz and his wife is ranked by Pecht "among the best which has ever been produced in this genre"; and the same critic considers that the splendid picture of the artist's wife (first exhibited in 1847) would alone entitle Bendemann to enduring fame. Among the most popular illustrations by Bendemann are those to Lessing's "Nathan der Weise" (1875).

BENDEMANN, RUDOLF CHRISTIAN EUGEN: German painter of historical and genre pictures; son of Eduard Bendemann; born at Dresden Nov. 11, 1851. He was educated at the Düsseldorf Academy under the supervision of his father. From 1877 to 1879 he lived at Munich, and later made several visits to Egypt. The mural paintings in the Cornelius hall of the National Gallery at Berlin were executed by him in accordance with his father's plans, and in collaboration with Röber and Wilhelm Beckmann (1876). Among his works the following are the most noteworthy: "Frithjof und Ingeborg als Kinder" (1874); "Nymphe" (1877); "Bierausschank" (1878); "Beerdigung des Frauenlob"; "Ein Fest im 16ten Jahrhundert"; "Lautenschläger" (1879); "Wirthshausscenen in Oberbaiern" (1880); "Ausgang aus einer Moschee in Kairo"; "Schöpfbrunnen in Oberägypten." Bendemann has also achieved considerable success as a portrait-painter.

BENDER, ALFRED PHILIPP: Rabbi at Cape Town, South Africa; born at Dublin, Ireland, 1863; educated by his father, Rev. Philipp Bender, for many years rabbi of the Dublin congregation. Bender finished his education at St. John's College, Cambridge, Eng., and in 1891 was appointed rabbi of the Hebrew congregation at Cape Town, South Africa, where he continues to reside (1901). He is professor of Hebrew at the South African College, and is a member of the council of the University of Good Hope. Bender is connected with many local philanthropic institutions besides those of his own congregation. He has contributed to the "Jewish Quarterly Review" (vols. vi., vii.) a series of papers on the burial customs of the Jews.

J.

BENDER, JOHANN HEINRICH: German jurist; born at Frankfort May or Sept. 29, 1797; died there Sept. 6, 1859. He studied law at Giessen, where he was also lecturer from 1819 to 1823. In 1831 he went to Frankfort to practise law, and five years later he was made a member of the executive committee of the tariff commission (Zolldirectionsrath), a position he filled until his death. He was the author of "Grundriss der Deutschen Staats- und Rechtsgeschichte," 1819; "Ueber das Mündliche und Oeffentliche Verfahren in Criminalsachen," 1821; "Grundsätze des Deutschen Handelsrechts," 2 vols., 1824–29; "Der Frühere und Jetzige Zustand der Israeliten zu Frankfurt, Nebst Verbesserungs-Vorschlägen," 1833; and other works.

BENDERY: District town in the government of Bessarabia. In 1898 it had a Jewish population of 12,000 out of a total of 33,000 inhabitants. Commerce is the main occupation of the Jews there, only 1,061 of them being engaged in handicrafts (397 masters, 515 journeymen, and 149 apprentices). Ten Jewish families, who own about sixty-eight acres of land within the city limits, are engaged in viticulture. The most important among the Jewish benevolent institutions are the Jewish Hospital, which has an annual expenditure of 6,400 rubles, and the Talmud Torah. In special Jewish schools religious instruction is imparted to 325 children, while at the public schools 240 children receive such instruction.
H. R. S. J.

BENDETSOHN, MENAHEM MANUS: Russian pedagogue and Hebrew writer; born in Grodno 1817; died there March 20, 1888. After a careful Talmudic education in his native town he was sent, while still young, to Breslau, Germany, where his father-in-law, Reuben Liebling, the cantor of the Reformed synagogue, supported him during his studies. There he published in 1847 המוסר או אחרית רשע ("The Denunciator"), a Polish tale, adapted from the German version of W. Tugendhold. In 1853 he returned to Russia, and then taught for more than twenty years in the government school for Jewish children at Grodno, and for a short time in Volkovisk. In Grodno he also conducted a private school for many years. Among his pupils may be mentioned the Hebrew poet Konstantin Shapiro, the public-spirited lawyer L. Kupernik of Kiev, and the jurist and writer D. Slonimski of Wilna.

Besides Hebrew, he wrote fluently in Russian and German, and being possessed of an exceptionally retentive memory he knew by heart the Scriptures and many of the writings of Schiller and other German classics.

As an esthetic writer and stylist, he could not approve of the Germanized Hebrew of the young generation, and in his preface to "Alluf Ne'urim" he severely criticized it. This called forth a reply from R. A. Braudes in an article entitled "Ha-Safah Bikewodah ube-'Ozmah," which appeared in "Gan Peraḥim," Wilna, 1881, pp. 12 *et seq.* Besides the work mentioned above, Bendetsohn published: "Eben Boḥan," the principal rules of Hebrew grammar in the form of questions and answers (Wilna, 1856); "Higgayon la-'Ittim," a Hebrew adaptation of the "Stunden der Andacht für Israeliten," by Samson Wolf Rosenfeld, rabbi of Bamberg (vol. i., Wilna, 1856; vol. ii., 1862); "Moda' le-Yalde Israel" (Friend of Jewish Children), instructive tales, anecdotes, etc., from the lives of noble men, partly derived from Wilhelm Oertel's "Practischer Unterricht in der Deutschen Sprache," Hebrew and Russian (Warsaw, 1872); "Alluf Ne'urim," a collection of instructive tales for youth and a manual of elementary instruction in the Hebrew tongue, translated from the Russian (Wilna, 1879).

As a master of classical Hebrew he ranks among the best Neo-Hebraic writers, his style being almost equal to that of Mapu, who is considered the foremost classical writer of the "Maskilim."

BENDIG, MEÏR, OF ARLES (= Maestro Bendig d'Arles): Talmudist at Arles, in the Provence, probably in the second half of the fifteenth century. He wrote the following works: (1) An index of all the Biblical passages cited in the Babylonian Talmud, including the "minor treatises," and the Abot de-Rabbi Nathan, with a list of the passages in which they are cited. A later copyist gave the work the name "Em le-Miḳra" (Scriptural Sources). It is manuscript No. 1637, 3, of Neubauer, "Cat. Bodl. Hebr. MSS.," and occurs also in a Verona manuscript. (2) A collection of the haggadic passages of the Talmud, erroneously entitled by the copyist "Em le-Masoret" (Sources of Tradition). It is contained in the same manuscripts as the preceding work. In his works Bendig carried out a plan of Isaac Nathan, author of "Meïr Netib," who also lived at Arles, but before Bendig.

BENDIT. See BENEDICT.

BENDIX, FRITS EMIL: Danish violoncellist and composer; born Jan. 12, 1847, at Copenhagen. He first studied with F. Rauch, and later with Friedrich Neruda and Friedrich Grützmacher in Dresden. From 1866 to 1871 he lived in Germany, where he successively played in the orchestras at Meiningen and Cassel. He also appeared as a soloist and in chamber-music performances. On his return to Denmark in 1871 he became a member of the royal orchestra at Copenhagen, and since 1887 he has been its leader.

Bendix has published a book of children's songs, of which he composed both text and music. In 1884 a one-act comedy of his was performed at the Royal Theater in Copenhagen. Another play, entitled "En Hustru," was published by him under the pseudonym "Carston Holst."

BENDIX, OTTO JULIUS EMANUEL: Danish oboist and pianist; born July 26, 1845, at Copenhagen; a brother of Frits Bendix. He first devoted himself to the study of the oboe, and received instruction on that instrument from Christian Schliemann. He was also a pupil of Gade and Rée. In 1868 he received an appointment as oboist in the royal orchestra; and he remained a member of that organization until 1880. In the mean time he had diligently devoted himself to the study of the piano; and in order to perfect himself as a pianist, he took a course with Theodore Kullak at Berlin and with Liszt at Weimar (1872–74).

The piano now gradually became his favorite instrument. For a number of years he performed at concerts and taught in Copenhagen; but in 1880 he left his native city for Boston, Mass., where he now occupies (1902) a distinguished position as a teacher and virtuoso. In the latter capacity he has made frequent tours, one of which extended as far as San Francisco.

BENDIX, VICTOR EMANUEL: Danish violin virtuoso, pianist, and composer; born May 17, 1851, at Copenhagen; brother of Frits Bendix. He early manifested a remarkable talent for music. From 1867 to 1869 he was a pupil at the newly founded conservatory of music at Copenhagen, where he studied the piano under August Winding and composition under Niels W. Gade, whose favorite pupil and protégé he became. In association with Axel Liebmann, he conducted from 1872 to 1876 the concerts of the choral society founded by the latter. A few years later he became instructor of the chorus at the Royal Opera, and Gade's assistant at the choral rehearsals of the Musical Society. He also at this time frequently appeared as soloist and in chamber-music recitals, and during the season of 1893 conducted the popular concerts given at the Concert Palace.

Bendix has occasionally visited Germany and other foreign countries, and his compositions reveal the influence of modern German romanticism. They are characterized by a consummate mastery of technic, and embrace orchestral and chamber music, as well as numerous songs and minor compositions for the piano. The following is a list of his principal works: "The Thirty-third Psalm," for orchestra and chorus, op. 7; symphony in C, entitled "Fyaeldstigning" (German title "Zur Höhe"), published in 1891; symphony in D, entitled "Sommerklange fra Rusland"; symphony in A (1895?); "Lystspilouverture," op. 19; pianoforte concerto, op. 17; pianoforte trio, op. 11; ten songs, op. 18; "Poésies de Victor Hugo," op. 21; "Album," ten pianoforte pieces.

BENE-BERAK: A town assigned to Dan (Josh. xix. 45). It was situated on the seacoast plain southeast of Joppa, and is to be identified with the modern Ibn Ibrak (Buhl, "Geographie," p. 196). The Danites, however, did not continue to hold the place, since Sennacherib (Rawlinson, "Cuneiform Inscriptions of Western Asia," i., plate 37, col. ii. 66) mentions Banaibarḳa as belonging to Zidḳa. In later times Bene-Berak became the seat of Akiba's school (Sanh. 32b).

BENEDETTI, SALVATORE DE: Italian scholar; born April 18, 1818, at Novara, a town in Piedmont; died Aug. 4, 1891, at Pisa. In his time the public schools of Italy were closed to Jews, and therefore Benedetti attended the only school of importance in Piedmont open to Hebrews—a college founded in Vercelli by a certain Foa and intended more especially for the preparation of rabbis. After finishing his studies there and feeling no inclination for the ministry, Benedetti earned a livelihood by teaching, and by editorial work for some Piedmont and Milan papers. At this time also he translated, in abridged form, Adolph Franck's book on the Cabala. In 1844 Benedetti was named superintendent of the Pie Scuole Israelitiche at Leghorn. In 1848 he became one of the most militant participants of the Mazzini faction, and took an active part in the publication of the "Corriere Livornese."

When the Austrians invaded Leghorn, Benedetti left the city in order to return to his native province, Piedmont. He remained some time in Turin actively engaged as a journalist, and when Cesare Correnti founded the "Progresso," Benedetti became a member of the editorial staff of that paper. After its cessation Benedetti went back to Novara, and after having delivered public lectures on history he founded and edited the paper "La Vedetta," which served as intermediary between free Piedmont and Lombardy, then still under the Austrian yoke.

In view of the changed political situation provoked by the policy of Victor Emmanuel and of his minister Cavour, Benedetti decided thenceforward to devote his life to science and literature. In 1862 he became professor of Hebrew at the University of Pisa, and retained the position till his death. He also contributed from time to time to local papers of his new dwelling-place. He devoted the greater part of his energy to scientific publications; distinguishing himself by his exact knowledge of the bibliography of each subject he treated, by the severe method of research that he applied to every topic he discussed, and, above all, by the choice language he employed.

One of the most interesting of Benedetti's works was his "Vita e Morte di Mose," 1879, wherein he gathered and translated the legends concerning the great Hebrew legislator. His "Canzoniere Sacro di Giuda Levita," 1871, a translation of the poems of Judah ha-Levi, helped largely to acquaint the Italian public with the Hebrew poetry of the Middle Ages. Besides the above-mentioned works Benedetti published: "Il Terzo Centenario di Galileo," a historical tale, Pisa, 1864; "Del Metodo di Galileo nella Filologia," Turin, 1864; "Della Educazione Rustica," Florence, 1865; "Elisa Finocchietti Toscanelli," Pisa, 1870; "I Teologi Naturali" (translated from the Hebrew), Pisa, 1871; "La Leggenda Ebraica dei Dieci Martiri e la Perdonanza sullo Stesso Argomento," in "Annuario della Società Italiana per gli Studj Orientale," ii.; "Giuseppe Levi," a biography of the famous Italian poet, Florence, 1876; "Marianna Foa Uzielli," biography, Leghorn, 1880; "Dei Presenti Studj sul Talmud e Specialmente sull' Aggada," in "Proceedings of the Fourth Congress of Orientalists," held in Florence, 1878, Florence, 1880: "L'Antico Testamento e la Letteratura Italiana," Pisa, 1885.

S.

BENEDICT VIII.: Pope from 1012 to 1024. A great persecution of the Jews took place during his pontificate. A terrible earthquake and hurricane visited the city of Rome on Good Friday, 1021, and the following day, in which many persons perished. According to the views of that time, this visitation was considered as a punishment sent by God; and the pope was persuaded, by one who pretended to have discovered the cause of the divine anger, that the Jews had insulted the host while the Christians were paying their adoration to the cross. An inquiry, conducted with all the partiality which characterized that epoch, having demonstrated the veracity of the alleged facts, Benedict ordered the execution of the guilty Jews. According to Zunz, the seliḥah **אם עונינו רבו**, written by Simeon ben Isaac, refers to this persecution.

BENEDICT XII. (JACQUES DE NOVELLÈS): A monk of the Cistercian order; elected pope Dec. 30, 1334; died April 25, 1342. Although he displayed the greatest zeal for the extermination of the Albigenses and other heretics, he cherished kindly feelings toward the Jews and protected them by every means in his power. When, in 1338, bloody persecutions of the Jews broke out in several places in Germany because they had been accused of profaning sacramental wafers, Benedict addressed to Duke Albert of Austria a letter recommending him to take measures for the protection of the Jews. About the same time he wrote also to the bishop of Passau, in whose diocese many Jews had been slain on this accusation, directing him to investigate scrupulously the charge, which he, Benedict, did not believe, and to punish severely those who had invented such false accusations.

G. I. BR.

BENEDICT XIII. (PEDRO DE LUNA): Antipope; born at Aragon about 1334; elected Sept. 28, 1394; died at Peñiscola June 1 (according to some, Nov. 29), 1424. This "unfrocked and spurious pope," as he was termed by the Council of Constance which deposed him (1415), caused much suffering to the Jews. Zealous for their conversion, he shrank from no measures to bring about this result. While he was still a cardinal he forced Shem-Ṭob ben Isaac Shaprut to appear at Pamplona before an assembly of bishops and high ecclesiastics in order to debate the question of original sin and salvation.

This zeal for conversion and controversy was encouraged by the baptized Jew, the unfrocked rabbi Salomon Levi Burgos (called by his Christian name Pablo de Santa Maria), and Benedict's physician, Joshua Lorqui, whose Christian name was Geronimo de Santa Fé. They persuaded their master that they were able to demonstrate from the Bible and the Talmud that the Messiah had already come in the person of Jesus.

The Tortosa Controversy.

Benedict, who had perjured himself in order to save his tiara, hoped to atone for his sin before Christendom by a splendid deed, such as the conversion of the Jews en masse. He therefore summoned the Jewish notables to a controversy at Tortosa. Twenty-two of the chief Aragonese Jews answered the summons, and assembled at Tortosa Feb. 6, 1413. At first Benedict treated them with kindness; but seeing, in the course of the debates, that he could not hope to convert them by persuasion, he threw off his mask and vented his wrath on the Talmud. When all means of converting them were exhausted without bringing about the desired results, he dismissed them in anger.

Bull of 1414.

The consequence of this unprecedented controversy, which extended over a year and nine months (Feb. 6, 1413, to Nov. 12, 1414), was the issuance of an anti-Jewish bull containing eleven clauses. By the terms of this bull the Jews were prohibited from studying the Talmud and Talmudical literature. All copies of the Talmud were confiscated. The communities were forbidden to build more than one synagogue poorly equipped. The Jews were not allowed to eat, bathe, or trade with Christians. They were not to hold any public office; not to follow any handicrafts, nor even to practise medicine. They were compelled to wear a red or a yellow badge, and three times a year, during Advent, at Easter, and in the summer, they were to attend Christian sermons.

Benedict, being just then deposed by the Council of Constance, did not live to see his bull enforced, but it bore its fruits; and the sad end of the Jews of Spain was due to this schismatic pope and the schismatic rabbi Burgos.

G. I. BR.

BENEDICT XIV. (PROSPERO LAMBERTINI): Two hundred and fifty-fourth pope; born at Bologna in 1675; elected pope Aug. 17, 1740; died May 3, 1758. This pope, who graciously accepted a dedication from Voltaire and was full of amenity toward all heretics, thought it his duty to pursue by all means the conversion of the Jews. In 1747 he issued a bull regulating Jewish conversions. According to this bull all children above seven years of age could be baptized without the consent of their parents. A Christian nurse was allowed to baptize her Jewish charge against the will of the parents. One of the latter could baptize the child contrary to the wish of the other; and the grandfather could baptize his fatherless grandchild against the will of its mother.

By a decree dated Sept. 16 of the same year, Benedict forbade converted married Jews to divorce their wives according to Jewish law. At the request of the Jewish community of Rome (presented in Feb., 1751) to allow its members to frequent the market and to live outside the ghetto, Benedict renewed the severe project elaborated by the Inquisition in 1732, according to which a Jew was not permitted to pass a single night away from the ghetto.

Notwithstanding this, Benedict was far from being hostile to the Jews. On all occasions, except in the matter of conversion, he showed sympathy with them. When persecutions broke out in Poland he energetically defended the Jews and enjoined the Polish archbishop and primate to protect them.

In Italy Benedict was especially hostile to Hebrew books. The censor Constanzi prepared in 1748 a new list of forbidden books. Benedict ordered all those enumerated therein to be seized and confiscated; and on Sept. 15, 1751, this decree was enforced. It having been rumored that the Jews smuggled prohibited books into the ghetto, Benedict ordered a strict search of the houses, with the result that a general confiscation ensued. Later he gave directions to Constanzi to revise the "Sefer ha-Zikkuk" (Book of Expurgation) and to add to it an *Index Expurgatorius*, comprising a new series of books to be forbidden.

In Holy Week of 1756 the body of a child was found at Jampol, Poland, and a blood-accusation followed by persecutions ensued. To free themselves and all other Jews from the oft-repeated accusation, the Polish Jews sent Jacob Selek to Benedict to procure an official exposure of the falsehood of the charge. Benedict charged the counselor of the holy office, Lorenzo Ganganelli—later Pope Clement XIV.—to report on this subject; and on March 21, 1758, the acquittal of the Jews was pronounced.

BENEDICT, SIR JULIUS: Composer, conductor, and teacher of music; born at Stuttgart Nov. 27, 1804; died in London June 5, 1885. Showing considerable musical talent as a boy, he became, at the age of fifteen, the pupil of Hummel at Weimar, and was introduced by him to Beethoven. In 1821 he went to Dresden to study musical composition under Weber, who treated him like a son. Having filled conductors' posts at Vienna from 1823 to 1825, he went with Barbaja to Italy in the latter year, and obtained an appointment as conductor at Naples, where he produced two of his own operas, "Gracinta ed Ernesto" and "I Porthocesi in Goa." In 1835 he went from Paris to London, where he resided till his death. He was conductor at the Lyceum in 1836 and at Drury Lane in 1838, where some of his own chief works for the operatic stage were produced. After visiting America with Jenny Lind in 1850, he became successively conductor at Her Majesty's Theater and at Drury Lane. Sir Julius held a prominent position in the musical world for upward of forty years, as conductor and as teacher. He contributed much to the initial success of the Monday Popular Concerts at St. James' Hall. He was knighted in 1871; and, among other distinctions, was decorated by the emperor of Austria in 1874, and made knight commander of the Order of Frederick by the king of Württemberg. He was twice married.

Sir Julius Benedict.

Among his compositions are: a one-act operetta, "Un Anno ed un Giorno," produced at the Lyceum in 1836; "The Gypsy's Warning," 1838; "The Bride of Venice," 1843; "The Crusaders," 1846, produced at Drury Lane; "Undine," a cantata produced in 1860 at the Norwich Festival, of which he was for many years conductor; "The Lily of Killarney," 1862, his most successful opera, the libretto to which was founded upon Boucicault's "Colleen Bawn"; an operetta, "The Bride of Song," performed in 1864; "Richard Cœur de Lion," 1863, and an oratorio, "St. Cecilia," 1866, the last two composed for the Norwich Festival; "St. Peter," 1870; and "Graziella," 1882, besides symphonies and pianoforte music. The recitatives for the Italian version of Weber's "Oberon," which was produced at Drury Lane in 1865, were also written by Sir Julius.

BENEDICT, MARCUS. See BENET, MORDECAI.

BENEDICT, MOSES: German banker and artist; born in 1772 at Stuttgart, Germany; died there July 8, 1852. He was destined for the profession of sculptor. With his brother Seligmann Löb he was sent in 1785 to the Karlsschule in Stuttgart. Later on the two conducted the banking business of Benedict Brothers. Moses showed considerable talent for art, and as a painter of miniatures was particularly clever. He was an intimate friend of the painter Christian Gottlieb Schick, with whom he corresponded for years.

BENEDICT, NAPHTALI. See BENET, NAPHTALI.

BENEDICT OF YORK: Leading member of the Jewish community in York, England, at the end of the twelfth century; died in 1189. Together with Josce of York he attended the coronation of Richard I., and in the riot which took place on that occasion was forced to submit to baptism, when he took the name of "William." Afterward he appealed to the king, who permitted him to return to his religion, though this was against the canon laws.

His death occurred soon after this at Northampton (Roger de Hoveden, "Chronica," ed. Stubbs, iii. 14), where he was the owner of houses. William of Newbury describes Benedict's house at York as being like unto a royal palace in size and strength ("Historia," ed. Howlett, i. 312). His widow and children were burned alive in it during the York riot of Easter, 1190.

Title-Page of "Meah Berakot," Amsterdam, 1787.

BENEDICTIONS (Hebrew, "Berakot"): Blessings, or prayers of thanksgiving and praise, recited either during divine service or on special occasions. They were, according to rabbinical tradition (Ber. 33a), instituted and formulated by the founders of the synagogue, the "Anshe Keneset ha-Gedolah" (Men of the Great Synagogue), "the hundred and twenty elders" at the head of the commonwealth in the time of Ezra (Meg. 17a; Yer. Ber. ii. 4d; compare Yad ha-Ḥazakah, Tefillah u-Birkat Kohanim, i. 4; Ber. i. 5). Thanksgivings in the form of "Baruk Yhwh" (Blessed be the Lord) were occasionally offered in the time of the Patriarchs, the Judges, and the Kings (see Gen. xxiv. 27; Ex. xviii. 10; Ruth iv. 14; I Sam. xxv. 32; II Sam. xviii. 28; I Kings i. 48; v. 21; viii. 15, 56; I Chron. xvi. 36; II Chron. ii. 11, vi. 4) and by the Psalmists (Ps. xxviii. 6, xxxi. 22 [A. V. 21], and elsewhere); and in the form of "Baruk Attah Yhwh" (Blessed be thou, O Lord; I Chron. xxix. 10; Ps. cxix. 12); also in the prayer of Azariah (Song of the Three Holy Children, verse 3; Tobit iii. 11; viii. 5, 15; xi. 14).

In the time of Ezra public worship was begun with the call, "Bareku et Adonay" (Bless ye the Lord! Neh. ix. 5), each thanksgiving being followed by the congregational response Amen (Neh. viii. 6) or a longer doxology, "Baruk . . . Amen" (Ps. xli. 14; lxxii. 18, 19; cvi. 48). Thenceforth the designation "Berakah," or benediction, became the standing name for each individual thanksgiving in the service. Accordingly, the ancient Mishnah, R. H. iv. 5, calls the service "Seder Berakot" (Order of Benedictions). Thus eight benedictions are mentioned in Yoma vii. 1, which are recited by the high priest in the Temple service on the Day of Atonement, namely: (1) on the Law, (2) the 'Abodah, (3) the thanksgiving, (4) the forgiveness of sin, (5) the sanctuary, (6) Israel, (7) the priestly blessing, and (8) the closing prayers.

The recitation of the Shema' every morning in the Temple was preceded by one benediction, and followed by three benedictions, which consisted of Emet we-Yaẓib, the 'Abodah, and the Priestly Blessing (closing with "Shalom"=peace; Tamid iv. 1). In the synagogue the Shema' is preceded by two benedictions, one for the light of day: "Yoẓer-Or" (see Liturgy), closing with "Blessed be He who created the lights!" and one for the Law: Ahabah Rabbah, ending with "Blessed be He who loveth His people Israel!" and followed by one benediction beginning with Emet we-Yaẓib and closing with "Ga'al Yisrael" (Blessed be He who hath redeemed Israel!), after which the eighteen (or seven) benedictions follow. The Shema' in the evening is preceded by the benedictions "Ma'arib 'Arabim," concluding with "Blessed be He who bringeth on the twilight!" and Ahabat 'Olam, closing with "Blessed be He who loveth His people Israel!" and followed by two benedictions, namely: "Ga'al Yisrael," as in the morning, and "Hashkibenu" ("Grant us peaceful rest in the night!"), ending with "Blessed be He who guardeth Israel!" or, on Sabbath and holy days, with "Blessed be He who spreadeth the tabernacle of His peace over Israel!" The prayer (Shemoneh 'Esreh) in the daily ritual of the synagogue consists of eighteen benedictions (Ber. 28b); the corresponding festival prayer, of seven (Tos. R. H. iv. 11); the one on fast-days, of twenty-four, six special benedictions being added to the eighteen of the daily prayer, each being followed by the response "Amen" (Ta'an. ii. 2–5).

Upon Reading from Scripture.

A special benediction was also offered by Ezra before the reading from the Book of the Law, the assembly responding with "Amen! Amen!" (Neh. viii. 6.) Hence it became the regular practise in both the temple and the synagogue to recite a benediction before reading the Law, with the introductory "Bareku" (Bless ye the Lord), and after the reading with the closing formula, "Blessed be He who gave the Law," followed by the response "Amen" (Yoma vii. 1, p. 69b; "Masseket Soferim," xiii. 8, ed. Müller, p. 178). The benedictions recited at the reading from the Prophets, the HAFṬARAH, one before and three or four benedictions after the reading on Sabbath and holy days, have the same character. They are thanksgivings for the words of comfort and of Messianic hope offered by the prophetic writings as interpreted by the Haggadah. Originally these also were accompanied by congregational responses ("Masseket Soferim," xiii. 9–14, ed. Müller, pp. 181–185). Similarly the reading of the HALLEL Psalms on the New Moon and holy days is preceded and followed by a benediction; the latter known in Mishnaic time as "Birkat ha-Shir" (Benediction of the Psalm, Pes. x. 7). To the same category belong the benediction BARUK SHE-AMAR, which precedes, and the YISHTABAḤ (with or without the NISHMAT), which follows, the reading of Psalms in the early morning service; the benediction in each case closing with "Blessed be Thou, O Lord, who art extolled by praises!" (Compare Ps. xxii. 4 [3] and Ex. xv. 11.) The corresponding evening benediction "Baruk le-'Olam" appears originally to have been also a benediction on the Psalms (see S. Baer, "'Abodat Yisrael," p. 109; and Kohler, "The Psalms and Their Place in the Liturgy," Graetz College Publications, 1897, i. 31.

The benedictions recited over the meals are of very ancient origin. As early as the Book of Samuel people would not eat before the blessing had been offered over the sacrifice (I Sam. ix. 13). Accordingly, the words in Deut. viii. 10, "When thou hast eaten and art full, thou shalt bless the Lord thy God for the good land which He hath given thee," are referred by the Rabbis to the benediction over the meal, to both the grace before the meal and the threefold benediction after it (Ber. 21a, 48b; Tos. Ber. vii. 1; compare Sibyllines, iv. 25; Josephus, "B. J." ii. 8, § 5; Letter of Aristeas, § 184; Matt. xiv. 19, xv. 36, xxvi. 26; Acts xxvii. 35). "Seeing thee eat without washing the hands and without saying the benediction, I took thee to be a heathen," said an innkeeper to his brother Jew (Num. R. xx.). "Whosoever eats or drinks or enjoys some pleasure of the senses without offering a benediction commits a sacrilegious theft against God" (Ber. 35a, b).

Before and After Meals.

Especially solemn, because accompanied with responses in accordance with the number of the participants, is the GRACE AT MEALS, consisting of three benedictions, later increased to four. According to Ber. 48b, the first "Ha-zan et ha-kol" (Blessed be He who giveth food to all!) was instituted by Moses; the second, "Nodeh leka" (closing with "Blessed be Thou for the land and for the food!"), by Joshua, who led Israel into the land; and the third, "Raḥem na" (closing with "Blessed be He who rebuildeth [buildeth] Jerusalem"), by King Solomon; while the fourth, "Ha-ṭob we-ha-Meṭib" (Blessed be He who is good and doeth good!)—recited as a rule whenever new wine is served to cheer the guests—is ascribed to the rabbis of Jamnia in Bar Kokba's time. All meals having had a distinctly social rather than a mere domestic character in olden times, the benedictions recited at the table were accordingly, like those in the synagogue, introduced by an exhortatory call, "Zimmun," and accompanied by responses (Ber. vii. 1, 2; Geiger, "Urschrift," p. 123; Kohler, *l.c.* pp. 34, 35).

Gladdening wine as a social element served on such occasions gave rise to benedictions connected with the Sabbath and the festival meals, the ḲIDDUSH (the sanctification of the day, Mek., Yitro, vii.; Pes. 106a) and HABDALAH ("the leave-taking from the holy day"), which formed originally the conclusion of the Sabbath meal (Ber. viii. 1; Geiger, "Zeitschr." vi. 116); the Passover Seder (Pes. x. 6); also to a benediction now no longer in use at the new-moon meal ("Mas. Soferim," xix. 9); to the seven benedictions recited at marriage festivities (Ket. 7b; compare Tobit viii. 6–17), which lasted a full week or two; the benedictions at circumcision (Shab. 137b; Tosef., Ber. vii. 12, 13); and the benedictions at the mourners' meal, which were still in use in Europe in the eleventh century ("Mas. Soferim," xix. 11, ed. Müller, p. 276; Ber. 46b; Semaḥot xii., xiv.; "Siddur Rab Amram," i. 55; Maḥzor Vitry, No. 248). Every new enjoyment offered at the festal table, such as various kinds of fruits, or perfumes, gave rise to another benediction (Ber. vi. viii.; Tos. Ber. vi.). "To God belongs the earth and all its produce, according to Ps. xxiv. 1; but when consecrated by a benediction it becomes man's privilege to enjoy it, according to Ps. cxv. 16," says R. Levi (Ber. 36a).

Thanksgiving for Personal Benefits.

Besides these three forms of benediction, a fourth, bearing a more personal character, came into use in ancient times—a thanksgiving for the manifestation of divine goodness experienced in one's life. The one hundred and seventh Psalm has been correctly understood by rabbinical tradition to refer to four different kinds of thanksgiving for benefits received from God: (1) for escaping the dangers of a journey through the desert (verses 4–9); or (2) being rescued from prison (10–16); or (3) recovering from a grave illness (17–22); or (4) having gone safely through the perils of a sea voyage. All who have undergone any of these experiences are bidden to offer loud thanksgiving to the Lord in the midst of worshiping assemblies. Out of this developed the "Birkat ha-Gomel" (Blessed be the Lord, who bestoweth benefits upon the undeserving), the benediction recited by men who are called up to the Law the first time they appear in the synagogue after deliverance from danger; the congregation responding: "May He who hath bestowed all good upon thee, further bestow good unto thee! Amen." As a matter of course, each miraculous escape or other joyous experience gave rise to another benediction. In fact, many Psalms are the outpouring of such thanksgiving (Ps. xxii. 26 [A. V. 25], xl. 11 [A. V. 10], ciii. 1–5). Yet not only experiences of joy, but also severe trials, prompted the saints to offer thanksgiving, as in the case of Job, "The Lord gave, and the Lord hath taken away; blessed be the name of the Lord" (Job i. 21).

Every manifestation of divine protection and help became an opportunity for the pious Israelite to offer up thanksgiving in the usual form of a benediction; thus, after the victory over Nicanor the people exclaimed: "Blessed be He who hath kept His holy place undefiled" (II Macc. xv. 34). A similar benediction is given: "Blessed be Thou, the truthful Judge who disclosest the things hidden" (*ib.* xii. 41). Not only did the experience of miraculous help from Providence give an opportunity for thanksgiving, as when Jethro exclaimed, "Blessed be the Lord, who hath delivered you out of the hand of the Egyptian" (Ex. xviii. 10; Ber. 54a), but the very season or place which recalled the wondrous event to the memory of the people or of the individual gave rise to a benediction: "Blessed be Thou who wroughtest a miracle unto me," or "unto our fathers of old." There is an instructive passage in the Book of Enoch: "Each time Enoch beheld some of the wonders of nature, he blessed the Lord of Glory, who had made great and glorious wonders to show the greatness of His work to the angels and the souls of men, that they might praise His work and all His creation . . . and bless Him for ever." Obviously, at the time Enoch was written, the Ḥasidim had already made it a custom to say a benediction at the sight of every great phenomenon of nature, "‘Oseh ma‘aseh Bereshit" (Blessed be the Worker of Creation) (Ber. 54a; compare Ben Sira [Ecclus.] xliii. 11, "Look upon the rainbow and praise Him that made it").

Development of Benedictions.

In the course of time all these benedictions assumed a stereotyped form; and the rule is given by Rab that, to be regarded as a regular benediction (Ber. 40b), every benediction must contain the name of God, and by R. Johanan that it must contain the attribute of God's kingship. It was always the Name that called forth the response, since the verse Deut. xxxii. 3 (Hebr.), "When I call upon the name of the Lord, ascribe ye greatness unto our God," was interpreted in this sense by the Rabbis (see Sifre, Deut. 306). In view of this response in the synagogue, "Amen": in the Temple, "Baruk Adonay" (Blessed be the Lord the God of Israel from everlasting to everlasting), particular stress was always laid upon the closing formula ("ḥotem berakot") (Mishnah Ber. ix. 5; Ta‘anit ii. 3; Tosef., Ber. vii. 21, 22; Tosef., Ta‘anit i. 10–13); whereas full freedom as to the form of the main benediction was granted to the individual who offered the prayer or praise. It has been suggested that Psalms, such as cxxxvi., cxlvii., cxlviii., or other Biblical verses, originally formed the basis of each benediction (see Isidore Loeb, "Literature des Pauvres," p. 158; Müller, "Masseket Soferim," p. 228; Kohler, *l.c.* pp. 32–34). A specimen in the Apocryphon to an old benediction with choral response is given in the Song of the Three Children (verses 29–34, 39–67). Out of the recitative benedictions spoken in assemblies, as seen in the prevalent use of the plural, developed at a much later stage the solitary prayer without the element of responses (Ber. viii. 8), which had previously been essential.

Great importance was laid, however, on the exact traditional form of the various benedictions. Only a recognized scholar ("Talmid ḥakam") was presumed to know them to a reliable degree; whereas those who compiled them for common use were, in Mishnaic time, regarded with suspicion. "Those who write down the benedictions are equal in mischief-doing to such as burn the Law"—ostensibly because they infringed the rights of those authorized to offer the benediction (see Tosef., Ber. i. 8; Shab. xiii. [xix.] 4; Ber. 38a, 50a; Shab. 115b). Nevertheless it was from such written collections of benedictions that compilations like those enumerated in Mishnah Berakot ix., Ta‘anit ii., Tosef., Ber. vii., and elsewhere were made. At any rate, by the second century they were already fixed as to form and number, since R. Meïr declares it to be the duty of every one to say one hundred benedictions daily (Men. 43b); and R. Yose says: "He who alters the form of benedictions fixed by the wise has failed to fulfil his obligations" (Ber. 40b; Yer. Ber. vi. 2, 10b). According to Num. R. xviii. (compare Tan., Koraḥ, ed. Vienna, 1853), it was King David who instituted the one hundred daily benedictions. These hundred benedictions required daily by R. Meïr are shown by Abudrahim in gate iii. ("Birkat ha-Miẓwah") of his commentary to correspond with the benedictions given in the daily prayers.

One Hundred Benedictions Daily.

Maimonides (Yad ha-Ḥazaḳah, Berakot, i. 4) divides the benedictions into three classes: (1) for enjoyments; (2) for the privilege of the performance of a religious duty; and (3) forms of liturgical thanksgiving and praise. Abudrahim, in Hilkot Berakot, divides them into four classes: (1) such as are comprised in the daily prayer; (2) such as precede the performance of religious duties; (3) such as are offered for enjoyments; and (4) such as are offered on special occasions of thanksgiving and praise.

The following is a list of benedictions prescribed in the Talmud and adopted in the liturgy; each of them beginning with the formula "Blessed art Thou, O Lord, our God, King of the Universe!"

(1) Before retiring to rest at night: " . . . who makes the bands of sleep fall upon mine eyes and slumber upon mine eyelids. May it be Thy will, O Lord, to make me lie down in peace and rise up again in peace. Let not my thoughts nor evil dreams nor evil imaginations trouble me, but let my bed be spotless before Thee, and give light again to mine eyes lest I sleep the sleep of death" (Ps. xiii. 4 [A.V. 3]); "for it is Thou who givest light to the apple of the eye" (Ps. xvii. 8). "Blessed art Thou who givest light to the whole world with Thy glory" (Ber. 60b).

(2) In the morning, before reciting any benediction, one has to wash the hands and say: " . . . who hast sanctified us by Thy commandments and enjoined us to wash the hands" ("Neṭilat Yadayim," "lifting up the hands"); compare Targ. to Ps. cxxxiv. 2 (Ber. 53b).

(3) After the performance of the functions of the body: " . . . who has formed man in wisdom and created many orifices and vessels, upon the opening or closing of which, life depends." " . . . (who healest all flesh and) who hast made man wondrously" (after Ps. cxxxix. 14).

Morning Benedictions.

(4) After awakening from the night's sleep (which was regarded as the returning of the soul to the body) some rabbis prescribe the benediction: " . . . who revivest the dead" (Yer. Ber. iv. 2, 7d); but the form commonly adopted is: "My Lord, the soul which Thou hast given me is pure, Thou hast created and formed it, and Thou didst breathe it into me and preservest it within me and wilt one day take it from me and restore it unto me hereafter. So long as the soul is within me, I will give thanks unto Thee, O Lord my God, Sovereign of all works, Lord of all souls, . . . who restorest the souls unto dead bodies."

(5) On hearing the cock crow, one says: " . . . who hast given the cock intelligence to distinguish between day and night," (Job xxxviii. 36). Compare "Apost. Const." viii. 34.

(6) On opening the eyes in the morning: " . . . who openest the eyes of the blind" (after Ps. cxlvi. 8).

(7) When sitting up and moving one's limbs: " . . . who loosest them that are bound" (Ps. cxlvi. 7).

(8) When dressing: " . . . who clothest the naked" (Ps. cxlvi. 8).

(9) When standing erect: " . . . who raisest up those that are bowed down" (compare "Halakot Gedolot," ed. Hildesheimer, p. 77). When sitting up: "Who liftest up those that are low" (*ib.*).

(10) When stepping upon the ground: " . . . who spreadest forth the earth above the waters" (Ps. cxxxvi. 6).

(11) On stepping forth to walk: " . . . who hast made firm the steps of man" (Ps. xxxvii. 23).

(12) When putting on shoes: " . . . who hath supplied me with every want."

(13) When girding the belt about oneself: " . . . who girdest Israel with might" (Jer. xiii. 11; Ps. xlv. 7).

(14) When putting on a head-covering: " . . . who crownest Israel with glory" (Isa. lxi. 10; פאר = "glory," name for miter).

(The following alternative is not found in the Talmud, and is disallowed in Shulḥan 'Aruk, Oraḥ Ḥayyim, xlvi. 6: " . . . who givest strength to the weary.")

(15) When washing the face: " . . . who removest sleep from mine eyes and slumber from mine eyelids."

Here follows a prayer for a day free from sin and temptation and graced by favor of God and man, which closes thus: " . . . who bestowest loving-kindness" (late addition, "upon Thy people Israel").

(16) Every one must offer three benedictions daily, namely: " . . . who hast made me an Israelite (or who hast not made me a heathen)"; " . . . who hast not made me a woman"; " . . . who hast not made me a slave [or a boor]" (Tosef., Ber. vii. 18; Yer. Ber. ix. 2, p. 13b; Men. 43b; "Halakot Gedolot," p. 77. Persian and Greek parallels are given by Joël, "Blicke in die Religionsgeschichte," i. 119; Kaufmann, "Monatsschrift," pp. 14-18). For woman the benediction is substituted: " . . . who hast made me according to Thy will."

The following benediction adopted in the Prayer-Book is, according to Yer. Ber. ix. 2, preserved in full in Yalḳut, Wa'etḥanan, 836, offered by the angels at the time when the Shema' is recited by Israel: "Thou wast one ere the world was created; Thou hast been the same since the world hath been created. Thou art the same in this world and the same in the world to 1893. come. Sanctify Thy name through those that sanctify it, . . . who sanctifiest Thy name among the multitudes."

(17) Before and after the reading of the Psalms in the morning service: BARUK SHE-AMAR and YISHTABBAḤ.

(18, 19) Before reading Shema' in the morning, "Yoẓer Or" and AHABAH RABBAH.

(20) After Shema', EMET WE-YAẒIB.

(21-39) The "'Amidah," seven (or eighteen, increased later on to nineteen), benedictions, consisting of three principal benedictions of praise at the beginning, three at the close, and twelve or thirteen (on week-days; on Sabbath and holy days only one) inserted in the middle (see SHEMONE 'ESRE). In case of need one benediction, HABINENU, containing the contents of the twelve, is offered as substitute for week-days also (Ber. 29a).

(40) Before the reading from the Law two different benedictions were in use in the third century, and both have been adopted in the Prayer-Book; one beginning, " . . . who teachest the Law to Thy people Israel," and ending with, " . . . who hast commanded us to occupy ourselves with the words of the Law"; the other, " . . . who hast chosen us from all peoples and hast given us Thy Law," and closing with, " . . . who gavest the Law." After the reading: " . . . who hast given us the Law of truth and hast planted everlasting life in our midst"; and closing with, " . . . who gavest the Law" (see Ber. 11b; "Masseket Soferim," xiii. 8).

(41) The benediction "Hashkibenu" in the evening prayer has been mentioned above; this is followed on week-days by:

(42) "Baruk Adonay le-'Olam," Psalm verses corresponding to the "Baruk she-Amar," which are concluded with the benediction referring to the Messianic kingdom: " . . . the King who will reign forever and aye over all His creatures."

(43) Before and after the recitation of HALLEL as mentioned above.

(44) "Musaf" consists of seven benedictions, with the exception of that of New-Year, which has three more.

(45) The benedictions before and after the HAFṬARAH, mentioned above.

(46) To the same category as the preceding belong the benediction before and that after the recitation of the Megillah or scroll of the Book of Esther on Purim (Meg. 21b).

(47) The benediction over the reading of the four scrolls—Canticles, on Passover; Ruth, on Shabu'ot; Ecclesiastes, on Sukkot; and Lamentations, on the Ninth of Ab, mentioned in "Masseket Soferim," xiv. 3, has fallen into disuse, as has also the benediction over the reading of the Hagiographa (*ib.* 4).

(48, 49) On putting on the tallit and the tefillin on the arm and the forehead respectively (Ber. 60b; Yer. Ber. ix. 2, 14a; Tosef., Ber. vii. 10; and Men. 36a, 42b).

(50) Benediction for the Aaronites when they offer the priestly benediction (Soṭah 39a).

(51) On kindling the lights on Sabbath and festival eve ("Yad," Shabbat, v. 1; Hagahot Maimuni referring to Yer. Ber. ix.); see BLESSING, PRIESTLY.

(52) On kindling the Ḥanukkah lights, with the additional benediction: " . . . who hast done wonders to our fathers in days of old at this season" (Shab. 23a).

(53, 54) ḲIDDUSH and HABDALAH, *q.v.*

(55-62) On affixing a MEZUZAH to a doorpost: " . . . who hast sanctified us by Thy commandments and enjoined us to affix the Mezuzah." Similarly, on building the battlement for the roof prescribed in Deut. xxii. 8; on the consecration of the ḤALLAH, or Terumah; on the 'ERUB; at the performance of the ritual slaughtering, and the covering of the blood, special blessings are said, as also at the removal of the leavened bread before Passover and the eating of the MAẒẒAH; at the counting of the days of 'OMER; at the preparation for and first entering into the SUKKAH; on the blowing of the SHOFAR on New-Year's Day; at the performance of the rite of ablution of persons and vessels (Yer. Ber. ix. 2, p. 14a; Tosef., Ber. vii. 9-10; "Yad," Berakot, xi.; Baer's Prayer-Book, pp. 570-571; Ber. 51a).

(63, 64) On betrothal and marriage, see BETROTHAL and MARRIAGE.

(65) On circumcision, see CIRCUMCISION.

(66) On redeeming the first-born, see PIDYON HA-BEN.

(67) Over the mourners' meal (Ket. 8b), see FUNERAL RITES.

(68) On the arrival of a new season, or of any joyous event in one's life: " . . . who hast kept us in life and preserved us and permitted us to reach this season."

Thanksgiving for Enjoyments.

(69) Blessing over the bread: " . . . who hast brought forth bread from the earth" (Ber. vi. 1, 38a, after Ps. civ. 14).

(70) Over the wine: " . . . who hast created the fruit of the vine" (Ber. vi. 1).

(71) Over food other than bread prepared of flour: " . . . who hast created various kinds of food" (Ber. 36b).

(72) On eating fruit which grows on trees: " . . . who hast created the fruit of the tree" (Ber. vi. 1).

(73) On eating fruit which grows on the ground: " . . . who hast created the fruit of the ground" (Ber. vi. 1).

(74) After having finished the meal, see GRACE AFTER MEAL.

(75) A benediction containing in abridged form three of the usual graces after meals, after having eaten such fruits as the Holy Land is especially blessed with, such as grapes, dates, figs, and pomegranates, or after having taken wine or partaken of other food than bread.

(76) On eating food that does not grow on the ground, or drinking water, or other liquor: " . . . by whose word all things have been made to exist" (Ber. vi. 3).

(77) After partaking of any of these, or of fruit: " . . . who hast created beings and what they need. For all that Thou hast created to sustain therewith the life of each living being, blessed be He who livest forever" (Ber. vi. 8; Tos. iv. 16; according to R. Ṭarfon, before the eating, Yer. Ber. 10b). In Yer. Ber. *l.c.*, and Tosef. Ber. iv. 4 other benedictions over special kinds of food are given; but these were not adopted by the casuists.

(78) On smelling: "Blessed art Thou who hast created fra-

grant woods," "fragrant spices," and "fragrant oils," "odorous plants," and "odorous fruits" (Ber. 43b).

(79) On seeing lightning, falling stars, lofty mountains, great deserts (also the sun at the beginning of a new cycle of twenty-eight years), or the sky in all its beauty: " . . . who hast made Creation" (Ber. ix. 2; Tosef., Ber. vii. 6; Ber. 59b).

Upon Seeing Natural Phenomena.

(80) On hearing thunder, or witnessing an earthquake or hurricane: " . . . whose might and power fill the world" (Ber. ix. 2).

(81) At the sight of the sea: " . . . who hast made the great sea" (*ib.*).

(82) On seeing blossoms budding for the first time in the spring: " . . . who hast made Thy world lacking in naught, but hast produced goodly creatures and goodly trees wherewith to give delight to the children of men" (Ber. 43b; R. H. 11a).

(83) On seeing beautiful persons, trees, or animals: " . . . who hast such as these in the world" (Ber. 58b; Tosef., Ber. vii. 4).

(84) On seeing strangely formed beings such as giants and dwarfs, or elephants and apes: " . . . who variest the forms of Thy creatures" (Ber. *l.c.*; Tos. vii. 5).

(85) On seeing persons stricken with blindness, lameness, or loathsome diseases, or holy places in a state of desolation, or on hearing evil tidings: " . . . the true Judge" (Ber. ix. 2 and *l.c.*).

(86) On hearing good tidings or witnessing joy: " . . . who art good and dispensest good" (Ber. *l.c.*).

(87) On seeing the rainbow: " . . . who rememberest the covenant, art faithful to Thy covenant, and keepest Thy promise" (Tosef., Ber. vii. 5; a composite prayer, see Ber. 59b).

(88) On seeing holy places restored after long desolation: " . . . who reestablishest the border of the widow" (Ber. 58b, after Prov. xv. 25).

(89) On seeing a friend after a year's separation: " . . . who revivest the dead" (Ber. 58b; compare Pirke R. El. xxxi.). When restored from a dangerous sickness: " . . . Blessed be the Merciful who gave Thee back to us and not to the earth" (Ber. 54b).

On Seeing Remarkable Persons.

(90) On seeing a scholar or sage of distinction: " . . . who hast imparted of Thy wisdom to flesh and blood" (*ib.*).

(91) On seeing a king or ruler of a country: " . . . who hast imparted of Thy glory to flesh and blood" (*ib.*).

(92) On seeing the myriads of Israel gathered together: "Blessed be He who knowest the secret thoughts of all these" (Ber. *l.c.*).

(93) After having escaped perils, see GOMEL BENSHEN.

(94) On entering a burial-ground: "Blessed be the Lord who hath formed you in judgment, and nourished and sustained you in judgment, and hath brought death on you in judgment. He knoweth the number of you in judgment and will hereafter restore you to life in judgment, . . . who revivest the dead" (Ber. 58b).

(95) On seeing a place where a miracle happened to Israel of old: " . . . who hast performed miracles for our fathers at this place" (Ber. ix. 1).

(96) On seeing a place from which idolatrous practises have been removed: " . . . who hast removed idolatry from this place" (*ib.*). On seeing a place where idolatry is practised: " . . . who showest long-suffering to those who transgress Thy will" (Ber. 57b).

(97) On the appearance of the new moon, see NEW MOON.

A. K.

BENEDICTUS, COENRAAD: "Mohel" and surgeon at Surinam, Dutch Guiana, about 1830. Nothing is known of his life nor of his literary activity other than the bare fact that he published at Paramaribo in 1830 (?) a tract describing the operation of circumcision, together with a series of questions and answers for use in examining candidates for the office of mohel. The book is extremely rare. The Hebrew quotations occurring in the text are filled in by the author in his own writing, as there was probably no Hebrew type to be had in Paramaribo at that time. The title of the book is "Examen voor den Nieuw aan te Nemen Moël of Besnijder der Israël. Kinderen. Hierbij Gedeeltelijk het Mannelijk lid Ontleed, ook Leersame Beschrijving der Besnijdenis en *Circum Cisione* Operatie . . . in Vragen en Antwoorden."

BENEDIKT, EDMUND: Austrian jurist; born at Döbling, near Vienna, Oct. 6, 1851. He studied law at the University of Vienna, and after graduation became the publisher of the "Juristische Blätter." In addition to his editorial labors he wrote: "Reform des Schadenrechts bei Ehrenbeleidigungen," 1885; "Reformation der Konkursordnung," 1887; "Einfluss des Schwurgerichts auf das Materielle Strafrecht," 1888; and "Bemerkungen über das Urheberrecht und den Gesetzentwurf der Oesterreichischen Regierung," 1893.

BENEDIKT, MORITZ: German journalist, publisher, and editor of the Vienna "Neue Freie Presse"; born at Gnatschitz, Moravia, May 27, 1849. On attaining his majority he chose journalism as a profession, contributing with considerable success to various dailies and periodicals in Germany. In 1872 he joined the staff of the "Neue Freie Presse," becoming editor of the economic section in 1879. The two years following he devoted to the publication of a series of articles on economic, commercial, and financial subjects, which articles attracted considerable attention. In 1880 he became chief editor.

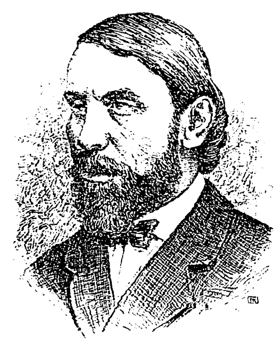
BENEDIKT, MORIZ: Austrian neurologist; born at Eisenstadt, Hungary, July 6, 1835. Upon his graduation from the University of Vienna, where he had prepared himself for his professional career under Hyrtl, Brücke, Skoda, Oppolzer, Arlt, and Rokitansky, he received, in 1859, the degree of doctor of medicine and surgery; and immediately enlisted in the Austrian army—the war then going on with France and Italy demanding the services of surgeon-volunteers. At the close of the campaign that was so disastrous to Austria, Benedikt was appointed privat-docent at the University of Vienna, first delivering lectures on electrotherapeutics and later adding a course on neuropathy.



Moriz Benedikt.

In the mean time, in 1866, Austria became involved in another war, this time with Prussia and Italy, and Benedikt again volunteered his services to the army. At the conclusion of that short but bloody contest which resulted in the establishment of the dual state of Austria-Hungary, Benedikt, who took an active part in the reorganization of the Democratic party in Cisleithania (that is, Austria as distinct from Hungary), was, in 1868, offered a chair of neurology at the University of Vienna. He has remained in that position to the present time, serving also as chief of one of the departments of the policlinic of the Austrian metropolis.

A Pioneer Criminologist.

The greater part of Benedikt's professional work appertains undoubtedly to the domains of neuropathy and electrotherapeutics, but while his investigations in this special field form an important addition to the progress of medicine, and would alone entitle him to a prominent position in the medical world, they in no way overshadow his researches in other lines, especially his important psychological and anthropological studies with regard to criminals. Indeed, it may be said that he is one of the pioneers of modern criminology, which seeks to base its theories directly on anthropological and psychological data.

Among his contributions to the study and treatment of nervous diseases the following deserve first mention: "Electrotherapie," Vienna, 1868; and "Nervenpathologie und Electrotherapie," Leipsic, 1874–75—two treatises embodying the lectures delivered by Benedikt at the University of Vienna. In the field of psychology, both normal and pathological, two works from his pen have met with marked success; namely, "Seelenkunde des Menschen" (also translated into Polish) and "Hypnotismus und Suggestion" (also in Italian).

Among his anthropological studies dealing for the greater part with craniometric and cranioscopic investigations, especially with regard to criminals, may be mentioned "Kraniometrie und Kephalometrie" (also in French). Another important contribution to modern criminology—namely, his "Anatomische Studien an Verbrechergehirnen," Vienna, 1876—has been translated into English under the title "Studies on the Brains of Criminals."

Wide Range of Contributions.

Besides the above-named larger works, Benedikt has contributed a great number of important papers on anthropology; on normal, comparative, and pathological anatomy; on physiology and neurology; on normal, pathological, and criminal psychology; on ophthalmology and otiatrics. Among these contributions, scattered throughout various periodical publications, the following are noteworthy:

"Experimentelle Studien über die Wirkung von Jod, etc., auf's Nervensystem," in "Jahrbuch der Gesellschaft der Aerzte," Vienna, 1861; "Beiträge zur Neuropathologischen Casuistik," in "Deutsches Archiv für Klinische Medicin," ix. and xiii.; "Zur Pathologischen Anatomie der Lyssa," in "Virchow's Archiv," lxiv., lxxii. (and in the "Wiener Medic. Presse," 1874); "Ueber die Innervation des Plex. Choroid. Inf.," *ib.*, lix.; "Zur Lehre der Entzündlichen Kernwucherung," in "Centralbl. für Medic. Wissensch.," 1874; "Zur Lehre des Raubthiertypus am Menschlichen Gehirne," *ib.* 1876; "Der Hinterhauptstypus der Säugethiere," *ib.* 1877; "Zur Frage des Vierwindungstypus," *ib.* 1880; "Ueber Lymphorrhagie in Granulardesintegration," in "Mittheilungen des Aerztlichen Vereins," Vienna, 1874; "Ueber Katalepsie und Mesmerismus," in "Wiener Klinik," 1880; "Zur Lehre von der Localisation der Gehirnfunctionen," *ib.* 1883; "Die Elektricität in der Medicin," *ib.* 1884; Ueber Einige Grundformeln des Neuropathologischen Denkens," *ib.* 1886. A number of important papers, which have appeared in the pages of the "Wiener Medic. Presse," between the years 1869 and 1882, deal with neuropathic cases observed by Benedikt, and with electrotherapeutic methods, either demonstrated or invented by him.

Ophthalmology, Otiatrics, Physics.

Among his contributions to ophthalmology and otiatrics should be mentioned: "Studien über Augenmuskellähmungen," in "Gräfe's Archiv," vol. x.; "Der Daltonismus bei Sehnervenatrophie," *ib.*; "Die Theorie der Neurotinotis," in "Pester Medic. Presse," 1867; "Hörnerven," in "Wiener Medic. Presse," 1870.

Benedikt has also labored in the field of pure physics, and among the many papers that have appeared over his name in the "Sitzungsberichte der Wiener K. K. Akademie der Wissenschaften" for 1857 are: "Ueber die Aenderung des Magnetismus Durch Reibungselectricität" and "Ueber die Abhängigkeit des Electrischen Leitungswiderstandes von der Grösse und Dauer des Stromes." In the second of these papers the author announces, for the first time, the fact discovered by him, that the resistance of a conductor is affected by the current itself.

Politics, Ethics, Literature.

In the midst of his various professional duties and extensive scientific research, Benedikt found time to write on social and political questions of the day, and on moral philosophy and esthetics—his articles appearing in French, Italian, and English, as well as in German. At the beginning of his professional career Benedikt devoted himself to the study of modern literature, and his first published work was one on dramatic art in Austria, written while he was still a medical student at the university, entitled "Studien über Oesterreichische Dramatische Dichter," Vienna, 1854. Benedikt is a champion of woman's rights, and was the first male president of the Verein für Erweiterte Frauenbildung in Vienna. His valuable professional services have been recognized by different governments as well as by numerous scientific bodies. A recipient of the degree of LL.D. (*honoris causa*) from several prominent universities, he has also been decorated with various orders and crosses. He is corresponding member of the academies of medicine of Paris and of Rome, and member of a great many medical and scientific societies in Europe and the United States.

BENEDIKT, RUDOLPH: Austrian chemist; born at Döbling July 12, 1852; died in Vienna Feb. 6, 1896. He was educated at the Polytechnic (High

School) of Vienna, where in 1872 he was appointed an assistant lecturer of technical chemistry. In 1876 he was nominated to a similar post in connection with the studies in analytical chemistry, and in 1890 was appointed full professor. His principal work is "Die Künstlichen Farbstoffe," 1883. Among his articles in technical journals are: "Ueber Salze und Borsäure," in "Vortrag, Gegeben in der Deutschen Chemischen Gesellschaft," Berlin, 1874; and "Halogenderivate" in "Sitzung-Bericht der Kais. Akademie der Wissenschaften," Vienna, 1884.

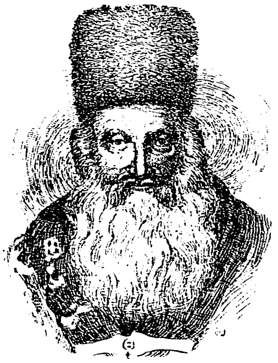
BENET, MORDECAI B. ABRAHAM (MARCUS BENEDICT): Talmudist and chief rabbi of Moravia; born in 1753 at Csurgó, a small village in the county of Stuhlweissenburg, Hungary; died at Carlsbad Aug. 12, 1829. As Benet's parents were very poor and consequently unable to engage a teacher, they sent their son when only five years old to his grandmother at Nikolsburg. There Gabriel Markbreiter provided for the tuition of the gifted child for a period of six years, and then sent him to Ittingen, Alsace, the rabbi of which place was Markbreiter's brother-in-law. The latter became Benet's teacher, and took great delight in his pupil's wonderful development. At Benet's "bar mizwah" (religious majority) celebration his teacher showed the guests, to their great astonishment, three of the boy's manuscripts—a commentary on the Pentateuch, a commentary on the Passover Haggadah, and novellæ on the Talmud.

A Gifted Child.



Mordecai Benet.

From his thirteenth to his fifteenth year Benet devoted himself exclusively to the study of the Bible, with the aid of the Jewish commentaries and of the Haggadah in Talmud and Midrash; and his strictly halakic studies he completed later in the yeshibah of Joseph Steinhard at Fürth, where he remained three years. He then went as a "ḥaber" to Prague, where Meïr Karpeles started a private "klaus" for him; and though Ezekiel Landau conducted a large yeshibah in the same city, a number of able Talmudists came daily to hear Benet's discourses. After staying at Prague two years he married Sarah Finkel (died 1828), the daughter of a prominent well-to-do citizen of Fürth, and settled at Nikolsburg (1773), and within a year was made "ab bet din" (ecclesiastical assessor). Thirteen years later he accepted the rabbinate at Lundenburg in Moravia, which he held for six months, when he resigned to become rabbi at Schlossberg, Hungary. His stay in his native country was short; and in 1789 he was made rabbi of Nikolsburg and chief rabbi of Moravia. Later on he received offers also from Presburg and Cracow, but yielding to the solicitations of his congregation, he remained at Nikolsburg. Overstudy, however, had brought on a nervous affection in his youth, which clung to him throughout life, and was the cause of his death, which, as stated, took place at Carlsbad, whither he had gone for treatment. His body was buried temporarily at Lichtenstadt, near Carlsbad, but seven months later was permanently interred at Nikolsburg in accordance with his will.

His Works.

Although Benet's works are neither numerous nor exhaustive, they are among the classic products of Talmudic literature in the eighteenth century. They are (1) "Biur Mordecai" (The Commentary of Mordecai), Vienna, 1813, a commentary on Mordecai b. Hillel's compendium; (2) "Magen Abot" (Shield of the Fathers), Zolkiev, 1835, a treatise on the forty-nine acts prohibited on the Sabbath; (3) "Har ha-Mor" (Mountain of Myrrh), responsa, with allusion to the rabbinical explanation of the name "Mordecai" by "Mara dakya" (= pure myrrh); (4) "Parashat Mordecai" (The Explanations of Mordecai), Szigeth, 1889, responsa; and (5) "Tekelet Mordecai" (Mordecai's Purple Garment), Lemberg, 1892, halakic and haggadic discourses.

All these works clearly show Benet's keenness, wide knowledge of rabbinical literature, and, what is still more important, his logical and strictly scientific method. In contrast to his friends Moses Sofer and Akiba Eger, who were casuists, Benet avoided casuistry in discussing involved halakic questions; gaining his ends by means of a purely critical explanation and a systematic arrangement of the matter. An excellent example of Benet's criticism is his letter to the chief rabbi of Berlin, Ẓebi Hirsch Levin, whom he tries to convince of the spuriousness of the collection of responsa "Besamim Rosh." This collection was published by Saul Berlin, Levin's son, as the work of Asher b. Jehiel ("Parashat Mordecai," No. 5; "Literaturblatt des Orients," v. 53, 55, 140). A comparison of Benet's criticism on the work with Zunz's remarks on it ("Ritus," pp. 226–228) can not fail to excite admiration of Benet's method.

Superiority of His Style.

Benet's works differ in other respects from those of his contemporaries. While his style is clear and elegant, and his language a pure Hebrew, the style of his colleagues is confused and barbarous, and their language an incorrect Hebrew mixed with the corrupt Aramaic found in rabbinical literature. Moreover, Benet's attitude toward the strict orthodoxy of his friends and colleagues was exceptional, and may be attributed to his knowledge of modern thought (compare his letter to Ẓebi Hirsch Levin in "Literaturblatt des Orients," v. 54). These characteristics gave him an independent position in the struggle between orthodoxy and the so-called "spirit of enlightenment."

Benet and the Reform Movement.

Though Benet's course in this struggle was in accordance with his early training and station in life, he was probably the only orthodox rabbi who thoroughly understood the new current of thought into which Jews as well as non-Jews were being drawn at that time. He knew the enemy that confronted him, and realized the futility of employing for defense the rusty weapons of the Talmud. It is true, he avoided the name of Mendelssohn in his approbation (dated Nov. 8, 1816) to the new edition of the Pentateuch with Mendelssohn's translation; but the very fact that he approved a German translation of the Bible at all shows that he ought not to be classed with men like Moses Sofer. He opposed the attempted reforms of Aaron Chorin; but he did it quietly and temperately, contenting himself with the remark that something more than philosophical study is required to decide theological questions.

Views on Education.

Frequently Benet showed an insight lacking in his opponents. In his memorial to the government on the education of rabbis (printed in "Toledot Mordecai," pp. 35–37), he remarked that if the course of studies which the gymnasium demanded of candidates for all other professions were required of a rabbinical candidate, the latter would be fit for anything except the rabbinate. Still, far from objecting to a secular education for rabbis, as he was understood to do (see Löw, "Gesammelte Schriften," ii. 190 *et seq.*), he favored it; but he thought that a rabbi should first of all possess sufficient knowledge of rabbinical matters; and he proposed that a rabbinical candidate should devote his time chiefly to Jewish subjects until his eighteenth year. His opinions concerning the duties of a rabbi, especially in regard to the instruction of children, show the strong influence that modern views had upon him. He wrote a catechism for religious instruction and submitted it in manuscript to the government. To judge from the letter accompanying it, Benet's views on the education of the young were sensible and in accordance with the spirit of the time.

Opposes Religious Reform.

Nevertheless, Benet, conscientiously opposing the new tendency, declared every reform in religious observance to be wrong and harmful. Thus, in a letter to the government concerning the introduction of German into divine service (*ib.* pp. 38–42), he wrote in favor of the preservation of Hebrew. His attitude is significant in view of the fact that, many years later, Zacharias Frankel used the same arguments in the convention of rabbis at Frankfort-on-the-Main, 1845; and events have proved the truth of the prophecy made by Benet, that if the prayers are said in another language few Jews will care to study Hebrew, and familiarity with the Hebrew Scripture will gradually cease.

Although Benet was independent in his attitude, his learning and high character gained for him many faithful friends among young and old. Even the Ḥasidim respected him; and Baer Schneiersohn, the so-called "middle rabbi," speaks highly of him in a letter now in the possession of J. L. Sossnitz of New York. Compare also Weiss, "Zikronotai," pp. 77–81.

The communities of Lichtenstadt and Nikolsburg contended for the honor of interring his mortal remains; and the dispute which later arose over the exhumation of the body was fought with the weapons of learning, and figures in the responsa literature of the time.

L. G.

BENET (BENEDICT), NAPHTALI BEN MORDECAI: Author and rabbi; born at the end of the eighteenth century; died October, 1857, at Schafa, Moravia, where he was rabbi. He was the author of the following works: (1) "Berit Melaḥ" (Covenant of Salt), Prague, 1816, a collection and explanation of the precepts in regard to the laws of salting the meat, in order to remove the blood (Yoreh De'ah, 69–78); (2) "Misped Gadol" (Great Mourning), Vienna, 1830, a eulogy on the death of his father, Mordecai Benet; (3) "Emunat Yisrael" (Israel's Faith), Prague, 1832, a Jewish catechism in Hebrew and German; (4) "Imre Shefer" (Goodly Words, Gen. xlix. 21), Presburg, 1840, a funeral oration on Moses Sofer; (5) "Torat Dat Mosheh we-Yisrael" (Doctrine of the Law of Moses and Israel), Prague, 1826, on the principles of the Jewish religion.

The catechism became very popular and passed through several editions. Though Benet's standpoint was strictly orthodox, he did not carry his orthodoxy to extremes, as can be seen from a correspondence with Isaac Samuel Reggio on the question of future punishment ("Kerem Ḥemed," i. 9), in which he shows himself vacillating on this point.

Benet's "Torat Dat Mosheh we-Yisrael" is also written from a moderate orthodox point of view; but he accepted his father's views in opposing the Reform movement, and assails Aaron Chorin as a man actuated by personal motives in advocating reform.

BENEVENTO: City in southern Italy; capital of the province of the same name; about 32 miles northeast of the city of Naples. Benjamin of Tudela visited it about 1165, and found there 200 Jewish families, having at their head three parnasim: Kalonymus, Zeraḥ, and Abraham ("Mas'ot Binyamin," ed. Asher, p. 13). This unimportant community increased after the Spanish exile. When King Ferdinand conquered the kingdom of Naples (1504), he established the Inquisition at Benevento in order to exterminate the Spanish and Portuguese Maranos who had settled there in somewhat large numbers.

D. I. Br.

BENFELDEN: Town in Alsace, 17 miles from Strasburg. It was here, in the year 1348, when Europe was devastated by the Black Death (the spread of which was ascribed to the Jews), that a council was held of the representatives of the towns in Alsace to consider the proper course to be adopted with reference to the Jews. One of the leading spirits in the council was Bishop Berthold of Strasburg, who firmly demanded that the Jews be entirely destroyed. The representatives from Strasburg maintained a gallant struggle against the superstitious bigotry that sought some scapegoat for the evil that had befallen the land, and against the cupidity and rapacity that scented a prospect for plunder.

The struggle was useless, and it was decided that all the Jews should be banished from the cities of the upper Rhine. The results of this decision of the Council of Benfelden constitute one of the most tragic chapters in the gloomy history of the persecution of the Jews.

G.

BENFEY, THEODOR: German Sanskritist and comparative philologist; born at Nörten, Hanover, Jan. 28, 1809; became a convert to Christianity in 1848; died June 26, 1881. His father, who had seven children besides Theodor, was a Jewish merchant deeply versed in the Talmud. Theodor received his preliminary training at the gymnasium in Göttingen, which he left at the age of sixteen for the university of the same city. As a university student he devoted himself to classical philology, and remained in Göttingen—with the exception of the year 1827, spent at Munich—until 1830. On Oct. 24, 1828, he received the degree of Ph.D., and the year following became privat-docent. He left Göttingen in 1830 and lived in Frankfort-on-the-Main for two years. Here he occupied himself with a translation of Terence, his only printed contribution to classics; and, what was of far more importance for his life-work, devoted himself seriously to Sanskrit.

Theodorus Benfey

In 1832 he left Frankfort for Heidelberg, where he contemplated teaching Sanskrit, but his love for his alma mater was too strong to permit him to become a member of the faculty of another university. Accordingly, in 1834, he returned to Göttingen, where he began his teaching rather in classical than in Oriental or comparative philology. Gradually, however, he concentrated his energy on Sanskrit and comparative linguistics. Benfey's teaching covered a large range within his chosen limits. In addition to his regular work he lectured on Indian antiquities, on the Avesta, and, going farther afield, gave courses in ethnography from the linguistic point of view (1843), and in Bengali and Hindustani (1863-64). It is interesting to note that, in 1843, he lectured on the affinity of the Egyptian and Semitic groups of languages. This single series of lectures, together with the book which was the result of the course—"Ueber das Verhältniss der Aegyptischen Sprache zum Semitischen Sprachstamm," 1844—is his only important work that deals with Semitic linguistics.

His Wide Range.

His literary activity began comparatively late. Before 1839 he published very little. Even his doctorate dissertation, "De Liguris," and his dissertation to obtain the *venia legendi*, "Observationes ad Anacreontis Fragmenta Genuina," remained unprinted. Besides the translation of Terence in 1837, already referred to, and a few reviews, his only work published prior to 1836 was one written in collaboration with Moritz A. Stern, "Ueber die Monatsnamen Einiger Alten Völker," 1836.

Semitic and Sanskritic Works.

The silent years before 1839 had been a time of preparation, but after that period his contributions to linguistics were numerous. His "Griechisches Wurzellexikon," 1839-42, won the Volney prize. The year 1840 saw the appearance of his article on "India" in Ersch and Gruber's "Encyklopädie der Wissenschaften und Künste," and his Semitic contribution, already noted, was published in 1844. In 1847 he brought out the first German edition of the Old Persian Inscriptions, basing his work mainly on Rawlinson's results, which had appeared the previous year. The year 1848 was the date of Benfey's edition of the Sāma Veda, with introduction, glossary, and translation. He published in 1852 his "Vollständige Grammatik der Sanskritsprache," and followed this the next year with his valuable "Chrestomathie aus Sanskritwerken," and in 1855 with his "Kurze Sanskritgrammatik." His two English books—the "Practical Grammar of the Sanskrit Language" (1863-66), and the "Sanskrit-English Dictionary," 1866—were, as he himself recognized, less creditable to his scholarship than were his earlier works.

His Last Important Works.

The results of his studies in comparative literature were summed up in his translation and commentary on the Panchatantra, which appeared in 1859, and is still a standard. In the preface of this work, which comprises the entire first volume, he traces the development of the various Indian tales through other Oriental literature to European collections of beast fables and stories, partly through the intermediation of Jewish translators (see Kalila wa-Dimna). His last great work was the "Geschichte der Sprachwissenschaft und Orientalischen Philologie in Deutschland," 1869. Here he traces the history of Oriental research in Germany, both in Semitics and in Indo-Iranian, down to his own time, with a thoroughness which makes the work still one of value. After 1869 he published no books, although he continued to write reviews and magazine articles. At his death he left material, which he had been gathering for years, for a grammar of Vedic Sanskrit. This he had hoped to make the chief production of his life. Unfortunately this work was left in such a chaotic state that it is impossible to edit it or to know what the author's conclusions were to have been.

Silent Heroism and Influence.

Benfey's rise was by no means rapid, yet he never lost patience, even when those inferior to himself in age or ability were promoted over him. Beginning his work at Göttingen in 1834 as privat-docent, he waited fourteen years before he became assistant professor without salary, in 1848, after which a second period of fourteen years elapsed before he was appointed professor in 1862. Under these circumstances he made several efforts to gain a more profitable position elsewhere, but all his endeavors in this direction were in vain.

As a teacher Benfey was broad, and his interests were manifold. Few men have exercised an influence over more pupils, for he was a teacher as well as a savant. This breadth of view explains the reason why he founded no school, and trained no pupil who can be said to have succeeded him to carry on, unchanged, his method and tradition. He established a periodical, "Orient und Occident," in 1862, to defend his scientific principles, and both he and his students contributed to it numerous articles. Unfortunately the magazine had to be discontinued in 1866.

He left the Jewish faith in 1848, and with his family joined the Evangelical Church. His change of religion was prompted solely by the social privileges that were then possessed by Christians alone. The result of his abandonment of Judaism was not what he had expected. It was a positive disadvantage to him, and accounts in part for his slow rise to full professorship.

BIBLIOGRAPHY: A life of Benfey is given by his daughter Meta in the edition of his *Kleinere Schriften*, edited by Bezzenberger.

S. L. H. G.

BENGAZI or **BENGHAZY:** City of Tripoli, Africa, on the east coast of the Gulf of Sidra. Little is known of the first settlement of the Jews there; according to local traditions, they came originally from Tripoli.

The chief rabbis of the community in the nineteenth century were: Moses Hakmon, Isaac Boharon, and Rahamim Farju of Tripoli; the last, installed in 1871, still holds office (1901). As rabbinical author must be mentioned Elijah Labi, a centenarian (1783–1883). He wrote the "Sefer Ge'ullat Adonai" (Book of God's Deliverance) (Leghorn, 1864), in Hebrew, and the "Orah Yesharim" (The Path of the Upright) and "Menuhah le-Ḥayyim" (Rest for the Living) (Leghorn, 1872 and 1882), in Judæo-Arabic; *i.e.*, in Rabbinic characters and in Arabic-Tripolitan dialect.

As a bit of history must be mentioned the kidnaping of a young Jewish girl by Arabs, in 1868, an affair that was only adjusted by the intervention of the Alliance Israélite Universelle and the European consuls.

In 1901 the community numbered 2,000 Jews, in a total population of 38,000. It has two synagogues —the Low Synagogue, which is said to be very old; and the High Synagogue, of more recent date—and four Talmud Torahs, attended by 200 pupils. The community is governed by a supreme judge (Abraham Ḥabib in 1901), in addition to the rabbi and by three syndics ("gabbaim"). The salaries of these officials are paid from the meat-tax, amounting annually to 3,000 francs. There are two societies: the Ḥebra Ḳaddishah, a burial society, and the Biḳḳur Ḥolim, which furnishes medicine and physicians to the poor.

The Jews of Bengazi are prosperous. The majority trade in wool, barley, and butter. Others follow trades, as jewelers, tinsmiths, carpenters, etc. A Jew, Hamus Români, is one of the higher officials of the Serail, or administration of the department. The richest families are those of Tchuba, Youeli, and Ḥakmon. There are very few poor. Some of the Jews have very curious names; *e.g.*, as "Schima," "Touajir," "Bedoussa," etc.

BENHAM, ARTHUR: Dramatic author; born 1875; died at Brighton, Eng., Sept. 8, 1895. He was a playwright of considerable promise, and was the author of two plays, "The County" and "The Awakening"—the latter produced for a short run at the Garrick, and the former at Terry's Theater—when he was only twenty years old. He died of consumption when scarcely past his twentieth year. His sister was the actress **Estelle Burney,** who collaborated in his plays, and was his tender nurse during his long illness.

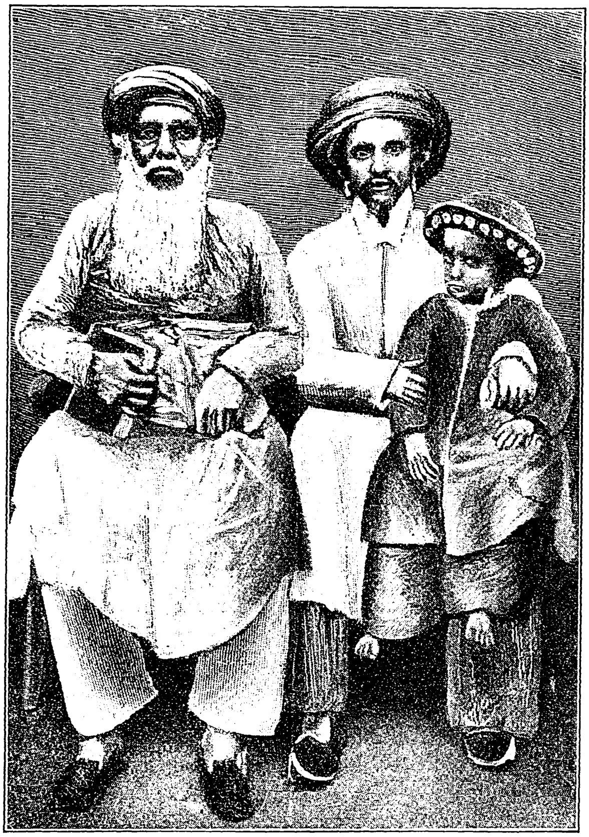
BENI-ISRAEL: Native Jews of India, dwelling mainly in the presidency of Bombay and known formerly by the name of **Shanvar Telis** ("Saturday Oil-Pressers") in allusion to their chief occupation and their Sabbath-day. The Beni-Israel avoided the use of the name "Jew," probably in deference to the prejudice of their Mohammedan neighbors, and preferred the name Beni-Israel in reference to the favorable use of the term in the Koran (sura ii. 110). According to their own traditions, they are descended from the survivors of a band of Jews fleeing from persecution who were wrecked near the Henery and Kenery islands in the Indian ocean, fifteen miles from Cheul, formerly the chief emporium of the trade between Arabia and India. Seven men and seven women are stated to have been saved from drowning; and from them are descended the Beni-Israel. This is said to have been from sixteen hundred to eighteen hundred years ago. Benjamin of Tudela appears to have heard of them in the twelfth century, and Marco Polo in the thirteenth; but they were first brought to the knowledge of Europeans, simultaneously with the White and Black Jews of COCHIN on the Malabar coast, by Christian missionaries in India, like Drs. C. Buchanan and Wilson, at the beginning of the nineteenth century. On the advent of the SASSOON family at Bombay, more direct interest was taken in the Beni-Israel by Western Jews, and much educational work has since been done among them.

Internal History.

The Beni-Israel themselves refer to two religious revivals among them during their stay in India: the first, placed by them about 900 years ago, due to David RAHABI, and another, about the year 1796, due to Samuel DIVEKAR. According to tradition, Rahabi was a Cochin Jew, whose family had come from Egypt, and on visiting the Beni-Israel he found among them several customs similar to those current among Jews, and to test them he gave their women some fish to cook, including some that had neither fins nor scales. These they separated from the others, saying that they never ate them. Rahabi was thereupon satisfied they were really Jews, and imparted instruction to them. After the attention of the European Jews had been called to the Beni-Israel, the rites and ceremonies of the latter were assimilated to those of the Sephardic Jews, and prayer-books in Mahrati, their vernacular, have been provided for them. Previously, however, to this their festivals and customs differed considerably from the rest of the Jews both in name and in ceremonial.



Group of Beni-Israel in Ancient Costume.
(From a photograph.)

The festivals of the Beni-Israel, before they became acquainted with the ordinary religious calendar of modern Jews, had only native names, one set of which was in Mahrati and the other in Hindustani. The latter are attributed to the reforms of David Rahabi. Many of the names in the former end in "San," meaning "holiday," and among them are the following:

Navyacha San ("New-Year holiday"), kept on the first day of Tishri, the second-day observance not being known among the Beni-Israel.

Festivals.

Khiricha San ("Pudding holiday"), on the evening of the fourth of Tishri. This was celebrated by eating "khir," a sort of pudding made of new corn mixed with coconut-juice and sweets; a censer with burning frankincense being placed near the dish. The khir was eaten by the family after saying the Shema'.

Darfalnicha San ("Closing-of-doors holiday"), on the tenth of Tishri, during which they fasted from five o'clock in the evening until the next evening at seven. During it they did not stir out-of-doors, nor touch nor speak to people of other denominations. They dressed themselves in white, and believed that departed souls visited their habitations on the preceding day and left them on the following day, called **Shila San** ("Stale holiday"), on which day they gave alms to the poor and visited their friends.

Holicha San, on the thirteenth and fourteenth of Adar: the former kept as a fast, and the latter as a feast, on which they sent home-made sweetmeats to one another. This corresponds to Purim; but the Beni-Israel did not observe the second day or "Shushan Purim."

Anasi Dakacha San ("Anas-closing holiday"), on the fourteenth and twenty-first of Nisan. This was celebrated by closing an earthen chatty or pot containing a sour liquid commonly used as sauce. This festival corresponded to Passover; but, as the Hindus generally did not use any leaven with their rice, the object of the ceremony seems to have been forgotten.

Birdiacha San ("Birda-curry holiday"), on the ninth of Ab, on which they ate nothing but rice with a curry of "birda" or pulse. This was served on plantain-leaves. During the preceding eight days no meat was eaten. This corresponds to Tish'a be-Ab, in memory of the destruction of the Temple; but there does not seem to have been any conscious recognition of that fact.

The other festivals, chiefly known by the name of "Roja" (fasting), appear to have been of later introduction, and are connected with the reforms of David Rahabi. These are as follows:

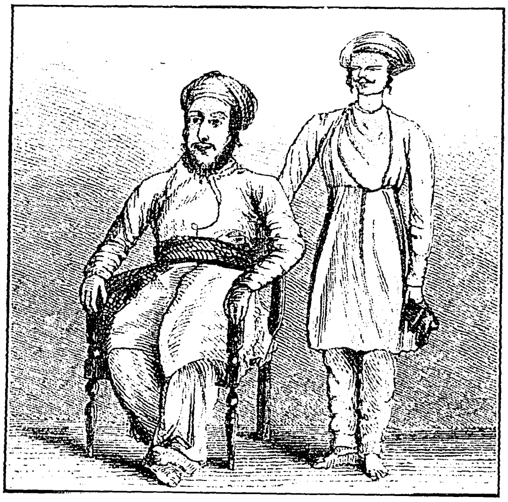
Ramzan, a fast held throughout the month of Elul; the name is doubtless derived from the Mohammedan month of fasting, "Ramazan."

Navyacha Roja ("New-Year fast"), on the third of Tishri, corresponding to the fast of Gedaliah, but not associated with his murder.

Elijah Hannabicha Oorus ("The fair of Elijah the Prophet"), to celebrate the ascension of Elijah on that day at Khandalla in the Konkan. Various kinds of fruit were placed on plates, together with "malida" (pieces of rice-bread besmeared with sirup), and a censer of burning frankincense. The fruit was eaten by the family.

Sababi Roja, a fast on the seventeenth of Tammuz, a reminiscence of the siege of Jerusalem, but not known as such by the Beni-Israel.

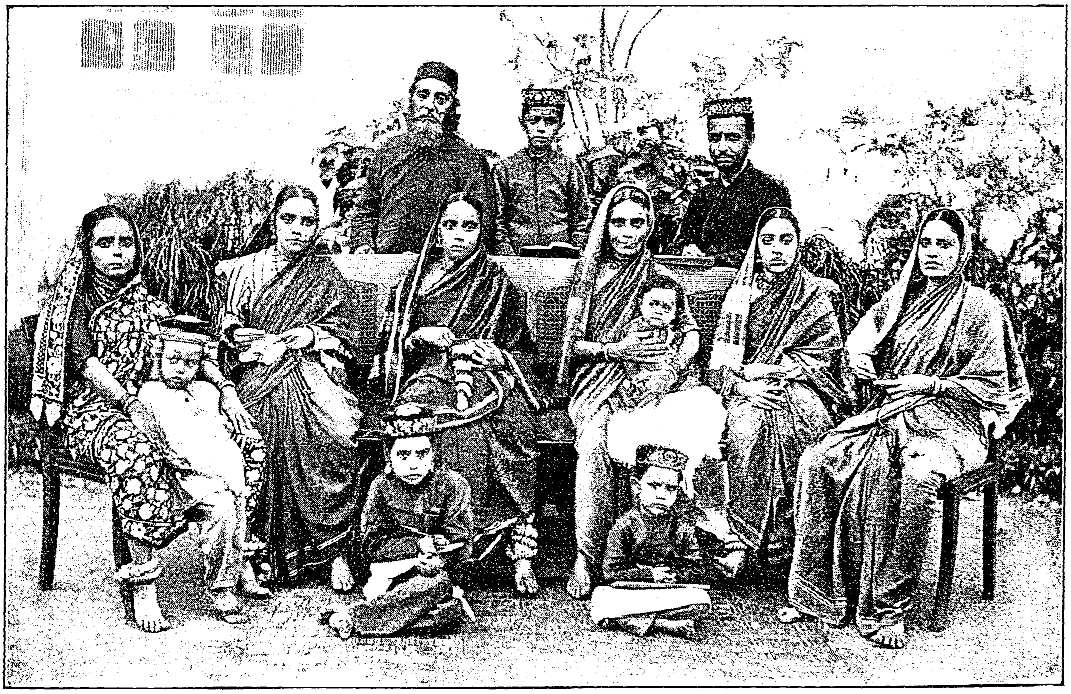
From this enumeration of the festivals it will appear that the Beni-Israel retain from the earliest times (as indicated by their Mahrati names ending with "San") the New-Year, Day of Atonement, Purim, Passover, Ninth of Ab, and in addition a form of Tabernacles which has been transferred to the Fourth of Tishri. Later on they introduced, doubtless under the influence of David Rahabi (as is shown by the Hindustani names), the fasts of Gedaliah, Ṭebet, and Tammuz, together with the New-Year of the trees, associated with the name of Elijah the Prophet; while still later the custom of fasting throughout the whole month of Elul seems to have been borrowed from the Mohammedans. The feasts of Pentecost and Ḥanukkah seem to have dropped out of use. It would appear that before the second revival under Samuel Divekar the only other remains of Judaism current among the Beni-Israel were the strict observance of the Sabbath, circumcision, and the reading of the Shema', which is the sole piece of Hebrew retained by them. The latter was said at every meal, at wedding-festivals, at burial-feasts, and indeed on all sacred occasions. The only animals considered fit for food were fowl, sheep, and goats. The Beni-Israel probably refrained from beef, in order not to offend their Hindu neighbors.



Beni-Israel of Bombay.
(From Wilson, "Lands of the Bible.")

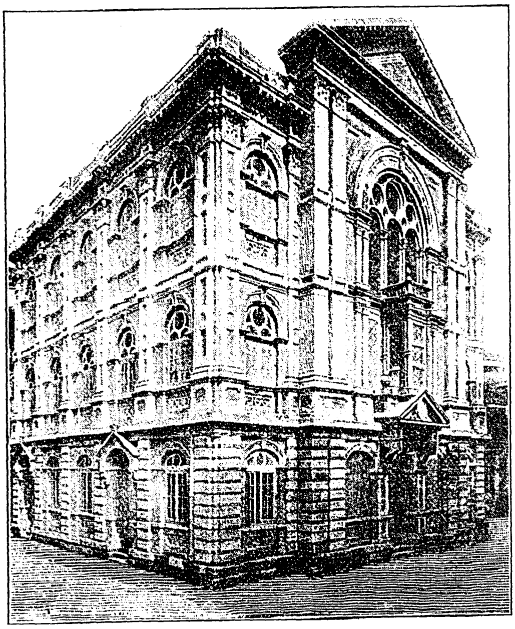
Customs.

It is difficult at this time to determine with any degree of accuracy the relative age of the customs they follow. Even before the religious revival of 1796 the Beni-Israel customarily removed the sciatic nerve from animals used for food, and they salted the meat in order to abstract the blood from it; otherwise they did not observe the law of sheḥiṭah and bediḳah. They also left a morsel of bread or rice in a little dish after they had dined. Among them the birth of a girl was celebrated on the sixth night, and that of a boy on the sixth and eighth; and on the latter day the rite of circumcision was performed. Girls were usually betrothed some months before marriage; and until the wedding they wore the hair flowing from their shoulders. At the betrothal ceremony the intended bride and bridegroom sat face to face and dined together, sweetened rice being served to the assembly. On the day when the marriage ceremony was to take place the bridegroom, who had been crowned with a wreath of flowers, was led in procession on horseback to the bride's house, and the ceremony



Beni-Israel Family at Bombay.
(From a photograph.)

took place under a booth. At the feast held before the wedding took place a dish containing a piece of leaven cake, the liver of a goat, fried eggs, and a twig of "subja" was placed with burning frankincense on white cloth, and after the Shema' had been repeated the dish was taken inside and, with the exception of five pieces of the cakes and liver, which were set aside for the person officiating as priest, the food was eaten. Polygamy is allowed, and in some cases divorce is given according to the civil law; but the Beni-Israel did not practise "get," "yibbum," or "ḥaliẓah." An adulteress and her issue are regarded as "Black Israel."



Keneseth Eliyahu Synagogue, Bombay.
(From a photograph.)

After burials the mourners wash both themselves and their clothes, and on the third day the house is cleansed; the ceremony being known as "Tizova," or the "Third-Day Cleansing." When a person died, all the water was emptied from the pots in the house, and the body was buried with the head toward the east. Grape-juice or milk was drunk by those visiting the mourners in the evening during the days of mourning. It was customary for relatives and friends to bring "meals of condolence" to the house of mourning. On the seventh day after burial there was a mourning ceremony known as the "Jaharuth," in which a dish, containing cakes and pieces of liver, and a glass of liquor, was placed on a white sheet. After repeating the Shema' about a dozen times, the contents of the glass were drunk in honor of the dead; and after the food was eaten, the chief mourner was presented with a new turban by a relative. Jaharuth was also observed on the first, sixth, and twelfth months. If a boy were born after a vow made by the mother, his hair was not shaved for six or seven years, after which period it was completely shaved and weighed against coins (gold or silver), to be given in charity. The shaved hair was thrown into the sea and not burned. A feast was held in the evening, at which the mother was informed that she was free from her vow.

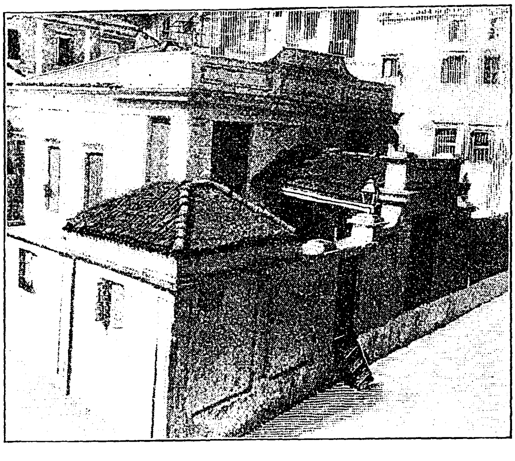
Costume and Names.

Formerly the Beni-Israel wore turbans, but now they use mainly the Turkish fez. The women adopt the Hindu dress, and are accustomed to wear anklets and nose-rings. Most of the Beni-Israel names have been changed from Hebrew to Hindu forms; thus, "Ezekiel" into "Hassaji"; "Benjamin" into "Bunnajee"; "Abraham" into "Abajee"; "Samuel" into "Samajee"; "Elijah" into "Ellojee"; "Isaac" into "Essajee"; "Joseph" into "Essoobjee"; "Moses" into "Moosajee"; "Raḥamim" into "Ramajee"; "David" into "Dawoodjee," and "Jacob" into "Akhoobjee." Their surnames are mostly derived from neighboring villages; thus, those who resided at Kehim were called "Kehimker," and those who lived at Pen were named "Penker."

Later History.

About 1795 Samuel Ezekiel Divekar, a Beni-Israel soldier in the East India Company's service, was captured by Tipu Sahib. He made a vow that if he escaped he would build a synagogue at Bombay. He succeeded in escaping, and built the synagogue Magen David, now called Sha'ar Ha-Raḥamim, at Bombay, and introduced the Sephardic ritual from Cochin. The Beni-Israel shortly afterward attracted the attention of Christian missionaries at Bombay, who about 1812 brought Michael Sargon from Cochin, who, though a convert to Christianity, opened schools for the Beni-Israel in Bombay, Rebdanda, and Palle for over thirty years; explaining to the children parts of the Old Testament, and rarely, if ever, speaking of Christianity to them.

The chief instrument in introducing the full knowledge of Judaism to the Beni-Israel was Shellomo (Solomon) Shurrabi, who was wrecked near Bombay about 1836, and for twenty years acted as religious instructor of the community. Owing to his influence several new synagogues were built



Second Beni-Israel Synagogue, Bombay, Erected 1848.
(From a photograph.)

in the vicinity of Bombay, and a general interest in their religion was shown by the Beni-Israel. The advent of the Sassoons at Bombay brought the Beni-Israel into connection with the real life of Israel; and the family, as well as Christian missionaries, liberally supported religious, philanthropic, and educational establishments for the benefit of Beni-Israel. A special school for them was established in July, 1875, which, owing to the support given by the Anglo-Jewish Association, was enlarged in 1881, and now accommodates about 270 children.

As their native name implies, the original Beni-Israel were mainly oilmen or oil-pressers; but during the existence of the East India Company many of them adopted the career of soldier and obtained the highest rank, that of sirdar bahadur. Owing to the spread of education among them several have gone into learned professions and become engineers, doctors, and teachers.

Ambepore	39	Puna	350
Bombay	5,021	Rahoon	191
Borlai	51	Revadanda	192
Karachi	130	Roha Ashtami	232
Panwell	301		

Mahrati Literature.

Of recent years many works suitable for instruction have been translated into Mahrati for the benefit of the Beni-Israel, chiefly by the exertions of Joseph Ezekiel, whose works cover the whole cycle of Jewish ritual and liturgy, besides treatises on the Jewish religion and text-books of Hebrew grammar. In addition to these, several newspapers in Mahrati were published, among them the "Bene Israelite" (Lamp of Judaism).

The task of determining with any degree of exactness the amount of Jewish blood that at present pervades the Beni-Israel is a very difficult one. In appearance they differ but slightly from their neighbors. They themselves are proud of their purity of descent, and point to the care taken by Jews of Cochin to separate the Black Jews, or proselytes, from the White. The use of the word "Ramzan" for the feast of the month of Elul might seem to indicate that they were originally Mohammedans, and were converted to Judaism by David Rahabi; but, on the other hand, it may have been the word only that was adopted, the custom of fasting during that month being derived from the Sephardic ritual, which is that current in Cochin. If originally Jews, the Beni-Israel retained very little of Jewish custom until the revival under Divekar, except the institution of the Sabbath, the repetition of the Shema', and the rite of circumcision; but in this they resemble the Jews in China, who appear to have kept their purity of descent almost up to the present time. For a full discussion of this question, see COCHIN.

BENISCH, ABRAHAM: Journalist and theologian; born at Drosau, a small town eight miles southwest of Klattau, Bohemia, in 1811; died at Hornsey Rise, a suburb of London, England, July 31, 1878. He studied surgery in Prague about 1836—while a commentary on Ezekiel which he had written was being published—with a view to preparing himself for a journey to Palestine. Together with his fellow-students, Albert Löwy and Moritz Steinschneider, he was inspired by the lofty mission of restoring Jewish independence in the Holy Land; and while still a student at the University of Vienna, he had attracted round him a large number of his coreligionists, to whom his scheme for the liberation of his Jewish fellow-countrymen commended itself. Largely through his efforts a secret society was formed, of which Benisch was appointed to act as emissary and visit certain foreign lands with a view to finding a suitable basis for the liberation and emigration scheme. The main reliance for support in the carrying out of the plans was placed on the English Jews. In 1841, in pursuance of his mission, Benisch came to London, where he submitted the essential part of his proposals to various persons, who opposed them unanimously. Although temporarily compelled to lay aside his plans, he never completely abandoned them. Soon after his arrival in London he devoted himself to Jewish journalism and literature, and acquired considerable influence in Jewish and Christian circles.

When among Christians Benisch strenuously combated the once rampant conversion idea. In 1854 he became editor of the "Jewish Chronicle," which position he held till 1869, resuming the editorship again from 1875 till the year of his death. His editorial influence was exerted in favor of a moderate orthodoxy. He made quite a feature of the correspondence columns of the paper. Benisch took an active part in communal affairs, and helped to found several learned societies, including The Biblical Institute and its allies, The Syro-Egyptian and The Biblical Chronological societies. These three were afterward fused into the Society of Biblical Archeology. In 1860, when the Alliance Israélite was started, Benisch's hopes and ideals were revived, and by suggesting and aiding the inauguration, in 1871, of the ANGLO-JEWISH ASSOCIATION, he helped toward the realization of many of the hopes and aspirations of his youth.

Benisch wrote numerous works in the domain of Bible studies, biography, travel, the defense of Judaism; and weekly articles contributed to the pages of the "Jewish Chronicle" during a period of nearly forty years. He left the copyright of the paper to the Anglo-Jewish Association, which, shortly after his death, sold it. His most important works were: (1) "Judaism Surveyed, Being a Sketch of the Rise and Development of Judaism from Moses to Our Days," 1874; (2) "Why I Should Remain a Jew," thirty-three letters contributed to the "Jewish Chronicle," and published posthumously. He also wrote: "Two Lectures on the Life and Writings of Maimonides," 1847; "A Translation of the Old Testament, Published with the Hebrew Text," 1851; "An Essay on Colenso's Criticism of the Pentateuch and Joshua," 1863. Benisch also published an "Elementary Hebrew Grammar," in 1852; and a "Manual of Scripture History," in 1853.

J. G. L.

BENJACOB, ISAAC B. JACOB: Russian bibliographer, author, and publisher; born in Ramgola, near Wilna, Jan. 10, 1801; died in Wilna July 2, 1863. His parents moved to Wilna when he was still a child, and there he received instruction in Hebrew grammar and rabbinical lore. He began to write early, and composed short poems and epigrams in pure Biblical Hebrew which are among the best of their kind in Neo-Hebraic literature. For several years he lived in Riga, where he was engaged in business, always studying and writing in his leisure hours. Later he became a publisher and bookseller and went to Leipsic, where he published his first work, "Miktamim we-Shirim" (Epigrams and Songs), which also contains an important essay on epigrammatic composition (Leipsic, 1842). Of the other works which he published there, his corrected edition of R. Baḥya ibn Pakuda's "Ḥobot ha-Lebabot," with an introduction, a short commentary, and a biography of the author, together with notes and fragments of Joseph Ḳimḥi's translation by H. Jellinek, is the most valuable (Leipsic, 1846; Königsberg, 1859, without the introduction).

In 1848 Benjacob returned to Wilna, and for the next five years he and the poet Abraham Bär Lebensohn were engaged in the publication of the Bible with a German translation (in Hebrew type) and the new "Biurim" (Wilna, 1848-53, 17 vols.), which did much good as a means of spreading the knowledge of German and a proper understanding of the Hebrew text among the Jews in Russia. When this work was done he brought out his corrected and amended edition of Ḥayyim Joseph David Azulai's "Shem ha-Gedolim" (Wilna, 1853; Vienna, 1862), which is still the standard edition of that important work. In 1862 Benjacob announced his intention to begin the publication of popular editions of classical Hebrew works which had become rare or high-priced. He died soon after the appearance of the first volume of Azariah dei Rossi's "Meor 'Enayim," with which he started the series (Wilna, 1863).

In his later years Benjacob was one of the leaders and representatives of the Jewish community of Wilna, and took an active part in all communal affairs. In his correspondence with Isaac Bär Lewinsohn, which is partly published in "Ha-Kerem" (pp. 41-62, Warsaw, 1888), Benjacob throws much light on the condition of the community in the beginning of the second half of the nineteenth century, and especially on the lamentable condition of the Rabbiner Schule (Rabbinical Seminary) which the government established there and in Jitomir in 1848, and closed in 1873. Benjacob himself was originally destined to be one of the teachers of the Wilna Seminary, but never filled the position; and later he became one of the severest critics of that institution. These letters are also interesting on account of the idea they give of the perplexities of the old Maskilim of the Mendelssohnian school in Russia, like Benjacob, who were being swept aside by the younger generation which had the advantage of a Russian training. He could not speak Russian, and most of the representatives of the community suffered from the same disability, excepting a few merchants who cared little for the fate of the seminary; and the older members were at a great disadvantage when pitted against the young students, who could gain whatever they desired from the authorities on account of their correct Russian accent.

Benjacob corresponded with Jewish scholars in Western countries, and was known during his lifetime for his great achievements as a bibliographer, although his monumental work, the "Oẓar ha-Sefarim, Thesaurus Librorum Hebræorum tam Impressorum quam Manuscriptorum," did not appear till seventeen years after his death (Wilna, 1880). It was published by his son Jacob, and contains 17,000 entries of Hebrew printed and manuscript works, with valuable notes by M. Steinschneider. An author-index to the work together with additions has been promised by Steinschneider ("Hebr. Bibl." xx. 73; "Festschrift," p. vii.). It is the greatest Jewish bibliographical work in the Hebrew language, and is still the standard bibliography of printed books down to 1863.

Besides other minor works and articles published in various Hebrew periodicals and collections, Benjacob also commenced a German-Hebrew dictionary and a Mishnaic-Talmudic dictionary with a German translation, both of which were left unfinished.

G. P. Wi.

BENJAMIN.—Biblical Data: Youngest son of Jacob by Rachel, who died on the road between Beth-el and Ephrath, while giving him birth. She named him "Ben-oni" (son of my sorrow); but Jacob, to avert the evil omen, called him "Ben Yamin," son of the right hand; that is, of good luck (Gen. xxxv. 17, 18).

Benjamin stayed with his father when his brothers went down to Egypt to buy corn during the famine, but Joseph insisted that he should come down with them on their second visit. Jacob being afraid to let him go from his side, as he was the only remaining son of Rachel, Judah vouched for his safety, and finally obtained his father's permission to take him along (Gen. xlii., xliii. 8–10). Joseph received his younger brother with marks of special attention; but as the time came for the brothers to return to their father with the newly bought corn, he put them severely to test by laying a trap and bringing the charge against Benjamin of having stolen his silver cup, in punishment for which he wanted to keep him as a slave. Judah, faithful to his pledge, stepped before Joseph, begging to be taken as a slave instead of Benjamin, whose failure to return would cause his father to go down in sorrow to Sheol; whereupon Joseph, seeing that the brothers were not so cruel toward one of Rachel's sons as they had been to him, made himself known to them (Gen. xliii., xlv.). Benjamin, until that time spoken of as "a child" (Gen. xlii. 13, xliv. 20), moved to Egypt with his father, Jacob, himself being the father of ten sons (Gen. xlvi. 21).

The Tribe of Benjamin.

The tribe of Benjamin is described in Jacob's blessing (Gen. xlix. 27) as warlike: "Benjamin is a wolf that raveneth; in the morning he shall devour the prey, at evening he shall divide the spoil." In the desert, where Benjamin formed part of the camp of the sons of Joseph, the tribe counted 35,400 warriors, and later on 45,600 men (Num. i. 36; ii. 22, 23; x. 22–24; xxvi. 41). In I Chron. vii. 6–11, 59,434 men are given. The astute and pugnacious nature of the Benjamites is evidenced by the fact that they were drilled as left-handed warriors to attack the enemy unawares (Judges iii. 15–21, xx. 16; I Chron. xii. 2). They were known as brave and skilled archers (I Chron. viii. 40, xii. 2; II Chron. xiv. 7). A cruel act of inhospitality by the men of Gibeah, reminding one of the Sodomites, brought the whole tribe under a ban ("ḥerem"); and a war followed in which all the other tribes very nearly exterminated the little tribe; moreover, they took an oath not to give to the Benjamites any of their daughters in marriage. Only at the last moment, when all but 600 men had been slain, a way was found to provide the survivors with wives in order to prevent the tribe from dying out (Judges xix.–xxi.). Still the little tribe of Benjamin was destined to a prominent place in the history of Israel. It gave the nation its first king, in the person of Saul, son of Kish (I Sam. ix. 1); and when Saul died, his son, Ish-bosheth, reigned for two years over Benjamin and the other tribes, except Judah (II Sam. ii. 8, 9). In fact, Benjamin considered himself the younger brother of Joseph long after David had united all other tribes with his own of Judah (II Sam. xix. 21 [20]).

The Territory.

But the territory of Benjamin was so favorably situated as to give it prominence beyond its numerical proportions. Bordering on Joseph's to the north and on Judah's to the south, it touched on the Jordan; and, lying on the line leading from Jericho to the northern hills of Jerusalem, it included such cities as Gibeah, Gibeon, Beth-el, and, according to rabbinical tradition, a part of the Temple district (Josh. xviii. 11–21; Josephus, "Ant." v. 1, § 22; Sifre, Wezot ha-Berakah, 352). Reference is made to this excellent locality in the blessing of Moses: "The beloved of the Lord shall dwell in safety by him; he covereth him all the day long, and he dwelleth between his shoulders" (Deut. xxxiii. 12). At the secession of the northern tribes, Benjamin remained loyal to the house of David (I Kings xii. 21), and therefore shared the destinies of Judah at the time of the restoration (Ezra iv. 1, x. 9). Mordecai, the loyal Jew, was a descendant of Saul of the tribe of Benjamin (Esth. ii. 5); and Paul, whose Hebrew name was Saul, also claimed to be a Benjamite (Rom. xi. 1; Phil. iii. 5). On the other hand, it is hardly admissible that Menelaus and Lysimachus should have been allowed to officiate as high priests if they were descendants of the tribe of Benjamin, as II Macc. iii. 4 (compare iv. 23, 29) seems to indicate; it is much more probable that the name "Benjamin" in this place is due to a copyist's error, and the passage should read: "Simon was of the [priestly] tribe of Miniamin," if "Bilgah" is not the proper reading. Compare Suk. 56a and art. Bilgah; also Herzfeld, "Gesch. des Volkes Jisrael," 1863, i. 218.

G. K.

——**In Rabbinical Literature:** The name "Benjamin" is given various meanings by the Rabbis. According to some, בנימין is equivalent to בן ימים ("son of days"), because Benjamin was born to his father in his old age (Testament of the Twelve Patriarchs, Benjamin i. *υἱὸς ἡμερῶν*; Midrash Leḳaḥ-Ṭob; and Rashi, ed. Berliner, on Gen. xxxv. 18). Other rabbis interpret the name Benjamin as "son of the South," since he was the only son born to Jacob in Palestine, the others having been born in Mesopotamia, north of Palestine (Rashi *ad loc.*; "Sefer ha-Yashar," Wayishlaḥ, ed. Leghorn, p. 56b). Benjamin was not granted to his parents until after Rachel had prayed and fasted for a second son a long time (Testament of the Twelve Patriarchs, *l.c.*; Num. R. xiv. 8), and not until Jacob was one hundred years old (Testament of the Twelve Patriarchs, *ib.*; "Sefer ha-Yashar," Wayishlaḥ, *ib.*; compare Heilprin, "Seder ha-Dorot," i. 52, ed. Warsaw).

Benjamin, Joseph's brother, took no part in the selling of Joseph (Sifre, Deut. 352); and in order to comfort Benjamin concerning his brother's fate, God showed him, while awake, Joseph's form and countenance (Testament of the Twelve Patriarchs, Benjamin x.; compare Tan., ed. Buber, Wayesheb, 8).

When Benjamin was detained as the alleged thief of the cup, Joseph pretended that Benjamin had been instigated by his brothers. But Benjamin swore: "As truly as my brother Joseph is separated from me, as truly as he has been made a slave, I have not touched the cup, and my brothers did not want to make me steal." When asked for a proof that his brother's memory was so sacred that Joseph must believe this oath, Benjamin told Joseph how he had given his ten sons (Gen. xlvi. 21) names which referred to the loss of his brother. The first was called Belah (בלע), because Joseph had disappeared (בלע, "swallow"); the second, Becher (בכר), because Joseph was his mother's first-born (בכור); the third, Ashbel (אשבל), because Joseph was made a captive (שבה, "capture"); the fourth, Gera (גרא), because he lived in a foreign (גר) land; the fifth, Naaman (נעמן), on account of Joseph's graceful speech (נועם, "grace"); the sixth, Eḥi (אחי, "my only full brother"); the seventh, Rosh (ראש, "the older"); the eighth, Muppim (מפים), because Joseph taught Benjamin the things he himself had learned from his father (מופים, "double mouth"); the ninth, Ḥuppim, "whose wedding (חופה) I have not seen"; and the tenth, Ard, because Joseph was like a rose (ורד).

Benjamin's oath touched Joseph so deeply that he could no longer pretend to be a stranger, and so revealed himself to his brother (Tan., ed. Buber. Wayiggash, 7; the meanings of the names are also given in Soṭah 36b; Gen. R. xciv. 8). According to another Haggadah (known to so early a work as the Testament of the Twelve Patriarchs, Benjamin ii.), Joseph makes himself known to Benjamin before his reconciliation with the other brothers. The "Sefer ha-Yashar" (Miḳḳeẓ 89) narrates that Joseph caused a kind of astrolabe to be brought, and asked Benjamin whether he could not discover by means of the instrument the whereabouts of his lost brother. To Joseph's astonishment Benjamin declared that the man on the throne was his brother, and Joseph revealed himself to Benjamin, telling him what he meant to do with the brothers. His intention was to try them and thus to learn whether they would act in a brotherly manner toward Benjamin if he were in danger of losing his liberty.

The Rabbis lay stress on the name, "beloved of the Lord," by which Benjamin is distinguished (Deut. xxxiii. 12; Sifre, *l.c.*). He is counted among the four men who died by the poison of the serpent in Paradise; *i.e.*, without sin of his own, the other three being Amram, the father of Moses; Jesse, the father of David; and Kileab, the son of David (Shab. 55b). His comparison to the ravening wolf (Cant. R. to viii. 1), "who devours his enemy" (Gen. xlix. 27) is referred to the men of Shiloh who stole their wives (Judges xxi.) or to Ehud or to Saul. By others it is referred to Mordecai and Esther (Gen. R. xcix. and Tan., Wayeḥi, 14; so also in the original text of the Testaments of the Twelve Patriarchs [Benjamin ii]; whereas a Christian interpolation refers it to Paul).

One interpretation refers the blessing to the early ripening of the fruits in the territory of Benjamin, and the great fertility of the region of Jericho and Beth-el, and another refers the expression "wolf" to the altar of the Temple, which devoured the sacrifices in the morning and in the evening (Gen. R. *l.c.*; Targ. O. and Yer.).

G.

The Tribe of Benjamin.

The erection of the Temple on Benjamitic ground is explained in several ways. It is related that Benjamin (Sifre, Deut. 352, ed. Friedmann, 146a) was privileged to have the Shekinah dwell in his territory because all the other tribes (that is, fathers of the tribes) had taken part in the selling of Joseph. For God said: "If they—the Israelites—build me a Temple in some other place and seek my mercy, I can show them as little mercy as they showed their brother Joseph." Origen ("In Genesim," xlii. 6), gives another reason, probably based on Jewish tradition (compare Esther R. on iii. 4), viz.: Because Benjamin did not bow down before Esau as did his brothers and his father (Gen. xxxiii. 3-7), nor before Joseph (*ib.* xlii. 6), his territory was reserved for the worship of God.

The descendants of Benjamin, it is true, did not always show themselves worthy of their ancestor, especially in connection with the incident at Gibeah (Judges xix.). In spite of their wrong-doing the Benjamites were at first victorious (Judges xx. 21-25); but this was due to God's anger against all Israel because they had attacked all Benjamin on account of the crime of an individual, and at the same time quietly tolerated the idolatry which Micah (Judges xvii.) was spreading among them (Pirḳe R. El. xxxviii.). At first the intention of the other tribes was to efface Benjamin completely, since the number of twelve tribes could be preserved through Ephraim and Manasseh; but they remembered God's promise to Jacob shortly before Benjamin's birth (Gen. xxxv. 11), that "a nation and a company of nations shall be of him"; and they decided that the existence of the tribe of Benjamin was necessary (Yer. Ta'anit iv. 69c; Lam. R., Introduction, 33). The day on which the reconciliation took place between the tribes is said to have been the fifteenth of Ab, and for this reason it was made a festive day (*ib.*; compare Ab, Fifteenth Day of). On another occasion, however, the Benjamites showed themselves worthy of their pious ancestor. When, at the Red Sea, all the other tribes stood in desperation only the tribe of Benjamin trusted in God and leaped into the sea (Mekilta, Beshallaḥ, Wayiḳra 5; Soṭah 36b).

J. SR. L. G.—K.

——**In Mohammedan Literature**: In the Koran, Benjamin is not mentioned by name. The story of Joseph is told in sura xii., and reference is made repeatedly to a particular brother of Joseph. Thus, *e.g.*, in v. 8, the other brothers say, "Verily, Joseph and his brother are dearer to our father than we." Baidawi explains that Benjamin is so specified because he was brother to Joseph on both sides. Again, in v. 69, "And when they entered to Joseph, he took his brother to him." Baidawi explains this that he made him sit at meat with him or live with him in his dwelling. He adds, as a tradition, that Joseph made his brothers sit two by two; so Benjamin remained alone and wept and said, "If my brother Joseph had been alive he would have sat with me." Then Joseph made him sit at his table.

Thereafter he assigned houses to his brothers, two by two, but took Benjamin to his own house. And he said to Benjamin, "Would you like if I were your brother in the stead of the brother who is lost?" And Benjamin replied, "Who can find a brother like to you? but Jacob did not beget you, nor Rachel bear you."

G. D. B. M.

——**Critical View:** The story of Benjamin in Genesis is drawn from three different sources: The Elohist, who wrote the story of Benjamin's birth (Gen. xxxv. 16–22), makes Reuben vouch for Benjamin (Gen. xlii. 37); whereas the Jahvist assigns this act to Judah (xliii.-xliv.). The latter makes Joseph give vent to his brotherly feeling at the first sight of his younger brother Benjamin, and give him five times as many presents, without, however, betraying himself (xliii. 30–34), and afterward, at the recognition scene, show his affection for him without reserve (xlv. 14); while the Elohist merely relates at the end that Benjamin was distinguished by receiving five times as many presents as the others (xlv. 22). The genealogical chapter which represents Benjamin as the father of a large family (xlvi. 21) is of a far later date than the rest. (In the older sources he appears to be a young child [xlii. 4, 15; xliv. 20].) The blessing of Jacob, in which Benjamin—who, after Joseph, was the last of the sons—is described as being warlike, as was the tribe in the time of Deborah (Judges v. 14), yet without any allusion to Saul's kingdom, is best ascribed to the time of the Judges (Dillman, Commentary). The story of the war at Gibeah (Judges xix.-xxi.), which bears evidences of very late composition and has many legendary features, such as exaggeration of numbers and modes of warfare, has been rather too rashly declared to be a late invention inserted with the intention of covering up atrocities perpetrated by the tribe of Judah under King David against the kinsmen of Saul (Güdemann, "Monatsschrift," 1869, p. 357; Geiger, "Jüd. Zeit." 1869, p. 284; Grätz, "Gesch. der Juden," i. 351 *et seq.*; Wellhausen, "Komposition des Hexateuchs," p. 237; Kuenen, "Historisch-Kritische Untersuchung über die Entstehung und Sammlung der Bücher des Alten Testaments," ii. 163). Recent critics think it far more probable that it rests on a historical fact (Moore, Commentary on Judges, pp. 406–408; Hogg, in Cheyne and Black, "Encyc. Bibl."; Nöldeke, quoted by the latter on p. 536, note 3). This indeed seems to account for the sudden change in the character of the tribe (see GIBEAH).

Moses' Blessing.

In the time of David the tribe of Benjamin followed the leadership of Joseph or Ephraim, considering itself closely related to the latter, and therefore jealous of Judah's rising power (II Sam. xix. 21 [20]). The blessing of Moses (Deut. xxxiii. 12), which represents Benjamin as perfectly identified with Judah's interests, is probably the product of the time of Jeroboam II. (Driver, Commentary, pp. 387 *et seq.*). Stade ("Gesch. des Volkes Israel," i. 161; *idem.* "Zeitschrift," i. 114) and Hogg ("Encyc. Bibl." *s.v.* "Benjamin") explain the name "Benjamin" as a derivative of "Yemini" (compare I Sam. ix. 1, "Ish Yemini," and I Sam. ix. 4, "Erez Yemini"), denoting the people living to the south or right of the Ephraimite highland; the story of Benjamin's birth in Canaan being taken as reflecting in mythical form the fact of its having branched off from the tribe of Joseph after the other tribes had settled in their various territories (Judges i. 22, 23, 35). The house of Joseph, according to Moore, includes Benjamin. Stade ("Gesch. des Volkes Israel," i. 138) thinks that the account of Benjamin was lost. The report that the large number of 280,000 archers, said to be the tribe of Benjamin, belonged to King Asa (II Chron. xiv. 7; compare xvii. 17) is regarded as unhistorical. Regarding the list of Benjamite towns in Josh. xviii. 21–28, belonging to the late priestly writer (P) and the one in Neh. xi. 31–35, which belongs to the late chronicler, see PALESTINE.

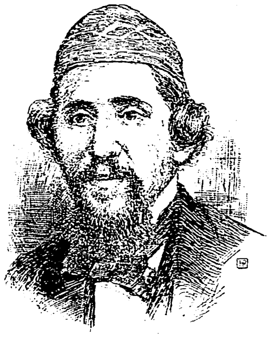
G. K.

BENJAMIN II., J. J. (real name, **Joseph Israel**): Rumanian traveler; born at Folticheni, Moldavia, in 1818; died at London May 3, 1864. Married young, he engaged in the lumber business, but losing his modest fortune, he gave up commerce. Being of an adventurous disposition, he adopted the name of Benjamin of Tudela, the famous Jewish traveler of the twelfth century, and toward the end of 1844 set out to search for the Lost Ten Tribes. He first went to Vienna, and in January, 1845, started for Constantinople, visiting several cities on the Mediterranean. He landed at Alexandria June, 1847, and proceeded via Cairo to Palestine. He then traveled through Syria, Babylonia, Kurdistan, Persia, the Indies, Kabul, and Afghanistan, returning June, 1851, to Constantinople, and thence to Vienna. After a short stay in the last-named city, he went to Italy, embarking there for Algeria and Morocco. On arriving in France, after having traveled for eight years, he prepared in Hebrew his impressions of travel, and had the book translated into French. After suffering many tribulations in obtaining subscriptions for his book, he issued it in 1856, under the title "Cinq Années en Orient" (1846–51). The same work, revised and enlarged, was subsequently published in German under the title "Acht Jahre in Asien und Afrika" (Hanover, 1858), with a preface by Kayserling. An English version has also been published. As the veracity of his accounts and the genuineness of his travels were attacked by some critics, he amply defended himself by producing letters and other tokens proving his journey to the various Oriental countries named. Benjamin relates only what he has seen; and, although some of his remarks show insufficient scholarship and lack of scientific method,



Benjamin II.

his truthful and simple narrative gained the approval of eminent scholars like Humboldt, Petermann, and Richter.

In 1859 Benjamin undertook another journey, this time to America, where he stayed three years. The result of his observations there he published on his return, under the title "Drei Jahre in Amerika" (Hanover, 1863). The kings of Sweden and of Hanover now conferred distinctions upon him. Encouraged by the sympathy of several scientists, who drew up a plan and a series of suggestions for his guidance, he determined to go again to Asia and Africa, and went to London in order to raise funds for this journey—a journey which was not to be undertaken. Worn out by fatigues and privations, which had caused him to grow old before his time and gave him the appearance of age, he died poor in London; and his friends and admirers had to arrange a public subscription in order to save his wife and daughter from misery.

In addition to the works mentioned above, Benjamin published "Jawan Mezula, Schilderung des Polnisch-Kosakischen Krieges und der Leiden der Juden in Poland Während der Jahre 1648–53, Bericht eines Zeitgenossen nach einer von L. Lelewel Durchgesehenen Französischen Uebersetzung, Herausgegeben von J. J. Benjamin II.," Hanover, 1863, a German edition of Rabbi Nathan Nata Hanover's work on the insurrection of the Cossacks in the seventeenth century, with a preface by Kayserling.

S. E. SD.

BENJAMIN, R.: A tanna of the second century, contemporary of R. Eleazar ben Shammu'a, with whom he carried on some halakic controversy (Ket. 84a). He is also mentioned in connection with Symmachus (Niddah 21b); and elsewhere (Sem. ix.) he reports a Halakah in the name of R. Akiba. In one halakic controversy, the participants in which leave no doubt as to his identity, his name appears as "Minyamin" (Yer. Soṭah i. 16c), "Polimo" (Palæmon, Soṭah 4a; Tan., Naso, 7), and "Penimon" (Num. R. ix. 10). The last-mentioned form is also found in Yer. Ter. iii. 42b as "Abba Penimon," where the context permits of the assumption that it is meant for "R. Benjamin." (For the identity of Benjamin and Minyamin, see ABBA BAR BENJAMIN; "Pelimo" and "Penimon" appear to be Hellenizations of "Benjamin.") R. Benjamin may likewise be identified with Abba Benjamin, who, in a group of homilies (Ber. 5b *et seq.*), remarks, "Were the human eye permitted to perceive them no human being would be able to live because of the evil spirits which fill the universe." He also teaches that no prayer is acceptable except that offered in the public house of worship. This he bases on I Kings viii. 28 ". . . to hearken unto the song and unto the prayer": where the song is heard there prayer will be heard (compare Tos. on 'Ab. Zarah 4b, *s.v.* כיון).

J. SR. S. M.

BENJAMIN BEN AARON: Ḥasidic writer; lived toward the end of the eighteenth century. He was a pupil of Israel Ba'al Shem-Ṭob, and of Baer of Meseritz. Later, in 1790, he was a preacher at Zlazitz. He was the author of the following works: (1) "Ṭure Zahab" (Golden Necklaces), Mohilev, 1816, homilies on the Pentateuch, Lamentations, and Esther; (2) "Ahawat Dodim" (The Love of Friends), Lemberg, 1795, homilies on the Song of Songs; (3) "Amtaḥat Binyamin" (Benjamin's Sack), Minkowicz, 1769, on Ecclesiastes; (4) "Ḥelkat Binyamin" (Benjamin's Patrimony), Lemberg, 1793, a commentary on the Passover Haggadot.

BENJAMIN B. 'ASHTOR: A Palestinian halakist of the third amoraic generation, contemporary of R. Ḥiyya b. Abba and senior to R. Hezekiah (Yer. Bik. i. 64a). He is also cited as simply Bar 'Ashtor, without his prænomen, *ib.*

J. SR. S. M.

BENJAMIN (or **MINYOMI) ASYA** ("Physician"): A Babylonian rabbinic scholar of the third and fourth amoraic generations (fourth century), contemporary of Rab Joseph and Raba, and founder of a school named after him, Debe Minyomi Asya. It is reported that the disciples of his school spoke disrespectfully of the Rabbis, saying, "Of what benefit are the rabbis to us? They have never proved it to be lawful for us to eat the raven, or to be unlawful to eat the pigeon!" (meaning to say that, in spite of their disputations and hair-splitting arguments, the Rabbis have no authority to alter or abrogate a Biblical precept [Sanh. 99b *et seq.*]). Raba obtained from Benjamin some medical information; and when on one occasion he publicly lectured on the subject before the people of Maḥuza, Benjamin's sons or disciples, who seem to have formed a medical gild, resented this publication of their professional secrets (Shab. 133b; 'Ab. Zarah 28b). Benjamin Asya is probably identical with Minyomi b. Niḥumi, the contemporary of Amemar I. (Ket. 69a), to whom Abaye appealed from a decision of Rab Joseph (*ib.* 81b). Brüll identifies Benjamin Asya with Bar Nathan Asya, who once manifested his disregard for rabbinic enactments by traveling on the second day of the Feast of Weeks from Beram (some read "Be Rab" = school) to Pumbedita, on which account Rab Joseph excommunicated him (Pes. 52a; see Diḳduḳe Soferim, *ad loc.*). Brüll discovers in this school the origin of Karaism ("Jahrb." i. 225).

J. SR. S. M.

BENJAMIN, SIR BENJAMIN: Mayor of Melbourne; born at London in 1836. At the age of nine he accompanied his parents to Victoria. Associating himself at first with the firm of Benjamin & Co., merchants, he subsequently entered into partnership with the late Hon. Edward Cohen. In 1870 he was elected member of the City Council; and in 1881 became an alderman of the ward he had hitherto represented. Notwithstanding heavy municipal labors, Sir Benjamin always took a lively interest in communal affairs. He identified himself largely with the growth of the Melbourne Hebrew Congregation and its various educational and charitable institutions, on the boards of which he was a most active worker. He is a trustee of the Jewish Philanthropic Society and the Ladies' Hebrew Benevolent Society; a representative of the Melbourne Province in the Legislative Council; and a justice of the peace, both for Victoria and New South Wales. He was elected mayor of Melbourne in October, 1887; and so admirably did he perform the duties of his office that he was unanimously reelected. In May, 1889, the honor of knighthood was conferred on him in recognition of his distinguished municipal services.

J. G. L.

BENJAMIN OF CANTERBURY or **CAMBRIDGE:** English rabbi; disciple of Rabbi Tam; died at the beginning of the thirteenth century. He is mentioned in the list of medieval rabbis drawn up by Solomon Luria (see Grätz, "Gesch. der Juden," vi. 365). Only one halakic decision of his is known; it forbids the purchase of milk from a Gentile unless a Jew be present when it is drawn (Mordecai, 'Abodah Zarah, ii. 826). But a certain number of notes by a Rabbi Benjamin on Joseph Ḳimḥi's "Sefer ha-Galuy" have been attributed by Matthews, the editor of Ḳimḥi's book, to Benjamin of Canterbury ("Jewish Quarterly Review," ii. 327). Benjamin seems to have been a member of the English school of Masorites and grammarians, including Moses ben Isaac, Moses ben Yom-Ṭob, Berechiah ha-Naḳdan, and Samuel ha-Naḳdan, the last of whom he quotes. It is possible that he came from Cambridge rather than from Canterbury, the transliteration of the former (קטברגיא) being sufficiently near to that of the latter (קנטבוריא). For while there is no Benjamin mentioned as living at Canterbury in the twelfth century, there is a rather distinguished "Magister Benjamin" of Cambridge mentioned in the Pipe Rolls of the fifth year of John (1204). Berechiah ha-Nakdan, in his commentary on Job, refers to "my Uncle Benjamin," who was probably the same individual.

J.

BENJAMIN, DAVID: Communal worker; born in London in 1815; died there June 25, 1893. In 1835 he emigrated to Australia; and, while in Tasmania, assisted in founding a synagogue. Soon afterward he settled in Melbourne, joining his brother Solomon, who is justly regarded as the founder of the Melbourne Jewish community. The firm of Benjamin Bros. was among the early pioneers of the British settlement in the colony of Victoria. The firm prospered greatly, buying crude gold direct from the aborigines, and making large purchases on which the banks were reluctant to venture. Benjamin had also a large interest in the Bank of New South Wales. He endeavored to maintain the Jewish spirit of observance in the colony, and personally attended the Jewish sick in Melbourne. In 1854 he returned to England, where he devoted himself entirely to the community, becoming connected with the Jewish Board of Guardians, the Bayswater Synagogue, and the Jews' Hospital and Orphan Asylum. Benjamin was treasurer of the Bayswater Synagogue from 1865 to 1871, and warden from 1871 to 1875. He was a life member of the council of the United Synagogue from its foundation, and was one of the seven elders of the United Synagogue. He was a prominent worker on behalf of the Jewish Board of Guardians, labored untiringly in its cause, and was very munificent in his donations to charity.

BENJAMIN B. DAVID CASES. See Cases, Benjamin b. David.

BENJAMIN B. ELIJAH BEER. See Beer, Benjamin b. Elijah.

BENJAMIN B. GIDDEL (or **GIDDUL**), **R.:** A Palestinian amora of the fourth generation (fourth century), contemporary of R. Aḥa III. (Yer. Ma'as. Sh. v. 56b; Yer. Yeb. i. 2b). His name is but rarely met with in the Talmud, and then only in the Halakah (Yer. Ma'as. i. 49a; Ḥul. 125a). It is probable that he was the son of Giddel b. Benjamin (Minyomi) and therefore of Babylonian descent.

J. Sr. S. M.

BENJAMIN GINZAKAYAH (of Ginzaḳ = Gazaka in Media Atropatene): A Babylonian scholar of the third century, contemporary of Mar Samuel. All that is known of him is that death overtook him when he was on the point of deciding a ritual question in accordance with the views of Rab, as opposed to those of Samuel. Hearing of this circumstance, Samuel thanked God, who had prevented the promulgation of an erroneous decision; and to the prime mover thereof, his friend Rab, he applied the Scriptural saying (Prov. xii. 21), "There shall no mischief happen to the just" (Yer. Ber. ii. 5b). In Babli (Niddah 65a) the name appears as "Minyamin Sakasnaah" (of Sacassana, a province of Armenia).

J. Sr. S. M.

BENJAMIN, HILLEL: Polish architect of the second half of the eighteenth century; born at Lasko. He was the builder of the synagogue at Lutomierz, which was constructed during the reign of the last king of Poland, Stanislaus August I. Benjamin seems to have studied in Germany. He enjoyed in his fatherland a certain reputation; for in the documents he is always called "architect." After finishing the synagogue at Lutomierz, he was commissioned to construct one at Zloczow, which, however, he did not finish. In examining the roof he fell to the ground and died. He is buried in the cemetery of Zloczow.

S.

BENJAMIN (or **MINYAMIN**) **B. IHI:** A Babylonian scholar of the second and third amoraic generations (third century); brother of Abbahu b. Ihi, the disciple of Samuel. Both brothers, while intensely exclusive and diffident, so that they would have no dealings with Gentiles (Meg. 28a), were very considerate toward their servants. One of the brothers arranged that they should receive one dish from their master's table; the other would have them partake of every dish. Legend states that the latter brother was therefore deemed worthy of receiving visits from the prophet Elijah (Ket. 61a).

J. SR. S. M.

BENJAMIN B. ISAAC OF CARCASSONNE: This scholar is known only by his translation from Latin into Hebrew, under the title of "'Ezer Eloah" (Divine Help), of the work of Jean de Bourgogne, of the province of Liége, on the corruption of the air by the plague. This work, which contains in the appendix many empiric remedies against divers ills, is preserved in manuscript in the Bibliothèque Nationale of Paris (No. 1191, fol. 141b–194a); only one other manuscript copy being known to exist, and that is in the library of Baron D. de Günzburg. Of the original, which was perhaps written in French, hardly any traces are left; that is, of the treatise described as "On the Epidemic, in Prose," No. 852 of the Library of the Louvre, or the private library of Charles V., king of France. This is undoubtedly the little book, says Leopold Delisle (MSS. de la Bibliothèque Nationale, 1891, iii. 153, note 1), of which there is a copy at the end of MS. Français 12,323, under the title, "The Treatise Which the Masters of Medicine and the Astronomers of Paris Wrote of the Plague Which Physics Calls the Epidemic, in the Year of Our Lord, N. S. MCCCXLVIII," or perhaps the little book written in 1365 by Master Jean de Bourgogne, surnamed "With the Beard," professor of medicine, and citizen of Liége (Delisle, "Observations sur Plusieurs MSS. de la Collection Barrois," p. 55).

The date of the Hebrew work may therefore be fixed, at least approximately. The second book of Jean was written in 1365, and was translated by Benjamin a few years later, about 1370. Now, the author had said in the preface, as far as one can judge from the Hebrew version, that already in the "year 22," when the plague broke out for the first time, he had written a similar treatise beginning with the words אלי אלי ("My God, my God") (Steinschneider, "Hebr. Uebers." p. 804). With what does the number 22 correspond? Steinschneider acutely remarks ("Hebr. Uebers." *l.c.*): "The date 22 [לפ״ק] could only mean 122 [= 1362]"; but that does not tally with the first outbreak of the Black Death, in 1348. Doubtless a Jewish era was substituted in the translation, probably through a copyist's mistake. Could Jean have meant that he wrote this book twenty-two years before? Then this treatise was written in 1370, as stated by Amplon ("Autre Fonds de la Bibliothèque Bodleienne," No. 192^3). This tallies with the note cited by M. Delisle. The doubt as to the date detracts in no wise from the interest of this medical treatise, which was saved from oblivion by the version of Benjamin of Carcassonne.

G. M. S.

BENJAMIN B. JAPHET: A Palestinian scholar of the third amoraic generation (third century), disciple of R. Johanan and senior to R. Zeïra I. (Ber. 33a, 38b; Ket. 77a). He cultivated both the Halakah and the Haggadah; in his halakic deliverances, however, he was not considered very reliable. Thus when, on one occasion, Ḥiyya b. Abba and he differed on a traditional decision by their master, R. Zeïra remarked, "What does R. Benjamin b. Japhet amount to compared with R. Ḥiyya b. Abba?" (Ber. 38b; Yer. Ber. vi. 10a; Yer. Pes. ii. 29c). Nevertheless, this same R. Zeïra had occasion to thank Benjamin for communicating to him a Halakah in the name of R. Johanan (Shab. 53a). In the Haggadah, Benjamin was a follower of R. Eleazar b. Pedat, whose expositions and sayings he frequently reports (Meg. 16b; Sanh. 7a; compare Ex. R. xli.; Lev. R. x.).—[Yer. Ber. iii. 6d; Yoma 29a; Yer. Sanh. i. 18a; Shebu. 18b; Ḥul. 52b (correctly quoted in MS. M); Pesiḳ. vii. 63b, viii. 68b; Pesiḳ. R. xvii.; Midr. Teh. xxii.; Gen. R. xliii.; Tan., ed. Buber, Lek Leka, 11.]

BENJAMIN BEN JOAB (called also **De Synagoga,** according to Zunz): Payyeṭan; lived at Montalcino in the fourteenth century. His printed poems are: (1) A metrical introduction to the "Nishmat" for Passover. Every strophe of this poem has ten lines of seven syllables. (2) A seliḥah of five strophes, with a refrain ending with the words הצליחה נא ("Oh, give us prosperity").

BENJAMIN B. JUDAH LOEB COHEN. See BENASCH, BENJAMIN.

BENJAMIN, JUDAH PHILIP: American statesman and lawyer; born at St. Croix, West Indies, in 1811; died in Paris, May 6, 1884. His parents were English Jews who, some years before his birth, had removed from London to St. Croix, then a British island, in the hope of improving their fortune in the New World. A few years after his birth, his family removed from St. Croix to reside in Wilmington, N. C., and young Benjamin soon afterward was sent to school at Fayetteville. Subsequently he spent three years at Yale College. His parents several times changed their residence, until they finally settled in New Orleans, La. There Benjamin served as a notary's clerk for some time, taught school, studied law, and on Dec. 16, 1832, was admitted to the Louisiana bar.

Louisiana had been acquired by the United States from France but a short time previously, and its language and legal system were still largely those

Practises Law in New Orleans.

of France. The broadening influences of the necessary mastery of different systems of law and literature left their mark upon Benjamin, and can be traced in the breadth of grasp, philosophical reasoning, and wide reading to which he subsequently attained. Nor should notice be omitted of certain other formative influences, which the London "Times" (May 9, 1884) commented upon in a sympathetically worded obituary: his inheritance of "that elastic resistance to evil fortune which preserved Mr. Benjamin's ancestors through a succession of exiles and plunderings, and reappeared in the Minister of the Confederate cause, together with the same refined apprehension of logical problems which informed the subtleties of the Talmud."

Benjamin's success at the Louisiana bar was remarkably rapid. At first he had found time to prepare, for his own use, a "Digest of the Reported Decisions of the Supreme Court of the Late Territory of Orleans and of the Supreme Court of Louisiana," which was the earliest digest of Louisiana law. Together with his friend Thomas Slidell, he edited and prepared this for publication in 1834. Soon, however, his law practise became more engrossing; and, as one of the recognized leaders of the Louisiana bar, he rapidly acquired a competence which enabled him to withdraw from the legal arena, purchase a sugar-plantation near New Orleans, and devote himself to sugar-planting and scientific expositions of the best methods of extracting saccharine matter from the cane.

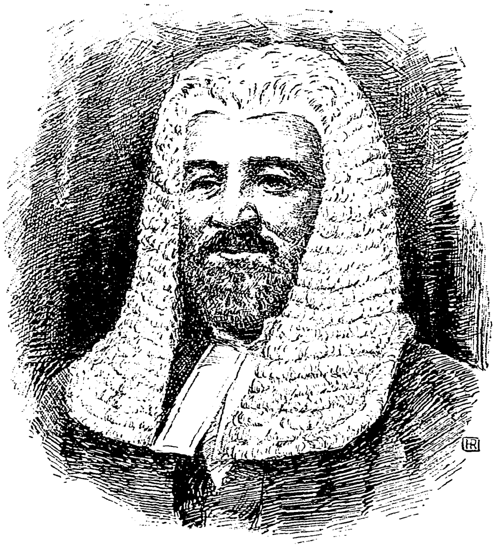
Sugar-Planter and Politician.

Politics also actively interested Benjamin, and from time to time he was elected to various local offices. Thus, he was one of the most active and influential members of the Louisiana Constitutional Convention of 1844-45, and of that of 1852. In 1849 he was a successful presidential elector at large for the state of Louisiana, and as such cast his ballot for General Taylor as president of the United States. Originally a Whig, Benjamin became, during the change of party ties, a distinguished Democratic leader. Meanwhile, however, the destruction of his property by inundations had driven him back to the active practise of law, where success once more awaited him.

That the number of Benjamin's famous legal cases was very large is evidenced by an examination of the law reports of the period. Particularly notable was his conduct of the cases which grew out of the attempt to recover insurance for a cargo of slaves lost by reason of an insurrection on board the "Creole," and his connection with enormously valuable California land-title cases, in one of which his fee is said to have been $25,000, a very large sum for that day. During the October (1848) term of the Supreme Court of the United States he was admitted to practise before that body, and soon became one of the leaders of the federal bar. Benjamin's legal talents were so generally recognized that President Pierce tendered him the position of associate justice of the United States Supreme Court; but he preferred his activities at the bar and in politics. Previously, when President Taylor's cabinet was being formed, Benjamin's name had been under consideration for a cabinet portfolio. In 1852 he was elected to the United States Senate from Louisiana, and was reelected at the expiration of his term, six years later.

United States Senator.

In 1856 Benjamin was one of a small group of senators that succeeded in securing the nomination of Buchanan for president, as against Douglas, and he enjoyed great influence with the Buchanan administration until immediately before the outbreak of the Civil war.



J. P. Benjamin

In the Senate he was soon recognized as one of the ablest debaters; and Charles Sumner considered him the most brilliant orator in the United States. His readiness in debate was remarkable; and he generally spoke on the spur of the moment without preparation. An examination of the "Congressional Globe" of the time shows that almost invariably friends and foes alike were so much impressed by his oratory as to feel obliged to pay tribute to him on the spot. Of his farewell address, upon leaving the Senate when his state, Louisiana, seceded from the Union, Sir George Cornewall Lewis said to Lord Sherbrooke: "Have you read Benjamin's speech? It is better than our Benjamin [meaning Disraeli] could have done."

Benjamin was frequently called upon to deliver addresses and orations on national holidays and other non-political occasions; and competent judges declare that he was even happier at these times than in his political addresses and arguments. His right to be regarded as one of the greatest of the world's orators is no longer open to dispute. It was recently forcibly evidenced by his inclusion, with appropriate examples of his style and comment, in the comprehensive and judiciously edited series of "The World's Best Orators" (x. 97-110) as well as in "The World's Best Orations" (i. 398), the former edited by Prof. Guy Carleton Lee, and the latter by Justice David J. Brewer. Henry L. Dawes, surely no indifferent judge, has well classed Benjamin with Sumner and Beecher, Wendell Phillips, Yancey, and Breckinridge, as having "stirred multitudes, aroused passions, and fired the public heart in terms not less eloquent than the loftiest productions of Fox or Pitt, of Patrick Henry or John Adams."

Pro-Slavery Advocate.

In the Senate Benjamin's constitutional and legal arguments ever attracted particular attention, and made him the leader *par excellence* in the defense of slavery and, later on, of secession. He never actively identified himself with Jewish communal affairs; but his views and actions led to much unjustified identification of American Jews generally with the pro-slavery cause (see Anti-Slavery Movement in America). Thus, one of his most powerful pro-slavery outbursts provoked Senator Wade's satirical reference in the Senate to "Israelites with Egyptian principles"; and even more pronounced attacks in the Senate and in the Northern press generally, on the Jews as favoring slavery, followed, when Benjamin became so prominently identified with the cause of the Confederacy.

The late Isaac M. Wise, in his "Reminiscences," gives an account of an interesting discussion between Benjamin, Daniel Webster, Maury the scientist, and himself, relative to their religious faiths, in the course of which Benjamin declined to permit his Jewish religious views to be described as Unitarian, as Webster had claimed the faiths of all four were in their essence. In 1854 he presented to the Senate, on behalf of American Jewish citizens, a petition calling for governmental action against Swiss anti-Semitic discriminations recognized in a treaty with our government; thus acting as spokesman for the American Jews.

Jefferson Davis' Right-Hand Man.

Upon the organization of the Confederate government, President Jefferson Davis immediately called Benjamin into his cabinet as attorney-general (Feb. 25, 1861), to which position was added that of acting secretary of war (Sept. 17, 1861). On Nov. 21, 1861, he became secretary of war, resigning the portfolio of the Department of Justice; and he retained this position till March 17, 1862, when he became secretary of state, which office he retained till the collapse of the Confederacy in 1865.

Throughout, Benjamin was Jefferson Davis' most intimate and most influential adviser, and was generally described as the "brains of the Confederacy." James Schouler, in his "History of the United States" (vi. 89), remarks:

> "Contemporaries had said at the outset that Toombs was the brain of the Confederacy; but that title, as events developed, belonged rather to Attorney-General Benjamin, the ablest, most versatile, and most constant of all Davis' civil counselors, who acted as secretary of war after Walker's retirement in September, and was then by the following March installed secretary of state, to remain premier until the bitter end, sanguine and serene in bearing, through all mutations of fortune and misfortune."

During much of this time, particularly during his incumbency of the secretaryship of war, Benjamin was extremely unpopular; but President Davis never for a moment lost confidence in him. He resigned the war portfolio on account of the Confederate reverses in connection with the Roanoke Island campaign in 1862, for which he was commonly held in a large degree responsible; but, in spite of censure from the Confederate Congress, President Davis promoted him to the secretaryship of state.

This circumstance has recently been cleared up, through evidence that Benjamin was in no way to blame for these mishaps, but patriotically sacrificed himself, with President Davis' knowledge, by intentionally withholding his justification from the Congressional committee. Disclosure of the true facts would have involved an exposure of Confederate dearth of ammunition, which might, through general publication, have seriously jeopardized the Confederate cause at the time.

Benjamin's most important labors were, however, rendered in connection with the diplomatic activities of the Confederacy. Unfortunately, a thorough study of the diplomacy of the Confederacy has not yet been published, nor any adequate biography of Benjamin, of which that would be the principal chapter. But by such a publication it would be shown how near the Confederacy came to securing European intervention—particularly through the aid of Napoleon III.—by the tempting and statesmanlike efforts of the Confederate state department under Benjamin's direction, and to the probable transformation of an insurrection into a successful revolution in consequence. Even published data, however, not to mention oral reminiscences, justify the conclusion of the late I. M. Wise, who in an editorial in the "American Israelite," May 16, 1884, said that "he was undoubtedly the most distinguished statesman of the Jewish family in this (19th) century and country."

Begins Life Anew in England.

At the close of the Civil war Benjamin fled to the West Indies and then to England, losing his American property by confiscation. Here, at the age of fifty-five, he had to commence bread-winning anew. Early in 1866 as a British subject he entered as a law student at Lincoln's Inn, and in June of that year was called to the English bar, the usual term being curtailed by reason of his past eminence and acumen, through the influence of distinguished English judges. In 1868 his work on "The Law of Sale of Personal Property" appeared, and immediately had a marked success on both sides of the Atlantic. It has gone through edition after edition, and may well be described as the most successful and classical legal text-book of the latter half of the nineteenth century. His success at the English bar, after a brief interval during which he had been compelled to take up editorial work on the London "Daily Telegraph," was remarkable, particularly in connection with colonial appeals. His income for a number of years prior to his retirement from the bar (December, 1882) is said to have been upward of $200,000 per annum. In 1872 he attained the rank of Queen's Counsel.

A farewell dinner was given in Benjamin's honor by the bench and bar of England in the hall of the Inner Temple, London, on June 30, 1883, under the presidency of the attorney-general, Sir Henry James. His standing as the unquestioned leader of the British bar had been generally recognized for some years prior to his retirement. He died at Paris May 6, 1884, his wife and a daughter—Ninette, wife of Capt. Henri de Bousignac of the 117th regiment of the French line—surviving him. Benjamin married in New Orleans, at a time when there was no organized Jewish congregation there, a Catholic lady of the name of Natalie St. Martin. Investigation has failed to confirm the rumor that he abandoned the Jewish faith on his death-bed.

Is Leader of British Bar.

BENJAMIN B. JUDAH OF ROME. See BOZECCI.

BENJAMIN B. LEVI, R.: A Palestinian amora of the fourth century (third or fourth generation), junior contemporary of R. Ammi and R. Isaac (Yer. Peah i. 15a), and senior to Abin II. (Yer. Pes. vii. 34c; Yer. Hor. i. 46a). His name is connected with several Halakot (Yer. Ter. i. 40b; Yer. Pes. ii. 28d; Yer. 'Ab. Zarah ii. 42a, where his patronymic reads "Levaï"), but more frequently with homiletic remarks. On God's message by Jeremiah (xxiii. 24), "Can one hide himself in secret places that I shall not see him ["er'ennu"]?" he observes, "When one sitteth in a corner and occupieth himself with the study of the Law, I show him ["ar'ennu"] to the public, or when he hides himself for sinful purposes of apostasy, I expose him to public gaze" (Ex. R. viii.; Tan., Wa'era, 9; compare Num. R. ix. 9). According to him, when the time for Israel's restoration shall come, there will be a change in the order of nature; at present when the north wind blows no south wind prevails, and when the south wind prevails there is no north wind; but when God shall restore the exiled, He shall produce an "argestes" (see Jastrow, "Dict." p. 115b), when both winds shall do service, as it is written (Isa. xliii. 6), "I will say to the north, Give up, and to the south, Keep not back: bring my sons from far," etc. (Esther R. to i. 8; Cant. R. to iv. 16; Lev. R. ix.; Num. R. xiii.)—[Gen. R. lxxxvii.; Midr. Teh. lxxxvii. 2; Pesiḳ. xiii. 112a, xviii. 137a; Pesiḳ. R. xviii.; Lev. R. xxviii.; compare Eccl. R. to i. 3.]

J. SR. S. M.

BENJAMIN B. MATTITHIAH: Author of a large collection of responsa; flourished in Turkey in the first half of the sixteenth century. His occupation was that of a merchant ("Benjamin Ze'eb," p. 14b), but he also served as a member of the rabbinical college of Arta (vilayet Yanina). In rabbinical literature he is known chiefly through his disputes with many of his contemporaries, which were caused by the great independence he very often displayed in his decisions on legal questions, an independence that greatly offended the rabbinical authorities.

His collection of responsa, "Benjamin Ze'eb" (Venice, 1539), which he published partly in self-justification, was not at all well received by the Italian and Polish rabbis of the time (compare Solomon b. Jehiel Luria, in "Yam Shel Shelomoh," 3b on B. Ḳ. viii., No. 72). The work, containing 450 responsa on the most diverse subjects, throws an interesting light on the intellectual as well as the social status of the Jews of that time in European Turkey and in Asia Minor. For instance, Benjamin's ordinance against men and women dancing together met with great resistance, many young people refusing to obey this puritanical precept ("Benjamin Ze'eb," pp. 228b *et seq.*). It should be noted that "Benjamin Ze'eb" is the title of the book, and not the appellation of the author, whose only name was Benjamin.

BENJAMIN B. MEÏR HA-LEVI OF NUREMBERG: Rabbi at Salonica at the beginning of the sixteenth century. Although German by birth, being a descendant of Jacob MOLIN, he was greatly esteemed by the Spanish-Portuguese Jews of Salonica, and was sent by the entire Jewish population of that city on a diplomatic mission to Constantinople. The contemporary responsa collections contain some of Benjamin's decisions. He also wrote lexical explanations on the Maḥzor of the German rite, which were printed in the Salonica editions of 1526 and 1555–56. The last-named edition also contains some of Benjamin's elegies, among them one upon the occasion of the great fire at Salonica in 1553.

BENJAMIN, MICHAEL HENRY: South African politician; born in London in 1822; died June 11, 1879.

Early in life Benjamin went to Cape Colony (about the year 1849), and for ten years resided at Graaff-Reinet, where he was the promoter of several useful institutions. Thence he removed to Port Elizabeth, which town he represented in the Cape Legislative Assembly from the year 1864; and he was also a justice of the peace for the colony. He worked hard to secure the passing of the Eastern District Courts' Bill, and his extensive acquaintance with commercial matters made his opinions carry considerable authority in the House. Benjamin successfully introduced the Stamp Act into the Legislative Assembly, and was one of the founders of the Standard Bank of British South Africa. Returning to England about 1869, he actively interested himself in a number of communal institutions, becoming a member of the committee of the United Synagogue, the Anglo-Jewish Association, and the Board of Deputies; and sitting on the committees of various London synagogues and public schools.

J. G. L.

BENJAMIN, MOSES: Beni-Israel military officer; born in 1830; died at Bombay in December, 1897. The son of a subedar (captain), he joined the Twelfth Bombay Native Infantry as a private. While a non-commissioned officer he was entrusted with the responsible duty of watching over the wives and children of European officers of the regiment left at Deesa during the Mutiny of 1857. He was present at the siege and capture of Kotah, the action of Burnass, and the battle of Meanee (1843). Rising by dint of industry, he was gazetted as a commissioned officer (jemidar) in 1861. In 1865 he was made a subedar, in which capacity he superintended the work of the regimental lines, then in course of erection at Dharwar. In February, 1878, he was promoted subedar-major; in November, 1878, he became bahadur. He was a very intelligent officer, remarkably versed in military minutiæ. As a reward for his services the governor of India appointed him sirdar-bahadur (June, 1881), and invested him with the Order of British India of the first class. After having served for over thirty-two years, he retired on a pension, and went to Bombay; and the Beni-Israel Old Synagogue Congregation in that city, in appreciation of his capacities, appointed him their chief warden and treasurer. In February, 1892, the governor of Bombay appointed him a justice of the peace.

BENJAMIN BEN MOSES: Italian scholar; lived at Rome at the beginning of the fifteenth century. He took an active part in the administration of the Jewish community of Rome, and was one of the delegates to the assembly of the Italian Jewish communities held at Forli in 1426. Benjamin is the author of a polemical work entitled "Teshubot ha-Nozrim Mikol ha-Mikra ume-Re'iyyot ha-Da'at" (Refutations of Christianity on Biblical and Logical Grounds). The work is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2,408, 3; Codex Halberstamm, 32).

G. I. Br.

BENJAMIN BEN MOSES NAHAWENDI: Karaite scholar and philosopher; flourished at Nahawend, Persia, at the end of the eighth century and the beginning of the ninth. According to the Karaite historian Solomon ben Jeroham—the contemporary of Saadia Gaon—Karaism began properly with Benjamin, who surpassed even Anan in learning (Solomon ben Jeroham's commentary on Psalm lxi. 1). But this assertion can not be verified. Benjamin's work is, for the most part, known only in quotations made by subsequent Karaite writers. But his personality must have been very important, since he was considered by all the Karaites to be as great an authority as the founder of Karaism, Anan himself.

His Works.

As stated by Japhet ben Ali in the introduction to his commentary on the minor prophets, Benjamin wrote the following works, mostly in Arabic: (1) a commentary on the Pentateuch, in which he frequently refers to Oriental customs; (2) a commentary on Isaiah; (3) a commentary on Daniel, in which the word "yamim" (days)—in the verse "Blessed is he that waiteth, and cometh to the thousand three hundred and five and thirty days" (xii. 12)—is explained by "years," pointing thus to the year 1010 as the epoch of the arrival of the Messiah; (4) a commentary on Ecclesiastes and Song of Songs, or, as Pinsker thinks, on all the Five Rolls; (5) "Sefer Mizwot" (Book of Precepts); (6) "Sefer Dinim," or "Mas'at Binyamin" (Book of Laws, or Gift of Benjamin), written in Hebrew, and published at Koslov (Eupatoria) in 1834—containing civil and criminal laws according to Holy Writ.

Adopts Rabbinical Ordinances.

In the last-named work Benjamin approached in many points the Rabbinites. He adopted many rabbinical ordinances, which, however, he left to the free choice of the Karaites to reject or adopt. In order to enforce obedience to the laws, Benjamin introduced a special form of interdict, differing but slightly from the excommunication of the Rabbinites. When an accused person refused to obey the summons served on him he was to be cursed on each of seven successive days, after which excommunication was to be pronounced on him. The interdict consisted in the prohibition of intercourse with all the members of the community, who were also forbidden to greet him, or to accept anything from him ("Mas'at Binyamin," 2a).

His Biblical Exegesis.

Benjamin at times approached the Rabbinites in Biblical exegesis also, and combated Anan's interpretations. Thus he maintained with the Rabbinites, against Anan, that the obligation to marry the widow of a childless brother extended only to the brother of the deceased and not to his further relations. He adopted the Talmudical interpretation of the Biblical words concerning the Sabbath—"Abide ye every man in his place" (Ex. xvi. 29)—maintaining that the prohibition herein expressed has reference, not to the residence, but to a distance beyond 2,000 yards of the town (compare Elijah Bashyazi, "Adderet," p. 63).

Freedom in Thought.

However, in spite of many concessions to Rabbinism, Benjamin adhered firmly to the principle, expressed by Anan, of penetrating research of the Scripture. In Benjamin's opinion one ought not to tie oneself down to the authorities, but to follow one's own convictions: the son may differ from the father, the disciple from the master, provided they have reasons for their different views. Inquiry is a duty, and errors occasioned by inquiry do not constitute a sin (compare Japhet's commentary, cited in Dukes's "Beiträge," ii. 26).

Philosophy of the Bible.

Benjamin seems to have written a work in which he expounded the philosophical ideas contained in the Bible. Judging from the quotations made by later Karaite writers, such as Jacob al-Ḳirḳisani, Japhet ben Ali, and Hadassi, Benjamin betrayed the influence of Philonic ideas, while he adopted the Motazilite theories on the divine attributes, free-will, and other questions of a like character expounded before by Anan. God, he holds, is too sublime to mingle with the material world; and the idea that matter proceeded directly from God is inadmissible. God created first the Glory ("Kabod"), then the Throne ("Kisse"), and afterward an Angel. This Angel created the world, in which he is the representative of God. God Himself never came in contact with men, nor did He speak to Israel on Mt. Sinai. The Law and the communications to the Prophets proceeded from the Angel, to whom are referable all the anthropological expressions concerning God found in the Bible (Hadassi, "Eshkol," 25b). The soul forms a part of the body, and is therefore perishable. The Biblical references to reward and punishment can be applied only to the body (Saadia, "Emunot we ha-De'ot," vi. 4).

This theory of an intermediary power, and the system of allegorizing all the Biblical passages concerning God, upon which Benjamin insists again and again in his commentaries on the Bible, were borrowed from the writings of the sect Magâriyah (Men of the Caves). This sect, the establishment of which, in consequence of a confusion in the text of Shahrastani, has been wrongfully attributed to Benjamin, is identified with the Essenes by Harkavy, who shows that they were called "The Men of the Caves," because they lived in the desert ("Le-Ḳorat ha-Kittot," in the Hebrew translation of Grätz, iii. 497). Benjamin wrote his halakic works in Hebrew, his commentaries probably in Arabic.

BENJAMIN NABON, JERUSALEM. See Nabon, Benjamin.

BENJAMIN 'OZER B. MEÏR: Polish Talmudist; died at Zolkiev May 25, 1810. He was rabbi in Clementow, and afterward head of the yeshibah at Zolkiev. He wrote "Eben Ozer" (Stone of Salvation), published by his grandson, Aaron b. Loeb of Pintschew (Zolkiev, 1792). It contains novellæ to a large portion of the Talmud and of Alfasi, as also to Maimonides' "Yad" and Asher b. Jehiel's commentary. He also wrote novellæ on the Shulḥan 'Aruk, Oraḥ Ḥayyim, which, under the title of "Eben Ozer," are appended to the Amsterdam edition of the Shulḥan 'Aruk. The later Russian editions (Dubnow, 1820; Wilna, 1884, and others) also give these novellæ.

BENJAMIN SALONICA. See Solnik, Benjamin b. Aaron Abraham.

BENJAMIN, SAMUEL: French soldier in the Carlist expedition against Madrid in 1837; distinguished for bravery and remarkable devotion to Boulan de Brie, a lieutenant in the regiment in which he served. When De Brie was mortally wounded Benjamin carried him first from the field of battle, and afterward from the hospital where he had been left at the mercy of the enemy after the Carlists' hurried departure from Huesca. De Brie died in Benjamin's arms; and the faithful servant, gratefully remembering the kindness with which he had been treated by the lieutenant's wealthy mother, was disconsolate, and exposed himself recklessly in the most dangerous engagements, performing remarkable acts of valor. Benjamin was a scrupulously religious Jew, and observed all the laws of his religion as far as was possible under the circumstances of the campaign.

Bibliography: *Sulamith*, vol. ii., No. 3, quoted from Col. L.'s article in *Die Elegante Welt* on the Carlists' expedition against Madrid in 1837.

S. P. Wi.

BENJAMIN B. SAMUEL OF COUTANCES: Talmudist and French liturgical poet of the first half of the eleventh century. The name of the place of his residence, Coutances (department of the Manche, Normandy), was formerly Coustances, in Hebrew קוסטני; and Grätz ("Gesch. der Juden," 3d ed., vi. 53) incorrectly transfers this Benjamin to Constance on the Lake of Constance. The old scholars conferred on Benjamin the honorable title "payyeṭan"; for he was one of the most prolific and most gifted of the payyeṭanim. In the various ritual collections thirty-one of his liturgical pieces are preserved.

The fact that most of his poems occur in the French ritual, while the old German and Polish rituals contain each but one of his poems, suffices to show that Grätz's conjecture is wrong. Benjamin wrote in the main for the three festivals and New-Year's Day, and some few poems for the Day of Atonement. It is doubtful whether certain liturgies containing "Benjamin" in acrostic are to be attributed to him or to his younger contemporary, Benjamin b. Zeraḥ.

Benjamin was considered, also, a great Talmudic authority; and one of his decisions, cited by Isaac ha-Levi, Rashi's teacher, is of some importance. In this he shows the connection between Midrash and piyyuṭ, explaining that both originated in public readings, and drawing the conclusion that the opposition to the insertion of piyyuṭim in the prayers is unfounded. Benjamin's preference for Akiba's "Alphabet," which he uses in his liturgical poems, reveals a certain inclination toward mysticism.

L. G.

BENJAMIN THE SHEPHERD: A shepherd who lived in Babylonia at the beginning of the third century. The Talmud has transmitted the formula of a blessing of which he was the author. Benjamin, who possessed no knowledge of Hebrew, and was therefore unable to recite the prescribed grace after meals ("birkat ha-mazon"), substituted the following brief ejaculation in Aramaic: "Blessed be the All-Merciful, the owner of this bread" (Ber. 40b). This prayer is still taught little children who are unable to recite the "birkat ha-mazon." Compare "Ba'er Heṭeb" to Shulḥan 'Aruk, Oraḥ Ḥayyim, 187, 1; Bacher, in Brody's "Zeit. für Hebr. Bibl." v. 154. In Yer. Ber. vi. 10b, bottom, the same story is related of "some Persian"; in both places Rab is cited as approving the plain man's prayer.

J. SR. L. G.

BENJAMIN, SIMEON (also known as **Benjamin, Levi**)**:** English Hebrew grammarian, who published in 1773 at London "Da'at Ḳedoshim" (Knowledge of the Holy), a short Hebrew grammar. It deserves attention as one of the earliest works composed by an Ashkenazi in England.

BENJAMIN OF TIBERIAS: A rich Jew who, when the emperor Heraclius in 628 went to Jerusalem during the Persian war, was accused of hostility toward the Christians. This accusation probably implied that he sided with the Persians. Notwithstanding this charge, however, the emperor became the guest of Benjamin, who provided both for him and for his army. Reproached by Heraclius for his hostility toward the Christians, Benjamin frankly declared: "The Christians, also, are enemies of my religion." When the emperor punished the Jews after his victory, he spared Benjamin on condition that the latter would consent to baptism, and perhaps with the further understanding that he would emigrate to Egypt.

G. S. KR.

BENJAMIN OF TUDELA: A celebrated traveler of the twelfth century. Beyond his journey, no facts of his life are known. In the preface to his itinerary, entitled "Massa'ot shel Rabbi Binyamin" (Travels of Rabbi Benjamin), the information is furnished that he came from Tudela in Navarre, and that his father's name was Jonah. This descriptive work, written in an easy, fluent Hebrew, is compiled, as the preface states, from notes made by the traveler on the spot and brought back by him in 1173 to Castile. The unknown author of the preface probably compiled the account for Benjamin from these notes, retaining the traveler's own words in the first person, but omitting much. Benjamin, for instance, claims to have noted down everything that he saw and all that he heard from the mouths of men of established reputation in Spain. His notes, therefore, may have contained at the same time the names of his informants; but in the book as published only Abraham the Pious is mentioned by name as having given information in Jerusalem.

Travels Occupy Thirteen Years.

His Accuracy and Shrewdness.

Benjamin, who probably traveled as a merchant, evinced keen interest in all things, and possessed a clear insight into the conditions and history of the countries he traversed. His journey occupied thirteen years: setting out from Saragossa in 1160, he was back again in Spain in 1173. He made long stays everywhere, taking plenty of time to collect his information and to verify or disprove accounts given him. Being an intelligent Spanish Jew, he took an appreciative interest not only in Jewish affairs in the lands he visited, but also in the general conditions prevailing and in the various historical and educational facts related to him. His account contains numerous valuable details of the political history and internal development of countries and nations; and the history of commerce must always count Benjamin's itinerary as one of its earliest and most valued sources. The commercial importance of Barcelona and Montpellier, of Constantinople and Alexandria, as centers of international trade is vividly depicted. The situation of some cities—as, for instance, Amalfi—is described in terse but graphic words. He gives a clear picture of the peculiarities of the republics of Genoa and Pisa, in which every house was a fortress. His characterization of the Greeks is accurate: waging war by means of mercenaries, he says, they had come to have no warlike spirit themselves and had become women. He is struck by the significance of the victorious progress in Europe of the Seljuks, whom he calls Turks. He treats of the Assassins and Druses with great shrewdness, as well as of the Wallachians, who were invading Greece by way of the Balkan passes. He made the intimate acquaintance of the most important functionaries of the Byzantine empire, and has much to say likewise about the calif in Bagdad, whom he compares to the Christian pope. Many more of these little details of information could be adduced to show Benjamin's acuteness of observation and critical understanding of affairs, both Jewish and non-Jewish.

But Benjamin's chief interest undoubtedly centered in the conditions of the Jewish congregations of the countries he visited, and about which he has registered so many and such important and reliable accounts that his "Travels" are considered a source of the first importance for the history of the Jews in the twelfth century. With the sole exception of the "Sefer ha-Ḳabbalah," written about the same time by Abraham ibn Daud of Toledo, there is no work which compares with Benjamin's in value. His accounts, moreover, cover the majority of the countries then inhabited by Jews. In a species of panoramic view, he gives full descriptions of the Jews living in all those lands, with accurate data about them, their civil standing, their occupations, their schools, and their leading men.

Benjamin's route to the East took him through Catalonia, southern France, Italy, Greece, the islands of the Levant, Syria, Palestine, and Mesopotamia, to Bagdad. Arrived at that city, which was then again the residence of a Jewish exilarch, he gathered information concerning countries which lay still farther east and north, and concerning the large Jewish congregations of Persia and of the countries beyond the Oxus. His homeward journey lay through Khuzistan, the Indian ocean, and Yemen, to Egypt, where he stayed a long time; thence by way of Sicily back to Spain. Some remarkable notes are given at the end of the book concerning the Jews of Germany, as also those of the Slavonic lands east of Prague. Likewise northern France, with its incomparable scholars, hospitality, and fraternal feeling, is not forgotten. Benjamin did not himself visit these latter countries, and so was not personally acquainted with any of their leading men. In other places Benjamin—probably not a scholar himself, but possessing a profound respect for scholarship—always enumerates the principal men and the heads of the Jewish communities. His book thus contains the names of no less than 248 of those he knew, among them many well known to history.

His Statistical Data.

Of especial importance are his statistical data; and it is from his accounts that the first accurate representation of the density of the Jewish population in certain districts and cities is obtained. He furnishes also important and reliable accounts of the civil occupations of the Jews. From him it is learned, for instance, that the Jews of Palestine and of some other countries extensively practised the art of dyeing; that the large Jewish congregation of Thebes, in Greece, was employed in the manufacture of silk and purple; that there were Jewish glass-makers in Antioch and Tyre; that in the last-named town there were also Jewish shipowners; that among the Druses of Lebanon, Jewish workmen were domiciled; and that in Crissa, at the foot of Parnassus, a large colony of Jewish peasants existed.

Jewish Sects.

Benjamin also gives valuable particulars concerning Jewish sects. He tells of the Karaites in Constantinople, Ashkelon, and Damascus; of a peculiar sect upon the island of Cyprus which fixed the beginning of the Sabbath not on Friday evening, but on Saturday morning; of the Samaritans in Cæsarea, Sebaste, Ashkelon, Damascus, and especially in Nablus (Shechem). He calls the Samaritans "Samaritan Jews," and describes peculiarities of their worship and language. His accounts of the Jews in Bagdad and other cities of the East are very full; and most interesting is his description of the grave of Ezekiel the prophet, and the solemn ceremonies there. His account of the pseudo-Messiah, David Alroy, who appeared shortly before Benjamin's journey, is the chief source of information concerning that remarkable episode of Jewish history.

The details mentioned above will suffice to give an idea of the rich contents of Benjamin's book of travels, which, though perhaps not altogether free from fiction, is preponderatingly marked by sobriety and clearness of narrative and a concise style, avoiding mere verbiage.

Benjamin's itinerary, published in Constantinople in 1543, has been reprinted as follows: Ferrara, 1556; Freiburg in Breisgau, 1583; Leyden, 1633 (with Latin translation); Amsterdam, 1697; Altdorf, 1762; Sulzbach, 1783; Zolkiev, 1805; Lemberg, 1859; Warsaw, 1884. The work was published in Latin by Arias Montanus (Antwerp, 1575), and by C. l'Empereur (Leyden, 1633); in German, by Mordecai ben Moses Drucker (Amsterdam, 1691; Frankfort-on-the-Main, 1711, perhaps following the Latin of L'Empereur); in French by Bergeron ("Recueil des Voyages," The Hague, 1735, following the translation of Arias Montanus; also Paris, 1830), and by J. Ph. Baratier (Amsterdam, 1734); in English in 1625 (London, from the Latin of Arias Montanus), 1744 (S. Harris, "Collection of Voyages," vol. i.), 1784 (ed. R. Gerrons), 1808 (Pinckerton, "General Collection," vol. vii.); by A. Asher, London, 1840; and in part by M. N. Adler ("Pal. Explor. Fund Quarterly Statement," October, 1894, pp. 288 *et seq.*, from a manuscript in the British Museum); and in Dutch by Jan Bara (Amsterdam, 1666). A new edition has been prepared (1902) by Grünhut in Jerusalem.

G. W. B.

BENJAMIN, WILLIAM (commonly called **"Bill Bainge"**): English pugilist; born at Northleach, Gloucestershire, England, in 1826. Benjamin's first match was with Tom Sayers, the champion of England from 1857 to 1860, for £200 a side, the battle taking place on the Isle of Grain, in Kent, Jan. 5, 1858. Sayers disposed of his opponent in three rounds. A second match, for the same stakes, was arranged, and took place at Ashford, April 5, 1858. On this occasion Benjamin made a strong defense, but was counted out in the eleventh round, despite his protest at being forced from the ring. This encounter somewhat retrieved Benjamin's reputation, which had been lowered by his poor showing in the first battle. That he ultimately became a capable boxer is shown by the fact that on July 29, 1861, at Home Circuit, he fought Dick James of Aberdare, against whom he had been matched for £100 a side, and beat him in two rounds.

BENJAMIN WOLF ELEAZAR. See Loew, Benjamin Wolf.

BENJAMIN WOLF BEN ISAAC LEVI: Cabalist; lived at Leitmeritz, Bohemia, in the middle of the seventeenth century. He is the author of a work, "Amarot Tehorot" (Pure Words), explaining the difficult words of the Zohar, published by his son Saul, Lublin, 1745. Another work of Benjamin, entitled "Torat Mosheh" (The Teaching of

Moses), is still extant in manuscript (Oxford, No. 1171). It contains explanations of the thirteen articles of belief according to the Midrashim and Haggadot; theological and metaphysical articles extracted from the works of Spanish, French, and German scholars, with additions of his own; and historical sketches.

BENJAMIN HA-ẒADDIḲ ("the pious"): A philanthropist of the tannaitic period. According to a Baraita, he was manager of certain charitable funds. Once there appeared before him a woman begging alms, but Benjamin protested that the treasury was exhausted. The poor, despairing woman thereupon exclaimed, "Rabbi, if thou wilt not aid me, a woman and her seven children will perish of starvation!" Benjamin then undertook to support the family out of his own means. After the lapse of some time Benjamin became sick unto death. Then, legend says, the ministering angels addressed the Lord, saying, "Master of the universe, Thou hast said, Whosoever preserves a single being in Israel is in Thy sight as if he had preserved the whole world: shall Benjamin, who has preserved a mother and her seven children, die at an early age?" Thereupon the decree of death was annulled, and two-and-twenty years were added to Benjamin's allotted period of life (B. B. 11a).

BENJAMIN ZE'EB B. SAMUEL ROMANER. See Romaner, Benjamin Ze'eb b. Samuel.

BENJAMIN ZE'EB OF SLONIM: Russian Talmudist; lived at the end of the eighteenth century; reputed pupil of Elijah b. Solomon of Wilna, and of the latter's pupil, Ḥayyim b. Isaac of Volozhin. He wrote a number of letters, published under the title "Maẓref ha-'Abodah" (Purifier of the Ritual; Königsberg, 1858; Munkatsch, 1890), containing an alleged correspondence between Benjamin and the friend of his youth, Joseph of Nemerow, on the subject of Ḥasidism. In the first letter Benjamin asks his friend for information concerning the movement, his investigations not having enabled him to understand how Ḥasidism could presume to change the old laws, and to conform them to the rules of the Cabalists, particularly of Isaac Luria. The friend's "answer" follows with a detailed account of the relation of the Cabala to the Talmud, and states how far the former may claim to be authoritative, even when in conflict with the Talmud. Benjamin's next letter, a most interesting piece of work, gives in the form of a dialogue ("wikkuaḥ") between himself and a Ḥasid, the arguments for and against Ḥasidism, showing his thorough knowledge of the principles which distinguish the Ḥasidim and their opponents. Therein the opponent of Ḥasidism raises nineteen objections, which his anonymous Ḥasid meets, in almost every case satisfactorily. His friend Joseph of Nemerow then succeeds in convincing Benjamin completely of the truth of Ḥasidism.

A very slight examination of the letters is sufficient to show their fictitious character and to demonstrate that they are written for the purpose of illustrating the truths of Ḥasidism by an imaginary conversion of a pupil of Elijah of Wilna; an impression that is confirmed when, although alleged to have been written in 1787, they speak of Elijah as deceased (13b, etc.), whereas he died a decade later. Furthermore, a work of Elijah is cited (17a) which was not published until 1819. Whether the name "Benjamin of Slonim" is also fictitious can not be ascertained, nor is there any clue that might give information concerning the author of this clever apologetic for Ḥasidism.

Bibliography: Deinhard, *Miflagot be-Yisrael*, p. 89; idem, *Zemir 'Ariẓim*, Introduction, p. 15, considers Judah Bachrach to be the author of the *Maẓref ha-'Abodah*, but without sufficient evidence.
L. G.

BENJAMIN ZE'EB WOLF BEN SHABBETHAI: Dayyan at Pinczow in the latter half of the seventeenth and at the beginning of the eighteenth century. He edited the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, with notes that are a digest of the works of the rabbinical authorities of the seventeenth century, to which he occasionally adds his own views or those of his contemporaries. The book was published in Berlin in 1712 under the title "Misgeret ha-Shulḥan" = "Border of the Table" (see Ex. xxv. 25), with a preface by his son Shabbethai, who lived in Halberstadt in the house of Judah Loeb, the son-in-law of the local rabbi, Abraham ben Judah Berlin, a patron of rabbinical studies, who seems to have defrayed the expenses of the printing of this work. Benjamin's father, Shabbethai, was a brother of Samuel Romaner, and Benjamin was therefore a cousin of Benjamin, the rabbi of Dessau and author of "Ir Binyamin." In an appendix to the work are printed "Teḳanot ha-Boreḥim," the laws on bankrupts passed by the Council of the Four Lands.

L. G. D.

BENJAMIN BEN ZERAḤ: Payyeṭan; lived in southeastern Europe in the middle of the eleventh century. He is called by the later payyeṭanim "the Great," and also "Ba'al Shem" (Master of the Name), on account of the numerous names of God and angels used by him in his piyyuṭim. He wrote 15 poems ("yoẓerot") for the Sabbaths preceding the feasts, and 40 seliḥot, published in the Maḥzor of the German rite.

His piyyuṭim have an easy, elegant style. Parallels with Kalir are frequent. Judging from his seliḥah, אנא ה' האל ("I beseech thee, Lord God")—in which he plays on the name of God—consisting of 22 letters, and his "Ofan," in which he gives the names of angels, Benjamin was inclined to mysticism.

L. G. I. Br.

BENLOEW, LOUIS: French philologist; born at Erfurt Nov. 15, 1818; died at Dijon February, 1900. He studied at the universities of Berlin, Leipsic, and Göttingen, and went to France in 1841, where he taught modern languages at Nantes and Bourges successively. He became librarian at the Sorbonne; received the degree of "Docteur ès Lettres" in 1847; was appointed professor of ancient literature at the University of Dijon in 1849; became dean of the faculty of that institution; and was pensioned in 1882. He was a knight of the Legion of Honor. Besides his graduation theses on the style of Sophocles compared with that of Æschylus and Euripides ("De Sophocleæ Dictionis Proprietate cum Æschyli Euripidisque Dicendi Genere Comparata") and the accentuation of the Indo-European languages ("De l'Accentuation des Langues Indo-Européennes"), Benloew was the author of the following works: "Aperçu Général de la Science Comparative des Langues," 1858; "Précis d'une Théorie des Rythmes," 1862; "Recherches sur l'Origine des Noms de Nombres Japhétiques et Sémitiques," 1862; "Les Sémites à Ilion, ou la Vérité sur la Guerre de Troie," 1863; "Essai sur l'Esprit des Littératures," 1870; "Un Dernier Mot sur les Prosateurs," 1871; "La Grèce Avant les Grecs," 1877; "Analyse de la Langue Albanaise," 1879; "Les Lois de l'Histoire," 1881. He also published an edition of Sophocles, and, in collaboration with H. Weil, "Théorie Génerale de l'Accentuation Latine," 1885.

S. J. W.

BENMOHEL, NATHAN LAZARUS: The first conforming Jew obtaining a degree in a British university; born at Hamburg about 1800; died in 1869. He settled in Dublin in 1829 as teacher of languages; entered the university after a course of private study in 1832; obtained his degree of B.A. in 1836, and of M.A. in 1846. He held the position of deputy professor of German and French at the Dublin University from 1839 till 1842.

Benmohel composed, but never published, the following works: (1) "Orthographia Hebræo-Anglicana," 1830—a new system of writing English in Hebrew current handwriting, after the usage prevailing in Germany; (2) "An Essay in Verse, Toward a Comparison Between the History of the Children of Israel During their Journeys from Egypt to the Promised Land, and That of the Reformation"; (3) "Primitive Ethnology, Tending to Be a Guide, Basis, and Tribute to 'Sammlung Altdeutscher Eigennamen'" (incomplete). He died in Dublin.

Bibliography: *Anglo-Jewish Exhibition Catalogue*, 1887, pp. 22, 33, 62.

J. G. L.

BENNETT, HENRY: Sergeant in the British army; born in England 1863; killed in action during the war with the Afridis, November, 1897. He was a grandson of Solomon Bennett, the engraver, who translated the Hebrew Bible into English in 1841. Bennett was at first articled to a firm of solicitors; but in 1882 he enlisted in the British army—joining the first battalion of the Dorsetshire regiment—and went to Egypt, where he saw active service during the events occurring in connection with Arabi Pasha. He assisted in drilling some of the black troops up the country, and his knowledge of Arabic was considered by the authorities to be of great value. He returned with his regiment to England, and when subsequently it was ordered to India he went out with it. After participating in the engagements at the front, he was killed on the retreat from Warren.

Bibliography: *Jewish Chronicle*, Nov. 26, 1897.

J. G. L.

BENNETT, SOLOMON: English theologian and engraver; born in Russia before 1780; died after 1841. He wrote a considerable number of works on Biblical topics, among them "The Consistency of Israel," 1812; "Discourses on Sacrifice," 1815; "The Temple of Ezekiel," 1824; "Critical Remarks on the Authorized Version," 1834.

Bennett began to publish a complete revised translation of the English Bible in 1841; but only two numbers, containing Gen. i.–xli., appeared, and the project was abandoned. His "Temple of Ezekiel" contains as a frontispiece a portrait of himself engraved by Bennett after an original painting by Frazer. Bennett was in Berlin 1795–99, but spent the latter part of his life at Bristol.

BENOLIEL, JOSEPH: Portuguese translator; lived at Lisbon. He wrote the small book, "Porat Yosef" (Joseph's Fruitful Bough; see Gen. xlix. 22), containing Spanish translations of the sayings of the Fathers, the Pesaḥ-Haggadah, the Song of Solomon, the Books of Ruth and of Esther, Lamentations, and of some Hafṭarot (Lisbon, 1887).

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.*, pp. 27 *et seq.*

L. G. M. K.

BENOLIEL, DON JUDAH: Moroccan and Austrian consul at Gibraltar; president of the Jewish community there, and of the chamber of commerce; died in 1839. When Sardinia sent a fleet against Morocco, Benoliel was enabled, in his consular capacity, to settle the differences amicably. He earned special credit by his services to the Jewish community of Tangier. On account of a quarrel that had taken place between two Jews in a synagogue of that city, the governor, with the sultan's consent, had all the synagogues of the city demolished. When the sultan Muley Abd al-Raḥman visited Tangier two years later, Benoliel, who was much respected by him, declining all honors for himself, secured permission for the reerection of the synagogues. In memory of this noble self-denial, a special memorial prayer is offered on every Day of

Atonement in the synagogues of Tangier. Judah Benoliel also possessed the full confidence of Cardinal Mastai-Ferretti, afterward Pope Pius IX. When the latter returned to Italy from Chile he entrusted Benoliel with large sums of money.

G. M. K.

BENSCHEN: A Judæo-German word meaning either to say a blessing or to bless a person. It is derived from the Latin "benedicere"; German "benedeien"; old Spanish "beneicer"; Portuguese "benzer"; Provençal "benesir," "beneir"; French "bénir." Benschen is used specifically for the saying of grace after a meal. "Gomel Benschen" means to recite the benediction of thanksgiving after having escaped a great danger either in illness or in imprisonment, or after some perilous trip by sea or through the desert, the benediction containing the word "ha-gomel": "Blessed be thou, O Lord, who bestowest (ha-gomel) mercy upon the undeserving" (Ber. 54b). See Benediction.

"Benschen" is used for the blessing of God—"Der Bore [Creator] wird dich benschen." See "Kaw ha-Yashar," in Grünbaum's "Jüdisch-Deutsche Chrestomathie," 1882, p. 255, for the blessing of the children on Sabbath, festival days, and other solemn occasions. Benschen is also resorted to in cases of great sickness when there is little hope of recovery; the rabbi or saint is then requested to offer a prayer, often with a change of the name of the sufferer so as to avert his apparently impending fate. See Name, Change of; and Superstitious Customs. "Benschen" is used also euphemistically for "slapping."

K.

BENSHEIM, SIMON: Member of the grand-ducal Oberrat (Upper House) of Baden; born at Mannheim Oct. 14, 1823; died there Oct. 26, 1898. Extremely active in congregational and philanthropic matters, he was annually elected by unanimous vote a member of the synagogal council, and finally its president. The grand duke recognized his worth as a communal leader and as a public-spirited citizen by conferring upon him the Zähringer Löwen-Order of the second class. As a member of the grand ducal Oberrat he won for himself the respect and esteem of all classes of people.

Bibliography: *Der Gemeindebote*, p. 2, in *Allgemeine Zeitung des Judenthums*, 1898, No. 49.

S. M. Co.

BENTWICH, HERBERT: English lawyer and communal worker; born in London 1856; educated at University College and the University of London (LL.B.). One of the founders of the Hampstead Synagogue, he is also one of the chief promoters of the Chovevei Zion Association in England, and assisted in affiliating it with the Zionist movement under Dr. Herzl. In that capacity he attended the Basel Congress of 1898, in which he was a member of the presidential council.

Later, when the somewhat diverse aims of the two associations became apparent, Bentwich severed his connection with the English Zionist Federation. He organized the Maccabean Pilgrimage to Palestine, 1897. Bentwich is an authority on copyright.

J.

BENVENISTE (Hebrew, בנבנישת, in Catalan, **Benvenist**: The name of an old, rich, and scholarly family of Narbonne, the numerous branches of which were found all over Spain and the Provence, as well as at various places in the Orient. It is still borne by certain families in Bulgaria, Servia, and Vienna. It was also used as a prænomen (see Steinschneider, "Cat. Bodl." No. 7348; Loeb, in "Rev. des Etudes Juives," xxi. 153).

1. Abraham Benveniste: Statesman and chief rabbi (or "court rabbi") of Castile during the reign of Juan II., 1406-54. He was entrusted with the public finances, and, as he himself has stated, he controlled, in conjunction with the constable Alvaro de Luna, the entire administration of Castile. He was rich and learned and an influential representative of the Jews at court, being called thither by various events, of which the most important was the following: On the occasion of a malicious charge of ritual murder preferred against the Jews in a city near Ecija, Abraham Benveniste, together with Joseph ha-Nasi, the chief farmer of the taxes, and Abraham ibn Shushan, repaired to the palace in order to expose the falsity of the accusation and to prevent further danger to the Jews. In compliance with the desire of the Jewish scholars, and the petitions of all the Jewish communities of Castile, the king, or, more strictly speaking, Alvaro de Luna, appointed Benveniste in 1432 chief judge of the Jews and court rabbi (Rab de la Corte).

In order to consider the laws issued against the Jews, to further the neglected study of the Talmud, and to put a check upon the prevalent immorality and the practise of informing, Benveniste, immediately after his appointment, called a synod at Valladolid. It was composed of rabbis, scholars, and other prominent men, and met, not as Graetz has it, in the royal palace, but in the chief synagogue, situated in the Jews' quarter. Under the presidency of Benveniste the synod drew up a statute called the "Tekanah," which was to serve as a basis for the administration of the communities. It dealt with the divine service, with the glorification of the study of the Law, with state taxation, and with the welfare and progress of the communities. It is divided into five sections; namely: (1) concerning the study of the Law; (2) the choice of judges and other functionaries; (3) the practise of informing; (4) taxes and duties; and (5) apparel. The statute was to remain in force ten years.

In 1869 M. Kayserling translated this statute into German from a manuscript in the national library in Paris; under the title "Das Castilianische Gemeinde-Statut" it appeared in the "Jahrbuch für die Gesch. der Jud. und des Judenthums," iv. 262-334. The Spanish edition by Francisco Fernandez y Gonsales is entitled, "Ordenamiento Formado por los Procuradores de las Aljamas Hebreas . . . en la Asemblea Celebrada en Valladolid en el Año 1432," Madrid, 1886 (see "Revue Etudes Juives," xiii. 187 *et seq.*).

Abraham is renowned for having reinstated the study of the Law and for having, by his liberality, kept many Jews from conversion.

3. **David Benveniste:** Rabbi of Salonica in 1550; mentioned as a rabbinical scholar by his contemporaries (Conforte, "Ḳore ha-Dorot," p. 38a).

4. **Ḥayyim ben Israel Benveniste:** Rabbinical authority; born 1603 at Constantinople; died Elul 17, 5433 (Sept., 1673). He was a pupil of J. Samego, but more particularly of Joseph Trani, who was much attached to him, and who eventually brought about his marriage to the daughter of a wealthy man. Ḥayyim became rabbi at Constantinople, and later at Smyrna (1655), where he took a prominent part in the Shabbethai Ẓebi movement. Although his attitude toward the new Messianic pretensions was at first somewhat skeptical, he soon became an adherent of Shabbethai Ẓebi—a step which later he deeply regretted and sought to efface from his memory by penance. It is uncertain to what extent he was concerned in the dismissal from office of his rabbinical colleague Aaron de la Papa, and whether he hindered the reinstatement of the latter. On his death, the funeral sermon was preached by Daniel Gerasi (see his "Odeh Adonai," No. 2, Venice, 1682). His hitherto unknown epitaph reads:

פאר הדור ריש גלותא מה"רר חיים בנבנשת זצו"קל
נתקבל בישיבה של מעלה י"ז אלול שנת תג"ל לפ"ק.

Benveniste was a man of astonishing learning. At the age of twenty-one he had already begun his commentary to the "Semag" ("Sefer ha-Miẓwot") of Moses de Coucy. This was followed by the notable work "Keneset ha-Gedolah," a commentary in eight parts on the four codes of the Law, of which the following were published during the lifetime of the author: "Oraḥ Ḥayyim" (Leghorn, 1657) and "She-yare" (=Addenda), *ib.* 1671; 2d ed., Constantinople, 1729; both included in 2d ed., Leghorn, 1791–92; "Ḥoshen Mishpaṭ," Smyrna, 1660; 2d ed. in two parts, *ib.* 1734). The remaining portions of the work were published, 1711, 1716, 1717, 1731, in Constantinople, where the "Dine de-Ḥayye" (Laws of the Living), or commentary on the work of Moses de Coucy, also appeared in two parts, 1742. The responsa of Benveniste were published at Constantinople in 1743, and another collection of them, dealing with the "Yoreh De'ah" and the "Eben ha-'Ezer," appeared in four parts under the title "Ba'e Ḥayye" (Necessaries of the Living) at Salonica, 1788–91. In addition to these there exist "Pesaḥ Me'ubbin," prayers and rites for the first two evenings of Passover; an extract from the "Keneset ha-Gedolah," Venice, 1692; and "Ḥamra we-Ḥayye" (Wine and Life), on the Babylonian treatise Sanhedrin, Leghorn, 1802.

5. **Immanuel Benveniste:** Noted printer and publisher in Amsterdam from 1640 to 1660. He published several rituals and larger works, among which may be mentioned "'Aruk," "Shulḥan 'Aruk," "Sh'ne Luḥot ha-Berit," and a valuable complete and still popular edition of the Talmud. The last named, owing to a lack of purchasers, was offered for sale, soon after publication, at six imperials or less. From his workshop issued several well-known printers, notably the firm of Judah Gumpel and Samuel Levi, as well as Uri Phœbus Levi. In a measure the fame of Amsterdam Hebrew printing can be traced back to Benveniste's influence. Several works issued by him are known by the borders of his title-pages forming a doorway, or by his device of star, lion, and castle.

6. **Isaac Benveniste:** Nephew of AARON and of PHINEHAS B. JOSEPH HA-LEVI of Montpellier. He was perhaps the author of a ritual work entitled "Liḳḳuṭe ha-Dinim" (Collection of Laws), containing 118 short decisions. It is still extant in manuscript.

7. **Isaac Benveniste (Zag):** Son of Joseph, (11); father of Sheshet Benveniste (No. 19). He was physician in ordinary to the king of Aragon in the early part of the thirteenth century, and lived at Barcelona; such was the esteem in which he was held that he was distinguished by the title of "Nasi" (prince). In 1215 he summoned a meeting of delegates from all the Jewish communities of southern France, from Narbonne to Marseilles, to convene at St.-Gilles. The convention, of which the influential Levi b. Moses of Narbonne was chairman, met for the purpose of electing delegates to Rome in order to frustrate the plans of Pope Innocent III., and to hinder any measures that the Lateran Council might devise against the Jews. The efforts of the deputies, however, were fruitless; for the Lateran Council decided that the Jews were to wear a special badge. It is due in large measure to the efforts of Benveniste that the provisions of this law were not strictly enforced in Aragon. On the recommendation of Jaime I. and with the consent of the bishops of the land, Pope Honorius sent a diploma to Benveniste, exempting him, in recognition of his services, his abstention from usury, and his title of "catholicorum studiosus," from every indignity. It was further stipulated that the Jews of Aragon were not to be forced to wear badges.

8. Israel ben Eliezer Benveniste: Relative of Ḥayyim (No. 4) and of Joshua ben Israel Benveniste (No. 13); a resident of Constantinople; died 1677. He wrote "Bet Yisrael" (House of Israel), a collection of sermons and funeral orations, published by his son (Constantinople, 1678; Azulai, "Shem ha-Gedolim," ii. 46).

9. Joseph Benveniste: Son of the court rabbi Abraham Benveniste (No. 1); lived in Castile in 1450; and is said to have been wealthy, philanthropic, and a patron of Jewish science (Zacuto, "Yuḥasin," p. 226).

10. Joseph Benveniste: Of Segovia; lived in Smyrna toward the end of the sixteenth century; son of Moses Benveniste, and disciple of Elias Galigo and of Samuel Useda. Of his writings nothing remains but a fragment on the Talmudic treatise Giṭṭin, published by his grandson Solomon Algazi in the work entitled "Dobeb Sifte Yeshenim" (causing the lips of those that are asleep to speak, Cant. vii. 10), Smyrna, 1671.

Bibliography: Azulai, *Shem ha-Gedolim*. i. 77, ii. 29; Steinschneider, *Cat. Bodl.* Nos. 5888, 6437; Benjacob, *Oẓar ha-Sefarim*, p. 108, No. 169.

11. Joseph ben Benveniste: Grandson of Zerahiah Gerundi, and grandfather of Aaron ben Joseph ha-Levi; lived about 1190 at Montpellier (Gross, "Gallia Judaica," pp. 330 *et seq.*).

G. M. K.

12. Joseph ben Ephraim ha-Levi Benveniste: Castilian minister of finance, and councilor of Alfonso XI.; born at Ecija at the end of the thirteenth century; died at Toledo in 1337. The Infante Don Philip being captivated by Benveniste's great abilities, pleasing manners, and talent for music, recommended him to his nephew Alfonso XI. The latter, not less charmed than his uncle, appointed Benveniste not only minister of finance (*almoxarif*), but also confidential councilor (*privado*). Benveniste's position was a very influential one. He rode out in a state carriage, knights escorted him on his journeys, and grandees dined at his table. This greatness could not fail to excite envy; and Benveniste had to struggle against the plots of his enemies, under whose attacks he finally fell.

As a token of his confidence, Alfonso sent him to Valladolid to bring his sister, Doña Leonora, to Toledo (1328). When the Infante was about to set out, a mob, instigated by Benveniste's enemies, attempted to kill him and his attendants. His life was saved by the princess. She asked the leaders to let him accompany her to the Alcazar of the city, where she promised to give him up. But, when there, she ordered the gates to be shut and refused to deliver him to the rioters. Alfonso on learning what had happened marched against Valladolid, besieged it, burned many houses, and would have destroyed it entirely, had not more moderate persons dissuaded him.

The plot having failed, Benveniste's enemies had recourse to slander. Many complaints against his administration were made to the Cortes of Valladolid; and the king, fatigued at last by these constant complaints, dismissed Benveniste from the council and the position of almoxarif.

Benveniste's downfall was, to some extent, due to himself. Samuel ibn Wakar, Alfonso's physician, stood high in the royal favor. Alfonso entrusted him with the farming of the revenues derived from the importation of goods from the kingdom of Granada. Benveniste, jealous of his coreligionist's influence, offered a higher sum for the right of farming the import taxes. Samuel, in order to avenge himself, privately persuaded the king to stop the exportations by the Moors, regardless of existing treaties. This was followed by a war with the Moors. Alfonso's treasury being exhausted, Gonzalo Martinez, who had served under Benveniste and had become influential through his recommendation, proposed to buy from the king ten of the principal Jews, for whom he would pay 800 lb. of silver. The king, compelled by his need of money, consented; and Martinez hastened to seize his former benefactor and to throw him into prison, where he died.

Bibliography: Ibn Verga, *Shebeṭ Yehudah*, ed. Wiener, pp. 30–33; *Chronica de Alfonso XI.* i. 83 *et seq.*; Lindo, *History of the Jews of Spain and Portugal*, pp. 133 *et seq.*; Grätz, *Gesch. der Juden*, 3d ed., vii. 266 *et seq.*

G. I. Br.

13. Joshua ben Israel Benveniste: Rabbi in Constantinople toward the end of the seventeenth century; brother of Ḥayyim Benveniste (No. 4), and, like the latter, a disciple of Joseph Trani. He was a physician and rabbi at Constantinople in 1660, and was the author of the following works: "Ozne Yehoshua'" (The Ears of Joshua), sermons for the Sabbath and special occasions (Constantinople, 1677); "Sedeh Yehoshua'" (Field of Joshua), a commentary on several tracts of the Talmud Yerushalmi (*ib.* 1662, 1749); "'Abodah Tammah" (Perfect Service), a commentary on the 'Abodah for the Day of Atonement (*ib.* 1719–20); "Seder ha-Geṭ," on the formula for divorce, written at Brusa and published at Constantinople, 1719. Benveniste's collection of responsa, "Sha'ar Yehoshua'" (Gate of Joshua), was destroyed by fire; but several of his responsa are included in the collections of Moses Benveniste and Joseph Trani.

Benveniste prepared (1) "Mishmeret ha-Miẓwot" (Observance of the Commandments), a metrical version of the Azharot, with commentary; and (2) "Lebush Malkut" (Royal Garment), a hymn in the style of Gabirol's "Royal Crown," of which medical science constitutes the foundation. Azulai claims to have seen both of these writings in manuscript at the house of a rabbi in Constantinople.

Bibliography: Conforte, *Ḳore ha-Dorot*, 51a; Azulai, *Shem ha-Gedolim*, i. 70.

14. Judah Benveniste: Son of Abraham Benveniste (No. 2), and grandson of the court rabbi of the same name (No. 1). He immigrated to Salonica with Samuel Franco and the other Spanish exiles, and with them founded the Sephardic community in that city. He succeeded in preserving a share of his great patrimony sufficient for the purchase of a large collection of books. Several experienced scribes were always employed in copying the Mishnah, the Talmud, and other works at his home, which was the center of the scholarly Spanish exiles. Benveniste's library was always at the disposal of scholars; and many, among them Jacob ibn Ḥabib, made good use of it.

Bibliography: Jacob ibn Ḥabib, Introduction to *'En Ya'aḳob*; Coronel, *Quinque Decisiones*, p. vii.; Michael, *Or ha-Ḥayyim*, No. 972.

15. Judah Benveniste: Disciple of Asher ha-Kohen ben Ardot and contemporary of David Conforte; lived at Salonica, where he occupied the position of rabbi.

Bibliography: Michael, *Or ha-Hayyim*, p. 448, No. 973; Conforte, *Ḳore ha-Dorot*, pp. 45*a*, 50*b*.

16. Meïr ben Samuel Benveniste: Lived at Salonica, where in November, 1559, he completed his work, "'Ot Emet" (The Letter of Truth), containing corrections of the text of the Sifra, Sifre, Mekilta, Midrash Rabbah, Yalḳuṭ, etc., as well as of the Sephardic prayer-book (Salonica, 1564; Prague, 1624). In these books Benveniste modestly styles himself "corrector."

Bibliography: Steinschneider, *Cat. Bodl.* No. 6294; Wiener, *Bibliotheca Friedlandiana*, p. 69, No. 546.

17. Moses ben Nissim Benveniste: Grandson of Abraham b. Hananiah, rabbi at Constantinople; was living in 1671. He corresponded with his relatives, Ḥayyim (No. 4) and Joshua Benveniste (No. 13), and with others of his contemporaries. He published "Pene Mosheh" (Face of Moses), a tripartite collection of responsa on the ritualistic codes (Constantinople, 1671; 3d part, *ib.* 1719). His work "Rab Leshonot" (Many Languages) has been lost.

Bibliography: Azulai, *Shem ha-Gedolim*, i. 132; Steinschneider, *Cat. Bodl.* No. 6438.

18. Samuel Benveniste: Dwelt in Tarragona in 1322, and was living in 1356, contemporaneously with Maestro Leon Medico, Maestro Mose Medico, and Maestro Yuçef Avendagot (the last mentioned being identical with Joseph ha-Rofe ibn Abu-Ayyub). Benveniste resided at the court of King Pedro of Aragon, as physician in ordinary to Don Manuel, the king's brother. Hottinger and Benjacob say that he translated into Hebrew Boethius' "De Consolatione Philosophiæ," a work much read by the Christian scholars of the Middle Ages, but nothing is known about the manuscript. He also rendered into Hebrew from Latin the work on asthma by Maimonides.

Bibliography: *Hebr. Bibl.* viii. 85, 125; ix. 91; x. 84; Steinschneider, *Hebr. Uebers.* pp. 466, 767; erroneously in Landau, *Gesch. der Jüd. Aerzte*, p. 39, who follows Carmoly, *Médecins Juifs*, p. 101.

19. Sheshet ben Isaac ben Joseph Benveniste: Physician and writer; lived in the latter half of the twelfth century. Like Isaac (Zag) Benveniste (No. 7), who is supposed to have been his father, he was styled "Nasi" (prince). He received his education at Narbonne, his probable birthplace; afterward he lived at Barcelona, and later at Saragossa, in which city he died about 1209. It is said that he owed his high position to his knowledge of Arabic. He practised medicine, and was the author of a medical work, manuscript copies of which are still extant at Oxford and Munich. Such was his reputation as a physician that patients came long distances to consult him, and some are said to have journeyed even from Mayence (*e.g.*, Solomon ben Hananel). Benveniste, whose generosity is praised by Al-Ḥarizi, was poetically gifted and composed several liturgical songs. Even in his old age he remained a friend of free investigation, as the following epigram on Meïr Abulafia shows:

"You ask why 'lustrous' he is named,
Though he the light so cheaply rated;
Because the dusk we 'twilight' name:
By language-contrasts thoughts are mated."

Benveniste directed a letter to the congregation of Lunel, in answer to the epistle of Abulafia to that congregation, in which he freely expresses himself upon the value of Maimonides' "Yad ha-Ḥazaḳah," because it enabled the laity to control the judgments rendered by the Rabbis. He carried on a lively correspondence with Nasi Kalonymus b. Ṭodros and with Levi b. Moses of Narbonne, where his brother Joseph also resided. He lost his three sons in their prime.

Bibliography: Steinschneider, *Hebr. Bibl.* xiii. 106 *et seq.*; Grätz, *Gesch. der Juden*, vi. 1, note 1; vii. 41; idem, *Schechet Benveniste über Maimuni's Wirksamkeit*, in *Monatsschrift*, xxv. 509 *et seq.* (the letter is reprinted in Grätz, *Hebr. tr.* v. Appendix, p. 11); *Revue Etudes Juives*, xxxix. 62 *et seq.*, 217 *et seq.*

20. Solomon Benveniste (called **the Elder**): A prominent scholar and contemporary of Meïr ben Joseph; lived at Narbonne about the middle of the twelfth century (Zacuto, "Yuḥasin," 85a).

21. Vidal Benveniste: Lived at Saragossa, Spain, in the fifteenth century. He was elected by the notables of the communities of Aragon chief speaker at the disputation of Tortosa (1414), because of his knowledge of Latin and his reputed wisdom. Benveniste wrote a refutation of the seeming evidences of Jesus as the Messiah, called "Ḳodesh ha-Ḳodashim," which is still extant in manuscript. He is not identical with Don Ferrer of Gerona or with Vidal b. Labi de la Caballeria, as claimed by some.

Bibliography: Ibn Verga, *Shebet Yehudah*, ed. Wiener, pp. 68 *et seq.*; Grätz, *Gesch. der Juden*, 3d ed., viii. 414 *et seq.*; Michael, *Or ha-Ḥayyim*, No. 804.

22. Vidal Benveniste: Possibly a brother of the court rabbi Abraham Benveniste (No. 1); lived in Aragon at the beginning of the fifteenth century. He was the author of the poem, "Meliẓat 'Efer we-Dinah," an allegory on pleasure (published, together with a number of Midrashim, at Constantinople, 1516, and at Rimini, 1525) composed as a diversion for the Purim festival (Steinschneider, "Cat. Bodl." col. 2706).

23. Vidal Benveniste: Elder son of Joseph Benveniste (No. 9) and grandson of the court rabbi Abraham Benveniste (No. 1). Like the latter, Vidal was a promoter of Jewish science (Zacuto, "Yuḥasin," p. 226).

G. M. K.

BENVENISTE BEN ḤIYYAH BEN AL-DAYYAN (called also **Al-Yasis** [the Elder] or **Ibn al-Yasis**): Physician and religious poet of the thirteenth century. Zunz mentions three metrical "baḳḳashahs" (supplications) written by him. At Benveniste's request, Jacob ben Eleazar undertook the translation of "Kalilah we-Dimnah" from the Arabic into Hebrew. To the preface of this translation Jacob prefixed a few verses laudatory of Benveniste.

Bibliography: Steinschneider, *Cat. Bodl.* col. 2703; idem, *Hebr. Uebers.* p. 879; Zunz, *Literaturgesch.* p. 545; Landshuth, *'Ammude ha-'Abodah*, p. 51; J. Derenbourg, *Deux Versions Hebraïques du Livre de Kalîlâh et Dimnâh*, p. 313, Paris, 1881.

G. M. K.

BENVENISTE BEN JACOB: One of the officers of the society Biḳḳur Ḥolim of the Spanish synagogue in Venice toward the end of the seventeenth century. He was of Spanish descent, and is mentioned together with Raphael ben Solomon Silva and Isaac ben Baruch Carvalho in the שפר דקדוקה של נפש ("Pulcherrima Inquisitio Animæ"), prayers for the sick and dying used by the members of the above-mentioned society (Venice, Bragadin, 1685). Fürst wrongly attributes the partial authorship of these prayers to Benveniste ("Bibl. Judaica," i. 106; Benjacob, "Oẓar ha-Sefarim," p. 608, No. 1199); but see Steinschneider, "Cat. Bodl." No. 3333.

L. G. G.

BENVENISTE B. LABI (לביא; also known as **De la Caballeria**): A Jewish Mæcenas; son of "Prince" Solomon ibn Labi de la Caballeria; lived at Saragossa, later at Alcañiz, where he died Nov. 30, 1411. He was wealthy, learned, and greatly respected, and often took the part of his coreligionists. He corresponded with the most eminent men of his time; among others with Meïr Alguadez, who, at Benveniste's request, translated Aristotle's "Ethics" into Hebrew; with Ḥasdai Crescas; with Isaac b. Sheshet; with Joseph Orabuena, chief rabbi of Navarre; and with the physician Astruch Remoch Dios, or, as he called himself when he became a Christian, Francisco Dios Carne.

Benveniste was a patron of science and of scholars. For him Zeraḥyah ha-Levi (Don Ferrer Saladin) translated Gazzali's "Tahafat al-Filasafah" into Hebrew; and at his request Joshua b. Joseph ibn Vivas Lorki wrote the work (probably now lost) on the virtues and function of foodstuffs, which was afterward translated into Hebrew by his son Joseph Lorki. Benveniste died at Alcañiz and was buried with great honors. In memoriam services were held at Saragossa, Calatayud, Daroca, Soria, and other places.

Bibliography: *Jeschurun*, ed. Kobak, ix. 6 *et seq.*; see Steinschneider, *Hebr. Uebers.* pp. 211, 378, 762; Grätz, *Gesch. der Juden*, 3d ed. viii. 410 *et seq.*

G. M. K.

BENVENISTE DE PORTA or **DE LA PORTA:** Bailie ("bayle") of Barcelona, Spain, and brother of Naḥmanides (whose secular name was Bon Astruc de Porta; see Grätz, "Gesch. der Juden," vii. 38; "Jewish Quarterly Review," viii. 492, 710). Benveniste was an important capitalist of Barcelona and advanced money to King Jaime I. of Aragon, mainly on the security of the municipal dues owed to the king. Thus on Dec. 17, 1257, he advanced 3,863 sueldos on the dues of his bailiwick (Jacobs, "Sources," No. 134); and on the 15th of the following month he received the right to sell the dues of Barcelona and Gerona for two years (*ib.* No. 142). The total indebtedness of the king was no less than 199,483 sueldos (*ib.* No. 144), which Benveniste was allowed to recover by taking the dues of Lerida and other places of his bailiwick (*ib.* 162). Part of the payment was made by the Jews of Barcelona themselves, who were ordered to hand over 12,000 sueldos to Benveniste (*ib.* No. 168a).

Meanwhile the king continued his applications to Benveniste for funds, drawing a check on him for 5,000 sueldos June 12, 1260 (*ib.* No. 170a); while two years later the king acknowledged his indebtedness to Benveniste of 15,221 sueldos for payment made on account of the Infanta Donna Juana, May 21, 1262. In return for the advance, the dues of Villafranca (*ib.* No. 205), as well as 20 squares of land there (*ib.* No. 232), and the dues of the Balearic islands (*ib.* No. 257) and of Perpignan (*ib.* No. 239), were granted to Benveniste. The latter continued to act as banker for the king, since a record is found of acknowledgment of a debt of 15,000 sueldos, paid by Benveniste to the bishop of Barcelona when proceeding on an embassy to France Jan. 1, 1254 (*ib.* No. 355); and as late as Feb. 1, 1268, the dues of the Jews of Gerona were assigned to Benveniste (*ib.* No. 681).

Altogether Benveniste stood high in favor with King Jaime—no doubt for value received—and when on May 29, 1264, his brother Naḥmanides was pardoned, two-thirds of the fine he had incurred for the alleged crime of vituperating Jesus in the celebrated controversy of 1263 was remitted, the king expressly stating that the pardon was given "amore Benveniste de Porta, fratris tui" ("Sources," Appendix, No. 4, p. 130).

Bibliography: Jacobs, *Inquiry into the Sources of Spanish-Jewish History*, as above.

G. J.

BENZION, BENEDIX: Russian physician and missionary to the Jews; born in a small town in the government of Kiev, Russia, in 1839. He spent several years in Rumania, and was baptized in Berlin in 1863. Benzion studied medicine and was graduated by the University of Würzburg in 1867. He went to England, and having entered the service of the British Society for the Conversion of the Jews, was sent out to Rumania in 1874 as a medical missionary to the Jews. Transferred to Odessa, Russia, in 1876, he remained there for ten years, acquiring a considerable reputation as a medical practitioner and as a missionary. He left Odessa for Constantinople in 1886, but was not known as a missionary after 1888. He now lives in the United States.

Benzion is the author of "Oraḥ Ẓedakah," a collection of proverbs and parables in the style of Ecclesiasticus (Odessa, 1876); "Kol Kore el Bet Israel" (translated from the English by Dr. Benzion, London, 1868); a translation into Judæo-German of Jos. H. Ingraham's "Prince of the House of David," under the title "Tiferet Yisra'el" (Odessa, 1883-86); and a translation into Judæo-German of Silvio Pellico's drama, "Ester d'Engedi," under the title "Der Falsche Kohengodel," which has been played at the Jewish theaters of New York.

H. R. P. Wi.

BENZION, BENJAMIN ZE'EB WOLF BEN JACOB HA-LEVI: Talmudist; lived probably in Galicia in the middle of the eighteenth century. He was the author of "'Et Raẓon" (Time of Grace), containing essays on morals, intended for the first part of the Minḥah prayer of Sabbath (Zolkiev, 1777). In the introduction to this work, Benzion mentions two other works written by him; but these have not been published.

BEOR: 1. Father of Bela, king of Edom (Gen. xxxvi. 32; I Chron. i. 43). 2. Father of Balaam (Num. xxii. 5; xxiv. 3, 15; xxxi. 8; Deut. xxiii. 4; Josh. xiii. 22; Micah vi. 5). II Peter ii. 15 gives the name as "Bosor."

G. G. B. L.

Definition.

BEQUEST: A gift of personal property in a last will and testament. Modern English law and American law distinguish between a bequest and a devise; the former being a testamentary gift of personal property, and the latter one of real estate. This distinction, however, is based upon the feudal law, and does not exist in Jewish law. Real estate and personal estate may be the subjects of a bequest in Jewish law; and although there is some distinction recognized between these two classes of property by reason of the fact that one is movable and the other immovable, both of them may be bequeathed in the same manner. Subject to certain well-defined exceptions, modern law requires the bequest to be in writing. Jewish law has no such requirement; and an oral bequest may be entirely valid.

The maxim of the law is, "The words of a sick man are like those written and delivered" (Giṭ. 13a; B. B. 151a); that is to say, the oral bequest of a sick man is in effect equivalent to a gift of immovable property by a deed in writing, or of movable property by delivery of the object. The absence of the usual formalities required in the transfer of real and personal property does not invalidate a bequest. The Jewish law calls a bequest "the gift of one lying on a sick-bed" ("mattanat shekib mera'"), and distinguishes it in several points from the gift of a person in good health (B. B. 153a; Maimonides, "Yad," Zekiyah u-Mattanah, viii. 2; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 250, 5, 8).

Inasmuch as the validity of a bequest may depend upon the condition of the testator's health at the time when he made it, the law attempts to define the degrees of sickness. A blind, lame, or mutilated person, or one who is suffering pain in the head, eyes, hands, or feet, is for testamentary purposes the same as a person in good health; but if his entire body is weakened through sickness so that he can no longer walk about, and is obliged to take to his bed, he is technically a "sick man" (Maimonides, *ib.* viii. 1, 2).

The law considers a further distinction: namely, between one on his sick-bed and one on his death-bed; and this distinction also has certain important legal consequences. Some authorities are of the opinion that a person on his sick-bed is a "sick man" during the first three days of his illness; and that if the illness be prolonged beyond that period, or if he be suddenly stricken with a dangerous illness, he is to be considered as a man on his death-bed, and his bequest under such circumstances will be subject to certain special regulations (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 250, 5). The law of bequests is in fact a subdivision of the law of gifts, a bequest being to all intents and purposes a gift, distinguished, however, from an ordinary gift in that the strictness of the procedure is relaxed in favor of carrying out the intention of the testator.

Bequest by Way of Gift, etc.

A distinction must be noted between a testament wherein the property is bequeathed by way of inheritance and one wherein the property is bequeathed by way of gift. By the former, only those persons may be made legatees who would naturally take the property as heirs of the deceased; under the latter, however, any person may be made a legatee.

The law of testamentary succession, as laid down in the Bible (Num. xxvii. 8–11; see Agnates), is unalterable: and any attempt made by the owner of property to bequeath it as an inheritance to those who would not naturally inherit it is null and void. No one can be made an heir except such persons as are mentioned in this Biblical law; nor can the property be lawfully diverted from the heirs by the substitution, either orally or in writing, of some other person as heir (Mishnah B. B. viii. 5); but the owner of property has such control over it that he may dispose of it by sale or gift to any person, to the exclusion of his heirs. This important distinction, therefore, must be noted, that a bequest by way of inheritance to persons other than the legal heirs is null and void, whereas a bequest by way of gift is valid.

Although the testator can not make a stranger his heir, he may divide the inheritance among the heirs in shares different from those prescribed by the law. This right is deduced by inference from the text, "And on the day when he shall cause his sons to inherit" (Deut. xxi. 16), implying the right on his part to divide the estate among them as he pleases. The heirs may not be excluded by the use of negative phrases; for instance, if the testator says, "My first-born son shall not have a double share of my estate," or "My son shall not inherit with his brothers," such expression is null and void; but if he says, "My son A shall have half of my property and my other sons the other half," this is valid (B. B. 130a *et seq.*; Ḥoshen Mishpaṭ, 281, 1, 2).

This rule applies only to bequests by way of inheritance. A person in a state of health can not affect the succession unless he does so by a gift with all proper formalities (Ḥoshen Mishpaṭ, *l.c.* 5, 7).

If one bequeaths his property to a stranger under the belief that his son is dead, the bequest is invalid if the son afterward returns, because it is presumed that the bequest would not have been made to a stranger if the father had known that his son was living; but if the bequest is only of a portion of the property, it is valid, upon the presumption that it was intended to be a gift (B. B. 146b; Ḥoshen Mishpaṭ, 246, 1).

If a person bequeaths his entire property to one of his children, such one takes it as trustee for the benefit of all, and is entitled merely to an equal share with them; but if the father has bequeathed to him a portion only of the property, or if the instrument on its face shows that it was intended to be an absolute gift, he holds it free from all trust, as his sole and exclusive property (B. B. 131b, 150b; "Yad," Zekiyah u-Mattanah, vi. 2; Ḥoshen Mishpaṭ, 246, 4).

The subject of bequests by way of inheritance is treated more fully under Inheritance and Wills. The present article is concerned more especially with bequests by way of gift.

As above stated, by a bequest in the form of a gift the testator may practically disinherit his lawful heirs; hence, if a sick man in making a disposition of his property says distinctly, "I give this not as an inheritance, but as a gift," it is a valid bequest, even though it excludes the lawful heirs (Ḥoshen Mishpaṭ, 248, 2).

Disinheriting the Heir.

Although the right of the owner of property to bequeath it to the exclusion of his heirs is recognized by the law, it is contrary to its spirit and is deemed a moral wrong. The Mishnah (B. B. viii. 5) says: "If one deeds his goods to strangers and excludes his sons, his act is lawful, but the spirit of the sages takes no delight in him." R. Simon ben Gamaliel said: "If, however, his sons were unworthy, his act is praiseworthy." Mar Samuel went so far as to say that the father can not disinherit a wicked son in favor of a good one (B. B. 133b). This, however, is not the law. The Shulḥan 'Aruk, after citing the general opinion of the Mishnah, says (*ib.* 282, 1): "It is the practise of the very pious not to witness a will by which the inheritance is taken from the heirs, even though it is taken from an unworthy son and given to another son who is a learned and upright man"; and R. Moses Isserles (*ib.* gloss) adds: "If one leaves general directions that his executors shall dispose of his property according to the best that can be done with it, they ought to give it to his heirs; for there is nothing better than this."

A bequest becomes valid only upon the death of the testator (B. B. 137a; "Yad," Zekiyah u-Mattanah, viii. 8; Ḥoshen Mishpaṭ, 252, 1); hence, if the bequest is coupled with conditions which are impossible of fulfilment after the death of the testator, it is invalid. Thus, if the testator's bequest is in writing, and the instrument contains the usual formula that symbolic seizure ("ḳinyan") has been made, but in fact this formality has not been complied with, such bequest is invalid; because it is impossible that the legatee should perform the ceremony of symbolic seizure with the testator after the latter's death (B. B. 152a; Ḥoshen Mishpaṭ, 250, 17).

Death-Bed Bequests.

A distinction, alluded to above, in cases of bequests requires further amplification. The bequest may be either one in which the testator makes no mention of his death, or one in which he does expressly mention his death (B. B. 151b; "Yad," Zekiyah u-Mattanah, viii. 17-23; Ḥoshen Mishpaṭ, *l.c.* 7). In the latter case, the bequest, whether made orally or in writing, requires none of the formalities of a gift among living persons: all that is necessary is the simple declaration of the dying man, which is carried into effect through the maxim, "The words of a sick man are like those written and delivered" (B. B. 147b; Ḥoshen Mishpaṭ, *l.c.* 1; "Yad," *l.c.*).

Where the testator makes no mention of his death, a further distinction is to be noted; namely, whether he has bequeathed his entire property or only a portion of it. If he has bequeathed his entire property without retaining anything for himself, the presumption arises that he has given it on account of his anticipated death, and therefore it is a death-bed bequest; otherwise, it is presumed that the testator would not have given away his entire property. If, on the other hand, he has not bequeathed all of his property, but has retained a portion of it, a contrary presumption arises; namely, that he does not expect to die of this sickness. Such a bequest, therefore, is treated like a gift among living persons, and requires symbolic seizure in order to give it validity (B. B. 151b; "Yad," Zekiyah u-Mattanah, xv. 16; Ḥoshen Mishpaṭ, 250, 4-7).

If a sick man uses such expressions as "A shall have the whole of my property," or "a part thereof," or "shall acquire it," or "shall enjoy it," or "shall take possession of it," each of these expressions indicates a bequest by way of gift. If, in making the bequest to an heir, he says, "A shall be inscribed in my genealogical register," or "shall inherit from me according to law," it is valid as a bequest by way of inheritance according to the conditions above stated; but if he says, "Let A enjoy my property" or "Let him stand in it" or "rest in it," A acquires no property rights in it. If he says, "I leave my property to A," this is a gift: if he says, "My property shall fall to A," this is an inheritance (B. B. 148b *et seq.*; "Yad," Zekiyah u-Mattanah, ix. 3, 4; Ḥoshen Mishpaṭ, 253, 2).

A bequest of "my movable property" includes everything with the exception of wheat, barley, and other grain. A bequest of "all my movable property" includes all things except those which are fastened to the ground and not intended to be moved, such as the lower millstone. Technically these are fixtures, and go with the real estate. A bequest of "all my property that may be moved" is held to include even such fixtures (B. B. 150a; "Yad," Zekiyah u-Mattanah, xi. 12-14; Ḥoshen Mishpaṭ, 248, 10). A bequest of "my goods" includes all decedent's movable and immovable goods ("Yad," *l.c.* xi. 15; Ḥoshen Mishpaṭ, 248, 11). A bequest of "a piece of ground, and as incidental thereto, all my movable property, gold, silver, vessels, clothing"—in short, everything that may be denominated either money or goods—does not carry with it any other real estate, or slaves, or scrolls of the Law, because these are not acquired as an incident to other things. The use of the phrase "incidental to" ("aggab") is extremely technical. All sorts of personal property may be acquired without any special ceremony of symbolic seizure as incidental to land; but land can not be acquired as incidental to personal property (Ḥoshen Mishpaṭ, 248, 12; see Alienation).

Where a bequest is made to A for life, and after his death to B, the latter is entitled to take only what is in existence at the time of A's death (B. B. 137a); but if A is a lawful heir of the testator, B receives nothing, because a gift made to an heir is presumed to be given as an inheritance, and an inheritance can not be diverted from the lawful heir

Bequest for Life, and "on Condition."

and his descendants (B. B. 129b; Ḥoshen Mishpaṭ, 248, 1). If the bequest is to A, and after him to B, and after B to C, they succeed one another; but if B dies during the lifetime of A, the heirs of A inherit. If B, however, is living at the time of the death of A, he takes the property because A is entitled to its use for life only. If A has sold the property, he is guilty of a moral, but not of a legal, wrong; because, although he is only entitled to its use for life, B's right in the remainder is not a vested right, but is contingent upon the existence of the property at the time of A's death (Ḥoshen Mishpaṭ, 248, 3). If, however, the gift is specifically to A for a definite period, and after that to B, a purchaser from A takes no title to it, and at the expiration of the fixed period, B may recover the property from such purchaser (*ib.* gloss).

If a bequest is made "on condition," the condition must be fulfilled before the legatee is entitled to the bequest. If the testator says, "A shall marry my daughter, and he shall be given two hundred dollars," the condition is a condition precedent, and A can not receive the two hundred dollars before he marries the daughter (Ḥoshen Mishpaṭ, 253, 12).

Specific and Demonstrative Bequests.

A specific bequest may be given to an heir in addition to that which he would otherwise inherit; if the sick man says, "Give my son A two hundred dollars that belongs to him," he is entitled to this sum as a specific bequest in addition to any other rights he may have in his father's estate ("Yad," Zekiyah u-Mattanah, xi. 16; Ḥoshen Mishpaṭ, 253, 8), and he may reclaim it if it has been disposed of by the heirs (Ḥoshen Mishpaṭ, 252, 2, gloss); but if the legacy was not specific and the heirs were merely charged with a moral obligation to carry out the will of the testator, their disposition of the property is valid (*ib.*). If the testator has given three legacies, and the estate is not sufficient to pay them all, they abate *pro rata* (B. B. 138a; "Yad," Zekiyah u-Mattanah, x. 13), unless he has indicated the order in which they shall abate (Ḥoshen Mishpaṭ, 253, 9).

If one bequeaths a specific sum of money, to be paid to the legatee out of a certain claim which is to be collected from a debtor to the estate, the bequest need not be paid until the debt is collected: this is a demonstrative legacy payable out of a certain fund (*ib.* 11). A specific bequest of two hundred dollars to the poor, or a scroll of the Law to the synagogue, is presumed to be intended for the poor of the community to which the testator belonged or for the synagogue which he was in the habit of attending (*ib.* 23). A specific bequest of a "share" of the testator's goods is generally taken to mean one-sixteenth, or, according to some authorities, one-fourth (*ib.* 24).

If one during his sickness has bequeathed his entire property to sacred or charitable uses, or has abandoned it all (see Hefḳer) and retained nothing for himself, and he afterward recovers, his acts are all voidable; but if he has retained anything for himself, his bequest is equivalent to, and subject to the laws of, an ordinary gift and can not be revoked ("Yad," Zekiyah u-Mattanah, ix. 19; Ḥoshen Mishpaṭ, 250, 3, 4).

A bequest of a claim against another person, or of an instrument of indebtedness held against another person, is valid even though none of the formalities required in cases of assignment of claims has been performed; provided, however, that the bequest was made in contemplation of death, or the testator parted with all his estate (B. B. 147b; "Yad," Zekiyah u-Mattanah, x. 2; Ḥoshen Mishpaṭ, 253, 20; see Assignment).

A bequest is revocable either by express words or by implication. Where the testator, after having bequeathed certain property to A, bequeaths the same property to B, the former bequest to A is impliedly revoked. If, however, the article bequeathed has been delivered, or symbolic seizure has been taken by the legatee, the bequest is irrevocable (B. B. 151a; Ḥoshen Mishpaṭ, 250, 13).

Revocation.

A bequest made by a testator under the belief that he was about to die is revocable, no matter how formally made (Ḥoshen Mishpaṭ, 250, 14; "Yad," Zekiyah u-Mattanah, viii. 23). But in some cases it has legal effect even though it is revocable: thus, if the testator bequeathed his entire property to his slave, he may, upon recovery, revoke the bequest; but the slave remains a free man, because through the gift he has become free, and freedom once acquired can not be lost (Giṭ. 9a; "Yad," Zekiyah u-Mattanah, viii. 22; Ḥoshen Mishpaṭ, 250, 15; see commentary, "Beer ha-Golah," *ad loc.*). In case, however, the slave takes the bequest under the following form, "I bequeath my property to you from this day, in case I die," and the testator afterward recovers, the slave has not acquired his freedom; because the bequest was made specifically on condition of death, and, the condition not having been fulfilled, no property rights pass to the slave ("Beer ha-Golah," *l.c.*).

If a man is about to go on a sea voyage, or into the desert with a caravan, or is being led to a place of execution, or is suddenly stricken with a sickness that steadily grows worse, his bequests made under such circumstances are subject to the rules of deathbed bequests. If he dies, his bequest is valid; but if his life is preserved, it is revocable by him even though there has been "ḳinyan," and even though he has not parted with all of his property ("Yad," Zekiyah u-Mattanah, viii. 24).

J. Sr. D. W. A.

BERA: King of Sodom; one of the five kings constituting the confederacy under Amraphel (Gen. xiv. 2). Ber. Rabbah 42 playfully interprets the name as though contracted from "ben ra'" (evil son).

G. G. B. L.

BERAB, JACOB [B. MOSES?]: Talmudist and rabbi; born at Moqueda near Toledo, Spain, in 1474; died at Safed April 3, 1546. He was a pupil of Isaac Aboab. When he fled from Spain to Tlem-

Chosen Rabbi at Eighteen.

çen, then the chief town of the Barbary states, the Jewish community there, consisting of 5,000 families, chose him for their rabbi, though he was but a youth of eighteen (Levi ibn Ḥabib, "Responsa," p. 298b). Evidence of the great respect there paid him is afforded by the following lines of Abraham Gavison ("'Omer ha-Shikḥah"):

> "Say not that the lamp of the Law no longer in Israel burneth!
> Jacob Berab hath come back—once more among us he sojourneth!"

It is not known how long Berab remained in Algeria; but before 1522 he was in Jerusalem. There, however, the social conditions were so oppressive that he did not stay long, but went with his pupils to Egypt (Palestine letter, dated 1522, in Luncz, "Jerusalem," iii. 98). Some years later (1527) Berab, now fairly well-to-do, resided in Damascus (Levi ibn Ḥabib, "Responsa," p. 117a); in 1533 he became rabbi at Cairo (*ib.* 33a); and several years after he seems to have finally settled in Safed, which then contained the largest Jewish community in Palestine. It was there that Berab conceived the bold idea which made him famous, that of establishing a central spiritual Jewish power.

Plan for Ordination.

Berab's undertaking, to be judged correctly, must be considered in connection with the whole current of thought of the younger generation of Spanish exiles. The overwhelming catastrophe of 1492, which, in view of the wretched condition of the Jews in Germany and Italy, had threatened the very extinction of Judaism, produced phenomena which, while apparently opposite in character, were but natural consequences. Imaginative and sentimental persons thought that the promised Messianic time was approaching; they regarded their great sufferings as the process of purgation, as the חבלי משיח, the eschatologic "birth-throes," of the Messianic era. The main representative of this mystical tendency was Solomon Molcho, whose tragic fate by no means extinguished these fond hopes and the desire for martyrdom. But the delusion had quite a different effect upon more practical natures. According to yet another view, the chief advocate of which was Maimonides, the Messiah would not appear suddenly: the Jews would have to prepare for him; and the chief preparatory step needed was the establishment of a universally recognized Jewish tribunal as their spiritual center.

Although the hopes of a Messiah, cherished especially in Palestine, were fundamentally wild and extravagant, they afforded the right person an excellent opportunity to create for the Jews a recognized central authority, spiritual—and perhaps, in time, political—in character. There is no doubt that the man for the purpose was Berab; he was the most important and honored Talmudist in the Orient, and was endowed with perseverance amounting to obstinacy. His plan was the reintroduction of the old "Semikah" (ordination); and Safed he held to be the best field for his activity. The lack of unity in deciding and interpreting the Law must cease. No longer should each rabbi or each student of the Law be allowed to decide upon the gravest matters of religion according to his own judgment. There should be only one court of appeal, to form the highest authority on subjects relating to the comprehension and interpretation of the Torah.

Though this idea seemed new, it was not without precedent. The Sanhedrin in tannaitic times was, in a certain sense, Berab's model. But the Sanhedrin consisted of such men as could trace their ordination back to Moses; yet for a thousand years no such men had existed. Berab, however, was equal to the difficulty. Maimonides, he was aware, had taught that if the sages in Palestine would agree to ordain one of themselves, they could do so, and that the man of their choice could then ordain others. Although Maimonides' opinion had been strongly opposed by Naḥmanides and others, and Maimonides himself had not been quite positive in the matter, Berab had so much self-reliance that he was not to be deterred from his great undertaking by petty considerations. Moreover, the scholars at Safed had confidence in him, and had no doubt that, from a rabbinical standpoint, no objection to his plan could be raised. Thus in 1538 twenty-five rabbis met in assembly at Safed and ordained Berab, giving him the right to ordain any number of others, who would then form a Sanhedrin. In a discourse in the synagogue at Safed, Berab defended the legality of his ordination from a Talmudic standpoint, and showed the nature of the rights conferred upon him. On hearing of this event most of the other Palestinian scholars expressed their agreement, and the few who discountenanced the innovation had not the courage to oppose Berab and his following.

Dispute with Ibn Ḥabib.

To obtain the good-will of the Jews of the Holy City, the first use that Berab made of his new dignity was to ordain the chief rabbi at Jerusalem, Levi b. Jacob ibn Ḥabib. Since the latter had for many years been a personal opponent of Berab, and the two had had many disputes in regard to rabbinical decisions and approbations, Berab's ordination of Ibn Ḥabib shows that he placed general above personal interests. Moreover, the terms in which Berab officially announced Ibn Ḥabib's ordination were kindly ones. Berab, therefore, expected no opposition from that quarter; but he was mistaken. Ibn Ḥabib's personal animus was not appeased, but rather stimulated, by his ordination. He considered it an insult to his dignity and to the dignity of Jerusalem that so important a change should be effected without consultation of the Jerusalem scholars. He did not content himself with an oral protest, but sent a communication to the scholars of Safed, in which he set forth the illegality of their proceeding and declared that the innovation involved a risk to rabbinical Judaism, since the Sanhedrin might use its sovereign authority to tamper with the calendar.

Although Ibn Ḥabib's tone was moderate, every one could read between the lines that he opposed the man Berab as well as his work. An illustration of this is afforded by the remarks made by Ibn Ḥabib when he maintained at length that the scholars of Safed were not qualified to ordain, since they were not unprejudiced in the matter, and when he hinted that Berab was not worthy to transmit ordination. Berab was surprised by the peril in which his undertaking was now placed; and, embittered by Ibn Ḥabib's personal attacks, he could not adhere to a merely objective refutation, but indulged in personalities. In answer to Ibn Ḥabib's observation, that a sacred ordination must not proceed from learning alone, but from holiness also, Berab replied: "I never changed my name: in the midst of want and despair I went in God's way" (Ibn Ḥabib, "Responsa," p. 298b); thereby alluding to the fact that, when a youth, Ibn Ḥabib had lived for a year in Portugal as a Christian under an assumed name.

The strife between Berab and Ibn Ḥabib now became wholly personal, and this had a bad effect on the plan; for Berab had many admirers but few friends. Moreover, Berab's life was endangered. The ordination had been represented to the Turkish authorities as the first step toward the restoration of the Jewish state, and, since Berab was rich, the Turkish officials would have showed him scant mercy in order to lay hands on his wealth. Berab was forced to go to Egypt for a while, but though each moment's delay might have cost him his life, he tarried long enough to ordain four rabbis, so that during his absence they might continue to exercise the function of ordination. In the mean time Ibn Ḥabib's following increased; and when Berab returned, he found his plan to be hopeless. His death some years later put an end to the dispute which had gradually arrayed most of the Palestinian scholars in hostile lines on the question of ordination.

It is known positively that Joseph b. Ephraim Caro and Moses of Trani were two of the four men ordained by Berab. If the other two were Abraham Shalom and Israel de Curial, then Caro was the only one who used his privilege to ordain another, Moses Alsheik, who, in turn, ordained Ḥayyim Vital Calabrese. Thus ordination might be traced for four generations.

With the exception of some short contributions to the works of others, the only one of Berab's numerous works ever published was his "Sheëlot u-Teshubot" (Questions and Answers), responsa, Venice, 1663; but the Amsterdam edition of the rabbinical Bible (1724–28) contains notes by Berab on Isaiah and Jeremiah.

L. G.

BERACHAH ("blessing"; A. V., **Beracah**): **1.** A Benjamite who came to David and joined his forces at Ziklag (I Chron. xii. 3). **2.** A valley where Jehoshaphat and his men assembled after having despoiled the Ammonites and Moabites (II Chron. xx. 26). It is identical with the modern Berekut, west of Tekoa (Buhl, "Geographie des Alten Palästina," p. 97).

G. G. B. L.

BERACHAH, "THE HERO": A Polish Jewish soldier who was killed in the battle near Moscow, in the Polish war against Russia in 1610. He was the son of Aaron ha-Ḳadosh ("The Martyr") of Tishovitz (probably Tyshovtzy, government of Lublin), and served in the cavalry, "on three horses." In the responsa of Rabbi Meïr of Lublin, and of Joel Särkes (ב"ח), details are given concerning his bravery and daring, which gained for him the admiration of the Cossacks, who surnamed him "The Hero." A reckless rider, he made many attempts to break the enemy's line, but was struck and killed by a bullet. The Cossacks much lamented his death, afterward burning his body; when on the following day the Poles, aided by the Cossacks, won the battle against the Muscovites, they recaptured his horse and helmet and quarreled among themselves for the possession of his effects.

These facts came to light through the testimony of Moses ben Joseph, who, in the name of eleven Jews who accompanied the army (probably as sutlers), testified in the case of Berachah's widow ("'agunah") before the rabbis.

BERAḤ DODI (ברח דודי): Three piyyuṭim forming the Geulah in the morning service of the first two days of Passover, and of Saturday between the first and the last days of this feast (שבת חול המועד). Each of these piyyuṭim begins with the initial phrase of Cant. viii. 14, having regard to the association of the Song of Solomon with the Festival (see Megillot). Poems in this form were written in various epochs by Benjamin ben Samuel of Coutance, France, eleventh century; Shabbethai ben Moses of Rome, 1050; Moses ha-Sofer ben Benjamin of Rome, thirteenth century; Menaḥem ben Abraham of Imola, fourteenth century; and Joab ben Nathan ben Daniel of Rome, fourteenth century.

The melody to which the verses are recited in some German congregations is that of "'Al ha-Rishonim"; but in the more extended "Polish" use, the melody sung is one of the most effective of all the rhapsodies emanating from the wandering precentors of two centuries past. Although clearly of such comparatively late origin and undoubtedly coming from a Jew of northern Europe, it presents that combination of the European minor mode with the second Byzantine ecclesiastical mode (often called the "Oriental chromatic") frequently to be noticed in the finer folk-songs of the Levant, particularly in those which bear the impress of an artistic influence (see Bourgault-Ducoudray, "Trente Mélodies Populaires de Grèce et d'Orient," p. 84, note). The figuration, too, is the same as that in many Levantine, and also Arabic and Persian, songs (see music on p. 48).

The Mishnah, without any introductory remarks, without any previous statement that the Law demands the reading of the Shema' in the evening, begins with the question, "From what time is it allowed to read the evening Shema'?" By adopting this

The Mishnah.

method the author or compiler of the Mishnah, Judah ha-Nasi, clearly reflects the general opinion of the Talmudic teachers that the Torah with its traditional interpretation is the undisputed basis of the oral law. Another important principle is implied in this question; namely, that the religious day is reckoned by the Law from evening to evening, and that the reading of the Shema' of the evening is therefore the first religious duty of the day. The Mishnah Berakot treats of the three elements of the ritual: (*a*) Shema' (שמע), (*b*) prayer (תפלה), and (*c*) blessings (ברכות). Of the nine chapters of the treatise the first three are devoted to the Shema', the next two to prayer, and the last four to blessings, as follows:

Chapter i.: Determines the time and the manner of the reading of Shema' ("Keriat Shema'") in the evening and in the morning, and the number of blessings which precede and follow the reading.

Chapter ii.: On "kawwanah" (intention and attention); intention to fulfil a divine command ("miẓwah"), and attention to the words read.

Chapter iii.: On verses of total or partial exemption from this duty.

Chapter iv.: On the prayer ("Tefillah," "'Amidah," or "Shemoneh 'Esreh") of the daily and the additional services ("musaf").

Chapter v.: On the necessity of preparing for prayer and guarding against error, especially with regard to additions to or deviations from the ordinary form of the prayer.

Chapter vi.: Blessings before and after partaking of any kind of food.

Chapter vii.: Form of grace for a company consisting of three members or more.

Chapter viii.: On various differences between the schools of Shammai and Hillel with regard to certain regulations at meals.

Chapter ix.: Blessings relating to events which cause awe, joy, or grief.

Interpolations Are Original.

In a few places, such as *ib.* ii. 6, 7, and ix. 5, these subjects have been interrupted by apparently foreign matter. In reality, however, there is always a certain relation between these interpolations and the principal theme of the chapter. The interpolations are original, like the rest of the Mishnah, and do not necessarily belong to a later period. Z. Frankel, however, is of the opinion that ii. 5-8 was added by later authorities; but his argument is not conclusive (see preface to Talmud Yerushalmi, ed. Z. Frankel, Vienna, 1874, and his "Darke ha-Mishnah," p. 264). The treatise fitly concludes with the following two regulations: (1) the name of God to be employed in ordinary greetings, in order to emphasize the belief in the existence of God, the Creator and Ruler of the universe; (2) in the responses the phrase "from world to world" to be substituted for the phrase "from [the beginning] of the world," in order to emphasize the belief in the existence of another world or life beyond the present one. The present division of the treatises into chapters and the order of the chapters seem to be the same as fixed by Judah ha-Nasi, since with few exceptions the Palestinian and the Babylonian recensions of the Talmud have the same division and order. Hence the rule, "there is a fixed order of the Mishnah" (יש סדר למשנה), is a principle adopted in the Talmud. As regards the treatise Berakot, Rashi seems to have had in his copy of the Talmud the order of ch. iii. and iv. inverted (see Tos. to Bab. Talm. 17b, beginning מי שמתו). The subdivision of the chapters into paragraphs or Mishnahs does not seem to have ever been fixed (Z. Frankel, "Darke ha-Mishnah," p. 265).

The Mishnah contains but a few semi-haggadic elements (i. 5, ii. 2, v. 5, and ix. 5); and noteworthy are the midrashic remarks on Deut. vi. 5; Ps. cxix. 126; and Prov. xxiii. 22.

The Tosefta.

The Tosefta Berakot has the same order as the Mishnah. Following the division of chapters in the edition of Zuckermandel, ch. i. corresponds to ch. i. of the Mishnah; ch. ii. to ch. ii.-iii.; ch. iii. to ch. iv.-v.; ch. iv. to ch. vi.-vii.; ch. vi. to ch. viii.; ch. vii. to ch. ix. There remains only ch. v., which does not correspond to any chapter in the Mishnah; it contains regulations with regard to the "kiddush" (sanctification) on Friday evening, in case the meal commences in the afternoon, and rules for the guidance of guests at a banquet. The Tosefta includes more haggadic elements than the Mishnah (compare end of ch. i.; ch. iv. 14-16). The Palestinian Gemara seems to expound the Tosefta as well as the Mishnah, as is illustrated by the following instance: "In Mishnah i. 4, 'in the morning two blessings are recited before the Shema', a long one and a short one . . .' Where they [the sages] ordained a long one, it must not be shortened; and, vice versa, a short one must not be replaced by a long one. Where a blessing with a concluding formula has been ordained, that formula must not be omitted; and where it has not been ordained it must not be added." This Mishnah is duly expounded in both the Babylonian and the Palestinian Gemaras. The Tosefta (i. 5) adds: "Where they ordained to bow down, this must not be neglected; and the bowing down must not take place where they have not ordained it." This paragraph is not noticed in the Babylonian Gemara, but is fully discussed in the Palestinian (Yer. i. 3c *et seq.*). (See ADORATION.) Another instance is the paragraph on the blessings before the performance of a divine command (mizwah) in ch. vii. of the Tosefta and the corresponding section on the same subject in ch. ix. of the Palestinian Gemara (Yer. ix. 14a).

The Gemara.

The Gemara supplements and fully discusses the laws (Halakot) mentioned in the Mishnah, and employs to a much wider extent the method of introducing extraneous matter whenever the subject under discussion gives occasion for such interruptions by a text quoted, a name mentioned, or a lesson taught. This characteristic of the Gemara is more apparent in the Babylonian than in the Palestinian recension.

Of the haggadic topics thus interpolated in the Babylonian Gemara the following may be mentioned:

(1) On the divine sympathy with Israel (p. 3a).

(2) On sufferings, which are divided into those sent as punishment, and undeserved sufferings sent as trials, termed "sufferings of love" ("yesurin shel ahabah") (5a).

(3) On invisible evil agents ("mazzikin") (6a).

(4) On the method of divine retribution (7a).

(5) On the relation between God and Israel, based on mutual love. Israel expresses this feeling by communing with God in prayer and by wearing the TEFILLIN containing the declaration of God's unity and sovereignty. Accordingly the idea of God's love toward Israel is figuratively described in the dictum, "God prays—desires to show mercy—and lays tefillin, containing declarations of Israel's distinction" (6a, 7a).

(6) On the status of the dead, and their intercourse with the living (18b).

(7) The temporary deposition of the nasi Rabban Gamaliel in Jamnia (p. 27).

(8) Midrashic account of the prayer of Hannah, and the intercession of Moses for Israel (31a, b).

(9) King Alexander Jannæus and Simon ben Sheṭaḥ (48a).

(10) Midrashic account of Og, king of Bashan (54b).

(11) A legendary illustration of the dictum, "All dreams follow the interpretation given to them" (55a, b).

(12) Death of R. Akiba (61b).

(13) On hospitality (63b).

Books Cited in Bab. Gemara.

With regard to the text of the Bible, remarks are met with on the dots over each letter of the word לולא, Ps. xxvii. 13 (4a); on the absence of a verse beginning with the letter "nun" in Ps. cxlv. (p. 4b); on the division of the Psalms (9b). Texts wrongly quoted are: Gen. vii. 23, מאדם ועד בהמה, instead of מאדם עד בהמה (p. 61a); and וילך אלקנה אחרי אשתו, instead of וילך אלקנה הרמתה. I Sam. ii. 11. Here probably the words "to Ramah to his house" are taken as identical with the phrase "after his house." Besides the Bible, other books are mentioned in the Babylonian Gemara: A Book of Haggadot (ספרא דאגדתא), 23a; "Hilkot Derek Ereẓ" (Rules of Good Manners), 22a, and "Sefer Refu'ot" (Book of Remedies), 10b.

The Palestinian Gemara includes a short account of the temporary deposition of the nasi Rabban Gamaliel (iv. 7c *et seq.*; somewhat differently

The Palestinian Gemara.

narrated in Bab. 27b); the legend of Menahem ben Hezekiah (the predestined Messiah) and his mother (ii. 5a); the meeting of King Jannæus and Simon ben Sheṭaḥ (vii. 11b; paralleled in Bab. 48a), on which incident the Palestinian Talmud (vii. 11b) quotes from the Book of Ben Sira (Ecclesiasticus), סלסליה ותרוממך ובין נגידים תושיבך ("exalt her, and she will raise thee and give thee a place between princes"), where Bab. (Ber. 48a) quotes from Proverbs (iv. 8); the controversy between R. Simlai and the Minim on the use of the plural in the phrase "Let us make" (Gen. i. 26) (Yer. Ber. viii. 12d); and the death of R. Akiba (ix. 14b *et seq.*, parallel to Bab. 61b).

Both Gemaras include a goodly number of original prayers, most of which have found a place in the daily prayer-book. It is noteworthy that in the Yerushalmi the form for ברכות המצות (blessings preceding the performance of divine precepts, "miẓwot") is given, but is omitted in the Babylonian Gemara. The prayers do not differ essentially in the two Gemaras, either in form or in substance (compare Wiesner, "Gib'at Yerushalayim," pp. 7 *et seq.*). Each Gemara closes with the dictum, "Scholars increase peace in the world," etc.

As to the Halakah, the dictates of the Mishnah seem to have been followed in Palestine more rigidly than in Babylonia. Thus with regard to the reading of the evening Shema', which, according to the Mishnah (i. 1), must not take place before the commencement of actual night, if it have been read before that time, it must, according to the Yerushalmi, be repeated at the proper time (Yer. Ber. i., beginning); no indication of this is given in the Babylonian Gemara (see Rashi on Ber., beginning).

There are no signs in the treatises of later interpolations. Wiesner, however ("Gibeat Yerushalayim," p. 8, Vienna, 1871), suspects Karaite interpolations in the Yerushalmi (ii. 5a) for the purpose of revealing the Rabbinites in a bad light, as praying without devotion. If his argument be correct, a passage in the Babylonian Gemara (p. 6), in which certain pious acts seem to be ridiculed as resulting in no good, may likewise be suspected as of Karaite origin. See Benediction.

BERCHIN, JONAH BORISOVICH: Writer on early Russian-Jewish history; born at Krichev, government of Mohilev, 1865; died at Moscow Aug., 1889. Up to the age of fourteen he received a strictly Orthodox education in the house of his uncle, where he became familiar with the Hebrew language and literature. He then entered the Agricultural School at Gorigorgetzk, and after graduation studied at the High School of Minsk and the Polytechnicum of Riga. In 1888 he became paralytic, and was sent for treatment to Moscow, where he died.

Berchin's historical researches are valuable contributions to early Jewish-Russian history. He published: "Istoricheskaya Zamyetka," dealing with the sect of Shabbethai Ẓebi and with Galiatovski's book, "Messia Pravedny," in "Voskhod" for May and June, 1883; "Iz Davno Minuvshavo," in "Voskhod" for July, Aug., Nov., Dec., 1883; "Yevreiski Dokument," etc., in "Kievskaya Starina," Dec., 1884; "Sozhzhenie Lyudei v Rossii v XIII.-XVIII. Stolyetii," in "Russkaya Starina," 1885, p. 45; "Izvyestie o Yevreyakh v Kievye," in Voskhod" for July and Aug., 1887; "D'va Vracha Yevrei pri Moskovskom Dvorye," in "Voskhod" for March, 1888.

BERDYANSK: District town and seaport in the government of Taurida Crimea, Russia, on the northwestern coast of the Sea of Azof, at the Berdyansk estuary, near the mouth of the rivulet Berdyanka. It was built by the efforts of Prince M. S. Vorontzov in 1827, and soon became a lively little port, the trade to a considerable extent, especially the export of grain, being in the hands of the Jews. In 1892 the Jewish population of the town was 1,653 and the Karaite population 243, of a general total of 21,959. In the district the Jews numbered 3,416 in the general total of 227,780.

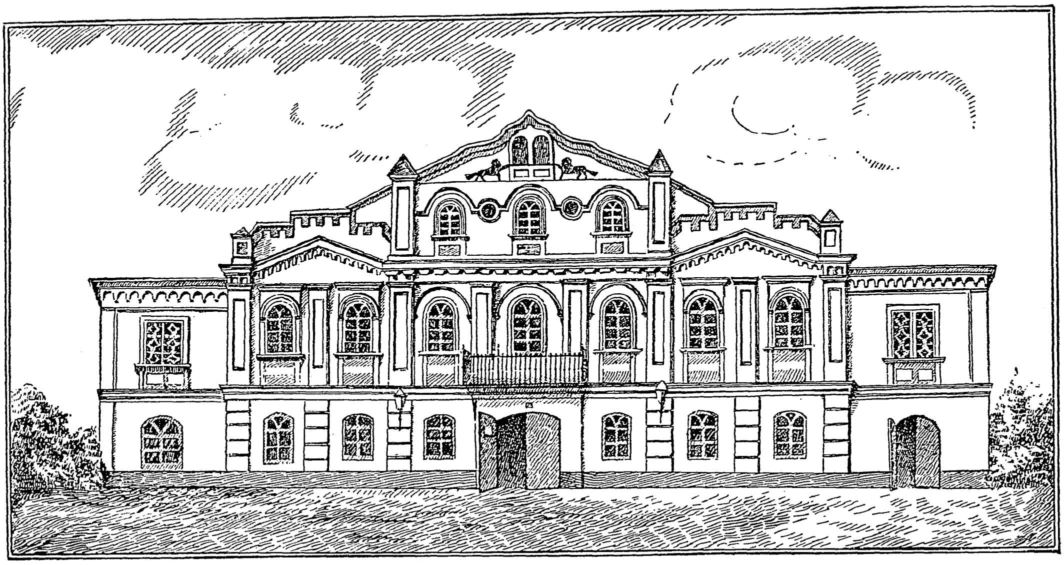
H. R.

BERDYCHEV (Polish, **BERDYCZEW**): A city in the government of Kiev, Russia; in historical and ethnographical relations part of Volhynia. It has one of the largest Jewish communities in Russia, and is often called the "Jerusalem of Volhynia." It is difficult to determine the time when Jews first settled there. From the sixteenth century till the end of the eighteenth, Berdychev was under the dominion of Poland; and the Polish family of Tishkewitz, the hereditary owners of that domain, ruled over it as they pleased. In 1593 it is stated that the owners of the "new town" of Berdychev farmed out to a certain Jew the mill- and bridge-taxes. In the eighteenth century the Jewish population increased considerably, and a Jewish "Ḳahal" (government of the community) was established, as in other large cities of Poland. A trade-union of Jewish tailors was formed in 1732 with the permission of the lady of the domain, Tereza (Theresa) Zawisha, who granted them autonomy and exemption from the rule of the Ḳahal. In 1794 Prince Radziwill permitted the Jews to elect their own civil judges in addition to the ecclesiastical court.

In 1765 King Stanislaus of Poland decreed that some great fairs be held during each year at Berdychev; and from that time the city became a commercial center, attracting the Jews from all parts of the country. At the government record office of Kiev some statistical data concerning the Jewish population of that period are preserved, according to which the numbers of Jews at Berdychev were: in 1765, 1,220; in 1784, 1,319; in 1787, 1,504; in 1789, 1,951. According to their occupations, 246 were liquor-dealers, 452 house-owners, 134 merchants, 188 artisans, and 150 clerks, together with 56 idlers. These figures may be considered too low; the taxes of the Polish government being heavy, as many persons as could possibly do so avoided being placed on the registers.

At the end of the eighteenth century, when the movement of the Ḥasidim among the Jews of Poland was at its height, Berdychev became the metropolis of the Ḥasidim of Volhynia, owing to the fact that about 1780 the celebrated "Ẓaddiḳ," Levi-Isaac, the author of "Ḳedushat Levi" (The Holiness of Levi), made it his headquarters. He created a great commotion by his teachings and by his quarrels with the "Mitnagdim." It is probable that the above-mentioned permission for the election of separate judges, given by Prince Radziwill in 1791, was secured by the Ḥasidim, who sought to emancipate themselves from the jurisdiction of the Ḳahal and the rabbis of the Mitnagdim. Great masses of people then flocked to Berdychev to see Levi-Isaac, who ruled there until 1810. At this period a printing-establishment for Hebrew books was in existence in the city.



Great Synagogue at Berdychev.

(From a photograph.)

In 1793, at the second division of Poland, Berdychev, with other cities of Volhynia, came under Russian domination. During the reign of Emperor Nicholas I., Berdychev was the largest commercial center in the Jewish pale. Afterward commerce diminished, and the poverty of the Jews there increased accordingly. Of all cities in the pale, Berdychev has the largest proportion of Jewish inhabitants. In 1899 there were 50,460 Jews in a total population of 62,283. There were seven synagogues and sixty-two houses of prayer.

BERDYCZEW. See Berdychev.

BERDYCZEWSKI, MICAH JOSEPH: Hebrew author; born in 1865. He represents, to some extent, the Nietzsche school of philosophy in the Hebrew literature of the present day. The son of the rabbi of Bershad, Podolia, Berdyczewski received a Talmudical training at home and later at the yeshibah of Volozhin, of which institution he wrote a short history ("Ha-Asif," iii. 231–241) and a somewhat fantastic description ("Ha-Kerem," 1888, pp. 63 *et seq.*). His acquaintance with modern literature, which he formed clandestinely in his younger days, soon led him to abandon his former conservatism and to become a freethinker. Berdyczewski, who now resides at Charlottenburg, near Berlin, and is engaged mainly with literary labors, is a prolific writer, whose productions, though not always clear, have exerted a certain influence among the young Hebrew nationalists. He is incensed against his former favorites, the Talmudical sages, because they thought more of the yeshibah or high school of Jamnia than of the fortress and citadel of Jerusalem. He thinks that King Herod was the real "Uebermensch," the intellectual giant who could, by his aggressive and magnificent plans, have regenerated Israel if he had not been thwarted by the dwarfed religious scruples of the rabbis of his time. Even the last Biblical liberators, Ezra and Nehemiah, displease him, because they obtained the deliverance of their nation by tears and fasting (see review of Berdyczewski's latest works—which were published in Warsaw by a society of Berlin students—in "Allg. Zeit. d. Jud." Nov. 9, 1900; also "Un Prophète Neo-Hébreu," in "L'Univers Israélite," v. 56).

Besides the works above mentioned and articles scattered throughout the Hebrew periodical literature for the last twelve or fifteen years, Berdyczewski also wrote two novels, "Mahanaim,"—in which he seems to have described himself; and "Mibayit u-Miḥuẓ"; both published by the Tushia Society in Warsaw, 1900. He was also for some time editor of the "Bet Midrash" a supplement to the "Bet Oẓar ha-Sifrut," which had several enlightened rabbis among its contributors.

Berdyczewski wrote in German a philosophical work, "Ueber den Zusammenhang Zwischen Ethik und Aesthetik" (in the series "Berner Studien zur Philosophie und Ihrer Geschichte," published by Ludwig Stein, vol. ix.), Bern, 1897.

H. R. P. Wi.

BEREA: Place where Bacchides encamped (I Macc. ix. 4). From the context it would seem to be near Jerusalem, though some scholars have identified it on unsatisfactory evidence with Beeroth (Josh. ix. 17; I Esd. v. 19).

J. Jr. G. B. L.

BEREBI (ברבי and בריבי; in Greek, βηρέβι, "Sitzungsberichte der Akademie zu Berlin," 1885, p. 681). Title of learning in the period of the Tannaim, conferred especially upon scholars who were the sons of scholars, or upon members of the family of the patriarch. The explanation of the word as a compound of בי ("house") and רבי ("rabbi"), meaning "belonging to the school of an eminent teacher" (see Jastrow, "Dict." *s.v.*), is not obvious; for one could not think of the patriarch Rabban Gamaliel as being addressed by the title "student," which is what "Berebi" would thus really signify (Ḳid. 32b). It may be assumed that "Berebi" is a compound of ביר ("son") in Palestinian Aramaic, and רבי ("rabbi"), a formation analogous to "ben ḥorin" (son of a free man) for "a free man." In the same way "son of a scholar" is here used instead of "scholar." One must distinguish from this word "Berebi," as a title, the phrase occasionally used "Ḥad Berebi" (a student), which actually does mean "one of the school." It is found only in the time of the Amoraim; while Berebi as a title is tannaitic.

Among the scholars who bore the title "Berebi," Bar Ḳappara must be specially named. He is given the designation "Berebi" whenever mentioned by his first name, Eleazar, in order to distinguish him from his father, who bore the same name (Ḥul. 28b, 56b, 84b, etc.). Yalḳuṭ Deut. 923 quotes from Ḥul. 11b and Mak. 5b once "Eleazar ha-Ḳappar," and once ברבי (so it must be read instead of רבי, or ב״ר, as ed. Salonica has it); whereas in the two Talmudic passages referred to the name of the tanna has dropped out, and only ברבי or בריבי remains, which has misled some scholars to assume the existence of a tanna by the name of Berebi.

BERECHIAH I., R.: A Palestinian scholar of the second amoraic generation (third century), always cited without the accompaniment of patronymic or cognomen. Once only (Lev. R. i. 4) is he quoted as **Berechiah Saba** (the Elder), by R. Abin III., the contemporary of Berechiah II.; and in this instance the designation "Saba" is used to distinguish between the namesakes. Nothing is known of Berechiah's life, and comparatively little preserved of his teachings, though it is quite probable that some of his sayings are attributed to his later and more renowned namesake (compare Frankel, "Mebo," 69b). A discussion of his with R. Ḥiyya of Kefar Teḥumin is reported on the merit of the study of the Torah. One of them teaches that the whole of this world does not equal the value of a single passage of the Law; and the other argues, "Even the discharge of all the Biblical commandments is not equal to the merit of mastering a single passage of the Law" (Yer. Peah i. 15d). Rabbah b. Naḥman, a contemporary of Rabbah b. Huna, transmits in the name of Berechiah a homily on the continuance of the protective influence of patriarchal merit ("zekut abot"; Yer. Sanh. x. 27d; compare Lev. R. xxxvi. 6, where the names of the rabbis are badly corrupted). R. Tanḥum b. Ḥanilaï, the disciple of R. Joshua ben Levi (B. Ḳ. 55a), too, reports Haggadot in the name of Berechiah (Tan., Tazria', 9; Pesiḳ. R. xxi. 110a). Bacher denies the existence of this Berechiah, and to sustain his opinion changes the chronological order in the passages quoted ("Ag. Pal. Amor." iii. 351, 354, note 3; 628, note 7).

J. Sr. S. M.

BERECHIAH II., R.: A Palestinian amora of the fourth century. In the Talmud he is invariably cited by his prænomen alone; but in the Midrashim he is frequently cited with the addition of "ha-Kohen," and sometimes with the further addition of the title "Berebi" (compare Pesiḳ. ii. 21a, xii. 107b; Pesiḳ. 3 [ed. Friedmann, p. 8a]; Num. R. xiv. 3; Pesiḳ. R. 3 [ed. Friedmann, p. 9a]; Num. R. *l.c.*; Tan., Beha'aloteka, 5; Num. R. xv. 7); and according to at least one Midrash (Lev. R. xxx. 1), his father's name was Ḥiyya (see also Tan., ed. Buber, Ḥayye Sarah, 6, note 35).

While Palestine may justly claim him as a citizen, Berechiah is probably a Babylonian by birth, since he not only cites teachings of Babylonian scholars ("Rabbanan de-Tamman," Gen. R. lvi. 11, xcviii. 3; Esther R. i. 1; compare Gen. R. xxxvii. 3, where this expression is converted into "Rabbi Ḥanin," and Mid. Teh. cv., beginning, where "de-Tamman" is omitted), but also shows himself quite familiar with the private history of Babylonian families (Yer. Ḳid. iii. 64c; Lev. R. xxxii. 7). Judging, however, from the insignificant number of his sayings recorded in the Babylonian Talmud as compared with his almost innumerable teachings preserved in the Palestinian Talmud and the Palestinian Midrashim, and considering also that his acknowledged masters were Palestinians, it is safe to say that he was in Palestine at an early age. Berechiah's acknowledged master in the Haggadah was R. Ḥelbo (Yer. Kil. ix. 32c; Lam. R. on iii. 23; Cant. R. on i. 2); but it seems that he personally knew R. Ḥelbo's predecessors, Levi and Abba b. Kahana, and witnessed a heated exegetical controversy between them (Gen. R. xlvii. 9). If this be so, Berechiah must have lived to an advanced age, for he was in a legal controversy with R. Mana (the Younger) (Yer. Ḳid. iii. 64d). Rapoport ("Briefe," ed. Gräber, p. 80) makes him a teacher of Jerome.

Berechiah is cited in both the Babylonian Talmud (Ber. 55a; Yoma 71a; Ta'anit 4a; Soṭah 13b) and the Palestinian, in the field of the Halakah (Yer. Ber. vii. 11b; Yer. Peah i. 15a; Yer. Ma'as. v. 52a; Yer. Suk. ii. 53a; Yer. Soṭah vii. 21b; Yer. Ḳid. iii. 64d; Yer. Sanh. xi. 30b) and in that of the Haggadah; but it is the latter which he cultivated mainly. Few names appear in the Midrashic literature as frequently as does Berechiah's. In Pesiḳta alone he is cited sixty-eight times, either as originator or as transmitter; in Pesiḳta Rabbati sixty-one times (see Friedmann, Introduction, p. 18), in Tan. (ed. Buber) seventy-three times (Buber's Introduction, p. 46), in Mid. Teh. eighty-five times (Buber's Introduction, p. 28), and correspondingly numerous are his remarks preserved in the other Midrashim. Some specimens of his teachings are here subjoined.

In accordance with the oneirological views of his days, he asserts that dreams, though realized partly, are never realized fully. "Whence do we learn this? From Joseph, who dreamed (Gen. xxxvii. 9), 'Behold, the sun, and the moon, and eleven stars made obeisance to me'; and at that time his mother, typified in his vision by the moon (*ib.* 10), was no more among the living" (Ber. 55a). He thus construes the Psalmist's saying, "The Lord knoweth the way of the righteous, but the way of the ungodly perisheth" (Ps. i. 6): "When the Holy One—blessed be He!—came to create man, He foresaw that pious and impious men would descend from him, and He said, 'If I create him, the impious will descend from him; if I create him not, how will the pious descend from him?' What did the Holy One—blessed be He!—do? He removed the ways of the impious out of His sight, and by means of His attribute of mercy ["middat ha-Raḥamim"] He created man. This is the meaning of the Scripture, 'God knoweth ["holdeth in view"] the way of the righteous'" (Mid. Teh. on *l.c.*; Gen. R. viii. 4). In commenting on Eccl. vii. 17, "Be not overmuch wicked," he says: "The Bible does not mean to teach that it is permitted to sin a little; but it means to say, if thou didst sin a little, say not, 'I am under the wrath of God on account of this little, and can be no worse off for sinning more'" (Eccl. R. on *l.c.*; Mid. Teh. on i. 1; compare Shab. 31b). With reference to the Scriptural saying (Ps. xxxii. 1), "Happy is he whose transgression is forgiven" (literally, "who is lifted above transgression"), he cites R. Simon [Samuel?] b. Ammi as remarking, "Happy is the man who is master over sin, that sin be not master over him" (Gen. R. xxii. 6). In the same strain is Berechiah's remark on Solomon's saying, "There is a time to be born, and a time to die" (Eccl. iii. 2): "Happy is he whose hour of death is like his hour of birth; who, as he was pure and innocent in the hour of his birth, is also innocent at the hour of his death" (Yer. Ber. ii. 4d; Eccl. R. on *l.c.*; Deut. R. vii. 6).

BERECHIAH BERAK B. ELIAKIM GOETZEL: A grandson of Berechiah b. Isaac; rabbi and preacher of Klementow, Poland, and Jaworow, Galicia; lived toward the end of the seventeenth century and the beginning of the eighteenth. He was a very sincere preacher and suffered much for his outspokenness. The government prohibited the publication of his sermons, only those covering the book of Genesis being published (Halle, Saxony, 1714), under the title, "Zera' Berak Shelishi" (third part of "Zera' Berak"); and "Ḥiddushim," novellæ on the first portions of Berakot, dealing especially with the Haggadot. Many contemporary rabbis gave their approbation to this work.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 647.

L. G. M. B.

BERECHIAH BERAK B. ISAAC EISIK: Galician preacher; died in 1664 at Constantinople. He was educated by Nathan Shapira, rabbi of Cracow, and was appointed preacher of that city, where he spent most of his life. He ultimately left for Jerusalem, but died at Constantinople. His sermons on the Pentateuch, the Megillot, and the Passover Haggadah were collected and published in two volumes under the title, "Zera' Berak." The first was published in 1646 at Cracow. Appended to it was "'Aṭeret Ẓebi," by Ẓebi Hirsch ben Shalom Mebo, the brother-in-law of Berechiah and son-in-law of Lipmann Heller. The second volume was published, together with a second edition of the first one, in 1662, and itself went into a second edition, Amsterdam, 1730.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 646.

L. G. M. B.

BERECHIAH BEN ISAAC GERUNDI (called also **YIẒḤAKI**): Payyeṭan; lived in the twelfth century, probably at Lunel. Although he wrote nothing on the Halakah, his brother Zerahiah Gerundi, in his "Sefer ha-Maor," cites him as an authority on the treatise Giṭṭin (to 15b). Berechiah's poems, the greater part of which are printed in the Maḥzorim of diverse rites, are: (1) "Kerobah," a form of piyyuṭ for the Sabbath following the feast of Purim; (2) Azharot, for the feast of Tabernacles, in which all the precepts concerning this feast are enumerated; (3) introduction to Ḳaddish; (4) poems for Purim; (5) prayers for Atonement; (6) a poem on the Habdalah.

Bibliography: Zunz, *Literaturgesch.* pp. 463, 495; Landshuth, *'Ammude ha-'Abodah*, pp. 56, 63, 117; Gross, *Gallia Judaica*, p. 255.

L. G. I. Br.

BERECHIAH BEN NATRONAI KRESPIA HA-NAḲDAN: Fabulist, exegete, ethical writer, grammarian, and translator; probably identical with **Benedictus le Puncteur,** an English Jew mentioned as contributing at Oxford to a donum to Richard I., in 1194. Much discussion has taken place concerning the date and native country of this writer, Zunz ("G. S." iii. 237) placing him about 1260 in Provence, with which conclusion Renan-Neubauer ("Les Rabbins Français," p. 491) and Steinschneider ("Hebr. Bibl." xiii. 83) agreed. Joseph Jacobs, during certain investigations on the medieval history of the fable, arrived at the conclusion that Berechiah should be located in England toward the end of the twelfth century (Jacobs, "Fables of Æsop," i. 175), and this was confirmed by Neubauer's discovery that, in the preface to his fables, Berechiah refers to the "turning of the wheels of fate to the island of the sea [= England] for one to die and the other to live" ("Jewish Quart. Rev." ii. 522), clearly a reference to the English massacre of 1190. The earlier view of Berechiah's date was based on a misreading of a colophon of his son Elijah, which was shown to be dated Wednesday, Oct. 22, 1233 (Jacobs, "Athenæum," April 19, 1890). Steinschneider, however, is still doubtful as to the identification ("Hebr. Uebers." p. 961). The point is of some importance on account of Berechiah's connection with the history of medieval fable.

His Fox Fables.

Berechiah is known chiefly as the author of a set of 107 (113) fables, called "Mishle Shu'alim" (Suk. 28a), probably in imitation of the Talmudic "Meshalot Shu'alim." Manuscripts exist at the Bodleian (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1466, 7, originally belonging to Cotton, and 1421, 5, with six additional fables) and Munich (207 written before 1268). The first edition appeared in Mantua, in 1557; another with a Latin version by M. Hanel, Prague, 1661; other editions at Berlin, 1706; Lemberg, 1809; Grodno, 1818; Sklov, n. d.; Warsaw, 1874.

The fables themselves give in rimed prose most of the Beast Tales passing under the name of Æsop during the Middle Ages; but in addition to these, the collection also contains fables conveying the same plots and morals as those of Marie de France, whose date has been placed only approximately toward the end of the twelfth century. It has been suggested that these additional fables were derived by Berechiah from Marie, but this is impossible, as Berechiah's versions are closer to the original and in at least one case (No. 28) he did not make a mistake made by her. The following table exhibits the relationship between Berechiah's fables and those of Marie, as well as their connection with the "Romulus," the Latin prose translations of the medieval Æsop. From this it will be seen that Berechiah has only one-half of the additional fables given by Marie, and that he has as many (about 30) which are not found in her collection. Some of these are from Avian, others from Oriental, sources; and it has been suggested with some reason that both collections are derived from an Arabic series containing 154 fables, most of which could be traced to classical antiquity, and others from the East. The question can not be said to be settled; but neither Neubauer nor Steinschneider will admit that Berechiah knew Arabic ("Jew. Quart. Rev." xii. 607).

Comparative Table of Corresponding Fables in Berechiah, Marie de France, and "Romulus."

Abbreviations: Ber.=Berechiah; Marie=Marie de France, "Fables"; Rom.="Romulus" (medieval prose Æsop, ed. Oesterley, 1873); App. or A.=Appendix to Rom.; Av.=Avian, "Fabulæ," ed. Ellis. Missing numbers have no parallels in Marie or "Romulus."

As an example of his fables, the following may be given as one of those which has a parallel in Marie de France (No. 73), and is derived from an Oriental source, probably the "Vaka Jataka" (Folk-lore Journal, iii. 359):

THE WOLF AND THE ANIMALS.

The Wolf, the Lion's prince and peer, as the foe of all flesh did appear; greedy and grinding, he consumed all he was finding. Birds and beasts, wild and tame, by their families urged to the same, brought against him before the Lion an accusation, as a monster worthy of detestation. Said His Majesty, "If he uses his teeth as you say, and causes scandal in this terrible way, I'll punish him in such a way as to save his neck, if I may, and yet prevent you becoming his prey." Said Lion to Wolf, "Attend me to-morrow, see that you come, or you'll come to much sorrow." He came, sure enough, and the Lion spoke to him harsh and rough. "What by doing this do you mean? Never more raven the living, or live by ravening. What you shall eat shall be only dead meat. The living you shall neither trap nor hunt. And that you may my words obey, swear me that you'll eat no flesh for two years from to-day, to atone for your sins, testified and seen: 'tis my judgment, you had better fulfil it, I ween." Thereat the Wolf swore right away no flesh to eat for two years from that day. Off went Sir Wolf on his way, King Lion stopped at court on his throne so gay. Nothing that's fleshy for some time did our Wolf eat, for like a gentleman he knew how his word to keep. But then came a day when he was a hungered and he looked hither and thither for meat, and lo, a fat sheep fair to look on and goodly to eat (Gen. iii. 6). Then to himself he said, "Who can keep every law?" and his thoughts were bewildered with what he saw. He said to himself, "It overcomes me the longing to eat, for two years

> day by day must I fast from meat. This is my oath to the king that I swore, but I've thought how to fulfil it as never before. Three sixty-five are the days in a year. Night is when you close your eyes; open them, then the day is near." His eyes he opened and closed straightway. It was evening and it was morning, one day (Gen. i. 6). Thus he winked until he had numbered two years, and his greed returned and his sin disappears. His eyes fix the goat (*sic*) they had seen and he said, "See beforehand I have atoned for my sin," and he seized the neck of the goat, broke it to pieces, and filled up his throat as he was wont to do before, and as of yore his hand was stretched out to the beasts, his peers, as it had been in former days and years.

This is nearer the original source than the version of Marie, which gives a Christian turn to the whole story.

Berechiah was also the author of an ethical treatise entitled "Sefer Maẓref" (MSS. at Munich and Parma). The treatise is divided into thirteen chapters: i. Introduction, ii. Lust, iii. Affection, iv. Restraint of the Will, v. Justice, vi. Misfortune, vii. Poverty, viii. Honor, ix. Position, x. Rank, xi. Soul, xii. Hope, xiii. Immortality. In it he quotes R. Abraham ibn Daud (died about 1198) without the formula for the dead, so that it is quite probable that the book was composed before 1180. He does not quote Maimonides' "Moreh," finished in 1191, known in Provence shortly after that date and in north France about 1204. Prof. Gollancz has published an edition of the "Sefer Maẓref" (London, 1902).

His Other Works.

In addition to these, Berechiah wrote a commentary on Job (MS. in the Cambridge University Library, 8; Schiller-Szinessy, "Catalogue," pp. 40-42, 245). He was acquainted with most of the grammarians of the eleventh and twelfth centuries, and his "Uncle Benjamin," whom he quotes, has been identified with Benjamin of Canterbury. The writer of the commentary on Job was also the author of a commentary on the whole Bible, passages from which are quoted in a Leyden manuscript.

Berechiah was certainly a translator, his version being extant of Adelard of Bath's "Quæstiones Naturales" (MSS. at Munich, Leyden, Oxford, and Florence), as well as of a "Lapidary" containing a description of 63 species of stones (MS. in Bodleian). Besides these works, Berechiah is also said by Zunz to have contributed to the Tosafot (Sanh. 20b), and, as his name implies, was probably an expert in Hebrew grammar, for which reason he is quoted by Moses ben Isaac of England, in his "Sefer ha-Shoham." As this work was probably written before 1215, these references confirm the date and place suggested above.

Berechiah was one of the most versatile writers of the Middle Ages, and if he can be claimed for England, it raises the literary position of that country, as regards Jewish literature, to a considerable height.

Formerly some confusion existed between Berechiah and another Krespia Naḳdan, the copyist of certain manuscripts and supposed translator of Saadia's "Emunot we-Deot" (see Krespia Naḳdan).

G. J.

BERECHIAH DE NICOLE (Lincoln; also known as **Magister Benedict fil Mosse de Londres):** English Tosafist; died after 1256. He was of the well-known Hagin family, and son of Rabbi Moses ben Yom-Ṭob of London. He was the rab or chief rabbi of Lincoln (the Norman-French name of which was "Nicole"), and probably lived in the house now known as "the Jews' house" in that city; for this was in the possession of a certain Belaset of Wallington in 1287, and there is a deed which speaks of Belaset, daughter of the rab Berechiah (Davis, "Sheṭaroth," No. 156, p. 298). It has been conjectured that it was to attend the marriage of this Belaset and to do Berechiah honor that the Jews of England assembled at Lincoln toward the end of August, 1255, when the body of Little Hugh of Lincoln was discovered, and all the Lincoln Jews were sent up to London for complicity in a so-called ritual murder. Berechiah was released earlier than the rest of the Jews, on Jan. 7, 1256 (Rymer, "Foedera," ed. 1816, i. 346).

His subsequent fate is unknown; but there are a number of decisions of his in the ritual literature of the time, which show that he was considered an authority in ritual matters. Thus, in Mordecai, Ber. iv. 90, he decided that the evening prayer might be said an hour and a quarter before the legal time of night. On another occasion he declared that nuts prepared by Gentiles might not be eaten by Jews ("Shilṭe ha-Gibborim" on Mordecai, 'Ab. Zarah ii. 831). There is likewise an exegetic remark made by him in "Minḥat Yehudah," 89b.

BERED: **1.** A son of Ephraim (I Chron. vii. 20). In the genealogy of Num. xxvi. 35 his place is taken by Becher. It may be that Bered and Becher are the same. See Becher.

2. A place given in the story of Hagar (Gen. xvi. 14). Beer Laḥai Roi is there located between Kadesh and Bered. Targumim Onkelos and Yerushalmi regard Bered as Shur; Onkelos rendering it "Ḥagra," which is his usual equivalent for "Shur" (Gen. xvi. 7), while the Jerusalem Targum renders it "Ḥaluẓa," which is also "Shur" (Ex. xv. 22). The site has not been identified.

J. JR. G. B. L.

BEREK, JOSELOVICH (called also **Berko**): Polish colonel under Kosciusko and Napoleon I.; born at Kretingen, government of Kovno, Russia, in the second half of the eighteenth century; killed in the battle near Kotzk, government of Syedletz, Russian Poland, 1809. He was an agent of Prince Massalsky, the owner of Kretingen and bishop of Wilna, who often sent him with commissions abroad, where he learned the French language. In 1794 he was commissioned by Kosciusko to form a light-horse regiment from among the Jews of Warsaw. Berek revived the courage of his coreligionists in the struggle for the fatherland, and fought bravely with his 500 men, especially in the defense of Warsaw. In the siege of Praga (a suburb of Warsaw) by Suvarov he lost almost all his soldiers. He then served under Napoleon, in the Polish Legion commanded by General Dombrowski, and was killed in an encounter with Austrian hussars near Kotzk, as before stated. There the people raised a mound to his memory; and until 1831 his widow and son received a pension.

Berek was a knight of the Polish Gold Cross and the Virtuti Militari.

S. P. Wi.

BERENDT, GOTTLIEB MICHAEL: German geologist; born in Berlin Jan. 4, 1836. He studied the science of mining; and in his work, "Die Diluvialablagerungen der Mark Brandenburg, Insbesondere der Umgebung von Potsdam," Berlin, 1863, gave the first geological map of this province. He also prepared and issued maps of a part of the Harz mountain range and of eastern and western Prussia. Having settled in Königsberg, he was, in 1872, made there extraordinary professor; subsequently becoming district geologist and chief of the department for the Lowland in the Prussian Geological Institute at Berlin. Being made professor at the Berlin University in 1875, Berendt distinguished himself by work on the geology of the North German Lowland; and was among the first to recognize the glacial theory in geology. He further issued a geological map of the vicinity of Berlin, and a geological plan of the city of Berlin. His work, "Die Theorie Darwins und die Geologie," Gütersloh, 1870, contains a repudiation of Darwinism. Among his other productions on geology, the more important are: "Geognostische Blicke in Alt-Preussens Urzeit," Berlin, 1872; "Die Umgegend Berlins," Berlin, 1877; "Spuren einer Vergletscherung des Riesengebirges," Berlin, 1892; "Der Tiefere Untergrund Berlins," Berlin, 1899. He contributed a large number of essays on the same subject to the following periodical publications: "Zeitschrift der Deutschen Geologischen Gesellschaft," Berlin; "Neues Jahrbuch für Mineralogie, Geologie, und Paläontologie," Stuttgart; "Schriften der Physisch-Oekonomische Gesellschaft," Königsberg, and others.

BÉRENGER OF NARBONNE: Viscount of Narbonne in the eleventh century. In the midst of the important wars of that century waged for the assertion of their temporal power, the popes still found time to protect the Jews. Alexander II. was their enlightened and zealous protector against any injustice. Animated by such sentiments, he praised the viscount Bérenger of Narbonne for having energetically interfered in their favor at a time when their persecution was threatened. At the same time Alexander wrote a letter to the bishop Wifred of Narbonne (1063), asking him to protect the Jews no less actively in future than had Bérenger, if similar circumstances should arise.

BERENICE (formerly **Hesperides**): City of the Cyrenaic Pentapolis, at the eastern extremity of the great Syrtis, near the river Lathon. The settlement of the Jews in Berenice, as in the other towns of the Greek colony "Cyrenaica," dates from Ptolemy I. Although enjoying the rights of citizenship, they formed an independent municipal community. But instead of having an ethnarch at their head, as in other places, the Jews in Berenice formed a separate "politeuma," and were governed by their own archons. A Greek inscription found in Berenice, dating from the year 13 B.C., according to Böckh's calculation, gives the names of the nine Jewish archons. These are: Cleanthropos, Stratonicos, Euphanides, Aristonos, Sozigenos, Sosippus, Andromachus, Marcus, and Lailaos.

Bibliography: Josephus, *Ant.* xiv. 7, § 2; *C. I. G.* ed. Aug. Böckh, No. 5361, p. 557; Schürer, *Gesch.* iii. 25, 42, 43.

G. I. Br.

BERENICE: Daughter of Costobar and Salome, sister of Herod I. Her marriage with her cousin Aristobulus was unhappy. The husband, being proud of his Maccabean descent by his mother, Mariamne, taunted his wife with her low birth. Berenice thereupon complained to her mother, and this fact intensified their mutual bitterness. When, shortly after the marriage (6 B.C.), Aristobulus was assassinated, Berenice was believed to have had a share in his death.

Being now free, Berenice married Theudion, the maternal uncle of Antipater, son of Herod I. Her second husband was put to death for participation in a plot against the life of Herod; and Berenice then married Archelaus. With him she went to Rome to solicit of Augustus the carrying out of her father's testament, and remained there until her death. During her sojourn at Rome she gained the favor of Augustus and the friendship of Antonia, wife of Drusus, who later paid the debts of Agrippa I., the son of Berenice, owed by him to the treasury of the emperor Tiberius.

G. I. Br.

BERENICE: Daughter of Herod Agrippa I. and of Cypros, the daughter of Phasael; born in 28. She was first married to Marcus, son of the alabarch Alexander of Alexandria. Her husband dying within a short time, her father married her to his brother Herod of Chalcis (Josephus, "Ant." xix. 5, § 1). Berenicianus and Hyrcanus were the children of this union ("Ant." xx. 5, § 2; "B. J." ii. 11, § 6). Again a widow in the year 48, Berenice went to her

Her Marriages.

brother Agrippa II., with whom it was whispered she lived in incestuous relations ("Ant." xx. 7, § 3; Juvenal, "Satires," 6). These rumors may not have been unfounded, since Agrippa tried to stop them by betrothing Berenice to Polemo, king of Cilicia. The latter, won by her wealth as much as by her beauty, embraced the Jewish faith and was circumcised.

Pleads for Jerusalem.

Berenice, however, soon left her third husband to return to her brother, resuming apparently their old relations. In 60 she went to Cæsarea with Agrippa II. to welcome the new governor, Festus, and took part in the proceedings against Paul (Acts xxv. 13 *et seq.*, xxvi.). When, in 66, the governor Florus had by his measures provoked a riot in Jerusalem, Berenice, who was then in the city to fulfil a Nazarite vow, implored him on her knees to stop the bloodshed and to spare the town. But Florus was deaf to her prayers, and, being in danger of maltreatment, she had to seek refuge in her palace ("B. J." ii. 14, §§ 6–9; 15, §§ 1, 2). Berenice appeared with Agrippa before the proconsul Cestius Gallus to complain of Florus. Later, when Agrippa in a speech tried to dissuade the people from going to war with the Romans, Berenice stood near him to protect him by her popularity ("B. J." *l.c.*). Agrippa's attempts to maintain peace were unsuccessful. In the ensuing conflict at Jerusalem between the war party and that advocating peace the latter succumbed; and the palaces of Agrippa and Berenice were demolished by the infuriated populace ("B. J." ii. 17, § 6).

Berenice and Agrippa now openly went over to the Romans. After Vespasian had been made emperor by the Egyptian and Syrian legions, Berenice, who was a strong supporter of the Flavian party, summoned her brother Agrippa to Palestine to take the oath of allegiance (Tacitus, "Historiæ," ii. 81). Vespasian seems to have held her in high esteem; for only her intercession saved Justus of Tiberias from being beheaded.

Beloved by Titus.

About this time Berenice entered into relations with Titus that lasted for many years, although she was much older than he—according to Wilcken, no less than thirteen years. Her beauty, however, was still irresistible, and, perhaps in the eyes of Titus, her vast wealth was even more attractive (compare Tacitus, "Historiæ," ii. 2). These relations continued at Rome, whither Berenice had gone with Agrippa in 75. Titus and Berenice lived on the Palatine Hill; and it was generally supposed that he would soon marry her (Suetonius, "Titus," vii.). So jealous of her was Titus that he caused the Roman general Cæcina, whom he suspected of a secret intrigue with Berenice, to be assassinated (Aurelius Victor, "Epitome," x. 7). Fully expecting Titus to marry her, Berenice tried to hasten the event (Dio Cassius, lxvi. 15, § 4); but when she publicly appeared as the wife of Titus he was compelled, much against his will, to separate from her, the hatred of the Jews by the Romans being too intense to tolerate such a union (Suetonius, *l.c.*; Dio Cassius, *l.c.*). Still Berenice did not give up the hope of sharing with Titus the throne of the Roman empire. At the news of Vespasian's death (June 23, 79) she hastened to Rome; but Titus sent her back (Dio Cassius, lxvi. 18).

Nothing is known of the later life of Berenice. It may be remarked that Berenice on her journeys between Palestine and Rome seems to have formed connections at Athens, as may be gathered from the inscription published in "C. I. A." iii. 1, No. 556.

BERENSON, BERNHARD: Art critic and historian; born at Wilna, Russia, June 26, 1865. He was educated in America, and in 1887 was graduated at Harvard. For some time Berenson has been in Italy investigating Italian art, and he is regarded as one of the leading authorities on its technic, following the methods of Morelli in testing the reputed authorship of early paintings. Bernhard Berenson is a contributor to the New York "Nation" and to various French and German reviews of art and archeology. Among his publications in book form are: "Lorenzo Lotto," an essay in constructive art criticism, 1895; "Central Italian Painters of the Renaissance," 1897; and "The Study and Criticism of Italian Art," 1901.

BERENSTEIN, ISSACHAR BAER B. SAMUEL: Dutch rabbi; born in Leeuwarden, Holland, 1808; died in The Hague Dec. 13, 1893. He was the son of Rabbi Samuel b. Berish BERENSTEIN, chief rabbi of Amsterdam, and was a dayyan of that town at the time of his father's death in 1838, continuing in that position for the following ten years. In 1848 he became chief rabbi of The Hague, succeeding R. Joseph Asher Lehmans, who had died six years before. He held the latter position for forty-five years, during which time he contributed much to the building up of communal institutions, such as an orphan asylum and a Jewish hospital; he was also the organizer of a Jewish historical and literary society. Berenstein's services were recognized by the government, and he was decorated with the insignia of the Order of the Golden Lion. He died at the ripe old age of eighty-five years, highly honored and respected, and was mourned by the entire population of the Dutch capital, irrespective of race or religion.

BERENSTEIN, SAMUEL BEN BERISH: Dutch rabbi; born in Hanover about 1767; died in Amsterdam Dec. 21, 1838. He was the descendant of a long line of distinguished rabbis, his father and his grandfather, R. Aryeh Loeb—who was the son of Rabbi Jacob Joshua of Cracow, Lemberg, and Frankfort (author of the "Pene Yehoshua")—having been rabbis of Hanover. Rabbi Samuel Berenstein was educated as a rabbi, and for many years held that office at Gröningen, Holland. He was probably the first rabbi of Holland to preach in the Dutch language, and a speech which he delivered in 1805 to arouse sympathy for those who were ruined by the great fire that almost destroyed the city of Leyden in that year is preserved in a Hebrew translation ("Ha-Meassef," 1809, pp. 291, 342; 1810, pp. 40 *et seq.*). Later he became rabbi of Leeuwarden, Friesland, and remained there till 1815, when he was elected chief rabbi of the Ashkenazic community of Amsterdam, to succeed his father-in-law, Jacob Moses Löwenstamm, who had held that position since 1790. There is a tradition that R. Samuel was a trifle too liberal to suit the taste of his zealous father-in-law, and that there were many differences of opinion between them during the time of liberal innovation early in the nineteenth century. A letter addressed by Samuel Berenstein to Israel Jacobsohn, whom he calls "friend of my youth," against the introduction of German prayers in the synagogue (B. H. Auerbach, "Geschichte der Israelitischen Gemeinde Halberstadt," pp. 223–225), is couched in remarkably courteous and liberal terms. Still, neither his orthodoxy nor his skill as a Talmudist is open to the slightest suspicion, as can be seen from a responsum dated 1819, addressed to him by R. Moses Sofer of Presburg. That uncompromising opponent of progress in any form calls R. Samuel "Geon Yisrael," "Ner Yisrael," "'Ammud ha-Yemoni," "Patish ha-Ḥazaḳ," "Kebod Ḳadosh Shemo Tifarto" (see "Ḥatam Sofer"; "Eben ha-Ezer," part ii., responsum 139); the last being an appellation which is used only in the case of the greatest and most pious rabbis.

Berenstein is not known to have contributed anything to rabbinical literature; besides a few sermons in the Dutch language ("Leerreden," mentioned by Kayserling, in "Jüd. Literatur," p. 103, where it is wrongly stated that he died in 1808)—one of which, delivered in Amsterdam, 1832, is preserved in the British Museum—and a Hebrew prayer against the cholera (Roest's "Catalogue of the Rosenthal Library"), he left nothing for posterity. He will always be remembered in Holland as one of the first rabbis to favor the spread of a knowledge of the Dutch language among the Jews of that country. In this regard he was a true follower of his great-grandfather, who also advised the Jews of his time to study the languages of the countries in which they live (see S. Bloch's preface to his translation of Menasseh b. Israel's "Teshu'at Yisrael," Vienna, 1813). After the death of R. Samuel, his son R. Issachar Baer, who was a dayyan in Amsterdam, failed in the effort to succeed him, and the office of chief rabbi remained vacant for a quarter of a century, until the election of the present incumbent, Dr. Dünner.

BERERAH.—In Talmudic Law: The concept "Bererah," known to the later Babylonian Amoraim, is a development of the law of joint property, and, just as in Roman law, this branch of the law presents very great difficulties. Girtauner, in "Jahrbücher für Dogmatik," iii. 239 (edited by Gerben and Ihering), says, "Ihering calls it the filigree of jurisprudence." In his "Die Rechtstellung der Sache und der Eigenthumsbegriff," etc., p. 242, Girtauner further says: "Joint property contains a contradiction to the concept of property. There is no object to which the right of property of the joint proprietor attaches, but it must be assumed as existing, although it is not actually existent." A. Rümelin ("Die Theilung der Rechte," p. 100) says: "The several dicta of the Roman law concerning joint property can not be brought together under a uniform principle, and they seem to exist independent of one another." It is not, therefore, surprising that the Talmudists formed no clear idea of Bererah, by which they attempted to explain the texts of the Mishnah and Tosefta concerning joint property; more especially because they did not limit this idea to joint property, but extended it so as to include other matters. Contradictions arose because the Tannaim and the Palestinian halakists in general knew nothing of the concept of Bererah, which was a later development of the Babylonian Halakah and modified the stricter ideas of the Palestinian.

Its Concept.

In cases of joint property the question arises, Is the proprietor that is using the joint property to be considered for the time being as sole proprietor or merely as owner of part, and as exercising the right of use of the part owned by the other? Furthermore, in cases of division of the joint property, do the joint proprietors receive their original property, or do they receive new property through exchange?

The various answers to these questions result in important differences both from the religious and from the juridical point of view. For instance: One vows not to enjoy the property of his partner. If he, as joint proprietor using joint property, is looked upon as sole proprietor, this vow has no effect, because he is simply using his own property, and not that of his partner; but if he is considered, as to a part of it, simply as exercising the right of use of property belonging to the other, the joint proprietorship must be dissolved, or he must assign his right to another person. In Ned. v. 1, a controversy of the Tannaim is reported: If two joint proprietors vow not to enjoy the property of each other, according to the general view, neither of them may enter upon the estate which they own in common, whereas one of the Tannaim, R. Eliezer ben Jacob, maintains that each of them may say, "I am entering upon my part." Accordingly, therefore, the Babylonian Gemara (B. Ḳ. 51b), assuming that the joint property is indivisible, concludes that this controversy of the Tannaim can be explained only through the legal principles Yesh Bererah and En Bererah. The Gemara assumes that R. Eliezer applied the principle Yesh Bererah; namely, that each of the joint proprietors may choose to consider the joint property as his sole property during the time that he is using it. It is an implied legal condition (*conditio juris*) that "during the time in which I use the joint property, it is my property; during the time that you use it, it is your property," or, as it might also be translated, "That which formerly was undetermined is now—by the partner's act—looked upon as determined" (R. Nissim on Nedarim, *l.c.*). The Gemara furthermore assumes that the opponents

Yesh Bererah and En Bererah.

of R. Eliezer applied the principle En Bererah; namely, that the exercise of such choice is not to be presumed; or (according to Nissim) that which was undetermined beforehand is not considered as determined. What is said here concerning the use of an indivisible estate is also applicable to the use of any fruit-bearing property. Each takes of it what is then considered as having belonged to him according to the principle of Bererah, and therefore the Gemara applies to the use of a common well the arguments in the abovementioned controversy (B.Ḳ. *l.c.*; Beẓah 39b; against R. Nissim compare R. Solomon Luria, in "Yam Shel Shelomoh"). Another example may be taken from the case of fruits. In Syria the fruits of the fields belonging to Jews were subject to tithes and heave-offerings, but fruits of a Gentile bought by a Jew were not. Now, in case a Jew and a Gentile are joint owners of a field in Syria, if each of them is considered the sole proprietor, then, upon division, each receives his original property, and the fruits of the Jew, therefore, are liable for tithe and heave, and those of the heathen are not; but if the division is considered as an exchange, then in the share of both the fruits of the Jew and of the Gentile are mixed.

Concerning this case, there is a controversy between Rabbi and R. Simon ben Gamaliel (Bab. Giṭ. 47a and b; Ḥul. 135b). R. Simon ben Gamaliel permitted the division so that each received his sole property; Rabbi was of the opinion that each received mixed property; and from these opinions it is presumed that R. Simon ben Gamaliel maintained the principle Yesh Bererah, and Rabbi that of En Bererah. In this manner, the Babylonian Talmud ('Er. 36b *et seq.*) explains the Mishnah Demai vii. 4. In the case of untithed fruit, a part of which is intended for tithes and heave-offerings, there is a mingling of sacred portions and profane ("ḥullin"); the profane portions may be taken away and used, and the balance remains as tithes and heave-offerings. The aforesaid Mishnah as well as Mishnah Demai vii. 1 reflect the principle Yesh Bererah. According to the principle of En Bererah, both Mishnahs would be different, and would forbid the use of the fruit until after the tithe and heave had been removed.

Extension.

In the Babylonian Talmud, Raba, who favored the concept "Bererah" (see Tem. 30b), if indeed he was not its author, takes pains to prove that not only R. Meïr, but also R. Jose, R. Simon, and R. Judah accepted the principle Yesh Bererah (in 'Er. 36b "Riṭba" reads "Raba," and not "Rab"; so also the Munich manuscript; see Rabbinowicz, "Diḳduḳe Soferim," *ad loc.*, and compare Rab's opinion in Yer. 'Er. iii. 21b) who does not accept the concept of "Bererah." In the Babylonian Talmud itself Samuel ignores Bererah, B. Ḳ. 9a; while R. Naḥman, the teacher of Raba, accepted En Bererah (Giṭ. 48a; see R. Nissim to Ned. 45b). Raba explains the case in Mishnah 'Er. iii. 5 by means of Bererah. One may say, "If the instructor [ḥakam] comes to this side, my 'erub [removal of residence on Sabbath for 2,000 ells] shall be on this side; but if he goes to the other, the 'erub shall be on the other side; if one comes to this side and the other goes to the other side, then that 'erub shall be valid which I shall determine upon tomorrow." From this passage Raba seeks to deduce the principle Yesh Bererah, because the locality of the residence ('erub) was uncertain at the time when the condition according to which it was to be determined was made. If the decision is made on the Sabbath, it is retroactive to the period of the commencement of the Sabbath; just as in the case of the division of joint property where the presumption is that an actual division had already been made *ab initio*; hence this is a case of Yesh Bererah. Most of the commentators take this view (treated later in this article), but there is a distinction between these two cases. In 'Erubin, there is an express condition after the fulfilment of which the matter is absolutely decided; whereas in the case of the division there is no express condition made beforehand, and it is not absolutely determined even afterward, which part, from the beginning belonged to the one joint owner, and which part to the other.

Kinds of Bererah.

This led the Tosafists to distinguish between different kinds of Bererah. Some accepted Bererah where an express condition had been made, others where a doubt is resolved afterward (Tos. to Giṭ. 48a); on the other hand, in the case of the division they adopted the principle En Bererah. Raba did not recognize these distinctions; he considered the division conditioned even if the condition was not expressed (*conditio juris*); see Schürl ("Theilbarkeit als Eigenschaft von Rechten," p. 30), who also calls it conditioned. Abbayi, opposing Raba, calls attention to another distinction. He says the condition "if it shall be my will" can be referred back to Bererah, but not the condition "if this will happen," or "if it shall be the will of another" (תולה בדעת עצמו ותולה בדעת אחרים, "dependent on his own will" and "dependent on the will of others"; Giṭ. 25a *et seq.*). In the latter case the retroactive effect of the condition is generally accepted; the former cases are such instance of Bererah, concerning which there is a controversy. According to Windscheid, i. § 93, the condition, "if it shall be my will," has no retroactive effect. Raba, however, takes pains to prove that the Tannaim who accept Bererah in the one case also maintain it in the other cases, and vice versa. He does not recognize any distinctions, therefore, in the concept Bererah. The commentators ask, "What difference is there according to Raba between the concept Bererah and the retroactive force of a condition?" Such a difference must exist because the retroactive force of the condition is generally accepted on the ground that he who says "on condition" is like him who says "from now on." Rashi (Giṭ. 25b), who raises this question, is of the opinion that only conditions within man's power to fulfil or not to fulfil have retroactive effect according to general opinion, but not such conditions as are in the power of him who is master over life and death, as, for example, "if I die from this disease." In these cases retroaction can only be adopted on the principle Yesh Bererah. But in this case Bererah contains the idea of predestination; that which has

Retroactive Force of Conditions.

Bererah and Condition.

actually occurred has already been predetermined by Providence. But it is clear that such a view must be kept out of the field of law. Naḥmanides sets up the following distinction between Bererah and the retroactive force of a condition: Simple conditions have retroactive force even according to the principle En Bererah, whereas a double condition works retroactively only according to the principle of Yesh Bererah. The distinction is clear. If one makes a simple condition, his will is directed toward something definite which merely requires the fulfilment of the condition; but if one makes a double condition, he wants either one thing or another, he vacillates, and therefore the idea of Bererah must be brought into requisition in order to cause retroactive effect. This view of Naḥmanides, however, is not satisfactory, and therefore his distinction between "Bererah" and the "retroactive force of the condition" is rejected (see Luria, *l.c.*); but the idea of Naḥmanides is correct and merely requires amendment: it is the only correct one, following the view of Raba. If one says to a woman, "I marry you on condition that your father consents," the act is an alternative juridical act. If the condition is fulfilled, the marriage is valid; if the condition is not fulfilled, the union is unlawful; but it has certain legal consequences, for Jewish law does not recognize the maxim "Pater est quem nuptiæ demonstrant." In this case, therefore, there is a double condition, and, nevertheless, after being fulfilled, it has retroactive force exactly as in the case in Mishnah Demai vii. 4, where one may eat only on condition that that which was last taken out is presumed to have been "terumah" from the beginning. The opponents of this view who maintain that the marriage is valid in any event, even if the father does not give his consent, must assume the principle En Bererah, because it is possible to consent only to something definite. In a like manner, there is a double condition in the case, "Here is your bill of divorce, to take effect if I die from this disease," if the view is accepted that the wife remains a lawful wife up to a moment before the death of the husband. The conditions are first, "You shall remain my wife up to a moment before my death," and second, "The bill of divorce shall be effective a moment before my death." His will, therefore, is divided, and nevertheless there is a retroactive effect; hence, the principle Yesh Bererah is in action. If his will were only directed toward the divorce, the effect would be that the marriage would be *in suspenso*; and since that is not the case, it follows that the principle Yesh Bererah is invoked. In this manner, it seems, Raba has distinguished "Bererah" from "the retroactive force of a condition," and only in this manner can the etymology and translation of the word be fixed.

Etymology and Translation.

Since the commentators joined in the views of Rashi concerning the discrimination between the personal and the elementary nature of the conditions, they necessarily must find nothing else in the word "Bererah" than "retroactive force of condition." Bererah is, according to this view, a special form of the retroactive force of conditions which is accepted by some and rejected by others. The word, therefore, must be explained through the assistance of other words: הוברר הדבר למפרע, "the matter has been made clear with regard to the past"; and the translation of the word would imply its secondary meaning, because ברר means, in the first place, "to choose," "to select"; as for instance, בורר אוכל מתוך הפסולת, "to select the edible from the inedible." In its derived meaning it also means "clear," "clean," "positive." Bererah might be translated "certainty"; *i.e.*, that which was formerly doubtful is now certain; but this idea is also contained in the notion of the retroactive force of condition, and the word "Bererah" would not cover that special meaning which it was intended to express. In the Jerusalem Talmud, there is a phrase which covers "retroactive force of condition" (Demai vi. 25d, and elsewhere), זה חלקו המגיע לו משעה ראשונה, "this, his share, was his from the first moment." According to Rashi, the word "Bererah" ought to be translated as predestination; but this idea is not in the word. But, in fact, "Bererah," derived from ברר, "to choose," "to select," means "choice." "Yesh Bererah" means "he has the choice"; that is to say, one can make a double condition and afterward choose one or the other; or through the fulfilment of the condition, whichever it may be, one thing or the other is determined. "En Bererah" means that one can not make a double condition, so that afterward one of the two may be determined. This was the view of the Babylonian Talmud as shown in Yoma (55b), where it is argued, "let him choose four zuzim," etc. Likewise in another place (Tem. 30a; Bek. 57a), "let him take one out, and the others will be permitted." It is true that Levy and, following him, Kohut explain the word to mean "choice," but this translation of the word will not be of help in the Gemara, unless the above-explained view of Naḥmanides is borne in mind. Jastrow, therefore, gives a twofold translation, "choosing or a subsequent selection"; "retrospective designation." According to the above-mentioned explanation, the word "choice" is sufficient. The fact that a condition is retroactive is assumed, and is not expressed in the word; since this is characteristic of all conditions.

Application in Practise.

Undoubtedly, in practise, Raba has applied the concept of Bererah without distinction. Rabbi Isaac, the Tosafist, maintains that in every case a decision can be rendered according to Raba; namely, on the principle Yesh Bererah. R. Tam at first also decided in this manner, but later he departed from it (see Tosafot to Tem. 30a, and parallels in marginal notes). In the Gemara (Beẓah 37b *et seq.*), Mar Zuṭra is of the opinion that inasmuch as there is a difference of opinion concerning Bererah, the rule of decision should be "In Biblical commands, En Bererah; in rabbinical commands, Yesh Bererah"; and in this manner Maimonides also decided ('Er. viii. 7), although many contradictions appear in his work that can not all be reconciled by his interpreters (see Luria, *ib.* 36b; and "Sha'agat Aryeh," No. 89). Rabbi Joseph Caro (Shulḥan 'Aruk, *l.c.*) also notes this division; namely, "In rabbinical commands, Yesh Bererah, and in Biblical commands, En Bererah." One rather illogical exception is made in the case of a Biblical command; namely, in the case mentioned in Ned. (*l.c.*), because it is said to differ from other cases of Bererah (see R. Solomon Luria).

Unknown in Palestinian Halakah.

The Palestinian Halakah is closer to Roman legal concepts than is the Babylonian, and in spite of all separation from that which was foreign, Roman legal concepts current among the people unconsciously forced their way into the Palestinian Halakah, although the rules of law of the two systems differed.

In Roman law, the difference between movable and immovable property shows itself in the concept of divisibility of property. Immovable property can be divided, and movable property can not (*pars pro diviso, pars pro indiviso*). In the case of immovable property an actual division is possible; in the case of movable property only a theoretical or ideal division can be made. Actual division of quantities and genus is likewise possible (*numero fit divisio*), because the value of equal parts remains the same; (see Waechter, "Archiv für die Civilistische Praxis," xxv. 155 *et seq.*); but this rule applies only to obligations and not to joint property. The division of joint property, is looked upon as an exchange (*permutatio*). In place of the formerly undetermined property, each of the joint proprietors receives from the other, by exchange, certain determined property (see Savigny, "Obligationenrecht," i. § 30, and likewise other well-known jurists quoted in "Monatsschrift," 1900, *l.c.*).

The Palestinian Halakah likewise distinguishes between joint property in divisible and in indivisible things. This distinction is found in the above-mentioned controversy, in the case of a vow of abstinence by the joint proprietors from any enjoyment of each other's property; and in the other controversy, concerning tithes and heave-offerings in the case of joint property of Jew and Gentile in Syria. The Babylonian Talmud uses these as its principal supports for the controversy concerning Yesh Bererah and En Bererah. In Yer. Demai vi. 25d the latter controversy is discussed, and the Halakah is as follows: In case of a division of heaps of sheaves or even the threshed grain, it is undisputed that in each stalk or each grain there is common property, but in the case of a division of growing grain, there is a controversy between Rabbi and R. Simon ben Gamaliel. The former maintains that in this case also the community of property exists in every single stalk, and the latter maintains that each joint proprietor obtains his separate property.

R. Simon ben Gamaliel's principle is the following: The field being divisible (*pars pro diviso*; (see Joint Owners), there is an implied condition (*conditio juris*) among the joint proprietors that whichever of the two halves falls to the share of either one shall be presumed to have been his from the beginning. This is an alternative condition with retroactive force. This is the meaning of the maxim: "This, his share, was his from the first moment." The Palestinian Halakah has not distinguished the condition "if it shall be my will" from other conditions. Köppen ("Jahrbuch für Dogmatik," xi. 280) maintains that according to Roman law such a condition has retroactive force; so also Derenbourg ("Pandekten," p. 258, § 108, Berlin, 1896). Thus (Yer. 'Er. iii. 21b) the condition, "I may go whithersoever I may desire," is considered a condition with retroactive force. In Yer. Giṭ. iii. 44d, the case cited in the Mishnah—a bill of divorce written for one of two wives of the same name to be determined at the will of the husband—is considered invalid, because a bill of divorce may, under no circumstances, be written conditionally, otherwise the maxim of the law would apply, "that it was written for her from the first moment"; to wit, the condition has retroactive force. In the case of the division of a field, R. Simon ben Gamaliel held such condition to be necessarily implied. Rabbi does not consider such condition valid even if it is actually expressed, because, according to him, the joint property exists not only in that part which is divisible, but in each separate stalk, whereby division becomes impossible. R. Simon ben Gamaliel therefore had to admit that in case a division of a heap of grain is attempted, the joint property continues in every stalk or in every grain, whereby actual division becomes impossible.

Case of Joint Property.

In Roman law, the rule is, If the grain of two proprietors is mixed with their consent, "communio" exists, and it cannot be divided. "Quod si frumentum Titii frumento tuo mixtum fuerit, si quidem ex voluntate vestra commune est, quia singula corpora, id est singula grana, quæ cujusque propria fuerunt ex consensu vestro communicata sunt"; § 28 J. de rerum divisione, 2, 1.

The same controversy would exist even if there was joint property in two separate equal heaps of grain, or two equal pieces of the same kind of property, because, in this case, we have *partes pro diviso*; each part being a body for itself. R. Johanan and R. Eleazar dispute concerning this case (Yer. Ḳiddushin i. 60d; compare Demai, *l.c.*). R. Johanan decided, like Rabbi, that, even in the case of divisible things, community remains in every single piece or heap. R. Eleazar decides like R. Simon ben Gamaliel, "This, his share, was originally his." But it is undisputed that if there is joint property in a *single* heap of grain, it is indivisible, because the joint property exists in every grain (compare Yer. Demai vi. 25d). The same relation exists in the case of a courtyard held in common. Here, also, a distinction is made whether it is divisible or indivisible. According to Yer. Ned. v. 39a, it is undisputed that if the courtyard is indivisible, the joint proprietors that have through vows mutually resolved to abstain from enjoyment of one another's property may not step into the courtyard (Mishnah Ned. v. 1). The conflict between the general opinion and the view of R. Eliezer ben Jacob exists only if the property is divisible. According to the former view, every square inch of the courtyard is joint property, and therefore may not be divided. In order that they may step into this courtyard, joint proprietors must transfer their right to a third person. R. Eliezer ben Jacob is of the opinion that each joint proprietor has an undetermined half-interest in the entire property, and, through *conditio juris*, each joint proprietor obtains, after the division, his original property. This controversy is exactly like that between Rabbi and R. Simon ben Gamaliel.

Mishnah Demai vii. 2 is explained in Yer. 26b without controversy on the principle that the condition has retroactive force (מכבר לכישאישתה).

The Babylonian Halakah, by setting up the concept Bererah, went far beyond the Palestinian and read this concept into the controversy of the Tannaim. According to the Jerusalem Talmud, the division of indivisible things in the case of joint property is not permitted; according to the Babylonian, it is permitted in the case of rabbinical prohibitions (see an example in "Sha'agat Aryeh," *l.c.*). According to the Jerusalem Talmud, such a distinction can not be drawn because, following it, the division of indivisible things contains a contradiction, which makes its application equally impossible for rabbinical and Biblical law. Moreover, the controversy between Rabbi and R. Simon ben Gamaliel actually refers to a rabbinical prohibition.

Roman and Modern Law.

But although the Babylonian Talmud's interpretation of the controversy of the Tannaim must yield to that of the Jerusalem Talmud, the concept Bererah, as such, is nevertheless juridically and logically justifiable. Roman law is not abstractly logical. The Roman law, it is true, establishes the proposition "Dominium plurium in solidum esse non potest," and most of the jurists, starting out with this proposition, take the stand that according to Roman law, in the case of joint property, the right is divided and the division is looked upon as *emptio*. Göppert explains this view clearly and convincingly ("Beiträge zur Lehre vom Miteigenthum," Halle, 1864). Other doctors of the law, such as Steinlechner, Windscheid, and Eisele, explain joint property as separate property even according to Roman law. Without venturing to express an opinion on Roman law, the statement of Unger seems convincing that there was an evolution in the law. He writes ("Jahrbuch für Dogmatik," xxii. 289):

> "A twofold point of view is possible: either theoretically divided property and divided security, or joint property and joint security. In the first case, it is assumed that there are several joint proprietors *pro indiviso*; in the latter case, that all together as one (*unius loco*) have property in the thing. The first point of view was that of the older Roman law, the latter is that of the later Roman law and of modern law, so far as it recognizes suretyship in cases of joint property."

A similar evolution took place in Talmudic law. The Palestinian Halakah takes the point of view that the joint proprietor, particularly of indivisible things, has a theoretical share in the article. It considers division as a purchase or an exchange. In the later Babylonian Halakah (through Raba) the joint proprietor is looked upon as sole proprietor who after the division receives his original property. It did not assume in joint property, consisting of many similar units, that each unit was joint property and had to be divided—division of the property and division of right are the same—but considered that the one-half of the bulk belonged to the one, and the other half to the other, and each one while using the joint property was presumed to be using his own property, and on division received what was always his property (Tos. Giṭ. 48a).

The difference between the views of the deciders of the responsa and the older authorities is particularly noticeable because the former say that in the case of indivisible joint estate, the vow of the joint proprietor has no force because they have assumed the obligation that one may use the share of the other; but, according to the older conception, the partnership relation contains no such idea of obligation and can be ended at any moment. This is the idea of the Jerusalem Talmud.

The concept Bererah is known in French law. Göppert (*ib.* pp. 64, 65) states: "In French law, the essence of the division of joint property did not consist in a mutual changeable contract, but rather in an *acte determinatif*, by which it was established what portion of the joint property the joint heir really inherited, from which arose the legal presumption that the property which fell to his share at the division was deemed to have been his from the beginning. A remarkable coincidence! There being no inherent contradiction in the concept Bererah, the Babylonian Halakah, modifying the older view, established the compromise that in Biblical commands the principle En Bererah is followed, and in rabbinical commands Yesh Bererah. But the interpretation of the Babylonian Talmud of the dicta of the Tannaim contains innumerable contradictions, and is a shoreless ocean in which the commentator is lost. By distinguishing between the Palestinian Halakah and the Babylonian, it is believed that the matter has been made clear.

Bibliography: R. Nissim to *Ned.* 45b; Solomon Luria, in his work *Yam Shel Shelomoh* to *B. K.* 31, pp. 34–40, Sdilkow, 1836. At the end he enumerates thirty cases referring to Bererah and arranges them in four classes. R. Judah Benjamin Rapoport, in his work *Simlat Benjamin*, pp. 23–27, Dyhernfurth, 1750, criticizes Luria's disquisition. R. Isaac Lampronti, in his work, *Paḥad Yiẓḥak*, Venice, 1749, *s.v.*, enumerates most of the passages of the Babylonian Talmud, and also refers to the literature of the responsa. R. Baruch Benedict Goitein, in *Kesef Nibḥar*, Lemberg, 1867, classifies and discusses most of the passages together with the codes of Maimonides and *Shulḥan 'Aruk*, and he finally distinguishes three classes of Bererah. R. Abraham Tiktin wrote a comprehensive article on this subject in his book *Petaḥ ha-Bayit*, pp. 16b–22a, Dyhernfurth, 820; he goes into detailed discussion and attempts to solve numerous contradictions by pilpulistic methods of argument. R. Jacob Ẓebi Jollesch, in his book *Melo ha-Ro'im*, Warsaw, 1880, has gathered all the material and has mentioned the various rabbis that adopted the principle Yesh Bererah and those that adopted the principle En Bererah. Aryeh Löw, the author of *Sha'agat Aryeh*, Brünn, 1797, treats of Bererah in numbers 89 to 93, pp. 67–70; finally R. Elijah Wilna, on *Oraḥ Ḥayyim*, 413, 1, has an excellent summary of the various views concerning Bererah. He is the only one of all the above-named commentators and authors of responsa who suggests the difference in the conception of Bererah between the Jerusalem and the Babylonian Talmud (*Yoreh De'ah*, 331, 27); *Monatsschrift*, 1869, pp. 369–377; Auerbach, *Das Jüdische Obligationenrecht*, Berlin, 1870, pp. 529 *et seq.*, 1900, p. 50, note 1 (note 2, *ib.*, must be corrected according to the above views). The lexicons of the Talmud (*s.v.*) of Levy, Kohut, and Jastrow.

BERESHIT. See Genesis.

BERESHIT RABBAH (called also by the ancients **Bereshit derabbi Osha'yah [Hosha'yah], Bereshit rabbah derabbi Oshaya [Hoshayiah], Bereshit derabbi Hosha'yah rabba, Baraita derabbi Osha'ya**): Expository Midrash to the first book of the Pentateuch, assigned by tradition to the amora Hoshaiah, commonly Osha'yah, who flourished in the third century in Palestine. The Midrash forms a haggadic commentary on the whole of Genesis, in keeping with the character of the Midrashic exegesis demanded by that age. In a continuous sequence, broken only toward the end, the Biblical text is expounded verse for verse, often word for word; only genealogic passages, and such as furnish no material for exposition (as the reiterated account of Abraham's servant in Gen. xxiv. 35-48), are omitted.

Its Simplicity and Sublimity.

The Bereshit Rabbah contains many simple explanations of words and sentences, often in the Aramaic language, suitable for the instruction of youth; and also the most varied haggadic expositions popular in the public lectures of the synagogues and schools. According to the material or the sources at the disposal of the editor of the Midrash, he has strung together various longer or shorter explanations and haggadic interpretations of the successive passages, sometimes anonymously, sometimes citing the author. Again, he adds to the running commentary longer haggadic disquisitions or narratives, connected in some way with the verse in question, or with one of the explanations of it—a method not unusual in the Talmud and in other Midrashim. The first chapters of Genesis, on the creation of the world and of man, naturally furnished especially rich material for this mode of exegesis. Whole sections are devoted to comments upon one or two verses of the text. Many references to contemporary philosophical thought are made with the purpose of refuting the opinions of the heretics. References to contemporaneous conditions and historical events also occur; indeed, it is characteristic of the Midrash to view the personages and conditions of the Bible by the light of contemporary history. Though the stories embraced in Genesis furnished little occasion for comments on legal topics, Bereshit Rabbah contains a few short halakic sentences and quotations taken from the Mishnah and other sources. This Midrash is eminently rich in sublime thoughts and finely worded sentences, in all kinds of parables, in foreign words, especially Greek, used freely and intentionally for the sake of elegance of diction. Some Greek words, to be found nowhere else in Jewish literature, have been preserved in the Bereshit Rabbah (*e.g.*, קונדילין, *κόνδυλος*, section i. in 'Aruk and MSS.; אליותרופולים. *'Ελευθερόπολις*, section xli. (xlii.) in 'Aruk, corrupted in editions).

Form.

This extensive and important Midrash, which forms a complete commentary on Genesis, and exemplifies all points of Midrashic exegesis, is divided into parashiyot (sections, chapters); and derives its peculiar character from the proems which head these sections; it is by these means distinguished from the tannaitic Midrashim to the other books of the Pentateuch, such as Mekilta, Sifra, and Sifre. Every chapter of the Bereshit Rabbah is headed by the first verse of the passage to be explained, and is introduced, with few exceptions, by one or more prefatory remarks starting from a verse taken from another Biblical passage as text—generally from the Hagiographa. By various explanations of these texts a transition is effected to the exposition of the particular verse of Genesis heading the parashah. There are in the Bereshit Rabbah (i.-xcvi.) about two hundred and thirty of these passages. A part of them—about seventy—are cited with the name of the haggadists with whom they originated or whose explanation of the verse in question was used as an introduction to the parashah of the Bereshit Rabbah: as in section i. the six prefatory passages of R. Osha'yah, R. Huna in the name of Bar Kappara, R. Judah b. Simon, R. Isaac, R. Joshua of Siknin, in the name of R. Levi, and R. Tanḥuma.

Introductory Passages.

The greater number of these passages are anonymous and may perhaps be ascribed in part to the author of the Bereshit Rabbah: they begin with the verse of the text, which very often stands at the head of the proem without any formula of introduction—more frequently so in the best manuscripts than in the editions. The structure of the prefatory passages is as various as their execution and their extent. In some only the introductory text is given, its application to the verse of Genesis to be expounded being self-evident or being left to a later working out. The single prefaces, of which there is a large number, contain explanations of their text which refer entirely or in its last part to the verse or passage of Genesis to be expounded in that parashah. The composite introductions consist of different expositions of the same Biblical verse, by different haggadists, strung together in various ways, but always arranged so that the last exposition—the last link of the introduction—leads to the exposition of the passage of Genesis, with the first verse of which the introductions often close. For these introductions, which are often quite lengthy, the material for the several expositions was ready at hand. The original work on these passages consisted principally in the combining and grouping of the several sentences and expositions into a coordinate whole, always so arranged that the last member forms the actual introduction to the exposition of the parashah. Definitely characterized as they are in their beginning by these introductions, the parashiyot of the Bereshit Rabbah have no formal ending, although several show a transition to the Biblical passage that is expounded in the following parashah.

The Principle of Division.

In the manuscripts, as well as in the editions, the parashiyot are consecutively numbered; in very many quotations in the 'Aruk the passage of the Bereshit Rabbah is mentioned by the number of the parashah. The total number of the parashiyot, both in the manuscripts and in the editions, varies from 97 to 101. Nearly all the manuscripts, however, as well as the editions, agree in counting 96 chapters, up to the exposition on Gen. xlvii. 28 *et seq.* inclusive (beginning of the pericope Wayeḥi); and to this point the best manuscripts, as well as the 'Aruk and Yalḳuṭ, differ only in a few parashiyot from the division of the chapters in the editions. Hence the counting by chapters or sections is to be considered much older than has been assumed. The principle of division followed in the parashiyot of the Bereshit Rabbah was evidently that of the Biblical text itself as fixed at the time of the compilation of this Midrash, in accordance with the "open" (פתוחות) and "closed" (סתומות) paragraphs of Genesis. There are separate parashiyot in the Midrash to almost all these sections as they are still found in Genesis, with the exception of the genealogical passages. But there are parashiyot that bear evidences of relation to the pericopes ("sedarim") of the Palestinian triennial cycle, and a careful investigation of these may lead to the discovery of an arrangement of sedarim different from that heretofore known from old registers. However, there are parashiyot, as mentioned above, especially in the beginning of the Midrash, in which only one or a few verses at a time are expounded. The sedarim of the customary one-year cycle are not regarded at all in the divisions of the Bereshit Rabbah, neither are they marked in the best manuscripts or in the *editio princeps* of the Midrash; the parashiyot, therefore, can not be regarded as mere subdivisions of the sedarim, as which they appear in later editions of this Midrash.

Material.

Far more difficult than any question concerning the outward form of the Bereshit Rabbah is that of deciding how much of its present contents is original material included in it, and how much of later addition. The parashiyot formed the framework that was to contain the exposition of a number of Biblical verses in continuous succession.

But with the notoriously loose construction of the haggadic exegesis it became easy to string together, on every verse or part of a verse, a number of rambling comments; or to add longer or shorter haggadic passages, stories, etc., connected in some way with the exposition of the text. This process of accretion took place quite spontaneously in the Bereshit Rabbah, as in the other works of the Talmudic and Midrashic literature; between the beginning and the completion of these works—if ever they were completed—a long period elapsed during which there was much addition and collection.

The tradition that R. Hosha'yah is the author of the Bereshit Rabbah may be taken to mean that he began the work, in the form of the running commentary customary in tannaitic times, arranging the exposition on Genesis according to the sequence of the verses, and furnishing the necessary complement to the tannaitic Midrashim on the other books of the Pentateuch. The ascription of the Mekilta to R. Ishmael and of the Jerusalem Talmud to R. Johanan rests on a similar procedure. Perhaps the comments on Genesis were originally divided into parashiyot that corresponded with the above-mentioned sections of the text, and that contained the beginnings of the simplest introductions, as indeed the first traces of such introductions are found also in the tannaitic Midrash. But the embellishment of the parashiyot with numerous artistic introductions—which points to a combination of the form of the running commentary with the form of the finished homilies following the type of the Pesikta and Tanhuma Midrashim—was certainly the result of the editing of the Bereshit Rabbah that is now extant, when the material found in collectiosn and traditions of the haggadic exegesis of the period of the Amoraim was taken up in the Midrash, and the Bereshit Rabbah was given its present form, if not its present bulk. Perhaps the editor made use also of different collections on the several parts of Genesis. The present Bereshit Rabbah shows a singular disproportion between the length of the first sidra and that of the eleven others. The sidra Bereshit alone comprises twenty-nine parashiyot, being more than one-fourth of the whole work. Is there not a possibility that the present Bereshit Rabbah is a combination of two Midrashim of unequal proportions; and that the twenty-nine parashiyot of the first sidra—several of which expound only one or a few verses—constitute the extant or incomplete material of a Bereshit Rabbah that was laid out on a much larger and more comprehensive scale than the Midrash to the other sidrot?

Origin of Name.

The work may have received its name, "Bereshit Rabbah," from that larger Midrash at the beginning of Genesis, unless that designation was originally used to distinguish this Midrash from the shorter and older one, which was ascribed to R. Hoshayah. The opinion that the name of the Midrash finds its explanation in the first words, "R. Hosha'yah rabbah began," etc., as if the word "rabbah" belonged originally to the name of the amora, and that the name of the work, "Bereshit Rabbah," is an abbreviation of "Bereshit derabbi Hoshayah rabbah," is untenable for the reason that in the best manuscripts—and in a very old quotation—the name "R. Hoshayah" stands without the addition "rabbah" in the first preface at the beginning of the Midrash. It would be singular if the authorial designation had been lost and yet the attribute had remained in the title of the Midrash.

Date.

It is difficult to ascertain the exact date of the actual editing of the Bereshit Rabbah; it was probably undertaken not much later than that of the Jerusalem Talmud. But even then the text was probably not finally closed, for longer or shorter passages could always be added, the number of prefatory passages to a parashah be increased, and those existing be enlarged by accretion. Thus, beginning with the sidra Wayishlah, extensive passages are found that bear the marks of the later Haggadah, and have points of connection with the Tanhuma homilies. The passages were probably added at an early date, since they are not entirely missing in the older manuscripts, which are free from many other additions and glosses that are found in the present editions. In the concluding chapters the Bereshit Rabbah seems to have remained defective. In the parashiyot of the sidra Wayiggash the comment is no longer carried out verse by verse; the last parashah of this pericope, as well as the first of the sidra Wayehi, is probably drawn from Tanhuma homilies; the comment to the whole 48th chapter of Genesis is missing in all the manuscripts (with one exception), and to verses 1-14 in the editions; the remaining portion of this sidra, the comment on Jacob's blessing (Gen. xlix.), is found in all the manuscripts—with the above-mentioned exceptions—in a revision showing later additions, a revision that was also used by the compiler of the Tanhuma Midrash edited by Buber.

The best manuscript of the Bereshit Rabbah is found in the Codex Add. 27,169 of the British Museum, London; it was used for the critical edition issued by J. Theodor.

On this and other manuscripts compare: J. Theodor, "Der Midrash Bereshit Rabbah," in "Monatsschrift," xxxvii. 169 *et seq.*, *ib.* 211 *et seq.*, 452 *et seq.*; xxxviii. 9 *et seq.*; xxxix. 106 *et seq.*; variants of the

Bereshit Rabbah in 'Aruk, Yalkut, and MSS.; on the division into chapters, *ib.* xxxix. 481.

J. SR. J. T.

BEREZA (Cartuskaya Bereza): Town in the district of Pruszhany, government of Grodno, Russia; situated on the river Jazelda, on the road between Brest-Litovsk and Bobruisk. The Jewish population in 1890 was 850, out of a total of 2,625.

Jews first settled in Bereza in 1629, as is evident from a document registered by Solomon Michailevich, superintendent of the Jewish congregation of Brest-Litovsk, at the city hall of that place, April 18, 1680. In this document Grand Duke Sapieha (1557-1633), hetman and chancellor of Lithuania, declares to his officials of Bereza and to his heirs that, as he desires that Jews shall settle in Bereza, he grants them the privilege of building there a house of prayer where they can hold their divine service undisturbed. They shall have the right to build houses and ornament them according to their desire, and shall enjoy all the privileges granted to the Jewish inhabitants on his other estates, as Rozhana and Kosov. All these rights are also to be granted by his heirs. After the signature of Leon Sapieha on the original document is added a confirmation of the contents in the handwriting of his son, Cazimir Leo Sapieha (1609-56).

H. R.

BEREZINO: Village of Russia, in the government of Minsk, having a population (1898) of 1,900, almost exclusively Jews (1,824). About 25 per cent of them are artisans and laborers, chiefly loaders. Twenty-four Jewish families are engaged in gardening. The general economic condition is bad. Upon the introduction (June 14, 1897) of the government monopoly in the wine trade, 99 Jewish families were left without means of subsistence; 155 families depended upon charity for fuel; 210 applied in 1898 for charity during the Passover of that year; and the number of such applicants increases annually.

H. R. S. J.

BERG: An independent duchy until 1815; at present part of the Prussian Rhine province. Jews settled here at an early period. In 1298 Count Wilhelm of Berg protected them against the hordes led by RINDFLEISCH. At the time of the Black Death in 1349 many were killed by the Flagellants. Many of the Jews driven from Cologne settled in Berg. The rabbi of Cologne, "Pruno Soeskind," settled at Deutz, others went to Siegburg, and still others to Mülheim-on-the-Ruhr. A synagogue was at that time organized at Deutz, the cemetery being outside of the "Severinthor" of Cologne until in 1629 the electoral government presented to the Jews a burial-place.

Even in early times a community had existed at Siegburg, which paid to the abbot a certain sum as protection money (*Geleitgeld*), the Jews being also required to take part, like other citizens, in guarding the gates. The chief of the community acted as its judge, only criminal cases being brought before the abbot. The Jews of Siegburg were slain in 1287 on the accusation of having killed a boy, Johänneken, who was afterward canonized by the Church. Often to their detriment the Jews of Siegburg aided the archbishop and the city of Cologne with money. In 1334 Archbishop Walram killed Meyer of Siegburg and his son Joelman, and confiscated their property.

The ghetto and synagogue at Mülheim lay in the lower part of the city, on the Rhine; the Jews burying their dead at first in the cemetery at Cologne, and afterward at Deutz. Since 1774 they have had a cemetery of their own. The settlement at Kaiserswerth also dates back to an early period. During the "Soest quarrel" 1,445 horsemen from Cleves invaded Mülheim and Deutz, plundering and carrying off the richest Jews. About 1,400 Jews of Siegburg barely escaped annihilation, a gipsy woman having accused them of a murder. In 1588 the community of Deutz suffered by fire. In 1583 they fled before the troops of Archbishop Truchsess von Waldenburg (who tried to regain his diocese, from which he had been deposed) to Cologne; again, in 1631, before the Swedes, and were temporarily received back on payment of large sums of money. In 1665 some students plundered the Jewish houses in Deutz. In the seventeenth century the Jews of Siegburg were forced to entertain troops contrary to the stipulations of their charter. A Jew, David, was compelled in 1663 to pay the regular taxes, in addition to the eight gold guldens, protection money, he was already paying. The community of Deutz paid one-seventh of all

30

the taxes; that of Mülheim, as much as any one who owned three "morgen" of land. Lazarus van Geldern became court factor at the court of the principality of Jülich-Berg in 1727. In 1755 the Jews suffered by a violent earthquake, and in 1784 by the floods of the Rhine, during which the synagogue was destroyed. A new synagogue at Deutz was consecrated in 1786, and one at Mülheim two years later. On the advent of the French army all the restrictions placed upon the Jews, such as poll-tax and protection money, were abolished. In 1808 there were 2,905 Jews at Düsseldorf, 1,264 at Cologne, and 1,552 at Cleves.

Rabbi Süsskind, mentioned above, was succeeded by Vivis, well known from his opposition to the resolutions of the synod of Bingen, under Seligmann Bing Oppenheim, at the beginning of the fifteenth century. Vivis was also physician to the duke of Berg. The seat of the district rabbinate was transferred from Deutz to Bonn in the sixteenth century. At this time there also lived at Deutz the physicians Sander (who had permission to visit Cologne) and Solomon ben Isaac Joseph (1560–1631). The latter's son, also a physician, died in 1657. In the seventeenth century the physicians Judah Loeb ben Nathan (died 1670), Jacob ben David (died 1688), Jeremiah ben Solomon of Coblenz (died 1688), and a woman physician named Vögele (died 1731) lived at Deutz, as well as the scholars Kossmann Levi of Essen, and Moser. The latter was the son-in-law of Rabbi Judah Maehler of Cologne, and author of several works.

Among the rabbis of Düsseldorf may be mentioned Samson Levi Fröhlich (1706–50), Mordecai Halberstadt (1751–69), Jacob Brandeis (1769–74); and Judah Loeb Scheuer (1779-1821). Isaac Bonem Rappoport was district rabbi. Jacob Kopenhagen wrote a small book on the floods of the Rhine in 1784.

D. A. F.

BERGAMO: City in northern Italy. Here, as in other cities subject to the government of the Venetian republic, the right of residence was granted to Jews, who were chiefly engaged in money-lending. Documents relating to the Jews, and dating back to 1479, are preserved in the City Library and in the municipal archives. But Jews were certainly in Bergamo before that time. They are found in the large neighboring village, Martinengo, where they could own land and houses ("Archivio di Stato Veneto, Senato, Terra," *reg.* 16, *carte* 25). In 1507 a decree was issued compelling Jews to wear a yellow girdle or a red hat. Neither in Bergamo, in Martinengo, nor in any other of the surrounding places are they known to have formed a congregation. They may have had a synagogue and a cemetery, but no traces of these remain. There are no longer any Jews at Bergamo.

D. V. C.

BERGEL, JOSEPH: Neo-Hebraic writer of the first part of the nineteenth century. He was a private teacher at Prossnitz, Moravia. In 1826 and 1827, he published some articles and poems in the annual "Bikkure ha-'Ittim" (vi. 40, 50; vii. 3, 123, 133, 135). The best of these are the articles, "Hash-'arat ha-Nefesh" (The Immortality of the Soul) in vii. 3–12, and the poem "'Al Ḳeber Abi" (On the Grave of My Father) in vii. 123. He translated a few of Confucius' sayings into Hebrew from the French.

S. I. Ber.

BERGEL, JOSEPH: Judæo-German writer, probably of the seventeenth century. He was the author of "Ein Schön Göttlich Lied," a religious poem. It seems to have been printed at Prague in the seventeenth century as an addition to the poem "Jüdischer Stamm" by Joseph ben Judah Heilbronn.

Bibliography: Steinschneider, *Cat. Bodl.* col. 563.

G. I. Ber.

BERGEL (BERGL), JOSEPH: Hungarian physician and author; born Sept. 2, 1802, at Prossnitz, died 1885 at Kaposvar. He was well versed in rabbinical and modern Hebrew literature, and attempted to introduce a new meter into Hebrew poetry in a work he published under the title "Pirḥe Leshon 'Eber" (Hebrew songs), Gross-Kanizsa, 1873. In the German language he wrote: "Studien über die Naturwissenschaftlichen Kenntnisse der Talmudisten," Leipsic, 1880; "Die Eheverhältnisse der Alten Juden im Vergleich mit den Griechischen und Römischen," *ib.* 1881; "Der Himmel und Seine Wunder, eine Archäologische Studie nach Alten Jüdischen Mythografien," which was also published in Leipsic in the same year under the title "Mythologie der Alten Hebräer," 1882. His most important work is "Die Medizin der Talmudisten" (Leipsic and Berlin, 1885), with an appendix on anthropology as it is found in ancient Hebrew writings. These works are not very profound, but they bring together a certain amount of useful information. Bergel also wrote "Geschichte der Juden in Ungarn," published in 1879 in Hungarian and German.

S. P. Wi.

BERGEL, YOM-ṬOB: Merchant and communal worker of Gibraltar; born in 1812; died at Gibraltar Oct. 14, 1894. He was one of the wealthiest and most respected merchants of the Gibraltar Jewish community, and for thirty years held the position of president of the Hebrew community. He rendered many communal services; reorganized the Hebrew Poor Fund when it was in a very precarious state; and as one of the trustees of the Jewish estates in Gibraltar acquired, by his efforts, valuable possessions for the benefit of the poor among his coreligionists. Bergel was one of the first members of the Board of Sanitary Commission, a member of the Exchange Committee, and took an active part in the management of the Relief Fund at the time of the cholera epidemic in 1865.

J. G. L.

BERGER, EMILE DE: Austrian oculist and medical author; born at Vienna Aug. 1, 1855. He received his education at the University of Vienna.

From 1882 to 1887 he was lecturer at the University of Gratz, and from 1890 to 1896 professor of ophthalmology at Paris. Berger, who, in 1882, was the inventor of an ophthalmoscope having an automatic action of two Rekoss disks, won the Prix Montyon in 1888, and the Prix Rémusat in 1892, for researches in this line of work. He was also the president of the ophthalmic congress held in Paris in 1894.

Berger is the author of: "Gehirn und Retina der Anthropoiden," 1878; "Der Hornhautspiegel," 1886; "Krankheiten der Keilbeinhöhle und des Siebbeinlabyrinthes," 1886; "Beiträge zur Anatomie des Auges," 1887; "Chirurgie des Sinus Sphenoidalis," 1890; "Les Maladies des Yeux dans Leurs Rapports avec la Pathologie Générale," 1892.

BERGER, ERNST: Austrian painter; brother of the oculist Baron Emile Berger; born at Vienna Jan. 3, 1857; educated at the gymnasium, the commercial high school, and in 1874 at the Academy of Arts of his native town. Though intended by his father for a commercial career, he soon turned to the study of painting. He became the pupil of Professor Eisenmenger and the painter Hans Makart. Under the latter's direction Berger painted the pictures "Fondaco de' Turchi in Venedig," exhibited at the Vienna Künstlerhaus in 1882; "Burial of Sarah in the Cave of Machpelah"; and "Rebekah Leaving Her Father's House." Since 1882 Berger has lived and worked in Munich. His chief productions are "Traum vom Jungbrunnen," 1886, which obtained the silver medal at the Melbourne Exhibition, and "Altvenetianische Brunnenweihe," 1892.

Berger is also the author of "Beiträge zur Entwicklungs-Geschichte der Maltechnik," 1893–97; "Katechismus der Farbenlehre," 1898; and the articles "Van Eyck's Technik," in "Zeit. für Bildende Kunst," 1895, and "Pflege der Bilder in Gemäldegallerien," in "Kunst für Alle," x., etc.

S.

BERGER, OSCAR: German electrotherapist and medical author; born at Münsterberg, Silesia, Nov. 24, 1844; died at Ober-Salzbrunn, Silesia, July 19, 1885. He was educated at the gymnasium of his native town and at the universities of Berlin, Vienna, and Breslau, receiving his degree as doctor of medicine in 1867. In 1869 he engaged in practise as a physician in Breslau, making electrotherapy his specialty. In 1873 he became privat-docent at the University of Breslau, being the first at that institution to lecture on nervous diseases. Five years later he was elected assistant professor. In 1877 he was appointed chief consulting physician and medical inspector of the Breslau poorhouse.

Berger made a special study of neuralgia of the joints, of the relation of neuralgia to diabetes and nephritis, of neuralgia of the face and of the genitals, of the relation of syphilis to tabes, and (with Heidenheim) of hypnotism.

A very prolific writer, he contributed many articles on neurology and electrotherapy to technical journals, and was one of the editors of the "Neurologisches Centralblatt." For Eulenburg's "Encyklopädie der Gesammten Heilkunde" he also wrote many articles, including "Epilepsie," "Beschäftigungsneurosen," "Paralysis Agitans," "Tetanie," etc. His best-known works are "Die Lähmung des Nervus Thoracicus Longus," Breslau, 1873; and "Zur Lokalisation der Corticalen Sehsphäre beim Menschen," Breslau, 1885.

BERGÈR, PHILIPPE: Christian professor of Hebrew; member of the Académie des Inscriptions et Belles-Lettres; born at Beaucourt, Haut-Rhin, September, 1846; brother of Samuel Bergèr. Graduating at the University of Strasburg, he settled in Paris, where he became professor of Hebrew in the Faculté de Théologie Protestante (now a part of the University of Paris), and sublibrarian of the Institut de France.

Disciple and intimate friend of Renan, whom he succeeded in the chair of Hebrew at the Collège de France, Bergèr devoted himself to the study of Semitic epigraphy, for which his friend and master had a predilection. He collaborated in the redaction of the "Corpus Inscriptionum Semiticarum," published by the Académie.

Among Bergèr's numerous writings two are of special interest for Jewish scholars: (1) "L'Ecriture des Inscriptions Sémitiques," Paris, 1880; and (2) "Essai sur la Signification Historique des Noms des Patriarches Hébreux," Paris, 1887.

Bibliography: *La Grande Encyclopédie*, vi. 306.

BERGÈR, SAMUEL: French professor of Protestant theology; secretary and librarian of the Faculté de Théologie Protestante, Paris; born at Beaucourt, Haut-Rhin, May 2, 1843; brother of Philippe Bergèr. He attended the lectures on literature at the Sorbonne, and studied theology at the University of Strasburg, whence he graduated. Among Bergèr's writings the following are interesting for the study of the Bible: (1) "La Bible au XVI. Siècle; Etude sur l'Origine de la Critique," Paris, 1879; (2) "De Glossariis Biblicis Quibusdam Medii Ævi," Paris, 1879; (3) "La Bible Française au Moyen Age; Etudes sur les Anciennes Versions de la Bible Ecrites en Prose de la Langue d'Oïl," Paris, 1884; (4) "Histoire de la Vulgata," Paris, 1893.

Bibliography: *La Grande Encyclopédie*, vi. 306.

BERGSON, MICHAEL: Musician; born in Warsaw 1818; died at London March 9, 1898. He was a member of an eminent Jewish family of Warsaw, with which city he always preserved connection. Early in life he became a pupil of Chopin, and afterward settled in Geneva, where he became professor and later on principal of the Conservatoire de Musique. Professor Bergson resided for the greater part of his working life in Switzerland, and in the principal cities of France and Italy; but the last twenty-five years of his life he spent in London. He was, as a pianist, one of the personal inheritors of the Chopin tradition; but he also attained to some distinction as a composer, many of his productions exhibiting inventive power, taste, and charm. He wrote two operas: "Louisa de Montfort" and "Salvator Rosa." Among his many hundreds of songs, the "Two Hearts," the "Better World," and the "Sérénade Moresque," as well as the clever pianoforte sketch, "A Storm on the Lagoons," were very widely known and admired. His more technical productions, too, have received much commendation, especially the "Douze Grandes Etudes," op. 62, and the "Ecole du Mécanisme," op. 65. Mention should also be made of his "Flute Sonata," of his "Concert Symphonique," and his "Polonaise Héroïque." One of his best-known pieces is the "Scena ed Aria" for clarinet, played by military bands throughout the world.

Bibliography: *Jewish Chronicle* and *Jewish World*, March 18, 1898.

J. G. L.

BERGTHEIL, JONAS: Pioneer of Natal, South Africa; born in England about 1815; died 1902; emigrated to South Africa about 1844, at a time when the resources of the country were scarcely known, and the mode of living extremely primitive. Settling among the Boers as a farmer, Bergtheil was treated by them with religious tolerance. He served in their government as a member of the Legislative Council from 1855 for eleven years, being four times reelected and resigning office only on his return to England in 1866. During a visit to England in 1847, he advocated, unsuccessfully, emigration to the Cape; then, passing to Germany, his arguments were more successful, and he took with him forty families, who founded a settlement in "New Germany," which trained some excellent colonists. Bergtheil was a large landowner in Cape Colony, possessing at one time nearly 200,000 acres, when land was estimated at the rate of threepence an acre.

Returning to England in 1866, Bergtheil identified himself with the communal institutions in London, serving as warden of the Bayswater Synagogue and as president of the Bayswater Jewish schools, retiring from the latter in 1900.

BERIAH: **1.** A son of Asher, representing, however, not an individual, but a clan (Gen. xlvi. 17; Num. xxvi. 44, 46). A member of the clan was called a **Beriite** (Num. xxvi. 44). The name is also found in the genealogical list, I Chron. vii. 30, 31.

2. A clan of Benjamin (I Chron. viii. 13).

3. A clan of Ephraim (I Chron. vii. 21-23). The chronicler here adds an explanation of the name, "because it went evil with his [father's] house." It has been supposed by some (Bertheau, Commentary, *ad loc.*) that Nos. 2 and 3 are identical, and that Beriah of Benjamin was associated with Ephraim because of its services to that tribe.

4. A Levite of the Gershon line (I Chron. xxiii. 10, 11).

G. G. B. L.

BERIAH, or **'OLAM HA-BERIAH** (the World of Creation): Cabalistic expression for the second of the four celestial worlds of the Cabala, intermediate between the World of Emanation (Azilut) and the World of Formation (Yeẓirah), the third world, that of the angels. It is, accordingly, of the purest essence and without admixture of matter.

BERIT MILAH. See Circumcision.

BERKAMANI or **BARKAMANI** (ברקמאני) **IBN ABU AL-ḤASAN** (called **Al-Isra'ili al-Iskandari**): Physician and author; lived probably in the first half of the thirteenth century, and wrote for an emir (Manṣur?) a treatise on hygiene in ten chapters, called in the preface: אלמקאלה אלמחסניה פי חפט אלצחה אלבדניה. There is a copy of this medical work in manuscript in the Imperial Library of Berlin, and Steinschneider has given an exhaustive description of it in his "Catalogue." Steinschneider rejects the identification of Berkamani with one Jefet b. Sa'id of the twelfth century; though at one time he held him to be the probable author of a responsum (תשובה) in Codex Petersburg 625 (compare Neubauer, "Aus der Petersburger Bibliothek," 1866, pp. 25, 118, note xxi.). In the preface to this work it is stated that the treatise was compiled at the request of an Alexandrian statesman, whose name is conjectured to be either Al-Muḥsin or Al-Manṣur, and to whose personality reference is made on page 91b of the manuscript. The fact that he mentions no earlier author than Maimonides, whom he calls מוסי אלקרטבי (Moses of Cordova), makes the tentative date, above given, all the more probable. It would seem from his familiarity with medical literature that he was a physician.

BERKO, JOSSELEWICZ. See Berek, Joselovich.

BERKOVITS, LAJOS: Hungarian violinist; born at Budapest in 1874. Here he passed through the schools and finished his musical education. He was graduated from the National Academy of Music, where his teachers were Jeno Hubay and David Popper. In 1895 he went to Paris, where he entered the celebrated Lamoureux orchestra as first violinist, in which capacity he made a tour through England. As a soloist his appearances were frequent and invariably successful. In 1896 he received an engagement in the royal orchestra of the opera at Budapest, and he is still a member of that body as well as of the well-known Grünfeld quartet.

BERKOWICZ, JOSEF: Officer in the Polish army; son of Colonel Berek (Berko). He took part in the battle of Kock, in 1809, in which his father was killed. When he quitted the military service in 1815, he was appointed forester of the government forests of Troki, and in 1826 chief forester of the district of Bielsk.

During the Polish revolution of 1830 Berkowicz served under General Rozycky as chief of squadron of the Fifth Regiment, and at the end of the war he removed to Besançon, France. Soon after he settled permanently in England, where he wrote his novel, "Stanislaus, or the Polish Lancer in the Suite of Napoleon from the Island of Elba," which was published in 1846 by his family after his death. He left two sons, Leon and Josef, and his widow, who returned to France, where she died in poverty.

BERKOWITZ, BENZION JUDAH BEN ELIAHU: Russian Hebrew scholar; born July 23, 1803; died at Wilna May 11, 1879. He is the author of the following works devoted to the study of the Targum Onkelos: (1) "'Oteh Or," Wilna, 1843; (2) "Leḥem we-Simlah," 2 vols., *ib.* 1850-55; (3) "Ḥalifot Semalot," supplement to vol. ii., *ib.* 1874; (4) "Abne Zion," *ib.* 1877, addenda to Nathan Adler's commentary on Onkelos.

Berkowitz's contributions to the study of the Onkelos are very valuable, their merit being acknowledged by such scholars as Berliner and other specialists on the Targum. He also contributed to the Hebrew periodicals "Pirḥe Ẓafon," "Ha-Karmel," "Oẓar Ḥokmah," and "Ha-Maggid."

BERKOWITZ, HENRY: Russian-English educator; born at Warsaw in 1816; died in Gravesend April 5, 1891. He came to London in 1841, and attracting the notice of Chief Rabbi Adler, he was made a member of the latter's household. He afterward opened a school at Gravesend, and by his energy and zeal gradually obtained for it an established position and reputation. Among his scholars were numbered some of the most prominent men in the community. Berkowitz was held in high esteem in non-Jewish circles in Gravesend, made friends among all classes and creeds, and local honors were bestowed on him in abundance, among them that of justice of the peace, until, in 1887, he was elected mayor of Gravesend. He was concerned in almost every philanthropic movement of the town.

BIBLIOGRAPHY: *Jewish Chronicle*, April, 1891.

J. G. L.

BERKOWITZ, HENRY: American rabbi; born at Pittsburg, Pa., March 18, 1857. He was educated at the Central High School of his native city, at Cornell University, and at the Hebrew Union College of Cincinnati, O. Berkowitz has held the position of rabbi of the Sha'are Shamayim congregation in Mobile, Ala., 1883-88; of the B'nai Jehuda congregation in Kansas City, Mo., 1888-92; and of the Rodeph Shalom congregation, Philadelphia, Pa., since 1892. He is the founder and chancellor of the JEWISH CHAUTAUQUA SOCIETY since 1893, one of the board of governors of the Hebrew Union College, and a member of the publication committee of the Jewish Publication Society. He is a member of the first or pioneer class of Jewish ministers that graduated from the Hebrew Union College. The published works of Berkowitz are as follows: "Bible Ethics," 1883; "First Union Hebrew Reader" and "Second Union Hebrew Reader," 1883; "Judaism and the Social Question," 1888; "The Pulpit Message," 1892; "The Open Bible," 1896—a guide to a choice of reading from the Old Testament, taking account of the critical standpoint; "Kiddush: Sabbath Sentiment in the Home," illustrated, 1898. Berkowitz has contributed many papers to various Jewish and secular journals.

A. S.

BERLIJN, ANTON (ARON WOLF): Conductor and composer; born at Amsterdam May 21, 1817; died there Jan. 16, 1870. He wrote nine operas, seven ballets, an oratorio ("Moses auf Nebo"), a symphony, a cantata, a mass, several overtures, chamber-music, etc. Of these his symphony, performed by Spohr at Cassel, 1857, is undoubtedly his best work. Berlijn was a skilful contrapuntist, and his compositions are distinguished by grace and brilliancy, though their popularity was confined principally to Holland.

During his long service as conductor at the Royal Theater at Amsterdam, he was held in high regard by the king, who in 1860 bestowed upon him the decoration of the order of merit of the king of Holland. In addition to this he received the gold medal for merit of the king of the Belgians (1845), and similar decorations from the kings of Denmark (1845), Greece (1846), and Sweden (1848), the emperor of Austria (1848), Prince Frederick of the Netherlands (1858), and the grand dukes of Saxe-Coburg (1864) and Nassau. Berlijn was also a member of the St. Cecilia Society of Rome, of the Archeological Society of Athens, etc.

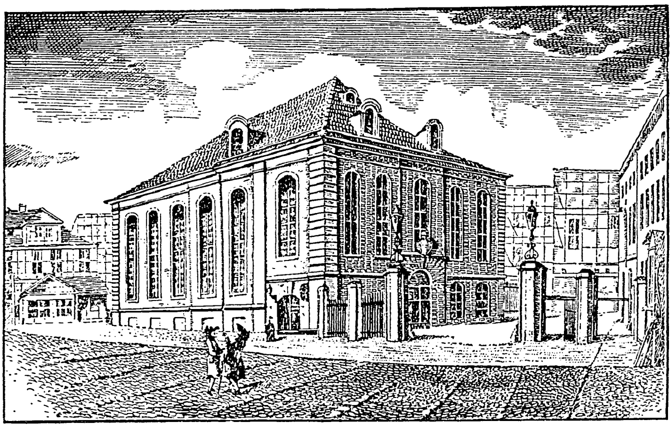
BERLIN: Capital of Prussia and of the German empire. Though mentioned as early as the year 1225, it was an unimportant place during the whole of the Middle Ages. Not much is known of the Jews there during that period, yet there is enough to show that they shared the same fate as their coreligionists of that time in other cities and countries. At the beginning of the fourteenth century the "Reichsgräfin" (countess of the empire) Agnes presented the Jews of Berlin to the magistrate. They were expelled during the Black Death, and their synagogue was given to a Christian citizen (1350); but in accordance with the spirit of the Middle Ages they were allowed to return in 1354. They were not, however, permitted to have a public synagogue, but had to content themselves for a number of years with worshiping in private houses. There is no further mention of the Jews until the beginning of the sixteenth century. In 1509 the Jews of the neighboring Bernau were accused of desecrating the host, and thirty-eight of them, alleged to have committed the crime, were publicly burned by order of the elector Joachim I. (July 19, 1510). Only two accepted baptism, and these were beheaded, the sentence of death at the stake having been commuted to this as "an act of grace." As the usual consequence of such occurrences, the Jews generally were expelled: but they apparently were received again within a very short time, for in the fourth decade of that century the magistrate again complained of them. About the same time, the court Jew Lippold, favorite of the elector Joachim II., became especially important, he having been entrusted by the latter with the superintendence of all Jewish affairs. When Joachim died suddenly (1571), his successor, Johann Georg, accused Lippold of having murdered the elector. Lippold's admissions on the rack, and the books on magic found in his possession, furnished to his enemies sufficient evidence to procure his condemnation and execution (Jan. 28, 1573). Again an expulsion of the Jews followed.

The Great Elector.

The real history of the Jewish community of Berlin does not begin until the year 1671. When the Jews were expelled (1670) from Vienna, under Emperor Leopold I., the great elector, who previously had shown his unprejudiced attitude toward the Jews by admitting two Jewish students to the University of Frankfort-on-the-Oder (see Tobias MOSENIDES), signified his willingness to receive a number of Jewish families into his dominions, and ordered his resident at Vienna, Andreas Neumann, to open negotiations with the Jews of that city. The edict of admission was published May 21, 1671. The emigrants could freely engage in commerce; but usury was forbidden. They were exempt from tolls in traveling, but had to pay a yearly protection tax of eight thalers per family, and one gold florin for every marriage. In civil cases they were to be judged by the mayor, in criminal cases by the elector. They were not permitted to have a public synagogue. These privileges were at first granted for a period of twenty years. A few months later the Austrian fugitives arrived at Berlin and went to their quarters near the city walls. As the court Jew Israel Aaron was afraid of the competition of the immigrants, he succeeded in having a decree issued, Sept. 6, 1671, under which no Jews would be received in Berlin except after a careful investigation into their financial condition. Instead of the anticipated number of letters of protection, one common writ of privileges was issued to the Veit and Riess families, in which they were expressly forbidden to compete with Aaron. That day (Sept. 10, 1671) is the birthday of the Jewish community of Berlin. In 1672 a cemetery was bought for the new community, and in 1676 a burial society was founded under the name "Gemiluss Chassodim."



Exterior of the Old Synagogue, Berlin.
(After an engraving.)

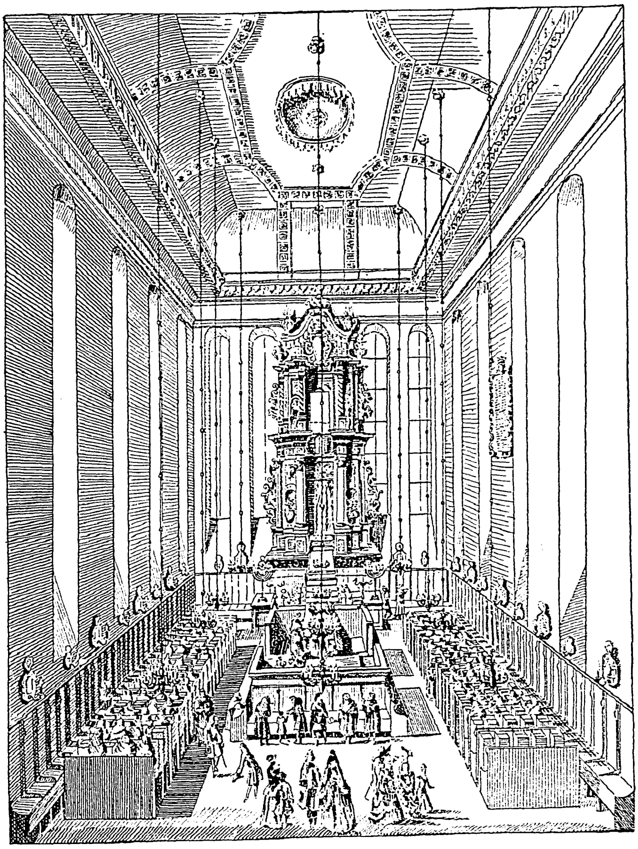
Privileges Granted.

The fear of competition forced the new immigrants to protect themselves against the influx of other Jews, whom they attempted to keep away by threats of excommunication. Though they were forbidden to put this measure into force, the authorities agreed to come to them for information concerning every new immigrant, the signers to such a reference being then held responsible for the person named. This measure did not prevent many "unvergleitete Juden" (Jews having no "Geleitsbrief," or residence permit) from entering Berlin surreptitiously, thus furnishing cause for endless legislation in the electorate of Brandenburg; and the evil was not wholly remedied even by stringent measures. The great elector faithfully kept his promise to protect the Jews. On Jan. 3, 1676, a decree was issued in which occurred the following: "die Juden in Berlin in ihren Freyheiten und Privilegien nicht zu turbiren, noch zu kränken, sondern sie vielmehr dabey gebürend zu schützen" (not to disturb or worry the Jews of Berlin in their grants and privileges, but to protect them properly). But when, nine years later, an accuser, Bendix Levi, rose out of the midst of the Jews themselves, making the most violent accusations against them, he gained the ear of the great elector, who ordered that every Jew should give bonds to the amount of 1,000 thalers (Sept. 8, 1685).

The great elector died in 1688, and was succeeded by the elector Frederick III., who became king of Prussia Jan. 18, 1701. Even in swearing to the coronation oath the council brought up complaints against the Jews. As the twenty years for which the privileges of 1671 were granted were drawing to a close, Frederick instituted a commission to examine the letters of protection (May, 1688), before which every Jew had to appear, and to receive confirmation of his privileges on payment of a certain tax. Most stringent measures were taken against the "unvergleitete Juden," but all to no avail. A special commission was instituted to determine the rights of the Jews (Jan. 24, 1700). The number of Jewish families for the whole electorate was fixed at fifty. Instead of the personal protection-tax (eight thalers), the whole community was taxed in a yearly sum of 3,000 thalers; and a poll-tax was instituted. Another decree was issued (Dec. 7, 1700), which revoked the poll-tax, fixed the protection-money at 1,000 ducats, and placed some restrictions upon commerce. At the request of the shopkeepers' gild, for instance, Jews were forbidden to keep public shops and stalls. A report on the execution of this measure, however, says: "Ist leyder nicht ein Buchstabe von dieser heylsamen Verordnung in Acht genommen worden" (Unfortunately not a jot of this wholesome measure received any heed). Other restrictions followed. Peddling had been forbidden (Aug. 17, 1692), and now also living in villages (Oct. 16, 1706).

'Alenu Prayer.

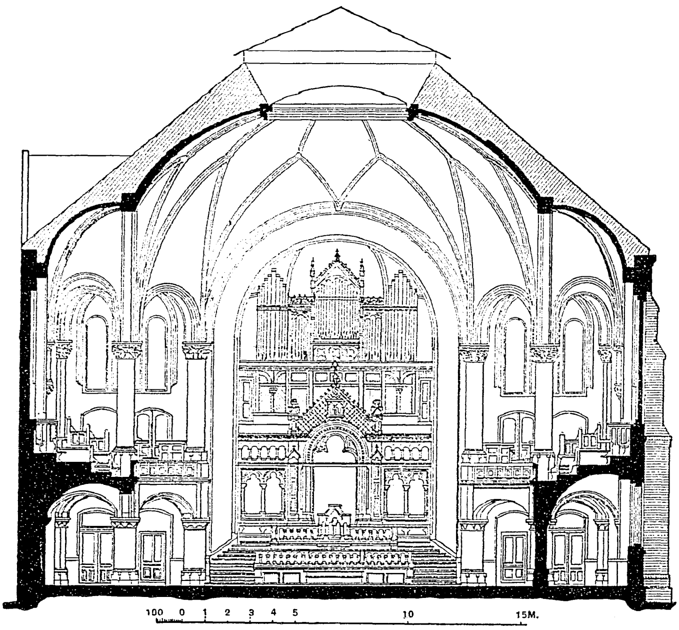
Aversion to the Jews began to show itself also in other matters. Franz Wentzel brought forward the accusation that the Jews during the 'Alenu prayer jumped up and spat in derision of Jesus. In consequence a severe edict was issued against the prayer in September of the year 1700. An investigation was instituted, to which delegates of the Jews were called, and as a result there was issued, Aug. 28, 1703, the "Edict wegen des Judengebeths 'Alenu, und das sie einige Worte auslassen, nicht ausspeyen, noch darbey hinwegspringen sollen" (Edict concerning the Jews' prayer 'Alenu, and that they shall leave out some words, shall not spit nor jump up during its recital). This decree was often renewed. According to it the prayer was allowed only to be said in the synagogue and in a loud voice; and a Christian official was appointed to see that this injunction was carried out. It was only after many years that the degree was revoked, at the instance of Moses Mendelssohn. About the same time appeared Johann Andreas Eisenmenger's book, "Das Entdeckte Judenthum" (Frankfort-on-the-Main, 1700). Owing to the efforts of the Jews the book was forbidden by Emperor Leopold I., and continued under that ban, in spite of the repeated objections of the Prussian king Frederick I., who thereupon had it reprinted at Berlin in 1711.



Interior of the Old Synagogue, Berlin.
(After an engraving.)

Family Quarrels.

In 1708 a standing commission (which had charge of Jewish affairs until 1750) was instituted, the Jews themselves taking only a very small part in their own government. The "elders"—most of whom were chosen by the community for a period of three years, subject to confirmation by the government, though some were nominated for life—supervised mainly the collection of the taxes and the carrying out of the regulations pertaining thereto. Among the elders at the beginning of the eighteenth century were Jost Liebmann and Marcus Magnus. Personal enmity between these two grew into a communal quarrel which divided the Jews into two camps and was attended with dire results. Liebmann, who married the widow of Israel Aaron, succeeded the latter in his position at court also, and acquired a large fortune by furnishing diamonds. After Aaron's death the appointment was conferred upon his widow. She gained the favor of the king, who placed her in a position entirely independent of the Jewish community, signifying his esteem by presenting her with a gold chain. While, however, the Liebmann family enjoyed the favor of the king, Magnus was the special favorite of the crown prince. The latent disharmony between the two families became apparent at a trifling occurrence during worship, Marcus Magnus insisting that Liebmann had offended him. A bitter lawsuit resulted which lasted for two years, and was ended only by a royal order (May 7, 1710) commanding both parties, under pain of heavy punishment, to meet henceforth peacefully and quietly ("bey Vermeidung ernster Bestrafung hinführo friedtlich und ruhig sich zu begegnen"). The quarrel, however, soon became a communal matter, occasion for dispute being found in the conditions of worship. It has already been mentioned that the Jews had never been permitted to have a public synagogue, the services being held in private houses. One of these was in the house of Veit and Riess. But Liebmann also insisted on having a synagogue and a bet ha-midrash; and his nephew and son-in-law, Aaron Benjamin Wolf, was appointed rabbi. In 1684 Liebmann's synagogue was declared to be the only official one. Nevertheless, the synagogue of Veit and Riess continued, and in 1694 was even officially recognized. In order to prevent the undesirable consequences of such a split, and more especially to injure Liebmann's widow, Marcus Magnus insisted on the necessity of a common public synagogue. The widow of course objected; but, in spite of her protests and of all the quarrels and intrigues of both parties, it was resolved to build the synagogue; and the corner-stone—in a cavity of which was placed a prayer for the royal family, enclosed in a small copper box—was laid Iyar 3, 5472 (May 9, 1712). On New-Year's Day, 1714, the synagogue was solemnly dedicated in the presence of the king and his court; and for many years thereafter it was considered the most beautiful building of its kind in Europe.



Plan of the Interior of the Synagogue in Lindenstrasse, Berlin.

Under Frederick William I.

Under the new king, Frederick William I., internal improvement in communal affairs kept pace with external betterment. On May 20, 1714, the king issued a decree, for which the Jews paid 8,000 thalers, revoking that of 1700. The Jews were again permitted to keep public shops and to ask a higher rate of interest; and it was made easier for them to engage in trade. Each privilege was extended to the first child; for the second and third a certain sum had to be paid according to the financial ability of the parents. The merchant gild protested as usual against the amelioration of the condition of the Jews. A new commission, which was instituted Nov. 29, 1717, tried to introduce some restrictions, among them the prohibition against keeping public shops. As the Jews protested, these restrictions were not carried into effect, and the commission was dissolved. Thereupon the merchant gild of Berlin revenged itself by introducing into its by-laws of 1716 the following malicious paragraph: "Alldieweil die Kauffmannsgülde aus ehrlichen und redlichen Leuten zusammengesetzet, also soll kein Jude, strafbarer Todtschläger, Gotteslästerer, Mörder, Dieb, Ehebrecher, Meineidiger, oder der sonst mit öffentlichen groben Lastern und Sünden beflecket und behaftet, in unserer Gülde nicht gelitten, sondern davon gänzlich ausgeschlossen sein und bleiben" (Since the merchant gild is composed of honest, upright people, therefore no Jew, punishable homicide, blasphemer, murderer, thief, adulterer, perjurer, or any one else who is otherwise spotted and stained with manifest heinous vices and sins, shall be suffered in our gild, but shall be and remain entirely excluded). In 1721 a curious occurrence roused the especial anger of the king against the Jews. In that year the purveyor for the royal mint, Levin Veit, who had been considered a very rich man, died, leaving not only no property whatever, but a debt of 100,000 thalers to the royal mint. The king held the whole Jewish community of Berlin responsible for the disappearance of the money, and revenged himself in a very peculiar way. On Aug. 15 all the Jews of Berlin were summoned to the synagogue, which was surrounded by soldiers, and were placed under the ban by the officiating rabbi, Michael Hasid, in presence of the court preacher Jablonsky.

On March 16, 1722 (and in a revised form on Feb. 18, 1723), the new "Aeltesten-reglement" (Constitution of the Jewish Community) was issued, which was intended to do away with the evils that had become apparent in the administration of the community, and which, in order to be brought home more thoroughly, was to be read every year in the synagogue. Under this constitution the administration consisted of two permanent chief elders, five elders, four treasurers, and four superintendents of the poor, and assistants; new officers were to be elected every three years by seven men chosen by lot from among the community. The committee were to meet every week in the room of the elders, and to keep the minutes of their proceedings; resolutions, passed by them, becoming law by a majority vote. The exclusion of a member of the community from the Passover was made dependent on the unanimous vote of the committee; the ban could be pronounced only with the consent of the rabbi; and both of these measures were to be subject to ratification by the Jews' commission. The elders were held responsible with their own money for the proper collection of the taxes, but could proceed against delinquent payers. Every year the entire board had to report to a committee of five chosen by the community. The college of rabbis was to consist of a chief rabbi, with the title אב בית דין, a vice-rabbi (ראש בית דין), and two or three assessors. Other taxes were soon added to the existing ones; *e.g.*, on pawnshops, and calendar money for the Royal Society of Science, and marriage licenses. The income from the last was paid into the treasury from which enlisted men received their pay, and its amount (4,800 thalers a year) soon became a permanent tax upon the whole community. A new decree was contemplated in 1727, to contain various restrictions on trade and commerce; but as the Jews protested against it, it was abandoned. After lengthy discussions with them there appeared, Sept. 29, 1730, the "Generalprivilegium und Reglement, wie es wegen der Juden in seiner Königlichen Majestät Landen zu halten" (General privilege and regulations to be observed concerning the Jews in his Majesty's dominions). The number of Jewish families in Berlin was limited to 120, but they soon numbered 180. A royal order that appeared suddenly, April 26, 1737, commanded the families in excess to depart; the king insisting on the measure in spite of all the protests of the unfortunate ones and of some of the authorities. He even declared that he would rather lose the remaining Jewish families together with their yearly tax of 20,000 thalers than permit the ruinous oppression of his subjects.

"General-privilegium," 1730.

The precarious condition of the Jews appeared also in other directions. When the soldiers complained of the filthy barracks that had been assigned to them, the Jews were forced to give up to them their own rented houses and to move into the barracks at a rental arbitrarily fixed by the authorities (Oct., 1737). In the same year the electoral chamber passed new regulations for the Jews of Berlin, which contained more stringent measures, having in view the gradual diminution and ultimate extinction of the community; the death of Frederick William I. (May 31, 1740) prevented their being put into execution.

Frederick the Great.

The condition of the Jews was not improved under his successor, Frederick the Great (1740–86); indeed, in many respects it grew worse. The "philosopher on the throne" showed, even then, that a philosophical and liberal view of the world is not a sufficient protection against prejudice, when Jews are in question. In 1747 he limited the right of residence to one child of every family, and decreed that every Jew who became bankrupt should lose his right to protection. An attempt to determine the rights of the Jews in general was undertaken on the advice of the fiscal-general Uhden. The Jews were divided into "ordinary" and "extraordinary" Jews. The former after death could be succeeded in their rights and privileges by their first-born child (either son or daughter); the remaining children, like the extraordinary Jews in general, enjoying the right of protection for themselves only, and being prohibited from registering their children. A law was passed embodying these conditions, but when it was about to go into effect (1750), the Jews, dissatisfied with it, and fearing that the restrictions therein contained would ruin their credit with other countries, prayed that it might not be made public; and in fact it was not published until six years later.

In order to stimulate manufacturing in his dominions, Frederick the Great tried by various and even forcible means to press the Jews into the industries. As he disliked any increase of the Jews, either by birth or by immigration, he decreed (Oct. 29, 1757) that no Jews should receive new privileges, unless they promised to start factories. On the same condition they were each permitted to register an additional child. In general, the king looked upon the Jews merely as a source of income, and imposed taxes in various ways. For instance, they had to furnish silver amounting to 8,100 marks a year; and the protection-money was increased from 15,000 to 25,000 thalers. More curious still was the so-called porcelain-tax, which obliged every Jew, when applying for any concession, to buy a certain amount of porcelain in the royal porcelain-factory, and to sell it beyond the frontier. As the cost of transportation was very large compared with the value of the goods, such transactions involved considerable loss. The king was especially strict in carrying out the principle of communal responsibility, holding the elders pecuniarily liable for any theft committed by a member of the community. The first case of this kind occurred in 1769, when the king decided that the law must be upheld, in spite of the protests of the elders and the entreaty of the directory-general ("Generaldirectorium"). In 1784 this communal responsibility of the elders was extended to cases of bankruptcy of members of the community. Thus the philosophic king endeavored by extreme measures to turn the Jews of his country into pariahs.

Moses Mendelssohn.

While these medieval measures still fettered the Jews externally, a movement was in progress that in an incredibly short time was to change their whole life and character and to prove once more that in the history of the Jews spiritual influences are more potent than brute force. Their regeneration came through German literature, which at that time began to flourish anew. In spite of its seclusion the Jewish ghetto also felt the breath of the fresh currents that revivified the intellectual life of Germany. Even before Mendelssohn, Aaron Salomon Gumpertz appeared, devoting himself to the sciences, and being one of the first Jews to receive a doctor's degree. But the real representative of this period is Moses Mendelssohn (1729–86). He modestly sought admission at the gates of Berlin as a poor "Talmud baḥur," and within a short time counted the whole of the cultivated classes of Germany among his readers. His translation of the Bible, together with the regenerated Hebrew literature, was pressed into the service of the new illumination. Actuated by the same spirit, David Friedländer and Isaac Daniel Itzig founded a free school, under the name חנוך נערים, and, in connection with it, a Hebrew printing-establishment and book-store.

German Judaism was entirely transformed as if by magic. Not so long before, a Jew who had dared to trim his beard had, at the instigation of an eminent member of the community, been commanded by a direct order of the cabinet to spare his locks; and the progenitor of the Bleichröder family had been driven from Berlin because a German book had been found in his possession. Now, the Jews were in the front rank of the promoters of German culture. The Berlin physician Marcus Herz was an eager apostle of the philosophy of his teacher Kant, with whom he stood in close personal relations; and the lectures on physics, which he delivered at his house, were attended by the minister Zedlitz, and even by the crown prince. The salon of his wife, Henriette Herz, became the center of attraction for the most brilliant people of Germany, and for many of those of other continental countries. With the increase of enthusiasm for German culture, the indifference to and neglect of the religion of the Fathers increased also. While Mendelssohn himself and his circle still clung to their Judaism, even in the midst of the new movement, the younger generation tried to get rid of it as quickly as possible. More than one-half of the Berlin community is reported to have been baptized within a short time. The elders strove in vain to stem this flight from Judaism by a law, which they were instrumental in having passed, to the effect that servants and children could be baptized only after producing the certified permission of their masters and parents respectively, and that strangers must be taken to their native places for the ceremony.

Relaxation of Discipline.

In 1792 the Gesellschaft der Freunde, an association of "the high-thinking and liberal against orthodoxy and immorality," was formed. In 1799 appeared the circular letter addressed to the "Very Reverend Chief Councilor of the Consistory and Provost [Probst] Teller at Berlin by some heads of families of the Jewish religion," in which the anonymous author (David Friedländer) signified willingness, in his own name and that of others, to be baptized, if they would not be obliged thereby to believe in the specifically Christian dogmas. Teller emphatically refused his request. The new generation was keenly sensitive to the lower civic status of the Jews. Hence all its efforts were united against the old general privilege, and in favor of emancipation, which had seemed to be more nearly within the reach of the Jews when Frederick William II. came to the throne (1786). The description of these efforts belongs to the history of the Prussian Jews. It is sufficient to mention here that the Jews of Berlin, with David Friedländer at their head, were among the pioneers in that movement; and they found a ready advocate of their efforts in the prime minister Hardenberg, who came into office June 6, 1810. The edict of March 11, 1812, conferred citizenship upon the Jews living in Prussia and enjoying any concessions, and made them subject to military service. On March 18 the Jews sent to the king a letter of thanks which was signed by the elders David Hirsch, Bendix, Friedländer, and Gumpertz.

Edict of March 11, 1812.

But this by no means ended the struggle; for even the rights previously granted were either curtailed or revoked, and new restrictions were introduced. In spite of their sacrifices and the patriotism displayed by them during the wars of liberation, the Jews were thwarted in various ways. A strong anti-Jewish movement appeared also in the literature of the time. In 1824 the newly instituted provincial estates convened and took up the question of the position of the Jews, the estates of Brandenburg and of some of the other provinces being in favor of restricting their rights. The memorial which the elders presented to the Ministry of the Interior received no answer. Thus all efforts had again to be united in the struggle to obtain justice. The battle was waged more or less successfully, and ended finally in favor of the Jews, when the year 1848 brought the proclamation that all Prussians were equal before the law.

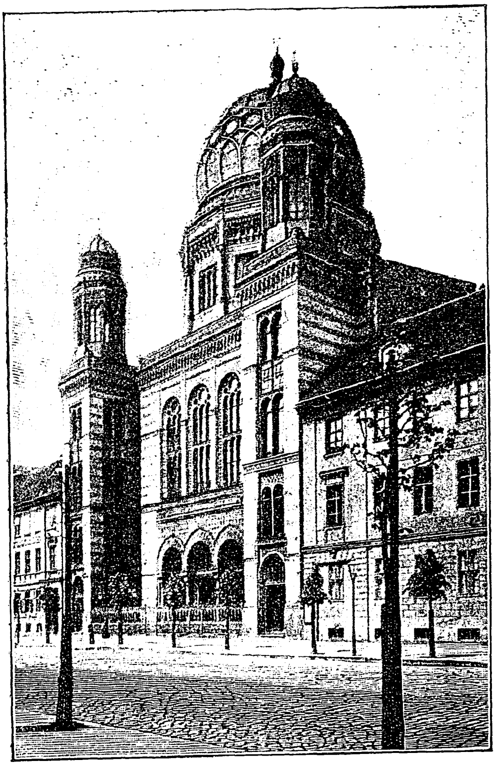
During those years of conflict the intellectual life of the Jews was not neglected. In 1819 the Verein für Kultur und Wissenschaft der Juden was founded by Gans, Moser, and Zunz, Heine also belonging to it. The periodical of the society appeared in 1823, edited by Zunz. But the society was dissolved in the following year, owing to the indifference of the members; and its founder, Gans, together with many members, soon thereafter renounced Judaism. The only remnant of this vain attempt was the "Science of Judaism," which, represented by Zunz, promised a rich harvest for the future. The education of the Jewish youth in accordance with the new spirit received especial attention. Aside from the free school, of which Bendavid became the director in 1806, a private school, founded by Bock, was continued by Jost and S. Stern. In 1823 Zunz presented to the directors, in the name of the Verein für Kultur und Wissenschaft der Juden, a memorial advocating a reform. A commission, including Zunz, Moser, and Bendavid, was instituted for the purpose of organizing a communal school. On Oct. 3, 1825, was laid the corner-stone of a building which on Jan. 3 following was opened as a public school of four classes, under the direction of Zunz. In 1835 a school for girls was organized upon similar lines. In 1856 a religious school was founded. Training-schools for teachers were also organized. In 1840 a seminary for teachers was opened under the direction of Zunz; but it was closed nine years later by the elders. In 1858 a training-school for teachers was established under the rectorship of Horwitz.

Striving After Culture.

Philanthropy also received the attention of the community. In 1804 the Brüderverein, a society for the relief of unmarried merchants, was founded. Several of the older relief societies still existed, as that for dowries (since 1721; the new by-laws being drafted by Mendelssohn); for circumcision (1715); for sick relief (1703); for burial (1672; see above); also an asylum for the aged (1828). In 1838 the community instituted a commission for the purpose of supervising the relief given to the poor, who had greatly increased since 1812. In 1833 the Baruch-Auerbach orphan asylum for boys was founded; ten years later the asylum for girls; in 1836 the institute for orphans in memory of Moses Mendelssohn; and in 1858 the hospital. For other institutions see list below.

Struggle for Reform.

The chief place in the inner development of the community is occupied by the struggle for ritual reform, in which both parties engaged with great bitterness. Shortly after the edict of 1812 Friedländer issued a pamphlet demanding reforms in the religious services, and sent it to the king, who gave an unfavorable answer, although the prime minister Hardenberg advocated Friedländer's propositions. The reforms were soon carried into effect, however; for the wealthy Jacob Herz Beer (the father of Meyerbeer) organized private services according to the new principles, at which Zunz also officiated as preacher. Israel Jacobsohn, the former president of the Westphalian consistory, imitating Beer's example, preached himself, and confirmed his son (Pentecost, 1815). But in 1817 there appeared a royal order which, falling back on the old "Generalprivilegium," commanded the closing of private synagogues. As the public synagogue was in need of repair, the temple of Beer was designated as a temporary synagogue. The Orthodox members, headed by their rabbi, Meyer Simon Weyl, protested against the order, and continued to worship in the half-completed synagogue. The government now decreed that the ancient Hebrew service should be followed by German prayers and a sermon in German; but at the instance of the Orthodox members a new royal order was issued, Dec. 9, 1823, to the effect "that the religious services of the Jews shall be held only in the present synagogue, and only according to the customary ritual, without the least innovation in the language or the ceremonial, the prayers and songs, entirely in accordance with the ancient custom." This regulation was so strictly carried out that when Rabbi Oettinger, at the dedication of the new cemetery in 1827, delivered an address in German, the police saw therein a forbidden innovation.



Synagogue on Oranienburgerstrasse, Berlin.
(From a photograph.)

Culture societies were organized in 1841 under the direction of Siegmund Stern, whose lectures in 1845 on the tasks of the Judaism of that time again stirred up the Reform movement. On March 10, 1845, a meeting was held under the leadership of Stern and A. Bernstein, which resolved "that rabbinic Judaism is on the whole and in its parts not in harmony with our scientific convictions and the demands of the present life." The Genossenschaft für Reform des Judenthums, founded in 1846, organized services under the leadership of its rabbi, Samuel Holdheim. These were held on Saturdays and Sundays (afterward only on Sundays), and their chief feature was the total exclusion of the Hebrew language. At present (1902) the chief community of Berlin supports, besides the above-mentioned Reform pulpit, five chief synagogues, two of which observe the old ritual and three a modernized one.

The matter of securing suitable rabbis was an especially difficult one, in view of the strong differences of opinion obtaining in the community. This became apparent soon after the death of Chief Rabbi Hirschel Levin in 1800; these differences then were so great that no chief rabbi could be agreed upon. A further attempt was made to fill the office, in 1842, when Zacharias Frankel was chosen. As he, however, declined the appointment, notwithstanding certain assurances from the minister Eichhorn, the office remained vacant. Hirschel Levin was succeeded by the assistant rabbi, Meyer Simon Weyl, who was given the title "Vice-Oberlandes-Rabbiner." After his death (1825) Jacob Joseph Oettinger (until 1860) and Elhanan Rosenstein (until 1866) were the acting rabbis, Michael Sachs being associated with them as assistant rabbi after Frankel had refused the chief rabbinate. After Sachs's death (1864) the controversy again broke out. Finally, in 1866 Joseph Aub was chosen, who in the same year consecrated the new synagogue and introduced a new order of prayers. In 1869 Abraham Geiger was chosen, together with Ungerleider as assistant rabbi. For incumbents of the rabbinate in 1901 see below.

It became necessary to change the administration of the community in accordance with the altered conditions. As early as 1793 a new constitution had been instituted, which, for the first time, did not proceed from the government, but was the result of the deliberations of a communal committee of fifteen. When the Jews' taxes were revoked by the edict of 1812, the duties of the elders were materially changed. As the government was slow to offer suggestions, the elders themselves went to work and drafted a set of rules for choosing the representatives. These were adopted May 20, 1849, by a vote of the community, and the election in accordance with the new statute was held June 24. The government, however, refused to recognize it, and ordered a new election in accordance with the general regulations of 1750, which was held April 11, 1851. It was not till 1854 that the government recognized the new rules of 1849. On Feb. 23 of that year representatives were elected in accordance with those rules and were confirmed by the government. After much deliberation the "Statut für die Jüdische Gemeinde in Berlin" was determined upon (Aug. 31, 1860), which is still in force (1902). According to this statute the Jewish community of Berlin consists of all the Jews in that city and the neighboring places. The community is represented by a directorate and a college of representatives: the latter consisting of twenty-one members and fifteen substitutes, chosen every three years by a ballot of the whole community. The representatives choose the directorate, consisting of seven elders and three substitutes. The resolutions of the representatives are confirmed by the directorate. Differences are decided by a committee of the community or by the board of supervisors. Different branches of the administration are in the hands of special commissions, with a member of the directorate in the chair. The ministers, readers, and all officials who perform religious functions are chosen by a two-thirds majority of the representatives.

The Rabbinate.

Non-Jewish sources mention (1) a certain Cain (meaning probably "Ḥayyim") as the first rabbi of the mark of Brandenburg, under whom the Jews emigrated from Vienna. His privilege for the whole electorate was issued Feb. 20, 1672. He probably did not live at Berlin, but at some other town of the mark, perhaps at Landsberg-on-the-Warthe.

(2) Isaac Benjamin Wolf Liebmann succeeded Ḥayyim May 11, 1685. He lived at Landsberg-on-the-Warthe.

(3) Shemaiah, called Simon Berend, appointed Aug. 23, 1687. He lived at first at Frankfort-on-the-Oder, then in Berlin; died on the last day of the Passover, 5469 (April 2, 1709). He was a high Talmudic authority.

(4) Aaron Benjamin Wolf, son of Isaac Benjamin Wolf Liebmann, nephew and son-in-law of Jost Liebmann, 1709–21.

(5) Michael Ḥasid, appointed May 17, 1714, who also succeeded to the rabbinate of Frankfort after Aaron Benjamin Wolf's death. (On the ban which Michael pronounced against the Jews of Berlin at the command of Frederick William I., see above.) His works have only partially been printed. He was considered a great Talmudist and also occupied himself with the Cabala, being called by the Jews the "great Cabalist." One of his sons embraced Catholicism, and became professor of Oriental languages at Vienna, under the name "Aloys Wiener von Sonnenfels." Michael Ḥasid died Feb. 21, 1728. During his rabbinate Marcus Abraham was chosen (1726) as the first rosh bet-din (director of the schoolhouse), superintending as such the Talmudic instruction of the Jewish youths.

(6) Moses Aaron of Lemberg, formerly rabbi in Leipnik. He was chosen contrary to the wishes of the community at the command of Frederick William I., who issued his order in spite of the protests of the elders. In consequence the new rabbi had violent quarrels with the community. The elders bought for the sum of 4,500 marks permission to choose another rabbi (May 27, 1730). Moses Aaron was forced to accept the rabbinate of Frankfort-on-the-Oder, with the condition to pay 300 marks a year to the rabbi of Berlin. From Frankfort he went to Nikolsburg, where he died, Ṭebet 17, 5518 (Dec. 28, 1757).

(7) Jacob Joshua of Cracow (born 1680), chosen in the fall of 1730; a high Talmudic authority; author of the celebrated Talmud commentary, "Pene Yehoshua'." He had previously been rabbi of Lemberg, as the successor of Ḥakam Ẓebi. Though he gained the love of the community by his independent and energetic character, he gave such offense by deciding a case against the influential and powerful Veitel Ephraim that he was forced to leave Berlin, 1735. He went to Metz, where he wrote his commentary, and thence to Frankfort-on-the-Main. He died Shebaṭ 14, 5516 (Jan. 16, 1756).

After Jacob Joshua's resignation, the office was filled by the rosh bet-din Marcus Abraham (mentioned under 5), with whom Naphtali Herz was associated as assistant rabbi. After his death (1743), the community decided to call a younger man, and chose

(8) David Fränkel, who, having been born (1704) at Berlin and educated there, was especially acceptable to the community. Previously he had been chief rabbi at Dessau and at Frankfort-on-the-Oder. As he had many relations in Berlin over whom he could not, according to the law, exercise his office as judge, his brother-in-law, Veitel, agreed to pay a yearly sum for a substitute. Fränkel achieved fame by his commentary on Yerushalmi, and was the teacher of Moses Mendelssohn. He died suddenly Nisan 12, 5522 (April 5, 1762).

(9) Aaron Hirsch, chosen 1763. Author of the "Minḥat Aharon." He went from Berlin to Schwabach in 1772, and died in 1780. His name "Aaron Mosessohn" was appended to the thanksgiving sermon written by Mendelssohn after the peace of Hubertusburg.

(10) Hirschel Levin, called also Hirschel Löbel; elected 1772; died Aug. 26, 1800 (see Hirschel Levin). By the time of Levin's death the differences of opinion in the community had grown to be so great that it became impossible to have one central administration. The changes in the rabbi question since then have been mentioned above.

The various activities of the Berlin Jewish community may best be summarized under the heads of (I.) worship, (II.) education, (III.) philanthropy, (IV.) miscellaneous.

(I.) Worship: Berlin possesses the following synagogues and temples: (1) Alte Synagoge, Heidereutergasse; (2) Neue Synagoge, Oranienburgerstrasse; (3) synagogues in the Kaiserstrasse, Lindenstrasse, and Lützowstrasse; (4) Adas Yisroel, Gipsstrasse (314 families), rabbi Dr. Esra Munk, preacher Dr. M. Hildesheimer; (5) Schönebergerufer, rabbi Dr. Petuchowski; (6) Ahawas Reïm, Prinzenstrasse (100 families), rabbi Dr. I. Bleichrode; (7) Beth Zion, Brunnenstrasse (150 families), rabbi L. Höxter; (8) Ahawas Scholom, Luisenstrasse, rabbi Dr. Stein; (9) Neweh Scholom, Lothringerstrasse (180 souls), rabbi H. Gruenfeld; (10) Westen, Passauerstrasse (144 members) rabbi Dr. Ph. Kroner; (11) Moabit, Lessingstrasse (500 families), rabbi Dr. Winkler; (12) Jewish Reform Congregation, Johannisstrasse (150 families), rabbis Dr. M. Levin, Dr. P. Klemperer, Dr. I. Oppenheimer, Dr. Jeiski; (13) Ohel Yiẓḥaḳ, Oranienburgerstrasse (150 families), Dr. Liebermann; (14) Lippmann-Tausz Synagoge, Gollnowstrasse (180 families), Dr. D. Lipschütz; (15) Wolff'sche Eẓ Ḥayyim, Landsbergerstrasse, Dr. S. Grünfeld (80 families); (16) Ahawath Torah, Lausitzerplatz (50 families), Dr. Janowitz; (17) Adat Jeschurun, Alte Schönhauserstrasse, rabbi A. Ellenbogen.

Rabbis of the Jewish community: Drs. S. Maybaum, A. Rosenzweig, J. Stier, S. Weisse, Eschelbacher, Blumenthal.

There is also a Union of Orthodox ("Traditionsgesetzestreue") rabbis.

(II.) Education: Hochschule, now called Lehranstalt, für die Wissenschaft des Judenthums, founded by Dr. Abraham Geiger; teachers, Dr. E. Banet, Dr. Maybaum, Dr. Schreiner. Rabbinical Seminary, founded by Dr. I. Hildesheimer, 1873; rector, Dr. D. Hoffmann; teachers, Prof. J. Barth, Dr. A. Berliner, Dr. H. Hildesheimer, Dr. I. Wohlgemuth. Veitel-Heine Ephraim Lehranstalt; lecturers, Prof. M. Steinschneider, Prof. I. Barth.

Schools for religious instruction are attached to all the various congregations, and register from 92 up to 453 pupils of both sexes. The Gemeinde-Knabenschule has 603 boys, the Mädchenschule 402 girls. A training-school for teachers has 45 students. In addition the Zunz-Stiftung, founded 1864, is for Jewish teachers, and there are a "Mädchenheim" (Home for Girls) and a technical school (domestic arts), also for girls.

(III.) Philanthropy: Homes for the Aged, Reichenheim Orphan Asylum, Baruch Auerbach Orphan Asylum, Moses Mendelssohn Asylum, Pankow Asylum; Deaf-Mute Asylum, Neu-Weissensee; various local relief societies; and, in addition, numerous societies for aiding the respectable poor, furnishing Passover supplies and food to Jewish prisoners; for assisting travelers, furnishing clothing, for aid at circumcisions, lying-in relief, rent aid, fresh-air colonies for children, fuel association, marriage dowry, loan society (founded 1846); free burial society, Jewish nurses' association, kosher meat society, people's kitchen, Sabbath observance association, etc.

(IV.) Miscellaneous: Committee for Defense Against Anti-Semitic Attacks (Komitee zur Abwehr Anti-Semitischer Angriffe); Central Verein Deutscher Bürger Jüdischen Glaubens; Zionists' Society; Ezra (for agricultural aid in Palestine); Palästina (for aiding Jewish farmers); B'nai B'rith, Grand Lodge of Germany, office Wilhelmstrasse 118; lodges, Vereinigte Deutsche Reichs-Loge, Leopold Zunz, Berthold Auerbach, Montefiore; society for fostering trades and agriculture among Jews of Russia, founded 1813; society for furthering agriculture among Jews of Germany; military society, Deutsches Vaterland; several students' societies.

D. A. F.

BERLIN CONGRESS: A meeting of the great European powers at Berlin between June 13 and July 13, 1878, to settle questions arising out of the Russo-Turkish war; by it many of the former provinces of Turkey were enfranchised and made independent. In several instances the congress made the grant of full civic and political rights to Jews a condition for the recognition of independence, and it has therefore an important bearing upon the history of Jews in the southeast of Europe in recent times.

Articles of identic form were inserted in the final treaty, requiring that religious conviction should form no cause of exclusion from any civic position in any of the countries liberated by the Congress of Berlin—sections v. (Bulgaria), xxvii. (Montenegro), xxxv. (Servia), xliv. (Rumania).

The question was first raised at the sitting of June 28, 1878, when Waddington, on behalf of France, required that religious equality should be made a condition of the independence of Servia. Gortschakoff, on behalf of Russia, protested against the question being introduced without previous notice to the congress, but Waddington was supported by Bismarck and De Launay (Italy) (British Blue Book, p. 128), and section xxxv. was inserted in the draft treaty.

At the sitting of July 1 Messrs. Bratianu and Cogalniceanu presented a note claiming independence for Rumania, without any reference to the Jewish question; but Waddington, on behalf of France, demanded that the same conditions be imposed on Rumania as on Servia. He was supported by Andrássy (Austria-Hungary), Beaconsfield, De Launay, and even by Gortschakoff (Russia), notwithstanding his protest three days before; and the following clause was inserted in the final treaty (British Blue Book, p. 153):

> Article 44: In Rumania, difference in religious beliefs and confessions shall not be brought against any one as a ground for exclusion or unfitness as regards the enjoyment of civil and political rights, admission to public offices, functions, and honors, or the exercise of various professions and industries in any place whatever. Freedom in outward observance of all creeds will be assured to all subjects of the Rumanian state, as well as to strangers, and no obstacle will be raised either to the ecclesiastical organization of different bodies, or to their intercourse with their spiritual heads.
>
> The citizens of all states, whether merchants or others, shall be dealt with, in Rumania, without distinction of religion, on the basis of perfect equality.

Bulgaria and Servia loyally carried out the conditions of the treaty, but Rumania evaded it, claiming that a sudden emancipation of the Jews would be deleterious to the interests of the country. A convention was summoned by the Bratianu ministry to determine how far the constitution was to be revised, and this suggested the following clause vii. of the Rumanian constitution instead of section xliv. of the Berlin Treaty, which Lord Salisbury had proposed to be inserted *en bloc* into the Rumanian constitution:

> Article 7: Difference in religious beliefs and confessions does not constitute, in Rumania, an obstacle to the obtainment of civil and political rights, nor to the exercise of these rights.
>
> 1. A foreigner, without distinction of religion, and whether a subject or not of a foreign government, can become naturalized under the following conditions:
>
> (*a*) He shall address to the government an application for

naturalization, in which he shall indicate the capital he possesses, the profession or craft which he follows, and his abode in Rumania.

(*b*) He shall reside, after this application, ten years in the country, and prove, by action, that he is of service to it.

2. The following may be exempted from the intermediary stages:

(*a*) Those who have brought into the country industries, useful inventions, or talent, or who have founded large establishments of commerce or industry.

(*b*) Those who, born and bred in Rumania, of parents established in the country, have never been subjected, either themselves or their parents, to any protection by a foreign power.

(*c*) Those who have served under the colors during the war of independence; these may be naturalized collectively by government decree, by a single resolution, and without any further formality.

3. Naturalization can not be given except by law, and individually.

4. A special law shall determine the manner in which foreigners may establish their home on Rumanian territory.

5. Only Rumanians, and those who have been naturalized Rumanians, can buy rural estates in Rumania.

Rights already acquired shall remain in force.

International agreements at present existing shall remain in force in all the clauses and terms therein contained.

In the summer of 1879 Borescu was sent on a diplomatic mission to the courts of western Europe to induce them to accept the new clause vii. of the constitution instead of the Berlin Treaty. Austria had no objection, since her own Jewish subjects were protected by a special treaty; Russia could scarcely object to restrictions, having in view her own attitude toward the Jews; and Turkey was not in a position to make any protest. Italy demanded full liberty of conscience for the Jews, but Waddington, on behalf of France, gave way on the assumption that gradual emancipation would be granted, and on Feb. 20, 1880, an identic note of Germany, France, and Great Britain agreed to the independence of Rumania on condition that clause vii. be made part of the constitution. For the manner in which Rumania has utilized the restrictions of clause vii. to disfranchise the Jews of nearly all the rights of human beings, see RUMANIA.

D. O. S. S.

BERLIN, ABRAHAM. See ABRAHAM BEN JUDAH BERLIN.

BERLIN (sometimes called also **Berliner**), **ARYEH LÖB BEN ABRAHAM MEÏR** (in German, **Löw Mayer**): German rabbi; born 1738 at Fürth, Bavaria; died at Cassel May 21, 1814. When quite young Berlin was dayyan in his native city, and at the same time rabbi of Baiersdorf, Bavaria. In 1789 he was appointed chief rabbi of Bamberg, where he remained until 1794.

During the time he remained in Bamberg, Berlin was involved in a lawsuit which threatened to ruin his reputation. In his capacity of civil judge of the Jews, he was entrusted with the division of an estate valued at 100,000 fl. ($41,000), and was accused by one of the heirs of having utilized his judicial power for his personal interest. This was the more painful because the judicial procedure and practises of the rabbis had never before been assailed in the courts of Bamberg. The specific charges against the rabbi were that he accepted illegal fees and failed to account for certain small sums. In the mean time Berlin was elected to the chief rabbinate of Hesse-Cassel; and difficulties were placed by his opponents in the way of his leaving for the new post. However, he was never put under arrest, and subsequently was acquitted of all the charges of dishonesty and was sentenced only to pay a certain sum as a fine, in settlement of an account which seems to have been more entangled than dishonest. The documents relating to the trial are now published by Eckstein, showing that the charges against Berlin were groundless and that only personal hatred supplied the motives. In the summer of 1795 he left Bamberg for Cassel to enter upon his new functions.

When the kingdom of Westphalia was founded, with Cassel as its capital, Berlin gave proof of his loyalty to the new régime by a sermon which he delivered in Hebrew in the Great Synagogue of Cassel, welcoming the new king, Jerome Bonaparte; and by composing a Hebrew song for the same occasion. Both were published, with a German translation, under the title "Dabar be-'Itto Mah Ṭob" ("Rede am Freudenfeste," . . . Cassel, 1807). This work is erroneously ascribed by Benjacob, in his "Oẓar ha-Sefarim," to Judah Löb Karlberg. When the Jewish consistory of Westphalia was organized on the model of the French consistory (October, 1808), Berlin was made chief rabbi, and in 1809 was elevated to the dignity of "Consistorialrath." As a director of the consistory he was in accord with its president, Israel Jacobson, and assented to the declaration that it is permissible to use pulse, tea, and sugar on Passover, against which view the conservative rabbis of the time vigorously protested (see Stern, "Gesch. des Judenthums," pp. 167, 168).

Berlin wrote annotations to the Talmud which appeared in the edition of Fürth, 1829–32, of which only the first three volumes were published. The Talmud, ed. Wilna, 1895, contains his marginal notes to the tractate Shebu'ot, those to the sixteenth volume of Rabbinowicz's "Diḳduḳe Soferim," and to the treatise Ḥullin. Some of his novellæ appeared as an appendix to the work "'Aẓe Almuggim" (Sulzbach, 1779), by his brother, R. Noah Ḥayyim Ẓebi Berlin. The latter died when his work, "Ma'yan ha-Ḥokmah" (Rödelheim, 1804), was in the hands of the printer; and Berlin superintended the publication of his brother's work.

L. G. P. WI.

BERLIN, DAVID B. (JUDAH) LOEB: Rabbi of the three united congregations, Altona, Hamburg, and Wandsbeck; born probably at Eisenstadt, Hungary, in the second half of the seventeenth century; died at Altona March 5, 1771. Very little is known of his life, although he doubtless was a great Talmudic authority, for otherwise he could not have been rabbi of these three congregations. His brother, Isaiah Berlin, and his brother-in-law, Joseph b. Menahem Steinhart, praise him particularly, and his epitaph also—communicated by Wittkower, "Aggudat Peraḥim," p. 288—mentions his scholarship and his great piety. The responsa collection, "Zikron Yosef," by J. Steinhart, contains two of Berlin's responsa (pp. 74d, 82a), and the Bodleian Library contains some of his homilies and novellæ on the Talmud. Berlin was at first rabbi in Dessau, and from 1768 to his death rabbi of the three congregations mentioned above.

BERLIN, FANNY. See Berlin, Moses.

BERLIN, ISAIAH B. (JUDAH) LOEB (called also **Isaiah Pick,** after his father-in-law): The most eminent critic among the German Talmudists of the eighteenth century; born in Eisenstadt, Hungary, about October, 1725; died, while rabbi of Breslau, May 13, 1799.

Berlin was the scion of a famous family of scholars which counted among its members Yom-Ṭob Lipman Heller and Meïr b. Jacob Schiff. The father of Berlin also was a high Talmudic authority, and by him the son was initiated into rabbinical studies, which he later continued in Halberstadt with R. Hirsch Bialeh (also called Hirsch Ḥarif), who exercised considerable influence on Berlin's later methods of teaching.

In 1750 Berlin occupied an honorable position in the community of Breslau; and it may therefore be assumed that he had settled there some time previously. About five years later he married Fromet (born 1736; died June 13, 1802), daughter of the rich and respected merchant, Wolf Loebel Pick. Until 1787 Berlin lived a comparatively private life, engaged in business with a Christian furrier; but in that year he became a member of the rabbinate, and on Nov. 17, 1793, was elected rabbi of Breslau, receiving eighteen votes out of a total of twenty-one. His election was preceded by a bitter contest between the few but rich liberals and the majority of the community. The former (as recorded in an official document) would have preferred to see Berlin appointed as a "rosh besen" ("rosh bet din," or head of the court), so that he would be unable to act so strictly as a rabbi in regard to ceremonials, and would have a smaller stipend from the Breslau community, while exercising less influence on the rural communities.

His Character.

Berlin, in his humility and unpretentiousness, looked upon the titles and rights withheld from him as of no account, though his salary was smaller than that of his predecessor, from the fact that he had to divide the income from city and country with the assistant rabbi and the rabbi of Sulz. Wolf Ginsberg, his pupil during many years, relates, as evidence of Berlin's ascetic mode of life, that the latter rested only during the nights of the Sabbath and on festivals, devoting all his other days and nights to study. His liberality is revealed in the fact that he wrote and printed one of his works, "She'elat Shalom" (Peaceful Greeting), for the sole purpose of offering help to the publisher, an indigent Talmudic scholar.

Berlin was greatly admired, even by persons who differed with him in religious views. Joel Brill, Aaron Wolfsohn, Judah Bensew, and many other Maskilim of Breslau often visited him to seek advice on scientific questions. As the Maskilim always carefully avoided wounding Berlin's religious feelings, he on his part met them half-way in many things. On the occasion of the Peace of Basel, for instance (May 17, 1795), he held a solemn service in the synagogue and exceptionally permitted the use of instrumental music, he himself delivering a discourse which was highly praised by the press ("Schlesische Zeitung," 1795, No. 59). Thus Berlin, by his learning and his character, conciliated the hostile elements of his congregation, and his death was mourned equally by all.

His Literary Activity.

In order fully to appreciate Berlin's literary activity it must be mentioned that he had the habit of annotating almost every book he read; mentioning the sources, or noting parallel passages and variant readings. Such glosses by Berlin have been published on the following books: the Bible (Pentateuch, Dyhernfurth, 1775; the other books, *ib.*, 1807); the prayer-book, ed. Tiḳḳun Shelomoh (*ib.*, 1806); Maimonides' Yad ha-Ḥazaḳah (*ib.*, 1809); Alfasi (Presburg, 1836); the "Ḥinnuk," by Aaron ha-Levi of Barcelona (Vienna, 1827); Malachi b. Jacob's methodology, "Yad Malachi" (Berlin, 1825); Elijah b. Moses de Vidas' book of morals, "Reshit Hokmah" (Dyhernfurth, 1811). Although the terse yet clear notes contained in these volumes reveal the immense learning and critical insight of their author, yet Berlin's lasting place of honor among the pioneers of Talmudic criticism rests on the following works, which treat principally of the Talmud: (1) "'Omer ha-Shikḥah" (Forgotten Sheaf), Königsberg, 1860, containing a large number of Halakot on the Talmud not noted by the codifiers; (2) "Oẓar Balum" (Full Treasure), in the edition of Jacob ibn Ḥabib's "'En Ya'aḳob," published at Wilna in 1899, tracing all the Talmudic passages quoted without sources in the different commentaries on the haggadic elements of the Talmud; (3) "Haggahot ha-Shas" (Notes to the Talmud), textual corrections and notes on the origin of parallel passages (Dyhernfurth, 1800, and in nearly all the editions of the Talmud); (4) "Hafla'ah Sheba-'Arakin" (Detached Orders) (part i., Breslau, 1830; part ii., Vienna, 1859), containing, as the title indicates, explanations and glosses on the 'Aruk; (5) "Ḥiddushe ha-Shas," novellæ on the Talmud (Königsberg, 1860, and in several editions of the Talmud); (6) "Minè Targuma" (Dessert Dishes), Breslau, 1831, remarks on the Targum Onkelos (the word "Targuma" signifying both "Targum" and "dessert," equivalent to the Greek *τράγημα*) and on the Palestinian Targum; (7) "Kashiyot Meyushab" (Difficulties Answered), Königsberg, 1860, treating of the Talmudic passages which end with קשיא, and written by Berlin in fourteen days; (8) "Rishon le-Ẓion" (The First for Zion; Dyhernfurth, 1793; Vienna, 1793, and several times reprinted, the title being a play on ציון, "Zion," and ציון, "index"), a collection of indexes and parallel passages in the Midrash; (9) "She'elat Shalom" (Greeting of Peace), Dyhernfurth, 1786, a commentary on Aḥa of Shubḥa's "She'iltot." Berlin's responsa collection and his commentary on the Tosefta deserve especial mention, though nothing is known of their fate.

Characteristics of Berlin's Works.

The first place among these works must be accorded to the remarks and explanations on the Talmud. Although they can not compare in acuteness and power of combination with the similar work of Elijah of Wilna, yet these two books of Berlin laid the foundation for a critical study of the text of the Talmud, in view both of the numerous textual corrections concerning the minutest details, and of the many parallel passages adduced either directly from the Talmud or from the old authors, in support of new readings.

Berlin, furthermore, was the first—at least among the Germans—who showed an interest in the history of post-Talmudic literature; and it was he, also, who opened the Kalir question (compare his letter to his brother-in-law, Joseph b. Menahem Steinhart, in the latter's "Zikron Yosef," No. 15). Although Berlin's historical remarks have been superseded by modern criticism, the immense material which he accumulated in all his works will always remain of inestimable service to the student.

L. G.

BERLIN, JACOB (called **Yokob**): German Talmudist; born 1707, probably at Berlin; died 1749 at Fürth, Bavaria. He was a pupil of Jacob ha-Kohen, author of "Sheb Ya'akob," and later (not after 1734) settled at Fürth, where he lived as a well-to-do private citizen. Of his seven works the following were published posthumously: "Be'er Ya'akob" (Well of Jacob), a selection of responsa, with an appendix, on the terminology of the Talmud, published by his brother Isaac and his son Abraham, and edited by Isaac b. Meïr of Pfalzburg and Fürth, 1767; and "Zikron Ya'akob" (Memory of Jacob), a homiletic commentary on the Pentateuch (*ib.* 1769).

Berlin is not related to the well-known Berlin family of Fürth.

Bibliography: Fränkel, *Literaturblatt des Orients*, viii. 420–422; Steinschneider, *Cat. Bodl.* p. 1195; Isaac b. Meïr's Introduction to Berlin's *Be'er Ya'akob*.

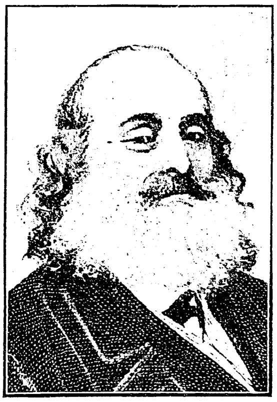
L. G. I. Ber.

BERLIN, LEO: Russian lawyer; son of Moses Berlin; born at Vitebsk Nov. 22, 1854; received his education (1862–72) at a private school in St. Petersburg. He studied law at the University of Bern, Switzerland, whence he was graduated in 1878. In 1881 Berlin received the degree of doctor of criminal law from the University of Moscow. Soon afterward he became engaged to Amalie Hering, M.D., daughter of the physiologist Ewald Hering, who, on account of her (Roman Catholic) religion, was refused a license by the Russian government to marry a Jew. She accordingly joined the Protestant Church; but even then it required the intervention of the poet Turgenef to secure the requisite permission. Berlin is (1902) the head of the law firm of Berlin Brothers in St. Petersburg, but resides in Brussels. He has published many treatises on criminal law in the "Zhurnal Grazhdanskavo i Ugolovnavo Prava" and other periodicals. A rare Torah scroll, which has been in the Berlin family for centuries, is now in his possession.

Bibliography: Private sources.

H. R.

BERLIN, MOSES (MOISEI JOSIFOVICH): Scholar, communal worker, and government official; born at Shklov, Russia, 1821; died in St. Petersburg March 25, 1888. He received a good home education and then was sent abroad, where he studied philosophy and philology at the universities of Königsberg and Bonn. In 1845, while at Königsberg, he published "Meṭab Higgayon," a philosophical treatise in Hebrew with the Latin title "Ars Logica," with an introduction in Latin by Professor Freistadt.



Moses Berlin.

Returning to Russia in 1849, he received a position as teacher in the government Jewish school of Mohilev, and in 1853 was appointed by the minister of the interior as adviser on Jewish affairs to the governor-general of White Russia. Berlin was transferred to St. Petersburg in 1856 and attached to the department of public worship as adviser on foreign creeds, with the title "Uchony Yevrei" (A Learned Jew). In this position Berlin was frequently called upon to participate in the framing of laws concerning the Jews. At the same time he assisted to a considerable extent Count M. A. Korff in organizing and arranging the Imperial Public Library of St. Petersburg.

In 1859 Berlin published "Byedstviya Vremion," a Russian translation of צוק העתים, the work of Jeshua ben David of Samosc. This translation appeared in vol. i. of the "Transactions" of the Moscow Society for the Study of the History and Antiquities of Russia ("Trudy Moskovskavo Obshchestva Istorii i Drevnostei Rossii"), and also in book form. In recognition of this work Berlin was elected corresponding member of the society. He published in 1861 "Ocherk Etnografii Yevreiskavo Naseleniya v Rossii." This work on the ethnography of the Russian Jews was composed at the instance of the Imperial Russian Geographical Society, which elected him an active member. In 1862, in reply to Aleksandr Aksakov's attacks on the Talmud in the journal "Den," Berlin published "Bugulminski Talmudist" and other articles on the Jewish question.

Berlin was very active in the Jewish community of St. Petersburg, and was a member of the two Jewish delegations to Alexander II. in 1868 and to Alexander III. in 1881 respectively.

His son Leo Berlin is a distinguished lawyer. His daughter **Fanny Berlin Kaufmann** (born at Vitebsk Nov. 8, 1850; died at St. Petersburg 1896) graduated from the women's gymnasium of St. Petersburg, studied law at the University of Bern, and was graduated thence as doctor of law *summa cum laude*. She married Prof. Hilarion Kaufmann, and became prominent in the higher society of St. Petersburg. Her bust by Professor Zalello is exhibited in the Imperial Academy of Fine Arts at St. Petersburg.

H. R.

BERLIN, NAHMAN BEN SIMHAH: A polemical writer against reform; lived at Lissa, Germany, at the end of the eighteenth and the beginning of the nineteenth century. His literary activity was wholly devoted to the cause of orthodoxy, opposing steadfastly and systematically all the attempts at the reform of Judaism, which were so marked a characteristic of his time. To this purpose he wrote the following polemical works: "'En Mishpaṭ" (The Critical Eye of Judgment), directed against the editors of the Hebrew periodical "Ha-Meassef," and especially against Aaron Wolfssohn (Berlin, 1796); "Keter Torah" (The Crown of the Law), an introduction to the "Ḥawwot Da'at" of Jacob b. Moses of Lissa (Dyhernfurth, 1810); "Judah," against the innovators (Berlin, 1818); "Kaddur Ḳaṭan" (The Small Globe), against several works by different reform writers (Berlin, 1819); "'Et le-Dabber" (Time to Speak Out), on the traditions of oral law, as well as on the necessity of having the prayers in Hebrew (Berlin, 1819); "Simḥah" (Joy), a call to unity in religious affairs (Berlin, 1819).

L. G. M. B.

BERLIN, NAPHTALI ẒEBI JUDAH (known also as **N. Z. J. B.**): Head of the yeshibah of Volozhin, Russia; born at Mir, in the government of Minsk, in 1817; died at Warsaw Aug. 10, 1893. In 1831 Berlin, who was a descendant of a scholarly family, married the daughter of Isaac b. Ḥayyim, the head of the Volozhin yeshibah. After the death of Isaac in 1851 his elder son-in-law, Eliezer Isaac, became principal, and on the death of the latter in 1854, Berlin succeeded him. He followed the path of learning laid out by Ḥayyim, the founder of the yeshibah, according to the plans of Elijah of Wilna; viz., plain logical reasoning, instead of employing the Pilpul.

A minority of the yeshibah students who cultivated a taste for pilpul seceded and elected as their principal Joseph Baer Soloweitchik, well known as an acute pilpulist and a grandson of Rabbi Isaac. This division created discord between the students of the two factions; and the Russian rabbis sent a delegation to Volozhin to investigate the matter. They quelled the disturbance and established a union headed by Berlin, who was installed as the one head of the yeshibah.

Berlin's whole life was devoted to the welfare of the yeshibah, and all his energy was directed toward increasing the number of the students, and caring for their support and comfort. He appointed and sent authorized agents ("meshullaḥim") to different parts of the world for voluntary contributions to assist in maintaining the yeshibah. A large share of the income came from America. Under his guidance the number of the students increased from 100 to over 400; and he also erected a three-story brick building with rooms for study and a library.

His Opposition to Secular Sciences.

However, the "Maskilim," who then advocated the Semi-Reform movement in Russia, opposed the yeshibah on general principles, and demanded the introduction of secular science and modern method of teaching. In answer to their demand Berlin wrote an open letter to the editor of "Ha-Meliẓ" (No. ix., 1885), explaining his standpoint. He called attention to the failure of the rabbinical seminaries in Germany, and even those of Russia, to produce a single Talmudic rabbi in the full sense of the term; while such rabbis from the Volozhin graduates were numerous. This reply did not satisfy the Maskilim, who advocated the abolition of the yeshibah as a dangerous institution and as being an obstacle in the way of general education to the rising generation. Many derogatory articles in the Hebrew and Russian-Jewish press attracted the attention of the government, which in 1879 decreed to close up the yeshibah. In 1881, however, through diligent and extraordinary efforts, Berlin succeeded in obtaining the government's permit to reopen the yeshibah, which he conducted with renewed energies till 1891, when its doors were again closed by the government as a result of the false accusation that the students were connected with the Nihilistic movement.

Berlin never ceased his endeavors by every means —even visiting Warsaw to obtain the necessary influence—to induce the government to revoke the edict; but they were without avail, and his failure hastened his death.

His Literary Activity.

His contributions to rabbinical literature are of great value, particularly his commentary "Ha'ameḳ She'alah" (Deep Research) on the "Sheiltot" of Aḥa of Shabḥa. It was left for Berlin to throw light on the complicated and obscure passages of this most important halakic work of the gaonic period, which was little known among the Talmudists. His commentary shows not only his phenomenal knowledge of the Talmudim and old rabbinic literature, but also a fine critical mind. Berlin did not occupy himself with the later rabbinic literature, but spent all his life in the study of the old authorities, devoting himself especially to the Yerushalmi and the halakic Midrashim. It is said that at the age of twenty-three he compiled a commentary on the Jerusalem Talmud.

Berlin's unselfishness is shown by the notice in his introduction (§ 5, part ii.): "Whoever desires to reprint this book, either in this or in another country, has my permission to do so without any money consideration, and is entirely welcome, as it is my wish to disseminate the teachings of our master (Aḥa of Shabḥa) of blessed memory. All I request of the publisher, if he does so during the lifetime of myself, or my son Ḥayyim Berlin, is that he will notify either of us, in order that I or my son may add, amend, or correct the style or rearrange the matter."

Berlin's commentary on the Pentateuch, "Biur ha-'Amek" (Deep Interpretation), was published with the text (Wilna, 1879–80). His commentary on the Song of Songs, "Meṭib ha-Shir Beḳiẓẓur" (The Essence of the Poem), with an extract from the same appeared at Warsaw 1888. His opinion on Ecclesiastes is that it summarizes the arguments of the naturalists and scientists of that age, and that only the conclusions were inspired (by the Holy Spirit), whereas the Song of Songs and the Proverbs were all inspired (preface to "Sheiltot," part i., § 2). His exegetical works are of little value, although they claim to be PESHAT.

The responsa of Berlin were numerous. Most of his letters end with הנני עמוס בעבודה ("I am burdened with work"), as if in haste to finish. Of his responsa, "Meshib Dabar" (Word of Response), (Warsaw, 1894), six are addressed to American rabbis of New York, Baltimore, Cincinnati, and Charleston, on various religious questions (see pp. 13, 15, 19, 93, 117, 136).

L. G. J. D. E.

BERLIN, NOAH ḤAYYIM ẒEBI HIRSCH B. ABRAHAM MEÏR: German Talmudist and rabbi; born at Fürth 1737; died at Altona March 5, 1802. He was the son of a well-to-do and learned merchant at Fürth, who died Jan. 7, 1780, and whom Jacob Berlin regarded as a Talmudist of some merit. The boy, together with his brother Loeb Berlin, received his education from his father, and became dayyan in Fürth in 1765. He also was appointed rabbi of Marktbreit, Bavaria, and the surrounding villages; and in 1780 became rabbi at Mayence. When Raphael ha-Kohen, rabbi of the three communities of Altona, Hamburg, and Wandsbeck, resigned his position, Berlin received a call to be his successor (1799). Affairs in these communities were very unsettled at that time, and it required much skill and tact to reconcile the various elements struggling for leadership. Berlin satisfactorily solved the problem; and being far removed from the fanaticism of his predecessor, he even successfully avoided wounding the susceptibilities of the latter, who continued to reside privately in Altona (compare Berlin's letter to Ḥayyim of Volozhin in the responsa collection "Ḥuṭ ha-Meshullash," Wilna, 1880).

Berlin was the author of the following works: (1) "'Aẓe Arazim" (Cedar-Trees), Fürth, 1790, an exhaustive commentary on Joseph Caro's Shulḥan 'Aruk, Eben ha-'Ezer, which, however, covers only one-third of the work; (2) "'Aẓe Almuggim" (Almug-Trees), Sulzbach, 1779, a commentary on those precepts treated in the Shulḥan 'Aruk which are not of Biblical origin; namely, on the washing of the hands ("neṭilat yadayim"), Sabbath-limits ("'erubin"), and the marriages forbidden by the Soferim ("sheniyot la-'arayot"); (3) "Ma'yan ha-Ḥokmah" (Source of Wisdom) (Rödelheim, 1804, and reedited several times), the six hundred and thirteen injunctions and prohibitions in metric form, and exhaustive casuistic explanations on the individual precepts; (4) "Tiferet Ẓebi" (Glory of Ẓebi), the first part published at Warsaw, 1807, the second at Warsaw, 1818, the third at Josephov, 1867; (5) marginal glosses on the Talmud treatises Berakot, Shabbat (Fürth, 1829–32), and Shebu'ot (Wilna, 1895).

The chief characteristic of Berlin's work is that he pays more regard than any other German Talmudist to Yerushalmi; and he gives many happy explanations of it. Moreover, he possessed numerous works by Sephardic scholars which were unknown to the German and Polish Talmudists; and his teachings were strongly influenced by the Sephardim. Although Berlin, in accordance with the spirit of the times, was a great master of "pilpul," and could represent the pilpulistic method skilfully and intelligibly, he had clear reasoning powers. In his responsa, especially, he separated sophistry from true logic.

It is of interest to note that Berlin not only knew Azariah dei Rossi's works (he cites them unfavorably in "'Aẓe Almuggim," 193b), but had also read the New Testament, which was a very remarkable thing in the circles to which Berlin belonged. In a passage of "'Aẓe Almuggim" (191a) he speaks of Paul as "ḥakam eḥad meḥakmehem" (one of their [non-Jewish] sages), and he displays ingenuity in trying to identify him with a certain "Min," a neighbor of Gamaliel, spoken of by the Mishnah ('Er. vi. 1).

Many of Berlin's explanations of the piyyuṭim are found in Wolf Heidenheim's commentary on the Maḥzor.

L. G.

BERLIN, RUDOLF: German ophthalmologist; born May 2, 1833, at Friedland, Mecklenburg-Strelitz; died at Rostock Sept. 12, 1897. He received his education at the gymnasium of his native town and at the universities of Göttingen, Würzburg, Berlin, and Erlangen, and was graduated from the last-mentioned as doctor of medicine in 1858. For the following three years he was assistant to Pagenstecher at Wiesbaden, and in 1861 established himself as a specialist in ophthalmology in Stuttgart, opening a private hospital there.

In 1870 he became privat-docent in physiological optics at the technical high school at Stuttgart, and in 1875 was appointed professor of comparative ophthalmology at the veterinary college in that city. In 1889 he became professor of ophthalmology at the university at Rostock, as successor to Von Zehender; and under his supervision the new ophthalmological hospital was built and opened in 1897.

Berlin was the first to treat ophthalmology systematically in a comparative way. Among his numerous works may be mentioned: "Ueber den Gang der in den Glaskörperraum Eingedrungenen Fremdkörper," in "Archiv für Ophthalmologie," vol. xiii.; "Ueber Sehnervendurchschneidung," in "Mittheilungsblatt für Augenheilkunde," vol. ix.; "Krankheiten der Orbita," in Graefe-Sämisch, "Handbuch der Augenheilkunde" (1880); and jointly with Rembold, "Untersuchungen über den Einfluss des Schreibens auf Auge und Körperhaltung der Schulkinder," Stuttgart, 1883.

In 1882, together with Eversbusch, he founded the "Zeitschrift für Vergleichende Augenheilkunde," in which he published many interesting articles; *e.g.*, on the eye of the horse, about glaucoma, etc.

BERLIN, SAMUEL: German jurist; born at Bamberg Oct. 11, 1807; died at Fürth Dec. 21, 1896. He was a son of Loeb Berlin, of Bamberg, and afterward "Landesrabbiner" at Cassel, whose other son Max was also a jurist, and became "Oberlandesgerichtsrath" at Nuremberg, being the first Jew to fill a judicial position in Bavaria. Samuel was the first Jewish lawyer in that kingdom. He commenced practising law in Gerolzhofen, where he became the intimate friend of another young attorney, who afterward was "Kultusminister" and "Ministerpräsident," Dr. Freiherr von Lutz. Dr. Berlin himself became "Hofrath," and was at one time in the "Vorstand" of the "Gemeindecollegium" in Ansbach.

BERLIN, SAUL (or **HIRSCHEL, SAUL,** after his father, Ẓebi Hirsch [Hirschel] Levin): German Talmudist, and one of the most learned Jews of the Mendelssohnian period; born (at Glogau?) 1740; died in London Nov. 16, 1794. He received his general education principally from his father, who was chief rabbi of Berlin, and one of the few rabbis of the time who combined Talmudic learning with secular culture. He consequently educated his gifted eldest son along the same lines. In Berlin and Breslau (whither the young man frequently went to visit his father-in-law, R. Joseph Jonas Fränkel) he came into personal contact with the representatives of the movement for progress in Judaism, and became one of its most enthusiastic adherents. His antecedents, education, and calling, as rabbi in Frankfort-on-the-Oder, made it almost impossible for him openly to renounce the old rabbinism; and he consequently endeavored to advance his ideals anonymously or under a pseudonym.

Berlin began his literary career with an anonymous circular letter, "Ketab Yosher" (An Epistle of Justice) (printed in Berlin, 1794, after the death of the author), which Hartwig Wessely warmly defended in his own contention with the rabbis while pleading for German education among the Jews. With delightful humor, and in a florid though racy style, Berlin describes the absurd methods of the Jewish schools, and points out how the rabbinic casuistry—which then constituted the greater part of the curriculum—injures the sound common sense of the pupils and deadens their noblest aspirations. In this work Berlin already betrays a morbid tendency to vilify those whom he dislikes for general or personal reasons, thereby injuring the cause which he desires to further.

This tendency is still more evident in his pseudonymous work, "Miẓpeh Yoḳtel" (The Watch-Tower of Yoktel) (published by David Friedländer and his brother-in-law Itzig, Berlin, 1789), a polemic against the "Torat Yekutiel" of Raphael ha-Kohen. The latter, one of the most zealous advocates of rabbinic piety, was a rival candidate with Levin for the Berlin rabbinate, a circumstance which induced Levin's son to represent ha-Kohen as a forbidding example of rabbinism. Under the name "Obadiah b. Baruch of Poland," Berlin attempted in this work to ridicule Talmudic science, and to stigmatize one of its foremost exponents not only as ignorant, but also as dishonest. The publishers declared in the preface that they had received the work from a traveling Polish Talmudist, and had considered it their duty to print it and submit it to the judgment of specialists. In order to secure the anonymity more thoroughly, Berlin and his father were named among those who were to pass upon it.

Ridicules Talmudic Science.

Had Berlin been content to illustrate from Raphael's work the senseless methods then current in Talmudic studies, he would have performed a meritorious task, and one for which he was especially fitted by his very great Talmudic learning and his lucid style of exposition. But the entirely unfounded attack upon the honor and honesty of his opponent, whose incorruptibility and firmness of character were admired even by his enemies, only injured Berlin and his cause. As soon as it reached Altona and Hamburg, where Raphael was chief rabbi, the work as well as its author was placed under the ban. The dispute that thereupon arose concerning the validity of the ban turned entirely upon the question whether a personal element, like the attack upon the rabbi of Altona, justified such a punishment.

With the exception of Ezekiel Landau, chief rabbi of Prague and a near relation of Berlin, only a few Polish rabbis declared the ban to be invalid; and even they censured the action of Berlin, who had been forced to acknowledge the authorship.

Before the excitement over this affair had subsided, Berlin created a new sensation by another work. In 1793 he published at Berlin, under the title "Besamim Rosh" (Incense of Spices), 392 responsa purporting to be by Asher b. Jehiel, with many glosses and comments which he called "Kassa de-Harsua" (Fish Fare). A few examples will illustrate the true character of these responsa. Berlin says, for instance, that (No. 257) an insight into the principles of the Torah and its commands can not be gained directly from it or from tradition, but only by means of the philosophico-logical training derived from non-Jewish sources. This opinion is coolly ascribed to Asher b. Jehiel, who condemned the study of philosophy and even of the natural sciences as being un-Jewish and pernicious (compare No. 58 of Asher's genuine responsa). The following edifying opinions are ascribed to the neo-Talmudists of the thirteenth century: "Articles of faith [creed] must be adapted to the times; and at present the most essential article is that we all are utterly worthless and depraved, and that our only duty consists in loving truth and peace and learning to know God and His works" (*l.c.*). R. Asher is also alleged to be the author of the two responsa concerning the modification of the ceremonial laws, especially of such as were burdensome to the Berlin youth. Thus, for instance, it should be permitted to shave (No. 18), to drink non-kosher wine, "yayin nesek" (No. 36), and to ride on Sabbath. Berlin aroused a storm of indignation by thus fraudulently using the name of one of the most famous rabbis of the Middle Ages to combat rabbinism.

Mordecai Benet first attempted to prevent the printing of the book in Austria, and then mercilessly scourged the deception in a circular letter addressed to Berlin's father, by critically analyzing the responsa and proving them to be spurious. Levin tried in vain to defend his son. Berlin resigned his rabbinate, and, in order to end the dispute which he had aroused, betook himself to London, where he died a few months after his arrival. In a letter found in his pocket he warned everybody against looking into his papers, requesting that they be sent to his father. He expressed the curious wish to be buried not in a cemetery, but in some lonely spot, and in the same garments in which he should happen to die.

Berlin's Character.

In order to do justice to this unique personality, it must be borne in mind, as a modern historian remarks, that in Berlin were united as in a focus the rays of a sinking and of a rising period in Jewish history. Being a really great Talmudist, he knew better than any other person the weaknesses of rabbinism, and was filled with a burning desire to lead his people toward intellectual freedom. Mendelssohn's and Wessely's timid attempts to inaugurate a new era did not appeal to him. With his youthful ardor he could not understand that the development of the popular consciousness is a slow process. An open championship of his ideas, however, would have meant a breach with father, wife, and children—in short, with all his associates; it being after all doubtful whether his sacrifices would have helped his cause. His anonymous and pseudonymous authorship was a measure of policy and not of cowardice. He could not, however, escape the consequences of such a mode of warfare. It is debasing and embittering to attack secretly those whom one is forced to praise in public; hence Berlin became personal in his polemics, and nervous and dissatisfied with himself and the world, because he knew himself to be misunderstood through his own fault.

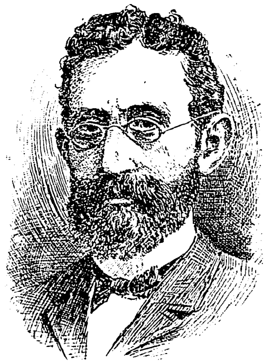
Besides the works mentioned above, Berlin is said to have written a large number of rabbinic works, including notes to the whole Talmud.

Straschun, in Fuenn, *Kiryah Neemanah*, pp. 295–298; Zunz, *Ritus*, pp. 226–228, who thinks that Isaac Satanow had a part in the fabrication of the responsa.

L. G.

BERLINER, ABRAHAM (ADOLF): German theologian; historian; born in Obersitzko, province of Posen, Prussia, May 2, 1833; received his first education under his father, who was teacher in Obersitzko. He continued his education under various rabbis, preparing himself at the same time for the University of Leipsic, where he received the degree of doctor of philosophy.

After serving for some time as preacher and teacher in Arnswalde, Berliner was called (1865) to Berlin as superintendent of the religious school maintained by the society for Talmudic studies (Ḥebrat Shas); and in 1873, when Israel Hildesheimer opened the rabbinical seminary in Berlin, Berliner was elected professor of Jewish history and literature. In this position, as well as in that of author, he has displayed an untiring activity. His edition of Rashi's commentary to the Pentateuch (1866) first made him known as a scholar; and he added to his reputation by various historical works, the result of his studies in the archives and libraries of Italy, which country he frequently visited, subventioned by the German government.



Abraham Berliner.

Berliner edited for two years (1874–75) the scientific periodical "Magazin für Jüdische Geschichte und Literatur," which from 1876 to 1893 he, together with his colleague, David Hoffmann, continued under the title "Magazin für die Wissenschaft des Judenthums." It was due to his zeal that the society Meḳiẓe Nirdamim, for the publication of works of the older Jewish literature, which had been discontinued for several years, was revived in 1885; and since then Berliner has acted as its director. He further acted as the apologist of Judaism in a pamphlet against Lagarde ("Prof. Paul de Lagarde, nach Seiner Natur Gezeichnet," 1887), who denounced all Jewish scholars as dilettanti; and when the blood accusation was revived, he republished (1888) the opinion of Cardinal Ganganelli—afterward Pope Clement XIV.—to prove the falsity of this charge.

While orthodox in his religious views, Berliner was never a fanatic. He not only associated in his scientific work with the liberals, but also paid a high tribute to the merits of M. Steinschneider on the occasion of the latter's seventieth birthday (1886), by compiling a bibliography of that eminent scholar's works.

The following is a list of Berliner's works: (1) "Raschi, Commentar zum Pentateuch," 1866; (2) "Aus dem Inneren Leben der Deutschen Juden im Mittelalter," 1871; 2d ed., 1900; (3) "Pleṭat Soferim:

Beiträge zur Jüdischen Schriftauslegung im Mittelalter," 1872; (4) "Yesod 'Olam, das Aelteste Bekannte Dramatische Gedicht in Hebr. Sprache, von Mose Sacut," 1874; (5) "Die Massorah zum Targum Onkelos," 1875, 1877; (6) "Migdal Ḥananel, Ueber Leben und Schriften R. Chananel's in Kairuan," 1876; (7) "Ein Gang Durch die Bibliotheken Italiens," 1877; (8) "Rabbi Jesaja Berlin: Eine Biographische Skizze," 1879; (9) "Beiträge zur Hebräischen Grammatik im Talmud und Midrasch," 1879; (10) "Hebräische Grabschriften in Italien," 1881; (11) "Persönliche Beziehungen Zwischen Juden und Christen im Mittelalter," 1882; (12) "Beiträge zur Geographie und Ethnographie Babyloniens im Talmud und Midrasch," 1884; (13) Targum Onkelos (now the standard edition), 1884; (14) "Aus den Letzten Tagen des Römischen Ghetto," 1886; (15) "Censur und Confiscation Hebräischer Bücher im Kirchenstaate," 1891; (16) "Geschichte der Juden in Rom, von der Aeltesten Zeit bis zur Gegenwart (2050 Jahre)," 3 vols., 1893; (17) "Ueber den Einfluss des Ersten Hebräischen Buchdrucks auf den Cultus und die Cultur der Juden," 1896; (18) "Aus Meiner Bibliothek, Ein Beitrag zur Bibliographie und Typographie," 1898.

S. D.

BERLINER, EMIL: American inventor; born in Hanover, Germany May 20, 1851. He was educated at the public schools of his native place and at the Samson Schule, Wolfenbüttel, whence he was graduated in 1865. In 1870 he emigrated to America, settling in Washington, D. C., where he has lived since 1882. He invented the loose-contact telephone transmitter, or microphone, known as "The Berliner," and now universally employed in the telephone and of the utmost importance in its practical use. He is also the inventor of the gramophone and other valuable devices. Berliner is a member of the American Institute of Electrical Engineers, and since 1879 has been a frequent contributor to scientific publications in the United States and Germany. He is, besides, the author of "Conclusions," Philadelphia, 1899. In 1881 he married Cora Adler of Washington, D. C.

A.

BERMAN, JEKUTHIEL: Russian-Hebrew novelist; born in 1825; died in Moscow about 1889. He held for over thirty years a responsible position in the employ of the Jewish railroad magnate Samuel Poliakov, and devoted part of his leisure to literary composition. Between 1870 and 1880 he lived in Tver and later in Moscow. A stroke of paralysis in 1887 rendered him incapable of continuing either his vocation or his favorite literary labors.

The first novel by Berman, "Shenot Rainu Ra'ah" (The Years Wherein We Have Seen Evil), which describes the life and sufferings of the Cantonists or child-recruits in the time of Emperor Nicholas I., appeared in the first volume of "Ha-Meliẓ" (1860). Another novel, "Pesel Mikah" (The Graven Image of Micah), appeared in vol. xx., Nos. 19–43 of the same periodical (1884). "Hashodedim be-Ẓaharayim" (The Noonday Robbers) was first published in vol. viii. of "Ha-Shaḥar" (1877) and afterward appeared in book form. The fate of his fourth novel, "Ha-Yetomim" (The Orphans), is somewhat singular. The first instalment appeared in Zederbaum's monthly, "Ha-Mizraḥ," of which only four numbers were published in St. Petersburg in 1886. Ten years later another part appeared in "Ner ha-Ma'arabi," a Hebrew monthly published in New York, which was also soon discontinued.

Berman is one of the purists in modern Hebrew, who insist that no strange words or foreign idioms shall be used by the writers of what is supposed to be the language of the Bible. An eloquent letter from his pen on this subject, and a clever reply by R. A. Braudes of Wilna (now of Lemberg) favoring expansion and modification of the language, are published in Meisach's "Gan Peraḥim" (Wilna, 1881), pp. 9–21.

BERMANN, ADOLF (pen-name, **Kóbor Tamás**): Hungarian writer; born at Presburg in 1867. After completing the study of law he became an employee of the Hungarian Credit Bank. Under the influence of his brother-in-law, Joseph Kiss, the well-known writer of ballads, he early began to develop his talent for belles-lettres, and to-day enjoys a wide celebrity in Hungarian literature. His novels and romances—all satires upon present social conditions—are extensively read.

S. L. V.

BERMANN, FRANCO. See Franco Bermann.

BERMANN, ISSACHAR HA-LEVI: Philanthropist; born at Halberstadt Nisan 24, 1661; died there Tammuz 24, 1730; son of Judah Lehmann. At an early age he displayed great commercial enterprise. He afterward went to Hanover, and there became associated with the chief court agent Liepmann, who, appreciating Bermann's abilities and integrity, gave him his confidence. In this way Bermann had access to many princes, and several of them, such as those of Dessau, of Brunswick, and of Saxony, soon addressed themselves directly to him in their financial transactions. Bermann was in especial favor with Friedrich Augustus II., elector of Saxony and, later, king of Poland, to whom he rendered many services in the capacity of banker and as diplomatic agent in Poland. For these services he was rewarded with the title of "Resident" of Poland and Saxony, by which title he is mentioned in the Polish chronicles.

Bermann used his prestige for the good of his coreligionists; and his intervention with the Polish lords saved many Jewish lives. The special protection that Halberstadt enjoyed during the reigns of Freidrich I. and Friedrich Wilhelm I. was due to Bermann's active influence. Generous by nature, his delight was to protect Jewish learning; and to effect this he built a synagogue at Halberstadt, where many Jewish scholars found support, and their works were printed at his expense.

In 1696 Bermann obtained the permission of Friedrich Wilhelm to edit the Babylonian Talmud, copies of which had become very scarce. The expense of this edition (Frankfort-on-the-Oder), amounting to $50,000, was defrayed entirely by Bermann; and most of the 5,000 copies printed were presented to scholars.

G. I. Br.

BERMANN, MORIZ (pseudonyms, **Berthold Mormann, Moritz B. Zimmermann, Louis Mühlfeld,** and **Julius Marlott**): Austrian author; born at Vienna March 16, 1823; died there June 12, 1895. Bermann, who came of a family of publishers, was educated for a musical career; but after the death of his father he devoted himself for a time to collecting autographs. He soon became known as the owner of one of the finest biographical libraries in Europe. Shortly after the Hungarian Revolution he began (1851) what was intended to be a twenty-volume work, "Oesterreichisches Biographisches Lexikon," etc.; but, owing to the condition of unrest in Austria, it proceeded no farther than the letter A.

On Jan. 1, 1856, Bermann became editor of the "Wiener Courier" and developed into a remarkably prolific writer of sketches, historical novels, plays, and even dance-music; writing under the pseudonyms mentioned above. Among his works are: "Dunkle Geschichten," 1868; "Maria Theresa und der Schwarze Papst," 1870; "Das Schwarze Kabinet"; "Schöne Sünderin"; "Die Kaisertöchter als Bräute," 1890; and the historical comedies "Ein Stündchen auf der Karlsschule" and "Die Entführung aus dem Auge Gottes."

Bibliography: *Das Geistige Wien*, pp. 32, 33; Wurzbach, *Biogr. Lexikon des Kaiserthums Oesterreich*, i. 322-323.

S. E. Ms.

BERN: Capital of the Swiss Confederation. Jews resided within its territory as early as the sixth century, but the first documentary evidence of Jewish inhabitants in Bern is for the year 1259. Though under the protection of the city, with the emperor as their real liege lord, they were usually in an unprotected state. In the separate Jews' street in which they lived, near the present Casino, was also their cemetery, which, after their expulsion in 1294, became private property; and in the "Inselgasse"—as the Jews' street was called after the convent built by the "Inselschwestern"—there was found in 1888, when the "Inselspital" was torn down, the tombstone of a Jew, dated 1293 (Studer, in "Archiv des Historischen Vereins des Kantons Bern," iv. 1, 38; iv. 2, 15; viii. 56, 212).

Jews Bankers and Pawnbrokers.

The Jews of Bern devoted themselves exclusively to banking and pawnbroking. As in Basel and Zurich, the rate of interest fixed by the government was 43%, two pennies per week in the pound; later it was reduced to 30%. All classes—the clergy and the nobles, the burghers and the peasants, as well as the convents and the towns—regarded the Jews as their brokers; and in order to protect the Christians, the city council decreed, at Easter in 1283, that the term set for repayment should be limited to one year. Through their money transactions the Jews earned the hatred of the populace, and as the citizens of Bern were deeply in debt to the Jews and, through various circumstances, were reduced to financial straits, they cast about, shortly after the death of Emperor Rudolf, for means of acquittal.

The Jews Tortured or Expelled.

A pretext for action against the Jews was soon found. In 1294 they were accused of having kidnaped and killed a boy named Rudolf (Ruff). This accusation, which was also made at about the same time against the Jews of Colmar and Mayence, sufficed to start a persecution. The Jew Joel (Föli), who was regarded as the real offender, and all other Jews of Bern, women as well as men, were seized and maltreated, and either tortured or driven from the town. This event has been wrongly assigned to the year 1287, during the reign of Emperor Rudolf (Stettler, "Schweizer Chronik," i. 20; Justinger, "Berner Chronik," pp. 38 *et seq.*; Ulrich, "Schweizer Geschichten," pp. 144 *et seq.*; "'Emeḳ ha-Baka," p. 56; Zunz, "S. P." p. 33, etc.; compare "Annales Colmariens." 28, for the year 1294; "Judæi Bernenses Puerum ut Dixerunt Occiderunt"; Tillier, "Gesch. des Freistaates Bern," i. 72; on the murder of the boy Rudolf, see Stammler, in "Katholische Schweizerblätter," 1888).

Their Claims Forfeited.

King Adolf, perhaps appealed to by the Jews themselves, appointed a commission to investigate the matter, composed of the bishop Peter of Basel, the knight Gottfried von Merenberg, governor of the realm in Burgundy; Cuno von Bergheim, and Hartmann von Ratzenhausen. This commission decided, June 30, 1294, that the Jews, male and female, should forfeit all their claims against the mayor, the council, the community, and every one living in Bern up to the time of the decree; that they should give up all their securities and pledges; and that, in addition, they should pay to the community one thousand marks in silver, and to the mayor of Bern five hundred marks in silver—according to the standard of weight in Bern. King Adolf confirmed this enactment Aug. 1, 1294, in Frankfort-on-the-Main. The Jews assigned to the mayor in payment of his share their claims against the Knights of St. John, the monastery of Interlaken, Ulrich von Thor, and others. A characteristic expression is found in the receipt of the mayor, Jakob von Kienberg: "Pro occasione pueri, videlicet b. Rudolfi quem dicti Judei, ut dicitur, occiserunt." The same cautious phraseology, "ut dicitur," was employed by King Albrecht six years later, when he confirmed the decree, April 29, 1300 ("Solothurner Wochenblatt," 1828, pp. 192 *et seq.*). The Bernese immediately attached the property of the Jews. A woman, Berchta von Habstetten, was forced to give up a chest filled with gold, silver, ornaments, veils, etc., that had been confided to her by the Jew Vivilin and his partner (document of Aug. 14, 1294, "Monatsschrift," xiii. 49 *et seq.*; Stobbe, "Die Juden in Deutschland," p. 283, which reads "1494" instead of "1294," and "Bertha" instead of "Berchta").

Expelled from Bern, the Jews returned before the middle of the fourteenth century; and when the

Persecution Renewed.

Black Death swept the country in 1349, the people of Bern and of Zofingen gained the questionable reputation of fanning everywhere the hatred against the Jews, burning or banishing them and destroying evidences of indebtedness to them, as at the former persecution.

Twenty-five years later there were again Jews at Bern. In 1379 Master Isaac von Tanne, who lived there, loaned to the city of Freiburg 1,470 gold gulden. This "modest man," probably from Thann in Alsace, was, like Master Mathys Eberlin and his wife, Esther Merlinon, a money-lender.

Naturalized and Patronized.

At the end of the fourteenth century the Bernese showed a positively friendly feeling for the Jews, not only permitting them, for financial reasons, to settle in Bern, but naturalizing them for periods of six years, in consideration of a yearly tax of sixty schiltfranken in gold. They were not restricted in their worship; on their festival days they were not to be called into court; matters of dispute among themselves could either be decided according to Jewish law or be brought before the Bernese courts; butchers were enjoined to sell the meat killed according to Jewish ordinance, at the same price as other meat. About this time Christians also engaged in the money-lending business in rivalry with the Jews.

Banished.

As soon as the Bernese were easier financially, the old hatred against the Jews revived, stimulated by Justinger, author of a Bernese chronicle, who was also a notary public, and as such carried on money transactions. His proposition to expel the Jews found no lack of support, for "the Council and the Two Hundred of the City" decided unanimously, May 10, 1427, to drive the Jews forever from the city and the country. This decision was carried into effect, and matters continued thus for several hundred years.

Readmission and Freedom.

Not until about 1820 did Jews again settle at Bern, and coming, as they did, mainly from Alsace as French citizens, they were given absolute religious freedom. In 1865 Bern had twenty-seven Jewish families, which, having had a synagogue since 1855, formed themselves into an association for worship ("Cultusverein"). In 1875 the community numbered 286 persons; in 1897, 348. It had a religious teacher, a burial society (hebrah kaddishah), and a fund for sick women. The canton of Bern had in 1874 1,000 Jews; in 1897, 1,195. The University of Bern was the first to appoint Jews as professors. The well-known physiologist, G. Valentin, who was the first Jew to be naturalized, obtained a position there as early as 1835. Later on the university numbered among its professors Lazarus, Munk, the two Schiffs, Ludwig Stein, and others. In the federal offices J. Dreifus of Endingen occupied, in 1901, a most respected position.

G. M. K.

BERN, MAXIMILIAN: German author; born at Kherson, South Russia, Nov. 18, 1849, where his father practised medicine. On the latter's death Bern and his mother went to Vienna that he might complete his education. The loss of his fortune forced him to abandon his studies at the university, and in 1873 he became private tutor to the apprentices at an equestrian school.

Bern soon tired of this occupation and turned to literature for a livelihood. His first novel, "Auf Schwankem Grunde," met with considerable success, though in this, as in fact in most of his writings, Bern is inclined to the gloomy despair of the majority of Slavonic writers. The success of his first novel enabled him to visit Berlin, Hamburg, Leipsic, Dresden, Frankfort, and Munich, at all of which places he studied assiduously. In 1886 he went to Paris, and a year later married a young Austrian actress, Olga Wohlbrück. In 1888 he settled in Berlin. Bern is the author of: "Gestrüpp," 1876; "Deutsche Lyrik seit Göthe's Tode," 1877; "Meine Geschiedene Frau," 1878; "Sich Selbst im Wege," a sketch of stage-life, 1877; "Ein Stummer Musikant," 1879; "Liliput," 1879; "Anthologie für die Kinderstube," 1879; "Illustrirter Hausschatz für die Jugend," 1880; "Aus der Gesellschaft," an almanac, 1881-82; "Am Eigenen Herd," 1886; "Deklamatorium," anthology, 1887; "Lustige Stunden," 1887; "Himmelan!" 1889; "Christliches Gedenkbuch," 1893; "Evangelisches Deklamatorium," 1895.

G.

BERNAL, ISAAC (MARCUS) DE ALMEYDA: Spanish martyr; born in Montilla 1633; burned at the stake in St. Iago de Compostella

(Galicia, Spain), in the month of March, 1655, at the age of twenty-two. He was a nephew of Abraham Nuñez BERNAL. When only seventeen (1650) he had been thrown into the prison of the Inquisition at Valladolid. Daniel Levi de Barrios mentions Bernal in his "Govierno Popular Judayco" as a relative. In the volume entitled "Elogios" (see Abraham Nuñez BERNAL) there is a "Relacion del felice martirio del invicto Ishack de Almeida Bernal que murio vivo en fuego santificando el nombre del Señor . . ."; as well as poems in honor of Bernal by Daniel á Ribera, Jonah Abravanel, Jacob de Pina, Samuel de Castro, Abraham Castanho, Isaac Israel, Daniel Arango, and a sermon by Jacob Abendana.

D. G.

BERNAL, MAESTRO: A Marano, ship-physician on the first voyage of Columbus to America. He had lived in Tortosa and had undergone public penance in October, 1490, as an adherent of Judaism. Columbus, by his arrogant conduct, aroused the enmity of the physician, who instigated a conspiracy against the admiral in Jamaica which seriously affected his destiny.

BERNAL, RALPH: Politician and art-collector; died in 1854. His ancestors were of Spanish-Jewish origin. His father was **Jacob Israel Bernal,** a West-Indian merchant, who in 1744 refused the office of *gabay* (treasurer) of the Portuguese congregation because he decided to marry Josebeth Baruh, a "Tudesca" or German Jewess, which he was only allowed to do under humiliating conditions (Picciotto, "Sketches of Anglo-Jewish History," p. 167). Ralph was entered at Christ's College, Cambridge, where he took his degrees of B.A. and M.A. in 1806 and 1809 respectively. In 1810 he was called to the bar as a member of Lincoln's Inn, but inheriting extensive property in the West Indies, he preferred a parliamentary to a legal life. For thirty-four years (1818–52) he had a seat in the House of Commons, where he represented the city of London from 1818 to 1820, and Rochester from 1820 to 1841. During that period he spent £66,000 in election contests. In the latter year he contested the constituency of Weymouth, and was seated on petition. After representing that borough from 1841 till 1847, he returned to Rochester, continuing to sit for it until his retirement from political life in 1852. His parliamentary career was uneventful, although throughout he was prominent in the ranks of the Whigs, and from 1830 till 1850 acted as chairman of committees. Though brought up as a Christian, he recognized the claims of his Jewish ancestry by supporting the bills for the removal of Jewish disabilities, introduced while he was in the House. He was known in his day chiefly as an art-collector in antique china and plate; and at his death an attempt was made to secure his collection for the nation, but it was unsuccessful, and the collection was sold in 1855. Two catalogues of his works of art were issued. He was twice married, and had issue by both wives.

J. G. L.

BERNARD, ABRAHAM: Russian physician; born in 1762. He studied at London in 1789; practised medicine in Hasenpoth, Courland, Russia; became district physician in Shawli, government of Wilna; was subsequently appointed inspector of various military hospitals in Lithuania; and in 1809 was made chief surgeon of the hospital of Slonim. He also received the title of court councilor; practised at Mitau in 1810–11; and then settled in Moscow. He has published: "Gründe für die Inokulation; dem Lithauischen Landvolke Gewidmet," Mitau, 1799; "Observations sur l'Enterrement Prématuré des Juifs," Mitau, 1799; and a German translation of this last, under the title "Bemerkungen über das Frühe Beerdigen der Jüdischen Leichen," Mitau, 1802; "Medicinisch-Chirurgische Beobachtungen in den Kriegshospitälern zu Kobrin und Slonim Gesammelt," n. d.; and "Behandlung eines Epidemischen Wurmfiebers, das im Jahr 1796 in Kurland Herrschte," in Hufeland's "Journal für Praktische Arzneikunde," 1797, iv. 4, No. 5.

H. R.

BERNARD OF CLAIRVAUX (generally known as **St. Bernard**): Church father; born 1091, near Dijon, France; died at Clairvaux Aug. 20, 1153. He was originally a monk of the Cistercian order at Citeaux; but, on being appointed abbot of Clairvaux, he founded a branch order known by his name, 160 monasteries of which came into existence during his life. He vigorously opposed Abelard in 1140, as well as the introduction of the dogma of the immaculate conception.

St. Bernard is distinguished for his activity in forming the second crusade in 1145–46, during which he traveled through France and Germany, preaching the crusade. One of the consequences of this was a succession of massacres of the Jews throughout the Rhine valley. This called forth an energetic protest by St. Bernard, which was sent to England, eastern France, and Germany (Bouquet, "Recueil," xv. 606). In this letter he laid down the general lines of policy with regard to the Jews by which the Roman Catholic Church has since been guided; and his arguments are those generally given, though without his name, in more recent pronouncements. According to St. Bernard, Jews are not to be disturbed or destroyed, because they are living symbols of the Passion; for which they are to be punished mainly by dispersion, so that they shall be witnesses. But they will ultimately be converted. How can this be if they are ground down? At the same time St. Bernard approves of the papal policy which declares that all usury on debts due by Crusaders shall lapse during their absence in the Holy Land.

G. J.

BERNARD (also **Domeier**), **ESTHER** (*née* **Gad**): German poetess and authoress; born at Breslau, Silesia, about 1770; died about 1814. On her mother's side Bernard was a granddaughter of Jonathan Eybeschütz, the famous rabbi of Prague and Hamburg.

At the age of about twenty she was married to a certain Bernard, with whom she removed to Berlin. She preferred the latter place to Breslau for the reason she herself gave in a letter to Jean Paul Richter in the following words: "Dort wird man über den Menschen nie den Juden vergessen; und besässe ich die grössten Verdienste, so würde ich doch in Eure besseren Zirkel nicht aufgenommen werden" (There [in Breslau] the Jew is never forgotten in the man, and were I to possess the highest merit, I should never be admitted to your higher circles). Her marriage with Bernard must have been unhappy, for after a few years she obtained a divorce and married Dr. Domeier of London, with whom she went to live in Malta.

Even in her girlhood Esther Bernard showed great talent for poetry and literature. Before her marriage to Bernard she contributed many poems to "Plumken's Magazin" and Rausch's "Unterhaltungen." To the latter she contributed also a short story in English, "Marcus and Monima," 1795. While the wife of Bernard she wrote "Beschreibung einer Wasserreise von Aussig Nach Dresden" (in "Deutsche Monatsschrift"); "Eine Nachricht über das Dresdener Museum" (in "Archiv der Zeit," Nov., 1799, p. 445). She was also a contributor to "Der Cosmopolit" (June, 1795, pp. 577–599), and "Bäcker's Erzählungen" (1798, iv. 272) for which she wrote some poems. "Bäcker's Almanach" for 1800 contains two poems by Bernard, one of which has been set to music by Neuman, "Ueber Schiller's Piccolomini," in "Merkwürdigkeiten der Mark Brandenburg," March, 1800, p. 382.

In Berlin, Bernard made the acquaintance of Comtesse de Genlis, the authoress of "Les Mères Rivales," which she translated into German under the title "Die Beiden Mütter," 2 vols., 1800.

After her marriage to Dr. Domeier she wrote "Gesammelte Blätter," Leipsic, 1805; "Briefe Während Meines Aufenthaltes in England und Portugal," 2 vols., Hamburg, 1803; "Kritische Auseinandersetzungen Mehrerer Stellen in dem Buche der Frau von Staël über Deutschland," Hanover, 1814.

At the erection of the Wilhelmsschule in Breslau, in 1791, for the instruction of Hebrew children, Esther Bernard celebrated the event in a poem in which she hailed the dawning of an era of freedom and equality for the Jews of Silesia.

S. S. R.

BERNARD OF GORDON: Christian physician; born probably at Gordon in Guienne, department of Lot, France; professor of medicine at Montpellier about the year 1300. His "Lilium Medicinæ" was much read by Jews, and several Hebrew translations of it are extant; *e.g.*, that by Jekuthiel b. Solomon (Maestro Bonsenior) of Narbonne in 1387 (שושן הרפואה); and another by Moses ben Samuel of Roquemaure (Gard), 1360 (פרח הרפואה).

G. M. S.

BERNARD, HERMANN: Teacher of Hebrew in the University of Cambridge, England; born of Austrian parents at Uman, or Human, a small town in southern Russia (at that time Poland), in the year 1785. His father being a converted Jew, he was brought up as a Christian. He went to England in 1825; settled in Cambridge as a private teacher in 1830; and was appointed "Præceptor Linguæ Sacræ" in the university on Oct. 18, 1837, succeeding Josephus Crool. He died at Cambridge, aged seventy-two, on Nov. 15, 1857, after teaching there with marked success for twenty-seven years.

Bernard published the following works: "The Creed and Ethics of the Jews Exhibited in Selections from the Yad ha-Ḥazaḳah of Maimonides" (1832); and "Ha-Menahel" (The Guide of the Hebrew Student), 1839. During Bernard's blindness in 1853 appeared "Me Menuḥot" (Still Waters), an easy, practical Hebrew grammar, in two volumes, by the Rev. P. H. Mason (afterward fellow and president of St. John's College) and Hermann Bernard. Bernard's lectures on the Book of Job, edited by his former pupil, Frank Chance (afterward a member of the Old Testament Revision Committee), appeared in one volume in 1864, but the editor's promised appendix was never published.

J. C. T.

BERNARDINUS OF FELTRE: Franciscan friar; born at Feltre, Italy, in 1439; died Sept. 28, 1494. He was one of the bitterest enemies the Jews ever had, and openly advocated their utter extermination. He traveled throughout Italy preaching a crusade against them, the burden of his sermons being: "Let Christian parents keep a watchful eye on their children, lest the Jews steal, ill-treat, or crucify them." As a worthy disciple of Capistrano, whom he held up as the type and model of a true Christian, he knew that his eloquence would be of no avail among the aristocracy, the members of which, guided by their interests, protected the Jews. He therefore endeavored to inflame the lower classes and to arouse the ill-will of the populace against the Jews.

His Preaching.

Because certain Jewish capitalists had been successful, he depicted all Jews as vampires and extortioners. In his sermons he was wont to say: "I, who live on alms and eat the bread of the poor, shall I be a dumb dog and not howl when I see the Jews wringing their wealth from Christian poverty? Yea! shall I not cry aloud for Christ's sake?"

These sermons bore fruit. At Ravenna Bernardinus incited the populace to such a degree that he was enabled to expel the Jews with violence and to send deputies to Venice to solicit a legal sanction for the expulsion. The authorities of Florence were constrained to order Bernardinus to quit the country, so that a rising which was imminent might be prevented (1487). At Campo San Pietro Bernardinus expelled a Jewish pawnbroker and established a gratuitous pawnbroking institution.

All Jewish occupations and enterprises were equally the objects of Bernardinus' reprobation. The inhabitants of Sienna engaged a Jewish physician. Bernardinus delivered a series of sermons in which he reproduced all the idle tales spread among the people respecting the hatred that the Jews nourished toward Christians. He related that a Jewish physician of Avignon on his death-bed recalled with delight the fact of having killed thousands of Christians through his drugs. The consequence of these sermons was that the lower classes and the women abstained from having recourse to the Jewish physician.

These partial successes notwithstanding, the efforts of Bernardinus mostly failed of effect. The Italian people were actuated by good common sense, and the authorities sorely hindered Bernardinus in his Jew-baiting. It was in the Tyrol that he succeeded in bringing about a bloody persecution.

While Bernardinus preached in the city of Trent, some Christians called him to account for his hatred of Jews, remarking that the Jews of Trent were worthy people. "Ye know not," replied the monk, "what misfortune these folks will bring upon you. Before Easter Sunday is past they will give you a proof of their extraordinary goodness." Chance favored him with a good opportunity.

Simon of Trent.

During Holy Week of the year 1475 a Christian child named Simon, who was three years old, was drowned in the Adige, and his body was caught in a grating near the house of a Jew. The Jew gave notice of this occurrence to Bishop Hinderbach. The body was removed to the church and exhibited, and Bernardinus and other hostile priests raised an outcry against the Jews, saying that they had put the child to torture and then slain him and flung him into the water. The bishop ordered the imprisonment of all the Jews, who, with one exception, when subjected to torture confessed. Thereupon all the Jews of Trent were burned, and it was determined that thereafter no Jew should settle in the city (see SIMON OF TRENT).

Bernardinus endeavored to make use of this occurrence to bring about the ruin of the Jews. At his instigation the corpse was embalmed, and commended to the people as a sacred relic. Pilgrimages to the remains were made by thousands of persons, and before many days several of them claimed they had seen a halo about the body. This new miracle was announced from every chancel, and fomented the excitement of the rabble against the Jews to such a degree that even in Italy they dared not go outside the towns, in spite of all that the doge and the Senate of Venice as well as Pope Sixtus did to stem the tide of hatred. Gregory XIII. canonized both—Bernardinus as a prophet, and Simon as a martyr.

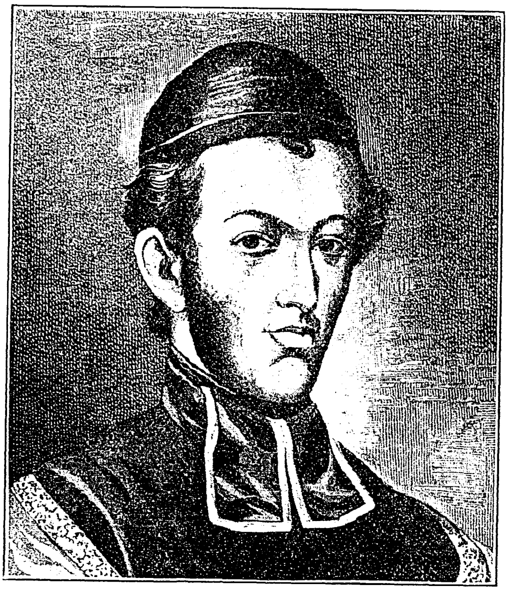
G. I. BR.

BERNAYS, ISAAC (known as Ḥakam Bernays): Chief rabbi in Hamburg; born 1792 at Mayence; died May 1, 1849, in Hamburg. After having finished his studies at the University of Würzburg, in which city he had been also a disciple of the well-known Talmudist R. Abraham BING, he went to Munich as private tutor in the house of Herr von Hirsch, and afterward lived at Mayence as a private scholar. In 1821 he was elected chief rabbi of the German-Jewish community in Hamburg, to fill a position where a man of strictly Orthodox views but of modern education was wanted as head of the congregation. After personal negotiations with Lazarus Riesser (father of Gabriel RIESSER), who went to see him in Mayence, Bernays accepted the office on characteristic terms; namely, that all the religious and educational institutions of the community were to be placed under his personal direction; he wanted to be responsible to the government only. Besides this he required a fixed salary, independent of incidental revenues, and wished to be called "clerical functionary" or "ḥakam," as the usual titles, "moreh ẓedeḳ" or "rabbi" did not seem to him highly esteemed at that time.



Isaac Bernays.

In 1822 he began the reform of the Talmud Torah school, where the poorer children of the community had till then been taught Hebrew and arithmetic. He added lessons in German, natural science, geography, and history as important parts of the curriculum, and by 1827 what had formerly been merely a religious class had been changed to a good elementary public school, which could well prepare its pupils for life. In spite of this great progress the council of the community wanted to take a greater part in the supervision of the course of instruction, and in consequence of differences with the ḥakam resulting from these claims, they withdrew the subvention of the school in 1830; but through the intervention of the senate of Hamburg this was again granted in 1832, though Bernays was denied the presidential seat he had till then occupied in the council of the school and was made instead "ephorus" of the school. In 1849 he died suddenly of apoplexy, and was buried in the Grindel cemetery.

Bernays possessed wide philosophical views, a rare knowledge of the Bible, Midrash, and Talmud, and an admirable flow of language: he was indeed a born orator. He was the first Orthodox German rabbi who introduced the German sermon into the service, and who tried to interpret the old Jewish feeling in modern form and to preserve the ancestral creed even in cultured circles. His antagonists were therefore to be found in the ranks of the ascetic fanatics of the "klaus" as well as among the adherents of the "Temple," a reform synagogue founded in 1819, against whose prayer-book Bernays had pronounced an anathema. By lectures on the Psalms, on Judah ha-Levi's "Cuzari," etc., he tried to strengthen and to deepen the religious life of the community, the institutions of which he supervised very carefully. His influence is still felt in the Hamburg community, where Jewish traditions and the study of Jewish literature are often found united with modern education.

Bernays left no literary works. A small anonymous essay, "Der Bibelsche Orient"—of great linguistic learning and original and wide historical views on Judaism—was supposed to have been written by him in early years; but he denied the authorship, and never in later life showed any conformity with the views of the little book. Of his sons the celebrated philologist Jacob Bernays, professor and chief librarian at the University of Bonn, kept faithful to the religious views of his father, while the well-known literary historian Michael Bernays, who was only fourteen years old on his father's death, was converted to Christianity. Bernays' best pupil was Samson Raphael HIRSCH, the well-known leader of modern Orthodoxy.

A. FE.
D.

BERNAYS, JACOB: German philologist; born at Hamburg Sept. 18, 1824; died at Bonn May 26, 1881. He was the eldest son of the ḥakam Isaac Bernays, who carefully guided his elementary education until he was sent, in 1844, to Bonn to attend the university. There he studied philology under G. Welcker and F. Ritschl, becoming particularly attached to the latter. His philosophical studies he pursued under Brandis. It was during his four years' career at the university that in competition for a gold prize he submitted a treatise on Lucretius, which won for him not only the prize, but also the admiration of Ritschl, who strongly advised him to devote himself to a professional career. The work was afterward published under the title "Die Ausgabe des Lucretius" (Leipsic, 1852). Bernays graduated in 1848, and in the same year issued his "Heraclitea" (Bonn, 1848). In the following year he became privat-docent at his *alma mater*, and in the same year published at Bonn his "Florilegium Renascentes Latinitatis." He was also engaged in editorial work on the "Rheinische Museum," founded by Niebuhr, and conducted by Welcker and Ritschl.

Organizes Jewish Theological Seminary.

The serious work of organizing the Jewish Theological Seminary at Breslau, the funds for the establishment of which had been provided by Jonas Fränkel, was actively begun in 1853, and the work was practically of a pioneer nature. Bernays was among the first to be called upon to be associated with Zacharias Frankel, Graetz, and Joël in this task of outlining the plan and method of study to be pursued in the new seat of learning, where rabbis were to be trained in accordance with the scientific educational ideas of the time, instead of with the antiquated methods of the yeshibah. Bernays was indeed peculiarly fitted to cooperate in such an undertaking; for, besides his profound classical learning and his university experience, he was a thorough Hebrew scholar and, moreover, was intensely Jewish in thought, feeling, and mode of life.

When the seminary was opened (Aug. 10, 1854) Bernays began his actual teaching; his subjects including not only regular courses in Greek and Latin, but special courses as well in the history of German literature, history of Hebrew poetry, the philosophy of religion, illustrated by the "Cuzari" and "Moreh Nebukim." In addition he conducted exercises in German style. The annual reports of the seminary were enriched each year with some treatise prepared by one or another of those connected with the institution. Bernays contributed three of these during the twelve years of his association with the faculty: "Ueber das Phokylidische Gedicht" (Berlin, 1856); "Die Chronik des Sulpicius Severus" (Berlin, 1861); and "Theophrastos' Schrift über Frömmigkeit" (Berlin, 1866). These were afterward published separately.

His Activity at Breslau.

Bernays' activity during his sojourn at Breslau was not, however, confined to his work at the seminary, as he had at once connected himself with the University of Breslau as privat-docent with remarkable success. As a consequence his general literary productiveness was considerable and noteworthy. In 1855 there appeared in Berlin "Die Lebensbeschreibung des Joseph J. Scaliger." Two years later was produced the work upon which, probably more than on any other one of his writings, his claim upon the notice of scholarly posterity will have to rest, "Grundzüge der Verlorenen Abhandlung des Aristoteles über die Wirkung der Tragödie" (Breslau, 1857). As late as 1882, in his report on the Aristotelian literature in the "Jahresbericht für die Alterthums-Wissenschaft," Dr. Susemihl of Greifswald speaks of the deluge of writings called forth by the "Grundzüge" as not having even then subsided. Another contribution to Aristotelian literature by Bernays during this period is "Die Dialoge des Aristoteles im Verhältniss zu Seinen Uebrigen Werken" (Berlin, 1863).

Called to Bonn University.

From his *alma mater* there came at last the recognition that was his due. Ritschl left his position at Bonn University in 1866; and the call was sent to Bernays to fill the place of assistant professor and chief librarian. With the greater responsibilities now thrust upon him, however, he still found time for the production of some of the best and most scholarly of his writings. "Die Heraklitischen Briefe" was published at Berlin in

1869. In 1872 appeared his "Uebersetzung der Drei Ersten Bücher von Aristoteles' 'Politik.'" "Ueber die unter Philo's Werken Stehende Schrift: 'Ueber die Unzerstörbarkeit des Weltalls'" was issued in 1876, and "Lucian und die Cyniker" in 1879. In 1880 there appeared "Zwei Abhandlungen über die Aristotelische Theorie des Dramas," which is a republication of the "Grundzüge" of 1857 and the "Ergänzungen zu Aristoteles' Poetik." His last work was "Phokion und Seine Neuern Beurteiler" (Berlin, 1881).

Suddenly, amid this congenial activity, Bernays was stricken with sickness, which very soon and unexpectedly ended fatally. He was but fifty-seven years of age; and the grief felt at his early demise was profound and wide-spread, alike among professors and students and his coreligionists. Though fifteen years away from the Jewish Seminary at Breslau, he still remained devoted to it, and bequeathed to it his Hebrew library.

Bernays' collected writings, edited by Usener, were published in two volumes, Berlin, 1885.

Bibliography: Brockhaus, *Conversations-Lexikon*, s.v.
s. M. Co.

BERNAYS, MICHAEL: German historian of literature; born at Hamburg Nov. 27, 1834; died at Carlsruhe Feb. 25, 1897; son of Ḥakam and brother of Jacob Bernays. He attended the Johanneum in his native city, where, principally under the guidance of Adolph Kraft, he devoted himself to the study of the classics. In a performance of "Antigone," arranged at the gymnasium by Töpfer, Bernays appeared as *Kreon*, and is said already at this time to have excited admiration by the originality of conception revealed in his rendering of the lines. A few months later he entered the University of Bonn, where at first he devoted himself to the study of law, but soon abandoned it for that of classical philology, which, notwithstanding many unfavorable external circumstances, he thenceforth prosecuted with unflagging perseverance. After completing his course at Bonn he went to Heidelberg, where he became a pupil of Gervinus and Holtzmann. Shortly after his arrival there Bernays, although then scarcely twenty-one years of age, lectured on Shakespeare before a literary student society which he had founded, and whose members had bestowed upon him the title of "master." In 1855 he received his doctorate and prepared to qualify himself for a professorship, while at the same time prosecuting his manifold literary labors.

Literary Labors.

In 1859 Bernays published a festival play for the one hundredth anniversary of Schiller's birthday, and in 1864 he composed verses on the tricentennial celebration of the birth of Shakespeare. Shortly afterward he wrote an explanatory text to Beethoven's music to "Egmont," which was not only frequently spoken, but produced so lasting an impression that, thirty years later, the directors of the Carlsruhe Theater ordered from Bernays a similar prologue for Mozart's "Requiem." Despite these occasional literary productions, however, Bernays steadily pursued his studies; and he even refused an offer from Treitschke to participate in the editorship of the "Preussische Jahrbücher," fearing that the duties of such a position might divert him from his main purpose. In the same year, 1866, he published his first celebrated work, "Zur Kritik und Geschichte des Goetheschen-Textes," in which he once for all established the necessity of applying the methods of classical philology in the criticism of the modern masters.

Shortly after the Franco-Prussian war, which so powerfully stimulated the general interest in the national poetry, Bernays received a call to the University of Leipsic, and such was his popularity as a lecturer there that within a very short time after his arrival the largest hall of the university was inadequate to accommodate the audience. It was the enthusiasm thus aroused that now induced the art-loving king of Bavaria, Ludwig II., to found a special chair of German literature—the first to be established—at Munich, and to summon Bernays thither as extraordinary professor, who thus, at the age of thirty-nine, already beheld the fulfilment of his dearest wishes. After an activity of eighteen months Bernays received a regular professorship, and this position he held until his resignation in 1889, when he removed to Carlsruhe.

Professor of German Literature.

In striking contrast with many university professors, Bernays rarely confined himself to the written copy before him; for he was gifted, above all, with a marvelous memory. It is said that he could recite lengthy poems and dramas, such as "Hermann und Dorothea" and "Tasso," from beginning to end without faltering or betraying any evidence of fatigue. With this faculty, which he had cultivated from early youth, Bernays united an unusually extensive yet accurate knowledge of the literature of ancient and of modern times. Thus he constantly enriched his discourse with copious and pertinent citations reflecting the inmost nature of the author under discussion. When to these qualifications are added a voice of exceptional flexibility and power, and a carefully studied eloquence of gesture, the great popularity of the lecturer can be readily understood.

As Author.

In his published works Bernays aimed to transfer the methods of classical philology to the domain of modern literary history and criticism, and endeavored to elevate these studies to an equality with the other academic sciences. Among his most popular writings, besides those mentioned, are: "Briefe Goethe's an F. A. Wolf," Berlin, 1868; "Zur Entstehungsgeschichte des Schlegelschen Shakespeare," Leipsic, 1872; "Der Junge Goethe"—a collection of the poems and letters of Goethe during the years 1764–76—3 vols., Leipsic, 1875; "Goethe und Gottsched"—two biographies—Leipsic, 1880; an introduction to a revised edition of Schlegel and Tieck's translation of Shakespeare, Berlin, 1871–72; an introduction to a centenary edition of Voss's translation of Homer, Stuttgart, 1881.

Apart from his literary activity, Bernays was frequently called upon to officiate on public occasions; as, for example, in 1883, when he was requested by the city of Munich to preside at the public dinner given in celebration of the emperor's birthday; and in 1892 at Carlsruhe, when he delivered the dedicatory address at the unveiling of the Scheffel monument (see Bettelheim, "Biographische Blätter," 1895). In contradistinction to his brother Jacob, who strictly observed the ordinances of Judaism, Michael Bernays early embraced Christianity.

BERNBURG. See Anhalt.

BERND, JULIUS D.: American merchant and philanthropist; born in 1830; died at Pittsburg, Pa., Nov. 30, 1892. Bernd was a successful business man and highly esteemed by his mercantile associates in Pittsburg. He was a member of the chamber of commerce. Being actively interested in philanthropic work, he was a director of the Gusky Orphanage and Home of Western Pennsylvania, an earnest worker for the Humane Society, and a member of the Rodef Sholem congregation. By his will he left a large amount to various charities, particularly to the Union of American Hebrew Congregations, the Hebrew Union College, and the Gusky Orphanage. After giving to every charitable institution in the county of Allegheny, without regard to creed or color, he bequeathed the residue of his estate, share and share alike, to the Hebrew Union College of Cincinnati, O., and to the city of Pittsburg, Pa., the bequest to the city being conditioned on its creating a department or alcove in the Carnegie Library of Pittsburg, to be known as the "J. D. Bernd Alcove," which was accordingly instituted.

A. J. Co.

BERNFELD, SIMON: German publicist and rabbi; born in Stanislau, Galicia, Jan. 6, 1860. His father, who was a good rabbinical scholar and also well versed in secular knowledge, was his first instructor. He took to writing Hebrew very early; and at the age of thirteen he translated a German novel into that tongue. His first article, "About the Expulsion of the Jews from Nuremberg," was published in "Ha-Maggid" of 1879 (No. 22), as were various other contributions from his pen.

In 1879 Bernfeld went to Königsberg, where he held for some time an editorial position on M. L. Rodkinson's Hebrew weekly, "Ha-Ḳol." In the fall of 1880 he left Königsberg for Breslau, where he spent several months in great distress. Early in 1881 he went to Lyck, Prussia, to become the assistant of David Gordon, editor of "Ha-Maggid." He remained there for nearly a year, and continued to contribute articles and editorials for that periodical for several years after leaving Lyck. He returned to Königsberg late in 1881, and after a year's preparation entered the university of that city, where he remained until the summer of 1883.

A brighter period in Bernfeld's life began with his arrival in Berlin in the summer of 1883. He entered the university of the German capital, and at the same time attended the Hochschule für die Wissenschaft des Judenthums. In 1885 he became a regular contributor to "Ha-Meliẓ" (St. Petersburg), and in the same year obtained his doctor's degree. In March, 1886, he was elected chief rabbi of the Spanish and Portuguese community of Belgrade, the capital of Servia, and director of the Jewish school in that city. This position he held for about seven years.

Bernfeld now resides at Berlin, and occupies himself mainly with writing in Hebrew and German. He is a German writer of varied and considerable attainments. His "Juden und Judenthum im Neunzehnten Jahrhundert" (Berlin, 1898), which forms vol. iii. of the series "Am Ende des Jahrhunderts," edited by Dr. Paul Bornstein, is a work of merit, and the same can be said of his essay, "Der Talmud, Sein Wesen, Seine Bedeutung, und Seine Geschichte" (Berlin, 1900). His new translation of the Bible, now in course of publication, has also been highly praised (see "Allg. Zeit. des Judenthums," 1901, No. 13). His chief significance, however, lies in the field of Neo-Hebraic literature. He belongs to the younger class of clear and forceful writers who have brought new life into modern Hebrew literature and have lifted the journalistic part of it to an eminence which it had not before attained. A clever journalist, Bernfeld writes on various subjects. In addition to innumerable articles in various periodicals, he has compiled popular works on history, philosophy, and kindred subjects; while in the field of the history of the Jews, of which he made a special study, he has done valuable original work.

The most important of his works are: "Da'at Elohim" (Knowledge of God), a history of the religious philosophy of the Jews from rudimentary philosophical systems of the Bible down to that of Asher Ginzberg, the thinker of modern national Judaism (Warsaw, 1897); "Dor Tahapukot," a monograph on the Mendelssohnian period (*ib.* 1896–98); and biographies of S. L. Rapoport (1899), of Michael Sachs (Berlin, 1900), and of Gabriel Riesser (Warsaw, 1901).

s.

BERNHARDT, MARTIN: German neuropath and medical author; born at Potsdam April 10, 1844. He was educated at the gymnasium of his native place and at the University of Berlin, where he studied under Virchow and Traube. After graduating as M.D. in 1867, he was appointed assistant to Leyden at the Universitäts-Klinik at Königsberg; and two years later, physician at the Charité (free dispensary and hospital) at Berlin under Westphal. The Franco-German war interrupted his clinical work, for he went to the front with the Landwehr, receiving a medal for bravery under fire. On his return in 1872, he was appointed privat-docent of medicine and as specialist for neuropathy at the University of Berlin, and, ten years later, assistant professor.

Bernhardt, in addition to contributing numerous articles to medical publications, has been the editor-in-chief since 1885 of the "Centralblatt für die Medizinischen Wissenschaften," and the correspondent of neuropathy and electrotherapy for Virchow-Hirsch's "Jahresberichte." He is also one of the collaborators of Eulenburg's "Realencyklopädie der Medizin." His principal works are: "Die Sensibilitätsverhältnisse der Haut," 1873; "Beiträge zur

Symptomatologie und Diagnostik der Hirngeschwülste," 1881; "Electricitätslehre für Medizin," 1884, in collaboration with Professor Rosenthal: "Erkrankungen der Peripherischen Nerven," 1895–1897.

S. E. Ms.

BERNHARDT, SARAH (ROSINE BERNARD): French actress; born at Paris Oct. 22, 1844, of Dutch Jewish parentage. She was received into the Roman Catholic Church at the request of her father. Her early years were spent at the Convent Grand-Champs, Versailles, where she remained until fourteen years old, when she was received into the Conservatoire, where she studied dramatic art under Prévost and Sanson. Though, like Rachel, naturally inclined to comedy, Bernhardt won a prize for her work in tragedy. On Aug. 11, 1862—four years after beginning her dramatic studies—she made her début at the Comédie Française in "Iphigénie." Her success was but partial; and the experiment—for such it really was—resulted in further study and a short trip to Spain. On her return to Paris the young actress went to the Théâtre du Gymnase, the Porte-Saint-Martin, and the Odéon (1864), and, a year later, back again to the Porte-Saint-Martin. There she appeared as *Armande* in "Les Femmes Savantes," as *Cordelia* in "King Lear," and in her first male rôle, *Zanetto*, in François Coppée's "Le Passant" (1869).

The outbreak of the Franco-German war interrupted her career for a time, the interval being spent in study and nursing the wounded. Her next appearance was on Nov. 6, 1872, when she played *Mlle. de Belle-Isle* at the Comédie Française. For the next seven years Bernhardt remained a member of this famous institution, of which she became a "sociétaire" in 1875. Her greatest artistic triumphs were achieved there in "Phèdre"; "Andromaque"; "Zaïre"; "Alcmène"; "Ruy Blas" (*Marie de Neubourg*); "La Fille de Roland" (*Berthe*); "Rome Vaincue" (*Posthumia*, the blind woman); "Le Sphinx"; "L'Etrangère"; and in the classic plays of Racine and Corneille.

In 1879 Bernhardt's eccentric behavior and temper led to a severance of her associations with the Comédie Française; and on a civil suit the actress was ordered to pay damages amounting to 100,000 francs. After a tour to London, Copenhagen, and America (1880–81) with a company of her own, Bernhardt returned to Paris, where she assumed the direction of the Théâtre Ambigu (1882). The same year she was married to the actor Jacques Damala (died 1889), and played *Pierrot* at the Trocadéro in a pantomime written by Richepin. She afterward leased the Théâtre Vaudeville, which she opened Dec. 11, 1882, with "Fédora," playing the title-rôle herself. Soon after, she returned to the Porte-Saint-Martin, which she opened Sept. 17, 1883, with "Frou-Frou." This was followed by "La Dame aux Camélias," "Nana Sahib," and "Théodora." During the season of 1886–87 she toured the United States, and on her return to the Porte-Saint-Martin appeared in "La Tosca." She revisited America in 1888–89, and on her return played at the Porte-Saint-Martin in "Jeanne d'Arc" and "Cléopatre" (1890).

Then followed an interval during which the actress toured Europe. Returning to Paris, she engaged in 1893 the Théâtre de la Renaissance, producing "La Femme de Claude," Lemaître's "Les Rois," Bardé's "Médée," "Magda," Rostand's "La Samaritaine" and his "La Princesse Lointaine" (1895), and *Yzeil* in D'Annunzio's "La Ville Morte" (1898). While leasing this house, Bernhardt gave the use of it to Duse, who played the French actress's rôle in "La Dame aux Camélias," while Bernhardt played the title-rôle in "Magda."

Her latest and most successful lease of a theater was when she took the Théâtre de l'Opéra Comique, formerly known as the Théâtre Municipal des Nations, and converted it at considerable cost into the Théâtre de Sarah Bernhardt (Jan. 18, 1899). Here she first essayed *Hamlet* and later the *Duc de Reichstadt* in Rostand's "L'Aiglon." In 1900–01 she again toured the United States, with Coquelin.

In addition to being an actress, Bernhardt is a dilettante sculptor and author. Her bust of Sardou attracted attention. Her writings consist of a book, "Dans les Nuages" (1878), and "L'Aveu," a play produced at the Odéon in 1888. She has also written a rather frank autobiography, evoked by Marie Colombier's attack on Bernhardt in her notorious pamphlet "Sarah Barnum."

As an actress, Sarah Bernhardt is the embodiment of the theatrical; every pose, every movement, every intonation of her voice being the result of careful, patient study. She belongs to the intellectual school of actors, splendidly intelligent, but rarely touching the heart. Bernhardt is always admirable, but never aught save Bernhardt. Her voice is remarkable for its flexibility and timbre, and her grace of movement is one of her chief attractions. Whether she plays the blind *Posthumia*, or *Frou-Frou*, or *Hamlet*, or the *Duc de Reichstadt*, her personality is always preponderant and she ever remains the French actress, Sarah Bernhardt.

BERNHARDY, GOTTFRIED: German philologist and historian of literature; born at Landsberg in the Neumark, province of Brandenburg, March 20, 1800; died at Halle May 14, 1875. His father was a merchant who had been successful and prosperous, but who in Gottfried's childhood had a series of business reverses that left him in a position where he had to struggle for the bare necessities of life and with but little prospect for providing the boy with a liberal education. At this juncture when the lad was about nine years old, two well-to-do brothers of his father, living in St. Petersburg, arranged to provide the means for his schooling, and he was entered at the Joachimsthal Gymnasium, Berlin, where he remained six years, being admitted to the Berlin University in 1817. Here in the pursuit of his philological studies, to which he now especially applied himself, he had the good fortune to study under F. A. Wolf—though the latter was already in the declining years of his life—as well as under Böckh and Buttmann. He received his degree as doctor of philosophy on Oct. 30, 1822, and in the same year published his first work, "Eratosthenica," a collection of the widely scattered fragments of the early Alexandrian astronomer.

In 1823 he became privat-docent in philology at his alma mater, and two years later was appointed associate professor. He received a call from Halle in 1829 to assume the position of full professorship in the university there, and that of director of the philological seminary. This call he accepted, and Halle was the sphere of his activity for the rest of his life. During the two years from 1841 to 1843 he officiated as prorector of the university, and in 1844 he was appointed chief librarian, the duties of which position he fulfilled in addition to his work of instruction—not in any perfunctory fashion, but by reorganizing the library of the university in a complete and systematic manner.

From the very beginning of Bernhardy's professorial career he prosecuted his literary labors as well. During the first year of his advent to Halle, there appeared his "Wissenschaftliche Syntax der Griechischen Sprache." In 1830 the first edition of his "Grundriss der Römischen Litteratur" was published. Of this successive revisions were issued in the years 1850, 1857, 1865, and 1872. The "Grundlinien zur Encyklopädie der Philologie" was issued in 1832. In the following year, work was begun on his version of Suidas, but the appearance of Gatsford's great edition at Oxford necessitated a change of plan, and the work was not completed until 1851. Upon its publication the king of Prussia conferred an order upon Bernhardy. The first part of the "Grundriss"—comprising the prose literature—was published in 1836, subsequent editions being issued in 1861 and 1867-72. The poetical portion, constituting the second part, was published in 1845. This went into a second edition in 1856, and was again republished in 1859 and 1867-72. Bernhardy began the editing of the "Bibliotheca Scriptorum Latinorum" in 1838; but the work was not continued beyond the first volume, as his contributors resented his extraordinary methods of revision by voluminous additions and amendments. His last literary work was the collecting and editing of the minor writings, both Latin and German, of F. A. Wolf, which were issued in two volumes in 1869.

Bernhardy had always manifested a deep interest in all the local educational work at Halle, and had frequently been active in supervising the examinations. In 1867 the city of Halle honored him by appointing him a member of the Curatorium of the newly erected gymnasium. Five years before he had been appointed privy councilor (*Geheimer Regierungs-Rath*). The fiftieth anniversary of his doctorate was enthusiastically celebrated in Oct., 1872—professors, students, and civil authorities joining in making the event notable and worthy. His former students, in honor of the occasion, collected a fund of one thousand thalers to establish a Bernhardy fund to aid students of philology.

He was married in 1829 to Henrietta Meyer of Berlin (died 1853). It is said by Le Roi—who, however, gives no data as to time or place—that Bernhardy lived during the later period of his life as a Christian, and suggests that he was possibly converted during his student life. He attained the age of seventy-five years, dying in honor amid the scenes of his great activity. Professor Beyschlag delivered the funeral oration.

BERNHEIM, ABRAM C.: American lawyer; born at New York city Feb. 1, 1866; died there July 24, 1895. Bernheim was educated in public schools of his native city and later in the Columbia College, subsequently taking a course of instruction at the University of Berlin. During his attendance at Columbia College he was twice selected prize lecturer on the political history of the state of New York, and in 1894 was made permanent lecturer in this branch.

Bernheim contributed money and books to his *alma mater*, and took deep interest in free art exhibits on the east side of New York and in the University Settlement Society, of which latter he was one of the founders and the treasurer. He was also secretary of the Tenement House Building Company for the improvement of the dwellings of the poor. He was a member of the Stock Exchange and of the Chamber of Commerce.

In addition to his philanthropic work, Bernheim wrote a number of articles on sociological and political subjects, among them being: "The Relations of the City and the State of New York," in the "Political Science Quarterly," Sept., 1894; "A Chapter on Municipal Folly," in the "Century Magazine," May, 1895; "Results of Picture Exhibitions in Lower New York," in the "Forum," July, 1895.

Bibliography: *The Critic*, Aug. 3, 1895, p. 75; *Jewish Chronicle*, Aug. 16, 1895, p. 6.

A. A. Sz.

BERNHEIM, ERNST: German historian; born at Hamburg Feb. 19, 1850. On completing his elementary and preparatory studies, he attended the universities of Berlin, Heidelberg, Strasburg, and Göttingen. It was from Strasburg that he received his degree as doctor of philosophy, having offered as his thesis a study on "Lothar III. und das Wormser Konkordat." This was published in that city in 1874, and though the production of a youth of but twenty-four years, which frankly stated the occasion of its preparation, it was at once received as something more important than an ordinary doctorate dissertation. It was in fact a scholarly pursuit along the line of research undertaken by Friedberg, whose demonstration of the historical errors based on the "Narratio de Electione Lotharii" Bernheim confirms by a mass of newly discovered evidence. He shows, too, that Lothar's election was mainly the work of Archbishop Adelbert of Mayence.

In the year after the appearance of "Lothar III." he was appointed privat-docent at the University of Göttingen (1875). Here he produced "Zur Geschichte des Wormser Konkordats" (Göttingen, 1878), in which he pieces together from original sources a picture of the party struggles of 1122, the extremist tendencies of the papal and imperial factions, and the development of a compromise which was ultimately embodied in the Concordat. He shows, too, how Henry V. strove to free himself from the limitations of the Concordat. This production firmly fixed his place among the historical scholars of Germany. Two years later appeared his "Geschichtsforschung und Geschichtsphilosophie," Göttingen, 1880. In 1882, while still at Göttingen, he joined Weizsäcker and Quidde in the task of editing the "Deutsche Reichstagsacten unter Ruprecht," which was published under the supervision of the Historische Kommission in Munich, and the third volume of which was published at Gotha in 1888. The work is indeed monumental, covering as it does only the first decade of the fifteenth century. Fully three-fourths of the material had never before been published.

In the mean time, Bernheim had received a call to the University of Greifswald as assistant professor of history (1883). Upon his marriage (1885) he embraced Christianity. Here, besides his work in the lecture-room, he continued his labor on the "Reichstagsacten," and wrote his "Lehrbuch der Historischen Methode," Leipsic, 1889. In the same year he was promoted to be professor ordinary of history. Two years later, in conjunction with Wilhelm Altmann, he completed "Ausgewählte Urkunden zur Erläuterung der Verfassungsgeschichte Deutschlands im Mittelalter," Berlin, 1891. Considerable stir was occasioned in university and general pedagogic circles by the appearance of his eighty-page pamphlet, "Der Universitäts-Unterricht und die Erfordernisse der Gegenwart," Berlin, 1898. In this treatise he attacks the German system of university instruction, and insists that the lecture method should be modified by providing some efficient system of exercises in connection with the lectures.

In 1899 Bernheim was elected rector of the University of Greifswald, and in the following year the Order of the Red Eagle was conferred upon him.

BERNHEIM, HIPPOLYTE: French physician and neurologist; born at Mülhausen, Alsace. He received his education in his native town and at the University of Strasburg, whence he was graduated as doctor of medicine in 1867. The same year he became a lecturer at the university and established himself as physician in the city. When, in 1871, after the Franco-Prussian war, Strasburg passed to Germany, Bernheim removed to Nancy, in the university of which town he became clinical professor. When the medical faculty took up hypnotism, about 1880, Bernheim was very enthusiastic, and soon became one of the leaders of the investigation. He is a well-known authority in this new field of medicine.

Bernheim has written many works, of which the following may be mentioned here: "Des Fièvres Typhiques en Général," Strasburg, 1868; "Leçon de Clinique Médicale," Paris, 1877; "De la Suggestion dans l'État Hypnotique et dans l'État de Veille," Paris, 1884; "De la Suggestion et de son Application à la Thérapeutique," Paris, 1887.

BERNICH, SOLOMON (called also **Berenicus** and **Beronicus**): Scholar, poet, and adventurer of doubtful origin, who appeared in Holland about 1670 and attracted much attention. He spoke Greek, Latin, Italian, French, and Dutch with equal facility, and was able to recite by heart whole classical works and to put into verse on the spot anything that was told to him in prose. He was thought by many to be an escaped monk from France, but Yung ("Alphabetische Liste Aller Gelehrten Juden . . . ," Leipsic, 1817) states that he was a Jew, a native of Eger, in Bohemia, who was educated in Vienna and in Italy. Bernich, or Berenicus, despised conventional scholarship and all the restraints of cultured life, and chose to associate with the lower classes; working sometimes as a chimney-sweep, and sometimes as a grinder of knives and scissors. He was found dead in a swamp, in the outskirts of Rotterdam, into which he had probably fallen while in a state of intoxication. Two works from his pen—one a collection of Latin poetry with a Dutch translation (Amsterdam, 1692; 2d ed., *ib.* 1716), and the other called "Georgarchontmachia," with a biography of the author by B. Borremansius—are in the British Museum general catalogue under the name "Beronicus, Petrus Joannes."

BERNOT, JULIE. See Judith, Mme.

BERNSTAMM, LEOPOLD BERNARD: Russian sculptor; born at Riga April 20, 1859. At the age of thirteen he entered the studio of Prof. D. Jensen at Riga, and at fourteen the Imperial Academy of Fine Arts of St. Petersburg, where he was awarded the highest prizes. In 1883 he made a number of busts of celebrated Russians, among them being those of Dostoyevski, Rubinstein, Fonvisin, and K. Brandt. This established his reputation as a portrait-sculptor, and within the next two years he made about thirty busts of various representatives of Russian art, science, and literature.

After a sojourn in Rome (in 1884), where he supported himself by making portraits from photographs, Bernstamm went to Florence, and there continued his studies under Professor Rivalti. At this time he exhibited in Rome his "Neapolitan Fisherman," "David," and "Head of a Monk," all of which received high commendation. In 1885 he settled in Paris, where he won the friendship of Dr. Labadie-Lagrave. He soon became famous by his sculpture-portraits of eminent Frenchmen, such as Renan, Sardou, Flaubert, Halévy, Coppée, Déroulède, Zola, and many others. In 1890 Bernstamm exhibited his works at the galleries of George Petit. The exhibition attracted considerable notice, and was visited by President Carnot. It consisted of a collection of charming statuettes, reproducing in an astonishing variety of costumes all foreigners that had come to Paris during the Exposition of 1889.

Since 1887 Bernstamm has exhibited every year at the salon of the Champs-Elysées, at which he has manifested his talent on a larger scale in such works as "Au Pilori," "The First Arrow," and "The Executioner of John the Baptist." In 1889 he was awarded, by the jury of the Exposition, a silver medal for various groups and busts. He also produced "Floquet," a plaster cast; "La Modestie," a marble bust bought by Count Torelli, chamberlain of the king of Italy in 1891; "Christ and the Woman Taken in Adultery" (1894); and "Jules Chéret," bronze bust (1895). In 1896 he was called to Tzarskoe-Selo to make busts from life of the emperor Nicholas II. and the empress of Russia. For the Exposition of 1900 he finished a group intended for the czar: "Peter the Great Embracing Louis XV." In 1901 he produced the statue of Rubinstein ordered by the St. Petersburg Conservatory. Some of his works were bought by Czar Alexander III. and some by the Italian government. Bernstamm was made chevalier of the Legion of Honor in 1891.

H. R. J. G. L.

BERNSTEIN, AARON (DAVID) (pseudonym, **A. Rebenstein**): German publicist, scientist, and reformer; born April 6, 1812, in Danzig; died Feb. 12, 1884, in Berlin. His was one of the most versatile and productive Jewish minds of the nineteenth century. Intended by his parents for a rabbi, he received a thorough Talmudical education, which made him a formidable adversary in the controversies on religious reform in which he later participated (Holdheim, "Gesch. der Entstehung . . . der Jüdischen Reformgemeinde in Berlin," p. 54, Berlin, 1857). At an advanced age, when he was recognized as one of the great political leaders of Germany, he could still write in the style and the spirit of an old-time Polish rabbi ("Ha-Ẓefirah," 1875, ii., No. 2).

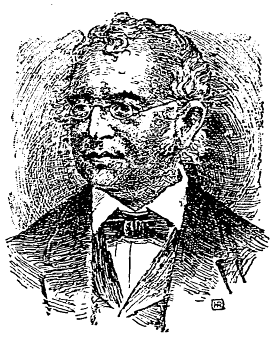
Early Debut as a Writer.

He went to Berlin at the age of twenty, and by his own efforts, without the help of school or university, familiarized himself with the German language and literature. He soon began to write on many and diverse subjects, and attracted attention by his graceful and lucid style as well as by his force and originality. For some years he was an antiquarian bookseller in Berlin; but his literary labors absorbed most of his attention; and finally he took up writing as a profession.

His earliest works, most of which appeared under his pseudonym, are: A translation of the Song of Songs, with critical notes and a bibliographical preface by Zunz (Berlin, 1834); "Plan zu einer Neuen Grundlage für die Philosophie der Geschichte" (*ib.* 1838); "Novellen und Lebensbilder" (*ib.* 1840); "Eine Abhandlung über die Rotation der Planeten" (*ib.* 1843). In the same year appeared his anonymous pamphlet, "Zahlen Frappieren," a defense of the Prussian Ministry of Finance against the attack of Bülow-Cummerow. It created a sensation in political circles, and was thought by many to have been written by the minister of finance himself.

His scientific and political studies did not prevent Bernstein from taking an interest in Jewish affairs; and he became the principal contributor to Wilhelm Freund's monthly magazine, "Zur Judenfrage," which appeared in Berlin from July, 1843, to June, 1844. Bernstein was one of the leading spirits in the inception of the movement for religious reform in those days, and his great rabbinical knowledge and his conciliatory spirit made even the opposition respect him. One of the most acute and objective writers against the Reform movement said that of Rebenstein's attacks on Judaism it might be said "Faithful are the wounds of a friend"; while the remainder of the verse (Prov. xxvii. 6), "but the kisses of an enemy are profuse," was appropriate to the defense of it advanced by some of his contemporaries (see Phineas M. Heilprin, "Teshubot be-Anshe Awen," Frankfort-on-the-Main, 1845, letter I).

Active in Jewish Affairs.



Aaron Bernstein.

Bernstein was one of the committee appointed March 10, 1845, to work out a plan for a line of progress in Jewish religious affairs. A fragment of a remarkable speech which he delivered at the meeting which chose that committee is preserved in Holdheim's above-mentioned work, where, by the way, Bernstein is considered to have been the only "theologian" present. He agreed with Dr. Stern in recognizing the importance of the Talmud and in deploring the arrest of its development along the lines of the exigencies of practical life. Bernstein was chosen to edit and amend the "Entwurf" of the committee; and he is one of the principal authors of the famous "Aufruf" for the organization of a religious Reform movement among the Jews in Germany, which appeared in the Berlin newspapers early in April, 1845. He and Dr. Stern were the authors of the prayer-book for the newly organized Reform congregation of Berlin; and while Bernstein refused to become its rabbi, it seems that he often officiated in that capacity before a regular rabbi was engaged. He was also the editor of the monthly "Reform-Zeitung: Organ für den Fortschritt im Judenthum," which appeared in Berlin in 1847.

Imprisoned Under Press Law.

In 1849 Bernstein founded the "Urwählerzeitung," a political monthly which advocated the principles of political reform in the same conciliatory but determined spirit that had characterized his advocacy of religious Reform in Judaism. It soon gained a large circulation and brought the editor much fame; but it also brought him into inevitable conflict with the authorities, which resulted in a sensational trial under the press law, with a sentence of four months' imprisonment for the editor. In the same year when the "Urwählerzeitung" was suppressed (1853), Bernstein founded the Berlin daily "Volkszeitung," which soon attained a large circulation, and of which he remained the chief editorial writer for more than a quarter of a century. In that paper first appeared Bernstein's valuable popular scientific essays, which later were published in book form as "Naturwissenschaftliche Volksbücher" (4th ed., Berlin, 1880, 21 vols.), and were translated into the principal European languages. A Hebrew translation, entitled "Yedi'ot ha-Ṭeba'" (Knowledge of Nature), appeared in Warsaw, 1881–91. It was prepared partly by P. Rudermann (see S. Bernfeld's autobiographical sketch in "Sefer Zikkaron" (Book of Remembrance), but mostly by D. Frischmann.

Bernstein also wrote two novels of Jewish life, "Vögele der Maggid" and "Mendel Gibbor," which first appeared in Josef Wertheimer's "Jahrbuch für Israeliten" and then in book form (Berlin, 1860; 7th edition, *ib.* 1892). They were translated into many languages, even into Russian (St. Petersburg, 1876), and place their author among the most important ghetto novelists, second only to Kompert (Kayserling, "Jüdische Litteratur," p. 171, Treves, 1896). These novels were, unlike the ghetto stories of to-day, written for Jews only, and therefore employ the German-Jewish idiom to an extent that almost brings them into the class of dialect stories. Bernstein's "Ursprung der Sagen von Abraham, Isaak, und Jakob" (Berlin, 1871) is a valuable contribution to Biblical criticism, although Wellhausen ("Prolegomena zur Geschichte Israels," i. 31) objects to its political tendencies. The most important of Bernstein's political essays and articles appeared in book form under the title "Revolutions- und Reaktionsgeschichte Preussens und Deutschlands, von den Märztagen bis zur Neuesten Zeit" (Berlin, 1883–84, 3 vols.). He also wrote numerous other less important works on a great variety of subjects.

A Practical Scientist.

The achievements of Bernstein as a practical scientist are also worthy of notice. As early as 1856 he patented an invention by which two distinct telegraph messages could be sent over the same wire at the same time. He was one of the first to advocate the laying of telegraph wires underground, and was also the inventor of an automatically closing gate for railroad crossings. He was, besides, an expert photographer; and he taught photography free of charge to many striving young men, thus enabling them to earn their livelihood.

Bernstein enjoyed great popularity in his later years, and when he died was mourned as one of the great popular teachers of the German nation. The degree of doctor of philosophy was conferred on him by the University of Tübingen in 1876. Julius Bernstein, now professor at Halle, is his eldest son.

BERNSTEIN, BÉLA: Hungarian rabbi and author; born in Várpalota, Hungary, 1868; was graduated as Ph.D. at Leipsic, 1890, and as rabbi at the Budapest Seminary in 1893; since 1894 has officiated as rabbi at Szombathely (Stein-am-Anger). He published "Die Schrifterklärung des Bachja ben Ascher," Berlin, 1891, and collaborated in a Hungarian translation of the Pentateuch, published by the Jewish Hungarian Literary Society, 1898. A monograph upon the Hungarian Revolution and the Jews was also published in Hungarian by the same association in 1898; "Die Toleranztaxe der Juden in Ungarn," Breslau, 1901.

s. L. V.

BERNSTEIN, BERNARD: Actor; born at Warsaw in 1861. He sang in the chorus of the Polish opera of that city, and appeared there as a comedian (1882) in the rôle of *Grandmother Jachne* in A. Goldfaden's comedy, "Die Zauberin." He played in several Jewish theaters in Russia, and when the Jewish theater was forbidden in that country (Sept. 14, 1883), he went to Galicia, in Austria, and then to Rumania, where he played in various rôles, usually comic. In 1892 he was engaged by Pool's Theater of New York, where he appeared first as *Zingitang* in Goldfaden's "Shulamith," and later in many other plays. He was especially successful in the rôle of *Shamai* in "The Jewish King Lear," by J. Gordin. Bernstein now (1902) resides in New York.

H. R. M. Se.

BERNSTEIN, EDUARD: Socialist leader, editor, and author; born in Berlin 1850. Beginning life as a clerk in a bank, Bernstein's mind became early imbued with socialistic ideas. In 1872 he joined the Social-Democratic party, and in 1878 gave up business to assist in editing, in Switzerland, the party organ, "Die Zukunft," which became afterward "Das Jahrbuch der Sozialen Wissenschaft." When the anti-Socialist law of Bismarck endangered the party's existence, and it became necessary to establish abroad a socialist organ to sustain and direct the young movement, Bernstein was entrusted with the editorship of the new organ, "Der Sozialdemokrat," published at that time in Zurich. When he was expelled from Switzerland and removed to London, the publication of "Der Sozialdemokrat" was also transferred thither (1888), and continued till it became unnecessary, after the downfall of Bismarck and the revocation of the anti-Socialist law in 1890. Since then he has acted as London correspondent of the Berlin "Vorwärts," and has written for the "Neue Zeit," "Sozialistische Monatshefte," and other periodical publications. In England he contributed a number of essays to the "Progressive Review" and "The New Age." Bernstein's sketch of Lassalle—contributed to an edition of his speeches and writings—has been translated into English and edited by him (3 vols., Berlin, 1893) under the title, "Ferdinand Lassalle as a Social Reformer," London, 1893. Bernstein is the author also of "Communistische und Demokratisch-Sozialistische Strömungen Während der Englischen Revolution des 17. Jahrhunderts," published in a collection of essays on the history of Socialism, entitled "Vorläufer des Neueren Sozialismus," Stuttgart, 1895.

The latest of Bernstein's productions, "Die Voraussetzungen des Sozialismus und die Aufgaben der Sozialdemokratie," Stuttgart, 1899, has roused general controversy throughout Europe. Professor Diehl, though not himself a Socialist, characterizes Bernstein as "one of the most talented, most learned, and clearest adherents of scientific Socialism," which opinion is shared by even the extreme Socialistic opponents of Bernstein—Kautsky and Mehring. Bourdeau regards this book as the most important that has appeared on Socialism since Marx's "Das Kapital." In this book, Bernstein, after having been for more than twenty years a champion of so-called "orthodox" Marxism, comes to the conclusion that many of Marx's views no longer correspond to the facts of modern social phenomena, and must be replaced by others more in consonance with modern society. Of the views peculiar to Marx, he does not place so much value upon the purely economic conception of history; he minimizes the importance of the theory of value, and repudiates the Hegelian dialectic method, though at the same time he claims that he still adheres to the spirit and evolutionary principles of Marx. Bernstein further emphasizes the great importance of cooperative associations, and urges the Socialist party to free itself from revolutionary phraseology and illusory hopes of the immediate downfall of bourgeois society, and to work hand in hand with all the democratic elements that fight for social reforms. Bernstein even concedes that the Social Democracy is practically acting on the proposed lines; but he wants a more consistent policy, as it seems to him that the remains of former conceptions still prevail in the party and hamper the progress of Socialism and the gradual realization of its ideals. In 1901 Bernstein was allowed to return to Germany, and in March, 1902, he was elected to the Reichstag on the Socialist ticket from Breslau, to succeed Dr. Schönlank, deceased.

S.

BERNSTEIN, ELSA (pseudonym, **Ernst Rosmer**): German dramatist; daughter of Heinrich Porges, the friend of Richard Wagner; born at Vienna; educated at Munich; and, for a short time, on the stage. An affliction of the eyes forcing her to retire, she thenceforth devoted herself to dramatic literature. Shortly after her marriage in 1892 to Max Bernstein, she wrote her first play, "Wir Drei," which created considerable discussion. It was really a dramatized version of the matrimonial and sexual views of Taine and Zola. Her next plays fell rather flat: "Dämmerung," 1893; "Die Mutter Maria," 1894; "Tedeum," 1896; "Themistokles," 1897; and "Daguy Peters." But unbounded admiration was elicited by "Die Königskinder," 1895—a dramatic fairy-tale. Though its plot was simple, the beauty of the theme and its poetry were such as to class it with Fulda's "Der Talisman."

S.

BERNSTEIN, HERMANN: Russian-American writer; born Sept. 20, 1876, at Shirwindt, Russia. When he was seven years of age his parents moved to Mohilev on the Dnieper, and Hermann was educated at the Jewish free school of that city. In 1893 the family emigrated to America and settled in Chicago. At first Bernstein struggled hard to make a living. In 1897 he engaged in literary work in New York, and was soon successful. He has made translations from the Russian, among them "Foma Gordeyev," by Gorki, New York, 1901; and has written "The Flight of Time, and Other Poems," 1899. A series of ghetto stories by Bernstein appeared in the New York "Evening Post," in "Ainslee's Magazine," and in "The Scroll," and these were reprinted in book form under the title "In the Gates of Israel," New York, 1902.

H. R.

F. T. H.

BERNSTEIN, HIRSCH: Russian-American editor and publisher; born in Vladislavov (Neustadt-Schirvint), government of Suvalki, near the Prussian frontier, March 25, 1846. He received the usual Jewish education and learned to write Hebrew fluently. He emigrated to the United States in 1870, settling in New York, where he still (1902) resides. While following from the first commercial pursuits, he has continued his Hebrew studies in his leisure hours. In 1870 he started "The Post," the first Judæo-German or Yiddish periodical in America; but, like many subsequent publications of that nature, it had but a short existence. In the same year he founded the "Ha-Ẓofeh be'Ereẓ ha-Ḥadashah," the first publication in the Neo-Hebraic language in America. It appeared weekly for five years and contained many interesting contributions, which throw light on local and contemporary Jewish history. Bernstein was at one time a constant contributor to "Ha-Maggid," "Ha-Lebanon," and "Ha-Karmel," and, after Ch. G. VIDAVER, was probably the first regular American correspondent to European Hebrew periodicals.

H. R.

P. Wi.

BERNSTEIN, HUGO KARL (pseudonym, **Karl Hugo**): Hungarian dramatist; born in Budapest 1808; died at Milan 1877. He began the study of medicine, but lacking means sufficient to continue it, he entered the army, where within twenty months he succeeded in laying by a sum that enabled him to qualify himself for medical examination. In 1830 he served during the Polish insurrection as army surgeon at Warsaw, whence he proceeded to Budapest, where he practised as homeopath. In 1839 he went to Paris, whither he had been called by Hahnemann. This was a turning-point in his career. The cosmopolitan French capital with its numerous theaters reawakened his youthful inclination for the stage and for poetry. He proceeded to Hamburg, where, in 1840, he published "Die Sehnsuchts-Klänge eines Hagestolzen." It was here, also, that he wrote the plays "Brutus und Lucretia," "Das Schauspiel der Welt," and "Der Stein der Weisen." In 1844 he returned to Budapest, where he resumed the study of the Hungarian language, which by this time he had almost forgotten. Here he published his "Psalmen eines Armen Poeten," "Egy Magyar Király," and the well-known "Bankier und Baron." He also wrote two French dramas, "La Comédie Infernale" and "L'Iliade Finie." In Berlin he was arrested for lèse-majesté, because of a book published by him under the title "Hugo Amber Bernstein, oder Das Verkannte Genie"; he was, however, released upon the plea of insanity. Though a genius, he was possessed by the idea that he alone had been appointed to revolutionize art, science, and religion—in short, the entire intellectual life of man.

S. L. V.

BERNSTEIN, IGNACY: Polish bibliophile and writer on proverbs; born at Vinnitza, government of Podolia, Jan. 30, 1836, where his father Samson had an important banking business. He was educated by the learned Moses Landau, son of Rabbi Samuel and grandson of R. Ezekiel Landau of Prague. In 1856 he married Eliza, the daughter of Meïr Edler von Mises of Lemberg; and in 1858 he removed with his parents to Warsaw, where he still resides, ranking among the prominent members of the Jewish community. In 1881, at his instance, a library of Jewish books was founded in connection with the Great Synagogue of Warsaw. Bernstein from the beginning took an active part in the management of the library and is now its chairman. He did much useful work in collecting proverbs of all nations. In 1888–89 his "Jüdische Sprichwörter"—a collection of Judæo-German proverbs—were published in the "Hausfreund," Warsaw; and in 1900 he published a remarkable illustrated catalogue of his library of about 4,800 works on proverbs, folk-lore, ethnography, etc., accompanying the list with valuable explanatory notes. This catalogue is unique in its way, being also a typographical art book. Many titles and ornaments of the more ancient works are reproduced from the originals. The full title of the catalogue is "Katalog Dziel Tresci Przyslowiowej Skladajacych Biblioteke Ignacego Bernsteina," 2 vols., Warsaw. He is now (1902) preparing a new and enlarged edition of his Judæo-German proverbs.

H. R.

BERNSTEIN, IGNATI ABRAMOVICH: Russian railroad engineer; born in Kremenetz, government of Volhynia, 1846; killed July 5, 1900, on the steamship "Odessa," between Harbin and Chabarovsk. He was educated at the high school of his native town, and at the St. Petersburg Institute for Engineers, from which he graduated.

In the eighties, while yet a student, he was received by the czar as a delegate from many Jewish families who petitioned for a restoration of their right of settlement outside the pale, of which they had been unlawfully deprived. Bernstein pleaded their cause so earnestly that the czar granted their request.

After serving as assistant district engineer on various railroads, Bernstein was in 1896 appointed first engineer at Vladivostok, and in the following year was sent to Tzitzikar, where he was given the direction of the fifth district of the Eastern Chinese Railway. On July 2 he sailed for Chabarovsk. When the vessel was three days out it was attacked by Chinese Boxers, who killed thirteen of the passengers, Bernstein being one of the victims. A memorial service was held Aug. 19 in the Great Synagogue at St. Petersburg.

Bibliography: *Voskhod*, Nov. 5, 1900, No. 62, p. 13; private sources.

H. R.

BERNSTEIN, ISRAEL: Russian Hebrew publicist; born about the middle of the nineteenth century at Velizh, government of Vitebsk; studied pharmacy at Moscow, and worked as a druggist in the colony Shchedrin, near Bobruisk. Bernstein's "Ha-'Atudim ha-'Olim 'al ha-Ẓon" (The Goats Which Leaped upon the Flock), in "Ha-Shaḥar" (vi. 366–382, 401–415), is a severe and vindictive attack on the misdeeds of the "Melammedim," the rabbis and the leaders of the Jewish communities (kahal), especially in the smaller towns. His "Binyan Zeḳenim u-Setirat Yeladim" (How the Old Build and the Young Destroy), which occupies over forty pages of vol. vii. in the above periodical, is written in the same spirit as the first; but here the author tries more to glorify the "Haskalah," or progress, and to point out the probability that the vivacious and active Ḥasidism of southern Russia will regenerate itself sooner than the dry scholarship and pedantry of the north or Lithuania.

In his third important article, "Le-maher Ge'ulah" (To Bring About Speedy Redemption), in "Ha-Shaḥar," x. 230–241, 288–297, Bernstein tries to prove that the great necessity of the times is that the rabbis and the rich Jews shall cease to use unlawful and revolting means to save their sons from being drafted into military service. This last article was written late in 1880, shortly before the great changes which took place after the assassination of Emperor Alexander II. in the following year.

Like all progressists who did not join the new nationalistic movements, Bernstein remained silent for a long time, and in a "letter to the editor" ("Keneset Yisrael," i. 7, Warsaw, 1886), Bernstein admits that the persecutions of the last five years have shattered all his former optimistic views and the hopes that the Jews of Russia by improving their conduct will obtain equal rights and be recognized as men and brethren. He admits his mistakes, and is overwhelmed by the despair which has seized most of the advocates of progress and assimilation in these trying chauvinistic times.

H. R. P. Wi.

BERNSTEIN, JOSEPH ("JOE"): American pugilist; born in November, 1877, in New York city. He first appeared in the ring in 1894, during which year he gained no less than five victories. In 1895 he won four fights and drew two, thus establishing himself as a featherweight of acknowledged prowess. In succeeding years he added greatly to his reputation.

Probably no other adept in boxing of his age has appeared in the ring so often as Bernstein, who has fought nearly 80 battles in seven years. Of these he has won 44, drawn 26, and lost 7, and in one case there was no decision. He defeated Jack Connors, James Larkins, William O'Donnell, and Solly Smith.

A. F. H. V.

BERNSTEIN, JOSEPH: Polish physician; born at Warsaw in 1797; died there in 1853. After graduating from the Warsaw Lyceum in 1815, he studied medicine at the Berlin University, from which he was graduated in 1822. After his return to Poland he was for a year assistant physician at the university clinic of Warsaw; in 1829 he was appointed house-physician of the Warsaw Jewish Hospital; and in 1834, chief physician. He is the author of "De Phthisi Pulmonum," published in 1818.

BERNSTEIN, JULIUS: German physiologist and medical writer; born at Berlin Dec. 8, 1839; son of Aaron Bernstein (1822–84). He studied at the University of Berlin, whence he was graduated as doctor of medicine in 1862. In 1865 he was admitted as privat-docent to the medical faculty of Heidelberg, and became in 1869 assistant professor of physiology. Two years later he obtained the appointment of professor of physiology at the University of Halle, a position he still (1902) occupies. In 1898 he received the title of "Geheimer Medizinalrath."

Bernstein is one of the leading physiologists of the day. Besides contributing numerous articles regularly, since 1865, to technical journals ("Archiv für die Gesammte Physiologie des Menschen und der Thiere"; "Archiv für Physiologie"; "Archiv für Anatomie und Physiologie"; "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," etc.), he, since 1888, has edited the "Untersuchungen aus dem Physiologischen Institut in Halle." He has written: "Untersuchungen über den Erregungsvorgang im Nerven- und Muskel-System," Heidelberg, 1871; "Die Fünf Sinne des Menschen," Leipsic, 1875 and 1900; "Lehrbuch der Physiologie," Stuttgart, 1894 and 1900.

S. F. T. H.

BERNSTEIN, KARL ILYICH: Russian jurist, professor of Roman law; born at Odessa Jan. 13, 1842; died at Berlin in 1894. He belongs, on the maternal side, to a Jewish family that has produced several noted scholars. He graduated from the Odessa Gymnasium in 1857, and after studying the ancient languages in Dresden, he attended successively the universities of Halle, Heidelberg, and Berlin, under Professors Vengerov and Gneist, who exercised great influence over him. In 1864 he obtained the degree of doctor of law from the University of Berlin, being the first Jew to receive it from that institution.

For two years Bernstein attended the sessions of the Halle circuit court, in order to familiarize himself with the practise of law. Toward the end of 1865 he returned to Russia with the intention of lecturing on Roman law, but found that he was debarred by his religion from holding a professorship in Russia. He thereupon applied himself to the study of Russian law, and subsequently practised it at Odessa and St. Petersburg successively. Bernstein continued his theoretical studies, and in 1871 presented at the University of St. Petersburg a thesis on Russian civil law, obtaining the degree of master of law.

In 1872 Bernstein married Felice Leonovna, a daughter of the Russian banker Leon Rosenthal, and after a prolonged tour through Europe permanently settled in Berlin. For eight years (1878–86) he lectured on Roman law at the University of Berlin as a privat-docent; in 1886 he was appointed associate professor; and in 1887 professor. In the latter year he renounced his allegiance to Russia and became a German subject. About this time there was established in connection with the university an institute for the instruction in Roman law of Russian students sent abroad by their government to prepare themselves for professorships, and Bernstein was appointed one of its directors.

Bernstein always took great interest in Jewish affairs. When the exodus of Russian Jews to the United States began, in 1881, he was an active member of the Berlin colonization committee, and for many years corresponded with Michael Heilprin on colonization matters.

Most of Bernstein's writings were published in various law periodicals; but some were issued in book form. His first published work was "De Delegationis Naturæ," Berlin, 1864. A Russian translation, under the title "O Sushchestvye Delegatzi po Rimskomu Pravu," was published in St. Petersburg in 1871. In this dissertation the author's views relating to delegation and novation anticipated those expressed in the famous treatise of Salpius. Bernstein's "Ucheniye o Razdyelitelnykh Obyazatelstvakh po Rimskomu Pravu i Noveishim Zakonam," St. Petersburg, 1871, was the first attempt ever made to apply the principles of Roman and common law to Russian legislation. Its leading idea was further developed in "Zur Lehre von dem Alternativen Willen und den Alternativen Rechtsgeschäften. Abtheilung I.: der Alternative Wille und die Alternative Obligation." Bernstein was also the author of the following works: "Zur Lehre vom Legatum Optionis," in "Zeit. der Savigny-Stiftung," 1880, pp. 151 *et seq.*; "Ueber die Subjectiven Alternativen Rechtsgeschäfte von Todeswegen," *ib.* 1883, iv.; "Die Alternative Obligatio im Römischen und im Modernen Rechte," in "Zeit. für Vergleichende Rechtswissenschaft," ii.; an analysis of Pescatore's "Die Sogenannte Alternative Obligatio," in "Zeit. für Handelsrecht," xxix.; "Zur Lehre von den Datis Dictis," in "Festgabe für Beseler," Berlin, 1884.

H. R.

BERNSTEIN, MAX (pseudonym, **Silas Marner**): German author; born May 13, 1854, at Fürth, Bavaria; now (1902) practising law at Munich. His literary activity is directed mainly to the stage. The most noteworthy of Bernstein's comedies are: "Cœur-Dame," "Mein Neuer Hut," "Ritter Blaubart," "Unbefangen," "Alles in Ordnung," "Ein Guter Mensch," and "Ein Dunkler Punkt." Of his dramas may be mentioned: "Dagmar," "Ruth," and "Gold." He also wrote a collection of short stories: "Kleine Geschichten," "Die Plauderei," and "Ein Kuss," as well as numerous miscellanies that have appeared either in newspapers or in book form. While Bernstein's works are very popular among the general reading public, they are little noticed by the critics and the literary historians. His wife is the author Elsa Bernstein.

Bibliography: Kürschner, *Deutscher Litteratur-Kalender*, s.v.

S. I. Ber.

BERNSTEIN, NAPHTALI HERZ: Author; lived in Russia about the first half of the nineteenth century. Being engaged in business, he devoted his leisure hours to study; applying himself especially to Biblical subjects, and writing much thereon, without, however, publishing any of his work. His defense of the Talmud, under the title "Eder Ḥakamim" (Mantle of the Wise), Odessa, 1868, was published after his death by his son, and edited by S. I. Abramowitsch. Bernstein wrote this little work in London (where he resided for several years), as a reply to McCaul's attack on the Talmud and rabbinical Judaism, and dedicated it to Solomon Herschel, the chief rabbi of England. In his defense he deals chiefly with the general principles underlying the Talmud, without touching upon the several points of McCaul's work, a fact which greatly lessens the value of his apology.

Bibliography: Introduction to *Eder Ḥakamim*.

L. G.

BERNSTEIN, NATHAN OSIPOVICH: Russian physiologist; born at Brody, Galicia, in 1836; died in Odessa Feb. 9, 1891. He received his first education from his grandfather, the eminent Solomon Eger, chief rabbi of the province of Posen; and, on the removal of his parents to Odessa in 1849, entered the gymnasium of that place, from which he graduated in 1853. He studied medicine at the University of Moscow in 1853–58, where he was awarded a gold medal in 1857 for his treatise, "Anatomia i Fiziologia Legochno-Zheludoch-navo Nerva." In 1861 he became consulting physician of the city hospital of Odessa, and associate editor of the Russian-Jewish periodical "Sion," until its suppression by the government in April, 1862. In 1865 he was appointed instructor of anatomy and physiology at the newly established New-Russia University at Odessa; and from 1871 lectured there on anatomy as assistant professor, but was not confirmed in this position by the government. He devoted much of his time to the Society of Physicians of Odessa, having been secretary of it for two years, vice-president for eight years, and president for fourteen years. He was an alderman of the Odessa city council, director of the Talmud Torah, director of the city hospital, and honorary justice of the peace. His works appeared in the following publications: the "Moskovskaya Meditzinskaya Gazeta," 1858; "Moskovskoe Obozryenie," 1859; "Biblioteka Meditzinskikh Nauk," 1859; "Sion," 1861–62; "Meditzinski Viestnik," 1864; "Sovremennaya Meditzina," 1863; "Arkhiv Sudebnoi Meditzìny," 1864; "Gazette Médicale de Paris," 1865; and many other medical periodicals. Of his manual on physiology, entitled "Rukovodstvo Chastnoi Fiziologii," two parts were published at Odessa in 1868.

H. R.

BERNSTEIN-SINAIEFF, LEOPOLD (usually called **Sinaieff**): Russo-French sculptor; born at Wilna Nov. 22, 1868. He studied drawing in his native town, and at the age of fourteen settled in Paris. As a student under Dalou, his first exhibited work was a bust at the salon of the Champs Elysées in 1890. Since then he has produced busts in bronze and marble of many distinguished persons, among whom were Count Waldeck, Rambaud, Nicholas de Giers, the Russian ambassador, and Léon Reynier, the violinist. One of his masterpieces is "Ezra Mourning." This statue, in plaster, became the property of the state in 1892, and was given to the museum at Sens; in 1897 it was reproduced in marble. At the Paris Exhibition of 1900 this and other statues, portraits, groups, and mortuary monuments were exhibited; and they received a medal. Among other distinctions conferred upon him, Sinaieff was created a chevalier of the Legion of Honor in 1901. He is at present (1902) engaged upon a bust of Tolstoi.

H. R. J. W.

BERNSTORFF, CHRISTIAN GÜNTHER, COUNT OF: Danish and Prussian statesman; born April 3, 1769, in Copenhagen; died March 28, 1835. As early as 1787 he entered the diplomatic service through the influence of his father, Count Andreas Bernstorff. From 1789 to 1794 he served in Berlin, first as secretary of legation, then as ambassador, and was finally sent to Stockholm in the same capacity. On the death of his father, in 1797, he was appointed secretary of state, and in 1800 prime minister, which position he held till 1810. He represented Denmark at the court of Austria from 1811 to 1815, and participated in the Congress of Vienna (Sept., 1814, to June, 1815), where, in behalf of his government, he advocated the emancipation of the Jews of Holstein. From 1817 to 1818 he represented Denmark at the court of Berlin. When, in Sept., 1818, Lewis Way presented his memorial in behalf of the Jews to Alexander of Russia, then at Aix, Bernstorff declared himself ready to give any information with regard to the question of the emancipation of the Jews.

In 1818 Frederick William III. of Prussia appointed Bernstorff Prussian minister of foreign affairs, in which capacity he served till his retirement in 1832.

BERODACH BALADAN. See Merodach Baladan.

BERŒA: Identified with the modern Haleb or Aleppo, the scene of the death of Menelaus, who was killed by being smothered in ashes in one of its towers said to be 55 cubits in height (II Macc. xiii. 4).

J. Jr. G. B. L.

BEROTHAH (BEROTHAI): A city of Hadadezer, from which David obtained much brass subsequently used by Solomon in making the brazen sea, pillars, and vessels of brass (II Sam. viii. 8). In the parallel account of I Chron. xviii. 8 it is called

Chun. In Ezekiel's ideal Israel (xlvii. 16) it was located on the northern border.

J. JR. G. B. L.

BERR, CERF JULIA. See Epstein, Julia Beer.

BERR, EMILE: French journalist; born at Lunéville, France, June 6, 1855. Having finished his classical studies at the Lyceum of Vanves and afterward at the Louis-le-Grand Lyceum in Paris, he engaged in a commercial career from 1875 to 1880 and attended to exchange transactions from 1880 to 1886. During the latter period he made his début in journalism, writing for "La France du Nord," and contributing essays on economic questions to the "Nouvelle Revue," which was then just founded. In 1886 he gave up his business career altogether, and thenceforth devoted himself to journalism, working first on the "Petite République Française," then on the "Petit Parisien"—on which latter he applied himself especially to economic questions—and in July, 1888, on the "Figaro," with which he has since been identified. He has contributed also to the following: "Figaro Illustré," "Illustration," "XIXme Siècle," "Liberté," "Revue Bleue," "Vie Parisienne." In the last-mentioned weekly he published between the years 1892 and 1894 some notes of travel under the pseudonym "Guy," and in 1898 a series of comments on topics of the day under the title "Confidential Letters," which latter attracted much attention. He also published in this journal his notes on Norway, which appeared in book form under the title "Au Pays des Nuits Blanches," Paris, 1900.

Berr has done much work as foreign correspondent for his paper, interviewing personages of high political and social standing; and for this purpose undertook several trips to England, Switzerland, Belgium, Tunis, Bulgaria, Bosnia, Russia, and Alsace-Lorraine. He represented the "Figaro" in Asia Minor at the opening of the railway from Mondania to Broussa; and then, in 1891, he had an interview with Stambuloff at Sofia, which was commented on by the European press. In 1894 he was appointed chief of the auxiliary service of the "Figaro," and in this capacity edited its literary supplement. In 1896, when the "Figaro" was enlarged to six pages, Berr resumed his place in its editorial office, where (1902) he writes sometimes under his own signature and sometimes under the pseudonym "Fabien." Since 1885 Berr has been a member of the Société d'Economie Politique, and also of the Société des Journalistes Parisiens. In 1900 he received the cross of the Legion of Honor.

S. I. B.

BERR, GEORGE: French actor and dramatist; born at Paris July 31, 1867; brother of Emile Berr. He was educated at the lyceums of Vanves and Charlemagne, but, yielding to an irresistible love for the stage, he, at the age of sixteen, left his classical studies for the Conservatoire, and became the pupil of Got. In 1886 he won the first prize for comedy in a scene from "Les Plaideurs," and joined the Comédie Française. In 1892 he was nominated a member (*sociétaire*), and since then has acted the comic parts in the classical and modern repertoires.

Berr is equally excellent in purely lyrical works. He interprets the "Romanesques" of Edmond Rostand with the same superiority as the "Gringoire" of Théodore de Banville, in which he is considered to equal Coquelin, the creator of the rôle, who has never been replaced since he left the Théâtre Français. It is in this wide range of characters that the originality of Berr's talent manifests itself. In 1901 he succeeded M. Worms in the Conservatoire as professor of declamation.

As a dramatist Berr is known by the pseudonym "Colias," which is an anagram of his mother's name, "Ascoli." It is therefore probable that the Berrs are connected with the family of Chief Rabbi Ascoli, and M. Ascoli, who took part in the centennial commemoration of the Institut de France.

Berr has published two volumes of comedies: "Pour Quand on est Deux" and "Pour Quand on est Trois." In 1899 he, together with Maurice Froyez, staged in the Théâtre Cluny a farce-comedy, "Plaisir d'Amour," which was a great success. He is the author of a great number of unpublished humoristic songs, which were circulated in manuscript among his colleagues.

S. I. B.

BERR ISAAC BERR OF TURIQUE: French manufacturer; born at Nancy in 1744; died at Turique, near Nancy, Nov. 5, 1828. He came of a rich and estimable family; received an excellent education, especially in Hebrew and rabbinical literature—in the latter from Jacob Perle, chief rabbi of Nancy. Inheriting the title of syndic of the Jewish community of Nancy, bestowed upon his father in 1753 by King Stanislaus, he took an active part in the direction of the affairs of the community.

In 1789 he was elected by the Jews of Alsace deputy to the States-General, where he was admitted to plead for Jewish emancipation before the Assembly. At about that time he published a pamphlet in which he refuted the anti-Jewish discourse delivered by De la Farre, bishop of Nancy. Berr was appointed successively member of the Assembly of Notables and member of the Sanhedrin; and he coöperated effectively in the organization of Jewish worship in France and in Italy. In his old age he retired, pensioned by the king, to one of his estates called "Turique"—the name of which he added to his own with the royal permission.

Berr was the author of the following works: (1) "Discours des Députés des Juifs des Provinces des Evêchés d'Alsace et de Lorraine, Prononcés à la Barre de l'Assemblée Nationale," Paris, 1789; (2) "Lettre du Sieur Berr Isaac Berr à Monseigneur l'Evêque de Nancy," Paris, 1790; (3) "Lettre d'un Citoyen," Nancy, 1791; (4) "Réflexions sur la Régénération Complète des Juifs en France," Paris, 1806; (5) "Lettre du Sieur Berr Isaac Berr à Grégoire, Sénateur," Nancy, 1806; (6) "Discours du Sieur Isaac Berr," Paris, 1806.

Bibliography: *Revue Orientale*, ii. 62-63; Grätz, *Gesch. der Juden*, xi. 184 *et seq.*; Kahn, *Les Juifs de Paris Pendant la Révolution*, p. 27; Tama, *Recueil de Procès-Verbaux*, pp. 19 *et seq.*

S. I. Br.

BERR, MICHEL: The first Jew to practise in France as a barrister; born at Nancy 1780; died there July 4, 1843. His father, Isaac Berr de Turique, who made himself known by his great ability as a writer and as a champion of Jewish emancipation, intended his son to continue his work. With this end in view, he had him carefully educated by the most eminent masters. The poet Wessely recommended to him as a teacher a learned young man of Breslau, Benjamin Wolf, who in France assumed the name of "Louis." Under the direction of this Louis, Michel made rapid progress in the study of the Hebrew and German languages and literature. With no less success he attended the lectures of the central school of Nancy. At Strasburg, where he studied law, being at the time scarcely twenty years old, he began his career as an author with a pamphlet entitled "Appel à la Justice des Nations et des Rois," or "Adresse d'un Citoyen Français au Congrès de Lunéville, au Nom de Tous les Habitants de l'Europe qui Professent la Religion Juive." This was an eloquent protest against the oppressive anti-Jewish laws then existing in the greater part of Europe.

An Author at Twenty.

On graduating from the university Berr returned to Nancy, where he pleaded brilliantly in several celebrated cases. At the same period he addressed to the minister of public worship observations on the speeches delivered by the latter on the law of Germinal 18, tenth year: he protested chiefly against the omission of any mention of Jewish worship in the Concordat.

About 1803 Berr accompanied his father-in-law, Berr-Bing, to Paris, where he soon made himself known by several literary articles in the "Décade Philosophique." Three years later he was elected deputy to the Assembly of Jewish Notables, and in the following year was appointed secretary of the Grand Sanhédrin. Through this honorable title and the French translation he made of the Hebrew poems of Kargan, Cologna, and Meyer in honor of the emperor, he gained the favor of the government and was called to the post of chief of division in the Ministry of the Interior in the new realm of Westphalia. There he made the acquaintance of the Swiss historian Johannes Müller, who, in his letters to his brother, speaks of Berr in most eulogistic terms.

Secretary of Sanhedrin.

On his return home, in 1809, Berr was appointed head of the office at the prefecture of Meurthe. At this period he published his "Essai sur la Vie et les Ouvrages de Bitaubé," and many papers on various subjects mentioned in the memoirs of the Academy of Nancy. In 1813 he returned to Paris, and, giving up his practise at the bar, devoted himself to literature. For three years he collaborated with the "Mercure de France," "Mercure Etranger," and "Magasin Encyclopédique." In 1816 he lectured on German literature at the Athénée Royal of Paris, and translated into French the tragedy "Luther" by Werner, accompanied by notes. His competence as a translator was much appreciated; and in 1817 he was appointed translator of the German papers at the Foreign Office, a post which he occupied until it was abolished in 1823.

Leaves Law for Literature.

The great reputation that Berr enjoyed excited the hostility of the envious; and attacks in the press made by his adversaries affected him deeply. He was particularly disheartened by his unsuccessful candidature for membership of the Central Consistory, this position being one that he greatly coveted. In 1826 he went to Brussels, and devoted himself to politics. On his return he wrote on the works of Salvador, and contributed to the "Gazette des Cultes." In 1837 he left Paris and settled at Nancy, where he quietly worked until his death.

Besides the above-mentioned works, Berr contributed numerous articles to scientific journals. The most important for Judaism were: (1) "Notice Littéraire et Historique sur le Livre de Job" (Paris, 1807); (2) "Notice sur Maimonides" (Paris, 1816); (3) "Du Rabbinisme et des Traditions Juives" (Paris, 1822); (4) "De la Littérature Hébraïque et de la Religion Juive" (Paris, 1829); (5) "De l'Immortalité de l'Ame chez les Juifs Anciens et Modernes" (Paris, 1822); (6) "De la Fête du Nouvel An et du Jeûne des Expiations, ou Grand Pardon chez les Juifs" (Paris, 1829); (7) "Nouveau Précis Élémentaire d'Instruction Religieuse et Morale, à l'Usage de la Jeunesse Française Israélite" (Nancy, 1839); (8) "Rite et Réglement pour le Culte Israélite de Metz" (Nancy, 1842).

BERRUYER, JOSEPH ISAAC: French Jesuit; born at Rouen Nov. 7, 1681; died at Paris Feb. 1758. He was the author of a work entitled "Histoire du Peuple de Dieu," Paris, 1728, a history of the Jews from the earliest times to the birth of Jesus, according to the Bible, and a critical study of the Gospels and the Epistles. This work, written in a non-religious spirit, and interspersed with hazardous observations, provoked the indignation of the Church leaders. The discussions it called forth made it popular, and numerous editions and translations of it appeared.

BERSHAD: Town in the district of Olgopol, province of Podolia, Russia, on the road between Olgopol and Balta, at the rivers Dakhna and Bershadka. In 1900 the Jewish population was 4,500, out of a total population of 7,000. The Jewish artisans numbered about 500. The community possessed one synagogue and six houses of prayer. In June, 1648, during the uprising of the Cossacks under Chmielnicky, the most bloodthirsty of his leaders—Maksim Krivonos—conquered Bershad and slew all the Jews and Catholics. S. A. Bershadski, the celebrated historian of the Russian Jews, descended from a Cossack family at Bershad, where his great-grandfather officiated as a Greek Orthodox priest.

Bershad was famous in the middle of the nineteenth century for its Jewish weavers of the "tallit" (scarfs used by the Jews during prayer in the daytime). But at the end of the century the demand decreased, and the industry declined, leading many of the weavers to emigrate to America.

H. R.

BERSHADSKI, SERGEI ALEKSANDROVICH: Russian historian and jurist; born at Berdyansk March 30, 1850; died in St. Petersburg 1896. He graduated from the Gymnasium of Kerch in 1868, and from the University of Odessa in 1872; lectured at the University of St. Petersburg on the history of the philosophy of jurisprudence, from 1878 to 1883; and was appointed in 1885 assistant professor. At the Lyceum he delivered lectures also on the history of Russian jurisprudence; and at the Military Law School of St. Petersburg, on general jurisprudence. His famous work on the Lithuanian Jews, "Litovskie Yevrei," published in 1883, is the first attempt in this field of historical investigation.

Bershadski's father was a Greek Orthodox priest, while his great-grandfather on his mother's side, Kovalevski, was a *hetman* of the Cossacks. The Cossack traditions of his family found expression in his violent prejudice against the Jews. He states, in his autobiographical notes, how in his childhood he learned of the horrors of the times of CHMIELNICKY in connection with the "homicidal Jews." From the old blind bandore-player (bandurist) at the fairs, from the reaper in the field, and from the peasant girls at the spinning-wheel on long winter evenings, he had heard the same tale of the Jew as "the defiler of the sanctuary." This incited him to make a study of the Jewish question. "I started," he declares, "as a confirmed Jew-hater." His Jewish colleagues at the university remember how he used to threaten them, saying, "Wait, some day I will expose you!" He went to the Archives and there began to search for material for his threatened exposures. The result was his work, "Opyt Novoi Postanovki Nyekotorykh Voprosov po Istorii Yevreistva v Polshye i Litvye," an attempt to put into a new light some questions concerning the history of the Jews in Poland and Lithuania. To the surprise of some of his friends this appeared in the "Yevreiskaya Biblioteka." And their surprise grew when they read its important and on the whole favorable statements. The result of further researches appeared soon after in the "Voskhod," and in the "Russki Yevrei," both of them Jewish publications, and the name of Bershadski became so closely connected with Jewish topics, that most of the readers of these periodicals were firmly convinced that this so-called "Jew-hater" was a Jew himself. Soon afterward appeared his principal work, "Dokumenty i Regesty," etc., containing about 700 original documents and records from the early period of Jewish settlement in Lithuania, 1388–1569. Russian historiography shows no other instance of an equal collection devoted to one special subject. About the same time he published his "History of the Lithuanian Jews." Though this work covers a period of only two hundred years, it endeavors to depict the entire course of Lithuanian-Jewish history.

Bershadski's chief characteristics as a writer are a keen historical eye and truthfulness. He has the merit of having been the first impartial historiographer of the Jews in Lithuania. His published works are: (1) "Litovskie Yevrei, Istoriya ikh Yuridicheskavo i Obshchestvennavo Polozheniya v Litvye," St. Petersburg, 1883, being a history of the legal and social conditions of the Jews at Lithuania in 1388–1569; (2) "Dokumenty i Regesty k Istorii Litovskikh Yevreyev," St. Petersburg, 1882, bearing upon the history of the Jews in Lithuania; (3) "A. E. Rebiichkovich, Podskarbi Velikavo Knyazhestva Litovskavo," Kiev, 1888; (4) "Yevrei Korol Polski," St. Petersburg, 1890, concerning a Jew king of Poland. Many articles on Jewish-Polish and Jewish-Lithuanian history in the periodicals were contributed by him in "Yevreiskaya Biblioteka," "Voskhod," "Russki Yevrei," and other periodicals.

H. R.

BERSHADSKY, ISAIAH (pseudonym for **DOMOSHEVITZKY**): Russian novelist; born in Saimoscha, near Slonim, government of Grodno, 1874; now a teacher in Yekaterinoslav. Bershadsky is one of the youngest Neo-Hebraic writers of fiction in Russia, and one of whom much may be expected. His "Zikronot Tugah" (Sad Memories), in "Ha-Shiloah," vi. 405–416, is the story of a Talmudist who went into business, imitated the vices and extravagances of the rich, and, after being ruined by living above his means (a fault common to old-style Russian merchants), is a mental and physical wreck at fifty-five, with a devoted wife who did not share his pleasures but comforts him in his despair. The author shows power and keen insight into human nature, and has the sympathy for his erring characters which denotes the true artist. In his silhouettes, "Ma'asim be-Kol Yom" (Every-Day Occurrences), which appeared in the "Aḥiasaf" calendar for 1901, he places before the reader with a few masterly strokes types and incidents which are not easily forgotten. The best of them is probably "Ha-Shemu'ah" (The Report). This describes the agony of a liberal Jew when he learns from his sons, whom he has established in business in a great city, that they are compelled to embrace Christianity in order not to be ruined by expulsion. The anomalies of religious life are presented in their most cruel phases; for the author states that the old man was liberal and cared little about the religious conduct of his sons, sometimes even encouraging transgression in small things, but that he is crushed by their conversion, which is to some extent the outcome of their training under his supervision.

In his novel, "Be'en Maṭṭarah" (Without Aim), Bershadsky ably describes the life of progressive Hebrew teachers in Russia, and the superiority of a Zionist idealist over a brilliant cynic, *Adamovich*, who is the hero of the novel, and who has no aim in life. These novels as well as two others, "Defusim u-Ẓelalim" (Types and Shades) and "Neged ha-Zerem" (Against the Current), were published in the last two years by the "Tuschia" of Warsaw. Bershadsky also contributed several short sketches to "Ha-Dor."

H. R. P. WI.

BERSOHN, MATHIAS: Polish bibliographer, archeologist, and writer on fine arts; born at Warsaw 1826. He is the owner of a choice library which contains a valuable collection of rare books and manuscripts. Among other works he wrote: (1) "W. Stosie," 1870; (2) "Tobias Kohn," Cracow, 1872, the biography of a Jewish physician of the seventeenth century, the author of "Ma'ase Tobia"; a supplement, taken from a work entitled "Metryka Koronna," giving important documents on the history of the Jews of Poland, is added to "Tobias Kohn"; (3) "Marcin Teofil Polak," 1889; (4) "Studency Polacy na Universytecie Colonskim xvi i xvii, w"—a pamphlet on old South-Russian synagogues; and many articles in the Polish periodicals "Tygodnik Illustrowany" and "Biblioteka Warszawska."

Bibliography: S. Orgelbrand, *Encyklopedja Powszechna*, ii., *s.v.*, Warsaw, 1898.

BERTENSOHN, BERNARD: Russian teacher and translator; born at Odessa at the end of the eighteenth century; died there 1859. He received a careful education in the school of Basilius Stern, and for many years was a teacher of languages in Odessa. Bertensohn contributed to the "Odesski Vyestnik" and other periodicals, and in 1841 translated into Russian L. Philippson's novel, "Die Marannen."

Bibliography: *Voskhod*, 1884, iv. 146.

H. R. V. R.

BERTENSOHN, JOSEPH VASILIEVICH: Russian court-physician; born at Nikolaiev, government of Kherson, in 1835. He received his early education at the gymnasium of Odessa, whence he was graduated in 1849; studied at the Richelieu Lyceum in Odessa, at the University of Kharkov, and then at the University of Dorpat, from the latter of which he graduated in 1857 with the degree of doctor of medicine. In 1859 he was appointed physician of the city hospital at Vitebsk. He went abroad in 1861 and attended the lectures of Virchow, Traube, Skoda, and Helmholtz. In 1862 he became attached to the medical department of the Ministry of the Interior, and soon after was appointed a member of the St. Petersburg board of health. He assumed the editorship of the "Arkhiv Sudebnoi Meditziny Obshchestvennoi Higieny" in 1865. The municipal government of St. Petersburg entrusted him, in the following year, with the management of the Cholera Asylum, which in 1867 was transformed into the First City Hospital. To his efforts were due the establishment of a field-hospital and a training-school for medical assistants. Bertensohn is still director of these institutions, the first of their kind in Russia. In 1875 he established a free dispensary, which was named in honor of Grand Duchess Maria Alexandrovna. During the Franco-Prussian war he accompanied the celebrated surgeon Pirogov to the battlefield. From there he sent a series of valuable articles on military hygiene. He is a privy-councilor, an honorary physician to the Russian court, a member of many learned societies, and an honorary member of the medical associations of Vitebsk, Kiev, and St. Petersburg. His works on various questions of public hygiene and sanitary reform have been of great practical importance. Bertensohn was one of the most ardent propagators of Pirogov's advanced ideas and has done a great deal toward their realization. Besides numerous articles contributed to medical periodicals, he has published the following works: (1) "O Ghermafroditismye, etc., v Sudebno-Meditzinskom Otnoshenii"; (2) "Barachnye Lazaretz v Voyennoe i Mirnoe Vremya," St. Petersburg, 1871; (3) "Baraki St. Peterburgskavo Damskavo Lazaretnavo Komiteta," St. Petersburg, 1872; (4) "L'Hôpital Baraque Etabli par le Comité des Dames de St. Pétersbourg, d'Ordre de S. M. l'Impératrice," St. Petersburg, 1874.

Bibliography: Vengerov, *Kritiko-Biograficheski Slovar*, iii., St. Petersburg, 1892; *Entziklopedicheski Slovar*, ixi., St. Petersburg, 1892.

H. R.

BERTENSOHN, LEV BERNARDOVICH: Russian physician; born at Odessa Aug. 10, 1850; son of Bernard and nephew of Joseph Bertensohn. He graduated in 1867 from the Larin Gymnasium, St. Petersburg, and in 1872 from the St. Petersburg Medical Academy. He was assigned to duty in the clinical military hospital, under Eck and Eichwald. From 1876 to 1887 Bertensohn lectured at the Rozhdenstvenskaya Hospital on the diagnosis and treatment of diseases. In 1887 he was appointed, by the minister of crown domains, president of the commission for the improvement of the mineral springs system of the Caucasus. Bertensohn published his chief work on balneology in 1873, under the title "Mineralnye Vody, Gryazy, i Morskiya Kupanya v Rossii i Zagranitzei," being assisted therein by Dr. Voronikhim. Among his other works may be mentioned "Pseudoleukemia Prinyataya za Tif," 1879 (reprinted in German in "St. Petersburg Medicinische Wochenschrift," 1879, No. 12). Bertensohn also published in the "Meditzinski Vyestnik," in 1883, an article on Turgenef, who, in his closing years, was treated by Bertensohn. With Ivanov Bertensohn translated Kuntz's "Lehrbuch der Praktischen Medicin," and with Dr. Popov he issued a work on the Caucasian mineral waters, "K Voprosu ob Ustroistvye Kavkazskikh Mineralnikh Vod," 1887.

Bibliography: Vengerov, *Kritiko-Biograficheski Slovar*, iii. 126, St. Petersburg, 1892; *Bolshaya Entziklopediya*, iii., *ib.* 1901.

H. R. V. R.

BERTENSOHN, VASILI ALEKSEYEVICH: Russian agriculturist; born in Odessa Sept. 12, 1860. He belongs to the hereditary nobility, his father, Dr. Aleksei Vasilievich Bertensohn, having been a state councilor and knight of the Order of St. Vladimir. Vasili graduated from the technical high school of Odessa in 1879, studied for a year at the Imperial New-Russian University at Odessa, and then at the Petrovsko-Razumovskoye Agricultural Academy in Moscow, whence he graduated in 1884. From 1885 to 1894 Bertensohn was attached to the Department of State Domains, and was stationed at Odessa as adviser to the superintendent of the governments of Kherson and Bessarabia. He was at the same time secretary to the Odessa committees on phylloxera and sericulture, and undertook several agricultural commissions for the department.

In 1889 Bertensohn was commissioned to western Europe for the purpose of studying the conditions of sericulture and viticulture. In 1893 he was appointed agricultural expert to the southern governments, and commissioned to investigate the needs of sericulture and other agricultural problems in those districts. The following year, Bertensohn was made an extra official in the Department of Agriculture and State Domains, in addition to his other appointments. In 1900 he became chief expert on agriculture to the governments of Podolia and Volhynia, and chief expert on sericulture in South Russia. He is the representative of the Department of Agriculture and State Domains in connection with the various agricultural institutions of Odessa; and was commissioned by his department to inspect the agricultural section of the Paris Exposition of 1900.

Bertensohn is an aulic councilor and knight of the orders of St. Stanislav and St. Anne. He was also decorated by Emperor Alexander III. with his "commemoration" medal; and Bertensohn's department has awarded him a special medal for his services to agriculture. In connection with Jewish charitable institutions Bertensohn has been very active. The farm of the Odessa Hebrew Orphan Asylum was organized on lines proposed by him, and he superintended it for a considerable time. In 1893, at the invitation of Baron de Hirsch, he visited Paris and London for the purpose of joining in the deliberations on the proposal to establish Jewish colonies in the Argentine Republic. He was offered the position of superintendent of the agricultural sections of these colonies, but did not accept it.

Bertensohn has been a prolific contributor to the agricultural journals "Zemledyelcheskaya Gazeta," "Zemledyelie," and the "Odesski Vyestnik," as well as to several periodicals. On agricultural education, in connection with the Jewish question, he has published essays in the "Voskhod" and "Odesski Vyestnik." Many of these have been issued in pamphlet form; among them "Vinogradarstvo na Peshchannoi Pochvye," "Shelkovodstvo v Khersonskoi, Bessarabskoi i Tavricheskoi Guberniakh," and "Polskaya Pshenitza."

H. R.

BERTHEAU, ERNEST: Biblical and Oriental scholar; born Nov. 23, 1812, in Hamburg; died May 17, 1888, in Göttingen. In 1843 he was appointed ordinary professor in the University of Göttingen, where he lectured on Oriental languages, Biblical exegesis, Hebrew archeology and history. Bertheau was the author of the following works: (1) "Die Sieben Gruppen Mosaischer Gesetze," Göttingen, 1840; "Zur Gesch. der Israeliten," Göttingen, 1842; and (in the "Kurzgefasstes Exegetisches Handbuch zum Alten Testament") commentaries on Judges and Ruth, Leipsic, 1845; Proverbs, Leipsic, 1862; Chronicles, Leipsic, 1854; Ezra, Nehemiah, and Esther, Leipsic, 1862. Noteworthy also is his edition of the smaller Syriac grammar of Bar-Hebraeus, Göttingen, 1843.

Bibliography: Brockhaus, *Konversations-Lexikon*; *La Grande Encyclopédie*.

T. B. B.

BERTHOLD OF REGENSBURG: Monk and itinerant preacher; born about 1220; died in Regensburg (Ratisbon) Dec. 14, 1272. This most celebrated popular preacher of the Middle Ages, known to the people as "Rusticanus," traveled through Bavaria, the Rhine Provinces, Alsatia, Austria, Moravia, Hungary, Silesia, and Bohemia, and exercised an enormous influence upon the populace by his fiery speech and his lofty moral ideals. The last part of his life-work was spent in the interest of the Crusades.

It is supposed that in his many journeys he came in contact with the Jews, though there are no direct data on this point. In his numerous sermons, however, occasional references to the Jews show that he belonged to those ecclesiastics who, though good churchmen and brought up in the traditions of their church respecting the Jews, were liberal-minded enough to treat them as human beings to whom the state owed a certain amount of protection. Some qualities, which Berthold must have observed among the Jews who came under his notice, appealed strongly to him; and on one occasion he warned his hearers to be constant in their morning and evening prayers, adding, "In this the Jews put you to shame." On another occasion he used the same expression in regard to the holiness of family life. It is more surprising, however, to see how forcibly he speaks against what in his time was becoming the fashion of the day—the attempt to compel the Jews to become Christians. He declares it to be foolish to forcibly push the Jews into the water. He is also very decided in his distaste for another method then growing common; namely, that of forcing the Jews to see the error of their ways. The many disputations, which from that time on were held, were regarded by Berthold as quite useless; for he says: "You all desire to have a dispute with the Jews. You are ignorant; they are learned in Holy Writ. They know well how to out-talk you; and because of this you always emerge the weaker." In regard to the position of the Jews before the law he has this to say: "Kings ought to guard the Jews as they guard the Christians in respect of their persons and their chattels, if taken in during time of peace; and he who kills a Jew must stand for it as must a Christian, when the emperor has received them in time of peace." He then quotes the usual reasons given by the Church for permitting Jews to live among Christians: "First, because they are witnesses that our Lord was by them crucified . . . ; secondly, because those of them who shall be living at the time of Antichrist will all have become Christians before the last day."

There are, however, many indications that, despite these liberal expressions, Berthold was still the child of his day, and his ecclesiastical dislike of the Jews was increased by the great horror which he had of usury in any form; but it must be remembered that, like Bernhard of Clairvaux (1146) and the minnesinger Rumelant (thirteenth century), he is as vigorous against Christian usury as against Jewish. This popular prejudice is seen in his speaking of "des stinkenden Juden falschen Geschwätz," and mentioning them in connection with thieves, robbers, heathens, heretics, and perjurers. On one occasion he did not scruple to say: "Mr. Jew, the devil had long ago broken thy neck, had it not been for the angel that watches over thee."

Berthold is also of interest in the history of mysticism; for in him is seen the close connection between Christian and Jewish mysticism of the thirteenth century. He believed in a most elaborate angelology; and even the mystic value of the letters of the alphabet was not unknown to him.

Bibliography: The passages dealing with the Jews are quoted in Güdemann's *Geschichte des Erziehungswesens und der Cultur der Juden in Frankreich und Deutschland*, Index, s.v. *Berthold*, Vienna, 1880. The literature on Berthold will be found in Hauck's *Realencyklopädie für Protestantische Theologie und Kirche*, ii. 649, Leipsic, 1897.

G.

BERTINORO, OBADIAH (YAREH) B. ABRAHAM (called also **Bartinoro**): Celebrated rabbi and commentator on the Mishnah; lived in the second half of the fifteenth century in Italy; died in Jerusalem about 1500. He was a pupil of Joseph b. Solomon Colon (see the latter's Responsa, No. 70, ed. Venice, 62a), and became rabbi in Bertinoro, a town in the province of Flori, whence he derived his byname, and in Castello. The desire to visit the Holy Land led him to Jerusalem; and he arrived there March 25, 1488, having commenced his journey Oct. 29, 1486. His advent in Palestine marked a new epoch for the Jewish community there and indeed for the whole country. The administration of Jewish communal affairs in Jerusalem had fallen into the hands of iniquitous officials who tyrannized over great and small. The poor were pitilessly taxed for the Mohammedan government; the rich were similarly treated and driven from the city by exorbitant demands upon them, so that the Jewish community was on the brink of ruin (see Jerusalem).

Influence in Palestine.

Bertinoro's strong personality, his eloquence, and great reputation as a scholar led to his being accepted as the spiritual head of the community immediately upon his arrival. His first care was to raise the intellectual plane of the community, and for this purpose he interested the younger generation in the study of the Talmud and rabbinical lore, and he delivered sermons every other Sabbath in Hebrew, although the vernacular language was Arabic, one which Bertinoro never acquired. His connections in Italy supplied him with money for the support of the poor, which also added not a little to his influence. He succeeded in securing the abolition of the annual tax of 400 ducats, which had afforded such opportunity for oppression and injustice; in lieu a simple poll-tax payable direct to the government was instituted. When, on the expulsion of the Jews from Spain in 1492, many of the exiles settled in Jerusalem, Bertinoro became their intellectual leader. These Spanish Jews, far superior in intelligence, culture, and learning to the Arabian Jews of Palestine, presented Bertinoro with a site for a yeshibah in Jerusalem, which he founded, more than a thousand years after the extinction of the last academy in Palestine (see Academies in Palestine). Considerable support for the maintenance of the yeshibah was given by the Jews of Egypt and Turkey at Bertinoro's written solicitation. Isaac b. Nathan ibn Shulal, *naggid* or prince of Egypt, was especially helpful.

In the decade during which Bertinoro thus controlled the best interests of the Jewish community at Jerusalem, a radical change for the better developed. Shortly after his arrival he had actually been compelled upon one occasion to dig a grave because the community had provided no one to perform that labor; a few years later there had come into existence such benevolent institutions as hospitals, charitable relief societies, and similar associations, all under excellent management. His fame and reputation spread to all parts of the Orient, and he came to be looked upon as a rabbinical authority of highest eminence; even the Mohammedan population frequently called upon him to decide judicial cases. His scrupulous conscientiousness and moral earnestness were especially recognized. For instance, he harshly reproved the rabbis for exacting fees for services at weddings and divorces, a custom then general in Germany, and did not hesitate to style them robbers (commentary on Bekorot, iv. 6). He believed it their duty to perform religious ceremonies without monetary remuneration.

Literary Activity.

Bertinoro is usually known as the best commentator of the Mishnah; the importance of his commentary is illustrated by the fact that since its appearance (Venice, 1549) hardly an edition of the Mishnah has been printed without it; even Surenhuis in his Latin translation and commentary upon the Mishnah (Amsterdam, 1698–1703) translated Bertinoro. Its excellence lies in the fact that he selected the best afforded by Rashi and Maimonides and gave this in clear and easily comprehensible fashion; in the matter of originality, however, Bertinoro does not approach his distinguished predecessors, nor even his successor in this department, Yom-Ṭob Lipmann Heller.

Bertinoro is also the author of a supercommentary upon Rashi's Pentateuch commentary (published under the title "'Amar Naḳi" [Pure Wool], Pisa, 1810; reprinted in the collective work "Rabbotenu Ba'ale ha-Tosafot," Warsaw, 1889). His commentary upon Abot is, as Jellinek showed, only an extract from Simon Duran's work upon that book ("Monatsschrift," iv. 119, and an appendix added to a few copies of Jellinek's edition of Duran's Abot-commentary, Leipsic, 1855). Some liturgical productions by Bertinoro exist in manuscript in the Bodleian Library, Oxford (Nos. 1061; 2266, 6; in the first the name of his father is mentioned). He also wrote descriptions of his travels; and his letters to his relations in Italy, although intended only as private communications, are of great historical value. Most interesting in these letters (first published by S. Sachs in the "Jahrbuch für Gesch. der Juden," 1863, iii. 195–224) is the fund of information concerning the social and intellectual conditions of the Jews in Greece, Egypt, and Palestine. He shows himself therein not only a close observer, but a conscientious and unprejudiced chronicler. For example, he studied attentively the conditions of the Karaites in Alexandria, and did not hesitate to praise them for the possession of the very virtues which the Rabbinites denied to them, such as generosity and liberality (*l.c.* p. 208; the text is to be emended according to the manuscript mentioned in

Steinschneider, "Hebr. Bibl." vi. 131). His description of the Samaritans in Egypt (*l.c.* pp. 206–208) is one of the most valuable and reliable of medieval times.

Letters.

His letters have been translated into German by Neubauer, "Jahrbuch," *l.c.* pp. 225–270, and separately, Leipsic, 1863; into French by M. Schwab, "Lettres d'Obadiah," Paris, 1866; into English in the "Miscellany of Hebrew Literature," i., 1872, No. 7. All these translations, however, are based upon a very imperfect manuscript (see Steinschneider, *l.c.* vi. 131, xiii. 124, who gives many emendations from another manuscript). The Hebrew edition, published by M. T. Schwerdscharf, Kolomea, 1886, is simply a reprint of the same text. Collated passages from another manuscript, as well as a short letter by Bertinoro, were published by Steinschneider in "Yehudah we-Yerushalayim," ii. 1878. The Almanzi library contained Bertinoro's novellæ upon Moses of Coucy's work, "Sefer Miẓwot ha-Gadol" ("Semag")—see Luzzatto, in "Hebr. Bibl." v. 145; the work is now very probably in the British Museum.

Bibliography: Azulai, *Shem ha-Gedolim*, i. 151–153, ed. Benjacob; Conforte, *Ḳore ha-Dorot*, 19a, 24a, 28b, 30b, ed. Cassel; Luncz, *Jerusalem*, i. 113; ii. 28–32; iii. 2, 3; Steinschneider, *Cat. Bodl.* 2072–2073; Zunz, *G. S.* i. 177.

L. G.

BERTOLIO, ABBÉ: French cleric; member of the Commune of Paris in 1790. The National Assembly conferred citizenship upon the Jews of Bordeaux, Bayonne, and Avignon Jan. 28, 1790; but deferred granting it to those of Alsace and Lorraine. Hence, when the Jews of France petitioned the Assembly, Dec. 24, 1789, delegates from Paris appeared before the General Assembly of the Commune with the request that it pledge itself to support the petition of the Jews. On Jan. 30, 1790, the latter Assembly listened to the report of Abbé Bertolio, who, while favoring the Jews' request, proposed that the Assembly should take no steps in their behalf before consulting the districts and having obtained their approbation of the pledge requested. His proposition was adopted, and on Feb. 28 a deputation from the Commune, with the Abbé Mulot as spokesman and Bertolio as a member, appeared before the National Assembly, requesting it to extend to the Jews of Paris the decree giving citizenship to those Jews known as Portuguese, Spanish, and Avignonese. As is well known, this intervention of the Commune was not immediately effective.
